Jaddua appears to have been in office in B.C. 332, when Alexander the Great came to Jerusalem (Joseph. *Antiq.* xi. 8): how then could he be named by Nehemiah? The common, and perhaps the fairest, escape from this difficulty, is to regard the naming of Jaddua as an addition by a later hand. Yet it is just credible that Nehemiah wrote it, if we bear in mind that he lived to be an old man, so as possibly to see the year B.C. 370; and if we further suppose that Jaddua had at that time entered on his office, so that he filled it for about forty years, *i.e.*, till B.C. 332. In support of this conjecture, see especially Hävernick's *Einleitung*, ii. 320-324.

The exegetical helps for the explanation of this book are chiefly, Poli *Synopsis*; Jo. Clerici *Comm. in Lib. Historicis V. T.*, Amst. 1708; Maurer, *Comment. Crit. Grammat. in V. T.*, vol. i., Lips. 1833; Strigelii *Scholia in Nehem.*, Lips. 1575; Rambach, *Annotationes in Librum Nehemiae*; and Bertheau, *Exeget. Handbuch*, xvii.—B. D.

### NEHILOTH. [PSALMS.]

NEHUSHTA (נְהֻשְׁתָּא, *brass*; Sept. Νέσθα), the mother of king Jehoiachin (2 Kings xxiv. 8).

NEHUSHTAN (נְהֻשְׁתָּן; Sept. Νέσθαν; Alex. Νέσθον); the name given to the serpent of brass which Moses made in the wilderness, and which, preserved as a memorial of God's grace and power, became in later ages an object of idolatrous worship; on which account it was destroyed by king Hezekiah (2 Kings xviii. 4). It is disputed whether the name was given by Hezekiah in contempt, or was the name by which the idolatrous Israelites designated it as the object of their worship. Those who take the former view suppose that Hezekiah, to disabuse the minds of the people of the superstitious reverence with which they regarded the serpent, called it *Nehushtan*, *i.e.*, a piece of brass ('Quo impensius id colebatur, eo magis depreitendum putavit; quasi diceret: *Aes est, praedecra nihil.*' Grot.) Both the LXX. and the Vulg. follow this rendering; and so the passage is explained by Kimchi, Münster, Vatablus, and others, and Archbishop Whately has made the passage so explained the basis of one of his admirable essays (*Errors of Romanism*, Ess. I.) The other view, according to which *Nehushtan* = the brazen God (*Erzgott*, Ewald; *Eherner Götze*, Zunz) was the name by which the Israelites worshipped the idol, is followed by the Targumist, the Peshito Syr., and by the great majority of interpreters. The original will bear either rendering; but as it was hardly worth while to record so formally the name by which a destroyed idol was known, the former is perhaps on general grounds to be preferred.—W. L. A.

NEÏEL (נְעִיֵל, perhaps = נְעִיֵל, 'treasure of God;') 'Ναήλ, Alex. 'Ανείλ; *Nehiel*, a place mentioned only in Josh. xix. 27 as one of the landmarks on the border of Asher. It stood upon the east border of the tribe, and between Beth-emek and Cabul. Cabul is the modern Kabûl, eight miles east of Akka; Beth-emek is unknown, but Jephthah-el, which was the next place to it on the south, has been identified with Wady Abilîn; and therefore Neïel must be looked for between Wady Abilîn and Kabûl. The site has not yet been

discovered (*Handbook*, p. 377; Robinson, *B. R.*, iii. 103). The name Neïel does not occur in any classic or ecclesiastical writer.—J. L. P.

NEKEB (הַנֶּקֶב, 'the cavern;') Ναβόκ; Alex. Νακέβ; *Naceb*). The Hebrew text favours the opinion that this word should be united with the preceding. אַדָּמִי הַנֶּקֶב is 'Adami-Nekeb,' or 'Adami-the-Cavern;,' the Greek makes them two distinct names, but Jerome renders *Adami quæ est Naceb* (see Reland, *Pal.*, p. 545). The Jewish Rabbins agree with the Septuagint, and in the Talmud they give a list of the old cities of Naphtali with their (then) modern names (Reland, *Pal.*, p. 716). The modern name of *Nekeb* they give as *Tzaidatha* (צִידָתָה), which is now unknown.

Nekeb, or Adami-Nekeb, was a town on the border of Naphtali, apparently on the northern border, for Zaanannim, with which it is joined, was near Kedesh (Judg. iv. 11). Probably it lay near the brow of the mountains overlooking the plain of Dan. No name has been discovered in that region which would suggest identity with this old city.—J. L. P.

NEMALAH (נְמָלָה; Sept. Μύμηξ; Vulg. *Formica*; fifth order of insects; *Hymenoptera*, Linn. occurs Prov. vi. 6; xxx. 25). Ants have only latterly become the subjects of accurate observation. The investigations of Latreille, Gould, Geer, Huber, and Kirby and Spence, have dissipated many erroneous notions respecting them and revealed much interesting information concerning their domestic polity, language, migrations, affections, passions, virtues, wars, diversions, etc. The following facts are selected as relevant to Scriptural illustration. Ants dwell together in societies; and although they have 'no guide, overseer, or ruler,' yet they have all one soul, and are animated by one object—their own welfare, and the welfare of each other. Each individual strenuously pursues his own peculiar duties; and regards (except in the case of females), and is regarded by, every other member of the republic with equal respect and affection. They devote the utmost attention to their young. The egg is cleaned and licked, and gradually expands under this treatment, till the worm is hatched, which is then tended and fed with the most affectionate care. They continue their assiduity to the pupa, or chrysalis, which is the third transformation. They heap up the pupæ, which greatly resemble so many grains of wheat, or rather rice, by hundreds in their spacious lodges, watch them in an attitude of defence, carry them out to enjoy the radiance of the sun, and remove them to different situations in the nest, according to the required degree of temperature; open the pupa, and at the precise moment of the transformation, disenthral the new-born insect of its habiliments.

The most prevalent and inexcusable error, however, respecting ants, has been the belief that they hoard up grains of corn, chiefly wheat, for their supply during winter, having first bitten out the germ to prevent it from growing in their nests. The learned Bochart has collected an immense array of the most eminent authors and naturalists of antiquity (Jewish, Greek, Roman, and Arabian), who all gravely propound this assertion. Notwithstanding that this notion has been completely ex-

ploded during the last hundred years, with regard to European ants, the belief of it constitutes to this hour one of our popular errors. Even Solomon himself, whose renowned attainments in natural history included the knowledge of insects (1 Kings iv. 33), has been inconsiderately supposed to have sanctioned the same opinion in the two passages in his writings which refer to the ant. The mistake has no doubt arisen from the great similarity, both in shape, size, and colour, before mentioned, of the pupa or chrysalis of the ant to a grain of corn, and from the ants being observed to carry them about, and to open the cuticle to let out the enclosed insect. It is now also ascertained beyond a doubt that no European ants, hitherto properly examined, feed on *corn*, or *any other* kind of grain. Bonnet found that, however long they had been kept without food, they would not touch corn. Nor do they attack the roots or stems of corn, nor any other vegetable matter. Nor has any species of ant been yet found with food of *any kind* laid up in its nest. The truth is, that ants are chiefly carnivorous, preying indiscriminately on all the soft parts of other insects, and especially the viscera; also upon worms, whether dead or alive, and small birds or animals. If unable to drag their booty to the nest, they make an abundant meal upon it, and, like the bee, disgorge it, upon their return home, for the use of their companions; and they appear able to retain at pleasure the nutritious juices unchanged for a considerable time. Ants are also extremely fond of saccharine matter, which they obtain from the exudation of trees, or from ripe fruits, etc.; but their favourite food is the saccharine exudation from the body of the aphides, or plant-lice. These creatures are the *milch kine* of the ants. By a remarkable coincidence, which M. Huber justly considers too much to be ascribed to chance, the aphides and the ants become torpid at the same degree of cold (27 deg. Fahr.), and revive together at the same degree of warmth. He says, 'I am not acquainted with any ants to whom the art of obtaining from the pucerons (aphides) their subsistence is unknown. We might even venture to affirm that these insects are made for their use' (Huber, *Natural History of Ants*, p. 210, etc.)

It is highly probable that the exotic ants subsist by similar means. The accounts given us of the termites, or ants, inhabiting the hottest climates, clearly show that they are carnivorous. In the *Introduction to Entomology*, by Kirby and Spence, some diffidence is expressed (ii. 46) respecting the inference that *no* exotic ants have magazines of provisions, till their habits shall have been 'more accurately explored.' Still, are we not in possession of sufficient data to form a strong presumption in regard to the ants of *Palestine*, to which Solomon of course alludes in his writings? The ants of the Holy Land certainly have to encounter a degree of *cold* quite as severe as ever occurs in England (*Physical Hist. of Palestine*, 210, 216). Is it not highly probable that the ants at such times become *torpid*, and need no magazine of provisions? And since we learn from the same authority (p. 31) that there are intervals, even in the depth of winter, when the sun shines, and there is no wind, when it is perfectly warm, sometimes almost hot, in the open air, may not the ants of Palestine and their food revive together at such times, as is the case in our own

country, where ants may often be seen pursuing their avocations over the snow? With regard to Solomon's words respecting the ant, Kirby and Spence are of opinion 'that if they are properly considered it will be found that the interpretation which seems to favour the ancient error respecting ants has been fathered upon them rather than fairly deduced from them. He does not affirm that the ant, which he proposes to the sluggard as an example, laid up in her magazine stores of grain against winter, but that, with considerable prudence and foresight, she makes use of *proper seasons* to collect a supply of provisions sufficient for her purposes. There is not a word in them implying that she stores up grain or other provisions. She prepares her bread and gathers her food (namely, such food as is suited to her) in summer and harvest (that is, when it is most plentiful), and thus shows her wisdom and prudence by using the advantages offered to her.' A brief examination of the passages (Prov. vi. 6; xxx. 25), with reference to their context, will serve to confirm these observations. In the preceding verses, Solomon has cautioned his readers against incurring dangerous responsibilities on behalf of another. Should this have inadvertently been done, he advises the surety to give no *sleep to his eyes*, nor *slumber to his eyelids* till he has delivered himself from his rash engagement. He then adds, 'Go to the ant, thou sluggard, consider her ways, and be wise: which having no guide, overseer, or ruler, provideth her meat in the summer, and gathereth her food in the harvest.' The sense is thus ably given by Dr. Hammond: '*As in the matter just mentioned the least delay is pernicious, so in all things else sluggishness, or negligence of those things which concern us most nearly, should ever be avoided; and if we need any instructor on this head, we may go to one of the least and meanest of creatures.*' The *moral*, then, intended in Solomon's allusion to the ant, is simply to avail one's-self of the *favourable time without delay*. The description which follows, of the sluggard sleeping, evidently *during the day*, the proper season of activity, and of the consequences of his vice, agrees with this interpretation. The other passage (xxx. 25), probably by a different writer, also considers the ant simply as the symbol of *diligence*.

The peculiar use of the terms summer and harvest, among the Jews, may have contributed to the erroneous interpretation. The Jews had no word to signify spring or autumn. They spoke only of summer and winter: by the former they designated the *whole* of the more *genial* time of the year, and by the latter the whole of the less favourable. Hence Solomon uses summer and harvest as synonymous terms (Prov. x. 5; xxvi. 1: see also Jer. viii. 20; Matt. xxiv. 32). In the same way the Romans employed *estas* and *messis*, and the Greeks *θέρος* and *θερίζω*.—J. F. D.

NEPHTOAH, WATERS OF (נֶפְתוֹאֵה), 'Waters of Opening'; נֶפְתוֹאֵה; *Nephthoa*), a fountain, and apparently a streamlet issuing from it (or perhaps a watering-place for cattle), on the border of Judah. Its position is described with considerable minuteness. From the valley of Hinnom the border was drawn to the top of the hill on the west, that is, in the direction of the Convent of the Cross; and the border was drawn from the top of the hill *unto*

the fountain of the water of Nephtoah, and thence to Kirjath-jearim (Josh. xv. 8, 9). A similar description of the southern border of Benjamin is given in Josh. xviii. 14-16; and the name is not again mentioned in Scripture. Its site appears to have been unknown to Jerome and Eusebius, as they simply mention it as a fountain in the tribe of Benjamin. From the above passages it might be inferred that the Waters of Nephtoah lay somewhere in or near a direct line between Jerusalem and Kirjath-jearim, but there is another passage which must considerably modify that conclusion. We read in 1 Sam. x. 2 that Rachel's sepulchre lay near the border of Benjamin, and it is nearly three miles south of the valley of Hinnom. Consequently, from the top of the hill on the west of Hinnom the border must have turned southward, and we must look for the Waters of Nephtoah on the south or south-west of Jerusalem. Recent geographers have pretty generally agreed to identify Nephtoah with *Ain Lifta*, a fountain near the village of that name, two and a half miles north-west of Jerusalem (Barclay, *City of the Great King*, p. 544; Tobler, *Dritte Wanderung*, p. 202; cf. *Topographie*, 343, seq.; Stewart, *Tent and Khan*, p. 349). This, however, cannot be reconciled with the statement of Samuel, which these writers appear to have overlooked. About a mile and a half from Jerusalem, on the road to Rachel's tomb, and close to the convent of Mar Elyas, is an old well, which some have identified with Nephtoah (*Narrative of Mission to Jews*, June 13). It is, however, a mere well. A much more probable site is *Ain Yalo*, in Wady el-Werd, three miles south-west of the city. It is a small fountain, whose waters flow into a large pool, and are drawn off to irrigate some gardens. Its water is esteemed at Jerusalem, whither it is conveyed in skins on the backs of donkeys (*Handbook*, p. 232; Robinson, *B. R.*, iii. 265). In front of the fountain are some ruins. There is another larger and much more beautiful fountain a mile farther down the valley, called *Ain Hanīyeh*, said by tradition to be the fountain in which Philip baptised the eunuch (*Handbook*, l. c.; Barclay, p. 548). It is ornamented with a niched facade and Corinthian pilasters.—J. L. P.

NER (נֶר; Sept. Νήρ), the grandfather of king Saul. The accounts which are given of the relationship of this individual are, at first sight, somewhat discrepant; but it is not impossible to reconcile them. According to 1 Sam. xiv. 50, 51, he was the son of Abiel and the father of Abner, the brother of Kish the father of Saul. But in 1 Sam. ix. 1, Kish, the father of Saul, is made the son of Abiel. This, however, may be got over by regarding *son* here as meaning *grandson*, according to the lax use of the Heb. נֶר. When we turn to Chronicles, we find (viii. 33) the same order of succession Ner,—Kish,—Saul; only that another Kish appears as a *brother* of Ner (30), and their father is described as Abi-Gibeon, the father of Gibeon, *i. e.*, the stem-father of the Gibeonites, or the proprietor of Gibeon. But in 1 Chron. ix. 33-39, we have the name of Ner's father given as Jehiel; in other respects the genealogy agrees with viii. 29-33. We may regard Abiel and Jehiel as names of the same person who was also by title Abi-Gideon; and there seems no reason why there should not have been two in his family of the name

of Kish—one his son, and the other his grandson. The family-tree, then, stood thus:—

Abiel or Jehiel Abi Gideon.

From Abiel the genealogy ascended through Zeror, Aphiah or Abiah, and Bechorath or Bechor, to Benjamin (1 Sam. ix. 1; 1 Chron. vii. 6-8), from whom Saul was thus seventh in descent.—W. L. A.

NERD or NARD (נֶרְדִּים) is mentioned in three places in the Song of Solomon, and by Mark and John in the N. T., under the name of *nardos*. Both are translated in the A. V. by the word *spikenard*, which indicates a far-famed perfume of the East, that has often engaged the attention of critics, but the plant which yields it has only been ascertained in very recent times.

401. *Nardostachys jatamansi*.

That the *nerd* of Scripture was a perfume is evident from the passages in which it occurs. In Cant. i. 12, iv. 14, we find it mentioned along with many of the most valued aromatics which were known to the ancients, and all of which, with the exception perhaps of saffron, must have been obtained by foreign commerce from distant countries, as Persia, the east coast of Africa, Ceylon, the north-west and the south-east of India, and in the present instance even from the remote Himalayan mountains. Such substances must necessarily have been costly when the means of communication were defective, and the gains of the successful merchant proportionally great. That the *nard* or *nardus* was of great value we learn from the N. T. (Mark xiv. 3; John xii. 3, 5).

Before proceeding to identify the plant yielding nard, we may refer to the knowledge which the ancients had of this ointment. Horace, at a period nearly contemporary, 'promises to Virgil a whole cadus (about thirty-six quarts) of wine, for a small onyx-box full of spikenard' (Rosenmüller, p. 168).

The composition of this ointment is given by Dioscorides, in lib. i. c. 77, *περὶ νάρδιον μύρον*, where it is described as being made with nut oil, and having as ingredients malabathrum, schœnus, costus, amomum, nardus, myrrha, and balsamum; that is, almost all the most valued perfumes of antiquity.

402. Spikenard from a druggist's in London.

The nard, *νάρδος*, was known in very early times, and is noticed by Theophrastus and by Hippocrates. Dioscorides, indeed, describes three kinds of nard. Of the first, called *νάρδος* (*nardos*) simply, there were two varieties, the one Syrian, the other Indian. The former is so called, not because it is produced in Syria, but because the mountains in which it is produced extend on one side towards Syria, and on the other towards India. This may refer to the Hindoo Khoosh, and to the extensive signification of the name Syria in ancient times, or to so many Indian products finding their way in those ages into Europe across Syria. These were brought there either by the caravan route from north-west India, or up the Persian Gulf and Euphrates. It is evident, from the passages quoted, that nard could not have been a produce of Syria, or its value would not have been so great either among the Romans or the Jews. The other variety is called Gangitis, from the Ganges, being found on a mountain round which it flows. It is described as having many spikes from one root. Hence it, no doubt, came to be called *νάρδοςταχυς*; and from the word *stachys* being rendered by the word *spike*, it has been translated spikenard. The second kind is by Dioscorides, called Celtic Nard (*νάρδος κελτική*), and the third kind mountain nard (*νάρδος ὄρεω*). If we consult the authors subsequent to Dioscorides—as Galen, Pliny, Oribasius, Ætius, and Paulus Ægineta—we shall easily be able to trace these different kinds to the time of the Arabs. As the author of this article has already said (*v. infra*), on consulting Avicenna, we are

referred from *narden* to *sunbul*, pronounced *sumbul*, and in the Latin translation from *nardum* to *spica*, under which the Roman, the mountain, the Indian, and Syrian kinds are mentioned. So in Persian works on *Materia Medica*, chiefly translations from the Arabic, we have the different kinds of *sunbul* mentioned; as—1. *Sunbul hindee*. 2. *Sunbul roomie*, called also *sunbul ukletee* and *narden ukletee*, evidently the above Celtic nard, said also to be called *sunbul italion*, that is, the nard which grows in Italy. 3. *Sunbul jibullee*, or mountain nard. The first, however, is the only one with which we are at present concerned. The synonyms given to it in these Persian works are,—Arabic, *sunbul at teeb*, or fragrant nard; Greek, *narden*; Latin, *nardoo*; and Hindee, *balchur* and *jatamansae*.

Sir William Jones (*Asiat. Res.* ii. 416, 8vo) was the first to ascertain that the above Hindee and Sanscrit synonyms referred to the true spikenard, and that the Arabs described it as being like the tail of an ermine. The next step was of course to attempt to get the plant which produced the drug. This he was not successful in doing, because he had not access to the Himalayan mountains, and a wrong plant was sent him, which is that figured and described by Dr. Roxburgh (*Asiat. Res.* iv. 97, 438). The author of this article, when in charge of the East India Company's botanic garden at Seharunpore, in 30° of N. latitude, about 30 miles from the foot of the Himalayan mountains, being favourably situated for the purpose, made inquiries on the subject. He there learnt that *jatamansi*, better known in India by the name *balchur*, was yearly brought down in considerable quantities, as an article of commerce, to the plains of India, from such mountains as Shalma, Kedar Kanta, and others, at the foot of which flow the Ganges and Jumna rivers. Having obtained some of the fresh brought-down roots, he planted them, both in the botanic garden at Seharunpore and in a nursery at Mussooree, in the Himalaya, attached to the garden. The plants produced are figured in his *Illustrations of Himalayan Botany*, t. 54, and a reduced figure is given in the accompanying woodcut (No. 401). The plant produced was found to belong to the natural family of *Valerianææ*, and has been named *nardostachys jatamansi* by De Candolle, and formerly *patrinia jatamansi*, by Mr. Dow, from plants sent home by Dr. Wallich from Gossamtham, a mountain of Nepal (*Penny Cyclopædia*, art. Spikenard; and Royle, *Illustr. Himal. Botany*, p. 242).

Hence there can be no doubt that the *jatamansi* of the Hindoos is the *sunbul hindee* of the Arabs, which they compare to the tail of an ermine. This would almost be sufficient to identify the drug: the appearance to which it refers may be seen even in the woodcut (402, fig. 1), but very conspicuously in the specimens of the drug which the author has deposited in the Museum of *Materia Medica* in King's College. This is produced in consequence of the woody fibres of the leaf and its footstalk not being decomposed in the cold and comparatively dry climate where they are produced, but remain and form a protection to the plant from the severity of the cold. There can be as little doubt that the Arabs refer to the descriptions of Dioscorides; and both they, and the Christian physicians who assisted them in making translations, had ample opportunities, from their profession and their local

situation, of becoming well acquainted with things as well as words. There is as little reason to doubt that the *vápōs* of Dioscorides is that of the other Greek authors, and this will carry us into ancient times. As many Indian products found their way into Egypt and Palestine, and are mentioned in Scripture—indeed in the very passage with nard we have calamus, cinnamon, and aloes (*ahalim*)—there is no reason why spikenard from the Himalayas could not as easily have been procured. The only difficulty appears to arise from the term *vápōs* having occasionally been used in a general sense, and therefore there is sometimes confusion between the nard and the sweet cane [KANEH BOSEM], another Indian product. Some difference of opinion exists respecting the fragrance of the *jalamansi*: it may be sufficient to state that it continues to be highly esteemed in Eastern countries in the present day, where fragrant essences are still procured from it, as the *unguentum nardinum* was of old.—J. F. R.

NEREUS (Νηρεός), a Christian at Rome to whom, with his sister, St. Paul sends his salutation (Rom. xvi. 15). The name may be of Hebrew origin, נר or נרי; or it may be, as Grotius suggests, from the Sabine *Nerio*, a word according to Aulus Gellius signifying 'virtus et fortitudo' (*N. A.*, xiii. 22), and with which *Nero* and *Verienes* the wife of Mars stand allied. Of this Nereus nothing is known. One of the same name appears in the Roman martyrology, who is said to have been baptised by St. Peter, and Estius (*in loc.*) suggests that 'perhaps' this may be he; but this confutes itself, for as St. Peter did not visit Rome till a period after the writing of the epistle to the Romans (if he ever visited it at all), the Nereus baptised by him cannot be the Nereus saluted by St. Paul.—W. L. A.

NERGAL (נרגל; Sept. 'Εργέλ), a deity of the Cuthites in the Assyrian empire (2 Kings xvii. 30), corresponding to Ares or Mars in the Hellenic and Latin mythology. His astrological symbol was the planet Mars, which still bears among the Zabians or Mendaeanes the name of نرگ, *Nerig*; and on

the Assyrian monuments he is probably represented by the man-lion, sometimes also by the natural lion. He was the God of war and hunting, especially of the latter, as Nin was the god especially of war but also of hunting. The titles by which he is designated are, king of battle, storm-ruler, champion of the gods, strong begetter, tutelary god of Babylonia, and god of the chase. From him the Assyrian monarchs boasted that they derived their descent. It has been conjectured that he represents the deified hero Nimrod, who was probably worshipped under different titles. None of the minor deities of Assyria was held in equal reverence with Nergal. He is associated in inscriptions and sculptures with Nin as the tutelary deity of the race, life, and home of the Assyrian kings. Few temples, however, appear to have been raised to him. The city Cutha, or Tiggaba, is constantly called his city in the inscriptions; so that when the men of Cuth were removed to Samaria, it was natural they should carry with them Nergal their tutelary deity. Various derivations of the name have been suggested. First traces it to נרג, *to break in pieces*, with ל added; Gesenius identi-

fies it with the Zabian *Nerig*, the *l* being appended as the mark of a diminutive, which was a sign of endearment; Von Bohlen compares the Sanscrit *Nrighal*, *man-destroyer*; and Rawlinson says the name 'is evidently compounded of the two Hamitic roots—*air*, a man, and *gula*, great; so that he is *the great man*, or *the great hero*' (*Ancient Monarchies*, i. 171; ii. 256. See also Rawlinson's *Herodotus*, i. 631).—W. L. A.

NERGAL-SHAREZER (נרגל-שרעצר; Pers. *Nergal*, *prince of fire*; Sept. Μαργασαζαρ; Alex. Νηργελ-σασαζαρ). 1. A military chieftain under Nebuchadnezzar (Jer. xxxix. 3). 2. The chief of the magi (Rab-mag) under the same king, and present in the same expedition (Jer. xxxix. 3, 13). There is reason to believe that the latter is the *Nergal-shar-uzur* of the Babylonian inscriptions, who is there styled *Rabu-emga*, or *Rab-mag*; and who is identified with *Neriglissar*, who murdered Evil Merodach, and succeeded him as king of Babylon. He reigned between three and four years. A palace built by him has been discovered at Babylon.

NERI (Νηρι), the son of Melchi, and father of Salathiel in our Lord's genealogy (Luke iii. 27). [GENEALOGY OF J. C.; SALATHIEL.]

NESHER (נֶשֶׁר). This term is used in Scripture to designate birds both of the eagle and of the vulture genus. It is derived from a root signifying to tear with the beak (נָשַׁר; Arab. نسر, whence منسر, *mansir*, a bird of prey), and might therefore be used of birds of prey generally. It is used chiefly of the eagle generically (Exod. xix. 4; Deut. xxxii. 11; 2 Sam. i. 23; Job ix. 26; xxxix. 27; Prov. xxiii. 5, etc.); but in cases where the Neshar is distinguished from others of the genus *aquila*, as in Lev. xi. 15; Deut. xiv. 12, it is probably the golden eagle that is intended.

'The EAGLE, in zoology, forms a family of several genera of birds of prey, mostly distinguished for their size, courage, powers of flight, and arms for attack. The bill is strong, and bent into a plain pointed hook, without the notch in the inner curve which characterises falcons; the nostrils are covered with a naked cere or skin, of a yellow or a blue colour; the eyes are lateral, sunken, or placed beneath an overhanging brow; the head and neck covered with abundance of longish, narrow-pointed feathers; the chest broad, and the legs and thighs exceedingly stout and sinewy. Eagles, properly so called, constitute the genus *Aquila*, and have the tarsi feathered down to the toes; they are clothed in general with brownish and rust-coloured feathers, and the tail is black, grey, or deep brown. Sea-eagles (genus *Haliaeetus*) have the tarsi or legs half bare and covered with horny scales; not unusually the head, back, and tail more or less white. The larger species of both measure, from head to tip of tail, 3 feet 6 inches or more, and spread their wings above 7 feet 6 inches; but these are proportionably broad to their length: for it is the third quill feather which is the longest; as if the Creator intended to restrain within bounds their rapidity of flight, while by their breadth the power of continuing on the wing is little or not at all impeded. The claws of the fore and hind toe are particularly strong and sharp; in the sea-eagles they form more than half

a circle, and in length measure from  $1\frac{1}{2}$  to  $1\frac{3}{4}$  of an inch. These majestic birds have their abode in Europe, on the shores of the Mediterranean, in Syria, and Arabia, wherever there are vast woody mountains and lofty cliffs: they occupy each a single district, always by pairs, excepting on the coasts, where the sea-eagle and the osprey (*Pandion haliaetus*) may be found not remote from the region possessed by the rough-legged eagles—the first because it seeks to subsist on the industry of the second, and does not interfere with the prey of the third. It is in this last genus, most generally re-

403. *Aquila heliaca*.

presented by the golden eagle (*aquila chrysaetos*), that the most powerful and largest birds are found. That species in its more juvenile plumage, known as the ring-tailed eagle, the imperial eagle, or mogilnick (*aq. heliaca*), and the booted eagle (*aq. pinnata*) is found in Syria; and at least one species of the sea-eagles (the *hal. ossifragus*, *albicilla*, or *albicaudus*) frequents the coasts, and is even of stronger wing than the others. These build usually in the cliffs of Phœnicia, while the others are more commonly domiciliated within the mountains. According to their strength and habits the former subsist on antelopes, hares, hyrax, bustard, stork, tortoises, and serpents; and the latter usually on fish; both pursue the catta (*pteroles*), partridge, and lizard. The osprey alone being migratory retires to Southern Arabia in winter. None, excepting the last-mentioned, are so exclusively averse to carrion as is commonly asserted: from choice or necessity they all, but in particular the sea-eagles, occasionally feed upon carcasses of horses, etc.; and it is well known in the East that they follow armies for that purpose. Hence the allusions in Job and Matt. xxiv. 28, though vultures may be included, are perfectly correct. So again are those which refer to the eagle's eyrie, fixed in the most elevated cliffs. The swiftness of this bird, stooping among a flock of wild geese, with the rushing sound of a whirlwind, we have witnessed; and all know its towering flight, suspended on its broad wings among the clouds with little motion or effort. Thus the predictions, in which terrible nations coming from afar are assimilated to eagles, have a poetical and

absolute truth, since there are species, like the golden, which really inhabit the whole circumference of the earth, and the nations alluded to bore eagles' wings for standards, and for ornaments on their shields, helmets, and shoulders. In the northern half of Asia, and among all the Turkish races, this practice is not entirely abandoned at this day, and eagle ensigns were constantly the companions of the dragons. China, India, Bactria, Persia, Egypt, the successors of Alexander, the Etruscans, the Romans, the Celtæ, and the Arabs, had eagle signs of carved work, of metal, or the skins of birds, stuffed, and set up as if they were living. These, named *איל, אֵרֹבִס*, aquila, eryx, simurg, humma or humaion, karakoosh (the birds of victory of different nations and periods of antiquity), were always symbolical of rapid irresistible conquest. A black eagle was the ensign of Kalid, general of Mohammed, at the battle of Ainsadin, and the carved eagle still seen on the walls of the citadel of Cairo, set up by Karakoosh, the vizir of Salah-ed-deen, to commemorate his own name and administration, indicates a species not here enumerated. *Aq. heliaca*, here figured, is the species most common in Syria, and is distinguished from the others by a spot of white feathers on each shoulder.—C. H. S.

The VULTURE seems to be referred to in Micah i. 16, where baldness is ascribed to the *Nesher*; the bird here referred to is probably the *Vultur barbatus* of zoology. It is not so certain that the vulture is referred to where allusion is made (as in Job xxxix. 30; Prov. xxxvi. 17) to the bird as feeding on carrion; for though the eagle usually kills its own food, it does not invariably refuse to feed on dead bodies (comp. Matt. xxiv. 28).

The Vulture has a large and strong bill, straight

404. *V. fulvus*.

at the base, convex and rounded at the point; the nostrils are naked, rounded, and obliquely pierced; the head and neck are bare of feathers, but covered with a short down, with a collar of long soft feathers at the base of the neck. They feed almost exclusively on carrion, but occasionally make inroads

on flocks. They are unable, however, to carry off in their talons what they kill, as do eagles. Their flight, though slow, is powerful and long sustained. Their flesh is so disgusting that even the scavenger-ants leave it untouched.

Two species belong to the old world, the *V. cinereus*, and the *V. fulvus*. Both are found spread over northern Africa and southern Europe, and both may have been known in Palestine.—W. L. A.

NET. There are in Scripture several words denoting different kinds of nets, and this, with the frequency of images derived from them, shows that nets were much in use among the Hebrews for fishing, hunting, and fowling. Indeed, for the two latter purposes, nets were formerly used to an extent of which now, since the invention of fire-arms, a notion can scarcely be formed. 1. **חֶרֶם** *cherem*, which denotes a net for either fishing or fowling. It is derived from a word signifying 'to shut up,' and the idea is, therefore, founded on its shutting in the prey. It occurs in Hab. i. 16, 17; Ezek. xxvi. 5, 14; xlvii. 10, etc. In Zech. xiv. 11 and Mal. iii. 24 it is used in the sense of *destruction* or *curse*. In Eccles. vii. 26, it is applied by an apt metaphor to female entanglements. 2. **מִכְכָּר** *mikmor* or *machmor*, which occurs only in Ps. cxli. 10, Is. li. 20, where it denotes a hunter's net; but a longer word, from the same source, **מִכְמוֹרֶת** *mikmoreth*, denotes the net of fishermen in the only passages in which it is found (Is. xix. 8; Hab. i. 15, 16). In these cases we find, by tracing the words to their source, that the idea is founded upon the plaiting, braiding, or interweaving of the net-work. 3. **שֶׁבַכָּה** *sebaka*, which designates an actual hunting-net in Job xviii. 6; but elsewhere it is applied to net-work or lattice-work, especially around the capitals of columns (1 Kings vii. 18, 20, 41, 42; 2 Kings xxv. 17; 2 Chron. iv. 12, 13; Jer. lii. 22, 23); and also before a window or balcony (2 Kings i. 2). In the N. T. no other net than that for fishing alone is mentioned. The word which describes it (**ἰκτυόω**) is usually confined to fishing-nets by classical writers, although sometimes applied to the nets of hunters. Another word to describe a net, **ἀμφίβληστρον**, occurs in Matt. iv. 18; Mark i. 16, which, like *cherem* above, is founded on the idea of enfolding or shutting in the prey.

We have no positive information concerning the nets of the Hebrews, and can only suppose that they were not materially different from those of the ancient Egyptians, concerning which we now possess very good information. Indeed, the nets of Egypt, the fishers who used them, and the fish caught by them, are more than once mentioned in Scripture (Is. xix. 8). The usual fishing-net among this people was of a long form, like the common drag-net, with wooden floats on the upper, and leads on the lower side. It was sometimes let down from a boat, but those who pulled it usually stood on the shore, and landed the fish on a shelving bank. This mode, however, was more adapted to river than to lake fishing; and hence, in all the detailed examples of fishing in the N. T., the net is cast from and drawn into boats, excepting in one case where the draft being too great to take into the boat, the fishers dragged the net after their boats to the shore (John xxi. 6, 8). Sometimes use was made of a smaller net for catching fish in shallow

water, furnished with a pole on either side, to which it was attached; and the fisherman, holding one of the poles in either hand, thrust it below the surface of the water, and awaited the moment when a shoal of fish passed over it. [FISH.]

405.

It is interesting to observe that the fishermen in the boat, excepting the master (No. 405), are almost naked, as are also those who have occasion to wade in the water in hauling the net to the shore (No. 406). Such seems also to have been the practice

406.

among the Hebrew fishermen; for Peter, when he left the boat to hasten on shore to his risen Lord, 'girt his fisher's coat unto him, for he was naked' (John xxi. 7); although, in this case, the word 'naked' must be understood with some latitude. [NAKED.]

Nets were also used in taking birds, to an extent of which we can scarcely form an adequate conception. A clap-net was usually employed. This was of different kinds, that shown in the cut (No. 408), being the most common. It consisted of two sides or frames, over which the net-work was spread; at one end was a short net, which they fastened to a bush, or a cluster of reeds, and at the other was one of considerable length, which, as soon as the birds were seen feeding in the area within, was pulled by the fowlers, causing the instantaneous collapse of the two sides (No. 407). Sir J. G. Wilkinson (*Ancient Egyptians*, iii. 45) says the nets are very

407.

similar to those used in Europe at the present day, but probably larger, and requiring a greater number of persons to manage them, than our own; which, however, may be ascribed to an imperfection in the contrivance for closing them. [FOWLING.]

In hunting, a space of considerable size was sometimes enclosed with nets, into which the animals were driven by beaters. The spots thus

enclosed were usually in the vicinity of the water brooks to which they were in the habit of repairing in the morning and evening; and having awaited the time when they went to drink, the hunters disposed their nets, occupied proper positions for observing them unseen, and gradually closed in upon them. The usages of the Egyptians, and, so far as can be ascertained, of other Oriental nations, in this respect, correspond with the intimations of

408.

Julius Pollux (*Onomast.* v. 4), who states that two kinds of nets were employed in this mode of hunting. One, a long net, called by the Greeks *δίκτυς*, was furnished with several ropes, and was supported on forked poles, varying in length to correspond with the inequalities of the ground over which it extended. The others were smaller nets, called *ἐνδδία*, for stopping gaps. These practices are obviously alluded to in such passages as Job xix. 6; Ps. cxl. 5; Is. li. 20.—J. K.

NETER (נֶתֶר; Sept. and Symmachus, *νίτρον*; Vulg. *nitrum*; English version 'nitre') occurs in Prov. xxv. 20; Jer. ii. 22; where the substance in question is described as effervescing with vinegar, and as being used in washing; neither of which particulars applies to what is now, by a misappropriation of this ancient name, called 'nitre,' and which in modern usage means the saltpetre of commerce, but they both apply to the *natron*, or true *nitrum* of the ancients. The similarity of the names which is observable in this case is considered by Gesenius of great weight in a production of the East, the name of which usually passed with the article itself into Greece. Both Greek and Roman writers describe *natron* by the words given in the Sept. and Vulgate. Jerome, in his note on Prov. xxv. 20, considers this to be the substance intended. Natron, though found in many parts of the East, has ever been one of the distinguishing natural productions of Egypt. Strabo mentions two places in that country, beyond Momemphis, where it was found in great abundance, and says that those districts were in consequence called the nitritic nomes or provinces (*Geog.* xvii. p. 1139, Oxon. 1807), to which Pliny refers by the name Nitritis (*Hist. Nat.* v. 9), and describes the natural and manufactured nitrum of Egypt (xxxv. 10). This substance, according to Herodotus, was used by the Egyptians in the process of embalming (ii. 76, 77). The principal natron lakes now found in Egypt, six in number, are situate in a barren valley about thirty miles westward of the Delta, where it both floats as a whitish scum upon the water, and is found deposited at the bottom in a thick incrustation, after the water is evaporated by the heat of summer. It is a natural mineral alkali, composed of the carbonate, sulphate, and muriate of soda, derived from the soil of that region. Forskal says that it is known by the name *اُطرون*, *atrun*, or *نُطرون*, *natrun*, that it effervesces with vinegar, and is used as soap in washing linen, and by the bakers as yeast, and in

cookery to assist in boiling meat, etc. (*Flora Aegyptiaco-Arabica*, Hauniae 1775, pp. 45, 46). Combined with oil it makes a harder and firmer soap than the vegetable alkali [BORITH]. The application of the name nitre to saltpetre seems accounted for by the fact that the knowledge of natron, the true nitre, was lost for many centuries in this country, till revived by the Hon. R. Boyle, who says he 'had had some of it brought to him from Egypt' (*Memoirs for a History of Mineral Waters*, Lond. 1684-85, p. 86). See an interesting paper in which this is stated, in the *Philosophical Transactions*, abridged, 1809, vol. xiii. p. 216, etc.; and for a full description of the modern merchandise, uses, etc., of the natron of Egypt, see Sonini's *Travels*, Paris, vol. i. ch. xix.; Andréossi's *Memoire sur la Vallée des Lacs de Natron Decade Egyptienne*, No. iv., vol. ii.; Beckman's *Beyträge zur Geschichte der Erfindungen*, th. iv. p. 15, ff.; J. D. Michaelis, *De Nitro Hebraeor.* in *Comment. Societ. Regal. Praelect.*, pt. i. p. 166; and *Supplém. ad Lex. Hebraic.*, p. 1704; Shaw's *Travels*, 2d ed. p. 479.—J. F. D.

NETHANEEL (נְתַנְיֵאל; Sept. *Nathanaël*). Ten persons of this name are mentioned in the O. T. (Num. i. 3; ii. 5; vii. 18, 23; x. 15; i Chron. ii. 14; i. 24; xxiv. 6; xxvi. 4; 2 Chron. xvii. 7; xxxv. 9; Ezra x. 22; Neh. xii. 21, 36; but of none of them is anything known beyond what is mentioned in the passages where they are named.

NETHANIAH (נְתַנְיָהוּ and נְתַנְיָהוּ; Sept. *Nathanael*). 1. The son of Elishama and father of Ishmael who murdered Gadaliah (2 Kings xxv. 23 [Cod. Alex. *Μιθθαβας*]; Jer. xl. 8, 14, 15; xli. *saepe*). 2. One of the four sons of Asaph, and chief of the fifth of the twenty-four courses among which the temple-service was distributed (1 Chron. xxv. 2, 12). 3. One of the Levites selected to accompany the princes sent by king Jehoshaphat to teach the people the law (2 Chron. xvii. 8). 4. The father of Jehudi (Jer. xxxv. 14).

NETHINIM (נֶתִינִים) is the name given in the post-exile books of the Hebrew Scriptures to the hereditary temple-servants who were given to the Levites to do the subordinate and menial work.

1. *Name and its signification*.—The name נֶתִינִים, which is the plural of נֶתִי, feminine נֶתִיָּה, passive participle of נָתַן, *to give, to set apart, to devote*, properly denotes *the given, the devoted, i. e., to do the menial work of the sanctuary for the Levites*, and, like other terms of office, has become the appellative of that class of men who were thus given as hereditary temple-servants to assist the Levites. Hence they are called *τερόδουλοι* by Josephus (*Antiq.* xi. 5, 6), whilst the Vulg. (*Nathinaei*), the Chaldee (נְתִינִין), Luther (*Nethinim*), the Zurich Bible, Coverdale, Matthew's Bible, the Geneva Version, the Bishops' Bible, and the A. V., uniformly retain the original in all the seventeen passages in which it occurs, only that the A. V., following the example of the preceding English versions, incorrectly adds the plural termination *s* (*Nethinims*) to the Hebrew נֶתִי, which is already plural, as it does in cherubims. The Sept., however, is inconsistent both in its spelling and rendering of it. Thus, in nine places out of the seventeen it has *οι Ναθωλυ*, Alex. *Naθwelu* (Ezra ii. 70; vii. 7, 24; viii. 20 (wice); Neh. iii. 26; vii. 46, 73;

x. 28); in three *ol Naṣwaṭoi* (Ezra ii. 43 [Alex., *Naṣwṭu* Vat.]; Neh. xi. 3, 21); in two *ol Naṣawēlu* [Vat. *Naṣawlu*] (Ezra ii. 58; Neh. vii. 60); in one *Naṣawēlu*\* (Ezra viii. 17); in another it takes בִּיתֵי הַנְּתִינִים for one word, and substitutes for it בְּתֵי הַנְּתִינִים (Neh. iii. 31); and in another place again it translates נְתִינִים by *oi dedōménoi* (1 Chron. ix. 2). Theodoret's explanation of נְתִינִים, δόσις Ἰαῶν, του-ρέσσι, τοῦ ὄντος Θεοῦ (*Quest. in. i. Paralip.*), which is also that of Bochart, '*dedititios appellavit, quod se sponte dededissent*' (*Phaleg*, lib. ii. cap. i. Opp. vol. i., p. 67, ed. Lugduni 1692), is both contrary to the grammatical meaning of the word, which, as *passive participle*, can only be *those given*, and not *who voluntarily gave themselves*, and at variance with facts.

2. *Origin and Duties of the Nethinim.*—It is the unanimous voice both of Jewish tradition (comp. *Jebamoth*, 78 b; *Midrash Yalkut on Josh.* ix. 27) and the best Jewish commentators (comp. Rashi and Ibn Ezra on Ezra ii. 43; Kimchi on *Josh.* ix. 20), that the Gibeonites whom Joshua consigned for ever to be the hewers of wood and the drawers of water, *i. e.*, the perpetual menial servants (לְבִית אֱלֹהֵי) of the sanctuary (*Josh.* ix. 21-27), are the original caste denominated *Nethinim* in the post-exile period; and there is no valid reason for rejecting this ancient tradition. As these Gibeonites or sanctuary-slaves were greatly diminished by the bloody persecutions of Saul, and in the massacre at Nob (2 Sam. xxii. 1-19), and moreover, as the reorganisation and extension of the sanctuary-service effected by the royal Psalmist both rendered the work of the Levites very laborious and demanded an increase of the existing staff of menial servants, 'David and the princes [after him] gave (נָתַן) the *Nethinim* (or *these given ones*, הַנְּתִינִים) for the service of the Levites' (Ezra viii. 20). From the ancient practice of consigning aliens and captives of war to do both the menial work of the people at large and of the priests and Levites (*Num.* xxxi. 25-47; *Deut.* xxix. 10), which also obtained among the Syrians, Phœnicians, the Greeks, and other nations of antiquity, and which still obtains among the Arabs, who devote slaves to the service of the Kaaba at Mecca, and to the sepulchre of the prophet at Medina (Burckhardt, *Travels in Arabia*, i. 288, etc.; ii. 166, etc., 174, 181), there can be little doubt that the thinned ranks were recruited by David and the other princes from the captives taken in battle. Indeed, their foreign names given in the catalogue of those who returned from Babylon (Ezra ii. 43-58) fully confirm this view. As this newly-increased and reorganised staff, founded upon the remnant of the aboriginal Gibeonites, was now formally and *exclusively given* by David to the Levites (Ezra viii. 20), just as the Levites themselves, by the command of God, were given to the priests (*Num.* viii. 19; xviii. 2-6), their primitive name was no more applicable to them, because the new accession, constituting the majority, were no Gibeonites, and because they were no more the servants of the sanctuary at large, but were a *gift* to the Levites. It was for this reason that they were henceforth called *Nethinim* (נְתִינִים), *the given ones*, *i. e.*, to the Levites, the very expression used

with regard to the Levites when they in their turn were given to the priests. [LEVITES.] Being thus given to them, the *Nethinim* had to relieve the Levites of every menial and laborious work connected with the sanctuary. They had to draw and carry the water, hew and fetch the wood, and attend to everything which the Levites ordered them to do. And because they were so entirely at the disposal of the Levites, therefore the Bible prescribes no special duties for the *Nethinim*.

3. *Number of the Nethinim, their Locality, Revenues, and Social Position.*—Though their number is nowhere given up to the time of the Babylonish captivity, yet the fact that the aboriginal *Hieroduli*, *i. e.*, the Gibeonites, consisted of the population of five cities when the service of the sanctuary was not so imposing, makes it pretty certain that the *Nethinim* with whom David and the other princes replenished the thinned ranks at the time when the temple-worship required a large staff of menial servants, must have counted their thousands. As a matter of convenience, they most probably lived within the precincts and in the immediate neighbourhood of the Temple, and must have been supported by the contributions of the people. We have more decided information about them in the post-exile records. Only 612 *Nethinim* returned from Babylon—392 with Zerubbabel (Ezra ii. 58; Neh. vii. 60), and 220 with Ezra (Ezra viii. 20), under the leadership of Ziha and Gispa (Neh. xi. 21), who, as their foreign names indicate, were of their own body. But even this small number had to be coaxed in order to get them to return from exile, as is evident from Ezra viii. 17, where they are addressed as *brethren* of Iddo, a chief of the Levites.\* Some of them lived in Ophel, which they helped to rebuild (*Neh.* iii. 26; xi. 26), because of its proximity to the Temple; while others, as in the pre-exile period, dwelt with the Levites in their own cities (Ezra ii. 70). Belonging to the Temple, they, like the other sacred ministers, were exempted from taxation by the Persian satraps (Ezra vii. 24), and were maintained from the Temple treasury, and (מַעֲשֵׂר שְׁנִי) the second tithes (*Jebamoth*, 80

\* It is evident from the whole context (Ezra viii. 15-19), which speaks of securing Iddo's interests to procure Levites as well as *Nethinim*, that he was not a *Nathin*, but a distinguished *Levite* who had great influence both among his own Levitical brethren and the *Nethinim* who were under his control. It is for this reason that Ezra is so careful about the wording of the message sent to him; and that he designates the *Nethinim* in this message the *brethren* of this distinguished *Levite* (Ezra viii. 17), thereby to conciliate their favour. After their return, however, from the exile, when the *Nethinim* took their original low position, the redactors of the Hebrew Scriptures thought it incompatible with the menial condition of this caste to characterise them as the brethren of Iddo the chief of the Levites. Hence the alterations of אֶדּוֹ וְאֶחָיו הַנְּתִינִים into אֶדּוֹ וְאֶחָיו הַלְוִיִּם, 'Iddo and his brother (or, as some will have, 'and *Achiv*,' see Ibn Ezra *in loco*) the Levites,' as נְתִינִים properly means; comp. *Num.* viii. 19, xviii. 6. We have thus another illustration of the influence which the theological notions of the Jews had upon the Hebrew text [MIDRASH].

\* In the art. IDDO, 'Aṣawēlu is inserted by mistake as the Sept. equivalent of אֶדּוֹ in Ezra viii. 17. It evidently stands for הַנְּתִינִים.

b; *Jerusalem Maaser Sheni*, v. 15; *Jerusalem Sota*, ix. 11; comp. Herzfeld, *Geschichte des Volkes Israel*, i. 138-140). Though they conformed to the Jewish religion (Exod. xii. 48; Deut. xxix. 11; Josh. ix. 9; Neh. x. 28), they occupied a very low position, and were even ranged below the *Mamzer* (מוֹצֵר), or illegal offspring, as may be seen from the following order of precedence given in the Mishna: 'a priest is before a Levi, a Levi before an Israelite, an Israelite before a *Mamzer*, a *Mamzer* before a *Nathin*, a *Nathin* before a proselyte, and a proselyte before a manumitted slave' (*Horajoth*, iii. 8). The *Nethinim* were restricted to intermarriage among themselves, and if a Jew or Jewess married one of them, though all the valid ceremonies were performed, the issue shared in all the degrading disqualifications of the *Nethinim* (*Mishna Kiddushin*, iii. 12, iv. 1; *Jebamoth*, ii. 4), and they were even excluded from the privileges of being exempt from military service, allotted to newly married people and to those who were faint-hearted (Deut. xx. 7, 8, with *Mishna Sota*, viii. 3-6). If a woman was suspected of being deflowered by any one, or if she had an illegitimate child, it was ascribed to a *Nathin*, and the offspring took the degraded position of the *Nathin*, notwithstanding the assertion of the mother that the father of the child was a priest, unless she could adduce proof to support her own assertion (*Mishna Kethuboth* i. 8, 9); and if a court of justice (בֵּית דִּין) gave a decision, and one of the members of the court was found to be a *Nathin*, the judgment was invalid, inasmuch as he was not regarded as a legal member of the congregation (עֵד) specified in Lev. iv. 13; Num. xxxv. 24 (*Mishna Horajoth*, iii. 1). The opinion of Plumptre (*Smith's Biblical Dictionary*, s. v. *Nethinim*), that the festival of wood-carrying may have been designed to relieve the *Nethinim*, is at variance with the origin of the festival [WOOD-CARRYING, FESTIVAL OF].—C. D. G.

NETOPHAH (נֶטֶפָח), 'a dropping'; *Netwphá*; Ἀνωφά; Alex. Νεφωτά, and Ἀντοφά; *Netupha*), a town mentioned in the lists given by Ezra (ii. 22) and Nehemiah (vii. 26) of those who returned from the captivity. It is grouped between Bethlehem and Anathoth, and apparently it was closely connected with the former (1 Chron. ii. 54). The name of the town itself occurs only in these two passages; but the Gentile noun *Netophathite* (נֶטֶפָתִי); *Netwphatites*, *Netwphathites*; Alex. Νεωφθαίτης, etc.; *Netophathites*) is used several times by the sacred writers. Two of David's mighty men were *Netophathites* (2 Sam. xxiii. 28, 29; cf. 1 Chron. xi. 30). In 1 Chron. ix. 14-16 we read of certain Levites there named that they dwelt 'in the villages of the *Netophathites*,' which would seem to suggest that there was more than one village of the same name—probably a small district in the neighbourhood of Bethlehem (cf. Neh. xii. 28). The *Netophathites* seem to have been a warlike race, for one of the great military leaders of the Jews, during the rule of the Persian satrap Gedaliah at Mizpah, was Seraiah the son of Tanhumeth the *Netophathite* (2 Kings xxv. 23; Jer. xl. 8). All, therefore, that can now be ascertained regarding this ancient village or district is, that it belonged to Judah, was situated near Bethlehem, and was occupied, in part at least, by a family of Levites. It is not

mentioned by classic or ecclesiastical writers. Mr. Grove (*Smith's Dict. of the Bible*, s. v.) has suggested its identity with the *Antibeh* of Van de Velde's map, and the *Um Taba* of Tobler (*Dritte Wanderung*, p. 80), a half-ruined village a mile and a half north-east of Bethlehem. The site agrees with the notices of the sacred writers, and the name bears some remote resemblance to *Netophah*. There is a large and ancient village called *Beit Netti* fifteen miles south-west of Jerusalem, on the brow of the valley of Elah; it is too far from Bethlehem to be identified with *Netophah*, though the names are radically identical, yet it is probably the *Beth Netopha* of the Rabbins (see Reland, pp. 650, 909; Robinson, ii. 17).—J. L. P.

NETOPHATHI (Neh. xii. 28). [NETOPHAH.]

NETOPHATHITE. [NETOPHAH.]

NETS (נֶזֶם; Sept. ἵεπαξ; Vulg. *accipiter*, an unclean bird; A. V. HAWK; Lev. xi. 16; Deut. xiv. 15; Job xxix. 26). The English name is an altered form of the old word *fawk* or *falk*, and in natural history represents several genera of raptorial birds; as does the Arabic *nas*, and, no doubt, also the Hebrew *netz*. Western Asia and Lower Egypt, and consequently the intermediate territory of Syria and Palestine, are the habitation or transitory residence of a considerable number of species of the order *Raptores*, which, even including the shortest-winged, have great powers of flight, are remarkably enterprising, live to a great age, are migratory, or followers upon birds of passage, or remain in a region so abundantly stocked with pigeon and turtle-dove as Palestine, and affording such a variety of ground to hunt their particular prey—abounding as it does in mountain and forest, plain, desert, marsh, river, and sea-coast. We shall here enumerate, so far as our information will permit, the *Falconidae* of this region, exclusive of those mentioned in other articles [OZNIYAH; NESHER; DAAH].

409 Peregrine Falcon.

Falcons, or the 'noble' birds of prey used for hawking, have for many ages been objects of great interest, and still continue to be bought at high prices. They are consequently imported from distant countries, as central Asia, Iceland, Barbary, etc. Their love of liberty often renders them irreclaimable when once on the wing; and their powers and boldness, independent of circumstances, and the extent of range which the long-winged species in particular can take, are exemplified by their

presence in every quarter of the globe. The *Falco communis*, or Peregrine falcon, is so generally diffused as to occur even in New Holland and South America. As a type of the genus, we may add that it has the two foremost quill-feathers of almost equal length, and that when the wings are closed they nearly reach the end of the tail. On each side of the crooked point of the bill there is an angle or prominent tooth, and from the nostrils backwards a black streak passes beneath the eye and forms a patch on each side of the throat, giving the bird and its congeners a whiskered and menacing aspect.

Next we may place *Falco Arocris* of Sir J. G. Wilkinson, the sacred hawk of Egypt. This, if it be not in reality the same as, or a mere variety of, the Peregrine, should have retained the ancient epithet of *Hierax*, and the hawkers' name of *Sacre*, derived from the Arabic *Sagr*, which evidently applies to it. This bird has the same moultachio marks, and from them the old name *Gernonia*, which in base Latinity indicates whiskers, may have been derived. Innumerable representations of it occur in Egyptian monuments, since, in the character of *Horhat*, or bird of victory, it overshadows kings and heroes, like the *Garuda*, *Simurg*, and the *Huuma* bird of Eastern Asia; but it is also an emblem of Re, the Sun, and numerous other divinities; for an account of which we refer to Sir J. G. Wilkinson's *Manners and Customs of the Ancient Egyptians*, 2d Series.

The Hobby, *Falco subbuteo*, is no doubt a second or third species of sacred hawk, having similar *germonia*. Both this bird and the tractable Merlin, *Falco axalon*, are used in the falconry of the inferior Moslem landowners of Asiatic Turkey.

Besides these the Kestrel, *Falco tinnunculus*, occurs in Syria, and *Falco tinnunculoides*, or lesser Kestrel, in Egypt; and it is probable that both species visit these two territories according to the seasons.

To the 'noble' birds we may add the Gersfalcon, *Falco gyrfalco*, which is one-third larger than the Peregrine: it is imported from Tartary and sold at Constantinople, Aleppo, and Damascus. The great birds fly at antelopes, bustards, cranes, etc.; and of the genus *Astur*, with shorter wings than true falcons, the Goshawk, *Falco palumbarius*, and the Falcon Gentil, *Falco gentilis*, are either imported, or taken in their nests, and used to fly at lower and aquatic game. It is among the above that the seven species of hunting hawks enumerated by Dr. Russell must be sought; though from the circumstance that the Arabic names of the birds alone were known to him, it is difficult to assign their scientific denominations; but the following identification is tolerably evident—1. *Al-Huz* or *Baraban* is the Gersfalcon; 2. *Al-Saphy*, the Peregrine; 3. *Al-Shaheen*, the Doctor himself asserts to be the Falcon Gentil; 4. *Al-Zygranuz*, the Goshawk. One of the remaining species is, no doubt, the Merlin; and the last, *Al-Bashak*, is the crested Buzzard, *Falco Bacha*, which is most abundant in Africa, and the principal enemy of the Shaphan (Hyrax). The smaller and less powerful hawks of the genus *Nisus* are mostly in use on account of the sport they afford being less fatiguing, as they are employed to fly at pigeons, partridges, quails, Pterocles, Katta, and other species of Ganga. There are various other raptorial birds, not here enumerated, found in Syria, Arabia, and Egypt.

We have at this moment before us coloured representations of three such, copied from the painted sculptures of ancient Egypt; and in conformity with the common laws of animated nature, the Nile cannot be without a variety of species feeding on the produce of its waters and its visitors; but the above enumeration will be found, we trust, sufficient for our present purpose.—C. H. S.

#### NETTLE. [CHARUL; KIMMOSH.]

NEWCOME, WM., D.D., Archbishop of Armagh, was the son of a clergyman at Abington, in Berkshire, where he was born in 1729. Educated at the grammar school of his native town, he soon passed thence to Oxford, where he became fellow and tutor of Hertford College, having C. J. Fox as one of his pupils. In 1765 he proceeded D.D., and, in the capacity of chaplain, accompanied his patron, the Earl of Hertford, when he went as Lord-Lieutenant to Ireland. Here he was soon made Bishop of Dromore, but was successively translated to Ossory, to Waterford, and finally to Armagh in 1795. He died in 1800. He was characterised by affability, candour, moderation, and liberality of sentiment. A diligent biblical student, he became the author of several works on biblical and theological subjects, much more esteemed formerly than now. The principal are:—

1. *An Harmony of the Gospels, in which the original text is disposed after Le Clerc's general manner, with such various readings at the foot of the page as have received Wetstein's sanction, etc. Observations subjoined, tending to settle the time and place of every transaction, etc., and to reconcile seeming inconsistencies*, London 1778, folio. This work involved him in a controversy with Dr. Priestly as to the duration of our Lord's ministry, Priestly contending for one, Newcome for three years.
2. *An Attempt towards an Improved Version, a Metrical Arrangement, and an Exposition of the Twelve Minor Prophets*, London 1785, 4to.
3. *An Attempt towards an Improved Version, a Metrical Arrangement, etc., of the prophet Ezekiel*, Dublin 1788, 4to. 'Both the translation and the notes proceed to a large extent on the vicious principle . . . of getting rid of difficulties in the sense by proposed emendations of the text.' 'Would correct the Heb. text from the Septuagint'—Fairbairn.
4. *An Historical View of the English Biblical Translations; the Expedience of revising by authority our present Translation, and the Means of executing such a Revision*, Dublin 1792, 8vo.
5. *An Attempt towards revising our English Translation of the Greek Scriptures, or the New Covenant of Jesus Christ, and towards illustrating the sense by philological and explanatory Notes*, 1796, 2 vols. royal 8vo. Although bearing the above date, this work was not published till some time after the author's death. It was professedly made the basis of the unscholarly and worthless production published by the Unitarians under the dignified title of 'The New Testament in an IMPROVED VERSION,' etc.—I. J.

NEW MOON, FEAST OF THE (רֵאשׁ חֹדֶשׁ), or simply חֹדֶשׁ, Sept. *νεομηνία, νοομηνία*; Vulg. *Calendæ*), like the Sabbath and other festivals, has been celebrated among the Jews and other nations from the remotest antiquity.

### 1. Celebration and Sanctity of this Festival.—

All that the Mosaic code says about this festival is contained in the two passages enjoining that two young bullocks, a ram and seven lambs of the first year as a burnt-offering, with the appropriate meat-offerings and drink-offerings, and a kid as a sin-offering, are to be offered on every new moon in addition to the ordinary daily sacrifice, and that the trumpets are to be blown at the offering of these special sacrifices, just as on the days of rejoicing and solemn festivals (Num. x. 10; xxviii. 11-15). It is, however, evident from the writings of the prophets, and from post-exile documents, that the new moon was an important national festival. It is placed by the side of the Sabbath (Is. i. 13; Ezek. xlvi. 1; Hos. ii. 3), and was a day on which the people neither traded nor engaged in any handicraft-work (Amos viii. 5), but had social gatherings and feasts (1 Sam. xx. 5-24), resorted for public instruction either to the Temple (Is. i. 13, lxvi. 23; Ezek. xlvi. 1, 3), or to the houses of the prophets and other men of God (2 Kings iv. 23); and no national or private fasts were permitted to take place, so as not to mar the festivities of the day (Judith viii. 6; *Mishna Taanith*, ii. 10). The *Hallel* was chanted in the Temple by the Levites whilst the special sacrifices were being offered [*HALLEL*]; and to this day the Jews celebrate new moon as a minor festival. The day previous to it, *i.e.*, 29th of the month, which is called *ראש חודש*, *New Moon Eve*, *ה' פרוצטאג* (Judg. viii. 6), is kept by the orthodox Jews, in consequence of the remark in the *Mishna* (*Shebaoth*, i. 4, 5), as the *minor day of atonement*, and is devoted to fasting, repentance, and prayer, both for forgiveness of the sins committed during the expiring month, and for a happy new month. It is for this reason denominated *יום כטן*, since they say that, just as the great day of atonement is appointed for the forgiveness of sins committed during the year, this minor day of atonement is ordained for the remission of sins committed during each month. They resort to the synagogue, put on the fringed wrapper or *Tallith* [*FRINGED GARMENT*] and the phylacteries; whereupon the leader of the service recites Ps. cii., offers a penitential prayer (*יום זה*), after which he recites Ps. viii., the prayer called *Ashre* (*אשרי*), and the *half Kadi'sh*. The scroll of the Law (*ספר תורה*) is then taken out of the ark, and *ויחל*, or Exod. xxxii. 11-15, xxxiv. 1-10, with the *Haphtara*, Is. lv. 6, lvi. 1-8, are read, being the appointed lesson for fasts [*HAPHTARA*], after which other appointed penitential prayers, together with the ordinary daily afternoon service, conclude the vespers and the fast, when the Feast of the New Moon is proclaimed, which, like all the feasts and fasts, begins on the previous evening. On the morning of the new moon, they resort to the synagogues in festive garments, offer the usual morning prayer (*שחרית*), inserting, however, Num. xxviii. 11-15 in the recital of the daily sacrifices, and the prayer *יעלה ויבוא* in the eighteen benedictions. The phylacteries which are worn at the ordinary daily morning service are then put off, and the *Hallel*, with its appropriate benediction, given in the article *HALLEL* of this Cyclopædia, is recited, all the congregation standing; after which, the scroll of the Law (*ספר תורה*) is taken out of the ark, and Num. xxviii. 1-15 is read in four sections;

the first section (*i.e.*, ver. 1-3) being assigned to the priest; the second (ver. 3-5) to the Levite; the third (ver. 6-10) to an Israelite; and the fourth (ver. 11-15) to any one. If new moon happens on a Sabbath, two scrolls of the Law are taken out of the ark, from the first of which the ordinary Sabbath lesson is read, and from the other Num. xxviii. 9-15, or *Maphtir*; and if it happens on a Sunday, 1 Sam. xx. 18-42 is read as the *Haphtara* instead of the ordinary lesson from the prophets [*HAPHTARA*]. Unlike their brethren in the time of the prophets (Amos viii. 5), the Jews of the present day work and trade on New Moon.

### 2. Mode of ascertaining, fixing, and consecrating the New Moon.—

As the festivals, according to the Mosaic law, are always to be celebrated on the same day of the month, it was incumbent upon the spiritual guides of the nation to fix the commencement of the month, which was determined by the appearance of the new moon. Hence the authorities at Jerusalem, from the remotest times, ordered messengers to occupy the commanding heights around the metropolis, on the 30th day of the month, to watch the sky, who, as soon as they observed the moon, hastened to communicate it to the synod; and, for the sake of speed, were even allowed, during the existence of the Temple, to travel on the Sabbath and profane the sacred day (*Mishna Rosh Ha-Shana*, i. 4). These authorities also ordained that, with the exception of gamblers with dice, usurers, those who breed and tame pigeons to entice others, those who trade in the produce of the Sabbatical year, women and slaves, any one who noticed the new moon, is to give evidence before the Sanhedrim, even if he were sick and had to be carried to Jerusalem in a bed (*Rosh Ha-Shana*, i. 8, 9). These witnesses had to assemble in a large court, called *Beth Jazek* (*בית יעוק*), specially appointed for it, where they were carefully examined and feasted, so as to induce them to come; and when the authorities were satisfied with the evidence, the president pronounced the word *מוקדש*, *i.e.*, it is sanctified; whereupon all the bystanders had to repeat it twice after him, it is sanctified! it is sanctified! and the day was declared New Moon (*Mishna Rosh Ha-Shana*, ii. 5, 7). On beholding the new moon from his own house, every Israelite had to offer the following benediction: 'Blessed be He who renews the months! Blessed be He by whose word the heavens were created, and by the breath of whose mouth all the hosts thereof were formed! He appointed them a law and time, that they should not overstep their course. They rejoice and are glad to perform the will of their Creator. Author of truth, their operations are truth! He spoke to the moon, Be thou renewed, and be the beautiful diadem (*i.e.*, the hope) of man (*i.e.*, Israel), who shall one day be quickened again like the moon (*i.e.*, at the coming of Messiah), and praise their Creator for his glorious kingdom. Blessed be He who renewed the moons' (*Sanhedrim*, 42 a). Of such importance was this prayer regarded, that it is asserted, 'Whoso pronounceth the benediction of the New Moon in its proper time, is as if he had been holding converse with the Shechina' (*לחמברך על החדש בזמנו כאלו*) *מקבל פני שכינה* (*ibid.*). To this prayer was afterwards added, 'A good sign, good fortune be to all Israel! (to be repeated three times). Blessed

be thy Creator! Blessed be thy Possessor! Blessed be thy Maker! (repeated three times). As I leap towards thee but cannot touch thee, so may my enemies not be able to injure me (said leapingly three times). May fear and anguish seize them. Through the greatness of thine arm they must be as still as a stone; they must be as still as a stone through the greatness of thine arm. Fear and anguish shall seize them. Amen, Selah, Halle-lujah. Peace, peace, peace be with you' (*Sopherim*, ii. 2). This prayer, which, during the period of the second Temple was offered up by every Israelite as soon as he beheld the new moon, is still offered up every month by all orthodox Jews, with some additions by the Rabbins and the Kabbalists of the middle ages, and is called in the Jewish ritual קידוש לבנה, *Consecration of the New Moon*.

3. *Origin of this Festival*.—That the Mosaic law did not institute this festival, but already found it among the people, and simply regulated it, is evident both from the fact that the time of its commencement is nowhere stated, and from the words in which the sacrifices are spoken of ('and on your new moons ye shall offer,' etc., Num. xxviii. 11, etc.), which presuppose its existence and popularity. Several causes co-operated in giving rise to this festival. The periodical changes of the moon, renewing itself in four quarters of 7½ days each, and then assuming a new phase, as well as the fact that the reappearance in the nocturnal sky of ancient cities and villages—the inhabitants of which were consigned to utter darkness, great dangers, and 'the terrors by night,' during its absence, since they had no artificial means of lighting their roads, combined together to inspire the nations of antiquity, both with awe and gratitude when reflecting on these wonderful phenomena, and beholding the great blessings of the new moon. This is the reason why different nations, from the remotest periods, consecrated the day or the evening which commences this renewal of the moon to the deity who ordained such wonders; just as the first and the beginning of every thing were devoted to the author of all our blessings.

4. *Literature*.—Maimonides, *Iad Ha-Chesaka, Hichoth Kiddush Ha-Chodesh*. This tractate has been translated into Latin, both by De Veil, Paris 1669, Amsterdam 1701; and by Witter, Jena 1703; Abravanel, *Dissert. de Principio anni et consecratione Novilunii*; Hebrew and Latin appended by Buxtorf to his translation of *The Cosri*, Basel 1659, p. 431, ff.; Knobel, *Commentary on Exodus and Leviticus in the Kurzgefast. exegetische Handbuch zum A. T.*, vol. xii., Leipzig 1858, p. 531, ff., where a vast amount of classical information is brought together to shew that this festival existed among many heathen nations of antiquity; and the article HILLEL of this Cyclopædia.—C. D. G.

#### NEW TESTAMENT. [TESTAMENT.]

NEWTON, THOMAS, D.D., Bishop of Bristol, was born in 1704, and died in 1782. The son of a tradesman in Litchfield, Staffordshire, he was partly educated at the local grammar school, and partly at Westminster, from which he went to Trinity College, Cambridge. For some years he was a city preacher, but in 1744 he was presented by Pulteney, Earl of Bath, to the living of Mary-le-Bone. He was afterwards lecturer at St. George's, Hanover Square, prebendary of Westminster, and

dean of Salisbury; and was, in 1762, made bishop of Bristol. He was not a man of much intellectual power or biblical scholarship. The only work of his which claims notice here is:—*Dissertations on the prophecies which have been remarkably fulfilled, and are, at this time, fulfilling in the world*, London 1759, 1766, 3 vols. 8vo. This work was long popular, and has been often republished. By a certain class, who lag behind their age, it is still read and admired. It may, however, be occasionally consulted with advantage.—I. J.

NEW YEAR, or FEAST OF TRUMPETS (זכרון תרועה, יום תרועה, ראש השנה), though not one of the three great festivals on which the male population appeared before the Lord in Jerusalem, is nevertheless one of the first among the principal holydays, and as such has been celebrated by the Israelites since the giving of the Law, and is observed to the present day.

1. *Name and its signification, and the import of this festival*.—In the two passages where the institution of it occurs, this festival is called זכרון תרועה, *remembrance blowing*, i. e., of trumpets (Levit. xxiii. 24; Sept. *μνησμονιστον σαλπιγγων*, Vulg. *sabbatum memoriale clangentibus tubis*), and יום תרועה, *the day of blowing*, i. e., the trumpets (Num. xxix. i.; Sept. *ἡμέρα σημαστας*; Vulg. *dies clangoris et tubarum*). To understand this indefinite appellation, we must examine the import of this festival. As the first of *Tishri*, on which this festival occurs, besides being the new moon, is the beginning of that month wherein the festivals most distinguished, both for holiness and joy, are celebrated [FESTIVALS], it had to be connected in an especial manner with the import of the month itself. Hence, as Maimonides observes, it was made, as it were, a stepping-stone to, and a preparation for, the great day of atonement (נאלי).

ליום הצום, *ליום הצום*, הוא הצעה פתיחה ליום הצום (*More Nebuchim*, iii. 43). This is not only indicated by the particle אף (Lev. xxiii. 27), which forms the transition from the feast of new year to the day of atonement, but has been so understood by the unanimous voice of the Jewish church, which from time immemorial has observed the ten intervening days between these two festivals as *days of penitence*, and calls them 'the ten days of repentance, or humiliation' (עשרת ימי תשובה, comp. *Talmud, Rosh Ha-Shana*, 18 a; Maimonides, *ibid*; *Orach Chajim*, secs. 582, 602, 603). Being preparatory to it, the festival of the new year had to draw the attention of the Israelites to the design of the day of atonement, by summoning and stirring them up to it. As it is ordained that whenever all Israel are to be summoned to general action—e.g., either to a convocation, journey, war, or an assault—the priests are to blow silver trumpets made especially for this purpose (Num. x. 1-10), and that these trumpets are especially to be blown at every sacred work in order to summon the people on festivals and new moons to participate in the sacrifices (*ibid*. v. 10); the festival of the new year, which is designed to summon the Israelites to the most holy of all works, and to prepare them for the great day of atonement, had to be furnished with the sign of this summons in an especial manner. Thus the blowing of the trumpets, which was a secondary thing on other festivals, became the

chief and distinguishing feature of this festival. Hence its name, *יום תרועה*, the day on which the trumpets were especially blown; or, the day on which the blowing was peculiarly characteristic (Num. xxix. 1). Moreover, as this blowing of the trumpets is a summons to the Israelites to enter upon the work of sanctification, it is accounted to them as a merit in the sight of God, and the inspired word promises them for it a special remembrance before the Lord (והיו לכם לזכרון לפני אלהיכם). Num. x. 10) and divine help for this holy life (ונזכרתם).

לפני יהוה אלהיכם ונושעתם *ibid.* v. 9). Hence this festival is also called *זכרון תרועה*, the remembrance blowing (Lev. xxiii. 24), i.e., the day on which the blowing of the trumpets, by its summoning the Israelites to effect their reconciliation with God, makes them to be remembered before the Lord, and secures for them divine aid for the holy work before them. The synagogue, however, takes the word *זכרון* more in the sense of *reminding* God of the merits of and his covenant with the patriarchs, and for this reason has appointed Gen. xxi. 1-34; xxii. 1-24, recording the birth and sacrifice of Isaac, as lessons for this festival (comp. Rashi on Lev. xxiii. 24, and the article HAPHTARA in this Cyclopædia). That this festival occurs on the day commencing the civil new year, which from time immemorial has been on the first of the seventh month, called *Tishri*, is not only evident from Exod. xii. 1; xxiii. 16; xxiv. 22; Joseph. *Antiq.* i. 3, 3; but from the fact that both the Sabbatical year and jubilee commenced in this month (comp. Lev. xxv. 9, 10; and the articles FESTIVALS and JUBILEE in this Cyclopædia).<sup>\*</sup> The universal practice of the Jewish nation, who regard and celebrate it as the *Festival of the New*

*Year's Day*, is therefore rightly supported by Christian scholars; and the name *New Year* (ראש השנה), by which this festival is almost universally spoken of in the Jewish literature, is far more expressive than the vague appellation, *Fest of Trumpets*.

2. *The manner in which this Festival was and still is celebrated.*—Like the Sabbath, this festival is to be a day of rest, on which all trade and handicraft works were stopped (Lev. xxiii. 24, 25). As the new year also is the new moon, a threefold sacrifice was offered on this festival—viz., the ordinary daily sacrifice, which was offered first; then the appointed new moon sacrifice [NEW MOON, FEAST OF THE]; and last of all followed the sacrifice of this festival, which consisted of a young bullock, a ram, and seven lambs of the first year, with the usual meat-offerings, and a kid for a sin-offering (Num. xxix. 1-6); and which, with the exception of there being one young bullock for a burnt-offering instead of two, was simply a repetition of the monthly offering. All the time that the drink-offering and burnt-offering were offered, the Levites engaged in soul-stirring vocal and instrumental music, singing the eighty-first and other Psalms; whilst the priests at stated intervals broke forth with awful peals of the trumpets. After the offering up of the sacrifices, the service was concluded by the priests, who pronounced the benediction (Num. vi. 23-27), which the people received in a prostrate position before the Lord. Hereupon the congregation, after prostrating themselves a second time in the court, resorted to the adjoining synagogues, where the appointed lessons from the Law and Prophets were read, consisting of Gen. xxi. 1-34; Num. xxix. 1-6; 1 Sam. i. 1-ii. 10; Gen. xxii. 1-24; Num. xxix. 1-6; Jer. xxxii. 2-20 [HAPHTARA]. Psalms were recited and the festival prayers were offered, beseeching the Lord to pardon the sins of the past year, and to grant to the people a happy new year, which concluded the morning service. The families then resorted to their respective homes, partook, as on other festivals, of a social and joyous repast, and in the evening again went to the Temple to witness the offering of the evening sacrifice, and the incense, and to see the lighting of the candlestick, with which the festival concluded, all wishing each other, 'May you be written down for a happy new year'.

(לשנה טובה תכתב), or, 'May the Creator decree for you a happy new year' (בורא יגזור לשנה טובה); to which it is replied, 'And you likewise' (וגם אתה). This wish or prayer to be inscribed on this day in the book of life arises from the fact that the Jews believe that the feast of the new year is the annual day of judgment, on which all the deeds of man are weighed, whether they be good or evil, the destinies of every individual and every nation are fixed for the ensuing year, and the death and life of every one is determined, as well as the manner of death (*Mishna Rosh Ha-Shana*, i. 2; *Talmud*, in loco). Hence the names *Day of Judgment* (יום הדין) and *Awful Days* (ימי נוראים), by which this festival is sometimes called. It is a remarkable fact that all the ancient astronomers of the different nations have given the figure of an aged man of stern aspect, holding a pair of scales in his right hand and an open book in his left, as the sign of the zodiac for this month, thus expressing the religious idea of this festival.

<sup>\*</sup> Some of the ancients believed that God created the world in *Tishri*, as may be seen from the following discussion in the Talmud:—'R. Eleazar submits the world was created in the month *Tishri* [i.e., the autumnal equinox], because it is said, 'Let the earth bring forth grass, the herb yielding seed and fruit trees' (Gen. i. 11), and it is only in the month *Tishri* that the earth produces herbs and trees full of fruit. . . . R. Joshua again submits the world was created in the month *Nissan* [i.e., the vernal equinox], because it is said, 'And the earth brought forth grass, herbs yielding seed after their kind, and trees growing fruit' (Gen. i. 12); and it is only in *Nissan* that we find the earth full of herbs and the trees exhibiting fruit' (*Rosh Ha-Shana*, 10 b, ff.) But although there is this difference of opinion as to whether the creation took place at the autumnal equinox, when the germ of future life is forming itself in the bosom of the earth, thus beginning with the formation of the germ; or whether it took place at the vernal equinox, when life and vegetation are in full development, thus coming into existence with the full bloom of spring; yet all the Rabbins agree that the extremes of heat and cold, or summer and winter, are not adapted for production, and date the new year from *Tishri*, or the autumnal equinox, which contains the germ to be developed in the following year, in conformity with the rule laid down in the Scriptures for computing time, according to which, periods are dated from the evening (Gen. i. 5; Levit. xxiii. 32, *al.*), thus commencing with the germ, as it were, of the coming day.

With the exception of the sacrifices which cannot be offered in consequence of the destruction of the Temple, and a few modifications which have been introduced through the shifting circumstances of the nation, the Jewish ritual for the new year continues to the present day to be essentially the same as it was in the days of Christ. The service comprises prayers of a threefold kind as described in the Mishna, which are as follows:—*i.* A series of texts are recited bearing on the supreme rule of God, consisting of, *a*, אבות till כנגדאברהם; *b*, מזהיה אלה נבור till מזהיה אלה נבור; *c*, קדשת השם, beginning from where the last leaves off till האל הקדוש. After these prayers have been offered, in which the speedy approach of the *kingdom* of God is invoked, when all mankind shall possess the true knowledge of their Creator, and unite in the worship of their supreme Benefactor, and which are called מלכות, of *homage*, a prayer is recited celebrating the holiness of the day (אתה בחרתנו), after which the trumpet is blown. *ii.* Then follow prayers acknowledging the omniscience, providence, and supremacy of the Creator, and beseeching him to remember his creatures in pity, and temper his judgment with mercy, which are called זכרונות, of *Remembrance*, and after which the trumpet is again blown; and *iii.* Prayers celebrating that future jubilee when all men will be free from the bondage of error, and acquire perfection in the knowledge of their God, which are called שופרות, of *Sounding the Trumpet*, and after which the trumpet is blown a third time. The service is then concluded with the recital of the עבודה הודאה and ברכת כהנים, or the three last blessings of the *Amida* or *Mussaph*, מודים, רצה, and שים שלום (*Rosh Ha-Shana*, iv. 5). Before the destruction of the Temple the trumpets were blown all day by the priests in Jerusalem, from sunrise to sunset, but since the downfall of the city it has been ordained that the trumpet is to be blown in every city during the synagogal service, and that every Israelite is obliged to hear its sound. Though the Bible says nothing about the kind of trumpet to be used on this occasion, yet it is certain that 'the cornet used in the Temple on the feast of new year was,' as the Mishna declares, 'a straight horn of a chamois [a kind of antelope, or wild goat], the mouth-piece of which was covered with gold' (*Rosh Ha-Shana*, iii. 3), and the Jews to the present day use a ram's horn, to remind God on this occasion of the ram which he sent to be sacrificed instead of Isaac, and of the covenant made with the patriarchs; for which reason also Gen. xxii. 1-24, recording the sacrifice of Isaac, forms the lesson of this festival. The horns of oxen or calves are unlawful (*Rosh Ha-Shana*, iii. 2), as the use of them would remind God of Israel's sin in making the golden calf, which is also the reason why the Jews in the present day no more gild the mouth-piece of the trumpet. Before sounding the trumpet, which is of this shape, the rabbi pro-

410. New Year's Trumpet.

nounces the following benediction: 'Blessed art thou, O Lord our God, King of the Universe, who

hast sanctified us with thy commandments, and enjoined us to hear the sound of the trumpet! Blessed art thou, O Lord our God, King of the Universe, who hast preserved us alive, sustained us, and safely brought us to this season!' To which the whole congregation responds 'Amen!' The greatest importance is attached to the blowing of the trumpet, as its sound is believed to confound Satan, who on this day of judgment appears before God's tribunal to accuse the children of Israel (*Rosh Ha-Shana*, 16). This explains the otherwise inexplicable rendering of Num. xxix. 1 in the Chaldee paraphrase of Jonathan b. Uzziel, יום

יבבא יהי לכן למערבבא סטנא דאתי למקטנא

לכן בקל יבבותכו, *it shall be a day of blowing to confound Satan, who comes to accuse you, with the sound of your trumpets.* After *Mincha*, or the afternoon service, they go to a river or stream, which they generally prefer to be out of town, and to

have fish, and recite a prayer called תשליו, which consists of the following passages of Scripture: Micah vii. 18-20; Ps. cxviii. 5-9; xxxiii.; and with the earnest recitation of Is. xi. 9, shake their garments over the water. Four reasons are assigned for this service—*i.* It is to pray to God to be as fruitful as the fish. *ii.* To commemorate the sacrifice of Isaac, which, according to an old tradition, Abraham made on this day, in spite of the wiles of Satan, who sought to prevent the patriarch from obeying the Lord, by causing a mighty stream to arise on Abraham's journey to Mount Moriah, which would have drowned both the father and the son but for the prayers of faithful Abraham. *iii.* To be reminded by the sight of the fish that we are as suddenly deprived of our life as these fish are caught in the net (Eccl. ix. 12), and thereby be admonished to repentance. And *iv.* To learn from the fish constantly to direct our eyes upwards.

NEZIB (נְצִיב; Νασιβ; Alex. Νεσιβ; *Nesib*), a town of Judah, mentioned only in Josh. xv. 43. The name is in a group situated along the southern declivities of the mountains, between the mountain proper and the Negeb. Some of the cities in this group were given to Simeon (xix. 7). It is mentioned by Eusebius and Jerome, who state that it was then called Nasib (Νασιβ), and lay in the *ninth* (Jerome, *seventh*) mile from Eleutheropolis, towards Hebron (*Onomast.*, s. v. *Nesib*). There can be no difficulty in identifying it, therefore, with the ruins of *Beit Nusb* (بيت نصيب), situated on a rising ground to the left of the road leading from Beit Jebrin (Eleutheropolis) to Hebron. Its position agrees exactly with the incidental notices in Joshua, and the measurement of Jerome. It is neither in the mountain nor in the plain; but in the low hilly ground which connects the two (Robinson, *B. A.*, ii. 221). The ruins are of considerable extent. The most important are a massive tower sixty feet square, the masonry of which

appears to be of the Jewish type. Near it are the foundations of another great fabric; and the site is strewn with broken columns and large building stones. The writer visited it in 1857, and he has been somewhat surprised to see that Tobler describes it as 'an insignificant cupola with a few ruins. If the old name Nezeb did not cling to the place, one would never suspect it to be an ancient site' (*Dritte Wanderung*, p. 150). Tobler's examination must have been very cursory, or he would have noticed the massive foundations (*Handbook*, p. 280).—J. L. P.

NIBHAZ (נִבְחָז), a deity of the Avites, which they introduced into Samaria (2 Kings xvii, 31). In the T. R. of the LXX. this name is omitted, and instead of it stands Ἐβλαζῆρ, which is either the name of another deity of the Avites or another name for Nibhaz. In the Cod. Alex. the reading is τῆν Ἀβασῆρ καὶ τῆν Ναβᾶς, κ.τ.λ., which favours the former supposition. The termination -αῖερ is אֵסֶר, *eser*, so common in Assyrian proper names. Of Nibhaz nothing certain is known. The Zabians gave the name נִבְזָ, *Nebaz*, to the demon of darkness (Norberg, *Onom. Cod. Adami*, 99, ff.); but there is no ground for connecting this with the idol of the Avites now before us. The Talmudists say that Nibhaz means *dog*, connecting it probably with נִבְחָ, *to bark* (*Talm. Hieros., Avoda Sarah*, iii. fol. 42 b; *Talm. Bab., Sanhedr.*, fol. 63. 2); Jarchi (*in loc.*) and Abendana (*Michlol Sophi*, ad h. l.) expressly say that 'Nibhaz is the image of a dog'; and Abarbanel (*in Proph. priores*, ad h. l.) says, 'The Avites make Nibhan' [so some Codd. read נִבְחָן], 'by which is intended the dog that barks with strength.' By many this has been treated as a mere utterance of Jewish ignorance and prejudice, chiefly on the ground that the dog was amongst the ancient Orientals an object of abomination and not of worship, and that no traces exist of any idol under this shape having been worshipped in Syria or Assyria. But there can be no doubt that the Egyptians worshipped the dog (Strabo, xvii., p. 812; Joseph. *Cont. Apion.*, ii. 7; Juv. *Sat.*, xv. 8, etc.); and that 'Anubis the barker' (comp. Virg. *Aen.*, viii. 698; Ovid. *Met.* ix. 689; Propert. *Eleg.*, iii. 9. [iv. x.] 41) was represented by the Greeks and Romans as a dog-faced man (Diodor. Sic., i. 87; Apul. *Asin. Aur.* xi.; Lucan, *Bell. Civ.* viii. 831).<sup>\*</sup> Nor is the assertion

<sup>\*</sup> Sir J. Gardner Wilkinson says that it is the jackal, and not the dog, whose head appears on Anubis (*Anc. Eg.*, sec. ser., i. 440; ii. 141). If it is so, the error of the ancients in making Anubis dog-headed is not very serious, as the dog and the jackal belong to the same genus. Sir G. Wilkinson himself admits that the resemblance between the jackal and the Egyptian fox-dog is so close that unless the exact character of the former be preserved, it may be confounded with the latter (ii. 143). If the statement of Strabo (xvii., p. 558), that Anubis was worshipped at Cynopolis, be correct, it would appear that the Egyptians themselves did not persistently make the distinction. In a representation of Anubis, given in the *Abhandlungen der Hist. Phil. Klasse der Kön. Preuss. Akad. aus J.* 1820-21, Taf. 6, fig. 52, he appears driving a leash of animals that have very much the appearance of dogs, and whose heads are the counterpart of his own

that the dog was held in abhorrence by all Orientals borne out by facts; for among the Arabs and Persians it was not so (Pococke, *ad Abul. Faraj. Spec. Hist. Arab.*, p. 82; Hyde, *de Relig. Vett. Persar.*, c. xxxv., p. 540); and among various peoples, dogs were held sacred to the gods, and nourished in the temples (Aelian, *Hist. Anim.*, ix. 5 and 20). It is said that formerly, about three hours from Beyroot, on the road to Tripoli, there stood a colossal figure of a dog, which was revered by the people around as a guardian to announce coming danger, and from which the neighbouring stream has received the name of *Nahr-Kelb*, *Dog-River* (Maundrell, p. 412, in *Early Travels in Palestine*, Bohn 1848). Nothing resembling a dog-headed deity has been discovered on the Assyrian monuments; but 'the dog is frequent on the later sculptures; and has been found modelled in clay, and also represented in relief on a clay tablet' (Rawlinson, *Anc. Mon.*, i. 294); and a dog-headed deity would certainly not be more incongruous than the hawk-headed figure at Khorsabad (by some, but erroneously, supposed to represent Nisroch), or the evil genii with lions' heads and apes' ears at Koyunjik (Rawlinson, i. 265, 266). On the subject of this article, see Beyer, *Additt. ad Seldeni de Diis Syris*, p. 321, Amst. 1680; Iken, *Diss. Phil. Theol.*, Diss. xi.—W. L. A.

NIBSIHAN (נִבְשִׁיחַן, 'soft soil,' from root בָּשַׁן; Ναφλαζών; Alex. Νεβσάν; *Nebstan*), one of the cities in the wilderness (נִבְשִׁיחַן) of Judah, and apparently situated near Engedi. It is only mentioned in Josh. xv. 62. The site was unknown to Eusebius and Jerome, who merely name it as belonging to the tribe of Judah (*Onomast.*, s. v. *Nepsam*), and it has not yet been discovered.—J. L. P.

NICANOR (Νικάνωρ). 1. The 'Son of Patroclus' (2 Maccab. viii. 9), a general under Antiochus Epiphanes and Demetrius I., who took a prominent part in the wars waged by the Syrians against the Jews, to whom he 'bore a deadly hate.' Under Antiochus, he had been master of the royal elephants (ἐλεφαντάρχη), but was appointed governor of Judæa by Demetrius (2 Maccab. xiv. 12), whose trusted friend he was, and who had accompanied him when he escaped from Rome (*Polyb.* 3, 21; Joseph. *Antiq.* xii. 10. 4). Nicanor being one of the generals chosen by Lysias when he invaded Judæa, B.C. 166 (1 Maccab. iii. 38), by the proclamation of the sale of Jewish captives, at ninety for a talent, brought multitudes of slave-merchants to his camp (1 Maccab. iii. 41; 2 Maccab. viii. 10, 11; Joseph. *Antiq.* xii. 7. 3. 4). He was, however, most signally disappointed in his expectations; for, in common with his companions-in-arms, he suffered a most disgraceful defeat from Judas Maccabæus, and was compelled to escape in the disguise of a slave to Antioch, where he declared that the Jews had God for their 'defender,' and that they were 'invulnerable' (ἀτρώτους), 'because they followed the laws appointed by Him.'

Four years later, entrusted with a large army by Demetrius, he had orders 'not to spare' the nation of the Jews. According to 2 Maccab. xiv., he at first made peace with Judas Maccabæus, 'whom he loved from his heart'; but, accused by Alcimus to Demetrius, he was compelled to break all his engagements with the Maccabæan chief, and ordered

to send him prisoner to Antioch. But, according to 1 Maccab. vii. 26-32, and Joseph. *Antiq.* xii. 10. 4, Nicanor attempted, at first, by pretence of friendship, to get Judas into his hands. Raphall unites both accounts, regarding the treachery of Nicanor as subsequent to the angry orders he received from Demetrius. Judas, however, discovered the treachery in time, and escaped. Open hostilities immediately commenced, when Nicanor was defeated with the loss of 5000 men, and took refuge in the fortress 'which was in the city of David' (1 Maccab. vii. 31, 32; Joseph. *Antiq.* xii. 10. 4). Josephus, indeed, as the text now stands, represents Judas as sustaining a defeat, and fleeing to the 'citadel which was in Jerusalem.' But there is evidently an error in the text here, as it contradicts the context, which shows that the citadel at Jerusalem was then in the hands of the Syrians.

Nicanor, on coming down from the citadel, and meeting the priests, blasphemed God, and threatened to destroy their temple unless they delivered up Judas, a thing they could not do, even if they were disposed. Departing from Jerusalem, and joined by a fresh army out of Syria, he encamped at Beth-horon. Judas also pitched his camp at the village of Adasa, thirty furlongs off. At length they joined battle, when, Nicanor having fallen among the first, the Syrians were beaten, routed, and slaughtered in their flight. Finding Nicanor on the battle-field, the Jews cut off his head and his right arm, which he 'had stretched out so proudly,' and hung them up at Jerusalem. His tongue also they cut out and minced, and threw to the birds. The day of the victory, the 13th of Adar, being that before 'Mardocheus' day,' they set apart as a season of annual solemnity (B.C. 161) (1 Maccab. vii. 43-49; 2 Maccab. xv. 26-36; Joseph. *Antiq.* xii. 10. 5; see also Winer's *R. W. B.*; Joseph. *Antiq.* xii. 10. 5; see also Winer's *R. W. B.*; Raphall's *Post. Bib. Hist. of the Jews*, chaps. 4 and 6; Jahn's *Heb. Commemorations*, secs. 96, 97, 98).

2. One of the seven first deacons, Acts vi. 5. Tradition represents him as having suffered martyrdom at the same time with Stephen. Dorotheus makes him one of the seventy disciples (Winer, *R. W. B.*)—I. J.

NICODEMUS (Νικόδημος), a Pharisee and member of the Sanhedrim, who was impressed by what he had heard concerning Jesus; but being unwilling, on account of his station, to commit himself without greater surety than he possessed, repaired by night to the house in which Christ dwelt, and held with him that important discourse which occupies the third chapter of John's Gospel. The effect which was then produced upon his mind may be collected from the fact that subsequently, at one of the sittings of the venerable body to which he belonged, he ventured to let fall a few words in favour of Jesus, whose proceedings were then in question (John vii. 50); and that he took part with his colleague, Joseph of Arimathea, in rendering the last honours to the body of the crucified Redeemer (John xix. 39). Nothing further is known of Nicodemus from Scripture. Tradition, however, adds that after he had thus openly declared himself a follower of Jesus, and had been baptised by Peter, he was displaced from his office, and expelled from Jerusalem (Phot. *Biblioth. Cod.*, p. 171). It is added that he found refuge in a country-house of his cousin Gamaliel, and remained there till his death. Some have been disposed to identify

Nicodemus with a rich and pious person of the same name (but originally called Bonai), mentioned in the Talmud, whose family eventually sank into great poverty (Otho, *Lex. Rabbin.*, p. 459). All this is, however, very uncertain, and what is stated in the Apocryphal Gospel of Nicodemus is unsafe, and in some parts manifestly untrue. Too strong an appreciation of the world's good opinion seems to have been the failing of Nicodemus, although Niemeyer (*Charakt.* i. 113) has lately made a strong effort to clear him from this imputation. We do not lay much stress upon what he ventured to say in the Sanhedrim; for he suffered himself to be easily put down, and did not come forward with any bold avowal of his belief. Winer calls attention to the fact, that although he took part in the sepulchral rites of Jesus, he did not join Joseph in his application to Pilate for the body of his crucified Lord; and justly remarks that such characters usually require a strong external impulse to bring them boldly forward, which impulse was probably in this case supplied by the resurrection of Jesus (*Real-W. B.*, s.v.)—J. K.

NICOLAITANS (Νικολαῖται). This word occurs twice in the N. T. (Rev. ii. 6, 15). In the former passage the conduct of the Nicolaitans, τὰ ἔργα τῶν Νικολαϊτῶν, is condemned; in the latter, the angel of the church in Pergamus is censured because certain members of his church held their doctrine, τὴν διδασχὴν τῶν Νικολαϊτῶν. Irenæus, the earliest Christian author who mentions them, says simply (*Contra Hæres.*, i. 26), 'It very clearly appears, from the Apocalypse, that the Nicolaitans held fornication, and the eating of idol-sacrifices, to be things indifferent, and therefore permitted to Christians.' In short, Irenæus evidently knew nothing of the Nicolaitans, except what he gathered from the text of the Apocalypse; as, indeed, the concluding words of his short notice suggest: 'Quapropter dixit et de iis sermo: Sed hoc habes quod odisti opera Nicolaitarum, quæ et ego odi,' unless it be his statement that Nicolas, one of the seven deacons (Acts vi.), was the founder of the sect. The practices of these heretics were the more reprehensible, as being not only opposed to the whole spirit and morality of the Gospel, but a violation of an express decree of the Apostles and Elders, issued in relation to this matter (Acts xv.) As time rolled on, however, the information regarding Nicolas and his proceedings seems continually to have increased, till Epiphanius, at length, furnishes us with a full-blown account of the manner in which the proselyte of Antioch founded the sect which was supposed to bear his name. Nicolas, such is the story of Epiphanius (*Advers. Hæres.*, i. 25, p. 76, edit. Petav.), had a beautiful wife, and, following the counsels of perfection, he separated himself from her; but not being able to persevere in his resolution, he returned to her again (as a dog to his vomit, ὡς κῖνον ἐπὶ τὸν ἴδιον ἐμετον); and not only so, but justified his conduct by licentious principles, which laid the foundation of the sect of the Nicolaitans.

Against this account (in which Tertullian, Hilary, Gregory of Nyssa, and several other fathers, substantially concur) we may object—(1) That the custom of men putting away their wives for the attainment of a supposed higher sanctity evidently belongs to a later period, when the monastic ideas produced these and similar practices. Such an

occurrence was natural enough in the age of Clement of Alexandria and of Tertullian—that is, towards the conclusion of the second century; but we cannot believe it could have happened in the Apostolic age. (2) It is not conceivable that his taking back his wife, even if he had, on those grounds, separated himself from her, would then be regarded as an immorality, much less as an enormous crime, especially considering what St. Paul had said on the subject (1 Cor. vii. 3-6). (3) Epiphanius, after stating that Nicolas lapsed into the greatest enormities, informs us that *all the Gnostics* derived their origin from him; a statement which throws an air of ridicule over all he has told us on this subject, and proves how little his authority in the matter is worth.

Clement of Alexandria has preserved a different version of the story (*Strom.* iii. 4, p. 522, edit. Potter), which Eusebius copies from him (*Hist. Eccles.*, iii. 29), and which is repeated by Augustine and other ancient writers. 'The apostles,' they say, 'reprehended Nicolas for jealousy of his wife, who was beautiful; whereupon Nicolas produced her, and said, Any one might marry her who pleased. In this affair the deacon let fall the expression, *ὅτι παραχρήσασθαι τῇ σαρκὶ δεῖ*, 'that we should abuse the flesh;' which, though employed in a good sense by him, was perverted to a bad one by those who would gain to their licentiousness the sanction of a respectable name, and who from hence styled themselves Nicolaitans.' Who can believe that a sect should take its rise and its name from a casual expression by a man whose obvious sense and whose conduct were opposed to the peculiarities of the sect? Neither can we think the conjecture of Grotius (*Annot. in Apocalyps.*, ii. 6) at all probable: 'Mihi veterum testimonia conferenti, media placet sententia, quæ hæc est: Nicolaum accusatum *ζηλοτυπίας*, quod, uxorem pulchram habens, usitata illa inter Christianos utriusque sexus pacis oscula non satis ferret, in contrarium cucurrisse, et exemplo Laconum ac Catonis uxoris suæ usuram permisisse aliis, plane quasi in eo quod marito et uxore volentibus fieret non peccaretur, etc.' For it is hard to conceive that a custom which was universal could excite any jealousy; and yet more so that a man imbued with the doctrines of the Apostles, as Nicolas was, should seek to turn aside their displeasure by imitating the matrimonial enormities of Spartans or of Cato.

It is evident from the fathers, that the Nicolaitans with whom they were acquainted were Gnostics; since they impute to them the distinctive tenets and practices of the Gnostics. But in the short allusion in Rev. ii. 6, 15, there is nothing to identify the tenets or conduct alluded to with Gnosticism, even supposing that Gnosticism, properly so called, existed in the Apostolic age, which, to say the least, has not been proved to be the case. So that the conjecture mentioned by Mosheim, and which Tertullian appears to favour, may be regarded as probable, that the Nicolaitans mentioned in Revelation had erroneously been confounded with a party of Gnostics formed at a later period by one Nicolas.

The ingenious conjecture of Cocceius—which Vitringa, Michaelis, and others adopt—that by Nicolaitans (Rev. ii. 6, 15) the same class of persons is intended whom St. Peter (2 Ep. ii. 15) describes as *ἐξακολουθήσαντες τῇ ὁδῷ τοῦ Βαλαάμ*,

*followers of the way of Balaam*; and that their name, Nicolaitans, is merely a Greek translation of their Hebrew designation, the noun *Νικόλαος* (from *νικάω* and *λαός*) being a literal version of *בְּלַעַם*, that is, *עַם בְּלַעַם*, is worthy of consideration. The

custom of translating names, which prevailed so extensively in modern Europe, was undoubtedly practised also among the Jews, as the example in Acts ix. 36 (to which others might be added) shows. Accordingly, the Arabic version, published by Erpenius, renders the words *τὰ ἔργα τῶν Νικολαϊτῶν*, *the works of the Shuaibites*, the Arabic *Shuaib* being apparently the name for Balaam. The only objection which occurs to us against this very ingenious and probable supposition, arises from the circumstance that, in the passage, Rev. ii. 14, 15, both 'they that hold the doctrine of Balaam,' and 'the Nicolaitans,' are specified, and are distinguished from each other: 'So hast thou also,' *οὕτως ἔχεις καὶ σὺ*, the Nicolaitans, as well as the Balaamites, mentioned in the previous verse. So that whatever general agreement there might be between those two classes of heretics—and their collocation in the passage before us seems to imply that there was such agreement—it appears equally evident that some distinction also must have separated them the one from the other.—R. L.

NICOLAS (Νικόλαος), a proselyte of Antioch, and one of the seven deacons (Acts vi. 5). Nothing further is known of him; but a large body of unsafe tradition has been connected with his name, under the supposition that he was the founder of the heresy of the Nicolaitans, stigmatised in Rev. ii. 6, 15. (See the preceding article.)

NICOPOLIS (Νικόπολις, 'City of Victory'; *Nicopolis*), a city only mentioned once by the sacred writers. In the epistle to Titus, iii. 12, the apostle Paul says, 'When I shall send Artemas unto thee, or Tychicus, be diligent to come unto me to *Nicopolis*; for I have determined there to winter.' It does not appear where Paul was when he wrote these words, nor is there any direct evidence to show what Nicopolis is meant. The postscript to the epistle says it was written 'from Nicopolis of Macedonia;' but it is of a comparatively late date, and is of no critical value. The language quoted above shows plainly enough that Paul was not at Nicopolis when he wrote the words, but was on his way thither; though Winer and others take it for granted that he wrote from the city (*R. Woerterbuch*, ii. 153). It is of importance, as tending to fix the site of the Nicopolis here referred to, to trace the apostle's route. This, however, cannot be done with absolute certainty. Conybeare and Howson (with whom Alford substantially agrees, *Prolegom. Past. Epist.* vii.) say, 'We learn from an incidental notice elsewhere, that the route he pursued was from Ephesus to Miletus (2 Tim. iv. 20), and thence to Corinth, where he left Erastus;' thence he proceeded to Nicopolis. It is assumed that the Nicopolis spoken of is the city of that name in Epirus (*Life and Epist. of St. Paul*, ii. 481, 1st ed.). There were several other cities also called Nicopolis, some of which were small and of little note, so that they cannot possibly have been referred to here. Two, however, may be mentioned. 1. Nicopolis in Thrace on the river Nessus, and hence termed by Ptolemy *Νικόπολις ἡ περὶ Νέσσου* (*Geogr.* iii. 11); Chrysostom and

Theodoret supposed this to be the place intended by Paul. It was a small unimportant town. 2. Nicopolis in Cilicia, supposed by Schrader to be the place, to suit his theory that the apostle was on his way to Jerusalem (Schrader, *Paulus*, i. 118).

There can be little doubt that the apostle in this passage refers to Nicopolis of Epirus. It was an important city; its position rendered it a good centre from which to perform evangelistic work throughout the adjoining provinces; and from it too he might make excursions to those churches in Illyricum which he perhaps founded at an earlier period (*Conybeare and Howson*, ii. 128, 192, 481). This city was founded by Augustus in commemoration of the battle of Actium, and stood upon the place where his land-forces encamped before that battle. From the mainland of Epirus, on the north, a promontory projects some five miles in the line of the shore, and is there separated by a channel half a mile wide from the opposite coast. This channel forms the entrance of the Gulf of Ambracius, which lies within the promontory. The naval battle was fought at the mouth of the gulf, and where Actium, from which it took its name, and where Antony's camp was stationed, stood on the point forming the south side of the channel. The promontory is connected with the mainland by a narrow isthmus. Upon it Augustus encamped, his tent standing upon a height, from which he could command both the gulf and the sea. After the victory he enclosed the place where his tent was pitched, dedicated it to Neptune, and founded on the isthmus the city of *Nicopolis* (Dion Cas., li.; Strabo, vii., p. 324), and made it a Roman colony. It was not more than some thirty years old when visited by the apostle, and yet it was then the chief city of western Greece. It would appear that Paul was not permitted to spend the winter at Nicopolis as he had intended. The Christians were hated by the Roman authorities; Paul was regarded as their leader, and he was arrested by the *Duumviri* of this city and sent to Rome for trial, on the charge of having instigated the burning of the capital (*Conybeare and Howson*, ii. 482). Nicopolis is thus interesting as the last scene of the great apostle's labours.

The prosperity of Nicopolis was of short duration. It had fallen to ruin, but was restored by the Emperor Julian. After being destroyed by the Goths, it was again restored by Justinian, and continued for a time the capital of Epirus (Mamertin. *Julian*, 9; Procopius, *Bel. Goth.*, iv. 22; Smith, *Dict. of Gr. and Rom. Geog.*, s. v.) During the middle ages, the new town of Prevesa was built at the point of the promontory, and Nicopolis was deserted.

The remains of the city still visible show its former extent and importance. They cover a large portion of the isthmus. Wordsworth thus describes the site:—'A lofty wall spans a desolate plain; to the north of it rises, on a distant hill, the shattered *scena* of a theatre; and to the west the extended, though broken, line of an aqueduct connects the distant mountains with the main subject of the picture—the city itself' (Wordsworth's *Greece*, pp. 229, *seq.*) There are also the ruins of a mediæval castle, a quadrangular structure of brick, and a small theatre, on the low marshy plain on which the city chiefly stood, and which is now dreary and desolate (*Journal of R. G. S.*, iii., p. 92, *seq.*; Leake, *Northern Greece*, i., p. 185, *seq.*;

Cellarius, *Geogr.* i., 1089). The name given to the ruins is *Palcoprevesa*, 'Old Prevesa.'—J. L. P.

#### NIGER. [SIMEON.]

NIGHT (לַיְלָה, or לַיְלָה, probably from לָגַל, *to roll, to sink, the sinking of the day, solis occasus*). The general division of the night among the Hebrews has been described under DAY; and it only remains to indicate a few marked applications of the word. The term of human life is usually called a day in Scripture; but in one passage it is called *night*, to be followed soon by day, 'the day is at hand' (Rom. viii. 12). Being a time of darkness, the image and shadow of death, in which the beasts of prey go forth to devour, it was made a symbol of a season of adversity and trouble, in which men prey upon each other, and the strong tyrannize over the weak (Is. xxi. 12; Zech. xiv. 6, 7; comp. Rev. xxi. 23; xxii. 5). Hence continued day, or the absence of night, implies a constant state of quiet and happiness, undisturbed by the vicissitudes of peace and war. Night is also put, as in our own language, for a time of ignorance and helplessness (Mic. iii. 6). In John ix. 4 night represents death, a necessary result of the correlative usage which makes life a day.—J. K.

#### NIGHTHAWK. [TACHMAS.]

#### NILE. [EGYPT.]

NIMRAH (נִמְרָה, 'pure water'; נַאֲרָה; *Nemra*). After the Israelites had conquered the country east of the Jordan, the tribes of Reuben and Gad asked permission from Moses to settle there, because they 'had a very great multitude of cattle, and they saw the land of Jazer, and the land of Gilead, that, behold, the place was a place for cattle.' They mentioned a number of towns in it, and among them was *Nimrah* (Num. xxxii. 3). These towns appear, from the way in which they are grouped, to have been all near the place of the Israelite encampment in the plain of Moab. It is manifestly the same city which is afterwards mentioned as having been rebuilt by the Gadites, and which is called *Beth-nimrah* (ver. 36, 'בֵּית נִי', 'the house of N. '; נַאֲרָה; *Bethnemra*). The word *Beth* is very often prefixed in Hebrew and Arabic to names of places. The prophets Isaiah and Jeremiah, in pronouncing a curse upon Moab, say, 'the waters of Nimrim shall be desolate' (Is. xv. 6; Jer. xlviii. 34; מֵי נִמְרִים; נִמְרִים; *Nemrim*); and they group *Nimrim* with some of the same places mentioned in connection with it by Moses, as Heshbon and Elealeh; there can be no doubt, therefore, that the same town is referred to. Various interpretations of these words have been given. Aurivillius explains *Nimrim* as an appellative, signifying, as in Arabic, 'limpid water' (*Dissertationes*). Grotius takes מֵי in the sense of 'pastures,' which it will not bear. Light-foot suggests that 'hot springs' are meant. Bochart derives the name from נִמְרָה, 'a panther,' of which *Nimrim* might be the plural, and *Nimrah* the feminine form. This is possible; and it is worthy of note that the name *Nimer* and *Nimreh* occur in several localities east of the Jordan (*Hand-book*, pp. 509, 519, 520). The researches of travellers, however, show both the site of the ancient *Nimrah*, and the meaning of Isaiah's words.

The statements of Eusebius and Jerome regarding this city are confused and contradictory. In the *Onomasticon* (s. v. *Nemra*), Eusebius says of *Nebra* that it is 'a city of Reuben in Gilead, now a large village in *Katanaea* (ἐν τῇ Καταναίᾳ), called *Abara*.' There must be a corruption of the text here; for Jerome writes the name *Nemra*, and says it is still a large village, but does not give its locality. Of *Nemrim* (Eusebius, *Nεκρημῖς*), both state that it is now a village called *Benamerium*, north of Zoar. But under *Bethamnaram* (Eusebius, *Βηθραμράμ*), which they identify with Nimrah, they say that 'it is to this day the village of *Bethamnaris* in the fifth mile north of Libias.' All these notices may have been originally intended for the same place, and the corruption of the text has created the confusion (Reland, pp. 649, 650).

About two miles east of the Jordan, near the road from Jericho to es-Salt, are the ruins of *Nimrim*, on the banks of a wady of the same name. The ruins are now desolate, but near them are copious springs and marshy ground. There can be little doubt that this is the site of Nimrah, or Beth-Nimrah, which Joshua locates in the valley (xiii. 27); and that these springs are 'the Waters of Nimrim' on which Isaiah pronounced the curse' (*Handbook*, p. 308; Robinson, *B. R.*, i. 551; Burckhardt, *Syria*, pp. 355, 391).—J. L. P.

#### NIMRIM, WATERS OF. [NIMRAIL.]

NIMROD (נִמְרוֹד; Sept. *Νεβρώδης*; Josephus, *Νεβρώδης*), a son of Cush, the eldest son of Ham (Gen. x. 8-10). Five sons of Cush are enumerated in verse 7 in the more usual manner of this chapter; but a change of phrase introduces Nimrod. This difference may indicate that while, in relation to the other five, the names have a national and geographical reference, this appellation is exclusively personal. It is strictly an abstract noun, signifying *contempt, rebellion, apostasy, impiety*: but 'it is not to be thought surprising, and it is a thing which takes place in all languages, that a noun which, in respect of its form, is properly an *abstract*, becomes in the use of speech a *concrete*; and conversely' (Gesenius, *Lehrgebäude*, p. 483). But such concretes usually carry a strengthened idea of the abstract, a kind of impersonation of the quality. Therefore Nimrod denotes intensively, *the extremely impious rebel*. Hence we conceive that it was not his original proper name, but was affixed to him afterwards, perhaps even after his death, as a characteristic appellative.

If we assume that the earlier part of the book of Genesis consists of several independent and complete compositions, of the highest antiquity and authority, marked by some differences of style, and having clear indications of commencement in each instance, a reason presents itself for the citation of a proverbial phrase in ch. x. 9. The single instance of minute circumstantiality, in so brief a relation, seems to imply that the writer lived near the age of Nimrod, while his history was still a matter of traditional notoriety, and the comparison of any hero with him was a familiar form of speech. If we place ourselves in such a point of time—suppose the age succeeding Nimrod, which might be the third century after the Deluge—we may see how naturally the origination of a common phrase would rise in the writer's mind; and that a motive of usefulness would be suggested with it. But both these ideas involve that of nearness to the time;

a period in which the country traditions were yet fresh, and an elucidation of them would be acceptable and consonant to general feeling. An apparently just reason thus accrues for the insertion of this little and insulated portion of personal history in the midst of a tablet of the descent of nations. A close translation of the whole passage is this: 'And Cush begat Nimrod: he began

[החל, opened a course of action, led the way] to being a hero in the earth [or in the land]: he was a hero at the chase in the presence of Jehovah; on which account the saying is, Like Nimrod, the hero of the chase, in the presence of Jehovah. And the chief [city] of his dominion was Babel; and [he founded] Ezek and Akkad, and Kalneh, in the land of Shinar.'

The common rendering, 'a mighty hunter,' is doubtless equivalent to this literal translation. The adjunct, 'in the presence of Jehovah,' occurs many times in the Hebrew Scriptures, and it generally conveys the idea of *favour* and *approbation*, as we in our language employ the word *countenance*. Hence some have supposed that here the expression is used in a *good* sense, and denotes that, by the special aid and blessing of God's providence, the bravery and skill of this hero were remarkably successful, in attacking and destroying the ferocious animals which had greatly multiplied. The Jewish commentator Abarbanel, with other Rabbinical writers, 'interpret those words favourably, saying that Nimrod was qualified by a peculiar dexterity and strength for the chase, and that he offered to God [portions] of the prey that he took; and several of the moderns are of opinion that this passage is not to be understood of his tyrannical oppressions, or of hunting of men, but of beasts' (*Ancient Univ. Hist.*, vol. i. p. 276, 8vo ed.) Hence they have contended that we have no reason for regarding Nimrod as any other than a benefactor to his country, and, in that view, a man acceptable and well-pleasing to Jehovah.

But the general opinion is, that no moral approbation is implied, but only that, by his extraordinary possession of prowess, the gift of God, as is every natural talent, he became thus distinguished in clearing the country of wild beasts; and that these exploits led him to make aggressions upon men. Interpreters, with scarcely an exception, from the Septuagint and the Targums down to our own times, understand the whole case thus: that Nimrod was a man of vast bodily strength, and eminent for courage and skill in the arts of hunting down and capturing or killing the dangerous animals, which probably were both very numerous, and frequently of enormous size; that, by these recommendations, he made himself the favourite of bold and enterprising young men, who readily joined his hunting expeditions; that hence he took encouragement to break the patriarchal union of venerable and peaceful subordination, to set himself up as a military chieftain, assailing and subduing men, training his adherents into formidable troops, by their aid subduing the inhabitants of Shinar and its neighbouring districts; and that, for consolidating and retaining his power, now become a despotism, he employed his subjects in building forts, which became towns and cities, that which was afterwards called Babel being the principal. Combining this with the contents of chapter xi., we infer that Nimrod either was an original party in the daring

impiety of building the tower, or subsequently joined himself to those who had begun it. The former fact is positively affirmed by Josephus; but it is not probable that he could have any other evidence than that of the general interpretation of his countrymen. The late Mr. Rich, not thirty years ago, in the extensive plain where lie buried the ruins of Babylon, discovered the very remarkable mound with remains of buildings on its summit (of which see the figure in the article BABEL, of this work), which even now bears the name of *Birs Nimrod*: and this may well be regarded as some confirmation of the common opinion. The precise meaning of the word *Birs* is said to be unknown; which seems to be a proof of high antiquity. There is only one other passage of the O. T. in which Nimrod is mentioned, Micah v. 6, 'the land of Nimrod.' But it is not quite indubitable that these words refer to Babylon, though they may very properly be so construed; for it is possible, and agreeable to frequent usage, to take them as put in apposition with the preceding object of the action, 'the land of Assyria.' The repetition of the demonstrative particle **הַזֶּה** adds something to the former of the two constructions, yet not decisively.

Two different translations of verse 11 have been proposed. The translation which Bochart and many other high authorities have sanctioned is, 'From that land he [Nimrod] went forth to Asshur, and builded Nineveh and Rehoboth city, and Calah, and Resen between Nineveh and Calah, that the great city.' As of the three last-named places we can find scarcely a vestige, or rather none at all, in the Scriptures or in profane authors, we seem to have here a proof of an antiquity far higher than the age of Moses—thus strengthening the idea of a collection, above mentioned. The annexed clause, 'That [or this] the great city' (we decline supplying the verb *is* or *was*, as we can have no authority for determining the tense) is most evidently, according to the use of the pronoun, to be referred to Resen, and not, as some have supposed, to the remoter object, Nineveh.

The writer of this article must acknowledge that he thinks the other rendering, which takes Asshur for the name of the son of Shem (verse 22), the more probable. His reasons are—(1.) The internal probability as arising from a remark made in the beginning of this article, that the whole chapter carries in itself moral evidence of having been written while many of the facts remained in the traditional memory of tribes and nations: thus this passage would give authentic confirmation to a matter of current belief. (2.) Had Asshur not been the nominative to the verb, but the name of the country, propriety would have required a preposition separate or prefixed, or the **הַזֶּה** *directive* or *local* to be subjoined; as we find it in ch. xxv. 18—'in the going [*i. e.*, on the road] to Asshur,' *Asshura* (see ample and elucidatory proof of this usage in Ewald's *Gram.*, Nicholson's transl., sec. 420, and in Nordheimer's *Gram.*, vol. i. sec. 642). We are aware of the objection, that this *He directive* is sometimes omitted; but, we reply, such omission is uncommon, and an instance cannot be found easily, if at all, of the omission when any importance attaches to the idea of local direction (see abundant examples in Noldius's *Particul. Hebr.*, p. 217). (3.) The translation for which we plead is the plain and natural one, the most obvious to both writer and reader; whereas the other is artificial

and obscure: which would not therefore be likely to be adopted by a writer, such as this is, of extreme simplicity and straightforwardness. (4.) All the ancient versions, except the Targum of Onkelos (to which unquestionably great deference is due), adopt this construction.

The objections to this are—(1.) That it is out of place, and unnatural, to bring in any mention of another family, and that a circumstance which would have found its proper position in verse 22. To this objection we reply, that there are two links of association which would dictate the anticipative mention, the idea of building towns, which has this only place in the whole enumeration of descents from Noah's sons; and the fact that a son of Shem, having for some reason (probable, though we can only conjecture it) settled with his tribe among the Hamites, was, either by prospects of superior advantage, or by the jealousy and annoyance of Nimrod, induced to colonise another district. (2.) That, thus taken, the proposition comes naturally as the correlate of verse 10; the one laying down the commencement and chief seat of Nimrod's dominion, namely Babel and its dependencies, and the other subjoining a secondary and subordinate annexation. To this we reply, that it is quite hypothetical, and that the flow of thought and connection is plain and natural upon the other interpretation. (3.) That, in Micah v. 6, Assyria is called 'the land of Nimrod.' The doubtfulness of this interpretation we have already shown. (4.) The learned Mr. Bochart even claims support from the lost writings of Ctesias, as cited by Diodorus the Sicilian; and he might have added Justin's *Epitome of Trogon*. Ctesias lived later than B.C. 400, and wrote histories of Assyria and Persia, of which some fragments, or rather abstracts, are in the collections of Photius. He professed to have derived his materials from ancient authorities in the respective countries; but he is declared by his contemporary Aristotle to be unworthy of any credit, by Plutarch to be frequently a liar, by Aulus Gellius to be a dealer in fables; and he is characterised by Joseph Scaliger as a petty and absurd writer, full of errors and direct falsehoods, and utterly worthless as an historical authority. Yet the utmost that can be derived from Ctesias is, that Ninus was the first king of the Assyrians, that he built Nineveh, calling it after his own name [suppose *Nin Nava*, 'town of Nin'], and that, after his death, his widow Semiramis founded, and carried to a great extent of magnificence, the city of Babylon. How precarious these premises are to support the conclusion, the studious reader will judge.

Mr. Bryant has discussed this question at large, and he gives the result thus: 'The chief objection made by these writers [Bochart, and Hyde in his *De Reliq. Veterum Persarum*, etc.] to the common acceptance of the passage arises from this, that Asshur, they say, is here mentioned out of his place, which is the most frivolous and ill-grounded allegation that could be thought of. Nothing is more common with the sacred writers, in giving a list of people, than to introduce some little history of particular persons, as they mentioned them. The person here spoken of is Nimrod, of the line of Ham, who is mentioned as an extraordinary character. As he trespassed upon Asshur, and forced him to leave the land of Shinaar, his history is so blended with that of Asshur, that one could not

be mentioned without the other. What is said is so far from being introduced out of its place, that nothing could come in more naturally, or with greater propriety. It was impossible to omit it without rendering the history defective. Nimrod was a bold and powerful man. He seized upon Babylon, and forced Asshur to leave that country; who went out of the land, and built Nineveh and other cities. This is the amount of it: and what can be more natural and proper?' (*Anc. Mythol.* vi. 192).

Concerning the subsequent life of Nimrod, the Scriptures give not the slightest information, nor even ground for conjecture. But, after seventeen or more centuries, a dubious and supposititious narrative got into credit, of which the earliest promoter that we know was Ctesias, but which, variously amplified, has been repeated by many compilers of ancient history down to our own times. Rollin, Shuckford, and Prideaux, seem to have given it a measure of credit. It is briefly to this effect:—Some make Nimrod to be Belus, and consider Nin (for *os* and *us* are only the Greek and Latin grammatical terminations) to have been his son; others identify Nimrod and Ninus. It is further narrated that Ninus, in confederacy with Aric, an Arabian sovereign, in seventeen years, spread his conquests over Mesopotamia, Media, and a large part of Armenia and other countries; that he married Semiramis, a warlike companion and continuatrix of his conquests, and the builder of Babylon; that their son Ninyas succeeded, and was followed by more than thirty sovereigns of the same family, he and all the rest being effeminate voluptuaries; that their indolent and licentious characters transmitted nothing to posterity; that the crown descended in this unworthy line one thousand three hundred and sixty years; that the last king of Assyria was Sardanapalus, proverbial for his luxury and dissipation; that his Median viceroy, Arbaces, with Belesis, a priest of Babylon, rebelled against him, took his capital Nineveh and destroyed it, according to the horrid practice of ancient conquerors, those pests of the earth, while the miserable Sardanapalus perished with his attendants by setting fire to his palace, in the ninth century before the Christian era.

That some portion of true history lies intermingled with error or fable in this legend, especially the concluding part of it, is probable. Mr. Bryant is of opinion that there are a few scattered notices of the Assyrians and their confederates and opponents in Eupolemus and other authors, of whom fragments are preserved by Eusebius; and in an obscure passage of Diodorus. To a part of this series, presenting a previous subjugation of some Canaanitish, of course Hamite nations, to the Assyrians, a revolt, and a reduction to the former vassalage, Mr. Bryant thinks that the very remarkable passage, Gen. xiv. 1-10, refers; and he supports his argument in an able manner by a variety of ethnological coincidences (*Anc. Mythol.*, vol. vi., pp. 195-208). But whatever we know with certainty of an Assyrian monarchy commences with Pul, about B.C. 760; and we have then the succession in Tiglath-pileser, Shalmaneser, Sennacherib, and Esarhaddon. Under this last it is probable that the Assyrian kingdom was absorbed by the Chaldeo-Babylonian.

As a great part of the ancient mythology and idolatry arose from the histories of chiefs and sages,

decorated with allegorical fables, it is by no means improbable that the life and actions of Nimrod gave occasion to stories of this kind. Hence, some have supposed him to have been signified by the Indian Bacchus, deriving that name from *Bar-Chus*, 'son of Cush'; and, it is probable, by the Persian giant *Gibber* (answering to the Hebrew *Gibbor*, 'mighty man,' 'hero,' in Gen. x. 8, 9): and by the Greek *Orion*, whose fame as a 'mighty hunter' is celebrated by Homer, in the *Odyssey*, xi. 571-74. The Persian and the Grecian fables are both represented by the well-known and magnificent constellation.—J. P. S.

NINEVEH, Heb. נִינְוֶה; Arab. نَيْنوى; As-

syr. ܢܝܢܘܝܝܐ or ܢܝܢܘܝܐ. Till within about twenty years ago, all that was known of ancient Nineveh was comprised in the scattered allusions and prophecies alluding to it in the Bible, and the casual and fragmentary notices of Assyrian history in Diodorus Siculus, Eusebius, Berosus, and others. As these latter consisted chiefly of the names of kings in genealogical order, and lists which were hardly consistent with themselves, the real amount of our knowledge of the subject was very insignificant, and by many the traditions which existed with respect to Nineveh were regarded as almost fabulous. But within the present generation, unexpected light has been thrown upon a dark period in the history of the world by the discoveries of Mr. Layard, his excavations in Mesopotamia, and the decipherment of the cuneiform inscriptions. The earliest mention of Nineveh is in the 10th chapter of Genesis, the solitary record of primitive ethnology, where it is named among the cities built by Asshur or by Nimrod, according as we render the words, the others being Rehoboth, Calah, and Resen. Of these, Calah is identified with the modern Nimrūd, but Rehoboth and Resen are unidentified, although Selamiyah has been suggested for both. Mr. Fergusson believes that Calah is to be identified with Kalah Sherghat, Resen with Nimrūd, and Nineveh with Koyunjik, as he observes this corresponds best with the arrangement in Genesis, 'Resen between Calah and Nineveh.' For, otherwise, if Nimrūd is Calah, there is no place which can represent Resen (*Nineveh and Persepolis restored*, 67). It must be confessed that the relative position of these places agrees best with this identification. There are three great mounds or groups of ruins along the course of the Tigris. The most northern is on the eastern bank, opposite to Mosul. This is Koyunjik, which, according to tradition, represents Nineveh. About thirty miles further south, near the junction of the Tigris and the greater Zab, the ancient Lycus, is Nimrūd, and forty miles still further, on the opposite or right side of the river, we have Kalah Sherghat.

There is an allusion to the kingdom of Asshur in the rhapsodies of Balaam, Num. xxiv. 22, 24, and in Ps. lxxxiii. 9; but the name of the city Nineveh does not meet us till the time of Jonah, when it appears as the scene of his wonderful mission. In the reign of Menahem, *cir.* 770, Pul, the king of Assyria, came against Israel, and Tiglath Pileser in that of Pekah. 'The vision of Nahum the Elkoshite,' (*Eng. Bible*, 713) is wholly occupied with the burden of Nineveh. In Isaiah, Nineveh is mentioned as the residence of Sennacherib, and it was probably

the scene of his death. Zephaniah, *cir.* 630, devotes a few words to Nineveh, and from the way he alludes to it, we may almost imagine that he was an eye-witness of its fall. In the prophecies of Jeremiah, Assyria and Nineveh have ceased to be objects of notice. There is no mention of either in his catalogue of 'all the nations,' ch. xxv. The kingdom of the Chaldeans has taken their place, and so also with Habakkuk. It is no longer Assyria but Chaldea that is the subject of his threatened woes. In a sublime chapter of Ezekiel—the 31st—the 'Assyrian' is held up as an example of Divine vengeance already executed; so that it is easy to discover approximately the corresponding period of Jewish history and prophecy at which the destruction of the empire must have taken place. It occurred in the reign of Josiah, *cir.* 625.

The fall of Nineveh, like its rise and history, is very much enveloped in obscurity. But the account of Ctesias, preserved in *Didorus Siculus*, ii. 27, 28, has been thought to be substantially correct. It may, however, be observed that Mr. Rawlinson, in his latest work, *The Ancient Monarchies*, vol. i., 521, says that it 'seems undeserving of a place in history.' According to that account, Cyaxares, the Median monarch, aided by the Babylonians under Nabopolassar, laid siege to the city. His first efforts were in vain. He was more than once repulsed and obliged to take refuge in the mountains of the Zagros range; but, receiving reinforcements, he succeeded in routing the Assyrian army, and driving them to shut themselves up within the walls. He then attempted to reduce the city by blockade, but was unsuccessful for two years, till

411. Nineveh.

his efforts were unexpectedly assisted by an extraordinary rise of the Tigris, which swept away a part of the walls, and rendered it possible for the Medes to enter. The Assyrian monarch, Saracus, in despair, burnt himself in his palace. With the ruthless barbarity of the times, the conquerors gave the whole city over to the flames, and razed its former magnificence to the ground. The cities dependent on Nineveh, and in its neighbourhood, appeared to have incurred a like fate, and the excavations shewed that the principal agent in their destruction had been fire. Calcined sculptured alabaster, charcoal and charred wood buried in masses of brick and earth, slabs and statues split with heat, were objects continually encountered by Mr. Layard and his fellow-labourers at Khorsabad, Nimrúd, and Koyunjik.

With the ruin of the city fell the empire, and its fall was universal and complete. In the time of Herodotus, the memory of its fame was living—200 years afterwards; but there was no vestige of Nineveh. Xenophon, who passed over its site,

does not mention the name, but speaks only of *two* cities, which he describes as deserted, Larisas and Mespila, conjecturally identified by Mr. Layard, ii. 248, with Nimrúd and Koyunjik. The Persians never restored it, and it is a singular fact that no inscriptions in the Persian cuneiform character have been discovered in the Ninevite ruins. For this reason, the historians of Alexander, with one exception (Arrian, 42-3), make no allusion to the city. By Ctesias, except in one fragment, and by Diodorus, it is even placed on the Euphrates. Strabo appears to regard it as no longer existing. Speaking of a period towards the close of the reign of Nero, Tacitus mentions its capture by Meherdates, and calls it Ninos (*Ann.* 12, 13); and coins of Trajan and Maximin exist with the legend, Colonia Niniva Claudiopolis, which seems to show that Claudius had founded a colony there. Many Roman remains also are found among the rubbish which covers the Assyrian palaces. And a final reminiscence meets us, but it is only a name, in the battle of Nineveh, A.D. 627, in which Heraclius,

the emperor of the east, triumphed over the armies of the Persian Chosroes (Milman's *Gibbon*, iv. 322).

The dimensions of the city, as given by Diodorus Siculus, were 150 stadia on the long sides of the quadrangle, and 90 on the others, making a square of 480, variously computed as equivalent to 32 (*Gibbon*, ch. 46, n. 101), 60, or 74 miles. Strabo says it was larger than Babylon, and Diodorus asserts that the walls were 100 feet high, broad enough for three chariots abreast, and flanked with 1500 towers, each of the height of 200 feet. Scripture calls it 'an exceeding great city of three days' journey,' and Layard remarks, ii. 247, 'If we take the four great mounds of Nimrūd, Koyunjik, Khorsabad, and Karamles, as the corners of a square, it will be found that its four sides correspond pretty accurately with the 480 stadia or 60 miles of the geographer, which make the three days' journey of the prophet. Within this space there are many large mounds, including the principal ruins in Assyria, such as Karakush, Baasheikha, Baazani, Hussein, Tel-Yara, etc. etc., and the face of the country is strewn with the remains of pottery, bricks, and other fragments.'

In 1841, M. Botta, who was French consul at Mosul at that time, commenced the work of excavation at Koyunjik, but meeting with little success, he changed the place of his labours to Khorsabad. He had not been long at work there before he was rewarded by the discovery of various slabs and sculptures, and, after some months' labour, had succeeded in laying bare the greater part of the ground-plan of a magnificent palace. The antiquities secured by him here were deposited in the museum of the Louvre, and constitute the national collection of Assyrian monuments in France. The principal mound at Khorsabad is susceptible of a twofold division. The upper portion is about 650 feet square and 30 feet in height; the lower, which is connected with it, is about 1350 by 300. At one corner there is a low pyramidal elevation, which may possibly be the remains of a watch-tower or may mark the site of a royal tomb. The whole quadrangle is little more than a mile square, and contains no other ruin of importance. Botta's discoveries were followed by those of Layard at Nimrūd, where similar ruins were laid bare. These were, however, of higher antiquity and of more importance, and were evidently assignable to different epochs. The present condition of Nimrūd is as follows:—In the N.W. corner of a walled enclosure of 2331 yards by 2095, in the widest part, is a mound of 700 yards by 400; surmounted by a conical elevation or pyramid, about 140 feet high. At the foot of the great mound, and west of this quadrangle, the stream of the Tigris once flowed; now it is a mile and a half distant. The remains of not less than fifty-eight towers, at nearly equal distances, are discernible in the northern wall, but not more than fifty can be traced in the eastern. The parts which were not naturally protected by the river, were artificially defended by a deep moat or ditch. In the principal mound, Layard found the remains of distinct buildings, which had evidently been erected by different kings, and in one instance materials had been taken from one building to be employed in the erection of another. In some cases, the destruction had manifestly been the work of fire; in others, the remains had been suddenly covered by the falling in of the upper stories; in the former, the

sculptures were calcined as at Khorsabad; in the other, they were perfectly preserved with all their original sharpness and delicacy of detail. Many of the chambers were panelled with slabs, on which nothing but the same inscription was engraved over and over again; others were lined with sculptures in bas-relief. The pyramidal mound was the remains of a square edifice, solidly built of sun-dried bricks, and faced with large stones, which were carefully squared and bevelled to the height of 20 feet, but above that faced with kiln-burnt bricks. Inside of it was discovered a vaulted gallery, which had probably served the purpose of a royal sepulchre, but was found empty. It was 100 feet long, 12 high, and 6 broad. Excavations were also carried on by Layard at the ruins opposite to Mosul, which consist of two principal mounds, Koyunjik and Nebbi Yunus, or the tomb of the *prophet Jonah*. On the sides, and at the foot of the latter, fronting the river, there is an Arab village, and the top is covered with the graves of Mohammedans, who have been buried around the hallowed spot. The two mounds form part of the west or river side of a continuous series of mounds or fortifications which enclose an irregular quadrangle of unequal sides. Koyunjik measures about 866 yards by 300; Nebbi Yunus, 566 by 400. They are connected by the remains of part of the western wall of the inclosure, which is 4530 yards in entire length. The northern wall is 2330 yards; the eastern one, which forms a curve, is 5300; while the southern one is scarcely 1000. On the north, it was defended by a moat; on the west, by the Tigris, which formerly washed the wall, but is now three-quarters of a mile distant from Koyunjik, though it still approaches the N.W. corner of the enclosure; and on the south, by a ditch or rampart. The eastern side was, at the same time, both the most exposed and the most fortified. The quadrangle is divided into two nearly equal parts by the river Khauser, which winds round the base of Koyunjik. Before entering the enclosure, it runs about a mile and a quarter parallel to the wall, and near it, so as to form a natural defence. On the further side of the Khauser, a low ridge of conglomerate rock was heightened artificially, so as to form a strong outer rampart; and on the south of the point where the Khauser enters the quadrangle, the fortifications were extensive and complete. There were two deep ditches, which were fed by the stream, and ramparts of earth were thrown up for protection. An outer and larger moat, 200 feet wide, was cut out in the rock, ran along the east, and joined another ditch on the south; while, facing the open country, there was a rampart, still nearly 100 feet high, which extended almost the whole length of the quadrangle, and is probably the wall spoken of by Diodorus Siculus. It was constructed chiefly of the earth and rubbish which were removed to make the ditch, and no remains of stone facings to it have been found. In many places the towers, which were for fortification, may still be traced, and it is thought that the gateways were arched. One was discovered in the centre of the northern wall, and another in the inner east wall. The former consisted of two halls, 70 feet by 23, which opened on the plain, and on the interior of the inclosure, by means of gateways, which were flanked by colossal man-headed bulls and winged human figures. The ruts of chariot-wheels could still be traced on the

limestone slabs which formed the pavement. This gateway was buried beneath an immense amount of rubbish, and it is supposed, from this fact, that a lofty tower rose above it, which was probably destroyed by fire.

The ruins at Koyunjik, although similar in character to those at Nimrúd and Khorsabad, belong to edifices of greater extent and magnificence than are to be found at either place. The dimensions of the principal courts exceed those of any other Assyrian buildings. No less than seventy-one chambers were uncovered, which are panelled with bas-reliefs for an extent of nearly two miles, and twenty-seven entrances were excavated, which were flanked by colossal winged bulls or lion-sphinxes, although little more than half was explored.

The most ancient of the excavated edifices is the north-west palace of Nimrúd, which was rebuilt or founded by Asshur-dan-pal, conjecturally the Sardanapalus of the Greeks, whose reign may be placed approximately at 950-920 B.C. The central palace was built by the son of this man Shalmanubar, and rebuilt by his grandson Pul, the husband of Semiramis, who also founded a third. The next in order of date is that at Khorsabad, founded by Sargon about 725. The great palace at Koyunjik was founded by Sennacherib *cir.* 700 B.C. So also was that at Shereef Khan, five miles and a half north of Koyunjik, and the one at Nebbi Yunus. This last appears to have been finished by Esarhaddon, who added another building at Nimrúd, and seems to have employed for this purpose materials taken from the palaces reared by other kings. The son of Esarhaddon either completed or enlarged the palace of his grandfather at Koyunjik, and added to that at Shereef Khan. The south-east palace at Nimrúd is also attributed to him.

The name of Nineveh is met with on Egyptian monuments of Thothmes III., *cir.* 1400 B.C., a king of the 18th dynasty, by some supposed to have been Joseph's Pharaoh. The early capital of the Assyrian empire appears to have been Kalah Sherghat. Sennacherib has been thought to have been the first to remove the seat of government from thence to Nineveh, which he raised from a state of ruin and almost rebuilt. It may be remarked, that if Nineveh was confined within the limits specified above, which are marked by the sites of the principal ruins, the vast space thus enclosed was probably occupied with suburbs—gardens, parks, temples, and the like; in this respect resembling Ispahan, Damascus, and other modern cities of the east. But whatever its extent really was, there can have been no walls like those described by Diodorus, or traces of them would surely have been found. It must, however, be borne in mind that the houses of the poorer part of the nation, being probably built of clay bricks and chopped straw dried in the sun, would rapidly decay, whereas the masonry of sun-dried brick, when properly protected and buried, as it is in the Assyrian remains, would defy the ravages of time; thus the walls of the Nineveh palaces in many places were found to be as perfect as ever. Large quantities of cedar wood were found in some of the ruins, at Nimrúd for example, which at once illustrates and gives life to the prophetic words of Zephaniah: 'He shall uncover the cedar work.' It seems, also, that with the Assyrians both palace and temple were combined in one edifice. No

separate buildings, set apart for temples, as in Greece, have been discovered; no traces of windows have been detected, and the rooms must either have been lighted from above, or through the doors only, as is the case at the present day in Mosul and Baghdad, where, in order to avoid the heat, as little light is admitted as possible. Curtains probably were hung before the apertures, and a device resorted to similar to the modern *talar* described and illustrated by Mr. Fergusson in the work quoted above, p. 130. The importance of Assyria in the ancient world must have been very great, and its influence is discernible even now. The Persians derived their religion and their architecture from the Assyrians, and there is no doubt that the Greeks borrowed their Ionic order from them also through Asia Minor and Ionia. The ornaments on Ionic monuments in Greece are often-times purely Assyrian.

*Prophecy.*—Allusion has already been made to the fulfilment of one part of Zephaniah's prophecy respecting Nineveh. The remainder of it is no less striking when we consider the present condition of the ruins which mark the site of the ancient city,—'He will stretch out his hand against the north and destroy Assyria; and will make Nineveh a desolation, and dry like a wilderness. And flocks shall lie down in the midst of her, all the beasts of the nations: both the cormorant and the bittern shall lodge in the upper lintels of it; their voice shall sing in the windows; desolation shall be in the thresholds. . . . This is the rejoicing city that dwelt carelessly, that said in her heart, I am, and there is none beside me: how is she become a desolation, a place for beasts to lie down in! every one that passeth by her shall hiss and wag his hand' (ii. 13, 14, 15). Nahum may perhaps allude to the way in which Nineveh was destroyed, as described above, in i. 8—'With an overrunning flood he will make an utter end of the place thereof;' and ii. 6, 'The gates of the rivers shall be opened, and the palace shall be dissolved.' He refers to the final and complete character of the coming destruction, i. 9, 'He will make an utter end: affliction shall not rise up the second time;' and 14, 'The Lord hath given a commandment concerning thee that no more of thy name be sown;' and iii. 19, 'There is no healing of thy bruise; thy wound is grievous.' From i. 10, it appears that security and its attendant evils of drunkenness and luxury had stupified the Ninevites when the city was taken,—'While they be folded together as thorns, and while they are drunken as drunkards, they shall be devoured as stubble fully dry;' and so from ver. 12, 'Though they be quiet, and likewise many, yet thus shall they be cut down, when he shall pass through;' and again, iii. 11, 'Thou also shalt be drunken: thou shalt be hid, thou also shalt seek strength because of the enemy.' The total abolition of the idol-worship of the accursed city is spoken of, i. 14, 'Out of the house of thy gods will I cut off the graven image, and the molten image; I will make thy grave; for thou art vile.' With reference to ii. 3, 'The shield of his mighty men is made red, the valiant men are in scarlet.' Layard remarks that the shields and raiment of the warriors are usually painted red in the sculptures, but it is possible that it may refer also to their being dyed with gore. 'Nineveh is of old like a pool of water' (ii. 8), has been interpreted of the moats and dams that

abounded in the district; but then there seems to be no antithesis in 'yet shall they flee away.' May it not be rather, with an allusion indeed to the physical position of the place, a metaphor descriptive of the moral condition of its inhabitants, ordinarily and habitually settled on their lees—stagnant, inert, sluggish, and secure; but yet when the time of destruction comes, so overborne by terror that, though they cry 'Stand, stand,' yet 'none' shall heed or 'look back'? The vast riches and spoil taken in the capture of the city are mentioned ii. 9: 'Take ye the spoil of silver, take the spoil of gold; for there is none end of the store and glory out of all the pleasant furniture;' and the result is that 'she is empty, and void, and waste.' It is singular, in illustration of this, that scarcely any fragments of gold and silver were found in the ruins. That the agency of fire should be conspicuous in the overthrow of the city is predicted in iii. 13, 15: 'The fire shall devour thy bars;' 'There shall the fire devour thee.' And finally, that Nineveh should not fall without a struggle—though when despair came upon them 'the people in the midst of her should be women' (iii. 13)—is intimated ii. 3, 4, 5: 'The chariots shall be with flaming torches in the day of his preparation. . . . The chariots shall rage in the streets, they shall justle one another in the broad ways: they shall seem like torches, they shall run like the lightnings. He shall recount his worthies. . . the defence shall be prepared;' and iii. 14: 'Draw thee waters for the siege, fortify thy strongholds: go into clay, and tread the mortar, make strong the brick-kiln.' Mr. Rawlinson (*Ancient Monarchies*, ii. 279) thinks that the expression 'well-favoured harlot' refers to the licentious practices of Assyrian worship, but he observes at the same time that 'the religious emblems of the Assyrians are almost always free from that character of grossness which in the classical works of art so often offend modern delicacy.'

The parabolic description of the Assyrian in Ezek. xxxi. is supposed by the same writer to refer most appropriately to the time of Asshur-bani-pal, the son and successor of Esarhaddon; and the epithet of 'the bloody city' bestowed by Nahum on Nineveh answers fitly to the character which the sculptures would seem to attribute to him in common with other Assyrian monarchs (vol. ii. 504). The subject of the illustration supplied to Scripture by the manners and customs of the Assyrians and their history, is so largely treated in the recent work of Mr. Rawlinson (vols. i. and ii.), that we cannot do better than refer the reader to that work. He will find it well-nigh exhausted there. Other sources of information on the general subject of this article, are the two works of Mr. Layard, *Nineveh and Nineveh and Babylon*; the various essays and papers in Rawlinson's *Herodotus*, vol. i.; Botta's Letters in *Journal Asiatique*; Sir H. Rawlinson in *Journal of Royal Asiatic Society*; and the *Journal of Sacred Literature*, July 1855; Felix Jones, *Topography of Nineveh*, *Journal of Royal Asiatic Society*, 1855; the papers of Dr. Hincks in *Royal Irish Academy*, and *Journal of Sacred Literature*; and Mr. Fergusson's *Palaces of Nineveh and Persopolis restored*.—S. L.

NISAN (נִסָּן), the first month of the Hebrew civil year. The name, if Semitic, might be traced to נִץ, *netz*, 'a flower,' and would hence mean 'flower-month,' like the Floreal of republican

France. As, however, this is a later name, posterior to the Captivity (Neh. ii. 1; Esther iii. 7), of the month which was originally called אֲבִיב, *Abib*, Gesenius is inclined to follow Benfey in seeking a Persian origin for the word, and finds it in the Zend *Navaçan*, 'new day,' made up of *nav*, 'new,' and *açan*, equivalent to the Sanscrit *ahan*, 'day.' Abib, by which name this month is called in the Pentateuch (Exod. xiii. 4; xxiii. 15; Deut. xvi. 1), means an ear of grain, a green ear; and hence 'the month Abib,' is 'the month of green ears.' It thus denoted the condition of the barley in the climate of Egypt and Palestine in this month. Nisan, otherwise Abib, began with the new moon of April, or according to the Rabbins, of March [MONTH].—J. K.

NISBET, ALEXANDER, minister of the Gospel at Irvine—a town which has been fortunate enough to enjoy the pastoral labours of other Scotch expositors, such as Dickson and Hutcheson. Nisbet was noted among his contemporaries for 'his rare skill in the Oriental languages, especially the Hebrew.' He published in 1658 *A brief exposition of the First and Second Epistles general of Peter*. Succinct and sententious in its character, it is at the same time solid and useful. In 1694, a posthumous work appeared, under the title, *An exposition with practical observations upon the book of Ecclesiastes*. The latter is regarded as the more important of his works, and is worthy of consultation, as lucid and judicious. The argument of each chapter is drawn up at length and with some care. Some attention is given to the precise meaning of the more important Hebrew terms used by the sacred writer. His whole tone is devout and practical, such as we might expect from one who, according to the recommendation prefixed to it by Ralph Rogers and J. Spalding, 'by assiduous study of the Scriptures, did so travail 'in birth towards the forming of Christ in his hearers that he may be said to have died in child-bearing to Christ.'—W. H. G.

NISROCH (נִסְרוֹךְ), an idol of the Ninevites (2 Kings xix. 37; Is. xxxvii. 38). The word is supposed to mean 'great eagle,' from נִשֵּׁר, *Arab.*

نَسْر, *eagle*, and the syllable *och*, *ach*, which in Persian is intensive. This bird was held in peculiar veneration by the ancient Persians; and was likewise worshipped by the Arabs before the time of Mohammed (Jurieu, *Hist. des Dogmes*, iv. 4. ch. 11; Creuzer, *Symbolik*, i. 723; Gesen. *Thesaur.*, p. 892, where also may be seen several derivations proposed by Von Bohlen from the Sanscrit and Zend). [As no trace of this deity is found except in these passages (Selden, *De Diis Syris*, Synt. ii. c. 10), it has been suggested that probably there is some mistake, that 'Nisroch is not a genuine reading' (Sir H. Rawlinson, *Herod.* i. 590). On the Assyrian monuments there appears an eagle-headed, or rather hawk-headed, figure, which has by some been supposed to represent Nisroch, but this figure is that of a subordinate agent, a genius rather than one of the supreme gods (Rawlinson, *Anc. Mon.*, ii. 265). The name is given variously by the LXX. In Kings they give Μεσεράχ or Μεσοράχ, Alex. Ἐσθράχ; in Isaiah, Νασαράχ Alex. Ἀσαράχ.]

NISSEL, JOHANN GEORGE, a native of the Palatinate, who settled in Holland, and devoted

himself to the prosecution of Oriental learning. He prepared and printed at his own expense, and with his own types, an edition of the Hebrew Bible, which appeared in 1659, and again in 1662, with the title *Sacra Biblia Hebraica ex optimis editionibus diligenter expressa, et forma, literis, versuumque distinctione commendata*, Lugd. Bat. Svo. The second edition has a preface signed by Heidan, Cocceius, and Hoornbeek, in which the edition is commended in very high terms. Few more beautifully printed editions of the Hebrew Scriptures have appeared; and it presents with great accuracy the text of the best editions. This edition has also the peculiarity of having the Megilloth between the Thorah and the Nebiim Rishonim, as in the Bomberg Bibles. The text is divided into verses, with Latin headings to the chapters. Nissel edited also some portions of the Scriptures in Ethiopic, but not, it is said, very accurately.—W. L. A.

#### NITRE. [NETER.]

NO (נֹ). The manner in which this ancient city is mentioned in the several passages of the Bible is deserving of the notice of the student of Scripture geography. The first passage in which it occurs is Jer. xlv. 25, 'I will punish the multitude of No'; אֲנִי אֶפְרָא אֶת-רַבְּבוֹתַי נֹ, literally 'the Amon of No' (τὸν Ἀμμὼν τὸν ὑπὸν αὐτῆς; *super tumultum Alexandriae*), where the reference seems to be rather to the Egyptian deity *Amon*, who was worshipped at No, than to the people of that city (which would make אֲנִי אֶפְרָא אֶת-רַבְּבוֹתַי נֹ, 'multitude'). The next passage is Ezek. xxx. 14, 15, 16: 'I will execute judgments in No' (אֲנִי אֶפְרָא אֶת-רַבְּבוֹתַי נֹ; ἐν Διοσπόλει; *in Alexandria*); 'I will cut off the multitude of No' (אֲנִי אֶפְרָא אֶת-רַבְּבוֹתַי נֹ; τὸ πλῆθος Μέρφως; *Multitudinem Alexandriae*); 'No shall be rent asunder' (אֲנִי; ἐν Διοσπόλει; *Alexandria*). The different rendering in the Septuagint here is remarkable. Memphis was identical with the *Noph* of the Bible. The Hebrew word rendered 'multitude' in ver. 15 is different from that in Jeremiah; perhaps it may be a corruption of *Amon*. *Diospolis* was the Greek equivalent of *No-Amon*, and identical with *Thebes*. The last passage is Nahum iii. 8, and is very important, not merely as giving the full name of the city, but also describing its position. It is thus rendered in the A. V.: 'Art thou better than populous No, that was situate among the rivers, that had waters round about it, whose rampart was the sea, and her wall was from the sea?' 'Populous No' is in Hebrew אֲנִי אֶפְרָא אֶת-רַבְּבוֹתַי נֹ, *No-Amon* (LXX. *μερίδα Ἀμμὼν*; \* *Alexandria populatorum*), that is, 'No of Amon,' in which Amon was the supreme deity, and of which he was protector.

Various opinions have been entertained as to the site of this city. That it was in Egypt all admit. The Septuagint identifies it with *Diospolis*; but there were two places of this name—one in Lower Egypt, near the sea, and encompassed by the

marshes of the Delta (Strabo, xviii. p. 802); and with this Champollion and others identify No (*l'Egypte*, ii. 131; Winer, *R. W.*, ii. 160); the other was *Thebes*, in Upper Egypt, which is probably the place really referred to in the Septuagint. For No, Jerome in the Vulgate reads *Alexandria* (as also the Chaldee, the Rabbins, and Drusius); but the town of Alexandria was not in existence in the time of Jeremiah; and yet it appears from the words of Nahum (*l.c.*) that No had been already destroyed in his day (see Bochart, *Opera*, i. 6).

There can be little doubt that *No-Amon*, which Nahum compares with Nineveh, is identical with the great city of Thebes. The objection that Thebes is far from the sea, and does not therefore agree with the description of Nahum, cannot stand the test of critical examination. The sea referred to is the river Nile, which to the present day is usually termed in Egypt *el-Bahr*, 'the sea.' The Nile flows through the midst of Thebes (Bochart, *Opera*, i. 7; Robinson, *B. R.*, i. 20, and 582). [THEBES.]—J. L. P.

NOAH, the second father of the human race, was the son of the second Lamech, the grandson of Methuselah, and the tenth in descent from Adam through Seth.

The father of Noah must not be confounded with the Lamech who was the fourth in descent from Cain. There is another instance of the same name in each line, Enoch; but the periods of each of the two couples must have been very different, though we cannot exactly compare them, for the history does not give the years of life in the line of Cain. The two Lamechs, however, have one remarkable circumstance in common; to each of them a fragment of inartificial poetry is attached as his own composition. That of the Cainitic Lamech is in Gen. iv. 23, 24. That of the Sethite now comes before us in ch. v. 28, 29:—'Lamech lived 182 years, and then begat a son, and he called his name Noah, saying—

This shall comfort us  
From our labour,  
And from the sorrowful toils of our hands;  
From the ground,  
Which Jehovah hath cursed.'

The allusion is undoubtedly to the penal consequences of the fall in earthly toils and sufferings, and to the hope of a Deliverer excited by the promise made to Eve. That this expectation was grounded upon a divine communication we infer from the importance attached to it, and the confidence of its expression. See this subject well argued in Bishop Sherlock's *Use and Intent of Prophecy*, Disc. iv.

That the conduct of Noah corresponded to the faith and hope of his father we have no reason to doubt. The brevity of the history satisfies not human curiosity. He was born six hundred years before the Deluge. We may reasonably suppose that through that period he maintained the character given of him:—'Noah found favour in the eyes of the Lord. Noah was a just man, and perfect in his generations. Noah walked with God (ch. vi. 8, 9). These words declare his piety, sincerity, and integrity; that he maintained habitual communion with the Father of Mercies, by the exercises of devotion; and that he was an inspired instrument of conveying the will of God to mankind. The wickedness of the human race

\* Critics are not agreed as to the meaning of the word *No*; but it would seem from this passage that the translators of the LXX., who were themselves resident in Egypt, regarded it as equivalent to the Egyptian *ΠΟΖ*, that is, *σχῶνος*, 'a measuring-line,' and then = *μερῖς*, 'a part or portion' (see Gesenius, *Thesaurus*, p. 835).

had long called upon the wisdom and justice of God for some signal display of his displeasure, as a measure of righteous government and an example to future ages. For a long time, probably many centuries, the better part of men, the descendants of Seth, had kept themselves from society with the families of the Cainite race. The former class had become designated as 'the sons of God,' faithful and obedient: the latter were called by a term evidently designed to form an appellation of the contrary import, 'daughters of men,' of impious and licentious men [ELOHIM]. These women possessed beauty and blandishments, by which they won the affections of unwary men, and intermarriages upon a great scale took place. As is usual in such alliances, the worst part gained the ascendancy. The offspring became more depraved than the parents, and a universal corruption of minds and morals took place. Many of them became 'giants, the mighty men of old, men of

renown' (נְפִלִים *nephilim*), apostates (as the word implies), heroes, warriors, plunderers, 'filling the earth with violence' [GIANTS]. God mercifully afforded a respite of one hundred and twenty years (ch. vi. 3; 1 Pet. iii. 20; 2 Pet. ii. 5), during which Noah sought to work salutary impressions upon their minds, and to bring them to repentance. Thus he was 'a preacher of righteousness,' exercising faith in the testimony of God, moved with holy reverence, obeying the divine commands, and, by the contrast of his conduct, condemning the world (Heb. xi. 7); and probably he had, during a long previous period, laboured in that benevolent and pious work.

At last the threatening was fulfilled. All human kind perished in the waters, except this eminently favoured and righteous man, with his three sons (born about a hundred years before) and the four wives [DELUGE].

At the appointed time this terrible state of the earth ceased, and a new surface was disclosed for the occupation and industry of the delivered family. In some places that surface would be washed bare to the naked rock; in others, sand would be deposited, which would be long uncultivable; but by far the larger portion would be covered with rich soil. With agriculture and its allied arts, the antediluvians must have been well acquainted [ADAM]. The four men, in the vigour of their mental faculties and bodily strength, according to the then existing scale of human life, would be at no loss for the profitable application of their powers. Immediately after the desolating judgment, the merciful Jehovah gave intimations of his acceptance of the sacrifice and thanksgivings of Noah and his family, and of his gracious purposes revealed in the form of a solemn covenant, for the continual benefit of them and their posterity. The beautiful phenomenon of the rainbow was put to a new and significant use. As infallibly certain as is the production of a rainbow under certain conditions of the atmosphere, so certain and sure of fulfilment are the promises of Jehovah. The act of grace is announced in the condescending language which was best adapted to the earliest condition of human thought [ANTHROPOMORPHISM]. 'The Lord smelled a sweet odour; and the Lord said to his heart, I will not add to inflict a malediction further upon the ground on account of man' (Gen. viii. 21). 'That old curse,' says Bishop Sherlock,

'was fully executed and accomplished in the flood. In consequence of which discharge from the curse, a NEW blessing is immediately pronounced upon the earth' (*Use and Int.*, p. 89). Noah and his children would labour the more assiduously from the consolation and hope thus inspired. Accordingly, in a subsequent part of the narrative, we read, 'And Noah began, a man of the ground' (ch. ix. 20), *i.e.*, set diligently to his welcome labour, the sorrow being mitigated, the prospect encouraging, and the assurance of success given by divine promise. The simple phrase comprehends the continuity of action, the formation and prosecution of habit. It is added, 'And he planted a vineyard.' Dr. Dereser thinks that the two members of the sentence should be connected, producing this translation, 'And Noah, in his field-work, commenced the planting of a vineyard.' The narrative makes it evident that the occurrence next mentioned, the invention of wine-making, must have been some years after the cessation of the flood; for not Ham himself, but Canaan his son, is the first and emphatic object of the prophetic curse. We cannot, with reason, assume less than fifteen or eighteen years. We are thus led to the idea that agricultural processes were improved, and produce augmented in variety and in quality. The vine had existed before the flood, and Noah could not be unacquainted with it; but not till now had grapes been grown of such size, sweetness, and abundance of juice, as to strike out the thought of expressing that juice, and reserving it in a vessel for future use. Noah, we think it probable, knew not that, in a few days, it would ferment and acquire new and surprising properties. Innocently and without suspicion he drank of the alluring beverage, as if it had been water from the spring. The consequence is recorded in the characteristic simplicity of style which affirms neither censure nor apology. We regard that consequence as not a sinful intoxication, both from what was probably the occasional cause, and from the immediate agency of the Spirit of God in communicating prophecy. The latter, indeed, is not an impregnable ground; for bad men might receive gifts of inspiration, as Balaam and Judas; but Noah was eminently a righteous and perfect man, and it is inconceivable that a miraculous influence of God should be granted in immediate contiguity with a sinful action.

That prophetic denunciation is the last recorded fact of the life of Noah, though he lived through the subsequent period of 350 years. It is a prophecy of the most remarkable character, having been delivered in the infancy of mankind; in its undeniable fulfilment reaching through more than 4000 years down to our own time; and being even now in a visible course of fulfilment. It seems more strictly correct in philology, and more in accordance with fact, to render it as a prophecy, than as precatory of malediction and blessing. We give it in the closest version.

'Accursed Canaan!

A slave of slaves he will be to his brethren.

Blessed Jehovah, God of Shem!

And Canaan will be slave to him.

God will make Japheth to spread abroad,

And he will inhabit the tents of Shem,

And Canaan will be slave to him.'

The first part of this prediction implies that, in some way, the conduct of Canaan was more of-

fensive than even that of his father Ham. The English reader will perceive the peculiar allusion or alliteration of the third member, when he is informed that the name Japheth comes from a verb, the radical idea of which is *opening, widening, expansion*. In two ways one might imitate it: by translating both the words, or by coining a verb; thus, 1, God will enlarge the enlarger; or, 2, God will japhethize Japheth. The whole paragraph, short as it is, contains a *germ* which, like the acorn to the oak, comprehends the spirit of the respective histories of the three great branches of mankind. The next chapter presents to us the incipient unfolding of the prophecy. [NATIONS, DISPERSION OF.]

'God will give to Japheth an abundant posterity, which will spread itself into different regions, and will dwell among the posterity of Shem; and Canaan's posterity will be compelled to be slaves to that of Japheth. The following chapter shows how this chapter has been fulfilled. The descendants of Japheth peopled Europe, the northern parts of Asia, Asia Minor, Media, Iberia, Armenia, the countries between the Black Sea and the Caspian, Great Tartary, India, China, the European settlements in America, and probably America itself. They also inhabit in part the more southerly parts of Asia, mingling freely with the posterity of Shem, who chiefly peopled those regions. On the other hand, Africa, which was peopled by the descendants of Canaan and [other sons of] Ham, was conquered and brought under the yoke by the Romans, descendants of Japheth.' [This applies only to the Carthaginians and settlers in other districts along the north coast of Africa, which had been peopled by the Phenicians and other Canaanitish tribes. We have not the shadow of authority for deriving the negro tribes, or any of the nations of Medial and South Africa, from Canaan.] 'Down to our own times Africa has been to all other nations the source of the supply of slaves' (Dereser, in the Roman Catholic *Germ. Transl. of the Bible*, by him, Brentano, and Scholz, 17 vols. Francf. 1820-33).

It is an old tradition of the Rabbinical Jews, on which they lay great stress, that at this juncture Noah delivered to his children seven precepts, to be enjoined upon all their descendants. These prohibit—1, idolatry; 2, irreverence to the Deity; 3, homicide; 4, unchastity; 5, fraud and plundering; the 6th enjoins government and obedience; and the 7th forbids to eat any part of an animal still living. Mr. Selden has largely illustrated these precepts, and regards them as a concise tablet of the Law of Nature (*De Jure Nat. et Gent. juxta Disciplin. Ebraeorum*), which excellent work of 900 pages is taken up in commenting upon them. Though we have no positive evidence of their having been formally enjoined by the great patriarch, we can have no great reason for rejecting such an hypothesis.

After this event, we have, in the Scriptures, no further account of Noah, than that 'all his days were nine hundred and fifty years; and he died.' That he had no more children is evident from the nature of the case, notwithstanding the antediluvian longevity, from the impossibility of his having a second wife without horrid incest, which surely no man of sound mind can impute to him, and from the absence of the constant clause of ch. v., which would naturally have come after the 28th verse of

ch. ix., 'and begat sons and daughters.' Mr. Shuckford regards this absence of any mention of Noah, as 'a strong intimation that he neither came with the travellers to Shinaar, nor was settled in Armenia or Mesopotamia, or any of the adjacent countries. He was alive a great while after the confusion of Babel, for he lived 350 years after the flood; and surely, if he had come to Babel, or lived in any of the nations into which mankind were dispersed from thence, a person of such eminence could not at once sink to nothing, and be no more mentioned than if he had not been at all' (*Connect.* i. 99). But it must be confessed that the argument from silence, however strong it may appear in this case, is not decisive. The narratives of the Bible are not to be judged of by the common and just rules of writing history. Those narratives are not, properly speaking, a history, but are a collection of such anecdotes and detached facts as the Spirit of holiness and wisdom determined to be the most practically proper for the religious and moral instruction of all sorts of men. The Bible was written for children and poor peasants, as well as for scholars and philosophers. That learned and judicious author supposes that Noah migrated far into the East, and that the Chinese mean no other than him when their traditions assign Fohi as their first king, having no father, *i.e.*, none recorded in their legends; to whom also they attribute several actions and circumstances which appear to be derived by disguise from the real facts recorded in our sacred book of Genesis. One in particular is in connection with a universal deluge; and this is mentioned also by Sir William Jones, who says, 'the great progenitor of the Chinese is named by them Fohi,' and that 'the earth's being wholly covered with water just preceded the appearance of Fohi on the mountains of Chin' (*Works*, iii. 151-55). It may be very rationally conceived that Noah remained long in the neighbourhood of his descent from the ark; and that, at last, weighty reasons might induce him, with a sufficient number of associates, grandchildren and great-grandchildren, who would be born in some 80 or 100 years, to migrate far to the East.

Sir William Jones, also, is evidently inclined to think the seventh Menu of the Hindoos, connected in their ancient books with a universal deluge, to be no other than a legendary representation of Noah. The very name is, indeed, identical, *Me Nuh*, the *M* being a common Oriental prefix, and *Nuh* is Noah without the points.

As the flood affected equally the common ancestry of mankind, all nations that have not sunk into the lowest barbarism would be likely to preserve the memory of the chief person connected with it; and it would be a natural fallacy that every people should attach to itself a principal interest in that catastrophe, and regard that chief person as the founder of their own nation and belonging to their own locality. Hence we can well account for the traditions of so many peoples upon this capital fact of ancient history, and the chief person in it;—the *Xisuthrus* of the Chaldeans, with whom is associated a remarkable number of precise circumstances, corresponding to the Mosaic narrative (Alex. Polyhist. in the *Chronicle of Eusebius*, so happily recovered by Mr. Zohrab, in the Armenian version, and published by him in 1818); the Phrygian *Noë* of the celebrated Apamean medal, which, besides Noah and his wife with an

ark, presents a raven, and a dove with an olive branch in its mouth (figured in Bryant's *Anc. Myth.* vol. iii.); the *Manes* of the Lydians (Mr. W. J. Hamilton's *Asia Min.* iii. 383); the *Deucalion* of the Syrians and the Greeks, of whose deluge the account given by Lucian is a copy almost exactly circumstantial of that in the book of Genesis (*Dea Syria*; Luciani *Opp.* iii. 457, ed. Reitz; Bryant, iii. 28); the many coincidences in the Greek mythology in respect of Saturn, Janus, and Bacchus; the traditions of the aboriginal Americans, as stated by Clavigero, in his *History of Mexico*; and many others.—J. P. S.

NOB (נֹב, perhaps from rad. נָבַה, 'to be high,' and it may thus signify 'a high place;' *Νοῦβα*; Alex. *Νοβά*, *Νοβὰς*, and *Νόβ*; *Nobe*, *Nob*). When David fled from the court of Saul at Gibeah, we are told that 'he came to *Nob*, to Ahimelech the priest' (1 Sam. xxi. 1). It appears from the narrative that the tabernacle and the ark of the covenant were then located in that city, for David got part of the shewbread which was kept before the Lord (ver. 4; cf. Exod. xxv. 30; Luke xxiv. 5-9). David's visit was fatal to *Nob*. Doeg the Edomite, Saul's shepherd, had seen him there, and informed his master. Ahimelech was summoned before the mad king, and sentence pronounced upon him, 'Thou shalt surely die, Ahimelech, thou and all thy father's house.' Not an Israelite, however, would raise a hand against the priests of the Lord; and Doeg, the stranger spy, became the tyrant's executioner. He 'slew on that day fourscore and five persons who did wear a linen ephod, and *Nob*, the city of the priests, smote he with the edge of the sword, both men and women, children and sucklings, and oxen, and asses, and sheep' (1 Sam. xxii. 9-19). The position of *Nob* is incidentally indicated in this narrative. It lay south of Gibeah, for David was on his way to Philistia when he called at *Nob* (1 Sam. xxi. 10); the narrative shows, too, that it was close to Gibeah. Its position is still more definitely fixed by another remarkable passage—Isaiah's description of the advance of the Assyrians on Jerusalem. The several stages in the march are given with minute accuracy—Ai, Michmash, Geba, Ramah, Gibeah, Anathoth. Then the prophet concludes, 'Yet shall he remain at *Nob* that night: he shall shake his hand against the mount of the daughter of Zion, the hill of Jerusalem' (x. 28-32). *Nob* was thus within sight of Jerusalem, and not far distant from Anathoth. It was occupied after the captivity by Benjamin, and is grouped with Anathoth (Neh. xi. 32).

Eusebius and Jerome strangely confound *Nob* with *Nobah*, a city in the east of Bashan (*Onomast.*, s. v. *Nabbe*); though Jerome in another place (*Epitaph. Paula, Opera*, i. 696, ed. Migne) locates the town on the plain of Sharon, somewhere between Antipatris and Nicopolis, a theory which is almost as wild as the former. He doubtless refers to the present *Noba*. The name of *Nob* has long since disappeared, and its site has been unknown for perhaps two thousand years. Von Raumer and Kiepert would identify *Nob* with the little village of *Isawiyeh*, situated to the right of the road which leads from Jerusalem to Anathoth; but *Isawiyeh* is in a deep glen, hidden from the holy city by the ridge of Olivet, whereas *Nob* was in sight of Jerusalem (V. Raumer, p. 195; Van de Velde, *Memoir*, p. 337). Robinson thought *Nob*

must have stood somewhere on the ridge of Olivet or Scopus, and there he searched, but in vain, for any trace of an ancient site (*B. R.*, i. 464). The writer of this article, during his last visit to Jerusalem, made the discovery of *Nob* a special subject of research. He visited Anathoth and Gibeah, and minutely examined the country between these places and the holy city. He believes his researches were successful. Less than a mile south of Tuleil el-Fûl, the site of Gibeah, is a conical rocky tell, separated from the former by a valley. On the summit and sides of this tell are traces of a small but very ancient town—cisterns cut in the rock; large hewn stones; portions of the rocky sides levelled and hewn away; and on the south-east the remains of a small tower. From the summit there is a wide view. *Mount Zion is distinctly seen*, though Moriah is hid by an intervening ridge. The position, south of Gibeah, and not far from Anathoth; the elevation, commanding a view of Zion, against which Isaiah represents the Assyrian as 'shaking his hand'; the ancient remains—all convinced the writer that this is the site of the long-lost *Nob* (*Handbook*, p. 324).—J. L. P.

NOBAH (נֹבָה, 'a barking'; *Ναβαύ*; *Ναβὰς*; *Ναβδν*; *Ναβαί*; Alex. *Ναβέσ*; *Nobe*), a Manassite warrior, who attacked and captured the city of Kenath, in Bashan, 'and called it *Nobah* after his own name' (Num. xxxii. 42). It is most probably the same place which is mentioned in the book of Judges (viii. 11) in describing Gideon's pursuit of the princes of Midian:—'And Gideon went up by the way of them that dwell in tents, on the east of *Nobah* and Jogbehah, and smote the host: for the host was secure.' If this be so, then Gideon must have followed the Midianites into the great plain east of Jebel Haurân. The remarks of Eusebius and Jerome on this name are very confused. In one place (*Onomast.*, s. v. *Nabbe*) they confound it with the sacerdotal city *Nob*; while in another they seem at least to confound it with Nebo of Moab (s. v. *Nabo*), and locate it eight miles south of Heshbon. Both these views are entirely opposed to the topography of the sacred writers. That *Nobah* was the name given to the ancient Kenath cannot be doubted; the new name, however, did not survive the Israelitish rule in that region. It appears never to have superseded the old among the aborigines, and on the retirement of the Israelites the latter was resumed. The evidence is conclusive to identify *Kenath* with the modern *Kunawat*. [KENATH].—J. L. P.

NOBLEMAN. The word so rendered in Jo'hn iv. 46 is βασιλικός, which has somewhat various significations. It may mean: 1. *a rege oriundus*, descended from a king. 2. *ὕπνρητης τοῦ βασιλέως*, one belonging to the court. 3. *στρατιώτης βασιλέως*, a soldier of the king, in which latter sense it often occurs in Josephus. The second signification seems, however, to be the prevalent one; and the Greek interpreters are also favourably inclined towards it. Münster found it likewise in inscriptions. The Syriac has here, 'a royal servant'; the Ethiopic, 'a royal house-servant.' This person was, therefore, probably of the court of Herod Antipas, who reigned over Galilee and Peraea (Tholuck, *Commentar. zum Johan.* iv. 46).—J. K.

NOD (נֹד; Sept. *Ναδ*), the land to which Cain withdrew, and in which he appears to have

settled (Gen. iv. 16). While the site of Paradise itself remains undetermined, it is useless to seek for that of the land of Nod. This land, wherever it was, could not have had a name till Cain went to it; and it was doubtless called Nod (which signifies *flight, wandering*), from the circumstance that Cain fled to it.

NODAB (נֹדָב, 'nobility'; Ναδαβαῖος; *Nodab*).

We read in 1 Chron. v. 19 that the Reubenites, Gadites, and Manassites, 'made war with the Hagarites, with Jetur, and Nephish, and *Nodab*, conquered them, captured immense booty, and the 'children of the half tribe of Manasseh dwelt in the land' (ver. 23). It appears that the land thus acquired lay on the east side of Hermon, bordering on the plain of Bashan. The name Nodab is not elsewhere mentioned. They are called Hagarenes, and must consequently have been descended from Ishmael, though they are not enumerated among the tribes in Gen. xxv. Calmet (after Jerome, *Quaest. Heb. in Lib. 1 Paralip.*) has suggested that Nodab is another name for Kedemah, and this appears to derive some probability from the fact that the list in Genesis mentions in order 'Jetur, Naphish, and *Kedemah*;' while in Chronicles we have 'Jetur, Nephish, and *Nodab*.' Forster, who adopts this view, advances another argument in its favour. He says, 'This Ishmaelite tribe, agreeable to a very general Arab usage, being designated, in the one instance by its *patronymic*, in the other by its *nom de guerre*. For, 1. The signification of the word *Nodab*, in the Arabic idiom, is 'the vibration of a spear;' 2. The natives of the coast of the Persian Gulf, in the vicinity of Kadema, were famous for the manufacture of spears; and, 3. Nodab is expressly mentioned by the author of the Kamouz, a writer of the 15th century, as a then existing Arab tribe' (*Geogr. of Arabia*, i. 314, *seq.*). This reasoning is scarcely conclusive; but there is at least some probability in the theory. If Kedemah and Nodab were not identical, then Nodab must have been a sub-tribe of Ishmaelites who had united themselves to Jetur and Nephish. When conquered by the Israelites it is probable the greater part of them retreated into the desert of Arabia, where the great nation of *Agraci*, or Hagarites, are located by the Greek and Roman geographers. [HAGARITES; ISHMAEL; JETUR.] No Arab tribe of Arabia, so far as the writer can discover, now bears the name Nodab. —J. L. P.

NOESSELT, JOHANN ANG., D.D., and professor of theology at Halle, was born there 2d May 1734, and died 11th March 1807. His contributions to Biblical literature are principally contained in two small volumes of *Opuscula ad interpretationem S.S.*, Hal. 1785-87. A third volume appeared in 1817, containing some dissertations pertaining to church history. Nösselt was inclined to rationalism, but his *Opuscula* contain many valuable observations, and much sound exegesis. —W. L. A.

NOLDE, CHRISTIAN, professor of theology at Copenhagen, was born at Hoyby, in Sweden, in 1626, and died 22d August 1633. He is the author of *Concordantiae Particularum Ebraeo-Chaldaicarum in quibus partium indeclin., quae occurrunt in fontibus, natura et sensuum varietas ostenditur*, etc., 4to, Hafn. 1679, of which a second and im-

proved edition by J. G. Tympe appeared at Jena in 1734. This is one of the books which are all but indispensable to the student of the O. T. Neither Buxtorf nor First in their concordances take note of the particles. Nolde has not only supplied this deficiency, but has also made his work a valuable lexicon of the particles, and has discussed exegetically many passages of Scripture. —W. L. A.

NOPH. [MEMPHIS.]

NOPHAH (נֹפַח, 'blast'; in the Sept. this word is rendered *προεξέκαυσαν*, 'they kindled,' as if pointed נֹפַח; but the Vulg. rightly makes it a proper name, *Nophe*). In sketching the history of the conquest of Moab by the Amorites, Moses quotes a fragment of a triumphal ode, apparently composed on the occasion by some Amorite poet, the last words of which are, 'Heshbon is perished even into Dibon, and we have wasted them even unto *Nophah*, which reacheth unto Medeba' (Num. xxi. 30). Nophah is not elsewhere mentioned, and the whole passage is obscure, and has been variously interpreted by critics (see a summary of the interpretations in Barrett's *Synopsis of Criticisms*, and Poole's *Synopsis Crit.*) The Hebrew phrase which follows Nophah (אִשֶּׁר עַד־מֵדְבָּא) may signify—(1), 'which *extendeth* to Medeba,' describing the extent of Nophah's territory; (2), or, 'and to Medeba,' showing the extent of the destruction, without reference to Nophah; (3), or, 'which *belongeth* to Medeba,' as if showing that Nophah was a town or place dependent on Medeba; (4), or, 'which is at Medeba.' Still another interpretation is given by the Septuagint, and to some extent sanctioned by the Masoretic mark above the נ in אִשֶּׁר, showing that its authenticity was doubted; and if it be removed the word אִשֶּׁר will signify 'fire,' as rendered in the Greek *πῦρ*; and the translation will be 'fire (hath raged) unto Medeba' (Rosenmüller, *ad loc.*)

Be the right interpretation what it may, it appears that Nophah was a town of Moab, situated between Heshbon and Medeba. The site has not been identified. We have no grounds for assuming its identity with Nobah of Bashan, as suggested by Gesenius (*Thesaurus*, p. 896). —J. L. P.

NOPHECH (נֹפֶךְ), a precious stone, named in Exod. xxviii. 18; xxxix. 11; Ezek. xxvii. 16; xxviii. 13; in all which places it is rendered 'Emerald' in the A. V. The Sept. and Josephus render it by *ἀνθραξ*, or carbuncle. This name, denoting a live coal, the ancients gave to several glowing red stones resembling live coals (*a similitudine ignium appellati*, Plin. *Hist. Nat.* xxxii. 25; comp. Theophrast. *De Lapid.* 18), particularly rubies and garnets. The most valued of the carbuncles seems, however, to have been the Oriental garnet, a transparent red stone, with a violet shade, and strong vitreous lustre. It was engraved upon (Theophrast., 31), and was probably not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of a red colour, but is so hard that it cannot easily be subjected to the graving-tool. The Hebrew *nophech*, in the breast-plate of the high-priest, was certainly an engraved stone; and there is no evidence that the ancients could engrave the ruby, although this has in modern times been accomplished. Upon the whole, the particular kind of stone denoted by the

Hebrew word must be regarded as uncertain (Rosenmüller, *Biblical Mineralogy*, pp. 32, 33; Winer's *Real-wörterbuch*, art. 'Edelsteine'; Brauns, *De Vest. Sacerdot.*, p. 523; Bellermand, *Ueber die Urim, u. Thummim*, p. 43).—J. K.

NORDHEIMER, ISAAC, was born of Jewish parents, in 1809, at Memelsdorf, a village not far from Erlangen. He received the rudiments of his education at a Jewish school of his native place, and having acquired that proficiency in Jewish learning which fitted him to become a rabbi, he, in 1828, entered himself at the Gymnasium of Würzburg, to acquire a knowledge of classical literature, theology, and philosophy, in accordance with the demands made in the present day of a Jewish public teacher. After remaining two years in the gymnasium, he was transferred (1830) to the University of Würzburg, which he left in 1832, and went to complete his studies at the metropolitan university at Munich, where he took his degree as Doctor of Philosophy in the autumn of 1834, and afterwards sustained, *pro forma*, the public examination required of Jewish theologians. Through the persuasion of two American pupils, who took private lessons of him in 1832, Nordheimer left his home in 1835 for America, and arrived in New York in the summer of the same year. He soon received from the university of that city the nominal appointment of professor of Arabic and other Oriental languages, and acting professor of Hebrew, and at once began his career as author. He wrote (1.) *A Critical Grammar of the Hebrew Language*, vol. i., New York 1838; 2d ed., with additions and improvements, *ibid.* 1842; (2.) *A Grammatical Analysis of Select Portions of Scripture or a Christomathy*, 1838; (3.) *The Philosophy of Ecclesiastes, being an Introduction to the Book of Ecclesiastes*, Biblical Repository, July 1838; (4.) *The Hebrew Syntax*, being the second volume of his Hebrew Grammar, 1841; 2d ed., 1842; besides several articles in the Biblical Repository. This laborious student, who made such valuable contributions to the better understanding of the language of the O. T., died Thursday, Nov. 3, 1842, at the age of thirty-three. Dr. Nordheimer also left the following works in MS.: (1.) *A Chaldee and Syriac Grammar*, in German; (2.) *Arabic Grammar*, in German; (3.) *A larger Arabic Grammar*, in English; (4.) *A translation and exposition of the Book of Ecclesiastes*, in German; (5.) *Hebrew Concordance*, incomplete; (6.) *Philological Memoranda*, etc. etc.; (Robinson, *Bibliotheca Sacra*, 1843, p. 379-390).—C. D. G.

NORTH (צָפֹן; Sept. βορρᾶς; Vulg. *Septentrio*, etc.) The Shemite, in speaking of the quarters of the heavens and of the earth, supposes his face turned towards the east, so that the east is before him, the west behind, the south on the right hand, and the north on the left. Hence the words which signify east, west, north, and south, signify also that which is before, behind, on the right hand, and on the left. Thus Aquila renders the words, 'the north and the south' (Ps. lxxxix. 12), βορρᾶν καὶ δεξιάν, 'the north and the right hand.' The Hebrew word translated north occurs in the five following senses: 1. It denotes a quarter of the heavens; 2. of the earth; 3. a north aspect or direction; 4. it is the conventional name for certain countries irrespectively of their true geo-

graphical situation; and, 5. it indicates the north wind. 1. It denotes a particular quarter of the heavens; thus, 'fair weather cometh out of the north' (Job xxxvii. 22); literally, 'gold cometh,' which Gesenius understands figuratively, as meaning the golden splendour (of the firmament), and compares Zech. iv. 12, 'gold-coloured oil.' The Sept. somewhat favours this idea—ἀπὸ βορρᾶ νέφη χρυσαυγούνα, 'the cloud having the lustre of gold,' which perhaps corresponds with the χρυσοπὸς αἰθήρ, the gilded æther or sky, of an old Greek tragedian, quoted by Grotius. The same Hebrew word seems used poetically for the whole heaven in the following passage: 'He stretcheth out the north' (literally the concealed, dark place), (like τὸς ἰόφον, in Homer) over the empty place' (Job xxvi. 7; Sept. ἐπ' οὐδέν). Hence the meaning probably is, that the north wind clears the sky of clouds; which agrees with the fact in Palestine, to which Solomon thus alludes, 'The north wind driveth away rain' (Prov. xxv. 23). Homer styles it αἰὼρη-γενέτης, 'producing clear weather' (*Il.* xv. 171; *Od.* v. 296). Josephus calls it αἰθριώτατος, 'that wind which most produces clear weather' (*Antiq.* xv. 9. 6); and Hesychius, ἐπιδέξιος, or 'auspicious'; and see the remarkable rendering of the Sept. in Prov. xxvii. 16. In the words, 'cold weather cometh out of the north' (Job xxxvii. 9), the word rendered 'north' is צָפֹן, *mezarim*, which Gesenius understands to mean literally 'the scattering,' and to be a poetical term for the north winds, which scatter the clouds and bring severe cold. He, therefore, with Cocceius and Schultens, approves of Kimchi's rendering of the phrase by 'venti flantes et dispergentes.' By some a northern star is here understood: the Vulgate has *arcturus*; the Sept. ἀρκυρήνια (perhaps to be read ἀρκῦρε, or ἀρκυρόπος); while others, as Aben Ezra, and after him Michaelis, regard *Mezarim* in this text as the same with the constellation denoted elsewhere by *mazzaroth* (Job xxxviii. 22), and *mazzaloth* (2 Kings xxiii. 5).

The word צָפֹן occurs also in the same sense in the following passages: 'the wind turneth about to the north' (Eccles. i. 6); 'a whirlwind, out of the north' (Ezek. i. 4). 2. It means a quarter of the earth (Ps. cvii. 3; Is. xliii. 6; Ezek. xx. 47; xxxii. 30; comp. Luke xiii. 29). 3. It occurs in the sense of a northern aspect or direction, etc.; thus, 'looking north' (1 Kings vii. 25; 1 Chron. ix. 24; Num. xxxiv. 7); on 'the north side' (Ps. xlviii. 2; Ezek. viii. 14; xl. 44; comp. Rev. xxi. 13). 4. It seems used as the conventional name for certain countries, irrespectively of their true geographical situation—namely, Babylonia, Chaldaea, Assyria, and Media—which are constantly represented as being to the north of Judaea, though some of them lay rather to the east of Palestine. Thus Assyria is called the north (Zeph. ii. 13), and Babylonia (Jer. i. 14; xli. 6, 10, 20, 24; Ezek. xxvi. 7; Judith xvi. 4). The origin of this use of the word is supposed to be found in the fact that the kings of most of these countries, avoiding the deserts, used to invade Judaea chiefly on the north side, by way of Damascus and Syria. Thus also, the kings of the north that were 'near,' may mean the kings of Syria, and 'those that are afar off,' the Hyrcanians and Bactrians, etc., who are reckoned by Xenophon among the peoples that were subjected or oppressed by the king of Babylon, and perhaps others besides of the neighbour-

ing nations that were compelled to submit to the Babylonish yoke (Jer. xxv. 26). By 'the princes of the north' (Ezek. xxxii. 30), some understand the Tyrians and their allies (ch. xxvi. 16), joined here with the Zidonians, their neighbours. 'The families of the north' (Jer. i. 15) are inferior kings, who were allies or tributaries to the Babylonian empire (comp. xxxiv. 1; i. 41; li. 27). 'The families of the north' (Jer. xxv. 9) may mean a still inferior class of people, or nations dependent on Babylon. 5. The Hebrew word is applied to the north wind. In Prov. xxvii. 16, the impossibility of concealing the qualities of a contentious wife is illustrated by comparing it to an attempt to bind the north wind, צפדרוה. The invocation of Solomon (Cant. iv. 16), 'Awake, O north, and come, thou south, blow upon my garden that the spices may flow out,' and which has occasioned much perplexity to illustrators, seems well explained by Rosenmüller, as simply alluding to the effects of winds from opposite quarters, in dispersing the fragrance of aromatic shrubs (ver. 13, 14) far and wide, in all directions. A fine description of the effects of the north wind, in winter, occurs in Ecclus. xliii. 20; which truly agrees with the 'horrifer Boreas' of Ovid (*Met.* i. 65), and in which reference is made to the coincident effects of the north wind and of fire (v. 21; comp. v. 3, 4), like the 'Boreæ penetrabile frigus adurit' of Virgil (*Georg.* i. 93); or Milton's description,

— 'The parching air

Burns fierce, and cold performs the effects of fire.'

*Paradise Lost*, ii. 595.

Josephus states that the north wind in the neighbourhood of Joppa was called by those who sailed there Μελαμβόρεος, 'the black north wind,' and certainly his description of its effects, on one occasion, off that coast, is appalling (*De Bell. Jud.* iii. 9. 3).—J. F. D.

NORZI, JEDIDJA SALOMON DI, B. ABRAHAM, was born in Mantua about 1560, and derived his family name (ר' נורצי) from the fact that his parents resided in Norzi or Norica, a small town in the district of Spoleto. He studied under Samuel Cases, and, through his great piety and profound learning, was elected to the co-rabbinate, first with Luliano Shalom Cases, who died in 1630, then with Eliezer Cases, and, from 1634 up to the time of his death, was co-rabbi with Jacob Chajim Cases. As early as 1588 Norzi was favourably known among his literary co-religionists through a work on the jurisprudence of the Hebrews (שאלות ותשובות), which was published in Mantua 1597. The work, however, to which he devoted the whole of his life, and through which he immortalized his name, is the critical and Massoretic commentary on the entire Hebrew scriptures. To render his critical labours as complete as possible, and to edit the Hebrew text in as perfect a condition as solid learning and conscientious industry could make it, Norzi left no resources untouched. He searched through the Midrashim, the Talmud, and the whole cycle of rabbinic literature, for various readings. He consulted all the Massoretic works, both published and unpublished; he collated all the MSS. to which he could get access, amongst which was the MS. from Toledo of the year 1277, now Cod. de Rossi 782; he compared all the best printed editions, and

availed himself of the learning and critical labours of his predecessors and friends, especially of the

MS. work called מסרת סיג לתורה, *the Massora, the Hedge of the Law*, by Meier b. Todros Abulfia of Borgos,\* and of the co-operation of his friend Menacham di Lonzano of Palestine,† who also furnished Norzi with important MSS. from his own library; and though he lived to finish the work to which he consecrated his life, having completed it in 1626, and called it גדר פרץ, *The Repairer of the Breach*, after Is. lviii. 12, he did not live to see the fruit of his labours printed, as he died about 1630. His work remained in MS. for about 112 years. The commentary was then edited by Raphael Chajim Basila, and published for the first time, with Hebrew text, under the altered title מנחת ש"י, *a Gift Offering, The Oblation of Solomon Jedidja* (the name of Norzi, ש"י, being an

abbreviation of ישלמה ירדיה), Mantua, 1742-44 in four parts and 2 vols. 4to. Basila, the learned editor, added some notes, and also appended a list of 900 variations. A second edition appeared in Vienna, 1816. The commentary on the Pentateuch alone, with the Hebrew text, appeared in Dobrovna 1804; on the Prophets and the Hagiographa, with the Hebrew text, Vilna circa 1820. Norzi also wrote a treatise on the accents, entitled מאמר המאריך, which he quotes in his commentary on Gen. i. 11; Num. xi. 15; i Sam. xv. 6; Esth. i. 6; ii. 8; Is. xxxviii. 2; Eccles. ii. 7; and a treatise on the letters

בגד כפת, called כללי בגד כפת, which he quotes in the Comment. on Gen. i. 11, but which have not as yet come to light. Comp. Steinschneider, *Catalogus Lib. Hebr. in Bibliotheca Bodleyana*, col. 2376-77; Fürst, *Bibliotheca Judaica*, vol. iii. p. 39, 40.—C. D. G.

#### NOSE-JEWEL. [WOMAN.]

NOVICE, or NEOPHYTE (*Νεόφυτος*), one newly converted (literally *newly planted*), not yet matured in Christian experience (1 Tim. iii. 6). The ancient Greek interpreters explain it by 'new-baptised,'

\* Meier b. Todros Abulfia, who is called *Todrosus* by some Christian writers, died March

29, 1244. His work, מסרת סיג לתורה, which is a valuable Massoretic lexicon, arranged in alphabetical order, according to the roots, was first published in Florence 1750; then again, Berlin 1761.

† Menachem de Lonzano is the author of the collection of treatises entitled שתי ידות, *The Two Hands* (first published, Venice 1618), comprising, among others, an essay on the Massora, the criticism of the text of the Pentateuch, the fixing of correct readings, etc., called אור תורה, *The Light of the Law*, and a supplement to Nathan's Lexicon, entitled מעריך [NATHAN B. JECHIEL]. He was originally of Palestine, emigrated to Italy when advanced in years, and was senior contemporary of Norzi, to whom he rendered personal assistance in his Biblical researches (comp. Jost, *Geschichte des Judenthums*, iii. p. 224). Dr. Davidson's remark, therefore, about the age of Lonzano and his connection with Norzi, as well as his statement about the date of the publication of Todrosius', i.e., Meier b. Todros Abulfia's work, *The Massora, the Hedge of the Law (A Treatise on Biblical Criticism*, Edinburgh 1854, p. 151, 152), are not correct.

νεοβάπτιστος, 'proselyte,' *προσήλυτος*, etc. The word continued to be in use in the early church; but it gradually acquired a meaning somewhat different from that which it bore under the Apostles, when 'newly converted' and 'newly baptised' described, in fact, the same condition, the converted being at once baptised. For when, in subsequent years, the church felt it prudent to put converts under a course of instruction before admitting them to baptism and the full privileges of Christian brotherhood, the term *Νεόφυτοι*, *Novitii*, Novices, was sometimes applied to them, although more usually distinguished by the general term of Catechumens.—J. K.

NUMBER. How far the ancient Hebrews were acquainted with arithmetic or the science of number, we possess no authentic information. Neither do we know, with certainty, what sort of numerical characters they used, or if any, in the earlier period of their history. We may, however, form a probable conjecture. 'The Hebrews,' says Gesenius, 'have no numerical cyphers like ours, but employ consonants to designate numbers. This usage, however, belongs not to the O. T. itself. We can trace it no farther back than the coins in the time of the Maccabees (about 150 B. C.) But, at a later period, all chapters and verses of the O. T. came to be marked or numbered in this way; in like manner as enumeration was designated by the Greeks [who borrowed it from the Phœnicians]. (a) The alphabet from *א* to *ז*, designates the units 1-9. (b) From *ח* to *ט*, tens; from *י* to *ק*, some of the hundreds, viz., 100-400. The hundreds 500-900, some designate by the final letters *ק*, *מ*, *נ*, *ס*, *ע*; others by adding to *ק* (= 400) the other letters that designate the additional numbers which are needed, *ex. gr.* *קפ*, *i. e.* 400 + 100 = 500. In composite numbers, the larger stand first, *ex. gr.* *ס"א* = 11, *ס"ב* = 12, etc. The number 15 is *ט"ו* = 9 + 6, because the regular designation would be *טז*, which, being one of the names of God [rather being the unutterable name *יהוה*], the Jews could not employ. Thousands are designated by the unit letters, with two points above them, *ex. gr.* *ש"ס*, 1000, etc.—(Rödiger's *Ger. Heb. Gram.*, by Stuart, 20).

It is probable, however, that this mode of expressing numbers was once employed in the Hebrew Bible, although not found there now; and it may have been employed long before the Maccabean era (see Kalisch *Heb. Gram.*, vii., sec. 1, 7 a; Winer, *Zahlen*), although we are unable to trace it farther back; and may have been ultimately abandoned, as numbers so designated were so very liable to be corrupted by a thousand accidents. Certainly, this mode of expressing numbers, if we suppose it was at one time employed (especially if we keep in mind the frequent transcription of the sacred books) will serve, in a good measure, to account for the striking numerical discrepancies now found in all MSS. of the Hebrew Bible. Let our readers refer to the article CHRONICLES for illustration of this point. A few other instances, however, may be adduced: the Hebrew text in 1 Sam. 6, 19, has 50,070. The Syriac and Arabic have 5070, which also seems much too large a number. Three MSS. of Kennicott, and two others, have 70, which seems the correct reading. It has been supposed that at first *ל* = 70 stood in the text, and that some copyist found in another copy *ל* = 50,000,

and either wrote it in the margin or took it into the text of his MSS. The letters *ל* and *נ* might be the more easily confounded on account of the two points over *נ* like the two upper hands of *ל* (Davidson's *Bib. Crit.*, 2d ed., 404, etc.) In 2 Sam. xv. 7, for 40 years the Syriac, Arabic, and Vulgate—sixtine edition—have 4. It is true two MSS. of Kennicott have 40 days (*ibid.*, p. 429). The similarity of several Hebrew letters to each other, as *א* to *ב*, *ב* to *ג*, *ג* to *ד*, *ד* to *ה*, *ה* to *ו*, would very easily lead to their being confounded, and sometimes occasion not only discrepancy, but even such enormous exaggeration of numbers as often appears, especially in the books of Chronicles.

We must now refer to a peculiar use of certain numbers occurring throughout the Bible.

This usage is not peculiar to the Scriptures. It, or something similar, is found in profane writers, in philosophical systems, as *ex. gr.*, that of Pythagoras, with whom unity possessed so much importance (Lewes' *Biog. Hist. of Phil.*, 2d ed., p. 24); and in the Kabbalistic speculations of the later Jews. (See KABBALAH.) We refer to the frequent recurrence of the numbers, 3, 4, 7, 10, 40, 70, 100, 1000; to which may be added 12 with its square = 144. Only a selection of examples can be adduced.

(a). *Three* occurs very frequently. Thus, three men appeared to Abraham (Gen. xviii. 2); Moses was hid three months (Exod. ii. 2); the Jews were bound to appear before God three times in the year (Exod. xxiii. 14); the priestly blessing was threefold (Num. vi. 23, 24); the doxology of the Seraphim was threefold (Is. vi. 3); Daniel prays three times a day (Dan. vi. 10); the vision was repeated to Peter three times (Acts x. 16); God is described in a threefold form as the source of blessing (Rev. i. 4); and there are three witnesses to the truth (1 John v. 7). (For the abundant use of *three* in the Apocalypse, see Stuart's *Com.*, p. 102, Eng. ed.)

(b). As to the use of *four*, we have the four rivers of Paradise (Gen. ii. 10); four sore judgments on Jerusalem (Ezek. xiv. 21); four living creatures (Ezek. i. 5; also Rev. iv. 6); the four winds (Ezek. xxxvii. 9; Dan. vii. 2); the four beasts (Dan. vii. 17); four notable horns (Dan. viii. 8); again, four horns and four workmen (Zech. i. 18-21); four chariots (Zech. vi. 1, etc.); four angels and four corners of the earth (Rev. vii. 1).

(c). *Seven* is a favourite number with the writers of the O. and N. T. At the outset, we have the six days of creation completed by a seventh (Gen. ii.); Noah took clean beasts into the ark by sevens (Gen. vii. 2, 3); Noah waited seven days between each sending forth of the raven and the dove (Gen. viii. 8-12); seven Sabbaths were to intervene between the offering of the first-fruits and the day of Pentecost (Lev. xxiii. 15, etc.); the day of atonement was on the seventh day of the tenth month (Lev. xxiii. 27); the passover and feast of tabernacles lasted each seven days (Num. xxviii. 24, 25; Lev. xxiii. 41); the blood of propitiation was to be sprinkled seven times (Lev. xvi. 14, 15); and the golden candlestick had seven lamps (Exod. xxv. 37). In the N. T. we have seven spirits before the throne (Rev. i. 4); seven candlesticks, seven stars, seven angels, and seven churches (Rev. i. 16, 20); seven lamps of fire

(Rev. iv. 5); seven eyes and seven horns of the Lamb (Rev. v. 6); seven seals (Rev. v. 1); seven angels with seven trumpets (Rev. viii. 2); seven vials (Rev. xv. 7), etc.

(d). *Ten* occurs frequently, but not so frequently as the preceding, nor in the same marked way, viz., ten plagues of Egypt; ten commandments; ten mighty men (Eccles. vii. 19); ten virgins (Matt. xxv. 1); ten pieces of silver (Luke xv. 8); ten pounds (Luke xix. 13); ten horns of the dragon (Rev. xii. 3). In the O. T., the tenth of the produce of the land was assigned to the Levites, and the tenth of that to the priests.

(e). *Forty* appears pretty often. Moses was forty days and nights in the mount (Exod. xxiv. 18); Israel wandered forty years in the desert (Num. xiv. 33); Elijah went forty days and nights to Horeb (1 Kings xix. 8); Jesus fasted forty days in the wilderness (Matt. iv. 1).

(f). *Seventy* occurs in some very marked instances. Seventy souls out of the loins of Jacob (Exod. i. 5); seventy elders of Israel (Exod. xxiv. 1); Abimelech's seventy brethren (Judg. ix. 56); Ahab's seventy sons (2 Kings x. 1); Tyre forgotten seventy years (Is. xxiii. 15); seventy years' captivity in Babylon (Jer. xxv. 11); Daniel's seventy weeks (Dan. ix. 24); seventy disciples (Luke x. 1); seventy times seven (Gen. iv. 24; Matt. xviii. 22).

(g). Instances of *one hundred* are as follow:—one hundred cubits, the length of the court of the tabernacle (Exod. xxvii. 18); one hundred stripes (Prov. xvii. 10); one hundred years old (Is. lxv. 20); one hundred sheep (Matt. xviii. 20); one hundred measures (Luke xvi. 6, 7).

(h). *One thousand* occurs often. One thousand pieces of silver (Gen. xx. 16); of every tribe, one thousand (Num. xxxi. 4, 5); one thousand times (Deut. i. 11); one thousand generations (Deut. vii. 9); one of a thousand (Job ix. 3; xxxiii. 23); one thousand hills (Ps. l. 10); one thousand years (Eccles. vi. 6; 2 Pet. iii. 8; Rev. xx. 2, etc.); etc.

(i). *Twelve* is found in many instances. Twelve princes of Ishmael (Gen. xvii. 20; xxv. 16); twelve sons of Jacob (Gen. xxxv. 22); twelve tribes (Gen. xlix. 28); twelve wells of water at Elim (Exod. xv. 27); twelve pillars (Exod. xxiv. 4); twelve precious stones (Exod. xxviii. 21; xxxix. 14); twelve apostles (Luke vi. 13); twelve thousand sealed of each tribe of Israel (Rev. vii. 5); a crown of twelve stars (Rev. xii. 1); the heavenly city had twelve gates, twelve angelic porters, and twelve foundations (Rev. xxi. 12, 14, 21); the Tree of Life bare twelve manner of fruit (Rev. xxii. 2); We may add that 144,000 comes into notice (Rev. vii. 4; xiv. 1) only as the sum of the 12 times 12,000, the number of the sealed of each of the tribes of Israel, and therefore, as the signature of the perfected church of God, the length of whose wall was 144 cubits, the square of twelve, the signature of the church under the old dispensation and the new.

A few other numbers are also used pretty frequently, but with no very marked prominence; *ex. gr.*, five and six, usually as numbers of convenience, although the latter occurs sometimes in connection with *seven*, with the idea of multiplicity, yet non-completeness; the full or complete idea being conveyed by *seven*; *ex. gr.*, 'six troubles, yea seven' (Job v. 19); 'six things the Lord hates, yea seven' (Prov. vi. 16), etc. *Two* is also

used to denote *competency*, or *sufficiency*; *e. g.*, two or three witnesses, Deut. xvii. 6; John v. 30; two olive trees and two golden pipes (Zech. iv. 3, 11); and the two witnesses of the Apocalypse (xi. 3).

Of the various numbers quoted above, there can be little question that some must be regarded as representative or round numbers, being used where it is desired to put a definite number for an indefinite, or to express a large number; *ex. gr.*, 10, 40, 70, 100, 1000. In later times the Jews have attached great importance to ten. Examples of this are given by Otho; *ex. gr.*, 'A synagogue is not constituted except there be ten persons at least present'; 'where ten sit and read the law, the Divinity rests among them.' 'The denary number,' says Fagius, 'is certainly almost sacred to the Hebrews; hence they circumcise no child, confirm no marriages, give no writing of divorcement, nor do they offer some of the more solemn kinds of prayers, unless ten persons are present' (Othonis *Lex. Rab. Phil.*, Art. *Numerus*). Why the Jews came so to regard this number it is hard to say, but certainly they did not derive the custom from the O. T. The frequent use of the number naturally took its rise from the fingers of the human hands,  $5 + 5 = 10$ .

But, having set off some of the above numbers in the way indicated, there remain others which cannot be thus disposed of. As to four, it is so obviously the signature of the world, with its four cardinal points, that the meaning of the number is apparent everywhere it occurs. The significance of three and seven is not so obvious, while their origin is much more obscure. Both these numbers have a very extended use among profane as well as sacred writers (see Stuart's *Com. on the Apocalypse*, Excursus ii.) Bähr supposes that three has obtained this wide-spread use, because, possessing a beginning, and middle, and end, and being non-divisible, it is the first number which expresses perfect composite unity; and was therefore adopted as a symbol of the Godhead. Stuart regards it as a symbol of the all-perfect and infinite One, 'who is, and was, and is to come,' but derives it from 'some leading and striking features of the universe'—its threefoldness in a variety of aspects, which therefore naturally became a symbol of the Divine Being. It is difficult to decide this point; but it is to be remembered, that if three be the symbol of Deity, it is also the symbol of the very opposite. Thus, we have the three great enemies of God—the Dragon, the Beast, and the False Prophet; and the three unclean spirits, like frogs, proceeding out of their mouth (Rev. xvi. 13). But here, no doubt, the design is, to exhibit these in opposition to the sacred Trinity—the Father, the Son, and the Holy Ghost.

*Seven*, as the number of perfection, is regarded by Stuart, Hengstenberg, and others, as a combination of four and three, the signatures of the universe and of God, and therefore signifying the union of God and his creatures. It is thus all-comprehensive and complete. To this we demur, as we do to the derivation of twelve, the signature of the church, from  $3 \times 4 = 12$ , and of 10 from 7 and 3, which last involves an absurdity. More naturally does seven spring from the six creative days completed by the day of rest. Hence, too, the universal use of the number. We may add here, that three and a half, being half the perfect number

seven, is the signature of *incompleteness* and *imperfection*, and therefore possesses striking significance as used to denote the duration of the persecutions of the church, both in Daniel and the Apocalypse.

We must finally notice 'the number of the Beast,' = 666 (Rev. xiii. 17, 18).<sup>\*</sup> The Beast is the world-power in its hostility to the kingdom of God. The number of the name is plainly the number made up by the numerical power of the letters composing the name added together. But here the proposed interpretations are multitudinous. That suggested by Irenæus (*C. H.*, l. v., c. 29, 30), followed by many protestant interpreters—among the rest, but very sceptically, by Alford—is one of the (but not *the*) oldest, viz., *λατρεω*=Latin, *i.e.*, beast, or kingdom—λ 30, α 1, ρ 300, ε 5, ι 10, ν 50, ο 70, ς 200=666. Some have suggested *ἀποστράτης*, with reference to Julian; Bossuet, *Diocles Augustus*; Hengstenberg, *Adonikam*, because it is said (Ezra ii. 13), the sons of Adonikam were 666 (see *Com.* in loco); Benary קסך, or, dropping the final nun in Nero, to suit the *Var. Lec.*, giving therefore either 666 or 616. This interpretation is favoured by Stuart. Bengel refers the 666 to the number of years the Beast was to exercise his dominion; but that surely is not the number of his name (see Stuart's *Com.* on the *Apoc.*, Ex. iv.; and for the full literature of the subject, Rabett's *Λατρεω*, and Thom's *Number of the Beast*). The enigma seems as yet unsolved. On the subject of number generally, see Stuart's *Com.* on the *Apoc.*, Introd., sec. 7 and Excursus ii.; Winer, *R. W. B.*, *Zahlen*.—I. J.

NUMBERS is the appellation given to the fourth book of Moses, which in the Septuagint is called *Ἀριθμοί*, and in the Hebrew canon במדבר *be-midbar*, 'in the desert.'

CONTENTS.—This book embraces more especially the continuation of the Sinaitic legislation, the march through the wilderness, the rejection of a whole generation, and the commencement of the conquest of Canaan. Thus we see that it treats on very different subjects, and on this account it has frequently been attempted to resolve it into separate fragments and documents, and to represent it as being composed of the most heterogeneous materials. We will endeavour to refute this opinion, by furnishing an accurate survey of its contents, and by describing the internal connection of its component parts, so that the organisation of the book may be clearly understood.

The sum and substance of the law having been stated in the preceding books, that of Numbers commences with the arrangements requisite for preserving good order in the camp of the Israelites. The people are numbered for the express purpose of separating the Levites from those Israelites who had to bear arms, and of thus introducing into practice the law concerning the first-born, for whom the tribe of Levi became a substitute. For this reason the people are not merely numbered, but also classed according to their descent; the order which each tribe should occupy in the camp is defined; and the Levites are introduced into their respective functions (ch. i.-iv.)

The camp, having been consecrated, was to be kept pure according to the law of Levitical cleans-

ings; consequently all persons were excluded from it who were afflicted with leprosy, who had become unclean by a flux, and who had touched a corpse (ch. v. 1-4).

Thus, after civil and sacerdotal life had been brought into a definite form, other laws based upon this form came into force, especially those laws which regulated the authority of the priests in civil affairs (ch. v. 5; vi. 27). These regulations conclude with the beautiful form of benediction which indicates the blessing to be expected from the true observance of the preceding directions. The people are impressed with this fact; the hearts of the Israelites are willing to offer the required gifts, and to entrust them to the Levites.

Jehovah is faithful to his promise, and gloriously reveals himself to his people (ch. vii.) Before the Levites enter upon the discharge of their sacred functions, the law concerning the lamps to be lighted in the sanctuary is significantly repeated (ch. viii.) These lamps symbolize the communication of the Holy Spirit, and bring to the recollection of the nation the blessings of theocracy to be derived from setting apart the tribe of Levi, which had recently been separated from the rest of the people.

Then follows a description of the celebration of the Passover, preparatory to the departure of the people from Mount Sinai (ch. ix. 1-14). Some regulations are connected with the celebration of the Passover, and the whole miraculous guidance of the people is described (ch. ix. 15-x.)

Thus the entrance of Israel into the Holy Land seemed to be fully prepared; and it was of great importance to show how they were prevented from entering it. Accurate details are therefore given of the spirit which pervaded the nation; a spirit which, in spite of the forbearance of God, manifested itself in daring rebellions against the divine authority (ch. xi. and xii.)

Now comes the turning-point of the history. Everything seems externally prepared for the conquest of the country, when it appears that the nation are not yet internally ripe for the performance of so important an act (ch. xiii., xiv.)

In immediate connection with this are some laws which were given in the desert; the intention of which was to recal to the recollection of the rejected race, which had been justly condemned to suffer severe punishment, that nevertheless they had not ceased to be the people of the covenant, and the depository of divine revelation (comp. ch. xv. 2, 13-16, 22, 23, 37, *seq.*) In this respect the facts mentioned in ch. xv. 32-36, and ch. xvi., are also of great importance. They show, on the one hand, the continuance of an evil disposition in the people, and, on the other, the majesty of God watching over his holy law.

The contents of ch. xv.-xix. are of a similar character. The facts there recorded relate to a period of thirty-eight years. The conciseness with which they are stated significantly indicates the strictly legal and theocratical principles of the Mosaic legislation. The period of Israel's rejection is characterised by the circumstance, that the historian is almost silent respecting it, as being a period not strictly belonging to theocratical history. During this period the striking deeds of God, his miracles and signs, the more prominent operations of his grace, and his peculiar blessings, cease. The rejection of the nation consisted in this suspension

<sup>\*</sup> The *Var. Lec.*, which gives 616, is commonly, and on sufficient grounds, rejected.

of the divine operations. During this period God, as it were, ignored his people. Consequently, the historian also almost ignores the rebellious race. But the period in which the divine promises were to be fulfilled again forms a prominent portion of the history. The termination of the penal period is the commencement of the most important era in the Mosaic history. It brings the legislation to a splendid conclusion. The most glorious facts here follow each other in close succession; facts which were intended clearly to demonstrate that the chosen people entered into the land of promise, not by their own power and might, but that this land was given into their hands by the God of promise.

Miriam was already dead; and the forty years of wandering in the wilderness were accomplished. Israel was again in sight of the Holy Land on the borders of Edom. Then Moses and Aaron also sinned; soon after, Aaron died, and was succeeded by Eleazar. Israel sent ambassadors to the king of Edom to obtain permission to pass through his territory, but was haughtily refused (ch. xx.) Everything seemed to be prepared by preceding events already recorded. The dying off of the real emigrants from Egypt might be expected, after the divine decree that this should come to pass had been mentioned; the unbelief of Moses arose from the protracted duration of the time of punishment, which at length broke his courage; the spirit of Edom arose in overbearing animosity, because it seemed that Jehovah had forsaken his people. It was appointed that Israel should undergo all this in order that they might grow strong in the Lord. Their strength was soon proved against Arad. They vowed to devote all the cities of the Canaanites to Jehovah, who gave them the victory. They were directed to avoid the boundaries of Edom, and to have Canaan alone in view. The people murmured, and the significant symbol of the serpent was erected before them, reminding them of their ancient sin, and how it had been healed and overcome by Jehovah. In all this Israel is constantly directed to Canaan. They march courageously to the boundaries of the Amorites, singing praises to Jehovah, and, by the power of the Lord, defeat the kings of Heshbon and Bashan (ch. xxi.)

In the plains of Moab still greater glory awaits the chosen people. The pagan prophet of Mesopotamia, being hired by the king of the Moabites, is overpowered by Jehovah, so that he is compelled to bless Israel instead of cursing them; and also directs them to the ancient blessings granted to the patriarchs. The bitterest enemies of the theocracy are here most deeply humbled, being themselves compelled to contribute to the glory of Jehovah (ch. xxii.-xxiv.) Not the God, but the people of Israel, were dishonoured through the devices of Balaam.

The subsequent account concerning the idolatry into which the people were led, forms a striking contrast with the preceding chapters, and evinces the impotence of the Israelites, whose first attack, therefore, was to be directed against their seducers. This was to be the beginning of the conquest of Canaan, which was essentially a combat against idolatry, and the victory of the kingdom of God over paganism. The conquered country was granted to separate tribes, and for this purpose the people were once more numbered, and Joshua appointed their leader.

Jehovah reserves his own rights in the distribution of the country, and Israel is directed not to forget the sacrifices to the Lord, the sabbaths, festivals, and vows; the ordinances concerning which are here briefly repeated, inculcated, and completed.

The people shall certainly gain the victory, but only in strict communion with Jehovah. Thus begins the combat against Midian, according to the directions of the law, and forming as it were a prototype of the later combats of Israel against pagan powers (ch. xxv.-xxxi.)

This was the last external work of Moses. Henceforth his eye is directed only to the internal affairs of his people. An entrance has been effected into the country, and the conquered territory is divided among two tribes and a half-tribe (ch. xxxii.)

Moses reminds the people of Jehovah's guidance in the wilderness, and of the manner in which the whole land was to be conquered. He commands the destruction of the Canaanites and of their idolatry. He appoints to what extent the land is to be conquered, and in what manner it should be divided; also the towns to be granted to the Levites, and the cities of refuge. He establishes also the statute, which was of great importance for the preservation of landed property, that an heiress should marry only within her own tribe (ch. xxxiii.-xxxvi.)

There have frequently been raised strong doubts against the historical credibility of the book of Numbers, although it is impressed with indubitable marks of the age to which it refers, and of perfect authenticity. The numerical statements in ch. i.-iv. are such that they repel every suspicion of forgery. There could apparently be no motive for any fabrication of this description. The numbering of the people is in perfect harmony with Exod. xxxviii. 26. The amount is here stated in round numbers, because a general survey only was required. When requisite, the more exact numbers are also added (ch. iii. 39, 43). A later *falsarius*, or forger, would certainly have affected to possess the most exact knowledge of those circumstances, and consequently would have given, not round, but particularly definite numbers.

The account of the setting apart of the tribe of Levi has been especially urged as bearing the marks of fiction; but this account is strongly confirmed by the distribution of the cities of the Levites (Num. xxxv. ; Josh. xxi.) This distribution is an undeniable fact, and the existence of these Levitical towns may be appealed to as a document proving that the Levites were really set apart. Our opponents have vainly endeavoured to find contradictions, for instance, in the system of tithing (Num. xviii.), which, they say, is not mentioned in Deuteronomy, where the tithes are applied to different purposes (Deut. xii. 6, 7, 17-19 ; xiv. 22, *seq.* ; xxvi. 12-15). But there were two sorts of tithes; one appointed for the maintenance of the Levites, and the other to defray the expenses of public banquets, of which the Levites also partook on account of their position in society (comp. Neh. xiii. 10 ; Tobit i. 7).

It has also been asserted that the book of Numbers contradicts itself in ch. iv. 2, 3, and ch. viii. 24, with respect to the proper age of Levites for doing duty. But the first of these passages speaks about carrying the tabernacle, and the second about performing sacred functions in the

tabernacle. To carry the tabernacle was heavier work, and required an age of thirty years. The functions within the tabernacle were comparatively easy, for which an age of twenty-five years was deemed sufficient.

The opinions of those writers who deem that the book of Numbers had a mythical character, are in contradiction with passages like x. 26, *seq.*, where Chobab is requested by Moses to aid the march through the wilderness. Such passages were written by a conscientious reporter, whose object was to state facts, who did not confine himself merely to the relation of miracles, and who does not conceal the natural occurrences which preceded the marvellous events in ch. xi. *seq.* How are our opponents able to reconcile these facts? Here again they require the aid of a new hypothesis, and speak of fragments loosely connected.

The author of the book of Numbers proves himself to be intimately acquainted with Egypt. The productions mentioned in ch. xi. 5 are, according to the most accurate investigations, really those which in that country chiefly served for food.

In ch. xiii., xxii., we find a notice concerning Zoan (Tanis), which indicates an exact knowledge of Egyptian history, as well in the author as in his readers. In ch. xvii. 2, where the writing of a name on a stick is mentioned, we find an allusion characteristic of Egyptian customs (compare Wilkinson, *Manners and Customs of the Ancient Egyptians*, i. p. 388).

The history of the rebellion of the sons of Korah (xvi. 17) has certainly some colouring of the marvellous, but it nevertheless bears the stamp of truth. It is absurd to suppose that a poet who wrote ch. xvii. 6, *seq.*, in order to magnify the priestly dignity, should have represented the Levites themselves as the chief authors of these criminal proceedings. This circumstance is the more important, because the descendants of Korah (Num. xxvi. 11) became afterwards one of the most distinguished Levitical families. In this position we find them as early as the times of David; so that it is inconceivable how anybody should have entertained the idea of inventing a crime to be charged upon one of the ancestors of this illustrious family.

Many vestiges of antiquity are found in ch. xxi. The whole chapter, indeed, bears a characteristically antique impress, which manifests itself in all those ancient poems which are here communicated only in fragments, so far as was required for the illustration of the narrative. Even such critical sceptics as De Wette consider these poems to be relics of the Mosaic period. But they are so closely connected with history, as to be unintelligible without a knowledge of the facts to which they refer.

Narratives like the history of Balaam (xxii., xxiv.) furnish also numerous proofs of their high antiquity. These confirmations are of the greatest importance, on account of the many marvellous and enigmatical points of the narrative. Compare, for instance, the geographical statements, which are uncommonly accurate, in ch. xxii. 1, 36, 39; xxiii. 14, 15, 27, 28. See Hengstenberg's *Geschichte Bileams*, Berlin 1842, p. 221, *seq.*

The nations particularly mentioned in Balaam's prophecy—the Amalekites, Edomites, Moabites, and Kenites—belong to the Mosaic period. In ch. xxiv. 7, it is stated that the king of Israel would be greater than Agag; and it can be proved that

Agag was a standing title of the Amalekite princes, and that, consequently, there is no necessity to refer this declaration to that king Agag whom Saul vanquished. The Kenites, at a later period, disappeared entirely from history. A prophet from Mesopotamia was likely to make particular mention of Assur (ch. xxiv. 22). There is also a remarkable prediction, that persons sailing from the coast of Chittim should subdue Assur and Eber (ch. xxiv. 23). The inhabitants of the west should vanquish the dwellers in the east. The writers who consider the predictions of Balaam to be *vaticinia post eventum*, bring us down to so late a period as the Grecian age, in which the whole passage could have been inserted only under the supposition of most arbitrary dealings with history. The truth of the Biblical narrative here asserts its power. There occur similar accounts, in which it is strikingly evident that they proceeded from the hands of an author contemporary with the events; for instance, ch. xxxii., in which the distribution of the trans-Jordanic territory is recorded. Even the account, which has so frequently been attacked, concerning the Havoth-jair, the small towns, or rather tent villages of Jair (xxxii. 41, 42; compare Judg. x. 4, and Deut. iii. 14),—even this account, we say, is fully justified by a closer examination.

The list of stations in ch. xxxiii. is an important document, which could not have originated in a poetical imagination. This list contains a survey of the whole route of the Israelites, and mentions individual places only in case the Israelites abode there for a considerable period. It is not the production of a diligent compiler, but rather the original work of an author well versed in the circumstances of that period. A later author would certainly have avoided the appearance of some contradictions, such as that in Num. xxxiii. 30, 31, comp. with Deut. x. 6. This contradiction may best be removed, by observing that the book of Numbers speaks of the expedition of the Israelites in the second year of their wanderings, and the book of Deuteronomy, of their expedition in the fortieth year. The list of stations contains also important historical notices; those, for instance, in ch. xxxiii. 4, 9, 14, 38. These notices demonstrate the accurate historical information of the author.

We still dwell for a moment on the consideration of the great fact, which is the basis of the narrative of the whole book—namely, the sojourn of the Israelites during forty years in the wilderness. The manner in which the narrator states this fact, we have mentioned above. A view so strictly theocratical, and a description so purely objective, are most befitting the lawgiver himself. Modern criticism has chiefly taken offence at the statement that Jehovah had announced all this as a punishment to be inflicted upon the people. This, they say, is incomprehensible. However, the fact stands firm, that the Israelites really abode forty years in the wilderness. This fact is proved in the Scriptures by many other testimonies. Hence arises the question, how this protracted abode was occasioned, and what induced Moses to postpone or give up the conquest of Canaan. De Wette says that such resignation, in giving up a plan to which one has devoted the full half of a life, is not human. Göthe asserted, that by such a representation the picture of Moses is entirely disfigured. All this renders the problem of our opponents the more difficult. De Wette says, 'Who knows what happened in

that long period?' This question would amount to a confession of our entire ignorance concerning what was most important, and what is the real turning-point of the history of Israel, and would make an enormous and most striking gap in universal history. It is incredible that no tradition should have been preserved, in which was told to posterity what was here most important, even if it should only have been in a very disfigured form. It is incredible that what was most important should have been passed by, and that there should have been communicated only what was comparatively insignificant. If this were the case, the traditions of Israel would form a perfectly isolated phenomenon. Thus the history of Israel itself would be something incomprehensible. Either the history is inconceivable, or the astounding fact is, indeed, a truth. And so it is. The resignation of Moses, and the sojourn of the people in the wilderness, can be explained only by assuming an extraordinary divine intervention. A merely natural interpretation is here completely futile. The problem can only be solved by assuming that the whole proceeded from the command of God, which is unconditionally obeyed by his servant, and to which even the rebellious people must bow, because they have amply experienced that without God they can do nothing.

For the works relative to Numbers, see the article PENTATEUCH.—H. A. C. H.

NUN (נֹן; in Syr. and Arab., *a fish*), the father of Joshua, who is hence constantly called Joshua ben-Nun, 'Joshua, the son of Nun.' Nothing is known of the person who bore this name. The Sept. constantly uses the form *Navi*, which appears to have arisen from an error of an earlier copyist (NATH for NATN). From the forms *Naβh* and *Naβi*, found in some MSS., it would seem that later transcribers supposed this *Navi* to be the pronunciation of the Hebrew נָבִי. It is from this error of the Sept. that some of our old versions have 'Joshua the son of Naue.'—J. K.

NURSE (מִינִיקָה, part. in Hiph. of נָקָה, *to suckle*; Sept. and N. T. τροφός; Aq. τιθηνός, Gen. xxiv. 59: אֵמֶת; Sept. τιθηνός). The custom was for Hebrew women to suckle their own children; but sometimes, as when the mother had died, or was feeble in health, or was careful to preserve her personal charms, this duty was devolved upon a servant (1 Kings xi. 2; 2 Maccab. i. 20, τιθηνός). From being nurse she sometimes became the curatrix of those she had nursed, especially when they were infirm (2 Sam. iv. 4), and in some cases seems to have become permanently attached to their person (Gen. xxiv. 58). That nurses were also employed in Egyptian families may be inferred from Exod. ii. 7. As among other nations (comp. the case of Eurycleia in the family of Odysseus, Hom. *Od.* ii. 361, etc.; Caieta the nurse of Æneas, Virg. *Æn.* vii. 1-5; the nurse in the family of Medea, Eurip. *Med.* 48, etc.; the nurse of Phædra, Eurip. *Hippol.* 17, ff., etc.), the position of nurse in the Hebrew households was one of honour and esteem (Gen. xxv. 8). The title 'nurse' is also given to a foster-mother (Ruth iv. 16; Is. xlix. 23; A. V. 'nursing mothers'). The masc. 'nursing father' (אֵמֶת, τιθηνός) is also used of those who undertook the care and education of children not their own (Num. xi. 12; 2 Kings x. 1; Is. xlix. 23).—W. L. A.

NUTS. [BOTNIM; EGOZ.]

NYMPHAS (Νυμφᾶς), a Christian at Laodicea, in whose house a portion of the believers were wont to assemble as an ecclesia or church (Col. iv. 15). There is no need for supposing with Grotius and others that *all* the Christians in Laodicea belonged to this society (the context, indeed, implies the contrary); nor is there any ground for the opinion of Chrysostom that the ecclesia consisted of the family of Nymphas. The congregation of believers in private houses for regular worship and service was not uncommon in the primitive age (comp. Rom. xvi. 5; 1 Cor. xvi. 19; Philem. 2). Lachmann follows the Cod. Vat. (B) in reading *αὐτῆς*, thus taking Nymphas for a female; but this reading is not supported by any other authority, except that of one minuscule codex (67\*), which generally agrees with Cod. B. This and the received reading *αὐτοῦ*, which Tischendorf retains, are probably corrections, arising from the difficulty presented by the plural; a difficulty, however, which may easily be got over by understanding the words of Nymphas and his family (*constructio κατὰ σύνεσιν*, comp. Kühner, *Gr. Gr.*, sec. 419 b), or *αὐτῶν* may refer to the ἀδελφοί.—W. L. A.

O.

OAK. [ALAH; ALLON.]

OATH, an appeal to God or to authorities recognised by the respective adjurers, or to anything esteemed sacred, in attestation of an assertion or in confirmation of a given promise or a duty undertaken.

1. *Signification of the name, and classification of*

*Oaths.*—The two words אֵלֶּה שְׁבוּעָה used in the Hebrew Scriptures to express *oath* or *swearing*, are by no means synonymous. They denote two different modes of swearing, or rather two classes of oaths. Thus אֵלֶּה (from אָלַל, *to lament, to wail, to express woe*), properly means *the invocation of woe upon one's-self*, and shows that the mode of swearing which it describes was connected with an invocation of divine vengeance on the party, if the asseveration made were not true. Whilst שְׁבוּעָה (from שָׁבַע, *seven*) literally signifies *to seven one's-self, to produce seven, i.e.*, to make a declaration confirmed by seven victims, or before seven witnesses, because, as Ibn Ezra (comp. צִהּוֹת, p. 41 a), who is followed by most modern expositors and lexicographers, rightly remarks, seven animals were used in ancient times when mutual promises were given and when alliances were effected (Gen. xxi. 28-30). This is moreover confirmed by the practice of the ancient Arabians, who, in pledging their faith, drew blood by an incision made in their hands, and smeared it on seven stones (*Herod.* iii. 8). The primary distinction, therefore, between the two oaths is, that in the case of the former an imprecation was used, whilst in the latter no imprecation was employed. Hence in Num. v. 21, where an oath with an imprecation is described, the phrase שְׁבוּעַת הָאֵלֶּה is used, and the formula of imprecation is forthwith given.

2. *Occasions when, and the manner in which Oaths were taken.*—From time immemorial, the Hebrews used oaths both in private intercourse and public transactions. In private intercourse, or on extra-judicial occasions, oaths were taken or demanded when promises were made (2 Sam. xv. 21; xix. 23), or exacted (Gen. xxiv. 2-4, l. 5, 25; Josh. ii. 12-21; vi. 26; ix. 15; Ezra x. 5); when covenants were concluded (Gen. xxxi. 53; 2 Kings xi. 4; 1 Maccab. vii. 15; Joseph. *Antiq.* xiv. i. 2); when a solemn asseveration was made (Gen. xiv. 22; Judg. xxi. 1-7; 1 Sam. xiv. 39, 44; xix. 6); and when allegiance to God, fealty to a sovereign, or obedience from an inferior to a superior, was professed (1 Kings xviii. 10; 2 Kings xi. 17; 1 Chron. xi. 3; xxix. 24; 2 Chron. xv. 14, 15; xxxvi. 13; Eccles. viii. 2; Joseph. *Antiq.* xii. 1; xv. 10. 4). Public or judicial oaths are demanded by the Mosaic law on the four following occasions:—*i.* When goods, deposited with any one, are stolen or destroyed, the depositary is to take an oath that he is not guilty in the loss, and the proprietor is bound to accept it without restitution (Exod. xxii. 10, 11; 1 Kings viii. 31; 2 Chron. vi. 22). *ii.* When one is suspected of having found or otherwise come into possession of lost property, he is to take an oath, and thereby clear himself of the charge (Lev. vi. 3). *iii.* When a wife is suspected of incontinence, she is required to clear herself by an oath (Num. v. 19-22); and *iv.* When a theft is committed, or an injury sustained, and the offender remains undetected, a judicial oath is to be imposed upon the whole community, or every one is adjured to make known the criminal, and if any one knows the culprit and refuses to make him known after hearing this public adjuration, he bears the guilt (Lev. v. 1; Judg. xvii. 2; Prov. xxix. 24).

As to the forms of oaths and the manner in which they were taken, the Jews appealed to God with or without an imprecation in such phrases as 'God do so, and more also if,' etc. (1 Sam. xiv. 44); 'As the Lord liveth' (1 Sam. xiv. 39; xix. 6; 2 Sam. xv. 21; 1 Kings xviii. 10); 'As the Lord liveth, and as thy soul liveth' (1 Sam. xx. 3); 'The Lord be between thee and me for ever' (1 Sam. xx. 23); 'The God of Abraham judge between us' (Gen. xxxi. 53). The Jews also swore 'By Heaven,' 'By the Earth,' 'By the Sun,' 'By Jerusalem,' 'By the Temple' (*Mishna, Shebuoth*, iv. 2; Matt. v. 34; xxiii. 16; *Berachoth*, 55; *Kiddushin*, 71 a; Maimonides, *Iad Ha-Chesaka, Hilchoth Shebuoth*, xii.); 'by the Angels' (Joseph. *Wars*, ii. 16. 4); by the lives of distinguished persons (Gen. xlii. 15; 1 Sam. i. 26; xvii. 55; 2 Sam. xi. 11; xiv. 19). The external manners observed when taking an oath are as follows:—Originally an oath of a covenant was taken by solemnly sacrificing seven animals, or it was attested by seven witnesses or pledges, consisting either of so many animals presented to the contracting party, or of memorials erected to testify to the act, as is indicated by one of the Hebrew names for oath (*שבועה*), which properly denotes seven, and by the verb to swear (*נשבע*), which means to seven, to produce seven (comp. Gen. xxi. 28-31; Knobel, *Comment. on Gen. in loco*). Another primitive custom which obtained in the patriarchal age, was that the one who took the oath, 'put his hand under the thigh' of the adjurer (Gen. xxiv. 2; xlvii. 29). This practice evidently arose from the fact that the gen-

tal member, which is meant by the euphemic expression 'thigh' (*ירך*), was regarded as the most sacred part of the body, being the symbol of union in the tenderest relation of matrimonial life, and the seat whence all issue proceeds, and the perpetuity so much coveted by the ancients (comp. the phrase *ירך* 'ירצה', Gen. xlv. 26; Exod. i. 5; Judg. viii. 30). Hence this creative organ became the symbol of the Creator, and the object of worship among all nations of antiquity (comp. Ezek. xvi. 17; St. Jerome, *Comment. in Hos.* iv.; Nork, *Etymologisch-symbolisch-mythologisches Real-Wörterbuch*, s. v. *Phalluscultus*; Pauly, *Real-Encyclopädie d. classischen Alterthumswissenschaft*, s. v. *Phallus*); and it is for this reason that God claimed it as the sign of the covenant between Himself and his chosen people in the rite of circumcision. Nothing, therefore, could render the oath more solemn in those days than touching the symbol of creation, the sign of the covenant, and the source of that issue who may, at any future period, avenge the breaking of a compact made with their progenitor. To this effect is the explanation of the Midrash, the Chaldee paraphrase of Jonathan b. Uzziel, Rashi, and the oldest Jewish expositors, though it simply specifies the covenant of circumcision. Further from the point is the opinion of Ibn Ezra, followed by Rosenmüller and others, that it is used as a symbol of submission on the part of the servant to his master. 'It appears to me more probable,' says Ibn Ezra, 'that it was the custom of those days for a servant to place his hand on his master's thigh; and the meaning of the phrase is: Now if thou art under my subjection, put thy hand on my thigh. The master sat with [the servant's] hand on his thigh, as if saying, Behold my hand is in subjection to thee to execute thy will. And this custom still obtains in India' (*Comment. on Gen.* xxiv. 2). More unnatural is the explanation of Grotius, that Eliezer put his hand on Abraham's thigh, where the sword was hanging (Ps. xlv. 3), as much as to say, 'If I falsify my word, may I perish by thy sword;' or that of Michaelis, that it alludes to a supposed custom of pressing blood from the hand by putting it under the thigh. The more general custom, however, was to lift up the right hand towards heaven, pointing to the throne of Him who is invoked as witness to the truth, and avenger of falsehood (Gen. xiv. 22; Deut. xxxii. 40; Dan. xii. 7; Rev. x. 5, 6). Hence the phrase, 'to lift up the hand,' came to denote to swear, to take an oath, and is even applied to the Deity (Exod. vi. 8; Ps. cvi. 26; Ezek. xx. 5). These practices chiefly refer to oaths taken in private intercourse, or on extra-judicial occasions. The manner in which a judicial oath was taken is thus described in the Jewish codes: 'The oath-taker held the scroll of the Law in his arms, stood up and swore either by the name of God or by any one of his attributes,

with or without an imprecation (*בשבועה או בנאלה*), uttering it either by himself or repeating it after the judge, and this judicial oath, according to the enactment of our Rabbins, had to be taken in the Hebrew language. If he pronounced the oath by himself, and without an imprecation, he said, 'I swear by Jehovah the God of Israel, or by Him who is merciful, or by Him who is compassionate, that I owe nothing to this man;' and if with an imprecation, he said, 'Behold I am accused of Jehovah, or of Him who is merciful, if I possess

anything belonging to this man.' And if the judges spoke the oath, they said to him: 'We adjure thee by Jehovah, the God of Israel, or by Him who is merciful, that thou hast nothing which belongs to that man.' To which he replied 'Amen!' Or they said: 'Behold A the son of so and so is accused of Jehovah the God of Israel, or of Him who is merciful, if he has any money in his possession and does not confess it to the owner;' and he responded, 'Amen!' (Maimonides, *Iad Ha-Chezaka, Hilchoth Shebuoth*, xi. 8-10). Instead of holding the Law, the oath-taker was also allowed to touch the phylacteries (Maimonides, *ibid.*) This simple response, *Amen* (אָמֵן), or *Thou hast said it* (σὺ εἶπας), which was all that was required to constitute an oath in case any one was adjured (Num. v. 19; *Mishna Shebuoth*, iii. 11; iv. 3), explains the reply of our Saviour (Matt. xxvi. 63, 64).

3. *Import and sanctity of an Oath.*—The only oath enacted in the Mosaic code is a clearance oath, i. e., the prosecutor is not to be put on his oath to prove the guilt of the accused, but the defendant is to swear and thereby clear himself of the charge or suspicion (Exod. xxii. 11; Lev. v. 1; vi. 3; Num. v. 19-22). Hence the great care exercised in inculcating the sanctity of oaths, and the heavy punishment for perjury or frivolous swearing (Exod. xx. 7; Lev. xix. 12; Deut. xix. 16-19; Ps. xv. 4; Jer. v. 2; vii. 9; Ezek. xvi. 59; Hos. x. 4; Zech. viii. 17; *Mishna Shebuoth*, iii. 11; iv. 3). Hence the Jewish canons enacted that when the demand of the prosecutor is very trifling, the defendant's simple denial is sufficient, and he cannot be compelled to take the judicial oath to clear himself (*Mishna Shebuoth*, vi. 1-3). For the same reason it is enacted that when the complainant is deaf and dumb, silly, or a minor, the defendant need not take the oath, because such people, not being able to appreciate the solemnity of the oath, may multiply swearing on too trivial grounds; and that a minor is not to be asked to take an oath (*Shebuoth*, vi. 4). Women, though forbidden to bear witness on oath (Deut. xix. 17 with *Mishna Shebuoth*, iv. 1), may take the clearance oath (*Mishna, ibid.*, v. 1). If one simply says to another, 'I adjure thee,' the oath is valid; but if any one swears by heaven, earth, Jerusalem, or any other creature, the oath is invalid (*Mishna, Shebuoth*, iv. 13). As this oath could be taken with impunity, it became very common among the Jews, who thought that because it involved nothing it meant nothing. Hence the remarks of our Saviour (Matt. v. 34-36; xxiii. 16-22). If any one swears frivolously, which is defined by the Jewish canons as follows: if he swears that something is different to what it is known to be, *ex. gr.*, if he says that a stone pillar is gold, that a woman is a man; or if it is about anything impossible, that he saw a camel flying in the air; or if any one says to witnesses, 'Come and give testimony to what you have seen,' and they say, 'We swear that we will not bear witness' (Lev. v. 1); or if one swears to transgress a commandment, *ex. gr.*, not to make a tabernacle, or not to put on phylacteries: this is a frivolous oath, for which, if taken deliberately, the man must be scourged (*Mishna, Shebuoth*, iii. 8). So great was the sanctity with which the pious Jews, prior to the days of Christ, regarded an oath, that they discountenanced swearing altogether (comp. Ecclus. xxiii. 11, etc.; and especially Philo, *de decem oraculis*, sec. xvii., Opp. tom. ii., p. 194, etc., ed. Mangey). The Phari-

sees took great care to abstain from oaths as much as possible (comp. *Shebuoth*, 39 b; *Gittin*, 35 a; *Midrash Rabba* on Num. xxii.), whilst the Essenes laid it down as a principle not to swear at all, but to say yea yea, and nay nay. How firmly and conscientiously they adhered to it, may be seen from the fact that Herod, who, on ascending the throne had exacted an oath of allegiance from all the rest of the Jews, was obliged to absolve the Essenes from it (comp. Joseph. *Antiq.* xv. 10. 4; Ginsburg, *The Essenes, their History and Doctrines*, Longman 1864, p. 34). Whether our Saviour's prohibition of swearing (Matt. v. 33-37) refers to the same total abstinence from all judicial oaths, or to profane and careless oaths, is a matter of dispute.

4. *Literature.*—The Mishna, *Tractate Shebuoth*; Maimonides, *Iad Ha-Chezaka, Hilchoth Shebuoth*, vol. iii., p. 1, ff.; Lightfoot, *Hebrew and Talmudical Exercitations on Matt.* v. 33; Frankel, *Die Eidesleistung der Juden in theologischer und historischer Beziehung*, 2d ed., Breslau 1847; by the same author, *Der gerichtliche Beweis nach Mosaisch-talmudischen Rechte*, Berlin 1846, p. 304, ff.; Saalschütz, *Das Mosaische Recht*, Berlin 1853, p. 608, ff.; Ewald, *Die Alterthümer des Volkes Israel*, Göttingen 1854, p. 15, ff.—C. D. G.

OBADIAH (עֲבַדְיָהוּ and עֲבַדְיָה, *servant of Jehovah*), the name of several persons mentioned in Scripture.

1. (Sept. Ὀβδίου.) One of the minor prophets. Of his history nothing certain is known. Some have inferred, from ver. 20th of his prophecy, that he lived and wrote while Jerusalem was under the power of the Chaldeans, and after the deportation of its inhabitants to Babylon, and that he was probably himself one of the exiles; but this inference rests on an assumption which, as will be seen afterwards, is questionable. The attempts to identify him with one or other of the persons of the same name mentioned in Scripture are mere unfounded conjectures. Entirely baseless also is the suggestion of Augusti (*Einleit.* sec. 225), that עֲבַדְיָה, in the title of this prophecy, is an appellative = *a servant of Jehovah* or 'some pious person;' for the word is never so used, and all the ancient versions give it as a proper name; nor is there any ground for the assertion of Abarbanel, that he was an Idumæan who, on becoming a proselyte to Judaism, took the name of servant or worshipper of Jehovah (*Praef. in Ezech.*, p. 153, col. 4; see also Jarchi on ver. 1. of the Prophecy).

Obadiah's prophecy stands the fourth in order among the minor prophets in the Hebrew, and the fifth in the LXX. It is very short, but there is no reason to regard it (with Eichhorn and others) as only a fragment of a longer writing. It is a compact and complete composition, and has no appearance of having been detached from another work. De Wette suggests that it was probably called forth by the exultation of the Edomites over the fall of Jerusalem; but Hengstenberg (*Gesch. Bileams*, p. 253), Hävernick (*Einleit.* ii. 321), and Caspari (*Der Proph. Obadja*), whilst admitting that the prophecy relates to the time of the captivity, would assign an earlier date to its composition; placing that in the reign of Uzziah, and regarding the reference to the Chaldean invasion as prophetic. This is a medium position between that of those who assign an early date to the composition

as Hoffmann (*Weissagung und Erfüllung*, i. 201), who makes Obadiah the oldest of the prophets and the contemporary of king Joram; and that of those who assign to it a post-exilic date. For this medium date there is much to be said. That the prophecy was written before the taking of Jerusalem by the Chaldeans, seems probable from the language of warning addressed to the Edomites (12-14), not to exult over the fall of that city, a strain which would have been inappropriate if the city had already been captured and their exultation passed. Again, certain passages in this prophecy so closely resemble passages in the prophecies of Jeremiah (comp. Obad. 1, 3, 8, 9, 11, 16 with Jer. xlix. 7-22), that one of these prophets must have seen and quoted from the writing of the other. Now, in favour of the originality and priority of Obadiah, it may be urged—1. That in Obadiah the prophecy against Edom forms a complete and rounded whole, while the similar passages in Jeremiah are less connected, and have the appearance of detached quotations. 2. Whilst in the passages of Jeremiah relating to Edom, which are not to be found in Obadiah, there are many expressions peculiar to the former; in those which are common to both there are none such, which gives to the passages in Jeremiah the aspect of being borrowed. 3. The variations of expression in the passages compared indicate on the part of Jeremiah the operation of a correcting hand, as *ex. gr.*, in the substitution of the easier שְׂמַעְתִּי (Jer. xlix. 14) for the more difficult שְׂמַעְתִּי (Obad. 1), and the absence of the explanatory הַתְּקַבֵּץ of Jeremiah from the passage in Obadiah; and in the substitution of the paraphrastic expression מְרוֹם גְּבוּעָה by Jeremiah (ver. 16) for the less easily construed words מְרוֹם שְׂבָתוֹ of Obadiah (ver. 3), etc. 4. The analogy of other prophecies of Jeremiah against foreign nations, which are generally based on the utterances of other prophets. These considerations render it probable that Jeremiah had the prophecy of Obadiah before him when he wrote the passages referred to; in which case Obadiah must have been anterior to him. The position of the book of Obadiah, also, in the canon, between that of Amos and that of Jonah, gives a traditional evidence of his being the contemporary of these prophets. His style, moreover, is more that of the older than of the later prophets, a point which Ewald virtually admits when he resorts to the utterly unsupported conjecture of an early lost prophecy, which both Obadiah and Jeremiah have quoted (*Prophet.*, i. 399). And, in fine, there is nothing in the prophecy of Obadiah which betrays a later date than that of king Uziah; for to adduce the allusion to the destruction of Jerusalem in ver. 20, is simply, after the usual fashion of those who would impugn the predictive character of the ancient prophetic utterances, to reason in a circle, proving the late date of the prophecy by the assertion that it was written after the event, and proving that it was written after the event by the assertion of the late date of the prophecy. It may be added that whilst Obadiah seems to have borrowed some of his expressions from Joel and Amos (comp. Joel i. 15; iii. 3, 5, 17, with Obad. 11, 15; Amos ix. 2 with Obad. 4, and Amos ix. 12 with Obad. 19), and even from the early prophecy of Balaam (comp. ver. 18, 19, with

Num. xxiv. 18, 19; and ver. 4 with Num. xxiv. 21), there is no trace of quotation from or allusion to any later writer. This affords strong confirmation of the date above assigned to his writing.

The prophecy consists of three parts. In the first (1-9), the certainty of Edom's overthrow is asserted; in the second (10-16), the cause of this, in Edom's enmity and violence to his brother Jacob, is set forth; and in the third (17-21), the establishment of the kingdom of God, and its triumph over all opposition, is announced. In the concluding words: 'And the kingdom shall be Jehovah's,' we have the dominant idea of the book, the key-note of the prophet's song. And the assertion of this is made with peculiar force in contrast with the overthrow of Edom, because that people, though allied to Israel by natural ties, were among its bitterest and most inveterate enemies.

The style of Obadiah is animated, and his elocution rapid. He deals much in appeal and interrogation. The language is pure and idiomatic, and his utterances often highly poetic (Jahn, *Introd. in Libb. Sac. V. F.*, p. 400; Eichhorn, *Einl.*, ins *A. T.*, iii., sec. 569; De Wette, *Einl.*, sec. 235; Hävernick, *Einl.*, ii., sec. 241).

*Commentaries.*—Rainolds, 1613, 1864; Pfeiffer, Viteb. 1666, 1670; Schroer, Bresl. 1766; Schnurrer, Tüb. 1787, and in his *Dissert. Phil. Crit.*, Goth. 1790; Venema, in *Verschuir's Opuscula*, Ultraj. 1810; Hendewerk, 1836; Hitzig, 1838; Caspari, 1842; Henderson, 1845; Pusey, 1861.—W. L. A.

2. (Sept. Ἀβδίου) The governor of king Ahab's household, and high in the confidence of his master, notwithstanding his aversion to the idolatries which the court patronized. In the persecution raised by Jezebel, Obadiah hid one hundred of the Lord's prophets in caves, and supplied them secretly with nourishment during the famine. It was this person, when sent out to explore the country in the vain search of pasture unconsumed by the drought, whom Elijah encountered when about to show himself to Ahab, and who was reluctantly prevailed upon to conduct the prophet to his master (1 Kings xviii. 4-16). B.C. 906.

3. (Ἀβδία.) One of the heroes of the tribe of Gad, who joined David at Ziklag (1 Chron. xii. 9).

4. One of the nobles whom Jehoshaphat sent to teach in the cities of Judah (2 Chron. xvii. 7).

5. (Ἀβδίας.) One of the Levites who presided over the restoration of the temple under Josiah (2 Chron. xxxiv. 12).

6. (Ἀβδία.) The head of a party, consisting of 218 males, with females and children in proportion, who returned with Ezra from Babylon (Ezra viii. 9).

7. (Ἀβδία.) One of the priests who sealed the written covenant which Nehemiah caused the people to enter into (Neh. x. 5).

Other persons of this name occur in 1 Chron. iii. 21; vii. 3; viii. 38; ix. 16, 44; xxvii. 19; 2 Chron. xxxiv. 12.

OBAL (עובל, 'stripped'; Εὐάλ; *Ebal*), the seventh son of Joktan, and founder of one of the nomad tribes, the aboriginal inhabitants of Arabia (Gen. x. 28). In the Samaritan Pentateuch the name is written עִיבָל, as it is also in the genealogical list given in 1 Chron. (i. 22, omitted in Vat.; Alex. Γεμάν; *Hebal*). Bochart identifies Obal

with the *Abalites* or *Avalites* of classic geographers (Pliny, vi. 29; Ptolemy, iv. 7), who dwelt beside a gulf of the same name on the eastern coast of Africa, near the Straits of Bab el-Mandeb (Bochart, *Geogr. Sac.*, ii. 23; *Opera*, i. 123). They were a commercial people, largely employed in carrying the wares and products of Africa across the Red Sea to the cities on the Arabian coast, and returning with spices, which they conveyed to Diospolis and Lower Egypt (see Bochart, *l. c.*, and authorities quoted by him). There is certainly some resemblance in name between the Hebrew *Obal* and the classic *Abalites*. It is well known also that some tribes originally resident in Arabia have migrated to Africa. More than this, however, cannot be said in favour of Bochart's view, which is also adopted by Forster (*Geogr. of Arabia*, i. 148). This theory is much more probable than that which would identify Obal with GEBAL of Edom, the *Gobolitis* of Josephus (*Antiq.* ii. 1. 2). The two names are radically different (עובל and גבל), the latter being given to a district because it was 'mountainous' (Gesenius, *Thez.*, p. 981; Winer, *R. W.*, s. v.)—J. L. P.

OBED (עֹבֵד, *servant*; Sept. 'Ωβήδ, 'Ιωβήδ, 'Ωβήθ), son of Boaz and Ruth, and father of Jesse the father of David, according to the apparently incomplete genealogical list (Ruth iv. 17; 1 Chron. ii. 12). The name occurs in the genealogies of Matthew (i. 5) and Luke (iii. 32). Other persons of this name are mentioned 1 Chron. ii. 37, 38; xi. 47; xxvi. 7; 2 Chron. xxiii. 1.

OBED-EDOM (עֹבֵד אֶדֹם, *servant of Edom*; Sept. 'Αβεδδαρά in Sam.; 'Αβδεδδου in Chron.), a Levite in whose premises, and under whose care, the ark was deposited when the death of Uzzah caused David to apprehend danger in taking it further. It remained here three months, during which the family of Obed-edom so signally prospered, that the king was encouraged to resume his first intention, which he then happily carried into effect (2 Sam. vi. 10-12). Whether the Obed-edom who is mentioned 1 Chron. xvi. 38 as one of the guardians of the ark is the same as the above is not certain, but the strong probability is that he is so (comp. 1 Chron. xv. 24; xxvi. 5, with 2 Sam. vi. 11). The family of Obed-edom remained in the service of the Temple, and are found as guardians of its treasures in the reign of Amaziah (2 Chron. xxv. 24).

OBIL (אֹבִיל; Sept. 'Αβλας), an Ishmaelite, or Arab, doubtless of the nomad tribes, who had charge of the royal camels in the time of David—an exceedingly fit employment for an Arab (1 Chron. xxvii. 30). As *Abāl* means in Arabic 'a keeper of camels,' Bochart (*Hieroz.* ii. 2) reasonably infers that the person had his name from his office, which has always been a very common circumstance in the East.—J. K.

OBLATION. [OFFERING.]

OBOH (אֹבוּ, perhaps 'bottles,' from אֹב; 'Ωβω; *Oboth*), a station of the Israelites in the wilderness east of Moab. It was the first place in which they encamped after the setting up of the brazen serpent (Num. xxi. 10). It appears from the general itinerary in Num. xxxiii. 44, that Oboth

was only a single march distant from the border of Moab, for it is said 'they departed from Oboth, and pitched in Ijeabarim, in the border of Moab.' The site is unknown, and the region is unexplored.—J. L. P.

OCHIM (אֹחִים, pl. of אֹחַ), a species of animal classed with wild beasts of the desert, and described as haunting ruins (Is. xiii. 21, A. V. 'doleful creatures'). Various identifications have been suggested, such as *cats*, *weasels*, *apes*, etc.; but the view most generally entertained is that a species of owl is intended. The name is onomatopoeic from the interjection אֹחַ, and denotes some creature that makes a woful howling or screeching noise. This sound is very characteristic of the cry of the owl, which is somewhat like *augh-o*.—W. L. A.

ODED (עֹדֵד, *erecting*; Sept. 'Οδῆδ; Alex. 'Αδδδ). 1. Father of Azariah the prophet, who was commissioned to meet and encourage Asa on his return from defeating the Ethiopians (2 Chron. xv. 1-8). It curiously happens that the address which, at the commencement, is ascribed to Azariah, the son of Oded, is at the end ascribed to Oded himself (xv. 8). But this is supposed to have been a slip of copyists, and the versions read the latter verse like the former.

2. The prophet who remonstrated against the detention as captives of the persons whom the army of king Pekah had brought prisoners from Judah, and at whose suggestion they were handsomely treated, and conducted back with all tenderness and care to their own country (2 Chron. xxviii. 9).

ODEM (אֹדֶם; Sept. σάρδιον), one of the precious stones in the breastplate of the high-priest (Exod. xxviii. 17; xxxix. 10), and also mentioned in Ezek. xxviii. 13. In all these places it is rendered 'sardius' in the A. V., following the Septuagint and Josephus (*De Bell. Jud.* v. 5. 7), who, however, in *Antiq.* iii. 7. 6, makes it the sardonix (σαρδόνιξ). The sardius is the stone now called the carnelian, from its colour (*a carne*), which resembles that of raw flesh. The Hebrew name is derived from a root which signifies being red. The sardius or carnelian is of the flint family, and is a kind of chalcedony. The more vivid the red in this stone, the higher is the estimation in which it is held. It was anciently, as now, more frequently engraved on than any other stone. The ancients called it sardius, because Sardis in Lydia was the place where they first became acquainted with it; but the sardius of Babylon was considered of greater value (Plin. *Hist. Nat.* xxxvii. 7). The Hebrews probably obtained the carnelian from Arabia. In Yemen there is found a very fine dark-red carnelian, which is called *el-Akik* (Niebuhr, *Beschreib.*, p. 142). The Arabs wear it on the finger, on the arm above the elbow, and in the belt before the abdomen. It is supposed to stop hemorrhage when laid on a fresh wound.—J. K.

OECOLAMPADIUS, JOHANNES, was born at Weinsberg, a small town in the north of Wirtemberg, in 1482. His proper name was *Hussgen* or *Heussgen* (a diminutive from *Haus*, a house); not, as is generally stated, *Hausschein*, which seems to have been only a retranslation of Oecolampadius (Ullmann, *Stud. u. Krit.* 1845, p. 155, ff.) His early education he received at Heilbron, from

which he passed to the University of Bologna to study law; but his health failing him there, and his inclinations not favouring the pursuit of legal studies, he removed to Heidelberg, where he studied theology and the humanities. At a later period, he went to Tübingen, where he read Hesiod with Melancthon; thence he went to Stuttgart, where he prosecuted the study of Greek under Reuchlin; he then returned to Heidelberg, and there commenced the study of Hebrew under the tuition of a converted Jew named Adriani; and at length, stored with the treasures of learning he had acquired, he returned to his native town, and entered on clerical duties there. Not long after, he was invited to Basle, to be preacher in the minster, and there he assisted Erasmus in preparing his edition of the Greek N. T. He left Basle in 1518, having taken his degree as doctor, and became preacher at Augsburg. Whilst there, he surprised his friends by becoming a monk in April 1520; but as his leanings were strongly towards the Reformation party, it was not long before he found his position in the cloister uncongenial, and regretted the step he had taken. In February 1522, he made his escape from the bonds under which he had brought himself, and, after residing for some time at Heidelberg and other places, he returned to Basle, October 1522. Here the rest of his life was spent. Having been appointed a teacher in the University, he set himself to expound the prophecies of Isaiah, and his efforts in this direction were so successful, that not only multitudes of students crowded to his prelections, but many of the clergy and citizens were found amongst his hearers. Having now openly joined the reformers, he, in 1525, became pastor of one of the churches in Basle, and this gave him the opportunity of carrying forward the work of the Reformation, by abolishing the Romish ceremonies in his church, and instructing the people in the doctrines of the gospel. After a protracted conflict with the supporters of the old system, Oecolampadius remained master of the field; and the Reformation was established in Basle. He did not long survive his triumph. As the morning of the 24th of November 1531 dawned, he passed away, with the words 'Lord Jesus help me,' on his lips.

His contributions to Biblical literature are numerous. Besides editing and translating Theophylact on the Gospels, and several of the Homilies of Chrysostom and other patristic writings, he issued commentaries, more or less full, on Genesis, Job, Psalms, Isaiah, Jeremiah, Ezekiel, Daniel, most of the minor prophets, Matthew, John, and the Epistle to the Hebrews. His philological attainments, and his knowledge of the Fathers, contributed to give to his exegetical labours a high value.—W. L. A.

OECUMENIUS, Bishop of Triceca in Thessaly, flourished in the close of the 10th century. He is chiefly known by his exegetical works on the Acts, the epistles of Paul, and the Catholic epistles. With Oecumenius originated the *Catenæ* [CATENÆ]; his commentaries are chiefly composed of extracts from the writings of the Fathers, with a few remarks of his own. 'The various explanations are linked together without regard to their agreement or contrariety, by such words as 'another' (ἄλλο), 'otherwise' (ἄλλως), 'and otherwise' (καὶ ἄλλως); and sometimes they amount to ten in one

place. The reader is generally left to choose for himself, for Oecumenius seldom prefers one to another. The method of interpretation is grammatical? (Davidson, *Hermeneutics*, p. 169). It is noticeable that he does not read 1 John v. 7; and that he reads θεός and not ὁς, 1 Tim. iii. 16. *Oecumenii Comm. in Acta App., in omnes Pauli Epp., in Epp. Cathol. omnes cum Arethæ Ennarai. in Apoc. Gr.*, Veronæ 1532, fol.; *cum Hentenii interp. lat.* ed. Fed. Morelli, Par. 1630-31, 2 vols. fol. See also Cramer, *Catenæ Græcorum Patrum in N. T.*, 8 vols. 8vo, Oxon. 1844.—W. L. A.

OFFERING. This word, as well as the German *Opfer*, like the Hebrew *Korban*, comprehends every sort of gift or sacrifice presented unto God.

I. Before entering minutely into the subject of this article, there are several words of general import and common use in the Bible relating to it, which require to be noticed:—

1. קָרַבַּן (from קָרַב, to approach, Hiph. to cause to approach, to bring near), LXX. δῶρον, θυσία, N. T. κορβάν, ὃ ἐστὶν δῶρον (Mark vii. 11) = something brought near unto God, an offering, bloody or unbloody, burnt wholly or in part; and hence, a gift presented unto God.

2. כִּנְהָה (from the obsolete root כָּנָה, donare), LXX. δῶρον, θυσία, ξένιον, προσφορά, σμειδάλis, θυσίασμα, a gift, a present (Gen. xxxii. 14), tribute (2 Sam. viii. 2, 6), sacrifice (Is. i. 13; Gen. iv. 4, 5). It is used, however, in an appropriated sense, of the meat-offering, of which more anon.

3. זָבַח (from זָבַח, to slay, to slaughter), LXX. σφάγιον, θυσία, θυσιάσμα, ὀλοκαύτωμα, a slaughter; then the slaying of animals in religious worship, the victim slain, a sacrifice. Opposed to bloodless offerings (1 Sam. ii. 29), and distinguished from burnt-offerings (Ps. xl. 7), it usually denotes a sacrifice partially consumed in the fire (Exod. x. 25; Lev. xvii. 8); but is sometimes used in a figurative sense (Ps. iv. 6; li. 19).

4. Θυσία (in N. T.), (from θύω, to slay), is used to denote animal sacrifices (Heb. vii. 27); the sacrifice of Christ (Heb. ix. 26; Eph. v. 3), and the spiritual sacrifices of the Christian priesthood (Rom. xii. 1; 1 Pet. ii. 5).

5. Προσφορά (from Προσφέρω, to bring near, offer, present), a gift, linked with alms (Acts xxiv. 17); an offering, as distinguished from a bloody offering (Eph. v. 3), the consecration of the Gentiles to God (Rom. xv. 16); animal sacrifices (Acts xxi. 26; Heb. x. 18); the sacrifice of Christ (Eph. v. 3).

II. Of living creatures, the Hebrews 'offered only these five kinds: bullocks, sheep, goats, turtles, pigeons. Their offering of other things were: tithe, first-fruits, flour, wine, oil, frankincense, salt' (Lightf. *Temp. Serv.* ch. viii.) The animals chosen were such as were the most useful, easily obtained, and fit for food; the birds, the gentlest of the gregarious and solitary kinds (Philo, *de An. ad Sac. ad.*) All must be without blemish or defect (Lev. xxii. 17-25); the most perfect of its kind. As to age, they must neither be too old nor too young (Outram, *Dis.* i. 9). No animal should be under eight days old (Exod. xxii. 30; Lev. xxii. 27); an animal of a year old is often specifically enjoined (Num. xxix. 29; Lev. ix. 3). According to Rabbinical tradition, a bullock should not be over three years old; that age was prescribed for

the victims offered by Abraham on one solemn occasion (Gen. xv. 9). A bullock of seven years old (Judg. vi. 25) is an exceptional case, having reference to the duration of the Midianitish oppression (Kurtz, sec. 34), and therefore not opposed to the Rabbinical tradition. The law, while making certain sacrifices imperative, and appointing the times for their presentation, left full scope for free-will offerings (Lev. vii. 16; xix. 5). In reference to animal sacrifices, the presentation, imposition of hands, and slaughtering, were common to them all. The offerer brought the victim to the door of the Tabernacle, and there, by solemn imposition of hands, presented it unto God as an atonement for his sin, or as a thank-offering for mercies received (Lev. i. 3, 4; iii. 1, 2; iv. 4). 'The person presenting the offering showed thereby,' says Kurtz, 'that he felt, and desired to put in practice, the wish, the need, or the obligation, to renew, to fortify, and give life, by means of such an offering, to his fellowship with his God, who revealed himself to him there.' The imposition of hands, according to the old Rabbinical and Patristic view, was expressive of the transfer of sin and guilt from the person sacrificing to the animal sacrificed. *Consecration*, according to others, is the meaning of the rite. *Solemn designation* to the appointed purpose seems the most natural and likely idea.

The Rabbins, according to Lightfoot, divided their sacrifices of living creatures into two kinds:

קדשים קדשים, the most holy, and קדשים קלים, those of inferior value. The former were: burnt, sin, and trespass-offerings, and the peace-offerings of the whole congregation; the latter, peace offerings of particular persons; paschal-lambs, firstlings, and tenths (Z. S., ch. viii.) But, for our purpose, a more simple and rational classification of sacrifices is preferable—namely, bloody and unbloody; a classification at once comprehensive and convenient.

I. BLOODY OFFERINGS, or sacrifices proper. These we shall notice in the order of their *importance*, which is also their natural, but not their historical order. There were four distinct sorts; distinct, yet related; so related as all to convey one idea in common, and so distinct, as each to convey an idea peculiar to itself. Again, 'they may be divided into those whose end is the re-establishment of the state of grace; and those which were offered by him who was in a state of grace. The first class consists of sin-offerings and trespass-offerings; the second, of burnt-offerings and peace-offerings, to which may be added the bloodless-offerings' (Hengstenberg).

1. חֲטָאת (in Ps. xlvii. 7, חֲטָאָה), (fr. חָטָא, *aberravit a scopo* jacular, 2, *peccavit*, 3, *reus factus est alicujus rei*; Pi. *luit peccatum*, Ges. *Thes.* 464, 65), LXX. ἁμαρτία, ἐξῆλασμός, ἄγνισμός, *sin*, then an offering for sin, i.e., that by which sin is atoned, so that it may be pardoned. The word was chosen for the sake of emphasis. The offering was, says Hengstenberg, an embodiment of the sin of the offerer, or rather the victim bore his sin, was made sin for him, like the *Great Victim* of human guilt, the great sin-offering which atoned for the sin of the world (2 Cor. v. 21). *Atonement* or *propitiation* is the main idea conveyed by the sin-offering; and hence, in this kind of sacrifice, the *sprinkling of blood* occupied such a prominent place. The animals used in the *Chatath* were: a young bullock for the high-priest (Lev. iv. 3), the representative

of the nation; the same for the whole congregation, 'including the entire priesthood' (Lev. iv. 13, 14); a he-goat for the 'prince of the congregation' (Lev. iv. 23); a she-goat for one of the people (Lev. iv. 28, 32; v. 6); or, in case of poverty, a dove or a young pigeon (Lev. v. 7), or even a bloodless-offering consisting of the 'tenth of an ephah of fine flour' (Lev. v. 11, 12). This graduation of victims, according to the theocratic position of the offerers, was peculiar to the sin-offering, which therefore bore more of an individual character than the other sacrifices, and was probably meant to hint, that the higher the individual in theocratic rank, 'the greater the moral guilt involved in his offence.'

The blood of the *Chatath*, for the prince or one of the people, was simply put on the horns of the altar (Lev. iv. 7, 25); but the blood of that for the high-priest or the whole congregation was taken by the high-priest into the holy place, and sprinkled seven times before the Lord, towards *עֵל*, the *parocheth*, פָּרֹכֶת, or veil, and a portion of it put on the horns of the altar of incense (Lev. iv. 5, 6, etc.) The blood not so used was poured out at the foot of the altar. On the great day of atonement (which see) the expiation made by the sin-offering reached its highest point, when the blood was brought into the most holy place by the high-priest, and sprinkled towards and upon the *Chaporeth* or Mercy Seat (Lev. xvi.), the type of the entrance of our Great High-Priest into heaven itself, not with the blood of goats or of calves, but with his own blood, thus 'obtaining eternal redemption for us' (Heb. ix. 12; see Alford's *Note*).

Of the sin-offering, the '*fat*' alone, i.e., the *best*, according to Hebrew modes of viewing things, was burnt upon the altar (Lev. iv. 8-10; xxvi. 35), in sign of consecration to God, a gift to Jehovah, 'purified by the fire of divine holiness.' The rest of the flesh was either eaten by the priests and their sons (their wives and their daughters were excluded) in the holy place (Lev. vi. 25, 26; x. 16-20); or, in case the blood had been brought into the holy place, burned in a clean place without the camp (Lev. iv. 21); as being 'too holy to be eaten even by the priests.' In the act of immolation, the victim 'died to sin' (see Rom. vi. 7, 10), and became pure as before, and even more sacred. This burning had no symbolical signification, but was designed to prevent putrefaction and profanation. So holy was the flesh of the *Chatath*, that whatsoever touched it was forfeited to the sanctuary (Lev. vi. 27); the garment sprinkled with its blood had to be washed in the holy place; the earthen vessel in which it was sodden broken, or the brazen vessel scoured and rinsed (Lev. vi. 28, 29). The priestly feast upon the sin-offering was a symbol of fellowship with God in his house, as his servants and friends, according to the words:—'We shall be satisfied with the goodness of thy house, even of thy holy temple' (Ps. lxxv. 4). The sacrifice which atones for sin towards God, becomes food for his people; it is at once the source of pardon and of life.

The sins for which the *Chatath* was offered, were *sins of ignorance*, i. e., all such as did not involve wilful and obstinate rebellion against God (Lev. iv. 2, 22, 27), for which there was no sacrifice provided, but the punishment of death ordained.

\* Kurtz.

2. אָשָׁם (fr. אָשָׁף, *deliquit, culpam contraxit*; 2. *culpam sustinuit, culpæ pœnas dedit*), *asham*, LXX. *πλημέλεια, ἀγνοία* (1.) culpa, quam quis contraxit, (2.) id quo, quis culpam contraxit, (3.) sacrificium pro delicto (Ges. *Thes.* 160); *trespass-offering*. The law of the *asham* is found Lev. v. 14; vi. 1-8; vii. 1-7. There is a striking resemblance between the sin and the trespass-offering, both as to the sins for which they were offered, and the ritual of both; so that it has been found difficult to point out their essential difference. The victim appointed for the trespass-offering was a female lamb or kid, or a ram without blemish (Lev. v. 6, 15, 17; vi. 6), which was to be valued by the priest, and to be accompanied by a compensation for the wrong done (Lev. v. 15-19). The blood of the trespass-offering was to be sprinkled, the fat burned on the altar, and the flesh eaten by the priests in the holy place (Lev. vii. 1-7). The sins requiring an *asham* are distinctly named—a trespass committed in holy things; dishonesty and falsehood in a trust; robbery conjoined with deceit; dishonesty and falsehood in respect to a thing found (Lev. v. 15; vi. 1-4).

‘The valuation of the ram by the priest was something altogether peculiar to this kind of sacrifice, and does not occur anywhere else’ (Kurtz). The ram was presented as a compensation for the robbery of God involved in sin; and ‘was accompanied by a material compensation to the injured

person for the wrong that had been done by the *מעל*, *Mahal*, or offence, to the amount of one-fifth of its worth’ (Kurtz, sec. 121). ‘But as the object was principally to give outward representation to an idea, to naturalise in the church the view of sin as a robbery of God, the trespass-offering and the recompense-offering were expressly provided for a limited number of cases, such as specially awakened the desire to offer a compensation’ (Hengstenberg). Hence, as Kurtz says: ‘The idea of the trespass-offering must be defined as relating to the violation of the rights and claims of others, or, as we might put it, to some kinds of robbery committed upon others, not merely in material possessions and property, which it would be possible to restore, but in rightful and obligatory services, based upon agreement or covenant, the neglect of which, from their very nature, could not be compensated afterwards. . . . This also expresses the point of difference from the *sin-offering*, which was connected with all such sins as could not be regarded as robbery ‘of God or man’ (K., sec. 102). Originally and primarily, a *sin-offering* was appointed for the transgression of the commandments of Jehovah; but in the further development of the laws in question, all such breaches of the commandments of

God as would be looked on in the light of a *מעל*, *Mahal*, were excepted from this rule, and a different kind of sacrifice—viz., the trespass-offering—appointed. This appears, therefore, as a subordinate species of *sin-offering*, modified in a peculiar manner’ (*ib.*) It is unnecessary, therefore, to notice the various opinions which have been broached respecting the difference between the sin and the trespass-offering, utterly baseless as most of them are. The difficulty in which the subject has been involved, has arisen, no doubt, in part at least, by taking Lev. v. 1-13 as the introduction to the laws of the trespass-offering, instead of regard-

ing it as the conclusion of the laws relating to the *sin-offering* (see Kurtz, secs. 103, 104). The *sin-offering* holds up sin as *guilt* needing *expiation*; the trespass-offering, as *robbery* demanding *compensation*.

3. עֹלָה (fr. עָלָה, *ascendit*), id *quod ascendit*, h. e. *ardet et fumat, holocaustum, Victima, quæ tota igne absumpta ascendit, non tantum oblatio* (Fürst, *Concord.*, 825); a *burnt-offering*; also called כָּלִיל, whole, entire, perfect, *i. e.*, wholly burnt, in contrast with those sacrifices, portions only of which were burnt on the altar. This was the distinguishing feature of the burnt-offering, which was the type or symbol of entire consecration to God; and which, therefore, comes in most fittingly after the sin and trespass-offering (see BURNT-OFFERING).

4. שָׁלֵם (fr. שָׁלַם, or שָׁלַם, *integer fuit, inde, incolumis, Sospes, salvus fuit*; denom. from שָׁלוֹם, *to be at peace*; Hiph. *to make peace with any one*), peace, concord, ‘*amica et pacata conditio*’, then, a peace-offering. But the word occurs only once in the singular denoting a peace-offering, viz.,

Amos v. 22. The usual form is שְׁלָמִים, *θυσια σωτηριου ελρηκυκτον* (Joseph. *Antiq.* iii. 3. 1) *χαριστήριος θυσια, hostia pacificorum*; ‘hoc est, tale sacrificium quod ad pacem et amicitiam cum Deo colendam et testificandam offerretur, sive in usum publicum, sive privatarum rerum respectu’ (Ges. *Thes.*, 1422).

The *Shalem*, peace or thank offering, might be either of the herd or of the flock, male or female. The priest sprinkled the blood upon the altar round about, and burned the fat of the inwards along with the kidneys upon the altar (Lev. iii.). With the peace-offerings were offered unleavened cakes mingled with oil, and unleavened wafers (רֻקִּים), thin cakes; Ges. *placenta tenues*, anointed with oil, and cakes of fine flour, fried, mingled with oil, and leavened bread (Lev. vii. 12, 13). The breast of the offering, waved as a wave-offering before the Lord; and the shoulder, heaved as a heave-offering before the Lord, were the portion of the priests (Lev. vii. 31-34); but the rest of the flesh was to be eaten by the offerer before the Lord (Lev. vii. 15; xxii. 30).

The peace-offering may be divided, according to Lev. vii. 11, etc., into three species—(1.) זֶבַח הַתְּנוּחָה, *i. e.*, praise-offering; (2.) זֶבַח נִדָּר, votive-offering; and (3.) זֶבַח נְדָבָה, free-will offering (Kurtz, sec. 126). ‘A state of peace and friendship with God was the basis and sine qua non to the presentation of a *Shalem*; and the design of the presentation, from which its name was derived, was the *realization and establishment, verification and enjoyment* of the existing relation of peace, friendship, fellowship, and blessedness’ (Kurtz, sec. 125). The name, therefore, indicates the distinctive quality of the sacrifice, and the *meal* was its distinctive feature, which, together with the name, clearly expressed the state of peace which existed, and the fellowship which was enjoyed. The peace-offering, therefore, stood in most significant relationship to the preceding offerings. The *sin-offering*, with the trespass-offering, which were closely related, came first,

making expiation for sin; the burnt-offering followed; for when sin is atoned, the way is opened for self-consecration to God; and that is rightly and beautifully followed by sacrifices of peace and joy, giving expression at once to the feelings experienced and the peace with God which exists. The order of these sacrifices here indicated was followed in the consecration of Aaron and his sons (Lev. viii.); and on the eighth day after, the same kind of offering, in the same order, was offered for the people and visibly accepted by God,—fire coming out from before the Lord, and consuming upon the altar the burnt-offering and the fat (Lev. ix.).

A peculiar custom connected with the peace-offering was the *heaving* and *waving* of the portions set apart for the priests (Lev. vii. 30, 32, 34; viii. 25). They were both forms of consecration; the former pointing to God in the heavens, the latter to God as ruling upon the earth and filling it with his presence. (But see Kurtz, sec. 133-138.)

Were peace-offerings ever *supplicatory*? It seems they were, as they were sometimes offered in seasons of sorrow, *ex. gr.*, 2 Sam. xxiv. 25; Judg. xx. 26; xxi. 14. The key to the understanding of this is furnished by Hengstenberg: 'to give thanks for grace already received is a refined way of begging for more.' As prayer is founded on the divine promise, it 'may be expressed in the way of anticipated thanks.'

The sacrifice of the red heifer (Num. xix. 1-10) is altogether unique, and requires distinct notice. A heifer, or young cow, perfectly red, and free from every blemish, and which had never borne the yoke—*i.e.*, in the full vigour of life—of which the red colour was the symbol—life unimpaired by labour—was to be selected by the children of Israel, and brought to Eleazar the priest. She was then to be conducted without the camp and slaughtered there, as a thing peculiarly unclean. The blood was then to be sprinkled by the priest seven times towards the tabernacle of the congregation, to make expiation for the whole people whose sacrifice the heifer was. The entire body was then burned with 'cedar wood,' the symbol of the imperishable, and 'hyssop,' the symbol of purification, and 'scarlet'—wool dyed with coccus, a brilliant scarlet dye—the symbol of the fullness of life; and the ashes carefully collected and preserved, to be mingled with running water—another symbol of life—as occasion might demand, for sprinkling and purifying the unclean through contact with a dead body. The water so prepared was called *מֵי נִדֵּה* = *aqua impuritatis*, not as mean-

ing impure water, but for the removal of impurity; as the sin-offering does not mean an offering loaded with sin, but intended to expiate sin. The red heifer was, in fact, a sin-offering of a peculiar kind. The proofs are: it is called a *חַטָּאת*, *chatath* (v. 9, 17), and its blood was sprinkled before the tabernacle. The whole transaction was a type of Christ cast forth without the gates, as a thing utterly unclean, nevertheless from whom proceeds a living, powerful influence, to 'purify the conscience from dead works to serve the living God.' (See Kurtz, sec. 217, etc.)

The door of the tabernacle was the place appointed by God for the killing of the animals offered in sacrifice (Lev. i. 3; ii. 2; iv. 4). Such was the law, a law stringently enforced even in relation to animals slaughtered for ordinary consump-

tion, while the Israelites wandered in the desert (Lev. xvii.) This law held good of the Temple when it succeeded the tabernacle, where God recorded his name\* (Deut. xii. 11-15). Yet this rule was often transgressed, not only with impunity, but with divine sanctions—*ex. gr.*, at Bochim (Judg. ii. 5); in Ophrah, by Gideon (Judg. vi. 26); at Zorah, by Manoah (Judg. xiii. 19); at Gilgal, when Saul was made king (1 Sam. xi. 15); by David, at Gibeah, when bringing the ark from the house of Obed-edom (2 Sam. vi. 13);—but here the presence of the ark obviated the irregularity;—by Elijah, on Mount Carmel (1 Kings xviii. 30-39). Before the erection of the temple 'high places' were much resorted to by the people for sacrifice (2 Sam. vi. 13); nor was the practice afterwards wholly discontinued. The people ever showed a strong propensity to sacrifice on them (1 Kings iii. 2; 2 Kings xvii. 22; 2 Chron. xxxiii. 17).

II. UNBLOODY OFFERINGS. These were—1. The *מִנְחָה*, *mincha* proper, usually rendered in the A. V. 'meat-offering.' Of this, three leading descriptions are mentioned: (1.) Fine flour *סֹלֶת*, accompanied by oil and frankincense (Lev. ii. 1); (2) Unleavened cakes of fine flour, accompanied with oil, prepared in the oven, *תַּנּוּר* (ver. 4); or in a pan, *מַחֲבֵת*, or flat iron plate (vers. 5, 6), or in a *כִּרְיֹשֶׁת*, frying-pan, or rather pot, or kettle (ver. 7); (3.) Parched corn of the first-fruits with oil (ver. 14). Every meat-offering was to be seasoned with salt (ver. 13). Part of it was burned on the altar, and the rest was the priests' (vers. 9, 10). The meat-offering itself was the symbol of good works, our best offering unto God, after the consecration of ourselves; *oil*, the symbol of the Holy Spirit, by which all really good works are influenced and pervaded; *salt*, the emblem of incorruption, durability, and fidelity; and *frankincense*, significant of the acceptability of the whole unto God. The *mincha* usually accompanied and was subsidiary to the sin and burnt offerings. Unbloody offerings, presented alone, resembling the *mincha*, were not meat-offerings, but substitutes for other offerings, *ex. gr.*, for the sin-offering (Lev. v. 11). The quantity of material in the *mincha* was graduated according to the victims offered as a burnt-offering, *ex. gr.*, a tenth-deal of fine flour for a lamb, two tenth-deals for a ram, and three tenth-deals for a bullock (Num. xv. 4, 5, 6, 9).

A meat-offering of a peculiar and exceptional kind was that appointed to accompany the trial for jealousy, consisting of the tenth of an ephah of *barley* meal, without either oil or frankincense (Num. v. 15); corresponding thus with the humbled condition of the suspected wife.

2. The drink-offering, or *נֶסֶךְ* *nesek* (from *נָסַךְ*, to *pour out*), LXX. *σπονδή*. This is only mentioned in Exod. xxix. 40, 41; Lev. xxiii. 13; xviii. 37, as an accompaniment of other offerings; and in Exod. xxx. 9, is forbidden to be offered upon the altar of incense in the holy place; but not till Num. xv. 1-12, is it formally described.

\* This law was intended to prevent secret idolatry, which might be practised under the veil of obedience to the law; and to secure the union of the tribes, by bringing them often together for a national and religious object.

Here it is ordered to be graduated according to the value of the victim (as in the case of the meat-offering): the fourth, the third, the half, of a hin of wine (vers. 4, 7, 10). The vessels used for the drink-offering are mentioned Num. iv. 7. The reason the *neseq* was not described at an earlier period was, that the offering of it was not intended for Israel's desert-state, when wine was not procurable, but to be deferred till the settlement of the tribes in Canaan; for the law respecting it is prefaced thus: 'when ye be come into the land of your habitations.' What was done with the wine of the drink-offering we are not expressly told, but we infer that it was *all* poured out, as the name imports, and as the priests were not allowed to drink wine when they went into the tabernacle (Lev. x. 9). Where it was poured out is not stated. In the Wisdom of Sirach, the high-priest is represented as pouring it out *eis theμέλια θυσιαστηρίου* (l. 15). Josephus says it was poured out, *περὶ τὸν Βώμον* (*Antiq.* iii. 9. 4). There can be little doubt that it was poured out—not at the foot of the altar, as the blood not used was poured, simply to get rid of it, or to signify the pouring out of life, but—*upon the sacrifice*, as it lay upon the altar, and therefore, according to Josephus, about the altar. The nature of the offering itself, presented like the *mincha*, as the food of the great King,—'wine that cheereth both God and man'—shuts up to this. And Paul's reference to the *neseq* in his memorable words: *εἰ καὶ σπένδομαι ἐπὶ τῇ θυσίᾳ*, etc., 'yea, should I be poured out as a libation *upon the sacrifice* and service of your faith,' confirms this view.

3. *The Incense-Offering.* [INCENSE.]

4. *The First-fruits.* [FIRST-FRUIT.]

5. *Firstlings.* [FIRST-BORN.]

6. *Tithes.* [TITHES.]

7. Money and materials for the erection of the tabernacle and temple, and for the repair of the latter. [TABERNACLE AND TEMPLE.] These were all *Korbanim* = gifts or offerings, presented unto God, and acceptable to him when offered with a willing mind.

*Oil* and *Salt* have not been separately mentioned, as they were never offered separately, but only as the accompaniments of other offerings. Salt was indispensable. 'Thou shalt offer salt with all thy offerings' (Lev. ii. 13).

III. THE HISTORY OF SACRIFICIAL WORSHIP demands some notice.

1. In the ANTE-MOSAIC PERIOD our materials for such an history are scanty. The first instance of sacrifice on record is that of Cain and Abel (Gen. iv. 3-5). Cain presented some of the fruits of the ground, Abel some of the firstlings of his flock and of the fat (חֵלֶב) thereof, an offering unto the Lord. Each is called a *Mincha* (מִנְחָה) = gift; but Abel's was a bloody, Cain's an unbloody offering. To what class of sacrifice Abel's offering belonged we are not informed. Most probably it was a burnt-offering. If so, we can understand how God's acceptance of it may have been expressed, viz., by fire from the Lord (Lev. ix. 24; Judg. vi. 21; 1 Kings xviii. 38; 2 Chron. vii. 1). There is no evidence in favour of a sin-offering. The מִנְחָה of verse 7 is not a sin-offering—although Faber and Magee, and others, contend for this meaning—but *sin*:—'If thou doest well,' i.e., as Abel,

'shalt thou not be accepted?' as well as he; 'but if thou doest not well, sin,' like a ravenous beast of prey, 'croucheth at the door,' ready to spring on thee and devour thee. 'And to thee is its desire,'—it desires thee for its victim, 'but thou mayest rule over it' (see Kalisch, *in loco*). Taking *Chalath* as a sin-offering in this place, converts the words into a direct encouragement of sin.

Until the time of Noah, we have no other instance of sacrifice; but Noah, after the flood, 'offered of every clean beast and of every clean fowl, a burnt-offering unto the Lord' (Gen. viii. 20), and God was well pleased (21). Abraham constantly built altars, but only on one occasion are we told what victims he offered, viz.—Gen. xv. 9, a heifer, a she-goat, and a ram, each three years old, a turtle-dove, and a young pigeon; and these constituted a burnt-offering (17). The virtual sacrifice of Isaac is wholly exceptional [ISAAC]; but it is a 'burnt-offering' which was indicated and designed (Gen. xxii. 2, 3, 6, 7). Jacob ratified his covenant with Laban by sacrifice:—'Sacrificed a זֶבַח on the mount,'

which seems to indicate a *peace-offering* (Gen. xxxi. 54). So in Exod. x. 21, which belongs to this period, Moses says to Pharaoh: 'Thou must give us sacrifices and burnt-offerings,' זֶבַחִים וְעֹלֹת, 'that we may offer them to Jehovah,' where the *zevachim*, as distinguished from the *'oloth*, seem to denote peace-offerings. So in Exod. xviii. 12, Jethro took a burnt-offering and זֶבַחִים, sacrifices. The book

of Job, which relates to patriarchal times, or rather to an extra-Israelitish sphere, presents us with the spectacle of that patriarch himself offering burnt-offerings for the sins of his children; and his three friends doing the same for their own sins, in not speaking of God the thing that was right (Job i. 5; xlii. 8). Thus it appears that in the ante-Mosaic period, only peace-offerings and burnt-offerings were sacrificed, but that to the latter an expiatory value was attached; i.e., it partook of the nature of a *sin-offering*. It must be added, that the drink-offering existed during this period, for we read that Jacob set up a pillar at Bethel, and 'poured a drink-offering, נֶסֶךְ, upon it,' as well as oil (Gen. xxxv. 14; see xxviii. 18).

The *Passover*, coming in between the ante-Mosaic and the Mosaic period, was of a wholly unique character, uniting the features of all the other sacrifices of the period it introduced; *ex. gr.*, the sprinkling of blood, as in the case of the sin-offering (Exod. xii. 7, 13); the roasting of the flesh ('roast with fire'), giving it the resemblance of the burnt-offering (8); and the feast upon the flesh, as in the peace-offering (8, 9). In this first observance of the *Passover*, the ancient priestly character of the heads of families comes into notice—a character henceforth to be restricted to the family of Aaron. [PASSOVER.]

2. The *Mosaic period* properly begins with the great sacrificial occasion recorded Exod. xxiv. 3-8, when Israel entered formally into covenant relationship with God, and 'offered burnt-offerings and sacrificed peace-offerings of oxen unto the Lord,' and Moses 'sprinkled the blood' upon the altar, the book of the covenant, and the people, saying, 'Behold the blood of the covenant which the Lord hath made with you concerning these words,' i. e., of the law which he had read to them, and to which they had professed adhesion

(see Heb. ix. 19). The offerings ordained by Moses were,—daily, weekly, monthly, and yearly.

1. *Daily* (morning and evening), the burnt-offering, meat-offering, and drink-offering, were presented (Exod. xxix. 38-42; Num. xxviii. 3-8), to which must be added the incense (Exod. xxx. 7, 8).

2. *Weekly*, which was a double burnt-offering and meat-offering (Num. xxviii. 9, 10), with the drink-offering and incense. To these the shew-bread must be added, which may be regarded as a species of meat-offering (Lev. xxiv. 5, 9). See SHEW-BREAD.

3. *Monthly*; a burnt-offering of two young bullocks, one ram, seven lambs, with a meat offering of three tenth-deals of fine flour, mingled with oil, for each bullock; two tenth-deals for the ram; and one tenth-deal for each lamb; and a drink-offering of half an hin of wine for each bullock; one-third for the ram; and one-fourth for each lamb; and a kid of the goats for a sin-offering, with its appropriate drink-offering (Num. xxviii. 11-15).

4. *Yearly*; at the Passover, Feast of Tabernacles, Pentecost, Feast of Trumpets, and on the great Day of Atonement; all of which see in their places.

To these were added sacrifices and offerings for special occasions:—

(1.) At the purification of women, Lev. xii. See PURIFICATION.

(2.) At the cleansing of lepers, Lev. xiv. 1-32. See LEPROSY.

(3.) At the completion of the Nazaritic vow, Num. vi. 9-21. See NAZARITE.

(4.) At the trial for jealousy, Num. v. 11-31. No sacrifice involving the shedding of blood was offered on this occasion, for if the woman was innocent, none was needed; if guilty, none could be accepted; for the suspected crime, if proved, was one for which no expiation was provided.

The Mosaic law allowed full scope for the offering of sacrifices to any amount by private individuals,—free-will offerings.

3. *The Post-Mosaic Period.*—Sacrifices in post-Mosaic times were but a continuation of the preceding. On special occasions, however, there were sacrifices offered on a large scale, *ex. gr.*, at the dedication of the temple by Solomon (1 Kings viii. 63); by Jehoiada after the death of Athaliah (2 Chron. xxiii. 18); and by Hezekiah at the restoration of the temple worship (2 Chron. xxx. 22-24); to which may be added the great passover kept by Josiah (2 Chron. xxxv. 11-19).

It is, however, fair to observe that, until the time of David, there had been much irregularity in the observance of the enactments of the law; and that during the period which elapsed between the ban laid upon Israel for their rebellion in the desert and their entering the promised land, there was an almost total suspension of sacrificial worship. To this dismal period, when Israel was under the ban of God, the prophet Amos refers (v. 25, 26): 'Did ye offer unto me sacrifices and offerings in the wilderness forty years, O house of Israel? Yea, ye bore the shrine of your king, and Chiun of your images, the star of your god which ye made for yourselves.' The sin charged upon Israel is, not mingling the service of Jehovah with the worship of idols, but abandoning the former for the latter, when they wandered as a horde of covenant-breakers in the wilderness, melting away under the

anathema of Jehovah. This view is sustained by Acts vii. 42, 43, where Stephen quotes the above words of Amos in proof of his own statement: 'God turned and gave them up to worship the host of heaven.' This cessation of sacrificial worship, judicially brought to pass as a punishment for their sin, accorded with their dismal reprobate condition at the time.

IV. The ORIGIN of sacrifice demands a few words. Divines are divided in opinion on this question; some (the orthodox generally) maintaining their *divine*, others their *human*, origin. Of this latter class, some think that the first kind of offerings consisted of vegetables and fruits, which degenerated at length into animal sacrifices; while others hold that sacrifices took their rise in the consciousness of sin and the felt need of an atonement existing in the human heart; and that, so originating, they, by and by, received the approbation of God, and were adopted into his worship. This view approaches to the very threshold of the orthodox belief. Great stress is laid by the first class of divines referred to, especially, upon those passages in the Psalms and the Prophets, where strong disapprobation of animal sacrifices seems to be expressed. But the reply is very simple: God had no delight in sacrifices for their own sake; and when brought as a substitute for obedience and piety, they were utterly abominable to him (Ps. l. 9, 14, 15; Is. i. 11-13); that when God brought his people out of Egypt, he specially and primarily enforced obedience, the ritual occupying a secondary place in his view (Jer. vii. 21, 22); that it is not the multiplication of external offerings which Jehovah requires, but true godliness, manifesting itself in the forms of justice, mercy, and humble communion with God (Micah vi. 6-8); the very soul of sacrifice being the spirit of obedience, self-surrender, and love. 'Hath the Lord as great delight in sacrifice as in obeying the voice of the Lord? Behold, to obey is better than sacrifice, and to hearken than the fat of rams' (1 Sam. xv. 22). In one passage David says—'Thou desirest not sacrifice,' etc., in reference to the fact, that the law had provided none for his sin (Ps. li. 16); but at the same time refers to sacrifice as being pleasing to God when expressive of, and embodying righteousness (19). Psalm xl. 6-8 demands a different interpretation, being simply prophetic, and looking forward to the abolition of animal sacrifices by the sacrifice of the Messiah (Heb. x. 5-10).

The argument for the divine origin of sacrifice may be stated thus. (a) Sacrifice has existed almost universally among men, which seems to indicate one source. (b) It has had such a wide-spread existence, although naturally repugnant to human feelings, viewed as the expression of worship towards God. To slaughter and shed the blood of an innocent creature as an act pleasing to the Divine Being, placating his wrath and conciliating his favour, seems absurd and profane. Such an act would rather appear to be displeasing and hateful to him. Once granting the divine origin of the rite of sacrifice, its fearful perversion is easily understood. (c) The adoption of the sacrificial rite into the worship of God by his command seems strongly in favour of its origin in his own appointment or suggestion. It is so hard to think otherwise, that the fact seems decisive. (d) Then the first sacrifice we read of was acceptable to God, which would scarcely have been the case had it originated

in the mere feeling or fancy of the worshipper. The non-acceptance of Cain's fruit-offering leads to the same conclusion. True, the main reasons of the different treatment of the brothers lay in their different dispositions; but did not this difference of disposition cause the difference in their offerings? (c) In Heb. xi. 4, Abel is said to have offered a *fuller* sacrifice (*πλεονα θυσιαν*) than Cain, because he offered *in faith*. His faith led him to offer the fuller sacrifice ascribed to him. But faith implies a divine revelation on the subject, or a divine warrant for the act; otherwise, there could have been no place for faith. However pious the intention, he would have acted on a mere peradventure, or baseless confidence, not certainly 'by faith.' For these and other reasons we regard the rite of sacrifice to have been of divine origin.

V. It remains now to inquire into the CONNECTION BETWEEN THE SACRIFICES OF THE O. T. AND THE GREAT SACRIFICE OF THE NEW. Sacrifice was a divine institute. It occupied a prominent place in the Mosaic law; yet it was not valued by God for its own sake. It was therefore designed to subserve some high ulterior purpose. Besides being, in part, a symbol of self-consecration to God, and of praise and prayer, it served to keep alive in the heart a sense of sin and of its damnable nature; to indicate the need of an atonement; to familiarise in the congregation of God the ideas of vicarious suffering, propitiation, and compensation due for the injury done by sin to God and his law. Sacrifice did also serve to remove various disabilities from the worshipper, and restore him, on various occasions, to his theocratic standing which he had forfeited by legal defilement or sin. Its powerlessness to take away sin was evinced by its repetition (Heb. x. 1, etc.). Its full significance, therefore, is not perceived till it is viewed in its TYPICAL reference to Christ, who came to 'put away sin by the sacrifice of himself.' This reference is distinctly unfolded in the N. T., especially in the Epistle to the Hebrews. The sin-offering, particularly, typified Christ, 'who was made sin, *ἀμαρτία*, for us' (2 Cor. v. 21); 'who bare our sins in his own body on the tree' (1 Pet. ii. 24); and who, having done so, appears 'holy, harmless, undefiled, and separate from sinners' (Heb. vii. 26); whose 'flesh is meat indeed,'—food for the holy priesthood (John vi. 55, 56). The trespass-offering typified Christ, who 'restored that which he took not away' (Ps. lxxix. 5), making compensation for the injury done by sin to God and his law. The burnt-offering had its fullest significance illustrated in Him, whose life was one continuous act of self-consecration to God, culminating, only, in his death. The peace-offering finds its full significance in Him who made peace through the blood of his cross, when God was in Christ reconciling the world unto himself; for while the death of Jesus was, in one aspect of it, a sin-offering condemning (Rom. viii. 3) and atoning for sin, in another aspect it was the expression of heaven's purposes of peace and good-will towards men. The fifty-third chapter of Isaiah is the bridge between the sacrifices of the law and the sacrifice of Christ; the Epistle to the Hebrews, the full exposition of the nature, relations, and bearings of both. T. in the New*; Winer's *Realwörterbuch*, *Opfer*; Dr. J. P. Smith's *Sacrifice and Priesthood of Christ*. For a full list of German works on the subject, see Kurtz.)—I. J.

OFFICER. This is the rendering in the A. V. of several Hebrew and Greek terms. 1. כֹּהֵן

(Gen. xxxvii. 36; xxxix. 1; xl. 2). The word usually designates a eunuch; and probably it ought always to be so understood. It is no valid objection to this that Potiphar had a wife; for eunuchs are not strangers to the sexual passion, and sometimes live in matrimony (Eccles. xx. 4; Mishna, Tr. *Jebamoth*, viii. 4; Juv. *Sat.* i. 22; Ter. *Eun.* iv. 3. 23; Chardin, *Voyages*, III. 397). 2. נֹטָר

part. of נָטַר, to cut, to grave, properly a *writer*;

Sept. γραμματεὺς, and, from the use of writing in judicial administration, a *magistrate* or *prefect*.

It is used of the officers who were set over the Israelites in Egypt (Exod. v. 6-19); of the officers who were appointed along with the elders to administer the public affairs of the Israelites (Num. xi. 16; Deut. xx. 5, 8, 9; xxix. 10; xxxi. 28; Josh. i. 10; iii. 2; viii. 33, etc.); of magistrates in the cities and towns of Palestine (Deut. xvi. 18; Sept. γραμματοεισαγγελεῖς; 1 Chron. xxiii. 4; xxvi. 29; 2 Chron. xix. 11; Prov. vi. 7 [A. V. *overseer*], etc.); and apparently also of a military chief (2 Chron. xxvi. 11 [A. V. *ruler*]). 3. נָצִיב

part. Niph. of נָצַב, to set or place, a *prefect* or

*director* (1 Kings iv. 5, 7; v. 30 [A. V. 16], ix. 23, etc.); and נָצִיב (1 Kings iv. 7, 19). 4.

רַב (Esth. i. 8; Dan. i. 3 [A. V. *master*]; Sept.

οὐκνόμενος. 5. פֶּקִיד from פָּקַד, to visit, Hiph. to

set over, an *overseer* or *magistrate* (Gen. xli. 34, Sept. τοπάρχας; Judg. ix. 28, Sept. ἐπισκοπος;

Esth. ii. 3, Sept. κωμάρχας; 2 Chron. xxiv. 11, Sept. προστάτης); and פֶּקִידָה, properly *office*, but

used collectively for a *body of officers* (Is. lx. 17; Sept. ἀρχοντας; also 2 Chron. xxiv. 11 [A. V.

*office*]; Sept. προστάτας). 6. עֲשֵׂי הַמְּלָכָה

'those who did the business,' marg. A. V., Sept. γραμματεῖς (Esth. ix. 3).

In the N. T. the words translated 'officer' are ὑπηρέτης and πράκτωρ. The former is a word of general signification, denoting one who renders service of any kind; it is used with the rendering 'officer' in the A. V. of a functionary whose duty it was to apprehend offenders, or to exact legal penalties from those who had incurred them (Matt. v. 25 [for which Luke uses πράκτωρ, xii. 58]; John vii. 32, 46; xviii. 3, 12; Acts v. 22). Josephus uses the word ὑπηρέτης of an officer two of whom being Levites were attached to each magistrate (*Antiq.* iv. 8. 14); but it is probable that these were rather clerks or assessors of the court than servants of the class above described. The πράκτωρ was properly the exactor of the penalty assigned by the judge, and so the word is correctly used by Luke (xii. 58). There were at Athens officers bearing this name, whose business it was to enact legal fines and forfeits (Hermann,

*Polit. Antiq. of Greece*, 151; cf. Kuinoel, *in loc.*, Luc. xii. 58). The officers (*οἱ ἀπὸ τῶν χρεῶν, οἱ ἐπὶ τ. χ.*) of king Demetrius mentioned 1 Macc. x. 41; xii. 45 [A. V. 'that have any charge']; xiii. 37, were tax-collectors appointed for a special service.—W. L. A.

OG (עוג, *giant*; Sept. Ὠγ), an Amoritish king of Bashan (Num. xxi. 33; xxxii. 33; Deut. iv. 47; xxxi. 4). In form he was a giant, so that his bedstead [or rather sarcophagus] was preserved as a memorial of his huge stature (Deut. iii. 11; Josh. xiii. 12). He was defeated by the Israelites under Moses (Num. xxi. 33; Deut. i. 4; iii. 3); and his country, which contained many walled cities (Deut. iii. 4-10), was assigned to the tribe of Manasseh (Deut. iii. 13; Josh. xiii. 30) [AMORITES; BASHAN; GIANTS; REPHAIM].

OIL, OINTMENT (שמן, from שָׁמַן, *to become fat*; יָצַתַר, from צָהַר, *to shine*; מִרְקָהֶת רֶקַח, from רֶקַח, *to season, to perfume*; מִשְׁחָה, from מָשַׁח, *to anoint*, properly *unction* or *anointing* [Exod. xxx. 25, 'make oil of holy anointing'=holy anointing oil]; Sept. ἔλαιον, μύρον, χρῆσμα, χρῆσις πύργης), was far more extensively used among the ancient Hebrews than in our northern climate. The use of oil is equally general throughout Western Asia at the present time, as it was in primitive ages. Oil was much used instead of butter and animal fat, at meals and in various preparations of food (see FOOD, and comp. Ezek. xvi. 13). In such uses oil, when fresh and sweet, is more agreeable than animal fat. The Orientals think so; and Europeans soon acquire the same preference. Oil was also in many cases taken as a meat-offering (Lev. v. 11; Num. v. 15); and it was then mixed with the meal of oblation (Exod. xxix. 40; Lev. ii. 4; vi. 21; vii. 12; Num. vi. 15) [OFFERING]. The rite of sprinkling with oil, as a libation, does not occur in the law, but seems to be alluded to in Micah vi. 7.

The application of oil to the person has been described in the article ANOINTING. Whether for luxury or ceremony, the head and beard were the parts usually anointed (Deut. xxviii. 40; 2 Sam. xiv. 2; Ps. xxiii. 5; xcii. 11; civ. 15; Luke vii. 46); and this use of oil became at length proverbially common among the Israelites (Prov. xxi. 17).

The employment of oil for burning has been illustrated in the article LAMPS. It is only necessary to add, that for this, and indeed for most other purposes, olive-oil was considered the best, and was therefore used in the lamps of the tabernacle. The custom of anointing the diseased and the dead has been noticed in the article ANOINTING; and for the use and composition of fragrant oils and ointments, see PERFUMES.

The numerous olive-plantations in Palestine made olive-oil one of the chief and one of the most lucrative products of the country: it supplied an article of extensive and profitable traffic with the Tyrians (Ezek. xxvii. 17; comp. 1 Kings v. 11); and presents of the finer sorts of olive-oil were deemed suitable for kings. There is in fact no other kind of oil distinctly mentioned in Scripture; and the best, middling, and inferior oils appear to have been merely different qualities of olive-oil. The berries of the olive-tree were sometimes plucked, or carefully shaken off by the

hand, before they were ripe (Deut. xxiv. 20; Is. xvii. 6; xxiv. 13). If while they were yet green, instead of being thrown into the press, they were only beaten or squeezed, they yielded the best kind of oil. It was called *Ophacinum*, or the oil of unripe olives, and also 'beaten' or 'fresh oil' (Exod. xxvii. 20). There were presses of a peculiar kind for preparing oil called שֶׁמֶן גֶּת, *gath-shemen* (whence the name Gethsemane, or 'oil-press,' Matt. xxvi. 36; John xviii. 1), in which the oil was trodden out by the feet (Micah vi. 15). The first expression of the oil was better than the second, and the second than the third. Ripe olives yielded the least valuable kind of oil, but the quantity was more abundant. The best sort of oil was prepared with fragrant spices, and was used in anointing; the inferior sorts were used with food and for lamps.

OIL TREE. [ETZ-SHEMEN.]

OLD TESTAMENT. [TESTAMENT.]

OLIVE-TREE. [ZAIT.]

OLIVE-TREE, WILD. [AGRIELAIA.]

OLIVES, MOUNT OF, and OLIVET (הַר הַזַּיִתִּים; LXX. and N. T., τὸ ὄρος τῶν ἐλαίων; but in Luke xix. 29, τὸ ὄρος τὸ καλούμενον ἐλαῖον; and Acts i. 12, ἐλαῖνος [*Olivet*]; *mons olivæum*), the well-known hill, or rather ridge, on the east side of Jerusalem, separated from the city by the Kidron valley.

The name 'Mount of Olives' occurs only once in the O. T. (Zech. xiv. 4); but the hill is clearly alluded to in five other passages. In 2 Sam. xv. 30 we read that David, in fleeing from Jerusalem during Absalom's rebellion, 'went up by the ascent of the Olives' (בְּמַעְלֵה הַזַּיִתִּים), unquestionably the western side of the mount, up which he had to go 'toward the way of the wilderness' (ver. 23). In 1 Kings xi. 7 it is recorded that Solomon built 'an high place for Chemosh in the hill that is before

Jerusalem.' This is an accurate description of the position of Olivet—facing the holy city, visible from every part of it. The same hill is called in 2 Kings xxiii. 13, 'The Mount of Corruption' (הַר הַמְּשָׁחִיתָה), doubtless from the idolatrous rites established by Solomon and practised there. In Neh. viii. 15 Olivet is called emphatically 'the Mount' (הַהָר)—'Go forth into the mount, and fetch olive-branches,' etc. Ezekiel mentions it as the mountain which is on the east side (מִקְדָּם) of the city. Olivet covers the whole eastern side of Jerusalem, shutting out all view of the country beyond. These are the only direct allusions to Olivet in the O. T.

In the N. T. its ordinary name is 'The Mount of Olives,' τὸ ὄρος τῶν ἐλαίων, which may be regarded as a descriptive appellation—the mount on which the olives grew (Matt. xxi. 1; xxiv. 3; xxvi. 30; Mark xi. 1; Luke xix. 37; John viii. 1). But Luke in three passages gives it a distinct proper name—'And it came to pass, when he was come nigh to Bethphage and Bethany, at the mount called *Elaion*'—πρὸς τὸ ὄρος τὸ καλούμενον Ἐλαῖον; not, as in the A. V., 'the Mount of Olives.' The word is Ἐλαῖον, the nom. sing., and not ἐλαῖων, the gen. pl. of ἐλαία (see Alford, Tischendorf, Lachmann, etc., *ad loc.*), in which case it would have the article (xix. 29; cf. ver. 37; xxi. 37;

xxii. 39). In Acts i. 12 Luke again employs it in the gen. sing.—‘Then returned they unto Jerusalem from the mount called Olivet,’ ἀπὸ ὄρους τοῦ καλουμένου Ἐλαιῶνος (‘called Elaion’). In Josephus also we read διὰ τοῦ Ἐλαιῶνος ὄρους (*Antiq.* vii. 9. 2; cf. xx. 8. 6; *Bell. Jud.* v. 2. 3), showing that in his time *Elaion* was the ordinary name given to the mount.

The rabbins called Olivet ‘The Mount of Anointing’ (הַר הַמִּשְׁחָה); Mishna, *Para*, iii. 6; Reland, *Pal.*, p. 337; and Jarchi, in his note on 2 Kings xxiii. 13, says this was its usual name; but that the sacred writers changed it to ‘Mount of Corruption’ (הַר הַמִּשְׁחָה) by a play upon the word, and to denote its defilement by the idolatrous rites of Solomon. The name מִשְׁחָה is closely allied in sense to *Olivet*—the latter referring to the oil-producing tree, the former to the anointing with its oil (*Lightfoot, Opera*, ii. 200).

At present the hill has two names, *Jebel et-Târ*, (جبل الطور), which may be regarded as equivalent to the expression ‘the Mount’ (הַהָר) in Neh. viii. 15. This is the name almost universally given to it by the Mohammedan residents in Jerusalem. The Christians and Jews seem to prefer the Scripture name *Jebel ez-Zeitûn* (جبل الزيتون), ‘Mount of Olives.’

*Physical Features.*—The Mount of Olives lies on the east side of Jerusalem, and intercepts all view of the wilderness of Judea and the Jordan valley. It is separated from the city by the deep and narrow glen of the Kidron. Its appearance as first seen sadly disappoints the Bible student. Properly speaking it is not a hill. It is only one of a multitude of rounded crowns that form the summit of the broad mountain-ridge which runs longitudinally through Central Palestine. Zion, Moriah, Scopus, Gibeath, Ramah, and Mizpeh, are others like Olivet. These bare rocky crowns encircle the Holy City—Olivet being the highest and most conspicuous in the immediate vicinity.

Approaching the city from the west, along the Joppa road, a low ridge is seen beyond it, barely overtopping the massive castle of David, and the higher buildings on Zion. It droops toward the right, revealing the pale blue mountains of Moab in the distant background; and it runs away to the left until it appears to join other ridges. It has no striking features. It is rounded and regular in form, and almost entirely colourless. The air is so transparent, too, that it appears to rise immediately out of the city. Looking from the western wall of Zion, or from the ramparts of the castle, one would suppose there was no intervening valley. In the distance its top is almost horizontal; a nearer view makes it wavy; and at length, on approaching it, three summits, or eminences, can be distinguished. The central and highest is crowned with the dome and minaret of the Church of the Ascension; and the other two equi-distant to the right and left, and of nearly equal altitude. Photographs show these features as they meet the eye, and consequently appear somewhat flat and uninteresting; but in every sketch and painting the writer has seen, the imagination of the artist has greatly increased both the apparent distance of Olivet from the city, and its elevation; thus sacrificing truth to beauty and effect.

The best view of the mount is obtained from the

north-east angle of the city wall. There a rocky platform, some fifty yards wide, runs along the wall, overhanging the dusky and venerable olive-groves which partly fill up the bottom of the Kidron, a hundred feet below. From the bottom of the glen rises the side of Olivet, in gray terraced slopes, and white limestone crags, to a height of about six hundred feet. Farther south, opposite the Haram, the Kidron contracts so as barely to leave room for a torrent bed. Its general course is from north to south; but it winds considerably, so that the roots of the opposite hills—Moriah and Olivet—overlap. About three-quarters of a mile south of the Haram area, the Kidron turns eastward, and there the ridge of Olivet terminates; but that part of the ridge to which the name properly belongs scarcely extends so far. The lower road to Bethany crosses it in the parallel of the village of Silwân [SILOAM], where there is a considerable depression. The section of the ridge south of that road appears in some aspects as a distinct hill, having a low rounded top, and descending in broken cliffs into the Kidron. This is now called by travellers ‘The Mount of Corruption,’ and by natives, *Jebel Baten el-Harwa*.

From the Church of the Ascension, which is the central point of Olivet, the ridge runs due north for about a mile, and then sweeps to the west round a bend of the Kidron. At the elbow it is crossed by the road from Anathoth; and the part west of this road is most probably the *Scopus* of Josephus (*Bell. Jud.* v. 2. 3).

The eastern limits of Olivet are not so easily defined. It forms the brow of the mountain-chain; and from its top there is an uninterrupted, though irregular, descent to the Jordan valley—a descent of about 3700 feet in a distance of ten miles. The eastern declivity of Olivet thus shades gradually off into the wilderness of Judea. There is no dividing-line; and from the east ‘The Mount’ appears as one of the crowns of the mountain-range. We may assume Bethany, however, as the historical, if not the strictly physical, limit of Olivet in this direction; though the slope below the village is quite as great as that above it.

A few measurements and elevations will now most satisfactorily exhibit the position and features of Olivet. Its central and highest point—the Church of the Ascension—is due east of the Great Mosque, the site of the Temple, and it is 1035 yards distant from it. This shows the exact distance and relative positions of the summits of Moriah and Olivet. From the mosque on the crown of Moriah to the Haram wall on its eastern brow is 200 yards; from the wall to the western base of Olivet, in the bottom of the Kidron, is 165 yards; from the bottom of the Kidron to the Church of the Ascension, 670 yards; from the Church to the assumed eastern base of ‘The Mount,’ in the line of Bethany,\* 1200 yards. The measurements are horizontal. The relative elevations are as follows:—

Height of Olivet above Bethany . . .	921 ft.
Do. do. Bed of the Kidron . . .	560 „
Do. do. Moriah . . .	295 „
Do. do. N. W. angle of the city . . .	114 „ †

\* Bethany itself is 2000 yards distant from the Church of the Ascension, toward the south-east.

† The elevations of the chief points about Jeru-

About 500 yards north of the Church of the Ascension is the eminence, or summit, called by monks and travellers *Viri Galilæi*; it is only a few feet lower than the church. At about an equal distance southward is the third summit, not quite so lofty; and from this latter to the culminating point of the Mount of Offence is 1000 yards, south by west. The elevation of the Mount of Offence has not been ascertained, but it appears to be at least 150 feet lower than Olivet.

The outline of Olivet is uniform. The curves are unbroken. Its western face has regular declivities of whitish soil, composed of disintegrated limestone, interrupted here and there by large rocky crowns, long ledges, and rude terrace walls. There is no grandeur, no picturesque ruggedness, no soft beauty; and the aspect, especially in summer and autumn, is singularly bleak. In early spring, the painful bareness is in some measure relieved by the colouring—green corn, brilliant wild-flowers, the soft gray tint of the olive leaves, and the dark foliage of the fig. The effect of this combination of colours is very strange; there is nothing like it in this country. It has been caught with an artist's eye, and represented with an artist's genius, in the beautiful picture of Seddon, and also in some of Holman Hunt's charming sketches. The whole hill-side is rudely cultivated in little terraced strips of wheat and barley; with here and there some straggling vines trailing along the ground, or hanging over the ledges and terrace walls. Fig-trees are abundant, but olives are still, as they were in our Lord's days, the prevailing trees. The mount has as good a title now as perhaps it ever had to the name Olivet. Olive-trees dot it all over; in some places far apart, in others close together, though nowhere so close as to form groves. Most of them are old, gnarled, and stunted; a few are propped up and in the last stage of decay; but scarcely any young vigorous trees are met with. The base of the hill along the Kidron is more rugged than any other part of the western side. At and near the village of Silwân are precipices of rock from twenty to thirty feet high, which continue at intervals round the Mount of Corruption. These cliffs are studded with excavated tombs; and in Silwân, and northward, some of them are hewn into chaste façades and detached monuments. The hill-side is here covered also with the tombstones of the modern Jewish cemetery. It is the favourite burial-place of the children of Abraham, and the spot where they believe the final judgment will take place.

With the exception of Silwân at its western base, Bethany at its eastern, and Kefr et-Tûr on its summit, Olivet is deserted. No man dwells there. There are three or four little towers—one habitable, the others ruinous—built originally as watch-towers for the vineyards and orchards. Nearly

opposite St. Stephen's gate, just across the bed of the Kidron, is the garden of Gethsemane, and from it a shallow wady, or rather depression, runs up the hill toward the Church of the Ascension, making a slight curve northward. This is the only noticeable feature on the western side. The eastern is much more rugged. The ledges are higher, the cliffs bolder, and there are several deep ravines.

Two ancient roads, or rather bridle-paths, cross the mount to Bethany. From St. Stephen's gate—the only gate in the eastern side of Jerusalem—a road winds down to the Kidron, crosses it by a bridge, and then forks at Gethsemane. One branch keeps to the right, ascends the hill diagonally by an easy slope, winds round its southern shoulder, and descends to Bethany. This was the caravan and chariot road to Jericho in ancient days. The other branch keeps to the left of Gethsemane, right up the hill, following the course of the wady, passes Kefr et-Tûr, and descends by steep zig-zags to Bethany. Perhaps this path is even more ancient than the other. It is in places hewn in the rock; and here and there are rude steps up shelving ledges.

There are several other paths on Olivet, but they are of no historical importance, and require only to be mentioned as features in its topography. A path branches off from No. 2 at the side of Gethsemane, skirts the upper wall of the garden, ascends to the tombs of the prophets, and then turns to the left, up to the village. Another branches off a little higher up, and ascends the steep hill-side, almost direct to the village. Another, leading from St. Stephen's Gate, crosses the Kidron obliquely in a north-easterly direction, and passes over the northern shoulder of the mount to the little hamlet of Isawiyeh. Another path—ancient, though now little used—runs from Kefr et-Tûr northward along the summit of the ridge to Scopus, joining the road to Anathoth.

*Historical Notices.*—The first mention of Olivet is in connection with David's flight from Jerusalem on the rebellion of Absalom. Leaving the city, 'he

passed over the valley (נַחַל) of Kidron, toward the way of the wilderness' (2 Sam. xv. 23)—the wilderness of Judah lying between Olivet and the Jordan. Having crossed the Kidron, 'he ascended by the ascent of the Olives' (30), and came to the summit, 'where he worshipped God' (32). It has been supposed from the latter statement that there was here, on the top, an ancient *high place*, where David had been accustomed to worship; and that this may have been the source and scene of all subsequent idolatrous rites and Christian traditions. The Hebrew phrase does not warrant any such conclusion. The scope of the passage suggests, that on reaching the summit he turned to take a last look at the city, to which he had just sent back the ark, and on some of whose heights he probably still saw it. There, with his face toward the sanctuary, he worshipped God (cf. Theodoret and Jerome *ad. loc.*) This is the view of most Jewish commentators, though the Talmudists state that there was an idol shrine on the summit (Lightfoot, *Opp.* ii. 570). David's route is manifest. He ascended by the ancient path (No. 2) to the top; there he worshipped, with the city in full view. Turning away, he began to descend; and there, 'a little past the top' (xvi. 1), he met Ziba.

saalem, above the sea, are thus given by Van de Velde from the best authorities (*Memoir*, p. 179):—

Highest point of city, N. W. angle . . .	2,610
Mount Zion, <i>Canaculum</i> . . .	2,537
Mount Moriah . . .	2,429
Pool of Siloam . . .	2,114
Mount of Olives . . .	2,724
Kidron Bridge at Gethsemane . . .	2,281
Kidron at Bîr Eyûb . . .	1,996
Bethany . . .	1,803

The next notice is in the time of Solomon, who built 'an high place for Chemosh, the abomination of Moab, *in the hill that is before Jerusalem*: and for Molech' (1 Kings xi. 7). The hill was Olivet; but the locality of the high place is not specified. Statements made at a later period show that it could not have been upon the summit. 'The high places that were before Jerusalem, *which were on the right hand of the Mount of Corruption*, which Solomon the king of Israel had builded . . . did the king (Manasseh) defile' (2 Kings xxiii. 13). The stand-point of observation and description here is the Holy City, which formerly extended much farther south than at present. Solomon's high place was *in front of it*, within view, and *on the right hand of Olivet*. This indicates the southern section of the ridge, the traditional 'Mount of Corruption.' There was probably some connection between the high place of Molech on the right hand of Olivet and those idol shrines which stood in Tophet, at the entrance of the valley of Hinnom (cf. 2 Kings xxiii. 13, 14; Jer. vii. 31, *seq.*; Jerome, *Comm.* in loc.) The Mount of Corruption is directly opposite Tophet, and the hill-side is filled with ancient tombs, as Jeremiah predicted (xix. 6, 11). The tradition which gives its name to the Mount of Corruption is first mentioned in the 13th century by Brocardus:—'*Ultra torrentem Cedron, in latere aquilonari montis Oliveti, est mons alius altus, quatuor stadiis a Jerusalem distans, ubi Salomon idolo Moabitorum, nomine Chamos, templum construxit, et ubi tempore Machabæorum ædificatum fuit castrum, cujus indicia adhuc hodie ibi cernuntur*' (cap. ix.)

Ezekiel also mentions Olivet in the wondrous vision of the Lord's departure from Jerusalem. The glory of the Lord first left the sanctuary and stood on the threshold of the house (x. 4); then it removed to a position over the east gate of the Lord's house (19); then it went up, 'and stood upon the mountain, *which is upon the east side of the city*' (xi. 23), that is, on Olivet. This is doubtless the source of the Rabbinical tradition, which represents the Shekinah as having remained three years and a half on Olivet, calling to the Jews, 'Return to me, and I will return to you' (Reland, *Pal.* p. 337).

The reference to Olivet in Neh. viii. 15 shows that the mount, and probably the valley at its base, abounded in groves of various kinds of trees—'Go forth *unto the mount*, and fetch olive branches, and pine branches, and myrtle branches, and palm branches, and branches of thick trees, to make booths.' In the days of our Lord, the trees were still very numerous (Mark xi. 8). The palms, pines, and myrtles are now all gone; and, with the exception of olives and figs, no trees are found on Olivet.

The only other mention of Olivet in the O. T. is in Zechariah's prophecy of the destruction of Jerusalem, and the preservation of God's people in it. He says of the Messiah, 'His feet shall stand in that day upon the Mount of Olives, which is before Jerusalem, on the east' (xiv. 4).

But it is mainly from its connection with N. T. history that Olivet has so strong a claim upon the attention and affections of the Christian student. During the periods of our Lord's ministry in Jerusalem, the mount appears to have been his home. As poor pilgrims were then, and still are accustomed to bivouac or encamp in the open fields, so

Jesus passed his nights amid the groves of Olivet. He did so partly, perhaps, that he might enjoy privacy; partly to escape the ceaseless and bitter persecution of the Jews; and partly through necessity. It looks as if a practical illustration of his own touching statement, 'The foxes have holes, and the birds of the air nests, but the Son of Man hath not where to lay his head' (Matt. viii. 20; John viii. 1; Luke xxviii. 27).

The Mount of Olives was the scene of four events, among the most remarkable in the history of our Lord.

(1.) *The Triumphal Entry*.—Its scene was the road—doubtless the ancient caravan road—which winds round the southern shoulder of the hill from Bethany to Jerusalem. A short distance from Bethany the road meets a deep ravine, which comes down from the top of Olivet on the right, and winds away to the wilderness on the left. From this point the tops of the buildings on Zion are seen, but all the rest of the city is hid. And just opposite this point, on the other side of the ravine, are the remains of an ancient village—cisterns, hewn stones, and scarped rocks. The road turns sharply to the right, descends obliquely to the bottom, then turns to the left, ascends and reaches the top of the opposite bank a short distance above the ruins. This then appears to be the spot, 'at the Mount of Olives,' where Jesus said to the two disciples, 'Go into the village *which is opposite you* (*ἡν ἀπέναντι ὑμῶν*), and immediately ye shall find an ass tied, and a colt with her; having loosed bring them to me' (Matt. xxi. 2). These active footmen could cross the ravine direct in a minute or two, while the great procession would take some time to wind round the road. The people of the village saw the procession; they knew its cause, and they were thus prepared to give the ass to the disciples the moment they heard, 'The Lord hath need of him.' The disciples took the ass, led it up to the road, and met Jesus. The procession advanced up the easy eastern slope. It gained the crown of the ridge, where 'the descent of the Mount of Olives' begins, and where Jerusalem, in its full extent and beauty, suddenly bursts upon the view; and then the multitude, excited by the noble prospect, and the fame of him whom they conducted, burst forth in joyous acclamation, 'Hosanna! Blessed is he that cometh in the name of the Lord: blessed be the kingdom of our father David' (Mark xi. 10). The Pharisees were offended, and said, 'Master, rebuke thy disciples. He answered, I tell you, that if these should hold their peace, the stones would immediately cry out' (Luke xix. 39, 40). The hill-side is there covered with rugged crowns of rock. The procession advanced, descending obliquely. 'And when he came near'—to a point nearly opposite the temple—'he beheld the city, and wept over it,' giving utterance to those words so well known, and of such deep import. The splendid buildings of the temple were then in full view, a little below the level of the eye, and not more than 600 yards distant. Beyond them Zion appeared crowned with Herod's palace, and the lofty towers of the wall and citadel. Looking on so much splendour and beauty, and looking onward to future desolation, what wonder that Divine compassion manifested itself in tears!

(2.) From a commanding point on the western side of Olivet, Jesus predicted the temple's final overthrow. He had paid his last visit to the

temple. When passing out, the disciples said, 'Master, see what manner of stones, and what buildings are here!' (Mark xiii. 1). They had probably heard some word fall from his lips which excited their alarm, and they thus tried to awaken in him a deeper interest in their holy temple. He replied—'Seest thou these great buildings? there shall not be left one stone upon another that shall not be thrown down' (ver. 2). He passed on over the Kidron; took the lower road to Bethany, which led him up to a spot 'on the Mount of Olives over against the temple' (3); and there, with the temple, its stately courts, and the colossal magnitude of its outer battlements before him, he predicted its final ruin, summing up with the words, 'This generation shall not pass till all these things be done. Heaven and earth shall pass away, but my words shall not pass away.' The whole discourse in Mark xiii. was spoken on that spot (cf. Matt. xxiv.; Luke xxi.)

(3.) After the institution of the Supper, 'when they had sung an hymn,' our Lord led his disciples 'over the brook Cedron,' 'out into the Mount of Olives,' to a garden called Gethsemane (John xviii. 1; Matt. xxvi. 30, 36). That was the scene of the *agony* and the *betrayal*. [GETHSEMANE.]

(4.) The *Ascension* was the most wondrous of all the events of which Olivet was the scene. Luke records it at the close of his gospel history, and the beginning of his apostolic history. In the first record Olivet is not mentioned. Jesus led his disciples out *ὡς εἰς Βηθανίαν*, 'as far as to Bethany.' In the second record the reader is referred back to the former. The narrative opens abruptly at the spot to which he had led his disciples, as indicated in the gospel. A fuller account of his last words is given; and after the ascension, the writer adds, 'Then returned they unto Jerusalem, from the mount called Olivet, which is from Jerusalem a Sabbath-day's journey' (Luke xxiv. 50-53; Acts i. 9-12).

Considerable difficulty has been felt in reconciling the topographical notices in these passages; and still more in attempting to bring them into harmony with the traditional scene of the ascension on the summit of Olivet. The difficulties are as follows:—(1.) In Luke Christ is said to have led his disciples 'as far as to Bethany,' where he ascended. (2.) In Acts the return from the scene of the ascension is described as *from Olivet*, which is a *Sabbath-day's journey from Jerusalem*. (3.) A Sabbath-day's journey was, according to the Talmud, 2000 cubits, about  $7\frac{1}{2}$  stadia (Lightfoot, *Hor. Heb. in Luc.* xxiv. 50). (4.) Bethany was fifteen stadia distant from Jerusalem (John xi. 18). Lightfoot in one place explains these apparent discrepancies by stating that the ascension took place at Bethany; that the disciples returned over Olivet; and that the Sabbath-day's journey refers to the distance of that mount from the city (*Comment. in Act. i.* 12). But in a later work he gives a totally different explanation. He says that by Bethany is meant a *district*, and not the village; that district included a large section of Olivet; and its border, where the ascension took place, was a Sabbath-day's journey from Jerusalem (*Hor. Heb. ut supra*). Lightfoot's opinion, therefore, is not of much critical value (see, however, Robinson, *Bibliotheca Sacra*, i. 178; Williams' *Holy City*, ii. 440 and 611, 2d ed.)

A careful consideration of the passage in Acts i. 12 shows that it cannot affect in one way or another the direct statement made in Luke regarding

the scene of the ascension, because—(1.) Bethany was upon the Mount of Olives; therefore the expressions, 'He led them out as far as to Bethany,' and 'they returned from the mount called Olivet,' indicate the same spot. (2.) It is not certain whether the 'Sabbath-day's journey' is intended to describe the distance of the mount, or of the exact scene of the ascension. (3.) Suppose it did refer to the latter, still it would not necessarily militate against the statement in Luke that Bethany was the place, because the exact length of a Sabbath-day's journey is uncertain—some say 2000 cubits, or nearly one Roman mile; others 2000 Roman paces, or two miles: and moreover, the point from which the measurement commences is unknown—some say from the city wall; others from the outer limit of the suburb Bethphage, a mile beyond the wall (see Lightfoot, *l.c.*; Wieseler; also Barclay, who gives important measurements, *City of Great King*, p. 59). On the other hand the statement in Luke is explicit *ὡς εἰς Βηθανίαν*. There is nothing here to limit it; and in all other places Bethany means the village (Meyer; Lechler on *Acts*; Lange; Alford; Ebrard). The ascension appears to have been witnessed by the disciples alone. It was not *in* Bethany, nor was it on such a conspicuous place as the summit of Olivet. The writer carefully examined the whole region. He saw one spot, as far from Jerusalem as Bethany, near the village, but concealed by an intervening cliff; and this he thought, in all probability, the real scene. The disciples, led by Jesus, would reach it by the path over the top of Olivet, and they would naturally return to the city by the same route (*Handbook*, 102, *seq.*)

Since the days of Eusebius the summit of Olivet has been the traditional scene of the ascension. As this fact has been questioned (Stanley, *S. and P.*, p. 447), it is well to quote his words . . . ἐνθα τοῖς ἐαυτοῦ μαθηταῖς ἐπὶ τῆς ἀκρωτέρας τοῦ τῶν ἐλαιῶν ὄρους τὰ περὶ τῆς συντελείας μυστήρια παραδεικνύτος, ἐντεῦθεν τε τὸν εἰς οὐρανὸς ἄνοδον πεποιημένον (*Demonstr. Evang.* vi. 18; cf. *Vit. Const.* iii. 41). In honour of the event the Empress Helena built a church on the spot (*Vit. Const.* iii. 43). Since that time the tradition has been almost universally received (Baronius, *Annales*, A.D. 34; Reland, *Pal.* 337); but the statement of Luke is fatal to it—'He led them out as far as to Bethany,' and Bethany is nearly a mile beyond the summit of the mount. The tradition has still, however, a number of devoted adherents, whose arguments are worthy of careful consideration (Williams, *Holy City*, ii. 440, 609; Ellicott, *Life of our Lord*, 413). The spot is just about 850 yards from the present city wall. The church of Helena has long since disappeared, and a mosque has taken its place. In the centre of an open court beside it is a little domed building covering a rock, on which is the supposed impress of Christ's foot, where he last touched the earth. Formerly, tradition affirms there were two footmarks, but the Mohammedans stole one of them, and put it in the Mosque el-Aksa (Williams, *H. C.* ii. 445; Stanley, *S. and P.* 447; Maundrell, under April 7).

Olivet is thickly studded with *holy places*, located by the superstitions of former ages, and preserved by tradition. A long list of them will be found in Quaresmius and Doubdan (*Voyage*). Only two or three of them have even a shadow of claim to be real; while most of them are absurd. One or two

may be mentioned as features in the topography. The northern summit of the mount, now called *Karem es-Seiyâd*, has attached to it a singular tradition. Here, some say, the two angels appeared after the ascension, and said to the apostles, 'Ye men of Galilee, why stand ye gazing up to heaven?' Hence the name given to the spot by monks and pilgrims, *Viri Galilei* (Maundrell, April 7). An older tradition, however, locates the station of the angels in or beside the Church of the Ascension (Radzivil, *Peregrin.* p. 75; Willibald, *Early Travels*, p. 19). Others say the name *Galilæa* is derived from the fact that this is that mountain in Galilee where our Lord instructed his disciples to meet him (Saewulf, in *Early Travels*, p. 42; Reland, *Pal.*, p. 338). The summit is now crowned by a confused heap of ruins, encompassed by vineyards; hence its modern name, 'The Sportsman's Vineyard.'

Three hundred yards south-west of the Church of the Ascension, on the declivity of the hill, is a large catacomb or group of caves, called 'The Tombs of the Prophets.' Some suppose this to be 'the rock Peristerein,' mentioned by Josephus as one of the points to which Titus's wall was carried (*Bell. Jud.* v. 12. 2; Schultz, p. 72). The catacomb is fully described in Nugent's *Lands, Classical and Sacred* (ii. 73), and in Tobler's *Oelberg* (p. 250; see also *Handbook*, 147).

The *Tomb and Chapel of the Virgin*, at the western base of Olivet, a few yards north of Gethsemane, is one of the most picturesque buildings around Jerusalem. Its façade is deep down in a sunk court, and admits by a spacious door to a flight of sixty steps, leading down to a dark, rock-hewn chapel. At its eastern end is a smaller chapel containing the reputed tomb of the Virgin; on the south are shown the tombs of Joachim and Anna her parents; and on the north, that of Joseph her husband. The tradition attached to this grotto is comparatively recent. It is not mentioned during the first six centuries (Quaresmius, ii. 244, seq.) John of Damascus is the first who speaks of it (*Lib. c.*); and it is also mentioned by Willibald (*Early Travels*, p. 19), and most travellers and pilgrims after the 8th century (Williams *H. C.*, ii. 435).

Descriptions of the physical features of Olivet are given by Stanley (*S. and P.*), Barclay (*City of the Great King*), Robinson (*B. R.* i. 235, 274, seq.), and Bartlett (*Walks*, 94, seq., and *Jerusalem Revisited*, 114, seq. His illustrations are very beautiful). Ecclesiastical traditions and historical notices will be found in Quaresmius (*Elucidatio Ter. San.* ii.), Geramb (*Pilgrimage*, i. 210, seq.), Williams (*Holy City*, ii.), and especially Tobler *Siloahquelle und Oelberg*. The Rabbinical traditions are given in Lightfoot (*Opera*, ii. 201), Reland (*Pal.* 337), Stanley (*S. and P.* 183), and Barclay (p. 61, seq.) Most of the places mentioned in this article are laid down with great accuracy in Mr. Johnston's beautiful map of *Jerusalem*, in the second volume of this work.—J. L. P.

OLIVEYRA, SALOMON DI, a distinguished Hebrew poet and grammarian, and chief Rabbi of the Portuguese Jews in Amsterdam, was born circa 1640. He mastered the Hebrew language and wrote synagogal poetry when very young; which together with his extensive learning secured for him a high position in the community. He first succeeded

Moses Raphael de Aguilar as teacher in the *Kether Tora* (כתר תורה), and was elected in 1674 to the dignity of *Chacham* in the institution denominated

*Gemiluth Chassadim* (גמילות חסדים), where he delivered expositions on the Pentateuch between 1674 and 1678, and on the historic and poetic books between 1678 and 1682. He then founded a Rabbinic college, of which he became the president, March 1693, and laboured most industriously and successfully to advance the cause of Hebrew philology. His grammatical and lexicographical contributions are as follow:—(1.) A treatise on the Hebrew accents, entitled *טעמי השעמים*, *The Reasons for the Accents*, in which he discourses especially on the poetical accents of Job, Proverbs, and the Psalms, published with the Pentateuch and the Haphtaroth, Amsterdam 1665; then again, *ibid.*, 1670, 1689, and 1732. (2.) A lexicon on Hebrew

assonance, entitled *שרשת נבלת*, *A Chain of Terminations*, Amsterdam 1665. (3.) A treatise on

Hebrew rhetoric, called *אילת אהבים*, *The Lovely Hind*, Amsterdam 1665. (4.) A Hebrew Chaldaic and Portuguese lexicon, called *עץ חיים*, *The Tree of Life*, Amsterdam 1682. (5.) A Portuguese and Hebrew vocabulary, called

*אילן שענפיו*, *אורבין*, *A Tree with many Branches*, with additions to the preceding work, Amsterdam 1683. (6.) A Portuguese translation of the words which frequently occur in the Mishna and Gemara, and of the technical expressions, entitled *זית רענן*, *The Green Olive*, Amsterdam 1683. And (7.) *Livro da Grammatica Hebrayca e Chaldayca*, entitled *יד לשון*, *A manual to the Language*, and

*דל שפתים*, *Door of the Lips*, Amsterdam 1688. Oliveyra died in May 1708 (comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2379-2383; Fürst, *Bibliotheca Judaica*, iii. 46, etc.; Frankel, *Monatschrift für Geschichte und Wissenschaft des Judenthums*, Breslau 1861, vol. x., p. 432-436).—C. D. G.

OLSHAUSEN, HERMANN, was born at Odesloe, where his father was pastor, 21st August 1796. Having finished his preparatory studies at the universities of Kiel and Berlin, he became in 1820 a privat-docent in the latter, and in 1821 was appointed an extraordinary and in 1827 an ordinary professor of theology at Königsberg. Here he remained, enjoying a great reputation as an academic teacher, till 1834, when he removed to Erlangen, chiefly on account of his health. The change proved slightly beneficial, but he never recovered full health, and after five years more of work, he expired 4th September 1839. His works are—*Historia Eccles. Vet. monumenta præcipua*, Berlin 1826; *Die Aechtheit der vier Kanon. Evangelien*, Königsb. 1823; *Ein Wort üb. tiefern Schriftsinne*, 1824; *Die Bibl. Schriftauslegung*, 1825; *Bibl. Commentar üb. Sämmtlichen Schriften des N. T.*, 4 bde. 1830-1844. The last volume of this work was published after the author's death; it is imperfect, and only brings the commentary down to the end of 2 Thessalonians. The work has been completed by Weisinger and Ebrard, and has been translated into English as part of Clark's Foreign Theological Library, 9 vols. 8vo, 1847-51. It is highly esteemed for its happy union of grammatico-historical exegesis, with spiritual insight into the

meaning of the sacred writers, and a deep sympathy with them. [COMMENTARY.]—W. L. A.

OLYMPAS (Ὀλυμπᾶς), a Christian at Rome, whom Paul salutes in his Epistle to the Romans (Rom. xvi. 15).

OLYMPIODORUS, a Greek monk, said also to have been deacon of the church at Alexandria, flourished in the 7th century. He wrote a commentary on Ecclesiastes, which is printed in the *Auctarium Patr. Duceanrum*, Tom. II. p. 602, and in the *Bibl. Max. Patrum*, xviii. 490. His Notes on Job are included in the *Catena* of Nicetas on that book, Lond. 1637, fol.; and his Notes on Jeremiah in the *Catena Ghisleriana*.—W. L. A.

OMAR (أُمّار; Sept. Ὀμάρ), one of the sons of Eliphaz, the son of Esau (Gen. xxxvi. 11), and a duke or chief of one of the tribes of the children of Esau (ver. 15). His name is supposed to be preserved in that of the *بنی عمر* *Beni 'Ammer*, an Arab tribe in the south of Palestine and north of Edomitis. It is no objection to this that the initial consonant of the two words is different, for the *ن* and the *ع* frequently are interchanged. Others suggest the tribe of the Amir (أمير), Arabs on the east of the Jordan.—W. L. A.

OMEGA (Ω), the last letter of the Greek alphabet, proverbially applied to express the end, as Alpha (Α), the first letter, the beginning of anything. [ALPHA.]

OMER. [WEIGHTS AND MEASURES.]

OMRI (עֲמֹרִי, *God-taught*; Sept. Ὀμβρι), sixth king of Israel, who began to reign in B.C. 929, and reigned twelve years. He was raised to the throne by the army, while it was engaged in the siege of G.bbethon, a Levitical city in Dan, of which the Philistines had gained possession, when the news came to the camp of the death of Elah, and the usurpation of Zimri. On this, the army proclaimed their general, Omri, king of Israel. He then lost not a moment, but leaving Gibbethon in the power of the infidels, went and besieged his competitor in Tirzah. But he was no sooner delivered of this rival [ZIMRI], than another appeared in the person of Tibni, whom a part of the people had raised to the throne, probably from unwillingness to submit to military dictation. This occasioned a civil war, which lasted six years, and left Omri undisputed master of the throne. His reign lasted six years more, and its chief event was the foundation of Samaria, which thenceforth became the capital city of the kingdom of Israel (1 Kings xvi. 15-28). [SAMARIA.] [In order to harmonize the chronological data of his reign given 1 Kings xvi. 15, 23, 29, we may suppose that the twenty-seventh year of Asa (928 B.C.) was the year of his accession to the throne; the thirty-first of Asa the year of his peaceable occupation after the defeat of Tibni; and by adding eleven years for his reign (for the twelve mentioned ver. 23 were not complete years), we are brought to the thirty-eighth year of Asa as the year of Omri's death (917-918 B.C.) Usser. *Annal*, p. 37.]

ON (ὄν, *strength*; Sept. ὄν), a chief of the tribe of Reuben, who was one of the accomplices

of Korah in the revolt against the authority of Moses and Aaron. He is mentioned among the leaders of this conspiracy in the first instance (Num. xvi. 1), but does not appear in any of the subsequent transactions, and is not by name included in the final punishment. The Rabbinical tradition is, that the wife of On persuaded her husband to abandon the enterprise.

ON (ὄν; Sept. Ἡλιουπόλις), one of the oldest cities in the world, situated in Lower Egypt, about two hours N.N.E. from Cairo. The Septuagint translates the name On by Heliopolis, which signifies 'city of the sun'; and in Jer. xliii. 13, it bears a name, Beth-shemesh (oppidum solis, Pliny, *Hist. Nat.* v. 11), of equivalent import. On is a Coptic and ancient Egyptian word, signifying light and the sun (Ritter, *Ersk.* i. 822). The site is now marked by low mounds, enclosing a space about three-quarters of a mile in length by half a mile in breadth, which was once occupied by houses and by the celebrated Temple of the Sun. This area is at present a ploughed field, a garden of herbs; and the solitary obelisk which still rises in the midst of

412.

it is the sole remnant of the former splendours of the place. In the days of Edrisi and Abdallatif the place bore the name of Ain Shems; and in the neighbouring village, Matariyeh, is still shown an ancient well bearing the same name. Near by it is a very old sycamore, its trunk straggling and gnarled, under which legendary tradition relates that the holy family once rested (Robinson's *Biblical Researches*, i. 36). Heliopolis was the capital of a district or nomos bearing the same name (Plin. *Hist. Nat.* v. 9; Ptolem. iv. 5).

The place is mentioned in Gen. xli. 45, where it is said that Pharaoh gave to Joseph a wife, Asenath, the daughter of Poti-pherah, priest of On (ver. 50). From the passage in Jeremiah (*ut supra*), it may be inferred that it was distinguished for idolatrous worship: 'He shall break also the images of Beth-shemesh that is in the land of Egypt, and the houses of the gods of the Egyptians shall be burn with fire.' The names, 'City of the Sun,' 'Temples of the

Sun,' connected with the place, taken in conjunction with the words just cited from the prophet, seem to refer the mind to the purer form of worship which prevailed at a very early period in Egypt—namely, the worship of the heavenly bodies—and thence to carry the thoughts to the deteriorations which it afterwards underwent in sinking to the adoration of images and animals.

The traces of this city which are found in classic authors correspond with the little of it that we know from the brief intimations of Holy Writ. According to Herodotus (ii. 59), Heliopolis was one of the four great cities that were rendered famous in Egypt by being the centres of solemn religious festivals, which were attended by splendid processions and homage to the gods. In Heliopolis the observance was held in honour of the sun. The majesty of these sacred visits may be best learned now by a careful study of the temples (in their ruins) in which the rites were performed (Wilkinson's *Anc. Egyptians*). Heliopolis had its priesthood, a numerous and learned body, celebrated before other Egyptians for their historical and antiquarian lore; it long continued the university of the Egyptians, the chief seat of their science (Kenrick's *Herod.* ii. 3; Wilkinson); the priests dwelt as a holy community in a spacious structure appropriated to their use. In Strabo's time the halls were to be seen in which Eudoxus and Plato had studied under the direction of the priests of Heliopolis. A detailed description of the temple, with its long alleys of sphinxes, obelisks, etc., may be found in Strabo (xvii.; Joseph. *c. Apion.* ii. 2), who says that the mural sculpture in it was very similar to the old Etruscan and Grecian works. In the temple a bullock was fed—a symbol of the god Mnevis. The city suffered heavily by the Persian invasion. From the time of Shaw and Pococke, the place has been described by many travellers. At an early period remains of the famous temple were found. Abdallatif (A.D. 1200) saw many colossal sphinxes, partly prostrate, partly standing. He also saw the gates or propylæa of the temple covered with inscriptions; he describes two immense obelisks, whose summits were covered with massive brass, around which were others one-half or one-third the size of the first, placed in so thick a mass that they could scarcely be counted; most of them thrown down. An obelisk which the Emperor Augustus caused to be carried to Rome, and placed in the Campus Martius, is held by Zoega (*De Orig. et Usu Obelisci*) to have been brought from Heliopolis, and to have owed its origin to Sesostris. This city furnished works of art to Augustus for adorning Rome, and to Constantine for adorning Constantinople. Ritter (*Erdkunde*, i. 823) says that the sole remaining obelisk is from sixty to seventy feet high, of a block of red granite, bearing hieroglyphics which remind the beholder of what Strabo terms the Etruscan style. 'The figure of the cross which it bears (*crux ansata*) has attracted the special notice of Christian antiquaries' (Ritter).—J. R. B.

ONAN (נָחֵם, *strong, stout*; Sept. Ἀνάν), second son of Judah, who, being constrained by the obligations of the ancient Levirate law to espouse Tamar, his elder brother's widow, took means to frustrate the intention of this usage, which was to provide heirs for a brother who had died childless. This crime, rendered without excuse by the allowance of polygamy, and the seriousness of which can

scarcely be appreciated but in respect to the usages of the times in which it was committed, was punished by premature death (Gen. xxxviii. 4, *seq.*)—J. K.

ONESIMUS (Ὀνήσιμος, *profitable*), a slave belonging to Philemon of Colossæ, who fled from his master, and proceeded to Rome, where he was converted by St. Paul (Philem. 10), who sent him back to his master, with an eloquent letter, the purport of which is described in the article PHILEMON. Onesimus, accompanied by Tychicus, left Rome with not only this epistle, but with those to the Ephesians and Colossians (Col. iv. 9). It is believed that Onesimus, anxious to justify the confidence which Paul reposed in him, by appearing speedily before his master, left Tychicus to take the Epistle to the Ephesians; and hastened to Colossæ, where he doubtless received the forgiveness which Paul had so touchingly implored for him as 'a brother beloved' (*Canon. Apost.* 73). An uncertain tradition makes Onesimus to have been bishop of Bercæ, where he is said to have suffered martyrdom (*Const. Apostol.* vii. 46). In the letter of Ignatius to the church at Ephesus, ch. i., mention is made of an Onesimus who was bishop of that church; but this can hardly be the Onesimus of the N. T. The part which Paul took in this difficult and trying case is highly honourable to him; while for Onesimus himself, the highest praise is, that he obtained the friendship and confidence of the apostle.—J. K.

ONESIPHORUS (Ὀνησιφόρος, *profit-bringer*), a believer of Ephesus, who came to Rome during the second captivity of St. Paul in that city; and having found out the apostle, who was in custody of a soldier, to whose arm his own was chained, was 'not ashamed of his chain,' but attended him frequently, and rendered him all the services in his power. This faithful attachment, at a time of calamity and desertion, was fully appreciated and well remembered by the apostle, who, in his Epistle to Timothy, carefully records the circumstance; and, after charging him to salute in his name 'the household of Onesiphorus,' expresses the most earnest and grateful wishes for his spiritual welfare (2 Tim. ii. 16-18). It would appear from this that Onesiphorus had then quitted Rome.—J. K.

ONIAS (Ὀνίας). Two high-priests of this name are mentioned in the Apocryphal books.

1. The son of Juddua, who succeeded his father about 330 B.C. (Joseph. *Antiq.* xi. 7. 7). He was the father of Simon the Just, and his grandson Onias II., high-priest about B.C. 240 (Ecclus. i. 1; Joseph. *Antiq.* xii. 2. 4), was father of Simon II., who became high-priest about B.C. 226. The son of this Simon was—

2. Onias III., who succeeded his father about B.C. 198. An informer, Simon, having told Seleucus Philopator of certain treasures laid up in the temple, the king sent Heliodorus to seize them. In vain Onias protested against this sacrilege; but ere Heliodorus had accomplished his design, he was scared by an apparition, and lay dumb and helpless till, by the intercession of Onias, he was restored. Simon misrepresented this to the king, so that Onias found it necessary to appeal to the king in person, in order to protect himself from his malicious endeavours. When, on the death of Seleucus, the supreme power passed into the

hands of Antiochus Epiphanes, Onias found himself supplanted by his brother Jason (B.C. 174), who was in turn displaced by Menelaus, Simon's brother. Menelaus, being reproved by Onias for appropriating the sacred vessels of the temple, suborned Andronicus to assassinate his re-  
rover (B.C. 171), an act which was punished by Antiochus by the execution of the murderer (2 Maccab. iii. 4). The account given by Josephus of the death of Onias is different from this, for he makes Onias die, apparently, a natural death, *after which* his brother Jason became high-priest (*Antiq.* xii. 5. 1). But the authority of Josephus is not such as to set aside the statement of the author of the books of the Maccabees on such a point.—W. L. A.

ONION. [BETZAL.]

ONKELOS, THE PROSELYTE (אונקלוס הגר),

son of Kalonymus (בר קלונימוס), the reputed author of the celebrated Chaldee paraphrase of the Pentateuch called *Targum Onkelos*, was born about 40 A.D., and died in Palestine about 120 A.D. This is evident from the fact that he is spoken of in the *Tosiftha*, which was edited in the 3d century of the Christian era, shortly after the redaction of the Mishna, as a contemporary and disciple of Gamaliel II. (*Tosiftha Mikvaoth*, vi. 1; *Kelim*, iii. 2; *Chagiga*, iii. 1), who was born about A.D. 50, and died about 116 [GAMALIEL II.] His love for his newly-adopted Jewish faith was so intense that, after dividing his paternal inheritance with his brothers, he threw his portion into (ס' המלח) the Dead Sea (*Tosiftha*, Demai, vi. 9); and when Gamaliel, his teacher in the new faith, died, Onkelos, out of reverence for him, burned at his funeral costly garments and furniture to the amount of *seventy Tyrian Minae* = about twenty-one pounds sterling (*Tosiftha Sabbath*, ch. viii.; *Semachoth*, ch. viii.; *Abodah Sarah*, 11 a).\* The Babylonian Talmud says that he was nephew

of the emperor Titus (אונקלוס בר קלוניקום בר אהתיה דטיטוס); and that before his conversion to Judaism he successively conjured up from the other world the ghosts of his uncle Titus, Balaam, and Christ, to inquire of them which nation is the happiest in the next world. Titus, whom he called up first, told him that the Jews were the happiest, but warned him against embracing their faith, because of the great difficulty in fulfilling all its multitudinous commandments, and advised him to persecute them, for every one who oppresses Israel shall become a chief (*Lament.* i. 5). Balaam, whom he brought up next, also told him that the Jews were the most distinguished in the other world, and yet admonished him 'neither to seek their peace nor their prosperity all his days for ever' (*Deut.* xxiii. 6); whilst Christ, whom he called up last, and who also declared that the Jews were the first in the next world, counselled him to seek their good and not their evil, for he who touches them touches the apple of his eyes (*Gittin*, 56 a, 57 b). His conversion to Judaism, however, was no easy thing.

\* The epithet הוקן, *the elder*, which occurs in these passages in connection with Gamaliel, has been shown by Graetz (*Geschichte der Juden*, iv. 152) and others to be a manifest error of the copyist.

For as soon as it was known that 'Onkelos, son of Kalonymos, or Kalonymos, had become a proselyte, the emperor [either Domitian, Nerva, Trajan, or Hadrian, as Titus was dead] sent a Roman cohort to capture him and bring him before the imperial tribunal, but he converted the soldiers. The emperor then sent another cohort, charging them not to speak to him. As they caught him and were marching him off, he simply remarked [מלתא

בעלמא, without its appearing religious or controversial], the פפירא carries the fire before the נפירא, the נפירא before the דוכסא = *dux*, the *dux* before the הנמונא = הגעמט, the הגעמט before the קומא = *καμης*, but who carries the fire before the *καμης*? The soldiers replied, Nobody. Now said Onkelos the holy one, Blessed be he, he carries the fire before Israel, as it is written, The Lord went before them by day in a pillar of cloud to lead them in the way, and by night in a pillar of fire (*Exod.* xiii. 21); and he also converted them. Whereupon the emperor sent a third cohort, charging them very strictly to hold no converse with him whatever. As they captured him, and were leading him away, he looked at the *Mezuza* [MEZUZA], and, putting his hand on it, asked the soldiers what it was. They not being able to say, inquired of him what it was, whereupon he said, It is the custom of this world for a human king to sit inside his palace and for servants to guard him outside, whereas the Holy One, blessed be he, his servants are inside, and he keeps guard outside, as it is written, The Lord watches thy going out and coming in from this time forth and for evermore (*Ps.* cxxi. 8); and Onkelos also converted this cohort, whereupon the emperor would not send any more' (*Abodah Sarah*, 11 a).

The first distinct intimation that Onkelos is the author or compiler of the Chaldee paraphrase which goes by his name, is contained in the following passage:—'R. Jeremiah, and according to others, R. Chija bar Abba, said: The Targum of the Pentateuch was made by Onkelos the Proselyte, from the mouth of R. Eliezer and R. Joshua' (*Megilla*, 3 a). We are also informed here that Onkelos' paraphrase embodied the orally transmitted Chaldee version of the text which the people generally had forgotten. Being, therefore, the floating national Targum, as well as the compilation of Onkelos, the paraphrase is alternately quoted as *weparaphrase* (ברמיתרנומין), *our Targum* (תרנומין דין), *Kiddushin*, 49 a), the Targum has it (בתרנומין), the Targum (תרנומין), and as the Targum Onkelos (אונקלוס). Thus the Targum is distinctly quoted as

the paraphrase of Onkelos (ותרגם אונקלוס) in Pirke Rabbi Eliezer (cap. xxxviii. 28 a, ed. Lemberg, 1858), a Midrash on the principal events recorded in the Pentateuch, which is ascribed to Eliezer b. Hyrcanus, but which is not of a later date than the 9th century [MIDRASH]; by Ibn Koreish, who flourished 870-900 A.D. [IBN KOREISH]; by Menachem b. Saruk (born about 910, died about 970), who, in his lexicon entitled מחברת מנחם, says

ותשב באיתן Onkelos explains (פתר אונקלוס) that וישו בתוקפה רוחצניה (Gen. xlix. 29), וישו איתן (p. 23, s. v. איתן, ed. Filipowski, 1854); and by Dunash Ibn Librat (born about 920, died about 980), in his polemical work against Menachem b. Saruk's Hebrew Lexicon, who cites, with great approba-

tion, *Onkelos'* rendering of וִירְדָנוּ לָרֶב (Gen. xlviii. 16, והֵיטֵב הָיָה פִּירְשׁ אֹנְקֵלוֹס הַמְתוּרָגְמָן בְּאֹמְרוֹ וְכִנּוּי וִירְדָנוּ, ed. Filipowski, 1855, p. 57, s. v. וִירְדָנוּ, comp. also *ibid.* p. 61). \* Those writers alternately quote the Targum by the name of Onkelos, and simply as the *Targum* (תְּרַגְמוֹן, comp. Menachem, p. 144, s. v. פֶּתֶחַ, p. 143, s. v. פֶּנֶךְ) and as it is *paraphrased* (תְּרַגְמוֹן, comp. *ibid.*, p. 19, s. v. אֵלֹהִים). The same is the case with Rashi (born in 1010, died 1105), who, though he distinctly quotes the *Targum of Onkelos* (תְּרַגְמוֹן אֹנְקֵלוֹס) no less than seventeen times in his Comment. on Genesis alone (comp. Comment. on Gen. vi. 6; xiv. 7; xviii. 23; xx. 13, 19; xxii. 2; xxiv. 21; xxxiii. 12; xxxvi. 4; xxxix. 24; xliii. 18; xlix. 9, 10, 11, 17, 24, 27), yet he still more frequently cites it simply as the *Targum* has it (כְּתֻרְגְמוֹן, comp. Comment. on Gen. xi. 6; xii. 17; xiii. 11; xiv. 6, 14, 17; xv. 2, 11; xvi. 14; xvii. 1; xix. 15, 18; xx. 17; xxii. 3; xxiv. 64, *al.*), because everybody knew and believed that it was the Targum of Onkelos.

Modern criticism, however, identifies Onkelos with Aquila, the well-known translator of the O. T. into Greek; and either ascribes to him both the Chaldee and Greek versions, or maintains that the former was made by some unknown person or persons after the model of the latter, and therefore obtained the name Targum Onkelos, which means nothing else than *Aquila-Targum*, or a Targum done in the manner of Aquila. The second is the more general view, and is defended by the following arguments—i. The Jerusalem Talmud (*Megilla*, i. 9) relates—'R. Chija bar Abba said, Akilas the Proselyte made a version under the auspices of R. Eliezer and R. Joshua, and they praised him' (אמר ר' חייא בר אבא תירגם עקילס הנר לפני ר' אליעזר ולפני ר' יהושע וקילס אותו).

ii. This version, which is distinctly quoted by the name of the *Targum of Akilas the Proselyte* (תִּירְגָם עֵקִילָס), is Greek, and agrees for the most part with the fragments preserved of Aquila's translation.

iii. The description given of עֵקִילָס = Aquila, is almost the same as that given of אֹנְקֵלוֹס; he is a heathen by birth, a native of Pontus, a relative of the emperor Hadrian (*Midrash Tanchuma Parsha, (מישפטים)*, or as Epiphanius calls him *πρωτοεπίδης* of the emperor (*De Pond. et Mens.*, sec. 12), became a convert to Judaism, and a disciple and friend of R. Gamaliel II., R. Eliezer, R. Joshua, and R. Akiba (Hieronymus in *Isaiah*, vii. 14; *Jerusalem Kiddushin*, i. 1), made a version under the auspices of these heads of the Jewish community, which they greatly praised (*Jerusalem Megilla*, i. 11; *Jerusalem Kiddushin*, i. 2); and *iv.* It is submitted, that unless the identity of Onkelos and Akilas be accepted, we must believe that two men were living simultaneously, of remarkably similar

names, both relatives of the reigning emperor, both converts to Judaism, both disciples of R. Eliezer and R. Joshua, and both translated the Bible under the auspices and with the approbation of these Rabbins. These are the principal reasons which Levi, Frankel, Graetz, Geiger, Jost, Deutsch, and others, adduce for the identification of the two names, and for taking *Targum Onkelos* to denote a Targum made after the manner of Akilas or Aquila, the Greek translator.

The importance of Onkelos' paraphrase to the criticism and interpretation of the O. T. will be discussed in the article TARGUM. The Targum of Onkelos was first published in the *editio princeps* of the Pentateuch, with the commentary of Rashi, edited by Abraham b. Chajim, Bologna 1482, then in Soria 1490, Lisbon 1491, and in Constantinople 1505. The text of these editions is given in the Complutensian (1517) and the Venice (Bomberg) Polyglotts (1518-26, 1547-49), and in Buxtorf's Rabbinical Bible (1619), as well as in the Paris (1645) and Walton's (1657) Polyglotts. It has since been printed in almost every edition of the Pentateuch with the Jewish commentaries, but the best text is the Wilna edition, 1852. Onkelos has been translated into Latin by Alphonso de Zamora, given in the Complutensian (1517), Antwerp (1572), and in Walton's (1657) Polyglotts; and printed separately, Antwerp 1535, by Sebastian Münster, 1526; Paul Fagius, 1546; and by John Mercer, 1566. Onkelos on *Genesis* and *Exodus* has been translated into English by Etheridge, Longman, 1862. Useful glosses and commentaries have been written by Is. Berlin, entitled *מיני תרגומא*, Breslau 1827, Wilna 1836; by Luzzatto, entitled *אהבה נר*, Vienna 1830; and by Ben Zion, called *עוטה אור*, Wilna 1843.

*Literature.*—A thorough discussion of this much-disputed Onkelos question will be found in the dissertations of De Rossi, *Meor Enajim*, iii. cap. xlv. p. 233 b, ff., ed. Vienna, 1829; Wolf, *Bibliotheca Hebraica*, ii. 1147, seq.; iii. 890, seq.; Landau, *Rabbinisch-aram.-deutsches Wörterbuch*, i. 11-16, 36-39; Zuntz, *Die gottesdienstlichen Vorträge der Juden*, Berlin 1832, p. 61, ff.; Levi, in Geiger's *Wissenschaftliche Zeitschrift*, vol. v., Leipzig 1843, p. 175, ff.; Anger, *De Onkeloso*, Leipzig 1846; Graetz, *Geschichte der Juden*, vol. iv., Berlin 1853, pp. 124, ff.; 508, ff.; Herzfeld, *Geschichte des Volkes Israel*, vol. ii., Nordhausen 1857, pp. 61, ff.; 551, ff.; 609; Jost, *Geschichte des Judenthums*, vol. ii., Leipzig 1858, p. 52, ff.; Deutsch, in Smith's *Dictionary of the Bible*, article *Versions*.—C. D. G.

ONO (אֹנוֹן; equivalent to אֹנוֹן, 'strong'; 'אֹנוֹן; 'אֹנוֹן; Alex. 'אֹנוֹ, and 'אֹנוֹן; Ono), a town of Benjamin, built, together with Lod, by the sons of Elpaal (1 Chron. viii. 12). It was recaptured after the captivity, and is again grouped with Lod (Ezra ii. 33; Neh. vii. 37). It appears that there was a plain at or near it, called by the same name בִּקְעַת אֹנוֹן, 'plain of Ono,' Neh. vi. 2). A valley (?) is also mentioned in connection with it by Nehemiah: 'Lod and Ono, the valley of craftsmen' (xi. 35, cf. 1 Chron. iv. 14). The plain and valley may perhaps have been identical; and some depression or broad torrent-bed in the plain of Sharon may have been meant by the sacred writers.

In the *Notitie Ecclesiastica*, an episcopal city called *Onus* is mentioned (Reland, *Pal.*, p. 225),

\* Mr. Deutsch, in his excellent article *Targum*, in Smith's *Dictionary of the Bible*, s. v. *Versions*, is therefore wrong in his assertion that 'from that time, i.e., the 9th century, three centuries elapsed during which the version was quoted often enough, but without its authorship being ascribed to Onkelos.' Dr. Levi's similar statement (in Geiger's *Wissenschaftliche Zeitschrift*, v. 185) was made long before the works of Menachem and Dunash were published.

which is probably the Hebrew Ono. Ono is also several times spoken of in the Talmud, and is located three miles from Lod, or Lydda (Lightfoot, *Opera*, ii. 426; Reland, p. 913). There is a small village with ruins, *five* Roman miles north of Lydda, which is probably, as Van de Velde suggests (*Memoir*, p. 337), the Ono of the O. T. Two objections may be urged against this view; 1st, The distance is too great—*five* miles instead of *three*; but then the Rabbins were not very accurate geographers. 2d, In the modern name the letter *Ain* is found (عانا, or عونا), which makes it radically different from the Hebrew; but there are other instances in which the Hebrew א has been changed into the firmer Arabic ع. There is a *Beit Unia* in the mountains between Bethel and Beth-horon; but it is much too far distant from Lydda to be identified with Ono (see, however, Winer, *R. W.*, s. v.)—J. L. P.

ONYCHA. [SHEHELETH.]

ONYX. [SHOHAM; YAHALOM.]

OPHEL. [JERUSALEM.]

'OPHER (עֹפֶר; Arabic العُفْر *algufra*), in the Song of Solomon (ch. iv. 5), denotes the calf or fawn of a stag [AII]; it occurs in no other book of Scripture, is unknown in the Syriac and Chaldee, and appears to be only a poetical application of a term more strictly belonging to fawn-like animals; for in the above passage it is applied to couples feeding in a bed of lilies—indications not descriptive of young goats or stags, but quite applicable to the antelope groups which are characterized in Griffith's Cuvier, in subgenus x. *Cephalophus*, and xi. *Neotragus*; both furnishing species of exceeding delicacy and graceful diminutive structures, several of which habitually feed in pairs among shrubs and geraniums on the hilly plains of Africa; and as they have always been and still are in request among the wealthy in warm climates for domestication, we may conjecture that a species designated by the name of Opher was to be found in the parks or royal gardens of a sovereign so interested in natural history as Solomon was, and from the sovereign's own observation became alluded to in the truly apposite imagery of his poetical diction (Cant. iv. 12). Among the species in question, in which both male and female are exceedingly similar, and which might have reached him by sea or by caravan, we may reckon *Cephalophus Grimmia*, *C. Perpusilla*, *C. Philantomba*, all marked by a small black tuft of hair between their very short horns, as also the *Neotragus Pygmaea*, or Guevei, the smallest of cloven-footed animals, and the Madoka, with speckled legs; all these species being natives of Central Africa, and from time immemorial brought by caravans from the interior, for sale or presents.—C. H. S.

'OPHERETH. [LEAD.]

OPHIR occurs, first, as the proper name of one of the thirteen sons of Joktan, the son of Eber, a great-grandson of Shem, in Gen. x. 26-29 (אֹפִיר; Sept. *Ὀφείρ*; Vulg. *Ophir*). Many Arabian countries are believed to have been peopled by these persons, and to have been called after their respective names, as Sheba, etc., and among

others Ophir (Bochart, *Phaleg*, iii. 15). Ophir occurs also as the name of a place, country, or region, famous for its gold, which Solomon's ships visited in company with the Phœnician (אֹפִיר;

Sept. *Ὀφείρ*, *Ὀφείρ*; *Σουφείρ*, *Σουφείρ*, *Σωφείρ*, *Σωφείρ*; Alex. *Σωφάρ* and *Σωφηρά*; Ald. *Σαπφείρ*; Cam. *Ὀπφείρ*; Alex. and Cam. *Ὀφείρ*; Vulg. *Ophir*). The difficulty is to ascertain where Ophir was situated. Some writers, reasoning from the etymology of the word, which is supposed to mean dust, etc., have inferred almost every place where gold dust is procured in abundance. Others have rested their conclusions upon the similarity of the name in Hebrew to that of other countries, as, for instance, Apher, a port of Arabia mentioned by Arrian in his *Periplus of the Erythraean Sea*; or upon the similarity of the name in the Sept., *Σωφείρ*; hence Sofala, etc.: and others, by a transposition of the letters of the Hebrew word, have, among other conjectures, even made out Peru! By such methods of investigation the following countries, among others, have been proposed: Melindah on the coast of Africa, Angola, Carthage, St. Domingo, Mexico, New Guinea, Urphe an island in the Red Sea, and Ormuz in the Persian Gulf. Bochart thinks that the Ophir from which David obtained gold (1 Chron. xxix. 4) was the Cassanitis of Ptolemy and Stephanus, on the coast of Arabia; while that visited by the fleet of Solomon was Taprobanè, now called Ceylon (*Geogr. Sacra*, ii. 27). Pegu is the place selected by Maffei (*Hist. Ind.*, lib. i.) Others decide in favour of the peninsula of Malacca, which abounds in precious ores, apes, and peacocks: others prefer Sumatra, for the same reason. Lipenius, relying on the authority of Josephus, Theodoret, and Procopius, who call Ophir 'the golden land,' 'the golden chersonese,' says that the children of Joktan peopled all the countries bounded by the eastern seas, and that Ophir includes not only Sumatra or Malacca, but every coast and island from Ceylon to the Indian Archipelago. We shall now lay before the readers what we conceive to be the exact amount of our information respecting Ophir, and show how far it applies to what appear to us to be the three most probable theories respecting its situation—namely, Arabia, Africa, and India. Ophir is mentioned in the following thirteen passages; Gen. x. 29; 1 Chron. i. 23; 1 Kings ix. 28; 2 Chron. viii. 18; ix. 10; 1 Kings x. 11; xxii. 48; 1 Chron. xxix. 4; Job xxii. 24; xxviii. 16; Ps. xlv. 9; Is. xiii. 12; Eccus. vii. 18. Only seven of these passages afford even the slightest clue to its position, and these are reduced to three when the parallel passages and texts in which Ophir is not a local name have been withdrawn. We further think that the situation of Tarshish is not in any way connected with this inquiry. It is indeed said, in reference to the voyage to Ophir, that 'Solomon had at sea a navy of Tarshish, and that once in three years came the navy of Tarshish' (1 Kings x. 22); and that 'Jehoshaphat made ships of Tarshish to go to Ophir for gold' (1 Kings xxii. 48); but the word may denote large merchant ships bound on long voyages, perhaps distinguished by their construction from the common Phœnician ships, even though they were sent to other countries instead of Tarshish (compare the English naval phrase, an Indian,

and see Is. xliii. 1; lx. 9; Ps. xlviii. 7; Is. ii. 16; and although the Tarshish ships which went to Ophir (1 Kings xxii. 48, etc.) are expressly said by the writer of Chronicles to have gone to Tarshish (2 Chron. ix. 21; xx. 36, 37), yet in the interval between the composition of the books of Kings and that of Chronicles the name was most probably transferred to denote any distant country [TARSHISH]. The utmost that can be said is, that Solomon sent ships to Tarshish as well as to Ophir, but it cannot be proved that the same ships are meant, or that they went to both places in the same voyage. It seems to us most probable that Solomon sent direct to Ophir for gold, wherever it might be; and that, whereas it had been hitherto procured from thence by David, etc., by foreign merchants, Solomon fitted out a fleet to obtain it at first hand. Neither do we think that the time occupied by the voyage to Ophir is precisely determinable from the words 'once in three years came the navy' (1 Kings x. 22). Upon the whole, then, our information appears to amount to this, that King Solomon made a navy of ships in Ezion-geber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom, and that his Phœnician neighbour and ally, Hiram, king of Tyre, sent in this navy his servants, shipmen that had knowledge of the sea, with the servants of Solomon, and that they came to Ophir, and fetched from thence gold, and brought it to Solomon (1 Kings ix. 26-29), and that they brought in the same voyage algum or almug trees and precious stones (1 Kings x. 11), silver, ivory, apes, or rather monkeys, and peacocks, or, according to some, pheasants, and to others, parrots; and that gold in great abundance and of the purest quality was procured from Ophir (1 Chron. xxix. 4; Job xxviii. 16), rendered by Symmachus χρυσὸς πρωτεύος (Ps. xlv. 9; Is. xlii. 12); Vulg. *mundo obrizo* (Eccles. vii. 18). The first theory which appears to be attended with some degree of evidence not purely fanciful, is that Ophir was situate in Arabia. In Gen. x. 29, Ophir stands in the midst of other Arabian countries. Still, as Gesenius observes, it is possibly mentioned in that connection only on account of its being an Arabian colony planted abroad. Though gold is not now found in Arabia (Niebuhr, *Description de l'Arabie*, Copenhagen, 1773, p. 124), yet the ancients ascribe it to the inhabitants in great plenty (Judg. viii. 24, 26; 2 Chron. i. 1; 1 Kings x. 1, 2; Ps. lxxii. 15). This gold, Dr. Lee thinks, was no other than the gold of Havilah (Gen. ii. 11), which he supposes to have been situate somewhere in Arabia, and refers to Gen. x. 7, 29; xxv. 18; 1 Sam. xv. 7; 1 Chron. i. 9 (*Translation of the Book Job, etc.*, Lond. 1837, p. 55). But Diodorus Siculus ascribes gold mines to Arabia: Μεταλλεύεται δὲ καὶ κατὰ τὴν Ἀραβίαν καὶ ὁ παραγαγόμενος ἄπυρος χρυσὸς (comp. Gen. ii. 12), οὐχ ὥσπερ παρὰ τοῖς ἄλλοις ἐκ ψηγμάτων καθεψομένους, ἀλλ' εὐθὺς ὀρυττόμενος εὐρίσκεται (ii. 30). He also testifies to the abundance of 'precious stones' in Arabia (ii. 54), especially among the inhabitants of Sabas (iii. 46; comp. Gen. ii. 12; 2 Chron. ix. 1; 1 Kings x. 1, 2). Pliny also speaks of the 'Sabæi ditissimi auri metallis' (*Hist. Nat.* vi. 32). Again, 'Litius Hammaum, ubi auri metalla' (*ib.*). Others suppose that though Ophir was situate somewhere on the coast of Arabia, it was rather an emporium, at which the Hebrews and Tyrians obtained gold, silver, ivory, apes, almug-trees, etc., brought thither from India

and Africa by the Arabian merchants, and even from Ethiopia, to which Herodotus (iii. 114) ascribes gold in great quantities, elephants' teeth, and trees and shrubs of every kind. Apes, properly speaking, are also ascribed to it by Pliny (viii. 19); who speaks also of the confluence of merchandise in Arabia: 'Sabæi mirumque dictu, ex innumeris populis pars æqua in commerciis aut latrociniiis degit: in universum gentes ditissimæ, ut apud quas maximæ opes Romanorum Parthorumque subsistant, videntibus quæ e mari aut sylvis capiunt' (*ut supra*). A little before he speaks of the Arabian emporiums; 'Insulæ multæ: emporium eorum Acila, ex quo in Indiam navigatur.' Again: 'Thimaneos...Areni: oppidum in quo omnis negotiatio convenit' (comp. Strabo, xvi. 1; 2 Chron. ix. 1; Ezek. xxvii. 21, 22; and Diod. Sic. ii. 54). In behalf of the supposition that Ophir was the Arabian port Aphar, already referred to, it may be remarked that the name has undergone similar changes to that of the Sept. of Ophir; for it is called by Arrian Aphar, by Pliny Saphar, by Ptolemy Sapphera, and by Stephanus Saphirini. Grotius thinks this to be Ophir. The very name El Ophir has been lately pointed out as a city of Oman, in former times the centre of a very active Arabian commerce (Seetzen, in *Zach's Monatl. Correspond.* xix. 331, ff.). In the article Ophir in the *Encyclopædia Londinensis*, great stress is laid upon the objection that if Ophir had been anywhere in Arabia or Asia, Solomon could have conveyed the commodities he procured from it by caravans: but surely a water-carriage was more convenient, at least for the almug-trees, which he procured from Ophir, and of which he made pillars for the house of the Lord and for the king's house (2 Chron. ix. 10, 11) [ALGUM], and which it is highly improbable he had the means of conveying by land. In favour of the theory which places Ophir in Africa, it has been suggested that we have the very name in אֹפִיר *afri*, Africa, the Roman termination, Africa terra, and that Tarshish was some city or country in Africa; that the Chald. Targumist on 1 Kings xxii. 48 so understood it, where he renders חֲרִשִׁיט by אֹפִיריקה. He probably inferred from 2 Chron. xx. 36, that to go to Ophir and to Tarshish was one and the same thing, and that Tarshish there meant the name of a place. Origen also says, on Job xxii. 24, that some of the interpreters understood Ophir to be Africa. Michaelis supposes that Solomon's fleet, coming down the Red Sea from Ezion-geber, coasted along the shore of Africa, doubling the Cape of Good Hope, and came to Tarshish, which he, with many others, supposes to have been Tartessus in Spain, and thence back again the same way; that this conjecture accounts for their three years' voyage out and home; and that Spain and the coasts of Africa furnished all the commodities which they brought back (*Spicileg. Geogr. Hebr. Exteræ*, p. 98). Strabo indeed says that Spain abounded in gold, and immensely more so in silver (see 1 Maccab. viii. 3). Others have not hesitated to carry Solomon's fleet round from Spain up the Mediterranean to Joppa. The chief support for this supposition is the very remarkable statement of Herodotus, that Necho, king of Egypt, the Pharaoh-Necho of Scripture, whose enterprising disposition appears from his project to unite the Nile and the Red Sea by a canal, 'dispatched some vessels, under the conduct of Phœnicians, with directions to pass by the columns of

Hercules, now called the Straits of Gibraltar, and after penetrating the Northern Ocean to return to Egypt; that these Phœnicians, taking their course from the Red Sea, entered into the Southern Ocean, and on the approach of autumn landed in Libya, and planted some corn in the place where they happened to find themselves; that when this was ripe they cut it down and departed. Having thus consumed two years, they in the *third* year doubled the columns of Hercules, and returned to Egypt.' He adds, 'This relation may obtain attention from others, but to me it seems incredible, for they affirmed that, having sailed round Libya, they had the sun on their right hand.' Thus, he observes, 'was Libya for the first time known' (iv. 42). It seems certain that this voyage was accomplished, for the mariners would have the sun on their right hand after passing the line, a fact which never could have been imagined in that age, when astronomy was in its infancy; and it has been supposed that this was the voyage made 'once in three years' by Solomon's fleet, under the conduct also of Phœnician mariners. But, assuming this to have been the case, it seems strange that the knowledge and record of it should have been so completely lost in the time of Pharaoh-Necho, only three centuries after Solomon, as that Herodotus, whose information and accuracy appear from this very account, should say that Libya, evidently meaning the circuit of it by the sea, was thus for the first time known. Heeren finds an answer in the desolating ravages of the Babylonian conquerors, and indeed in the protracted siege of Tyre itself by Nebuchadnezzar, which followed shortly after the time of Solomon. It seems likely indeed that Necho had heard of such a passage, and believed that the Phœnicians knew how to find it; and that it was not much frequented during many subsequent ages, appears from the notice taken by Pliny of the few who had accomplished it (*Hist. Nat.* ii. 67); and it was, we know, after his time unused and forgotten till recovered by the Spaniards, A.D. 1497. It must be allowed that, if Solomon's fleet actually pursued this course, then Ophir as Africa, and Tartessus in Spain as Tarshish, seem on many accounts very plausible suppositions. In behalf of the conjecture that Ophir was in India, the following arguments are alleged: that it is most natural to understand from the narrative that all the productions said to have been brought from Ophir came from one and the same country, and that they were all procurable only from India. The Sept. translators also appear to have understood it to be India, from rendering the word *Σωφίρ*, *Σωφίρ*, *Σωφίρ*, which is the Egyptian name for that country. Champollion says that, in the Coptic vocabularies India bears the name *Σοφίρ* (*L'Egypte*

*sons les Pharaons*, Paris 1814, tom. i. p. 98; Jablonskii *Opuscula*, Lug. Bat. 1804, tom. i. p. 336, etc.) Josephus also gives to the sons of Joktan the locality from Cophen, an Indian river, and in part of Asia adjoining it (*Antiq.* i. 6. 4). He also expressly and unhesitatingly affirms that the land to which Solomon sent for gold was 'anciently called Ophir, but now the Aurea Chersonesus, which belongs to India' (*Antiq.* viii. 6. 4). The Vulgate renders the words 'the gold of Ophir' (Job xxviii. 16) by 'tinctis Indice coloribus.' Hesychius thus defines *Σωφίρ*: *χώρα, ἐν ᾗ οἱ πολῦτοι λίθοι, καὶ ὁ χρυσός, ἐν Ἰνδία*; and Suidas,

*Σωφίρ, χώρα ἐν Ἰνδία*; and see Eusebii *Onomasi.* p. 146, ed. Clerici. There are several places comprised in that region which was actually known as India to the ancients [INDIA], any of which would have supplied the cargo of Solomon's fleet: for instance, the coast of Malabar, where the natives still call the peacock *togei*, which is supposed to resemble the Hebrew *הכיים*. Perhaps the most probable of all is Malacca, which is known to be the Aurea Chersonesus of the ancients. It is also worthy of remark that the natives of Malacca still call their gold-mines *ophirs*. De P. Poivre says, 'Les îles malaises produisent beaucoup de bois de teinture surtout du sapan, qui est le même que le bois de Bresil. On y trouve plusieurs mines d'or, qui les habitants de Malaca et de Sumatra nomment *ophirs*, et dont quelques-unes, surtout celles qui renferme la côte orientale de Celebes, et les îles adjacentes, sont plus riches que toutes celles du Perou et du Bresil' (*Voyage d'un Philosophe, Œuvres Complètes*, Paris 1797, p. 123). On the other hand, some writers give a wider extent to the country in question. Heeren observes that 'Ophir, like the name of all other very distant places or regions of antiquity—like Thule, Tartessus, and others—denotes no particular spot, but only a certain region or part of the world, such as the East or West Indies in modern geography. Hence Ophir was the general name for the rich countries of the south lying on the African, Arabian, or Indian coasts, as far as at that time known' (*Historical Researches, translated from the German*, Oxford 1833, vol. ii., pp. 73, 74). It remains to be observed, that in Jer. x. 9 we have 'the gold from Uphaz,' *אופז*; and in Dan. x. 5, 'the fine gold of Uphaz;' and see the Heb. of 1 Kings x. 18. In these instances Uphaz is, by a slight change of pronunciation, put for Ophir. The words of Daniel are quoted and paraphrased in Rev. i. 13, in a manner which shows this to be the true explanation of the difference. If the words 'the gold of Parvaim' (*פרוים*, 2 Chron. iii. 6) be really, as Bochart conjectures, the same with *אופז*, the name had undergone a still wider alteration. It was by taking this for granted, and arguing from the similarity, that the wild conjecture that Ophir was Peru was obtained. The alterations suffered by the Septuagint words are before the reader. Among other works on this controversy not before referred to, see Wahnner, *De Regione Ophir*; Tychsen, *De Commerc. Hebr. in Comment. Gott.* xvi. 164, etc.; Huetii *Commentatio de Navigatione Salomonis*; Reland, *Dissert. Miscell.* i. 172; or in Ugolini *Thesaurus*, vii.—J. F. D.

OPHNI (*העפני*), the 'Ophnite', a city of the Benjamites (Josh. xviii. 24). Properly it is *כפר העפני*, *K'far Ha-'Ophni*, the village of the 'Ophnite, like the preceding *K'far Ha-Ammoni*, village of the Ammonites. 'Ophni is probably a gentile from *עפן*, 'Ophen, the Gophna of Josephus (*Antiq.* xiv. 11. 2, et *saepe*); Ptolemy (iv. 16); and the *Onomasticon* (s. v. *φάρμαξ βότρυος*), which Robinson identifies with the modern *Jifna* or *Jifna* (*B. R.*, ii. 79; Wilson, *Lands of the Bible*, ii. 41).—W. L. A.

OPHRAH (*עפרה*, 'a fawn,' or 'dust'; *Ἐφραθά*, *Γοφερά*; Alex. *Ἀφρά*; *Ophra*, *Aphra*). 1. A town of Benjamin, situated among the mountains, and apparently not far distant from Bethel and Geba

(Josh. xviii. 23). One of the bands of Philistine spoilers was seen by the Israelites to go out from Michmash 'unto the way that leadeth to Ophrah;' and from the direction taken by the other bands, it would appear that Ophrah must have been to the north of Michmash (1 Sam. xiii. 17). Jerome locates it five miles from Bethel towards the east (*Onomast.*, s. v. *Aphra*), which pretty nearly accords with the above indication, as Bethel is north-west of Michmash. These notices also suggest the identity of Ophrah with *Ephraim*, a city which king Abijah took from Jeroboam along with Bethel. The names (עפרה and עפרון or עפרין; Greek Ἐφρών) are radically the same, only differing in termination (2 Chron. xiii. 19). We read in Josephus, also, that Vespasian captured a small town near Bethel called *Ephraim*, which appears to be the same place (*Bell. Jud.* iv. 9. 9). And probably it was to the same place, Ephraim (Ἐφραῖμ), Christ went from Jerusalem after the resurrection of Lazarus (John xi. 54; see EPHRAIM). The site has not been certainly identified. No village or ruin of that name now exists in the district. Dr. Robinson suggested that probably the village of *Taiyibeh* may be its modern representative. The site is commanding; ancient ruins exist upon it; and the position suits the ancient notices. More than this, however, cannot be said. Stanley and Van de Velde adopt the suggestion, which, however, requires confirmation (Robinson, *B. R.*, i. 447; Stanley, p. 211; Van de Velde, *Memoir*, p. 238). *Taiyibeh* is about five Roman miles north-east of Bethel, and nearly six north of Michmash.

2. A city of Manasseh, as may be inferred from the fact that it was the native-place, and burial-place, of Gideon the Manassite (Judg. viii. 27, 32; vi. 15). The angel which appeared to summon him to deliver Israel 'sat under an oak which was in Ophrah, that pertained unto Joash the Abiezrite' (vi. 11). The place was celebrated for a time on account of the idolatrous rites established by Gideon (viii. 27); but its importance soon declined, and it disappears altogether from Jewish history. Neither Eusebius nor Jerome appears to have known anything of it (Reland, p. 913). Its site has not been identified. The *Erfai* suggested by Van de Velde (*Memoir*, 338) is much too far south.

The prophet Micah, when foretelling the destruction of the land and cities of Israel, says, '*In the house of Aphrah roll thyself in the dust.*' *Aphrah* is in the Hebrew the same as *Ophrah*. The rendering in the A. V. does not express the meaning of the original very clearly or forcibly. There is a play upon the word, '*In Beth-Ophrah roll thyself in Ophr*' ('dust'); or, in the *house of dust roll thyself in dust* (Micah i. 10). *Beth-Ophrah* (לעפרה בבית); the ל appears to be merely the sign of the genitive; ξξ οίκου κατὰ γέλωτα; *in domo Pulveris pulvere vos conspergite*) is probably identical with *Ophrah* of Manasseh; and the prophet perhaps intends some allusion to Gideon's deliverance, and to the fact that there would be none like him to deliver them in time of oppression.—J. L. P.

OPITZ, HEINRICH, D.D., and successively professor of Greek, of Oriental Languages, and of Theology, in the University of Kiel, was born at Altenberg, 14th February 1642, and died at Kiel

24th January 1712. He published an edition of the Hebrew Bible, the text of which is formed on a collation of the best editions and MSS., compared with the Massora, Kiel 1709, 4to. He wrote also *Syriasmus facilitati et integritati sue Restitutus, simulque Hebr. et Chald. harmonicus*, Lips. 1691; and *Chaldaismus Targum., Talm., Rabbin. Hebraismo harmonicus*, Kiel 1696. These are very valuable books.—W. L. A.

ORATOR. This term occurs twice in the A. V., once as the rendering of the Hebrew לָחַשׁ (Is. iii. 3), which, from לָחַשׁ to whisper or mutter, properly means an incantation or magic charm [DIVINATION]; and once as the rendering of the Greek ῥήτωρ (Acts xxiv. 1), the designation of Tertullus, the advocate of the Jews who accused St. Paul before Felix [TERTULLUS].—W. L. A.

'OREB (עֹרֵב; Chald. עֲרִבָא; κόραξ; also Luke xii. 24, only). The Hebrew word occurs in Gen. viii. 7; Lev. xi. 15; Deut. xiv. 14; 1 Kings xvii. 4-6; Job xxxviii. 41, etc., where it is rendered in the A. V. RAVEN. The raven is so generally confounded with the carrion crow, that even in the works of naturalists the figure of the latter has been sometimes substituted for that of the former, and the manners of both have been mixed up together. They are, it is true, very similar, belonging to the same Linnæan genus, *Corvus*, and having the same intensely black colour; but the raven is the larger, weighing about three pounds; has proportionably a smaller head, and a bill fuller and stouter at the point. Its black colour is more iridescent, with gleams of purple passing into green, while that of the crow is more steel-blue; the raven is also gifted with greater sagacity; may be taught to articulate words; is naturally observant and solitary; lives in pairs; has a most acute scent; and flies to a great height. Unlike the crow, which is gregarious in its habits, the raven will not even suffer its young, from the moment they can shift for themselves, to remain within its haunt; and therefore, though a bird found nearly in all countries, it is nowhere abundant.

Whether the raven of Palestine is the common species, or the *Corvus Montanus* of Temminck, is not quite determined; for there is of the ravens, or greater form of crows, a smaller group including two or three others, all similar in manners, and unlike the carrion crows (*Corvus Corone*, Linn.), which are gregarious, and seemingly identical in both hemispheres. Sometimes a pair of ravens will descend without fear among a flight of crows, take possession of the carrion that may have attracted them, and keep the crows at a distance till they themselves are gorged. The habits of the whole genus, typified by the name *oreb*, render it unclean in the Hebrew law; and the malignant, ominous expression of the raven, together with the colour of its plumage, powers of voice, and solitary habits, are the causes of that universal and often superstitious attention with which mankind have ever regarded it. This bird is the first mentioned in the Bible, as being sent forth by Noah out of the ark on the subsiding of the waters; and in 1 Kings xvii. 4, ravens bring flesh and bread at morning and eve to the prophet Elijah. Here the *orebim* are manifestly true ravens, whereof a pair would be sufficient to carry the scanty meal of an Oriental

abstemious man; for, independently of the different mode of writing the name, if the word had implied persons residing at a village called Aorabi or Orbo, as presumed by some critics, there would have been no miraculous interposition of the Lord to feed the concealed prophet, but a common, and on this occasion merely a secret resolution, on the part of a few pious men, to give food to a proscribed person.—C. H. S.

OREB and ZEEB (עֹרֵב וְזֵעֵב; Sept. Ὀρεβ καὶ Ζήβ), the remarkable names (*raven and wolf*) of two emirs of the Midianites, who were made prisoners by the Ephraimites in attempting to recross the Jordan after the victory of Gideon. They were put to death by the captors, and their heads carried as a trophy to the conqueror, who was then on the other side the Jordan (Judg. vii. 25; viii. 3). The first of these princes met his death near a rock, which thenceforth bore his name (Is. x. 26); the other seems to have at first sought refuge in one of those excavations in which wines were preserved, and which was thenceforth called the winepress of Zeeb (Judg. vii. 25).

OREB, THE ROCK (צֹר עֹרֵב, Judg. vii. 25; Sept. Σοῦρ; Alex. Σουπελ, Is. x. 26; Sept. ὁ ῥόπος Σλίψεως), the place where the men of Ephraim put to death 'Oreb, one of the princes of Midian, from which it derived its name. It has not been identified. Reland (*Palest.* p. 913) thinks it must have been on the east of the Jordan, and suggests that it may have been 'Orbo, a place in the neighbourhood of Bethshean, mentioned by the Rabbinical writers. But it is more probable that the Ephraimites would intercept the Midianites on the west than on the east side of Jordan; and as Gideon seems to have crossed the Jordan in hot pursuit of the flying enemy (viii. 4), it is more probable that they carried the heads of Oreb and Zeeb to him on the east side after he had crossed, than that they carried them from the east to the west side before he had crossed.—W. L. A.

OREN (אֹרֵן) occurs only once in Scripture, and is variously translated; but from the manner in which it is introduced, it is impossible to determine whether any of the translations are correct. The *oren* is mentioned with other trees, of whose timber idols were made, where, Is. xlv. 14, though the A. V. renders it *ash*, others consider *pine-tree* to be the correct translation; but for neither does there appear to be any decisive proof, nor for the *rubus* or *bramble*, adopted for *oren* in the fable of the Cedar and Rubus, translated from the Hebrew of R. Berechiah Hannakdan, by Celsius (*Hierobot.* i. 186).

*Oren* is translated *pine-tree* both in the Greek Septuagint and the Latin Vulgate, and this has been acquiesced in by several of the most learned critics, and among them by Calvin and Bochart. Celsius (*l. c.* p. 191) states, moreover, that some of the Rabbins also consider *oren* to be the same as the Arabic *sunober* (which is no doubt a pine), and that they often join together, *arasin*, *aranim*, and *beroschim*, as trees of the same nature. Luther and the Portuguese version read cedar. Rosenmüller contends that it is not the common wild pine (*pinus sylvestris*) which is intended, but what the ancients called the domestic pine, which was raised in gardens on account of its elegant shape

and the pleasant fruit it yields, the Pignole nuts of the Italians (*Pinus pinea* of Linnæus), and quotes Virgil as saying, 'Fraxinus in sylvis pulcherrima, pinus in hortis.'

The English version instead of *pine* gives *ash* as the translation of *oren*; in consequence, probably, of *ornus* having been adopted by several translators, apparently only because the elementary letters of the Hebrew are found also in the Latin word. Celsius objects to this as an insufficient reason for supposing that the ash was intended; and there does not appear to be any other proof. *Ornus europæa*, or manna ash, does, however, grow in Syria, but being a cultivated plant, it may have been introduced. Celsius quotes from the Arab author, 'Abu l Fadli, the description of a tree called اران *arân*, which appears well suited to the passage, though it has not yet been ascertained what tree is intended. The *aran* is said to be a tree of Arabia Petrea, of a thorny nature, inhabiting the valleys, but found also in the mountains, where it is however less thorny. The wood is said to be much valued for cleaning the teeth. The fruit is in bunches like small grapes. The berry is noxious while green, and bitter like galls; as it ripens it becomes red, then black and somewhat sweetish, and when eaten is grateful to the stomach, etc., and seems to act as a stimulant medicine. Sprengel supposes this to be the caper plant, *Capparis spinosa* of Linnæus. Faber thought it to be the *Rhamnus siculus pentaphyllus* of Shaw. Link identifies it with *Flacourtia sepaiaria* of Roxburgh, a tree, however, which has not been found in Syria. To us it appears to agree in some respects with *Salvadora persica*, but not in all points, and therefore it is preferable to leave it as one of those still requiring investigation by some traveller in Syria conversant both with plants and their Oriental names and uses.—J. F. R.

#### ORGAN. [MUSICAL INSTRUMENTS.]

ORIGEN (Ὠριγένης = *born of Or*, i. e., *Horus*), surnamed the Adamantine, the most learned and one of the most influential of the Christian Fathers, was born probably at Alexandria, A.D. 185. His father, Leonidas, was a Christian, and suffered martyrdom for his attachment to the cause of Christ, A. D. 202. It is probable he was a Christian before his son's birth; for though the name borne by the latter may have had a heathen origin, it does not follow that his parents, in giving it him, were heathens; it may have been a name which, for family reasons, they wished to retain; and there are instances besides this of Christian parents giving their children names of heathen origin. Being a man of culture as well as piety, Leonidas sought to imbue the mind of his son with the love of letters as well as with sacred knowledge drawn from the Scriptures. After his father's death, Origen was enabled, by the liberality of a Christian lady, to continue his studies; and such was his progress in these, that when scarcely eighteen years of age, he was called by Demetrius, bishop of Alexandria, to fill the office of catechete. In this he faithfully laboured for many years, devoting himself also to the study of Scripture and to sacred literature generally. His reputation was widely extended by his teaching and his writings; but for some reason, probably the freedom of some of his opinions, he did not win the favour of the Christian community

at Alexandria. On his way to Greece, he was, in the year 227, ordained a presbyter in Palestine by the bishop of Caesarea, a distinction which was the source to him of much trouble and vexation to the end of his life. His sufferings in the Decian persecution hastened his decease, which took place in 254.

Origen was a man of great natural ability, of indefatigable assiduity in the pursuit of knowledge, of an independent cast of mind, of vast learning, and of great honesty of purpose. On some points of doctrine he departed from the standard of orthodoxy, for which he still rests under the censure of the Roman Catholic Church; but the services he rendered to the cause of Christianity generally, and especially to that of Biblical literature, must ever command for him a place of high honour and esteem among the worthies of the church. His collected works (some of which exist only in a Latin translation), in the best edition, that of De la Rue, occupy 4 vols. fol., Par. 1740-59, in that of Lommatzsch, 25 vols. 12mo, Berol. 1832-48. Besides Commentaries or Homilies on the principal books of Scripture (of which a separate edition was issued by Huet under the title *Origenis in SS. Commentarii quaecunque graece reperiri potuerunt*, 2 vols. fol., Rothom. 1668, Par. 1679, col. 1685), Origen wrote a reply to the attack of Celsus on Christianity (*Contra Celsum*, ed. Spencer, 4to, Cantab. 1658); a compend of theology (*De Principiis*, ed. Redepenning, Lips. 1836), a treatise on prayer (*De Oratione*, 12mo, Oxon. 1685; 4to ed., Reading, Lond. 1728), etc. A selection of remarks on difficult passages of Scripture was made from his commentaries by Basil the Great and Gregory of Nazianzum, under the title of *Philocalia* (ed. Tarinus, 4to, Par. 1619; ed. Spencer, Cantab. 1658). Origen's most important contribution to Biblical literature was his elaborate attempt to rectify the text of the Septuagint by collating it with the Hebrew original and other Greek versions. On this he spent twenty-eight years, during which he travelled through the East collecting materials. The form in which he first issued the result of his labours was that of the *Tetrapla*, which presented in four columns the texts of the LXX., Aquila, Symmachus, and Theodotion. He next issued the *Hexapla*, in which the Hebrew text was given, first in Hebrew and then in Greek letters. Of some books he gave two additional Greek versions, whence the title *Octapla*; and there was even a seventh Greek version added for some books. The arrangement was in columns, in the following order:—Hebrew in its proper characters; Heb. in Greek characters; Aquila; Symmachus; LXX.; Theodotion; 5th version; 6th; 7th. Unhappily this great work, which extended to nearly 50 volumes, was never transcribed, and so perished. Extracts from it, however, were made, and of these some have been preserved. They were collected by Montfaucon, and issued in two vols. fol., Par. 1713. An edition by Bahrdrf, in 2 vols. 8vo, appeared at Leipzig 1769-70. A few additions have been made to this collection since by various editors. Had this great work been preserved, it would have done more for the criticism of the Bible than Origen's exegetical works have done for its interpretation; for though at first he followed the grammatico-historical method of interpretation, he soon abandoned it for the allegorical, in which he indulged to a pernicious extent.—W. L. A.

## ORION. [ASTRONOMY.]

OROTH (אֹרֹת) occurs in two passages of Scripture, where it is translated *herb* in the A. V.; it is generally supposed to indicate such plants as are employed for food. The most ancient translators seem, however, to have been at a loss for its meaning. Thus the Septuagint in one passage (2 Kings iv. 39) has only the Hebrew word in Greek characters, ἀρίσθ, and in the other (Is. xxvi. 19), 'ταπα, sanationem, v. medicinam, vel herbas medicinales.' The Latin Vulgate, and the Chaldee and Syriac versions, translate *oroth* in the latter passage by *lucem*, in consequence of confounding one Hebrew word with another, according to Celsius (*Hierobot.*, vol. i., p. 459). But the Syriac and Arabic translators give the names for *mallows*, the Arabic خبيرة *khabeza*, in Lower Egypt called *habeza*.

With respect to the meaning of *oroth*, Rosenmüller says that it occurs in its original and general signification in Is. xxvi. 19, viz., *green herbs*. The future restoration of the Hebrew people is there announced under the type and figure of a revival of the dead. 'Thy dew is a dew of green herbs,' says the prophet, i. e., as by the dew green herbs are revived, so shalt thou, being revived by God's strengthening power, flourish again. The passage, however, appears an obscure one, with respect to the meaning of *oroth*. Celsius has, with his usual learning, shown that mallows were much employed as food in ancient times. Of this there can be no doubt, but there is no proof adduced that *oroth* means mallows. It might or it might not, because there are many other plants which were and still are employed as articles of diet in the East, as purslane, goosefoot, chenopodiums, lettuce, endive, etc. Some have translated *oroth* in 2 Kings iv. 39, by the word *eruca*, which is usually applied to a species of brassica.

But it appears to us that *oroth* should be considered only in conjunction with *pakyoth*; for we find in 2 Kings iv. that when Elisha came again to Gilgal, and there was a dearth in the land, he said unto his servant, 'Set on the great pot, and seethe pottage for the sons of the prophets (ver. 39); and one went out into the field to gather herbs (*oroth*), and found a wild vine, and gathered thereof wild gourds (*pakyoth*) his lap full, and came and shred them into the pot of pottage; for they knew them not.' From this it would appear that *pakyoth* had been mistaken for *oroth*; and as the former is universally acknowledged to be the fruit of one of the gourd tribe, so it is not unreasonable to conclude that *oroth* also was the fruit of some plant, for which the *pakyoth* had been mistaken. This is nothing more than conjecture, but it appears to be justified by the context, and may be admitted, as nothing better than conjecture has been adduced in support of other interpretations, and as there are fruits, such as that of the egg plant, which are used as articles of diet, and for which the fruit of the *pakyoth*, or wild gourd, might have been mistaken by an ignorant person [ΠΑΚΥΟΤΗ].—J. F. R.

ORPAH (עֲרַפָּה, *ʿaraph*; Sept. Ὀρπά), daughter-in-law of Naomi, who remained behind among her kindred in Moab, when Ruth returned with Naomi to Bethlehem (Ruth i. 4-14) [RUTH].

ORTHOSIAS (Ὀρθωσιὰς), a city on the coast of Phœnicia to which Tryphon escaped from Dora when it was besieged by Antiochus Sidetes (1 Maccab. xv. 37). It stood near to the mouth of the river Eleutherus, about twelve miles to the north of Tripoli (Plin., *Nat. Hist.*, v. 17; Strabo, xvi. p. 753; Ptol., v. 14; *Tub. Peutinger.*) The Eleutherus has been identified with the Nâhr-el-Barid (Shaw, *Travels*, p. 270, 271), and with the Nâhr-el-Kebir (Porter, *Handbook of Pal. and Syr.*); while Kiepert places Orthosia on the Nâhr Arka, which flows between these (Map in Robinson, *Later Bibl. Res.*) If the distance of Orthosia from Tripoli, as given in the Peutinger Tab. be correct, the Nâhr-el-Kebir must be discounted as beyond this distance; the Nâhr-el-Barid is within it, and the Nâhr Arka is a little beyond it. To the north of the N.-el-Barid are the ruins of an extensive city (Shaw, *l. c.*; Thomson in *Biblioth. Sac.* for 1848, p. 14), and these in all probability mark the site of Orthosia. If we adopt the statement of Pliny, that Orthosia was to the south of the river Eleutherus, it would seem that Kiepert is right in his identification of that river with the N. Arka.—W. L. A.

ORTON, JOB, S. T. P., a Congregational minister of some reputation in the last century, was born at Shrewsbury, Sept. 4, 1717, and received the rudiments of his education at the free school of his native town. In May 1733 he was placed under the care of Dr. Charles Owen of Warrington, and, in the following year, was removed to Northampton, where he pursued his studies under Dr. Doddridge. In March 1738 he was chosen assistant-tutor to Dr. Doddridge in the academy over which the latter presided. In 1741 the Presbyterian and Congregational churches at Shrewsbury united for the purpose of presenting him a joint-invitation to become their pastor, which having accepted, and refusing several invitations from other congregations, he remained with them till compelled by ill health to resign the pastoral office. After this he devoted himself to literary pursuits, so far as his health would allow, till his death, which occurred at Kidderminster, July 19, 1783. His writings, with the exception of the work about to be named, consist chiefly of sermons and sacramental meditations. The work referred to, which secures him a notice here, is—*a Short and Plain Exposition of the Old Testament, with Devotional and Practical Reflections, for the use of Families*. Edited by Robert Gentleman, from the Author's MSS., 6 vols. 8vo, 1798; 2d ed. 6 vols., 1822. It is composed on the plan of Doddridge's *Expositor*, with which it forms a complete commentary on the entire Bible. It is well adapted to the object for which it was intended, and exhibits good sense and much sound exposition. In its own department it has not been superseded.—I. J.

OSIANDER [prop. HOSEMAN], ANDREAS, was born at Guntzenhausen 19th Dec. 1498. Having studied at Leipzig, Altenburg, and Ingoldstadt, where he made great proficiency in the ancient languages, especially the Hebrew, and in mathematics, he became teacher of Hebrew in the Augustine monastery at Nuremberg; and having soon after joined the Reformation movement, he was, in 1522, appointed evangelical pastor of the church of St. Laurence in that city. In 1549 he

became professor of theology at Königsberg, where his peculiar views on some essential points of Christian doctrine involved him in continual controversies and troubles. He died suddenly 17th October 1552. Whilst at Nuremberg he prepared his *Harmonia Evangelica* (Bas. 1537, and often since), in which he endeavours to reconcile the four evangelists, on the assumption that each has observed chronological order in his narrative [HARMONIES]. Of Osiander's descendants, two have appeared as authors on subjects connected with Biblical literature. His son Lucas, born 16th Dec. 1534, died 17th Sept. 1604, was general superintendent at Stuttgart, and was the author of a Latin commentary on the Bible in 3 vols. fol. (Tüb. 1589-90, and often since); in which, taking the Vulgate as his text, he aims at the critical emendation of it, and at collecting and condensing the exegetical remarks of the best commentators. Another descendant, Johann Adam—born 3d Dec. 1622, died 26th Oct. 1697—was professor of theology at Tübingen, and wrote *Comment. in Pentateucham*, 3 vols. fol., Tüb. 1676-77; *Comment. in Josuam*, fol., Tüb. 1681; *Comm. in Libb. Samuelis*, fol., Stutt. 1687.—W. L. A.

OSPRAY. [OZNYIAH.]

OSSIFRAGE. [PERES.]

OSTERWALD, JEAN FRED., pastor at Neuchâtel, was born there in 1664, and died there 14th April 1747. During his long life he was actively engaged in pastoral and literary work; and, in company with Werenfels and Jean Alphonse Turretin—'the Swiss triumvirate'—contributed largely towards that departure from the strict orthodoxy of the preceding age, which was afterwards carried much farther than any of these intended or would have wished. Among other labours Osterwald undertook the revision of the Geneva Bible, and issued it with important improvements [FRENCH VERSIONS]. The arguments and reflections with which this was accompanied have been translated into most of the European languages, and are much esteemed.—W. L. A.

OSTRICH. [YAANAH; YA-ʿEN; RENANIM.]

OTHNIEL (אֹתְנִיֵּל, *lion of God*; Sept. Ὀθωνίᾱ), first judge of Israel, son of Kenaz, the younger brother of Caleb, whose daughter Achsah he obtained in marriage by his daring valour at the siege of Debir (Josh. xv. 17; Judg. i. 13; 1 Chron. iv. 13). Rendered famous among his countrymen by this exploit, and connected by a twofold tie with one of the only two Israelites of the former generation who had not died in the desert, we are prepared for the fact that on him devolved the mission to deliver Israel from the Mesopotamian oppression under which, in punishment for their sins, they fell after the death of Joshua and of the elders who outlived him (Judg. iii. 9). This victory secured to Israel a peace of forty years. For the chronology, etc., of this period, see JUDGES.—J. K.

OVEN. [BREAD.]

OWEN, HENRY, M.D., was born near Dolgelly in 1716; was educated at Jesus College, Oxford; was successively rector of St. Olave, London, and vicar of Edmonton; and died in 1795. Besides an able work on Scripture miracles, Lond. 1773, 2

vols., he wrote *Observations on the Four Gospels, tending chiefly to ascertain the times of their publication and to illustrate the form and manner of their composition*, Lond. 1764; *An enquiry into the present state of the LXX. Version*, Lond. 1769; *The Modes of Quotation used by the Evangelical Writers explained and vindicated*, Lond. 1789.—W. L. A.

OWEN, JOHN, D.D., was born at Stadham, Yorkshire, in 1616. His studies were prosecuted at Oxford, where, after some years at a private school, he was, at twelve years of age, entered a student of Queen's College. He took his degree of M.A. in his nineteenth year; but having become a nonconformist, he left the university soon after, and became pastor of an independent church at Coggeshall in Essex. He followed Cromwell as his chaplain in several of his expeditions, and, during the protectorate, he was made dean of Christ Church, Oxford, and vice-chancellor of the university, an office which he discharged with great ability and advantage to the university. This was in 1651, and in 1653 he received the honorary diploma of D.D. At the Restoration, being deprived of his ecclesiastical and academical position, he retired to Stadham, but ultimately became pastor of an independent church meeting in Leadenhall Street, London. He died 24th Aug. 1683, and was buried in Bunhill Fields. Owen was a man of great strength and breadth of intellect, of adamantine perseverance, of vast erudition, and of deep, vital, earnest piety. His works are very numerous; in Russells' edition (Lond. 1826), occupying twenty-eight vols. 8vo, and in that of Dr. Goold (Edin. 1850), twenty-four vols. 8vo. Of these, the greater part is devoted to systematic, polemical, and practical theology; but Owen's greatest work is an exegetical one—his *Exposition of the Epistle to the Hebrews*—originally published in four vols. fol., 1668-1684. In this work the author's vast learning and theological fulness and strength are conspicuous; no point is overlooked; no difficulty evaded; and neither the learning nor the improved methods of later writers have added anything material to what Owen has advanced in illustration of this part of the N. T. He wrote also an exposition of Ps. cxxx., but this is almost entirely practical. There is also much Biblical discussion in his *Theologumena sive de natura, ortu, progressu et studio veræ theologiae*. When Walton's Polyglott was announced, Owen, startled at the proposal to give the various readings of the text, made the serious mistake of writing against that undertaking; for which he was somewhat sharply rebuked by Walton in his *Considerator Considered*.—W. L. A.

OWL [YANSHUPH; LILITH; KIPPOZ]. Besides these, mention is made of the *Cos* (כֹּס), an unclean bird (Lev. xi. 17; Deut. xiv. 16; Ps. cii. 6). This word is mentioned in the A. V., 'little owl,' and 'owl of the desert;' and most probably designates the white or barn owl, *Strix flammea*. Bochart referred this name to the pelican, on account of the assumed signification of *cos*, 'cup,' by him fancied to point out the pouch beneath the bill; whereas it is more probably an indication of the disproportionate bulk and flatness of the head compared with the body, of which it measures to the eye full half of the whole bird, when the feathers are raised in their usual appearance. 'Cos' is only a variation

of 'cup' and 'cap,' which, with some inflexions, additional or terminal particles, is common to all

413.

the great languages of the old continent. The barn owl is still sacred in Northern Asia.—C. H. S.

OX. [BAQAR.]

OX-GOAT. [GOAD.]

OZNIYAH (עֲנִיָּה); Sept. ἄλιαετος, Vulg. *halyetus* and *haliatus*, A. V. 'ospray'), an unclean bird; but there is a difference of opinion as to the particular species intended. The etymology of the Hebrew word would seem to point to some bird remarkably *powerful, fierce, or impudent*. Bochart supposes the *black eagle* to be meant, but reasons upon the mere conjecture that by the word *μελα-vaieτος* is intended *ἀλιαετος* (*Hieroz.* tom. iii. p. 188, etc.)

The traditional meaning strongly favours the English rendering. The following is the line through which it is traced:—The modern systems of ornithology for the most part retain the names of birds given to them by Linnæus in his *Systema*

414. Ospray. [Falco Haliæetus.]

*Nature*. 'The system of Willughby is without doubt the basis on which the ornithological classification of Linnæus is founded' (Neville Wood's *Ornithologist's Text-Book*, p. 3). Mr. Ray, giving

an account of the assistance he rendered Mr. Willughby in *that* undertaking, says, 'Concerning the names of birds we did not much trouble ourselves, but have for the most part followed Gesner and Aldrovandus, being unwilling to disturb what is settled, or dispossess names that may, for their use, plead prescription' (Preface to the Eng. ed. of Willughby's *Ornithology*); and it is well known that Gesner and Aldrovandus derived their names and descriptions of birds from their predecessors, including Aristotle and Pliny. In the same preface, Mr. Ray observes, 'Gesner and Aldrovandus wrote mere pandects of birds, comprising *whatever* had *before been written by others*.' This continuation of the same names of many at least of the same birds, from Aristotle to the present day, is, in the instance of the haliaetus, or ospray, peculiarly clear and unbroken; and the same striking descriptions also of the bird so designated accompany its name from the earliest times.

The following statement places the matter in a clear light:—Aristotle, about B.C. 300, describes the *άλιαίερος* as 'a species of eagle dwelling near seas and lakes; and remarks, it sometimes happens to it, that having seized its prey, and not being able to carry it, it is drowned in the deep' (*Hist. Animal.* ix. c. 32). The word is rendered alietus in the ancient translation, aquila marina and haliaetus by Gaza (Ven. A.D. 1476), and aquila marina, neser haliaetus, and haliaetus by Scaliger. About the time of Aristotle, the ablest of all the Septuagint translators renders the Hebrew word ozniyah by *άλιαίερος*. The same word is found in the writings of Pliny (A.D. 70) with the following description:—'There remains (to be mentioned) the haliaetus, having the most penetrating vision of all (eagles); soaring (or balancing itself) on high, and upon perceiving a fish in the sea, rushing down headlong, and with its breast dashing aside the waters, seizing its prey' (*Hist. Nat.* x. 3). The same word is adopted by Jerome as answering to the Hebrew ozniyah, A.D. 380, and the haliaetus is described in the very words of Aristotle and Pliny by Aldrovandus (lib. xii. Bonon. 1594, p. 194); the transference of names into the Linnæan system has already been traced (see *Systema Nature*, vol. i. p. 129, Holmiæ 1767). The word, according to its etymology, signifies sea-eagle, and the traditional English word is ospray. The following accounts from modern naturalists are strikingly in accordance with the ancient descriptions:—

Species of the haliaetus, or sea-eagle, occur in Europe, Asia, Africa, America, and Australia (Selby's *British Ornithology*).

Mr. Macgillivray describes 'its savage scream of anger when any one approaches the neighbourhood of its nest, its intimidating gestures, and even its attempts to molest individuals who have ventured among its native crags.'

Mr. Selby (*Illustrations of British Ornithology*, 1825), respecting the ospray, observes, 'It is strictly piscivorous, and is found only in the vicinity of lakes, rivers, or such pools as abound with fish. It is a powerful bird, often weighing five pounds; the limbs are very muscular in proportion to its general dimensions; its feet are admirably adapted for retaining firm hold of its slippery prey.' Mr. Montagu (*Ornithological Dictionary*, 1802, article 'Ospray') remarks, 'Its principal food is fish, which it often catches with great dexterity, by pouncing upon them with vast rapidity, and carrying

them off in its talons.' In the supplement to his work, Exeter 1813, many additional facts are related respecting the ospray, which, together with the foregoing reasons, serve to identify it with the haliaetus of the ancients (see also Grandsagne's edition of Pliny, with Notes and Excursus by Cuvier, Parisii 1828, p. 215).—J. F. D.

## P.

PAARAI (פַּעְרַי; Sept. Alex. Φαπαει), one of David's mighty men (2 Sam. xxiii. 35, where he is described as *the Arbite*). In 1 Chron. xi. 37 he appears as Naarai the son of Ezbai (נַעֲרִי בֶן-עֵזַבַּי). Which of these is the correct reading we have no means of ascertaining, but probably that in Chronicles is to be preferred. The reading in Samuel seems to have been uncertain, for both the LXX., according to the Vat. Codex, and the Peshito Syr., differ from the Hebrew here. The former reads the verse thus, Ἀσαρὶ ὁ Καρμήλιος τοῦ Οὐραίοερχει, Asarai [Hezrai], the Carmélite son of Ouraioerchi, where the last name is formed by the omission of the initial פ in Paarai, and the combination of the other letters of that name with the following word; the latter has the reading Gari from Arub, which seems also to have arisen from the omission of the initial פ. The reading אַרְבִּי in Sam. seems preferable to נַעֲרִי in Chron.; comp. Josh. xv. 52.—W. L. A.

## PADAN-ARAM. [ARAM.]

PAGNINUS, SANCTES, born at Lucca about 1470. He became a Dominican in 1486, and was the pupil of Savonarola and others famous in theology and Oriental learning, at Fiesoli, where his rapid progress won the esteem of Cardinal de Medici, afterwards Leo X. Having received Holy Orders, he devoted himself to the duties of the pulpit, and the persuasive earnestness of his preaching made many celebrated converts. Until the death of Leo X., he was professor of a school of Oriental literature, founded by that pontiff at Rome, but, after his decease, he accompanied the cardinal legate to Avignon, and subsequently removed to Lyons, where he became a zealous opponent of the reformed religion, and was the means of founding a hospital for the plague. He died there in 1541, honoured and regretted by rich and poor.

The learned works of Pagninus have been highly esteemed by some, severely criticised by others. 1. He published at Lyons, in 1528, *Veteris et novi Testamenti nova translatio*, which had been the labour of thirty years, and was to have been published at the expense of Leo X., had he lived to see it finished. In the preface, he details the care which he had taken to make the work perfect. It is the first Latin Bible in which the verses of each chapter are distinguished and numbered as in the original, and is remarkable for the extreme closeness with which the Latin is made to follow and take the shape of the Hebrew idiom. Richard Simon charges him with this as a fault, saying that it not only makes his language obscure and barbarous, but sometimes changes the sense of the original. Servetus published a folio edition of this work, which he infected with his own errors, at Lyons,

in 1642. That of Arias Montanus, in the Antwerp Polyglott, exaggerates the peculiarities of his Latin style. Still the editions of 1599 and 1610-13, in 8vo, which give an interlinear and word for word translation of the Hebrew with the vowel points, is to this day the most convenient Hebrew Bible for beginners. 2. His *Thesaurus Linguae Sanctae*, Lyons 1529, in folio, is much esteemed. The folio edition of Geneva, 1614, by J. Mercier and A. Cavalleri, is very inferior, and in many places corrupt. There is also a Paris edition, in 4to, of 1548. 3. An abridgment of the *Thesaurus* in 8vo, with the title *Thesauri Pagniani Epitome*, was printed at Antwerp in 1616, and often reprinted. He also published—4. *Isagoges seu introductionis ad sacras litteras liber unus*, Lyons 1528, 4to, *ibid.* 1536, folio. 5. *Hebraicarum institutionum libri quatuor ex Rabbi David Kimchi priore parte fere transcripti*, Lyons 1526, Paris 1549, both 4tos. 6. An abridgment of this grammar, also in 4to, was published at Paris in 1546 and 1556. 7. *Catena Argentea in Pentateuchum*, Lyons 1536, folio, in six volumes. This is a collection of the comments of Hebrew, Greek, and Latin writers on the five books of Moses. He also produced several other learned works (*Histoire des hommes illustres de l'ordre de St. Dominique*, by Tournon; *Bibliotheca Sancta*, by Sixtus of Sienna).—M. H.

PAHATH-MOAB (פַּתַּח מוֹאָב), *Governor of Moab*; Sept. Φαῶθ Μωάβ), head of one of the families or houses of Judah which came up with Zerubbabel from Babylon, whose chief was one of those who sealed the covenant along with Nehemiah, and some of the members of which were amongst those who had taken to them strange wives (Ezra ii. 6; x. 30; Neh. vii. 11; x. 14). That such a name should be borne by one of the families of Judah appears strange. The only conjecture that throws any light on it is that the name arose with the sons of Shelah, who are said to have 'had dominion in Moab' (1 Chron. iv. 22); in this family the name may have remained as a memorial of what had been among 'the ancient things' of the tribe. The objection to this, that פַּתַּח is a word of later origin, and points therefore to some source of the name more recent than the above, may be obviated by supposing that the later word was substituted for an older one. From the position occupied by this family in the lists, and from the number of its members (Neh. vii. 11), we may infer that it was of eminence among the families of Judah.—W. L. A.

PAINTING THE EYES. [EYE.]

PAKKU'OTH (פִּקְעוֹת), and PEK'AIM (פִּקְעִים).

It is related in 2 Kings iv. 38-40, that Elisha having come again to Gilgal, when there was a famine in the land, and many sons of the prophets were assembled there, he ordered his servant to prepare for them a dish of vegetables. It appears that the servant mistook the fruit of one plant, *pakku'oth*, for something else, called *oroth*, and that the former was vine-like, that is, with long, weak, slender stems, and that the fruit had some remarkable taste, by which the mistake was discovered whenever the pottage was tasted. Though a few other plants have been indicated, the *pakku'oth* has almost universally been supposed to be one of the family of the gourd or cucumber-like plants, several of which are conspicuous for their

bitterness, and a few poisonous, while others, it is well known, are edible. Therefore one of the former may have been mistaken for one of the latter, or the *oroth* may have been some similar-shaped fruit, as, for instance, the egg-plant, used as a vegetable. The reasons why *pakku'oth* has been supposed to be one of the gourd tribe, usually the *Colocynthis*, are given in detail by Celsius (*Hierobot.*, vol. i. p. 393). 1. The name is supposed to be derived from פָּקַע, *paka*, 'to crush,' or 'to

burst;' and this is the characteristic of the species called the wild cucumber by the ancients. Thus Pliny says, 'Semen exilit, oculorum etiam periculo.' This is the kind called *Spring gurken* by the Germans, and *Squirting cucumber* in England. 2. The form of the fruit appears to have been ovoid, as the *pekaim* of 1 Kings vi. 18 are supposed to be the same fruit as *pakku'oth*, and are rendered in the A. V. by *knops*. So in vii. 24. Kimchi distinctly says these were called *pekaim*, 'quia figuram haberent *טֹוּן* *pakku'oth* agrestium.' That the form of these was ovoid would appear from the more free exposition of the Chaldaic version of Jonathan, to whom the form of the fruit could not have been unknown: 'Et figuræ ovorum subter labium ejus' (*vid.* Cels. *l. c.*, p. 397). 3. The seeds of the *pakku'oth*, moreover, yielded oil, as appears from the tract *Shabbath* (ii. 2). The seeds of the different gourd and cucumber-like plants are well known to yield oil, which was employed by the ancients, and still is in the East, both as medicine and in the arts. 4. The bitterness which was probably perceived on eating of the pottage, and which disappeared on the addition of meal, is found in many of the cucumber tribe, and conspicuously in the species which have been usually selected as the *pakku'oth*, that is, the *Colocynthis* (*Cucumis Colocynthis*), the Squirting Cucumber (*Momordica Elaterium*), and *Cucumis prophetarum*: all of which are found in Syria, as related by various travellers. The *Coloquintida* is essentially a desert plant. Mr. Kitto says, 'In the desert parts of Syria, Egypt, and Arabia, and on the banks of the rivers Tigris and Euphrates, its tendrils run over vast tracts of ground, offering a prodigious number of gourds, which are crushed under foot by camels, horses, and men. In winter we have seen the extent of many miles covered with the connecting tendrils and dry gourds of the preceding season, the latter exhibiting precisely the same appearance as in our shops, and when crushed, with a crackling noise, beneath the feet, discharging, in the form of a light powder, the valuable drug which it contains. In the Arabic version, *hunzal* (which is the *Colocynthis*) is used as the synonym for *pakku'oth* in 2 Kings iv. 39. The Globe Cucumber, Mr. Kitto continues, 'derives its specific name (*Cucumis prophetarum*) from the notion that it afforded the gourd which 'the sons of the prophets' shred by mistake into their pottage, and which made them declare, when they came to taste it, that there was 'death in the pot.' This plant is smaller in every part than the common melon, and has a nauseous odour, while its fruit is to the full as bitter as the *Coloquintida*. The fruit has a rather singular appearance, from the manner in which its surface is armed with prickles, which are, however, soft and harmless' (*Pictorial Palestine*; *Physical Geog.*, p. cclxxxix.) But this plant, though it is nauseous and bitter as

the *Colocynth*, yet the fruit not being bigger than a cherry, does not appear likely to have been that which was *shred* into the pot. Celsius, however, was of opinion that the *Cucumis agrestis* of the ancients, and which was found by Belon in descending from Mount Sinai, was the plant. This, he says, is the *Olera asini* of the Hebrews, the *Chate al hemar* of the Arabs, and the *Cucumis asininus* of the druggists of his day. This plant is now called *Momordica elaterium*, or Squirting Cucumber, and is a well-known drastic purgative, violent enough in its action to be considered even a poison. Its fruit is ovate, obtuse, and scabrous. But it is not easy to say whether this or the *Colocynth* is most likely to have been the plant mistaken for *oroth*; but the fruit of this species might certainly be mistaken for young gherkins. Both are bitter and poisonous.—J. F. R.

PALACE, in Scripture, denotes what is contained within the outer enclosure of the royal residence, including all the buildings, courts, and even gardens (2 Chron. xxxvi. 19; comp. Ps. xlvi. 4; cxxii. 7; Prov. ix. 3; xviii. 19; Is. xxiii. 13; xxv. 2; Jer. xxii. 14; Amos i. 7, 12, 14; Nahum ii. 6). In the N. T. the term palace (*αὐλὴ*) is applied to the residence of a man of rank (Matt. xxvi. 3; Mark xiv. 66; Luke xi. 21; John xviii. 15). The specific allusions are to the palace built by Herod, which was afterwards occupied by the Roman governors, and was the prætorium, or hall, which formed the abode of Pilate when Christ was brought before him (Mark xv. 16); the other passages above cited, except Luke xi. 21, refer to the residence of the high-priest.

Of the palaces mentioned in Scripture, the most interesting is the palace of Solomon, which he was occupied thirteen years in erecting. The site of this pile was in all probability on the brow facing the temple on the opposite side of the Tyropæon, within the city and looking down on it. A detailed description is given of it in 1 Kings vii. 1-12, from which, compared with the account of Josephus (*Antiq.* viii. 5. 1, 2), and the help of legitimate conjecture, it is possible to furnish a general idea of its form and arrangements.

Proceeding from without, the first part was 'the House of the Forest of Lebanon,' so called, probably, because it was constructed of cedar-wood from Lebanon (LXX. *ἡκοδόμησε τ. οἰκ. δρυμῶ τ. Λιβάνου*). This served as an audience-chamber or hall of state (Joseph. *l. c.*), and was hung around with costly armour (1 Kings x. 16, 17, 'a great house for his armour,' Arab. ver.). The Targum calls it 'the house of the cooling of the king,' probably because of the refreshing air which its size, its elevated site, and its open construction, secured for it. Some have thought it was a sort of winter-garden or conservatory; but this is less probable. Its proportions were 100 cubits of length, 50 of breadth, and 30 of height. This must be understood of the inner measurement; so that the area of this hall was larger than that of the temple, the height of both being the same (vi. 2). A solid wall of masonry surrounded the wood-work (ver. 9). The area of this hall was surrounded by four rows of cedar pillars. The statement in ver. 2 is commonly taken to indicate four straight lines of pillars, and much perplexity has been caused on this supposition by the subsequent statement (ver. 3), that there were 45 pillars, 15 in a row. If

there were 4 rows intersecting the hall lengthways, and 15 intersecting its breadth, there must have been 60 pillars in all. This has led some arbitrarily to read *three* for *four*, contrary to all the codices and all the versions, the LXX. excepted. But *טור* does not signify a series in line, but a series surrounding or enclosing (comp. vi. 36; vii. 18, 20, 24, 42; Ezek. xvi. 23); so that the four rows of pillars went round the hall, forming four aisles inside the wall, or, as the Vulgate renders the passage, 'quatuor *deambulacra* inter columnas cedrinas' (fig. 415). On these pillars beams of cedar-

415.

wood rested, running from the front to the wall, and forming a substantial rest for the upper storey.

This consisted of side chambers or galleries (*גלירות*, comp. vi. 5, 8), and it is to the number and order of these that the statement in ver. 3 refers—'And the chambers which were upon the beams, forty-five [in number], fifteen in each row [circuit] were wainscotted with cedar-wood' (*a a*, fig. 416). These

416.

were roofed with beams (*שקפים*, rendered in the A. V. 'windows,' which the word never means) in three rows, *i.e.*, there were three storeys of galleries, and in these *sights* (*מִהָהָה*; Sept. *χώραι*), over against each other in three ranks, *i.e.*, each chamber in the three storeys had an opening to the interior, facing a corresponding opening in the opposite chamber (*b b*, fig. 416). The different compartments of the galleries communicated with each other by means of doors. These, as well as the windows (the LXX. have *χώραι* in ver. 5, which shows that they read *הַמִּינִיּוֹת* where the present reading is *הַמִּינִיּוֹת*, of which it is impossible to make sense), were square with an overbeam. These galleries were probably reached by a winding stair in the outer wall (*d d*, figs. 415 and 416, as in the temple (vi. 8).

From this description, the idea we form of 'the House of the Forest of Lebanon' is that of a large hall, open in the centre to the sky, the floor of which was surrounded with four rows of pillars, affording a promenade, above which were three tiers of galleries open to the interior, divided each into fifteen compartments like the boxes in a theatre,

but with doors communicating with each other. As the height of the entire building was thirty cubits, we may divide this so as to allot eight feet to the supporting pillars, eighteen to the galleries, and four to the beams and flooring of the galleries. The building, thus conceived, answers to the description of it by Josephus, as *Κορυθίως ἐστεγασμένως*, by which he means, not that it was in the Corinthian style of architecture (Keil), nor that it was 'a hall with a clerestory' (Smith's *Dict. of the Bible*, ii. 659); but that it was built after the Corinthian fashion—that of a hall, surrounded by a row of pillars with heavy architraves, on which rested beams running to the wall, and supporting a floor, which again supported shorter pillars, between which were windows, the whole being hy-

pæthral (Vitruv. vi. 3. 1). Vitruvius says this kind of building resembled the basilica. If for one gallery we substitute three, the above description answers very closely to that of Solomon's House of the Forest of Lebanon. It is possible, however, the whole may have been roofed over and lighted by a clerestory.

If now we regard this building (B, fig. 417) as placed lengthwise in the middle of a court (A), it is easy to understand the arrangement of the portico of pillars (D), the length of which was the same as the breadth of the building (ver. 6). These did not run along the side of it, but were behind it, forming a colonnade fifty cubits long by thirty wide, conducting to the residence of the king. This terminated in a porch, or entrance-hall, which

417.

had pillars and an עב, *i. e.*, a threshold or perron (A. V. 'thick beam'; Targ. סקופתא, *segofatha*, *limen*). By this was entered the throne-room or hall of judgment (E), which was wainscotted with cedar from floor to ceiling הקירות [this is the reading followed by the Vulg. and Syr. instead of מהקרקע עד, which is a manifest error].

Then came the king's residence in another court (F) behind the throne-room; and of this the residence of the queen, which may or may not have been the harem, formed a (probably the back) part. The space G is added conjecturally, for the court containing the offices of the palace, and perhaps 'the king's prison.' All these buildings were externally of hewn stone, and the whole was surrounded by a solid wall enclosing a court.

In the above attempt to restore the palace of Solomon from the Bible account of it, the writer has closely followed Otto Thenius in the *Exeget. Hdbuch. zum A. T.* Nowhere else has he been able to find anything satisfactory on the subject. The account of Josephus is evidently a sketch from fancy on a basis of traditional information more or less correct. In works on Hebrew archaeology, the subject is usually omitted or passed over very cursorily; and the same course is followed even by writers who have made ancient architecture their special subject, as Stieglitz and Hirt. Of those who have attempted to throw light on the subject, some have understood Hebrew but not architecture, and some have understood architecture but not Hebrew. Thenius is the first who has brought both qualifications to bear upon the

elucidation of the Bible statement. His scheme, however, is liable to some objections. To the arrangement of the pillars, for instance (fig. 415), it may be objected—1. That, according to the proportions he has given, it is impossible that there should be space for a promenade between these pillars; and if a wider space were allowed the central area would be too much narrowed; and 2. One does not see what purpose could be served by such a crowded range of pillars; it is neither ornamental nor useful. The writer ventures to suggest that the four courses of pillars were not on the same area, but one above the other, corresponding to the four floors of the building. This agrees with the statement in the text that 'the height thereof was

418.

thirty cubits upon four rows of cedar pillars' (ver. 2), *i. e.*, the whole height was divided among the four rows or courses of pillars; and an arrangement is produced very like what one sees in Oriental halls in the present day. It may be doubted also if for a building intended evidently to

contain a large number of people, entrance to the galleries would be effected by a stair in the wall; it

d  
419.

is more probable that a wide stair (d, fig. 418) gave access to them. In accordance with these sugges-

420.

tions the plan of this great hall may be given, as in figs. 418 and 419; fig. 420 gives a sectional view of it. In figs. 419 and 420 there is introduced a passage running round the interior of the gallery, and giving access to the rooms; this is perhaps unnecessary, as the chambers communicated with each other; but it is a possible arrangement, and is therefore given.—W. L. A.

PALAIRET, ELIAS, was one of the latest of the *Classical* commentators who attempted to illustrate the language of the N. T. from the usage of the various authors of classic Greek, a line of interpretation which, in the early part of the last century, grew into especial favour with many eminent scholars, both on the continent and in this country. Palairet, who was a French Protestant minister, living at Tournay in Belgium, published at Leyden, in 1752, in an octavo volume, some short notes of classical illustrations of sundry passages of the N. T. These he entitled: '*Observationes philologico-criticae in Sacros Novi Fœderis libros.*' These notes indicate much learning, but they partake of the fault of the school, by exaggerating the likeness of the sacred to the classic Greek authors. Palairet, who seems to have afterwards undertaken the pastorate of a French congregation at Greenwich, issued in the year 1755 a specimen, printed in London, of a much larger work, partaking of the character of a continuous commentary on all the books of the N. T., on the principles of his *Observationes*. The work, however, which was to have been published by subscription, never appeared.—P. H.

PALESTINE (פָּלֶשְׁתִּין; Παλαιστίνη; *Palastina*), the name now generally given to the country originally promised to, and long occupied by, the Israelites. The name is not strictly accurate. Its use in this extended sense is comparatively modern, but it has, in recent times, become so definite and so universal among Biblical geographers and Eastern travellers, that it appears to be the most appropriate to place at the head of an article in which it is intended to give a general description of the geography of the Holy Land.

The name is Biblical in its origin; but let it be understood at the outset, that, in the sense in which it is now employed, it does not occur in the original language of Scripture, nor in the A. V. Both in the English form *Palestine* (Joel iii. 4), and in the Latin *Palastina* (Exod. xv. 14; Is. xiv. 29, 31), it means *Philistia*, 'the land of the Philistines;' and so it was understood by our translators. In the present article it is used in a much wider sense. It is employed in the same sense in which most of the Greek and Roman geographers understood it—as denoting the whole land allotted to the twelve tribes of Israel by Joshua. Some recent writers confine the name to the country west of the Jordan, and extending from Dan on the north to Beersheba on the south. Others again appear to extend it northwards as far as the parallel of Hamath, and southward to the borders of Egypt. It is here used, however, to denote the country lying on the east as well as the west side of the Jordan; while, on the other hand, it is confined to the territory actually divided by lot among the Israelites, thus excluding large sections of what is generally known as 'The Land of Promise.' Palestine, in fact, is here taken as synonymous with 'The Holy Land,'—the land given by the Lord to his chosen people, and long held by them.\*

For the sake of order, and to give as full a view of the country as the necessarily narrow limits of this work will permit, the following points will be taken up in succession:—

I. The Situation and Boundaries of Palestine.

II. The Names which have been given to the country in ancient and modern times.

III. The Physical Geography of Palestine, including an account of its climate, plants, and animals.

IV. The Geology.

V. The Political and Historical Geography, with notices of the Inhabitants, ancient and modern.

THE SITUATION AND BOUNDARIES.—The geographical position of Palestine is peculiar. It is central, and yet almost completely isolated. It commands equal facilities of access to Europe, Africa, and Asia; while, in one point of view, it stands apart from all. The Jews regarded it as the centre of the earth; and apparently to this view the prophet Ezekiel refers when he says, 'Thus saith the Lord God, This is Jerusalem: I have set it in the midst of the nations and countries that are round about her' (v. 5). The idea was adopted and perhaps unduly expanded by the Rabbins and some of the early Christian fathers;† but

\* It will afterwards be shown that the boundaries of Palestine did not *exactly* correspond on the north and south with the country allotted to the tribes, yet they did *very nearly* correspond with the territory eventually occupied. Asher's portion reached as far north as Zidon; but the tribe does not appear to have extended its conquests beyond the Litány. The boundary of Judah was from Kadesh to the river of Egypt (el-Arish), but the arid plain south of Beersheba was never occupied.

† One of the absurd Christian traditions still preserved in Jerusalem is, that the Church of the Holy Sepulchre is the physical centre of the earth; and a spot is marked by a circle of marble pavement and a short column under the dome of the Greek Church, which is said to be the exact point, as indicated by our Lord himself (*Handbook*, p. 164).

it is, in principle, strictly true. Palestine stood midway between the three greatest ancient nations, Assyria, Egypt, and Greece. It was for many centuries the centre, and the only centre, of religious light and of real civilization, from which all other nations, directly or indirectly, drew their supplies. It is a remarkable fact, a fact which every thoughtful student of history must admit, that during the whole period of Jewish history, light—intellectual, moral, and religious—radiated from Palestine, and from it alone. The farther one receded from that land, the more dim the light became; and the nearer one approached, it shone with the purer radiance. The heavenly knowledge communicated in 'sundry times and divers manners' through the Jewish patriarchs and prophets, was unfolded and perfected by our Lord and his apostles. In their age, Palestine became the birth-place of intellectual life and civil and religious liberty. From these have since been developed all the scientific triumphs, all the social progress, and all the moral greatness and grandeur of the civilized world. There was a fulness of prophetic meaning in the words of Isaiah, which is only now beginning to be rightly understood and appreciated; 'Out of Zion shall go forth the law, and the word of the Lord from Jerusalem. And he shall judge among the nations, and shall rebuke many people; and they shall beat their swords into plowshares, and their spears into pruning-hooks' (ii. 3, 4).

Palestine is, by the peculiarity of its situation, almost isolated. Connected physically with the great body of the Asiatic continent, it is yet separated from the habitable parts of it by the arid desert of Arabia, which extends from the eastern border of Syria to the banks of the Euphrates, a distance of nearly 300 miles. Another desert, not altogether so wide nor so difficult, sweeps along the southern confines of Palestine, as a barrier against all Egyptian invaders, and in a great measure preventing communication with that nation. The Mediterranean completely shut out the western world. Thus, on three of its sides—the east, the south, and the west—was Palestine isolated. Its only direct link of connection with the outer world was Syria on the north; and even there, the lofty chains of Lebanon and Hermon confined the channel of communication to one narrow pass, the valley of Coele-Syria. 'These,' says Stanley, 'were the natural fortifications of that vineyard which was 'hedged round about' with tower and trench, sea and desert, against the 'boars of the wood' and 'the beasts of the field'' (*Sin. and Pal.*, p. 114).

It was not without a wise object the Almighty located his chosen people in such a land. During a long course of ages they were designed to be the sole preservers of a true faith, and the sole guardians of a divine revelation. It was needful, therefore, to separate them geographically from the evil example and evil influences of heathen nations; and by the munitions of nature to defend them, and that precious record of God's will committed to their custody, from all assaults, physical as well as moral. It has been well said by a recent thoughtful writer, that 'the more we learn of its relative position in regard to surrounding countries, and of its own distinctive characteristics, the more clearly is the wisdom of Heaven recognised in its special adaptation to the purposes for which it was chosen and consecrated' (Drew, *Scripture Lands*,

p. 2). But when Judaism was at length developed into Christianity—when the grand scheme of redemption was removed, by the sufferings and death of the divine Saviour in Palestine, from the region of dim prophecy into that of history; then the religion of God was finally severed from its connection, hitherto necessary, with a specific country and a chosen people—it became the religion of mankind. Then Palestine ceased to be God's country, and Israel to be God's people. The isolation of the land hitherto preserved the true faith; the exclusiveness of the people formed an effectual safeguard against the admission of the philosophical speculations and corrupt practices of other nations; but after the resurrection of Christ, and the establishment of that pure, rational, spiritual faith revealed in the N. T., such material defences were no longer requisite. They would have been even prejudicial to the truth. Palestine was the *cradle* of the religion of God; on reaching full maturity, the cradle was no longer a fitting abode; the world then became its home and sphere of action. And at that transition period the position of Palestine appeared as if specially designed to favour and consummate the divine plan, by the ready access it afforded for the messengers of truth to every kingdom of the known world. Before the establishment of Christianity, the sea had become the highway of nations. The Mediterranean, hitherto a barrier, was now the easiest channel of communication; and from the shores of Palestine the Gospel of Jesus was wafted away to the populous shores and crowded cities of the great nations of the West. It is thus that a careful study of the geographical position, the physical aspect, and past history of Palestine, is calculated to throw clear light on the development of the divine plan of salvation; and to afford some little insight into the councils of Jehovah.

Climate has a great influence upon man. That climate which is best adapted to develop the physical frame, to foster its powers, and to preserve them longest in healthy and manly vigour, is the most conducive to pure morality and intellectual growth. The heat of the tropics begets lassitude and luxurious effeminacy, while the cold of the arctic regions cramps the energies, and tends to check those lofty flights of poetic genius which give such a charm and sweetness to human life. Situated about midway between the equator and the polar circle, Palestine enjoys one of the finest climates in the world. Fresh sea-breezes temper the summer heats; the forests and abundant vegetation which once clothed the land diffused an agreeable moisture through the bright sunny atmosphere; while the hills and mountains made active and constant exercise necessary, and thus gave strength and elasticity to the frame. Palestine has given to the world some of the most distinguished examples of high poetic genius, of profound wisdom, of self-denying patriotism, of undaunted courage, and of bodily strength. The geographical position and physical structure of the land had much to do with this. God in his infinite wisdom and love placed his elect people in the very best position for the development of all that was great and good.\* Well might the Lord

\* This subject is well brought out by Drew in his *Scripture Lands*, pp. 10, *seq.* He shows not merely the effects of climate upon man physically

say by the mouth of his prophet, 'What could have been done more to my vineyard, that I have not done in it?' (Is. v. 4).

The *Boundaries of Palestine* require to be defined with care and minuteness. Much confusion has arisen in Biblical geography from the way in which this subject has been treated, and from the diversity of views which prevails. No two writers agree on all points. The accounts of ancient geographers—Greek, Roman, and Jewish—are unsatisfactory, and sometimes contradictory; and when we come down to more modern times we do not find much improvement. Some authors confound Palestine with 'the Land of Promise,' as mentioned in Genesis and Exodus, and with the land defined by Moses in the book of Numbers (Reland, *Pal.*, 113, *seq.*; Cellarius, *Geogr.* ii. 464, *seq.*; Hales, *Anal. of Chronology*, i. 413; Kitto, *Physical Hist. of Pal.*, p. xxviii.; Jahn, *Biblical Antiquities*; *Encyclopæd. Britan.*, art. *Palestine*, 8th ed.) Others confine the name to the territory west of the Jordan, and reaching from Dan to Beersheba (Grove, in Smith's *Dict. of Bible*, art. *Palestine*). Even Dean Stanley, usually so accurate and so careful in his geographical details, does not express his views with sufficient clearness on this point (*Sin. and Pal.*, pp. 111, 114).

It may be well, therefore, in this place, to state precisely the several boundaries of the country mentioned in the Bible:—(1), As promised to Abraham and his seed; (2), As described by Moses before his death; (3), As actually allotted to the twelve tribes by Joshua; and (4), As set forth in the prophetic vision of Ezekiel. This, it is hoped, will prevent misconception and confusion, and will contribute to a fuller understanding of one of the most important branches of Biblical geography. It will show, too, how far Palestine, as the name is now applied, corresponds in extent and boundaries with those lands described by the ancient prophets.

(1.) *Boundaries of the Land promised to Abraham.*—The first promises made to Abraham were indefinite. A country was ensured to him, but its limits were not stated. The Lord said to him at Sichem, 'Unto thy seed will I give this land' (Gen. xii. 7); and again, on the heights of Bethel, after Lot had left him, 'Lift up now thine eyes, and look from the place where thou art, northward, and southward, and eastward, and westward; for all the land which thou seest, to thee will I give it, and to thy seed for ever' (xiii. 14, 15). It was a commanding spot, but still that view did not embrace one-fourth of Palestine. At length, however, the boundaries were defined; in general terms, it is true, but still with sufficient clearness to indicate the vast extent of territory

and morally, but also the effects of the circumstances amid which they were placed, and the people by whom they were surrounded, in moulding the manners and training the warriors of Israel. It is worthy of note, also, as tending to corroborate the above view of the influence of climate upon character, that the inhabitants of the plain of Sodom—a low, hot, unhealthy region—were the most corrupt in western Asia; and Lot's brief residence among them appears to have had a fatal influence on himself and his family, destroying in them all principles of pure morality and even of shame.

promised to Abraham's descendants; 'In the same day the Lord made a covenant with Abraham, saying, unto thy seed have I given this land, *from the river of Egypt unto the great river, the river Euphrates*' (xv. 18). 'The river of Egypt' was doubtless the Nile. It should be observed that the Hebrew word is נהר, river (LXX., ποταμός), and not נחל, 'wady,' or 'torrent bed,' as in Num. xxxiv. 5 (LXX., χελμαρρος), where Wady el-Arish seems to be meant (see Kalisch, Delitzsch, etc., *ad loc.*) From the banks of the Nile, then, to the Euphrates, the country promised to the patriarch extended. The covenant was renewed with the Israelites just after their departure from Egypt, and the boundaries of the land were given with more fulness: 'I will set thy bounds from the Red Sea even to the Sea of the Philistines (the Mediterranean); and from the desert (of Sinai) unto the river' (Euphrates; עַד־הַנָּהָר; ἕως τοῦ μεγάλου ποταμοῦ Εὐφράτου; Exod. xxiii. 31).\*

But this great territory was promised upon certain specific conditions. The people were, on their part, to be faithful to God (vers. 22, 23). They did not fulfil these conditions, and therefore the whole land was not given to them (see Josh. xiii. 13-16; Judg. ii. 20-23). But though the whole land was never occupied by the Israelites, there was a near approach to the possession of it, or the exercise of sovereignty over it, in the days of David, of whom it is recorded: 'David smote also Haddad-ezer, the son of Rehob, king of Zobah, *as he went to recover his border at the river Euphrates*' (2 Sam. viii. 3). That warlike monarch conquered the kingdoms of Hamath, Zobah, Damascus, Moab, Ammon, Amalek, Philistia, and Edom (vers. 5-14)—the whole country, in fact, from the border of Egypt to the river Euphrates, and from the Arabian desert to the Mediterranean. This was the land given in covenant promise to Abraham; but it was never included under the name *Palestine*.

(2.) *The land described by Moses* in Num. xxxiv. 1-12 is much more limited in extent than that promised to Abraham. He calls it 'the Land of Canaan—the land that shall fall unto you for an inheritance' (ver. 2). Its boundaries are defined with great precision. On the *south* the border reached from Kadesh-barnea in the Arabah, on the confines of Edom, across the 'wilderness of wandering,' to the *torrent† of Egypt*, doubtless that now known as Wady el-Arish. The Great Sea was

\* Reland's note upon this passage is deserving of attention: 'Adeoquē distinguenda est promissio possessionis hæreditariæ (quæ complectitur regionem sorte inter tribus novem et dimidiam distributam ad occidentem Jordanis) et promissio domini, id est, illius terræ quam aliquando acquisituri essent, uti sub imperio Davidis et Salomonis vere ad mare Suph et Euphratem dominati sunt, quum alias regiones olim ipsis haud assignatas adsciverunt' (*Palestina*, p. 20). The distinction here drawn is ingenious, but it is not supported by any Scriptural authority. The true reason why the Israelites did not inherit and possess the whole land of promise is plainly stated in Scripture.

† The word is here נחל, 'torrent,' and not נהר, 'river.' This important distinction has been overlooked by Dr. Keith and others (*Land of Israel*, pp. 85, *seq.*; Bochart, *Opera*, iii. p. 764; Shaw, *Travels*, ii. 45, *seq.*)

its western border. The northern is thus defined: 'And this shall be your north border; from the great sea ye shall point out for you Mount Hor; from Mount Hor ye shall point out unto the entrance of Hamath; and the goings forth of the border shall be to Zedad; and the border shall go on to Ziphron, and the goings out of it shall be at Hazar-enan' (vers. 7-9). The interpretation of this passage has given rise to much controversy. Dr. Keith argues with considerable force and learning that Mount Hor, or, as it is in the Hebrew, *Hor Ha-Har* (הַר הָהָר), is Mount Casius, and that the

chasm of the Orontes at Antioch is 'the entrance of Hamath.' This view, however, is rendered altogether untenable by more recent researches, and especially by the discovery of the sites of Riblah and Zedad (but see Keith's *Land of Israel*, pp. 92-105). Dr. Kitto, on the other hand, following Reland (*Pal.* 118, *seq.*), Bochart (*Opera*, i. 307), and Cellarius (*Geogr.*, ii. 464, *seq.*), locates this northern border-line near the parallel of Sidon, making some peak of southern Lebanon Mount Hor, and the lower extremity of the valley of Coele-Syria the 'entrance of Hamath.'

The writer of this article considers both these views erroneous. He had opportunities of surveying the whole region with the view of solving this geographical puzzle, and discovering the northern border as defined by Moses. He believes that he has been successful. The land, or kingdom of Hamath, is the great plain which extends on both banks of the Orontes from the city of Hamath up to the great fountain near Riblah. The 'entrance of Hamath' is the entrance from the Great Sea, from the west (vers. 7, 8). Here there is but one entrance, and no traveller can fail to see it. The range of Lebanon runs parallel to the sea-coast from the plain of Acre to a point opposite the plain of Hamath; there it terminates abruptly. A few miles to the north the range of Bargylus begins and runs in the same line to Antioch. Between the two is a pass or gap, which forms the natural and indeed the only entrance to Hamath from the sea and the western coast. To this day natives sometimes call it *Bāb Hamath*, 'The door of Hamath.'

This view is corroborated by several incidental notices in Scripture. A comparison of Ezek. xlvii. 15 with verse 20, and Num. xxxiv. 7, 8, shows that 'the way of Hethlon, as men go to Zedad' (from the sea), was identical with 'the entrance of Hamath.' Now the site of Zedad is the village of *Sudud*, which lies in the plain due east of the pass between the Lebanon and Bargylus ranges [ZEDAD]. And further, the territory of Hamath was included in the land described by Moses (Num. xxxiv. 8-11), and by Ezekiel (xlvii. 15-20): and 'the entrance to Hamath' is one of the marks of its northern border; consequently, to place it in the parallel of Sidon, or at the base of Mount Hermon, is manifestly inaccurate, for this is far south of Hamath. Again, that portion of the country not subdued by Joshua, and yet included in the description of Moses, extended 'from Baalgad under Mount Hermon unto the entering into Hamath,' embracing the land of the Gibletes and all Anti-Lebanon (Josh. xiii. 5; cf. Judg. iii. 3); that is, all the two ridges of Lebanon from their southern to their northern extremities (cf. 1 Kings vii. 65; 2 Chron. vii. 8; 2 Kings xiv. 25). Van

de Velde appears to make the northern end of Coele-Syria, where that valley opens upon the plain of Hamath, 'the entrance of Hamath' (*Travels*, ii. 470); and Stanley adopts the same view (*Sin. and Pal.*, 399). But this is inadmissible, because (a), This is not, and could not be the entrance of Hamath from the sea, though it may be from Palestine; (b), This opening of the valley of Coele-Syria is considerably to the south of Riblah, Zedad, and Ziphron—all of which were within the promised land; and (c), The valley of Coele-Syria adjoins the extreme southern border of Hamath (see HAMATH; Porter's *Damascus*, ii. 354; Robinson, *B. R.*, iii. 568).

The settlement of the 'entrance of Hamath' fixes the position of Mount Hor. *Hor Ha-Har* must be the northern and culminating peak of the Lebanon range near the cedars. And this is emphatically *the mountain* as seen from the sea, or from the western coast. The northern border, therefore, beginning at the sea, apparently at or near the mouth of the river Eleutherus, ran eastward to the northern peak of Lebanon; thence it swept round through the pass, and extended north-east to Hamath; then it turned south-east by Ziphron (Zifrün), and Zedad (Sudud), to Hazar-enan (Kuryetein).

The east border has some well-known landmarks—Riblah, the Sea of Chinnereth, and the Jordan to the Dead Sea (Num. xxxiv. 10-12). The line ran down the valley of Coele-Syria and the Jordan, thus excluding the whole kingdom of Damascus, with Bashan, Gilead, and Moab. It would seem, however, that the country east of the Jordan was excluded by Moses, not because he regarded it as beyond the proper boundaries of the land of Israel, but because it had been already apportioned by him to the tribes of Reuben, Gad, and Manasseh (xxxii. 1-33; xxxiii. 50-54).

The Israelites were never in actual possession of all this territory, though David extended his conquests beyond it, and Solomon for a time exacted tribute from its various tribes and nations. The southern seaboard, and a large section of the Shephelah, remained in the hands of the warlike Philistines. The Phœnicians held the coast-plain north of Carmel; and the chain of Lebanon, from Sidon northward, continued in possession of the Gibletes and other mountain tribes (Judg. iii. 1-3). It is worthy of note that the sacred writer, when reckoning up the regions still to be conquered, was guided not by the words of the Abrahamic covenant, but by the description of Moses (Josh. xiii. 2-6). And the reason why this whole land was not given to the Israelites is plainly stated. The Lord kept some of the aboriginal inhabitants in it for the purpose of chastising the criminal slothfulness, and the thoughtlessness and rebellion of his people (Judg. iii. 4; see Masius and Keil, *ad loc.*) Such, then, is the land described by Moses; but the name Palestine was never given to so extensive a region.

(3.) *The boundaries of the land allotted by Moses and Joshua to the twelve tribes* are given in the following passages—those of the land east of the Jordan in Num. xxxii. and Josh. xiii. 8-32; on the west side in Josh. xv.-xix.

The south border was identical with that described by Moses (cf. Num. xxxiv. 3-5; Josh. xv. 2-4). The west border was also the same; the possessions of the western tribes reaching in every

instance to the sea (Josh. xv. 11; xvi. 3, 8; xvii. 9, 10; xix. 29). The north border had Zidon as its landmark on the coast. Thence it was drawn south-east across Lebanon, probably along the line of the ancient Phœnician road by Kulaat esh-Shukff to Ijon and Dan (Josh. xix. 28; 1 Kings xv. 20); thence it passed over the southern shoulder of Hermon, and across the plateau of Haurân to the northern end of the mountains of Bashan (Num. xxxii. 33; Deut. iii. 8-14; Josh. xii. 4-6). The only landmark on the east border is Salcah (Josh. xii. 5; xiii. 11; Deut. iii. 10). From Salcah it appears to have run south-west along the border of the Arabian *Midbar* to the bank of the river Arnon (Josh. xii. 1, 2). Here it turned westward, and followed the course of the river to the Dead Sea, thus excluding the territory of Moab and Edom.

The country allotted to the tribes was thus considerably smaller than that described by Moses; and it was not more than one-third the extent of that given in covenant promise to Abraham. And even all allotted was never completely conquered and occupied. The Philistines and Phœnicians still possessed their cities along the coast (Judg. i. 19, 31); some of the northern tribes held their mountain fastnesses (ver. 33); and the Geshurites and Maachathites continued in their rocky strongholds in Bashan (Josh. xiii. 13).

(4.) *The land described in the prophetic vision of Ezekiel* is conterminous on the south, west, and north, with that of Moses. Its eastern boundary is different. Its landmarks are Hazar-enan, Haurân, Damascus, Gilead, and 'the land of Israel by Jordan' (xlvi. 17, 18). The last point is indefinite; but probably it means that section east of the Jordan, in Moab, which was assigned to Reuben. This land, therefore, includes, in addition to that of Moses, the whole kingdom of Damascus, and the possessions of Reuben, Gad, and half Manasseh.

These facts and descriptions will serve, it is hoped, to keep before the student's mind the important distinction between the land promised in covenant to Abraham, the land defined by Moses, the land allotted to the twelve tribes, and the land depicted by Ezekiel.

The country to which the name Palestine is now usually given does not exactly correspond with any of these. It is smaller than them all. Its boundaries have never been laid down with geographical precision; but they may be stated approximately as follows:—On the south a line drawn from the lower end of the Dead Sea to Beersheba and Gaza; on the west, the Mediterranean; on the north, a line drawn from the mouth of the river Litâny to Dan, and thence across Jebel el-Hish and the plain of Haurân to the northern end of the Haurân mountains; on the east, a line running from the north-eastern angle through Salcah to Kerak and the Dead Sea. The length of Palestine is thus 140 English miles. Its breadth on the south is 75 miles, and on the north about 100. Its superficial area may be estimated at 12,000 square miles. Its southern extremity, the end of the Dead Sea, is in lat. N.  $31^{\circ} 5'$ ; and its northern, at the mouth of the Litâny,  $33^{\circ} 25'$ . Its most westerly point, at Gaza, is in long. E.  $34^{\circ} 30'$ ; and its most easterly, at Salcah,  $36^{\circ} 37'$ .

The eastern shore of the Mediterranean runs in nearly a straight line from Egypt to Asia Minor,

and of this line the seaboard of Palestine forms about one-third towards, not at, its southern end;—Gaza being 50 miles distant from Egypt, while the mouth of the Litâny is 250 from Asia Minor. Palestine occupies the whole breadth of the habitable land between the Mediterranean and the Arabian desert. Its boundaries on three sides are therefore natural, and may be said to be impassable—on the west the sea, and on the south and east the desert; not, however, a desert of sand, nor a desert altogether barren, but rather a bleak dry region, with a thin, flinty soil, yielding some tolerable pasture in spring, though almost bare as a rock in summer and autumn. Nature thus prevented the extension of the Israelitish territory in these directions, and likewise prevented the close approach of any settled nation; but it left free scope for flocks and herds, and a noble field for the training of an active, hardy race of shepherd warriors, such as David so often led to victory.

On the south-east, Palestine bordered on Edom; but the Dead Sea, the deep valley of the Arabah, and the rugged Wilderness of Judæa, formed natural barriers which prevented all close intercourse. Hostile armies found it difficult to pass them, and a few resolute men could guard the defiles. On the northern border lay the countries of Damascus and Phœnicia, and intercourse with these had a serious effect on the northern tribes. The distinction between Jew and Gentile soon became less sharply defined there than elsewhere. The former lost much of their exclusiveness, and their faith lost proportionably in purity. Idolatry was easily established in the chief places of the northern kingdom, and the borrowed *Baalim* of Phœnicia became in time the popular deities of the land (1 Kings xviii.) This fact of itself shows how wise was that providential arrangement which located the people of God in an isolated land, and prevented, by the barriers of nature, any close intercourse with those irrational systems, and barbarous and often obscene rites, which, under the name of religion, prevailed among the nations of the world.

It must strike every thoughtful man how very small a country Palestine is, to have occupied such an important place in the world's history, and to have produced such wondrous effects on the destiny of mankind. It is not quite double the size of Wales. Belgium is the nearest to it in extent among the kingdoms of modern Europe; it was considerably smaller than Holland, Hanover, and Switzerland. Its clear atmosphere, and the peculiarity of its physical structure—having a mountain range running down its centre—make it appear to the traveller's eye smaller than it really is. From almost every prominent peak in Central Palestine, the eastern, western, and northern boundaries are in view. The writer, on one occasion, saw nearly the entire country from the top of Mount Hermon—the Mediterranean on the west, the mountains of Bashan on the east, and the Dead Sea away on the distant south.

II. THE NAMES.—It is important to know the origin, history, and exact signification of the several names which in the Bible and in classic writers are given to Palestine. The name Palestine itself, though of comparatively recent date, as applied to the whole country, demands our first notice.

1. *Palestine*.—In the A. V. of the Bible, the word 'Palestine' only occurs in Joel iii. 4 (פְּלִשְׁתִּין).

פלשתי; Γαλιλαία ἀλλοφύλων, *terminus Palesthinorum*); 'What have ye to do with me, O Tyre, and Zidon, and all the coasts of Palestine?' Here the name is confined to Philistia. In three passages (Exod. xv. 14; Is. xiv. 29, 31), we have the Latin form *Palestina*; but the meaning is the same, and hence the Septuagint renders it in one case Φυλιστιελμ, and in the others ἀλλόφυλοι.

The Hebrew word פלש, probably comes from the Ethiopic root **ፈለሰ**, *falasa*, 'to wander,' or 'emigrate,' and hence פלשת will signify 'the nation of emigrants'—the Philistines having emigrated from Africa (PHILISTINES; see Reland, *Pal.*, 73, *seq.*) The people gave their name to the territory in which they settled on the south-west coast of Palestine. Such is the meaning given to the word פלשת by the sacred writers. In this sense, also, Josephus uses the Greek equivalent Παλαιστίνη (*Antiq.* i. 6. 2; ii. 15. 3). But it would seem that even before his time the Greek name began to be employed in a more extended signification. Herodotus states, that all the country from Phœnicia to Egypt is called *Palestine* (vii. 89); and he calls the Jews 'Syrians of Palestine' (iii. 5, 91). This extension of the name doubtless arose from the fact, that when the Greeks began to hold commercial intercourse with Phœnicia and south-western Asia, they found the coast from Phœnicia to Egypt in possession of the Philistines; and consequently they applied the name *Palastina* loosely to the whole country reaching from the sea to the desert. Josephus uses it in this sense in a few instances (*Antiq.* viii. 10. 3); and Philo says, 'the country of the Sodomites was a district of the land of Canaan, which the Syrians afterwards called *Palestine*' (*De Abraham.* xxvi.; cf. *Vita Moïsis*, xxix.). The rabbins also gave the name Palestine to all the country occupied by the Jews (Reland, 38, *seq.*) Dion Cassius states, that 'anciently the whole country lying between Phœnicia and Egypt was called Palestine. It had also another adopted name, *Judæa*' (*Hist.* xxxvii.) From this time onward Palestine was the name most usually given to the land of Israel; in some cases it was confined to the country west of the Jordan, but in others it embraced the eastern provinces (see Reland, and authorities quoted by him, 39, *seq.*) By early Christian writers the word was generally, though not uniformly, employed in this sense. Thus Jerome, in one passage: 'terra Judæa, quæ nunc appellatur *Palestina*' (*ad Ezech.* xxvii.); but in another, 'Philistiim, qui nunc *Palæstini* vocantur' (*in Am.* i. 6; cf. Is. xiv. 29). Chrysostom usually calls the Land of Israel Palestine (Reland, 40). All ancient writers, therefore, did not use the name in the same sense—some applying it to the whole country of the Jews, some restricting it to Philistia (Theodoret, *ad Ps.* lix.; Reland, *l. c.*) Consequently, when the name Palestine occurs in classic and early Christian writers, the student of geography will require carefully to examine the context, that he may ascertain whether it is applied to Philistia alone, or to all the land of Israel.

It appears that when our Authorized Version was made, the English name *Palestine* was considered to be equivalent to *Philistia*; hence the same Hebrew word is sometimes rendered *Palestine* or *Palestina*, and sometimes *Philistia* (Ps. lx.

8; lxxxvii. 4; cviii. 9). In no part of Scripture is either the Hebrew פלשת, or the English Palestine or Palestina, used in the sense in which it is employed at the head of this article. Its uniform and only signification is 'Philistia,' 'the land of the Philistines' (PHILISTIA; see Reland, 89, *seq.*; Rawlinson's *Herodot.*, ii. 399, note; Rennell, *Geogr. of Herodot.*, pp. 245, *seq.*)

2. *Canaan* (כנען; *Xanaân*). This is the oldest, and in the early books of Scripture, the most common name of Palestine. It is derived from the son of Ham, by whose family the country was colonised (Gen. ix. 18; x. 15-19; Joseph. *Antiq.* i. 6. 2). It is worthy of note, as tending to confirm the accuracy of the early ethnological notices in Genesis, that the ancient Phœnicians called themselves Canaanites (Kenrick's *Phœnicia*, p. 40; Reland, p. 7). The name Canaan was confined to the district west of the Jordan; the provinces east of the river were always distinguished from it (Num. xxxiii. 51; Exod. xvi. 35, with Josh. v. 12; xxii. 9, 10). Its eastern boundary is thus within that of Palestine; but, on the other hand, it reached on the north to Hamath (Gen. x. 18, with xvii. 8), and probably even farther, for the Arvadite is reckoned among the Canaanites, and the earliest name of Phœnicia was *Cua* or *Cana* [PHœNICIA]. Wherever the country promised to the Israelites, or dwelt in by the patriarchs, is mentioned in Scripture, it is called 'the land of Canaan' (Exod. vi. 4; xv. 15; Lev. xiv. 34; Deut. xxxii. 39; Josh. xiv. 1; Ps. cv. 11), doubtless in reference to the promise originally made to Abraham (Gen. xvii. 8). A full account of the origin and use of this name is given in the article CANAAN, LAND OF (see also Reland, 1, *seq.*)

3. *The Land of Promise*.—This name originated in the divine promise to Abraham—'All the land which thou seest, to thee will I give it, and to thy seed for ever' (Gen. xiii. 15). Its extent and boundaries are given by Moses (xv. 18-21; Exod. xxiii. 31), and have been already considered. The exact phrase, 'Land of Promise,' is not found in the O. T., and only once in the N. (Heb. xi. 9, ἡ γῆ τῆς ἐπαγγελίας), but some analogous expression is often used by the sacred writers; thus in Num. xxxii. 11, 'The land which I swear unto Abraham' (cf. Deut. xxxiv. 1-4; Gen. l. 24; Ezek. xx. 42; Acts vii. 5). Such appellations were used when the object of the writer was to direct the people's attention to the Abrahamic covenant, either to its certainty or to its fulfilment. It is now frequently employed by writers on Palestine, who give special attention to prophecy (for a good account of it, see Reland, 18, *seq.*)

4. *The Land of Jehovah*.—This name is only found in Hosea ix. 3; 'They shall not dwell in Jehovah's land.' All the countries of the earth are the Lord's; but it appears, as Reland states (*Pal.*, p. 16), that in some peculiar way Palestine was especially God's land. Thus an express command was given, 'The land shall not be sold for ever: for the land is mine' (Lev. xxv. 23); and the Psalmist says, 'Lord, thou hast been favourable unto thy land' (lxxxv. 1); and still more emphatic are the words of Isaiah, 'The stretching out of his wings shall fill the breadth of thy land, O Immanuel' (viii. 8; cf. Joel i. 6; iii. 2; Jer. xvi. 18). The object of these and many similar expressions was to show that Jehovah claimed the sole disposal

of Palestine. He reserved it for special and holy purposes; and he intended in all time to come to dispose of it, whether miraculously or providentially, for carrying out those purposes, either by the agency of the Jews or of others. It was the only land in which the Lord personally and visibly dwelt; first in the Shekinah glory, and again in the person of Jesus. For this land, the Lord always demanded both a special acknowledgment of lordship, and certain stipulated returns to him, as tithes and first-fruits (Reland, pp. 16, 17).

5. *Land of Israel* (ארץ ישראל; in N. T. γῆ Ἰσραήλ). By this name Palestine was distinguished from all the other countries of the earth. It began to be used after the establishment of the monarchy. It occurs first in 1 Sam. xiii. 19, and is occasionally used in the later books (2 Kings v. 2; vi. 23); but Ezekiel employs it more frequently than all the sacred writers together; the reason probably being that he compares Palestine with other countries more frequently than any other writer. St. Matthew, in relating the story of the infant Saviour's return from Egypt, uses the name; 'He arose, and took the young child and his mother, and came into the Land of Israel' (ii. 21). The name is found in the Apocryphal books (Tobit i. 4); in Josephus, who also uses 'Land of the Hebrews' (Ἑβραίων χώρα); and in some of the early Christian fathers (Reland, p. 9). The name is essentially Jewish; it was familiar to the Rabbins, but, in a great measure, unknown to classic writers. It is only applied in the Bible to the country which was actually occupied by the Israelites; and so it was understood by the Rabbins, who divided the whole world into two parts, 'The land of Israel,' and 'the land out of Israel' (Reland, 9).

6. *The Land* (הארץ; ἡ γῆ).—This name is given to Palestine emphatically, by way of distinction, as we call the Word of God *the Bible*. Thus in Ruth (i. 1), 'There was a famine in the land' (בארץ); and in Jer. xii. 11, 'The whole land is made desolate' (l. 34); and so also in Luke's Gospel, 'When great famine was throughout all the land' (v. 25); and in Matt. xxvii. 45, 'Now from the sixth hour there was darkness over all the land unto the ninth hour.' This also was a strictly Jewish name (Reland, 28, seq.).

7. *Judea* or *Judaea*.—The use of this name in the Bible and by classic writers requires to be carefully noted. At first, its Hebrew equivalent, ארץ יהודה, was confined to the possessions of the tribe of Judah (2 Chron. ix. 11). After the captivity of the Northern Kingdom, the name 'Judah' became identified with the Jewish nation; and hence, during the second captivity, יהודה, *Judea*, was applied to all Palestine, and to all the Israelites. In the same sense, it was employed in Josephus, in the N. T., and in classic writers: and it was even made to include the region east of the Jordan. In other cases, we find it given as the special name of a province of southern Palestine. For fuller information, see the article JUDÆA.

8. *Holy Land* (ארצת הקדש; ἡ γῆ ἁγία; Terra Sancta). Next to Palestine, this is now the most familiar name of the country. Zechariah is the first who mentions it, 'The Lord shall inherit Judah, his portion of the Holy Land' (ii. 12). The Rabbins constantly use it, and they have detailed, with great minuteness, the constituents of its sanctity. They did not regard it as all equally holy.

Judæa ranked first; after it, the Northern Kingdom; and last of all, the territory beyond Jordan (Reland, 26, seq.). The very dust, and stones, and air of the land, are still considered holy by the poor Jews (Reland, 25). The early Christian writers call it *Terra Sancta* (Justin Martyr, *Tryphon*; Tertullian, *De Resurrectione*; cf. Reland, p. 23). During the middle ages, and especially in the time of the Crusades, this name became so common as almost to supersede all others. In the present day, it is adopted, along with Palestine, as a geographical term. It was originally, and is now, applied only to the land allotted to the twelve tribes; and some Christian writers appear to confine it to the section west of the Jordan. More usually, however, it is employed in the same sense as Palestine (Reland, pp. 21-28).

III. PHYSICAL GEOGRAPHY.—The physical conformation of Palestine is simple, peculiar, and in some respects unique. It divides itself into four longitudinal belts, each reaching from north to south; and these belts are as distinct in their political history as in their physical structure. In fact, a careful study of the physical geography of Palestine—its plains, mountains, valleys, and great natural divisions—affords the best key to its history. The geographer who travels through the country, or the student who carefully notes one of the best constructed maps, such as Van de Velde's, must observe the belt of plain extending along the seaboard from the mouth of the Litâny to Gaza. Narrow on the north, and interrupted by three bold promontories, it expands gradually towards the south into a broad champaign. Its low elevation and sandy soil make the coast-line tame and almost straight. Were it not for the headland of Carmel, the shore would be a straight line, without bay or promontory.

From the end of Lebanon on the north, a mountain-range runs through the centre of the country. Its course is not parallel to the coast; the latter trends from N.N.E. to S.S.W.; whereas the mountains run more nearly, though not quite, south, thus leaving a broader margin of plain at the southern extremity. The ridge is intersected near its centre by a crossbelt of plain, connecting the Jordan valley with the coast. This plain is Esdraelon. The sections of the ridge to the north and south of it have very different features. That on the north is picturesque, and in some places grand. The outlines are varied; lofty peaks spring up at intervals, and are separated by winding wooded glens. On the south, the general aspect of the ridge is dull and uniform, presenting the appearance of a huge gray wall, as seen from the coast. But, in travelling down the road which runs along the broad back of the ridge to Jerusalem and Hebron, the eye sees an endless succession of rounded hill-tops, thrown confusedly together, each bare and rocky as its neighbour. South of Hebron, these sink into low swelling hills, similar in form, but smaller; and these again gradually melt into the desert plain of et-Tih.

But by far the most remarkable feature of Palestine is the Jordan valley, which runs through the land from north to south, straight as an arrow. There is nothing like it in the world. It is a rent or chasm in the earth's crust, being everywhere below the level of the ocean. This deep valley produces a marked effect on the ridges which border it. Their sides toward the valley are far

more abrupt than elsewhere in Palestine; the ravines that descend from them are deeper and wilder; and towards the south, along the shores of the Dead Sea, there is a look of rugged grandeur and desolation such as is seldom met with. The valley is of nearly uniform breadth, about ten miles from brow to brow, expanding slightly at Tiberias and the Dead Sea, as if greater depth had made some enlargement of the lateral boundaries necessary. This valley forms a very striking feature on every map of Palestine; and it becomes all the more striking the more accurately the physical geography of the land is delineated.

The remaining part of Palestine east of the Jordan forms a belt of table-land, to which the central valley gives some remarkable features. Every traveller in Palestine is familiar with the mountain-range—steep, straight, and of nearly uniform elevation—which, from every point in Judæa, Samaria, and Galilee, bounds the view eastward. This, in reality, is not a mountain-range; it is the side or bank of the eastern plateau, which has itself an elevation of from 2000 to 3000 feet, to which the depression of the Jordan adds another thousand. At only a few places, on the extreme north, and near the centre, do the tops of this ridge rise above the general level of the plateau. The ravines that descend from it are of great depth. At the north-east angle of Palestine is an isolated mountain-ridge, dividing the fertile table-land of Bashan from the arid wastes of Arabia.

Such is an outline of the general features of Palestine. It prepares the way for a detailed examination of the several divisions, and also for a more satisfactory review of the historical geography of the country. Each great physical feature has exercised from the earliest periods, as will be seen, a most important influence upon the people. The chasm of the Jordan effectually divided the east from the west; and the crossbelt of Esdraelon divided almost as effectually the north from the south. The maritime plain gave birth to two nations, one of merchants, another of warriors. It also became, in later ages, the highway between Egypt and Assyria. But the steep sides and rugged passes of the mountains presented such difficulties, that few attempted to invade them. The mountain-ridge of Judah and Samaria was thus isolated; it was defended by a double rampart, an outer and an inner. It was the heart and stronghold of the Jewish nation; it was the sanctuary of the Jewish faith; and it was the stage on which most of the events of the national history were enacted.

1. *The Maritime Plain.*—From the bank of the Litány on the north, for a distance of some twenty miles, the plain is a mere strip, nowhere more than two miles wide, and generally much less. The surface is undulating, and intersected by ridges of whitish limestone, which shoot out from Lebanon, and break off in cliffs on the shore. Two of them—*Ras el-Abiad*, 'The White Cape,' and *Ras en-Nakúra*, the ancient 'Scala Tyriorum,' 'Ladder of Tyre'—rise to a height of from 200 to 300 feet, and drop into the deep sea, splendid cliffs of naked rock. Though the plain is here broken, and is now dreary and desolate, its soil, between the rocks, is deep, and of wonderful fertility. It is abundantly watered also by copious fountains, and by streams from Lebanon. At the widest and best part of it, on a low promontory, and an adjoining island, stood Tyre, a double city.

South of the Ladder of Tyre, the features of the plain and the coast undergo a total change. This promontory, in fact, is the real commencement of the maritime plain, and the natural boundary of Palestine and Phœnicia [PHŒNICIA]. The white cliffs and bold headlands now disappear; the shore is low and sandy; the plain flat, rich, and loamy, and only a few feet above the sea-level. It spreads out in long reaches of corn-fields and pasture-lands several miles inland, the mountains making a bold sweep to the east. On a low bank, projecting into the Mediterranean from the centre of this plain, stands Acre, the modern as well as the mediæval stronghold of Palestine. Across the plain, a few miles southward, flows the river Belus; and on its banks may still be seen that vitreous sand from which glass is said to have been first made (Strabo, xvi. p. 758; Pliny, xxxvi. 65). Still farther south, the Kishon, a sluggish stream with soft sedgy banks, falls in from the plain of Esdraelon. There is more water and more moisture in this part of the plain than in any other part of Palestine; it is consequently among the most fertile sections of the country.

The course of the Kishon breaks what might be called the natural conformation of Palestine. It intersects the central mountain range; and a branch, or arm of the range, as if displaced by the river, shoots out in a north-westerly direction, and projecting into the Mediterranean, forms a bold headland—the only prominent feature along the shore of Palestine. This is Carmel. Its elevation is about 1800 feet; its sides are steep and rugged, deeply furrowed by ravines, and partially clothed with forests of dwarf oaks [CARMEL]. There is little cultivation on the ridge; but its pastures are rich, and its flowers in early spring bright and beautiful. The promontory of Carmel is bluff, but as it does not dip into the sea, room is left for a good road round its base.

Immediately south of Carmel the plain again opens up, and continues without interruption to Gaza. Narrow at first, and broken by a low ridge of rocky tells running parallel to the coast, it gradually expands into the undulating pasture-lands of Sharon. The plain is not so flat here as at Acre, nor is it so well watered; though there are still streams and large fountains, with fringes of reeds and broad belts of green meadows. Here and there are clumps of trees and scraggy copse, the remnants of ancient forests; but most of the plain is bare and parched. There is scarcely any cultivation. Farther south the surface becomes flatter, the average elevation less, and vegetation more scanty, owing to the lighter soil and lack of moisture. Around Joppa, Lydda, and Ramleh, are pleasant orchards and large olive groves, surrounded by wastes of drift sand. Here Sharon unites with Philistia; which, after an interval of bleak downs, extends in wide-spreading corn-fields, and vast expanses of rich loamy soil, southward almost to the valley of Gerar. This is the *Shephelah*—'the low country' of the Bible; the home of the Philistines, over which they drove their iron war-chariots, and on which they bade defiance to the light mountain-troops of Israel [PHILISTIA].

The maritime plain south of Carmel has some general features worth of note. Along the whole seaboard runs a broad belt of drift sand, generally flat and wavy, but in places raised up into mounds varying from 50 to 200 feet in height. The mounds

and drifts are mostly bare and of a ruddy gray colour; though here and there they are covered with long wiry grass and bent. The sand is most destructive, and nothing can stay its progress. It has encircled the ruins of Cæsarea with a barren desert; it is slowly advancing on the orchards of Joppa, threatening them with destruction; it has drifted far inland to Ramleh and Lydda; it has almost entirely covered up the city of Ascalon, and is now invading the fields, vineyards, and olive-groves of Mejdél, Hamameh, and other neighbouring villages. From Ascalon southward, the hills are higher than elsewhere; and at Gaza the sand-belt is not less than three miles wide. The aspect of these bare hills, and long reaches of naked drift, is that of utter, terrible desolation.

Another feature of the plain is the depth of its wadys or torrent-beds. At the northern end of Sharon, their banks are comparatively low and sedgy, bordered by tracts of meadow, which, owing to their depression and the accumulation of sand along the coast, are overflowed during the rainy season, and thus converted into pools and morasses, some of which do not entirely dry up during the summer. In Philistia the wadys are deeply cut in the loamy or sandy soil; their banks are dry, hard, and bare; their beds too are dry, covered with dust, white pebbles, and flints.

The whole plain is bare and bleak. There are no trees, no bushes, and no fences of any kind, with the exception of one or two small remnants of pine and oak forests in the northern part of Sharon, and the orchards and olive-groves round a few of the principal villages, and the hedges of cactus that encircle them. One can ride on for days together without let or hindrance. In summer, all vegetation disappears. The plain stretches out, mile after mile, in easy undulations, like great waves, everywhere of a brownish gray colour, appearing as if scathed by lightning. In early spring, however, it is totally different. It does not look like the same country. It is covered with green grass, and, where cultivated, with luxuriant crops of green corn; it is all spangled with flowers of the brightest colours, and in Sharon with forests of gigantic thistles. The colouring then far surpasses anything ever seen in Europe; but still the absence of houses, fields, and fences, gives a dreary look. The villages are few, mostly very small, and very poor, and at long intervals. In Sharon, and in the southern section of Philistia, there are stretches of twenty miles and more without a village. The plain is everywhere dotted, however, with low rounded *tells*—a few of them, as Tell es-Sâfieh, Arâk el-Menshiyeh, and others, rising to a height of 200 feet and more—and these are covered with white debris, intermixed with hewn stones and fragments of columns, the remains of primeval cities. The plain has no good quarries; the rock along the coast, and over a great part of the plain, is a soft friable sandstone, not fit for architectural purposes. The ordinary houses, therefore, were built of brick, and soon crumbled away, and are now heaps of dust and rubbish. The remains of a few temples, and of the churches and ramparts erected by the Crusaders at Gaza, Ascalon, Lydda, and Cæsarea, are almost the only relics of antiquity now standing on the maritime plain.

The eastern border of the plain is not very clearly defined. The hills melt into it gradually. In one

place an elongated ridge shoots far down into the lowland, such as the ridge at Bethhoron, at Zorah, at Deir Dubbân, etc. In other places, broad valleys run far up among the mountains. These ridges and valleys were the border-land of the Israelites and Philistines, and were the scenes of many a wild foray, and many a hard-fought battle. The valleys are exceedingly fertile.

The breadth of this noble plain varies considerably. At Cæsarea on the north, it is not more than eight miles wide; at Joppa it is about twelve; while at Gaza, on the south, it is nearly twenty. Its elevation above the level of the sea has not been ascertained by measurement, but from its general appearance it does not seem to have an average of more than 100 feet.

2. *The Central Mountain Range*.—The deep narrow ravine of the Litâny separates Lebanon proper from Palestine [LEBANON]. The mountain-chain on its southern bank, however, is a natural prolongation of that on the northern. Its altitude is not so great, but its course is the same, its geological strata and physical features are the same, and when seen from any point, east or west, the ridge appears as one. On the south bank of the river the ridge is broad, reaching from the Jordan valley to the sea, about twenty miles. Its summit is mostly an irregular undulating table-land; having fertile plains of considerable extent intervening between the hill-tops. The outline is varied and picturesque; the plains are green with corn and grass, and the peaks and ridge backs covered more or less densely with forests of oak, terebinth, maple, and other trees. The trees grow to a larger size than is elsewhere seen in Palestine; many of them would not disgrace the great forests of Europe (Van de Velde, i. 170; ii. 418). The watershed is much nearer the eastern than the western side; in fact, it is in some places quite close to the eastern brow of the ridge, from which short abrupt glens descend to the Jordan. The valleys on the western slopes are long, winding, and richly wooded; and among them we have the finest—indeed, it might be said the only really fine scenery in Western Palestine. On the lower parts of the declivities, and in the beds of the valleys, are still extensive olive groves, showing how appropriate was Asher's blessing, 'Let him dip his foot in oil' (Deut. xxxiii. 24; Van de Velde, ii. 407).

This northern section of the mountain-chain culminates a little to the west of Safed, in Jebel Jermuk (4000 ft.), the highest land in Western Palestine. Safed itself stands on a commanding peak. From this point the ridge sinks rapidly, becoming more an assemblage of detached hills and ridges than a regular chain. It almost looks as if the great chain had been shattered to pieces, and the fragments thrown confusedly together. The upland plains, which constitute a distinguishing feature of the higher section, here become larger and richer, with a surface like a bowling-green, and interspersed here and there with corn-fields, olive-groves, orchards of pomegranates, apricots, and other fruit-trees (Van de Velde, ii. 406). The plain of Battauf is ten miles long by about two wide. From its eastern end, at Jebel Hattîn, another plain extends, with gentle undulations, along the brow of the basin of Tiberias, southward to Tabor; and another runs westward from Hattîn to Sefîrieh. The hill-tops and ridges which separate them are rugged, rocky, and thinly covered with dwarf-oak

and terebinth, and with jungles of thorn-bushes. South of these plains, a transverse ridge of hills, commencing with Tabor on the east, extends to the plain of Acre on the west. Tabor is green and well-wooded [TABOR]. The section adjoining it, encircling Nazareth, is mostly bare and rocky [NAZARETH]; while the western end presents some beautiful scenery—green vales covered with long grass and bright-coloured thistles, winding down to the plains on the south and west, between richly-wooded peaks and ridges.

Vegetation among the mountains of Galilee is much more abundant than elsewhere west of the Jordan. Long rank grass and huge thistles, and a splendid variety of wild-flowers, cover mountain, vale, and plain, in early spring; and even during the heat of summer and the scorching blasts of autumn, that parched scathed look, which is universal farther south, is here unknown. This is owing, in part, to the cool breezes from Hermon and Lebanon, and in part to the forests which condense the moisture of the atmosphere, yielding heavy fertilizing dew. Fountains are abundant and copious; and the torrent-beds are rarely—many of them never—dry. Another fact is deserving of notice. The whole region, considering its great fertility and beauty, is thinly peopled. A vast portion of it appears utterly desolate. The ‘highways lie waste, the earth mourneth and languisheth.’ The bleak mountains of Judah are far more densely peopled even yet than this highland paradise.

The plain of Esdraelon, as stated above, intersects the mountain-chain, and forms a connecting link between the maritime plain and the Jordan valley. In this respect it may be termed the gateway of Central Palestine; and history tells how fully, and often how fatally, hostile nations and marauding tribes availed themselves of it to enter and spoil the land. It joins the plain of Acre on the west at the base of Carmel; it is connected with Sharon by an easy pass at Megiddo; and on the east, two broad arms stretch down from it in gentle slopes to the principal fords and passes of the Jordan. Its features and history have already been so fully given, that it need not here be described [ESDRAELON].

The isolated ridges of Moreh (now called by natives, Jebel-ed-Duhly; by travellers, Little Hermon) and Gilboa, which lie between the eastern arms of Esdraelon, present a marked contrast to Tabor and the mountains of Galilee. They show that the humid and fertile north is giving place to the parched and bleak south. They are bare, white, and treeless; and their declivities look in places as if they had been covered with flag-stones. They are isolated, broken links, lying between the chains of Galilee and Samaria.

While Esdraelon intersects the mountain-chain, a portion of the chain, appearing as if displaced, shoots out from the mountains of Samaria in a north-western direction; and, running to the Mediterranean, intersects the maritime plain. This is Carmel, which, though physically united to the southern, bears more resemblance, in its luxuriant grass, green foliage, and bright flowers, to the northern ridge. Carmel and the northern end of the Samaria range present the appearance of a continuous transverse ridge, enclosing Esdraelon on the south.

Between Esdraelon and Bethel—the territory originally allotted to the sons of Joseph, forty miles

in length—the mountain-ridge presents some peculiar and striking features. The summits are more rounded and more rocky than those in Galilee; and the sides, though in many places bare, are generally clothed with scraggy woods of dwari oak, terebinth, and maple, or with shrubberies of thorn bushes. The fertile upland plains are still found here, though smaller than those in Galilee; the largest is the plain of Mukhna, along the eastern base of Gerizim, measuring about six miles by one. The plains of Sânr, Kubat'yeh, and Dothan, are much smaller. The hill-sides around them get steeper and wider towards the south. The valleys running into Sharon are long, winding, mostly tillable, though dry and bare; while those on the east, running into the chasm of the Jordan, are deep and abrupt; but being abundantly watered by numerous fountains, and being planted with olive groves and orchards, they have a rich and picturesque appearance (cf. Van de Velde, ii. 314). In fact, the eastern declivities of the mountains of Ephraim, wild and rugged though they are, contain some of the most beautiful scenery and some of the most luxuriant orchards in Central Palestine (*Id.*, p. 335). Dr. Robinson writes of Telluzah, the ancient Tirzah (Cant. vi. 4), a few miles north of Nâbulus, ‘The town is surrounded by immense groves of olive trees, planted on all the hills around; mostly young and thrifty trees’ (iii. 302); and of one of the great wadys east of it, ‘Nowhere in Palestine, not even at Nâbulus, had I seen such noble brooks of water’ (*Id.*, 303); and again of the whole district, ‘This tract of the Fâria, from el-Kurâwa in the Ghor to the rounded hills which separate it from the plain of Sânr, is justly regarded as one of the most fertile and valuable regions of Palestine’ (p. 304, cf. 305 *seq.*) The features of the mountains are different from those of Galilee. Here there is more wildness and ruggedness, the tracts of level ground are smaller, the valleys are narrower, and the banks steeper. While the rich upland plains produce abundant crops of grain, yet this is a region on the whole specially adapted for the cultivation of olives, orchards, and vineyards. The more carefully its features, soil, and products are examined, the more evident does it become that Ephraim was indeed blessed with ‘the chief things of the ancient mountains’—vines, figs, olives, and corn, all growing luxuriantly amid the ‘lasting hills.’ It was not in vain the dying patriarch deliberately rested his right hand on the head of Joseph’s younger son, saying, ‘In thee shall Israel bless, saying, God make thee as Ephraim’ (Gen. xlviii. 18-20; cf. Stanley, *S. and P.*, p. 226).

Passing southward from Samaria into Judæa—from the territory of Ephraim and Manasseh into that of Benjamin and Judah—both the physical features and the scenery of the range undergo a great change. The change does not take place rapidly, it is gradual. Immediately south of Shiloh the change begins. The little upland plains, which, with their green grass and green corn and smooth surface, so much relieve the monotony of the mountain-tops, almost disappear in Benjamin, and in Judah they are unknown. Those which do exist in Benjamin, as the plains of Gibeon and Re-phaim, are small and rocky. The soil alike on plain, hill, and glen, is poor and scanty; and the gray limestone rock everywhere crops up over it, giving the landscape a barren and forbidding

aspect. Natural wood disappears : and a few small bushes, brambles, or aromatic shrubs, alone appear upon the hill-sides. The hill-summits now assume that singular form which prevails in Judah, and which Stanley has well described :—‘ Rounded hills, chiefly of a gray colour—gray partly from the limestone of which they are formed, partly from the tufts of gray shrub with which their sides are thinly clothed—their sides formed into concentric rings of rock, which must have served in ancient times as supports to the terraces, of which there are still traces to the very summits ; valleys, or rather the meetings of those gray slopes with the beds of dry water-courses at their feet—long sheets of bare rock laid like flagstones, side by side, along the soil—these are the chief features of the greater part of the scenery of the historical parts of Palestine. These rounded hills, occasionally stretching into long undulating ranges, are for the most part bare of wood. Forest and large timber are not known. Corn-fields and—in the neighbourhood of Christian populations as at Bethlehem—vineyards creep along the ancient terraces. In the spring the hills and valleys are covered with thin grass, and the aromatic shrubs which clothe more or less almost the whole of Syria and Arabia. But they also glow with what is peculiar to Palestine, a profusion of wild flowers, daisies, the white flower called the star of Bethlehem, but especially with a blaze of scarlet flowers of all kinds, chiefly anemones, wild tulips, and poppies. Of all the aspects of the country this blaze of scarlet colour is perhaps the most peculiar’ (*S. and P.*, 136, *seq.*)

Fountains are rare, and their supplies of water scanty and precarious among the mountains of Benjamin and Judah. Wells take their place, bored deeply into the white soft limestone rock ; covered cisterns, into which the rain-water is guided, are also very numerous, and large open tanks. The glens which descend westward are long and winding, with dry rocky beds, and banks breaking down to them in terraced declivities. The lower slopes near the plain of Philistia are neither so bare nor so rugged as those nearer the crest of the ridge. Dwarf trees and extensive shrubberies, and aromatic plants, partially cover them ; while little groves of olives, and orchards of figs and pomegranates, appear around most of the villages. The valleys, too, become wider, sometimes expanding, as Surâr, es-Sumpt (Elah), and Beit Jibrân, into rich and beautiful corn-fields. The eastern declivities of the ridge, so fertile and picturesque in Samaria, are here a wilderness—bare, white, and absolutely desolate ; without trees, or grass, or stream, or fountain. Naked slopes of white gravel and white rock descend rapidly and irregularly from the brow of the ridge, till at length they dip in the frowning precipices of Quarantania, Feshkah, Engedi, and Masada, into the Jordan Valley or Dead Sea. Naked ravines, too, like huge fissures, with perpendicular walls of rock, often several hundred feet in height, furrow these slopes from top to bottom. The wild and savage grandeur of Wadys Fârah, el-Kelt, en-Nâr, and Khureitûn, is almost appalling. This region is the wilderness of Judæa. It extends from the parallel of Bethel on the north, to the southern border of Palestine. Its length is about forty miles, and its breadth averages nine. It has always been a wilderness, and it must always continue so (*Judg.* i. 16 ; *Matt.* iii. 1)—the home of the wandering

shepherd (1 Sam. xvii. 28), and the prowling bandit (*Luke* x. 30). It is the only part of Palestine to which that name can be properly applied (see JUDÆA, and JUDAH).

In the centre of this bleak and rugged region, on the very crest of the mountain ridge, girt about with the muniments of nature, stood Jerusalem, and the other historic cities and strongholds of the kingdom of Judah—many of them taking their names from their lofty sites, as Gibeon, and Ramah, and Gibeah, and Geba. In vigorous exercise among these mountains, and in following and defending their flocks over the bleak ridges and through the wild glens of the wilderness, the hardy soldiers of David received their training ; and they proved that, in mountain warfare, they were invincible. This is not a region for corn. The husbandman would obtain from its thin parched soil a poor return for his hard labour. But the terraced hill-sides, the warm limestone strata, and the sunny skies, render it the very best field for the successful culture of the vine and the fig ; while the aromatic shrubs of the wilderness, and the succulent herbage among the rocks and glens, afforded suitable food for flocks of sheep and goats. The dying patriarch appears to have had his eye on this region when he blessed Judah in these words : ‘ Binding his foal unto the vine, and his ass’s colt unto the choice vine ; he washed his garments in wine, and his clothes in the blood of grapes : his eyes shall be red with wine, and his teeth white with milk’ (*Gen.* xlix. 11, 12). Though this section of the range now seems barren and desolate, no district in Palestine bears traces of such dense population in former days. Every height is crowned with a ruin ; the remains of towns and villages thickly dot the whole country. Its ruins, its terraced hills, and its arid tortuous glens, are now the distinguishing features of Judæa.

The southern declivities of the mountain-range have some marked and peculiar features, which probably gained for them a distinctive name, *Negeb*. (See the article NEGEB.) From Hebron, where the ridge begins to decline, to Beersheba, where it finally melts away into the desert of Tih, this section extends. Here are bare rounded white or light-gray hills, gradually becoming smaller and farther apart, divided by long irregular dry valleys, which slowly become wider and bleaker, until at length hill and dale merge into an open undulating plateau. The soil on these southern hills is thin and poor ; but in some of the valleys it is richer, and during spring and early summer the pasture is luxuriant. It was one of the regions most frequented by the patriarchs. It was a dry parched land, as its Scripture name *Negeb* would seem to imply. It contains no perennial streams. Its torrent-beds are as dry during a great part of the year as its hill-tops ; it is only after heavy rains, here very rare even in winter, that they contain any water. Fountains, too, are few and far between ; and hence the patriarchs, like the modern nomads who pasture their flocks on it, were forced to depend on wells and tanks for their supply of water. These are very numerous. Miss Martineau in riding from the desert to Hebron, notes, ‘ All the day we continually saw gaping wells beside our path, and under every angle of the hills where they were likely to be kept filled’ (*Eastern Life*, p. 433). Water was absolutely necessary for the wants of men and animals ; hence the labour expended on

wells, and the obstinacy with which rival tribes disputed their possession (Gen. xxi. 25, 30; xxvi. 15, etc.) Vineyards and olive-groves disappear a few miles south of Jerusalem; the larger oak trees, which are seen here and there farther north, give place to bushes and low shrubs; cultivated fields, too, and all signs of settled habitation, give place to rude enclosures for sheep, and black tents, and roving Arabs. All picturesque beauty, all natural richness of scenery, is gone. The green pastures and the bright flowers of early spring are the only redeeming features (Bonar, *Land of Promise*, 29, 46; Martineau, 431; Stanley, p. 100). Mr. Drew has delineated the features of the southern declivities with great fidelity:—'In no part of the prospect was there any loveliness, or any features of greatness and sublimity. Every aspect of the country that might be called beautiful is seen in the narrow section of the mountain district immediately on the south of Hebron. No lakes or rivers, or masses of foliage, or deep ravines, or any lofty towering heights, are within the range of sight to one in the centre of the territory. . . . For a few weeks late in spring-time a smiling aspect is thrown over the broad downs, when the ground is reddened with the anemone, in contrast with the soft white of the daisy, and the deep yellow of the tulip and marigold. But this flush of beauty soon passes, and the permanent aspect of the country is—not wild indeed, or hideous, or frightfully desolate, but, as we may say, austere plain—a tame unpleasant aspect, not causing absolute discomfort while one is in it, but left without any lingering reminiscence of anything lovely, or awful, or sublime.

'As for the soil, the thin and scanty verdure, barely covering the limestone which spreads almost everywhere beneath the desert surface, sufficiently explains its nature. Here and there patches of deeper earth and richer swards, with clumps of trees, vary these pastures of the wilderness; as again they are broken by wide areas, thickly covered with shrubs of considerable height and size' (*Scripture Lands*, 5-7).

A general view having now been given of the physical features, the scenery, and the soil of the mountain-ridge, it is hoped that a series of elevations carried down it from north to south will serve to complete the picture of this natural division of Palestine. The elevations are taken from Van de Velde, who has collected them from the best authorities, and arranged them, with valuable notes, in his *Memoir of Map*. In order to connect the Palestine ridge with Lebanon, of which it is the natural continuation, and with the desert of Tih into which it falls, the heights of a few points beyond the boundaries of Palestine on the north and south are given:—

	Feet.
Tôm Nîha, the culminating point of southern Lebanon, fifteen miles north of the Litâny . . . . .	6500
Kefr Hûneh, a pass over the ridge four miles farther south . . . . .	4200
Kula'at esh-Shukîf (Belfort), overhanging the Litâny . . . . .	2205

#### IN PALESTINE.

Kedesh-Naphtali, twelve miles south of the Litâny (Kedesh is in an upland plain surrounded by peaks and ridges several hundred feet higher than the town) . . . . .	1354
---	------

Jebel Jermuk, the highest point in Western Palestine . . . . . (about)	4000
Safed . . . . .	2775
Jebel Kaukab, near Cana of Galilee . . . . .	1736
Tûran, on plain of Sefûrieh . . . . .	872
Kurn Hattin, the traditional scene of 'the Sermon on the Mount' . . . . .	1096
Mount Tabor . . . . .	1865
Nazareth, situated in a valley . . . . .	1237
Plain of Esdraelon, nearly due south of Nazareth . . . . .	382
Jebel ed-Duhy (Little Hermon) . . . . .	1839
Mount Gilboa, highest point . . . . .	2200
Mount Carmel, highest point . . . . .	1800
Jebel Haskîl, the highest point between Gilboa and Ebal . . . . .	2000
Upland plain of Sanîr . . . . .	1330
Mount Ebal . . . . .	2700
Mount Gerizim . . . . .	2650
Plain of Mukhna, at base of Gerizim . . . . .	1595
Top of the ridge south of the plain of Mukhna . . . . .	2037
The ridge of Sinjil, near Shiloh . . . . .	3108
Bethel . . . . .	2401
Neby Samwîl. (This appears to be too low)	2649
Jerusalem, highest point of the city . . . . .	2610
Mount of Olives . . . . .	2724
Bethlehem . . . . .	2704
Pools of Solomon (in a valley) . . . . .	2251
Ruins of Ramah, three miles north of Hebron . . . . .	2800
Hebron (in a valley with higher ridges round it) . . . . .	3029
Carmel, eight miles south of Hebron . . . . .	2238
Ed-Dhoherîyeh, fifteen miles south-west of Hebron . . . . .	2174
Beersheba . . . . .	1100

#### BEYOND THE SOUTHERN BORDER.

El-Khulasa, in the desert of Tih . . . . .	704
--	-----

From these measurements it will appear how singularly uniform the elevation of the range is from Esdraelon to Hebron. This gives it the appearance of a vast wall as seen from the sea. Its aspect from the Jordan valley is different; it seems to have a much greater elevation on the south, owing to the depression of the Dead Sea and the adjoining plain.

3. *The Jordan Valley*.—The physical geography of this natural division of Palestine has already been so fully described that it will only be necessary in this place to supplement a few points serving to connect it with the mountain-chain on the west, and the plateau on the east, and thus to apportion to it its place in the general survey of the country.

The Jordan valley is the most remarkable feature in the physical geography of Palestine. Its great depression makes it so. It is wholly, or almost wholly, beneath the level of the ocean. It runs in a straight line through the country from north to south. From Dan, on the northern border, to the southern angle of the Dead Sea, its length is 150 English miles. Its breadth at the northern end is about six; at the Sea of Galilee it is nine; and at Jericho, where it is widest, it is about thirteen. There are places between these points where it is much narrower. Immediately south of lake Merom is a high terrace—an offshoot from the culminating peaks at Safed—which has an elevation of about 900 feet, and breaks down to the

Jordan on the east in steep banks, and to the shores of the Sea of Galilee on the south in long terraced declivities. From the western side of the terrace the mountains rise steeply; so that the terrace itself may be considered as a higher section of the valley. Along the south-west shore of the Sea of Galilee a dark ridge shoots out eastward, and descends to the banks of the Jordan in frowning cliffs, narrowing the valley to a width of about four miles. The next point where the western ridge projects is at Kurn Surtabeh, east of Shiloh. This peak resembles the horn of a rhinoceros, and hence its name; from it a rocky ridge of white limestone runs across the valley almost to the banks of the river in its centre. The peak of Surtabeh is remarkable as one of the signal stations of the ancient Israelites, on which beacons were lighted to announce the appearance of the new moon (Talmud, *Rosh Ha-Shana*, ii.; Reland, p. 346; Robinson, *B. R.*, iii. 293).

The western bank of the valley, though every-

where clearly and sharply defined, is irregular, like a deeply indented coast-line, occasioned by the broken character of the ridge behind, and the glens and broad plains which run into it. The eastern bank is different. It is straight as a wall, except for a short distance in the centre, where the rugged hills and deep glens of Gilead break its uniformity. On the whole it is more abrupt than the western; and its top appears almost horizontal. This regularity arises from the fact that it is not, strictly speaking, a mountain-chain, but rather the bank or supporting wall of a natural terrace.

The northern section of the Jordan valley is flat. Around the site of Dan extends a plain of great fertility, now in part cultivated by Damascus merchants, as it was in primæval days by the Sidonians (Judg. xviii. 7). The uncultivated parts are covered with rank grass, and thickets of dwarf oak, sycamore, arbutus, and oleander. South of this is a large tract of marshy ground, extending to the shores of Merom—the home of wild swine, buffa-

421. Ford of the Jordan.

loes, and innumerable water-fowl. The marsh and lake are fed not only by the Jordan, but by great numbers of fountains along the side of the plain, and streams from the surrounding mountains. The lake Merom occupies the lower part of this basin [MEROM], and has a broad margin of fertile land along each side. Below the lake the regularity of the valley is interrupted by the projecting terrace already mentioned, and the river is pushed over close to the eastern bank, along which it runs in a deep wild glen. At the mouth of the Jordan, on the northern shore of the Sea of Galilee, is a low rich plain, several miles in extent, famous for its early and luxuriant crops of melons and cucumbers. It is cultivated by some families of nomad Arabs. The lake here fills the valley from side to side, with the exception of the little fertile plain of Gennesaret on the western shore [GENNESARET]. The eastern shore keeps close to the base of the hills, which rise over it in steep bare acclivities [GALILEE, SEA OF].

Between the Sea of Galilee and the Dead Sea the valley is divided into two sections by the projecting ridge of Surtabeh, above mentioned. The upper section has a gently undulating surface, a rich, loamy soil, abundantly watered by streams from both the eastern and western mountains, and by numerous fountains along their base. A few spots are cultivated by the semi-nomad tribes of Ghawârineh, who take their name from the valley here called *el-Ghor*. The uncultivated portions are covered with tall rank grass, and jungles of gigantic thistles. The Jordan winds down the centre in a tortuous channel along the bottom of a ravine, whose high chalky banks are deeply furrowed and worn into lines and groups of white conical mounds.

At Kurn Surtabeh there is a break in the valley, as from an upper to a lower terrace. A ridge or bank extends across it from west to east, and is broken up in the centre, where the river cuts through, into 'labyrinths of ravines with barren

chalky sides, forming cones and hills of various shapes, and presenting a most wild and desolate scene' (Robinson, iii. 293). South of this point, the mountain-chain on the west recedes, and the plain expands; its surface becomes flatter; fountains and streams are neither so frequent nor so copious; and the intense heat and rapid evaporation make the surface parched and bare. Along the sides of the mountains, especially at the openings of ravines, are here and there masses of verdure and foliage; but the vast body of the plain is bare. A large part, too, towards the Dead Sea, is covered with a white saline crust, which gives it the appearance of a desert. But the rank luxuriance of the vegetation around fountains, along the banks of streams, and wherever irrigation is employed, as at Jericho, shows the natural richness of the soil, and proves that industry alone is wanting to develop its vast resources. The whole of this lower valley is now almost deserted. With the exception of the few inhabitants of er-Rîha (Jericho), and a few families of nomad Ghawârinah, no man dwells there; and a curse, moral as well as physical, appears to rest upon the region. The inhabitants, as well nomads as residents in the huts of Rîha, are indolent, feeble in body, defective in intelligence, and addicted to the grossest vices. In person and dress they are disgustingly filthy. Nowhere in the world perhaps have we such a melancholy example of the baneful effects of climate upon man as in the lower valley of the Jordan. In this respect it is now as it ever has been since the days of Abraham and Lot.

The river here winds as before through a glen down the centre of the valley. The banks of the glen are steep, white, bare, and worn into little hills; while the river-sides are fringed with the richest foliage. Owing to the depth of this glen, neither river nor foliage is seen from the plain until the very brow is reached. The plain along the northern shore of the Dead Sea is low and flat, and in the centre, near the Jordan, slimy. The sea fills up the whole breadth of the valley; the precipitous mountains upon the east and west rising from the shore-line—sometimes from the bosom of the water. The scenery of this region is more dreary than that in any other part of Palestine. The white plain on the north, the white naked cliffs on the east and west, the gray haze, caused by rapid evaporation, quivering under the burning sunbeams—all combine to form a picture of stern desolation such as the eye seldom beholds.

The western shore of the sea follows the base of the cliffs to the southern extremity where the salt hills, called *Khashm Usdom*, 'the ridge of Sodom,' project from the west far into the Ghor. On the east, the shore-line keeps close to the mountains for about three-quarters of its length; then a long, low, sandy promontory, called el-Lisân, 'the Tongue,' juts out into the sea. South of this there is a broad strip of marshy plain, covered with jungles of reeds and dense shrubberies of tamarisk. Here some tribes of fierce lawless Arabs pitch their tents and cultivate a few fields of wheat and millet. The whole southern shore of the sea is low and slimy [SEA, SALT].

The levels of this mysterious valley have never hitherto been taken with that care and minuteness which the importance of the region, both historically and physically, demands. It is to be hoped that before the corps of English engineers, now

employed at Jerusalem, leave Palestine, they will remedy this defect in our geographical knowledge of the Holy Land. In regard to its levels, the valley divides itself into *five stages*, as follows:—

1. *The basin of Merom*, now called el-Hûleh. 2. *The basin of Tiberias*. 3. The valley to Kurn Surtabeh. 4. The plain of Jericho. 5. The Dead Sea. The levels taken by different travellers are very unsatisfactory. The elevation of the fountain of the Jordan at Dan, and consequently of the northern extremity of the great valley, may be regarded as undetermined. The following are given by Van de Velde (*Memoir*, p. 181)—

	Feet.
Tell el-Kâdy (Dan), by De Forest . . .	647
„ „ Von Wildenbruch . . .	537
„ „ De Bertou . . .	344

These appear to be all too high. When the writer visited Dan in 1854, his aneroid indicated an elevation of about 100 feet.

The Lake Merom, by induction from Wildenbruch's elevation of Jacob's Bridge, about . . .	120
„ by De Bertou . . .	-20

These measurements do not at all agree with the former. The whole of this region is a plain, almost level. The ascent from the lake to the fountain is so gradual as scarcely to be perceptible, and the distance is only some ten miles. It seems impossible, therefore, that there could be a difference in elevation of 627 feet, or even of 366 feet, as De Bertou's measurements would represent, between these two places. This point, however, can only be determined by actual measurement. Probably the fountain at Dan will be found to be not more than 100 feet above the sea.

Khan Jubb Yûsef, on high terrace between Merom and Sea of Galilee . . .	Feet. 883
---	--------------

*Below the sea-level.*

Sea of Galilee, by Lynch . . .	653
Bridge of Mejâmia, between Beth-shean and Gadara, by do. . .	704
Ruined bridge a few miles above Kurn Surtabeh, by do. . .	1097
Pilgrim's bathing-place on Jordan, Poole . . .	1209
Jericho, Poole . . .	798

Jericho, by De Bertou, 1034, which appears to be more accurate, for it can scarcely be 524 feet higher than the Dead Sea.

Kasr Hajla, on the plain near Jericho, Symonds . . .	Feet. 1069
The Dead Sea, Lynch . . .	1317
„ by Symonds . . .	1312
„ „ De Bertou . . .	1377
„ „ Poole . . .	1316

These measurements will serve to show the remarkable physical features of this valley, and also how much careful survey is still needed to a full delineation of its geography.

4. *The plateau east of the Jordan*.—Eastern Palestine, or the region beyond the Jordan valley, is widely different in its physical geography from Western. Its average elevation is about 2500 feet above the sea. The Jordan valley is a rent or chasm in the earth's crust; the country beyond it is an elevated terrace. This elevation affects the scenery, the climate, the products, and the in-

habitants themselves. Nowhere east of the Jordan, at least within the boundaries of Palestine, is there that bleak desolate aspect such as is presented by the sun-scorched plain of Philistia, or the white downs of the Negeb, or the barren wilderness of Judæa. There is more verdure, more richness, and more beauty everywhere on the east. The pastures of Gilead and Bashan are still as attractive as they were when Reuben and Gad saw and coveted them (Num. xxxii. 1). The surface of Western Palestine is rough and rugged, varied by plain and mountain ridge; the east is nearly all a table-land, consisting of smooth downs, well designated by the accurate sacred writers *Mishor* (Deut. iii. 10; Josh. xiii. 9, 16, etc.; cf. Stanley, p. 479). It does not appear so from the west, from whence the eye only sees a ridge, like a huge wall, running along the horizon; but this peculiarity is visible from every point on the east, and is very striking when seen, as the writer saw it, from the top of Hermon, and from the crest of Jebel Haurân. In Western Palestine, again, the ancient cities are almost obliterated, and the very foundations of the temples and monuments can scarcely be discovered; in the east, the magnificence of the existing ruins, and the perfect preservation of some of the very oldest cities, are subjects of continual surprise and admiration to the traveller. Some have represented Eastern Palestine as mainly a pastoral country, where the three tribes lived in a semi-nomad state, dwelling in tents, and placing their flocks in rude folds like the border tribes of Bedawîn. The country itself gives the best refutation to this theory. It is everywhere thickly studded with old cities, towns, and villages—many of them still bearing their scripture names. In no part of Western Palestine are there evidences of such a dense population as throughout Bashan and Gilead. The country was indeed rich in pastures; but it was also rich in corn-fields. The northern section of it is to this day the granary of Damascus.

The northern border of Palestine intersects that part of the ridge of Hermon now called Jebel el-Hish, passing Baniâs, and the little lake Phiala (now Birket er-Râm), which ancient geographers regarded as the head source of the Jordan (Joseph. *Bell. Jud.* iii. 10. 7). This range bears some resemblance in features and scenery to the mountains of Upper Galilee. It is broad, and is interspersed with green upland plains, and wide fertile valleys. Its peaks and sides are mostly covered, more or less densely, with forests of oak, sycamore, terebinth, and here and there clumps of pine trees. The timber is larger and the woods denser than in any part of Western Palestine (Porter's *Damascus*, i. 307). The forests, however, are gradually disappearing under the destroying hand of the Bedawîn and the Damascus charcoal manufacturers. At the place where the border-line crosses, the ridge appears to be of about equal altitude with that on the opposite side of the Hâleh; but it slowly decreases, and finally sinks into the table-land a few miles south of the ruins of Kuneiterah. The scenery of the southern end is beautiful. Lines and groups of conical hills, perfect in form, covered from base to summit with green grass, and sprinkled with evergreen oaks, are divided by meadow-like plains and winding vales, with here and there the grey ruins of a town or village. The grass in spring is most luxuriant; and the wild flowers—anemones, tulips, poppies, marigolds, cowslips—are more

abundant than even in Galilee. The whole landscape glows with them. The superiority of the pastures and abundance of flowers are owing to the forests, to the high elevation, and to the influence of the neighbouring snow-crowned peaks of Hermon. At all seasons dew is abundant; one of the highest summits is called *Abu Nedy*, 'the father of dew'; and clouds may often be seen hovering over the ridge when the heaven elsewhere is as brass. This illustrates the Psalmist's beautiful imagery: 'As the dew of Hermon, that descended on the mountains of Zion' (cxxxiii. 3).

The ridge is now almost desolate. With the exception of two or three small villages, and a few families of nomads, it has no inhabitants. Its rich soil is untilled, and even its pastures are forsaken or neglected.

At the eastern base of the ridge commences the noble plateau of Bashan, at once the richest and the largest plain in Palestine. It extends unbroken southward to the banks of the Yarmuk (thirty miles), and eastward to Jebel Haurân (fifty miles). The western part of it is called *Jaulân* (Hebrew *Golan*, Greek *Gaulonitis*), the eastern *Haurân*. The former has a gently undulating surface; it is studded with conical and cup-shaped tells; is abundantly watered, especially in the northern part, by streams and fountains; and is famed throughout all Syria for the excellence of its pastures. The surface is in places stony, and covered with shrubberies of hawthorn, ilex, and other bushes; elsewhere it is smooth as a meadow. Towards the west the plateau is intersected by deep ravines or gullies, which carry its surplus waters down to the Jordan. The high ridge which runs along the eastern side of the Jordan valley from Hermon to Gilead is the supporting wall of this plateau. *Jaulân* has now very few settled inhabitants; but it is visited periodically by the vast tribes of the Ana eh from the Arabian desert, whose flocks and herds, numerous as those of their ancestors 'the children of the East' (Judg. vi. 3-5), devour, trample down, and destroy all before them. The remains of old cities and villages in the plain are very numerous, and some of them very extensive (GOLAN; Porter's *Damascus*, vol. ii.).

The plain of Haurân divides itself naturally into two parts: one, lying on the north-east, is a wilderness of rocks, elevated from twenty to thirty feet above the surrounding plain. The border is sharply defined, and has received from the sacred writers an appropriate name, *Chebel* (Deut. iii. 4, 13; 1 Kings iv. 13, in the Hebrew). The rocks are basalt, which appears to have been thrown up from innumerable pores or craters in a state of fusion, to have flowed over the whole ground, and then, while cooling, to have been rent and shattered by some terrible convulsion. For wildness and savage forbidding deformity, there is nothing like it in Palestine, and it is scarcely equalled in the world. This is the *Argob* of the Hebrews, the *Trachonitis* of the Greeks, and the *Lejah* of the modern Arabs. (See for a full description the article TRACHONITIS.) Its inhabitants have in all ages partaken of the wild character of their country. They have been, and are, lawless bandits; and their rocky fastness is the home of every outlaw. Along the rocky border of this forbidding region, and even in the interior, are great numbers of primæval cities, most of them now deserted, though not ruined (cf. Deut. iii. 4).

The remaining portion of Haurân is a plain,

perfectly level, with a deep black soil, free from stones, and proverbial for its fertility. At intervals are rounded or conical tells, usually covered with the remains of ancient cities or villages. The water-courses are deep and tortuous, running westward to the Jordan; but none of them contain perennial streams.

Along the eastern border of this noble plain lies an isolated ridge of mountains—the Mountains of Bashan—about forty miles long by fifteen broad. It divides the ancient kingdom of Bashan from the arid steppes of Arabia: and it forms at this point the north-eastern boundary of Palestine. The scenery is picturesque. Being wholly of volcanic origin, the summits rise in conical peaks, and are mostly clothed to the top with oaks. The glens are deep and wild; the mountain-sides are terraced, and though rocky and now desolate, they afford evidence everywhere of the extraordinary richness of the soil and of former careful cultivation. The grass and general verdure surpass anything in Western Palestine; and the brilliant foliage of the evergreen oak and terebinth gives the mountains the look of eternal spring. In another respect, also, the scenery differs widely from that of the west. In the latter the white limestone and chalky strata, and the white soil, give a parched and barren look to the country. In Bashan, the rocks are all basalt, in colour either dark slaty gray or black; and the soil is black. This makes the landscape somewhat sombre, but on the whole more pleasing than Judæa or Samaria. Though these mountains are far from the sea, and on the borders of an arid wilderness, they do not appear to suffer so much from drought or from the burning sun of summer as the western range. This arises in part from the forests that clothe them, and in part from their greater elevation—the highest peaks cannot be less than 6000 feet above the sea, and the average elevation of the plain of Haurân is greater than that of the mountains of Western Palestine. It is remarkable, however, that water is extremely scarce in Haurân. Even in winter, though the snow lies deep upon the mountains, and sometimes covers the plain, the torrents are neither numerous nor large, and there are no perennial streams. Fountains are rare. The ancient inhabitants have expended much labour and skill in attempts to obtain a supply of water. Cisterns and tanks of immense size have been constructed at every town and village. Some are open, as at Bozrah and Salcah; some arched over, as at Kenath and Suleim; some excavated in the rock, forming labyrinths, as at Edrei and Damah. In a few places long subterranean canals have been sunk, in others aqueducts have been made. There is an aqueduct at Shuhba in the mountains, upwards of five miles long; and there is one in the plain at Dera not less than twenty. Irrigation is not practised in Bashan—it is not necessary. The soil is deep and rich, totally different from the scanty gravelly covering of the hills of Judah; the great elevation, too, prevents the intense heat and evaporation which so seriously affect the low plains of Palestine. In another respect Bashan presents a very marked contrast to the west. Its old cities still stand. Their walls, gates, and primeval houses, are in many places nearly perfect. The temples and monuments of the Greek and Roman period, and the churches of the early Christian age, are also in a good state of

preservation. There are no remains of antiquity west of the Jordan which would bear comparison with those of Bozrah, Salcah, Kenath, Shuhba, or Edrei; and probably in no other country of the world are there specimens of the domestic architecture of so remote an age (Porter's *Damascus*, vol. ii.; *The Giant Cities of Bashan*, pp. 1, *seq.*)

The province of Haurân is an oasis in the midst of wide-spread desolation. This is mainly owing to the indomitable courage of the Druzes who inhabit it. They have taught rapacious Bedawin and rapacious Turks alike to respect them and the fruits of their industry. Grouped together in a few of the ancient cities and villages on the western slopes of the mountains, and along the southern border of the Lejah, they are able to bid defiance to all their enemies. A number of Christians and Mohammedans are settled among and around them. They cultivate large sections of the plain, and they find a ready market for their grain in Damascus.

South of the river Yarmuk the plain of Bashan gives place to the picturesque hills of Gilead. Their slopes are easy, their tops rounded, and there are undulating plateaus along the broad summit of the ridge. Their elevation, as seen from the east, is not great. The distant view is more that of an ascent to a higher part of the plain, than of a mountain range. The summits seem nearly horizontal, and not more than five or six hundred feet above the plain. On passing in among them, the physical features assume new forms, and the scenery becomes very beautiful. Wild glens cut deeply down through the ridge to the Jordan valley. The first of these is the Yarmuk, which contains a rapid perennial torrent rushing along its rocky bed between fringes of willow and oleander. It is the largest tributary to the Jordan, and next to it the largest river in Palestine. Further south is Wady Yâbes, taking its name from the old city of Jabesh Gilead, which once stood on its bank. Still further south is the Jabbok, also a perennial stream, though much smaller than the Yarmuk. The scenery of these glens, and the intervening hills, is not surpassed in any part of Palestine. The steep banks are broken by white limestone cliffs, and they are in most places covered with the glistening foliage of the ilex, intermixed with hawthorn and arbutus; while the slopes overhead, and the rounded hill-tops, wave with forests of oak, terebinth, and occasionally pine. The little meadows along the streams, the open spaces on the mountains, and the undulating forest glades, are all covered with rich herbage. Gilead is still 'a place for cattle' (Num. xxxii. 1; see Art. GILEAD).

The highest peak of Gilead is Jebel Osha, near es-Salt. South of it the ridge sinks, and finally melts into the plateau near the ruins of Rabbath-Ammon. None of the peaks of Gilead have been measured, and their height can only be estimated by comparison with the plain behind, and the mountains of Samaria opposite. Viewed from the west, the top of the whole ridge on the east side of the Jordan appears nearly horizontal; yet both to the north and south of Gilead the summit of the ridge is on the level of the plateau. Jabel Osha, therefore, can scarcely be more than 700 feet above the plateau, which would make its elevation above the sea less than 4000 feet. This is much lower than the ordinary estimate.

Like Bashan, Gilead contains the remains of many splendid cities, the chief of which are Gerasa, Rabbath-Ammon, Gadara, and Pella. The ruins of towns, castles, and villages, stud the mountains in all directions. Settled inhabitants are now very few, and they are greatly oppressed by the inroads of the Bedawin, who, attracted by the rich pastures and abundant waters, penetrate all parts of the country [GILEAD].

South of Gilead lies 'the land of Moab' (Deut. i. 5; xxxii. 49), a plateau like Bashan, but bleaker and more desolate. Less is known of it than of any other part of Palestine. It has never been explored; and with the exception of three or four travellers passing through and following nearly the same route, the country has scarcely been entered. From the ruins of Ammon it extends in a succession of rolling downs to Kerak. On the west it breaks down in stupendous cliffs, 3000 feet and more, to the shore of the Dead Sea. Chasms of singular wildness cut these cliffs to their base, and run far back into the plain. Along the torrent-beds are fringes of willow, oleander, tamarisk, and palms. The ravine of Kerak is its southern boundary; but the grandest of all the ravines is the Arnon, which formed the southern boundary of Reuben's territory (Deut. iii. 12). Wady Zurka Ma'in is also a deep ravine, and is remarkable as having near its mouth the famous warm fountains, anciently called *Callirrhoe* (Joseph. *Antiq.* xvii. 6. 5; Pliny, v. 16; Irby and Mangles, *Travels*, p. 467, *seq.*, 1st ed.) Along the western brow of the plateau, little conical and rounded hills rise at irregular intervals to a height of two or three hundred feet. The highest is Jebel Attarus. There are also some low ridges away to the eastward, separating the southern part of the plain from the desert of Arabia (Burckhardt, *Travels in Syria*, p. 375).

The soil of the plateau is rich and deep, but being composed mainly of disintegrated limestone, and diffused over white calcareous strata, it is greatly affected by the sun, and assumes a bleak and parched aspect during the summer. At the northern end, where it joins Gilead, are some remains of oak forests; and in the deep ravines, and along the north-western declivities, trees and shrubs grow abundantly, but the vast expanse of the upland is treeless and shrubless (Irby and Mangles, p. 474; Burckhardt, p. 364). At Wady Mojob (Arnon) the plain assumes a more rugged aspect, being strewn with basalt boulders, and dotted with rocky mounds. These extend to Kerak. The general features and character of the plateau agree perfectly with the incidental notices of the sacred penmen. It is 'a land for cattle,' famed throughout all Palestine for the abundance and richness of its pastures, and forming a constant source of dispute and warfare among the desert tribes (Burckhardt, p. 368). It was well termed *Mishor*, a region of 'level downs,' a 'smooth table-land,' as contrasted with the rough and rocky soil of the western mountains (MISHOR; cf. Stanley, *S. and P.*, p. 317).

The plateau of Moab is a thirsty region. Fountains, and even spring wells, are very rare; and there are no perennial streams, yet it abounds with traces of former dense population. The ruins of old cities—many of great extent—and of old villages, stud its surface. In numbers of these we recognise the Bible names, as Hesbân, El-âl, Me-

deba, and Arair. The want of fountains and streams was supplied by tanks and cisterns, which abound in and near all the old towns. The 'pools of Heshbon' are still there (Cant. vii. 4; *Handbk. for S. and P.*, p. 298). But the cities and villages are now deserted. Moab has no settled inhabitants. From Ammon to Kerak there is not a single village or house. Large tribes of Bedawin roam over its splendid pastures; and a few poor nomads, with the warlike people of Kerak, cultivate some portions of its soil; but all the rest is desolate.

The elevations of Eastern Palestine have not been taken with accuracy. Some of those collected by Van de Velde appear to be mere estimates. They may be given, however, in the absence of better—

The following books contain all the information yet given to the public regarding the plain of Moab:—Burckhardt, *Travels in Syria*, 364, *seq.*; Irby and Mangles, *Travels in Egypt*, etc., 456, *seq.*, 1st ed.; Seetzen, *Reisen*, i. 405, *seq.*; ii. 324, *seq.*; De Saulcy, *Voyage Round the Dead Sea*, i. 329, *seq.*; G. Robinson, *Travels in Palestine*, ii. 179; *Handbook for Syr. and Pal.*, 297, *seq.*

It may be well now to group together a few of those characteristics of Palestine, embodied in the preceding sketch of its physical geography, and which tend to illustrate some of the statements and incidental notices of the sacred writers.

1. To an Englishman Palestine does not appear either rich or beautiful. Calling to mind the glowing descriptions of the Bible, the Eastern traveller is apt to feel grievous disappointment, and even to accuse the sacred writers of exaggeration. They speak of the land as 'a land flowing with milk and honey' (Exod. iii. 8; Lev. xx. 24; Deut. vi. 3; Josh. v. 6); 'a good land, a land of brooks of water, of fountains and depths that spring out of valleys and hills; a land of wheat, and barley, and vines, and fig trees, and pomegranates; a land of oil olive, and honey; a land wherein thou shalt eat bread without scarceness' (Deut. viii. 7-9); 'a land of hills and valleys, and drinketh water of the rain of heaven; a land which the Lord thy God careth for; the eyes of the Lord thy God are always upon it, from the beginning of the year even unto the end of the year' (xi. 11, 12). Those accustomed to western verdure, and the full glory of western harvests, can see little fertility in the naked hills and bleak plains of Palestine. A thoughtful consideration of the whole subject, however, and a careful survey of the country, prove that the words of the sacred penmen were not exaggerated. It must be borne in mind that they were describing an eastern, not a western land. When Moses addressed the above words to the Israelites, he was accustomed, and so were they, to the flat surface, and cloudless, rainless, sky of Egypt, and to the stern desolation of

the wilderness. Compared with these, Palestine was a land of hills and valleys, of rivers and fountains, of corn and wine. Palestine is not now what it then was. The curse is upon it. Eighteen centuries of war, and ruin, and neglect, have passed over it. What would the fairest country of Europe be under similar circumstances? But the close observer can still see the vast resources of the land, and abundant evidences of former richness, and even beauty. The products ascribed to it by the sacred writers are just those for which its soil and climate are adapted. The wide plains for wheat and barley; the sheltered glens and deep warm valleys for the pomegranate, the olive, and the palm; the terraced slopes of hills and mountains for the vine and the fig. Then there are the oak forests still on Bashan; the evergreen shrubberies on Carmel; the rich pastures on Sharon, Moab, and Gilead; and the full blush of spring flowers all over the land.

2. Palestine now seems almost deserted. Few countries in the old world are so thinly peopled. Some of the plains—the lower Jordan, for example, and Southern Philistia—appear to be ‘without man and without beast.’ Yet in no country are there such abundant evidences of former dense population. Every available spot on plain, hill, glen, and mountain, bears traces of cultivation. It is ‘a land of ruins.’ Everywhere, on plain and mountain, in rocky desert and on beetling cliff, are seen the remains of cities and villages. In Western Palestine they are heaps of stones, or white dust and rubbish strewn over low tells—in Eastern, the ruins are often of great extent and magnificence. All this accords with the vast population mentioned alike by the writers of the O. T. (Judg. xx. 17; 1 Sam. xv. 4; 1 Chron. xxvii. 4-15), and of the New (Matt. v. 1; ix. 33; Luke xii. 1, etc.), and confirmed by the statements of Josephus.

3. It has been seen that Palestine has, in reality, only one river—the Jordan; yet it has several perennial streams, such as the Jabbok, the Arnon, and the historic Kishon; and also the Yarmuk, the Belus, and others not mentioned in the Bible. Its mountains also abound with winter torrents. Doubtless these were all more copious in ancient days, when forests clothed the hills and the soil was fully cultivated. To these Moses referred, when he described Palestine as ‘a land of brooks of water.’ Fountains abound among the hills—‘fountains and depths that spring out of valleys and hills’—and throughout the country are vast numbers of wells, and cisterns, and aqueducts, showing that the supply of water from ordinary sources must have been always limited; and illustrating too the labours of the patriarchs in digging wells, and their hard struggles to defend them (Gen. xxvi. 15; 2 Sam. xxiii. 15; John iv. 6; Deut. vi. 11).

4. Another of the physical characteristics of Palestine ought not to be overlooked. Its limestone strata abound in caves, especially in the mountains of Judæa. Some are of immense size, as that at Khureitûn, near Bethlehem (*Handbook*, p. 229). Many of them were evidently used as dwellings by the ancient inhabitants, as those near Eleutheropolis and along the border of Philistia (*Id.*, pp. 256, *seq.*); many as tombs, examples of which are numerous at Jerusalem, Hebron, and Bethel; many as stores for grain, and folds for flocks. These caves are often mentioned in sacred

history. Lot and his daughters took refuge in a cave after the destruction of Sodom (Gen. xix. 30); in a cave the five kings hid themselves when pursued by Joshua (Josh. x. 16); in the caves of Adullam, Maon, and Engedi, David found an asylum (1 Sam. xxii. 1; xxiv. 3); in a cave Obadiah concealed the prophets of the Lord from the fury of Jezebel (1 Kings xviii. 4); in caves, and ‘dens,’ and ‘pits,’ and ‘holes,’ the Jews were accustomed to take refuge during times of pressing danger (Judg. vi. 2; 1 Sam. xiii. 6). Consequently, to enter into ‘holes of the rock and caves of the earth’ was employed by the prophets as an impressive image of terror and impending calamity (Is. ii. 19; Rev. vi. 15, 16). The tomb of Abraham at Machpelah was a cave (Gen. xxiii. 19); our Lord’s tomb was a cave, and so was that of Lazarus (John xi. 38), and those in which the Gadarene demoniacs dwelt (Mark v. 3). In later times, caves became strongholds for robbers (Joseph. *Bell. Jud.* i. 16. 2), and places of refuge for conquered patriots (*Vita*, 74, 75). Caves and grottoes have also played an important part in the traditionary history of Palestine. ‘Wherever a sacred association had to be fixed, a cave was immediately selected or found as its home’ (Stanley, pp. 151, 435, 505).

CLIMATE.—Probably there is no country in the world of the same extent which embraces a greater variety of climate and temperature than Palestine. On Mount Hermon, at its northern border, we approach a region of perpetual snow. From this we descend successively by the peaks of Bashan and Upper Galilee, where the oak and pine flourish, to the hills of Judah and Samaria, where the vine and fig-tree are at home, to the plains of the seaboard, where the palm and banana produce their fruit, down to the sultry shores of the Dead Sea, on which we find tropical heat and tropical vegetation. To determine with scientific accuracy the various shades of climate, and to arrange throughout the country exact isothermal lines, would require a long series of observations made at a number of distinct points now scarcely ever visited by scientific men. Sufficient data exist, however, to afford a good general view of the climate—a view sufficiently accurate for the illustration of the Bible. The writer of this article, during a residence of nine years in Syria and Palestine, had ample opportunity of noting the peculiarities of climate and the range of the thermometer in many parts of the country. He observed also how the seasons were affected by the elevation or depression of the several localities. During one summer he kept a register of the thermometer at Shumlân, on Lebanon, 2000 feet above the sea; and he also kept a register of both thermometer and barometer—though not with perfect regularity—during a great part of four years at Damascus. The latter was unfortunately either lost or mislaid on his removal to England, but he possesses notes of its chief results. Both these places, it is true, are considerably north of Palestine, yet their climate and temperature approach very nearly to those of the higher portions of that country.

Along the summits of the central ridge of Palestine, and over the table-land east of the Jordan, the temperature is pretty nearly equal. The cold in winter is sometimes severe. The thermometer has been known to fall as low as 28° Fahr., and frost hardens the ground—more, however, on the eastern plains than on the Judæan hills. Snow falls nearly

every winter; it seldom lies longer than a day or two; but in the winter of 1857 it was eight inches deep, and it covered the eastern plains for a fortnight. The results were disastrous. Nearly a fourth of the houses of Damascus were injured, and some of the flat-roofed bazaars and mosques were left heaps of ruin. South of Hebron snow is rare, and frost less intense. Along the seaboard of Philistia and Sharon, and in the Jordan valley, snow and frost are unknown; but on the coast farther north very slight frost is sometimes felt. Snow is rarely seen whitening the ground below an elevation of 2000 feet.

The summer heat varies greatly in different localities. It is most intense along the shores of the Dead Sea, owing in part to the depression, and in part to the reflection of the sun's rays from the white mountains. The temperature at Engedi is probably as high as that of Thebes. The heat, the evaporation, and the fetid atmosphere, render the whole of this plain dangerous to Europeans during the summer months. Tiberias is not so hot as Jericho, but it is sensibly hotter than the coast plain, where, owing to the influence of the sea-breeze, which sets in at ten o'clock in the forenoon and continues till two hours after sunset, the heat is not oppressive. The dry soil and dry atmosphere make the greater part of the coast salubrious. Palms flourish luxuriantly, and produce their fruit at Gaza, Joppa, Haifa, and as far north as Sidon and Beyrout; they also bear fruit in favourable positions on the plain of Damascus. At Hebron, Jerusalem, along the summit of the central ridge, and on the eastern plateau, the heat is never intense, the thermometer rarely rising to 90° in the shade, though the bright cloudless sun and white soil make open-air labour and travel exhausting and dangerous. The following results of Dr. Barclay's observations at Jerusalem, extending over five years (1851-55), are important:—

'The greatest range of the thermometer on any year was 52° Fahr. The highest elevation of the mercury was 92°. Under favourable exposure, immediately before sunrise, on one occasion, it fell to 28°. The mean annual average of temperature is 66.5°; July and August are the hottest months, January the coldest. The coldest time is about sunrise; the warmest noon; sunset is about the mean. The average temperature of January, the coldest month, during five years, was 49.4°; of August, the warmest month, 79.3°.

The temperature of Damascus is lower than that of Jerusalem. The highest range of the thermometer noted was 88°, the lowest 29°. The mercury rarely rises above 84° during the heat of the day. At Shumlân, on Lebanon, the highest range of the thermometer was 82° (August 22d); and the average of that month was 76°. According to the estimates of Dr. Forbes (*Edinburgh New Philos. Jour.*, April 1862), the mean annual temperature of Beyrout is 69°, of Jerusalem 62.6°, and of Jericho 72°. That of Jerusalem differs widely from Dr. Barclay's average; and Jericho appears to be too low.

*Rain.*—In Palestine the autumnal rains commence about the end of October. In Lebanon they are a month earlier. They are usually accompanied by thunder and lightning (Jer. x. 13). They continue during two or three days at a time, not constantly, but falling chiefly in the night; then there is an interval of sunny weather. The

quantity of rain in October is small. The next four months may be called the rainy season, but even during them the fall is not continuous for any lengthened period. The showers are often extremely heavy. In April rain falls at intervals; in May the showers are less frequent and lighter, and at the close of that month they cease altogether. No rain falls in Palestine in June, July, August, or September, except on occasions so rare as to cause not merely surprise, but alarm; and not a cloud is seen in the heavens as large as a man's hand (1 Sam. xii. 17, *seq.*; Cant. ii. 11).\* In Lebanon the climate in this respect is somewhat different. In 1850 rain fell at Shumlân on June 27th and 28th, and on August 8th, 9th, and 12th; and in Damascus the writer has on one or two occasions seen rain in the month of June. In Lebanon also clouds are occasionally, though not frequently, seen during the summer months. Dr. Barclay gives the following average of the rainfall at Jerusalem during seven seasons:—1846-47, 59 inches; 1847-48, 55 inches; 1848-49, 60.6 inches; 1850-51, 85 inches; 1851-52, 65 inches; 1852-53, 44 inches; 1853-54, 26.9 inches.

This gives a general yearly average of 56.5 inches, which is 25 inches above the mean annual rainfall in England, and within one inch of that in Keswick, Cumberland, the wettest part of England (*City of Great King*, pp. 417, 428; *Penny Cyclopædia*, s.v. *Rain*).†

Only two seasons are expressly mentioned in the Bible; but the Rabbins (*Talmud*) make six, apparently founding their division upon Gen. viii. 22. They are as follows:—(1.) *Seed-time*: October—December. (2.) *Winter*: December—February. (3.) *Cold*: February—April. (4.) *Harvest*: April—June. (5.) *Heat*: June—August. (6.) *Summer*: August—October. These divisions are arbitrary. Seed-time now commences in October after the first rains, and continues till January. Harvest in the lower valley of the Jordan sometimes begins at the close of March; in the hill country of Judæa it is nearly a month later, and in Lebanon it rarely begins before June; and is not completed in the higher regions till the end of July. After the heavy falls of rain in November, the young grass shoots up, and the ground is covered with verdure in December. In January, oranges, lemons, and citrons are ripe; and at its close, in favourable seasons, the almond tree puts out its blossoms. In February and March the apricot, pear, apple, and plum are in flower. In May, apricots are ripe; and during the same month melons are produced in the warm plains around the Sea of Galilee. In June, figs, cherries, and plums ripen; and the roses of the 'Valley of Roses,' near Jerusalem, and of the

\* During the twelve years, from 1846 to 1859, only two slight showers fell in Jerusalem between the months of May and October. One fell in July 1858, another in June 1859 (Whitty, *Water Supply of Jerusalem*, p. 194).

† In the year 1856, Dr. Whitty states that the rainfall at Jerusalem was 94 inches; and in the following year, 1857, it reached the enormous amount of 104.2 inches. It is remarkable that the averages given by Dr. Whitty differ widely from those of Dr. Barclay. The former makes the yearly average from 1846 to 1859 to be as high as 65 inches, being 9 inches higher than Barclay's (Whitty, *Water Supply of Jerusalem*, 194).

gardens of Damascus, are gathered for the manufacture of rose-water. August is the crowning month of the fruit season, during which the grape, fig, peach, and pomegranate are in perfection. The vintage extends on through September. In August vegetation languishes. The cloudless sky and burning sun dry up all moisture. The grass withers, the flower fades, the bushes and shrubs take a hard gray look, the soil becomes dust, and the country assumes the aspect of a parched, barren desert. The only exceptions to this general bareness are the orange-groves of Joppa and those few portions of the soil which are irrigated.

The following are the principal works from which information may be obtained regarding the climate of Palestine and Syria. (1.) *An Economical Calendar of Palestine*, by Buhle, translated by Taylor, and inserted among the fragments appended to Calmet's *Dict. of the Bible*. (2.) *Walehii Calendarium Palestinae*, ed. J. D. Michaelis, 1755. (3.) Volney, *Voyage en Syrie*, etc., 1787. (4.) Schubert, *Reise nach dem Morgenlande*, iii., 1838. (5.) Russeger, *Reisen*, etc. (6.) Robinson, *Bib. Res. passim*. (7.) Kitto, *Physical History of Palestine*, chap. vii. (8.) Barclay, *City of the Great King*, pp. 49 seq., 414 seq. (9.) Von Wildenbruch and Petermann, in *Journal of R. G. S.*, xx.; and Poole in vol. xxvi. (10.) Forbes in *Edinburgh New Philosophical Journal*, April 1862. (11.) Russell's *Natural Hist. of Aleppo* gives full information regarding the climate and products of Northern Syria.

**PLANTS.**—The various plants mentioned in the Bible are fully treated of in this work under their proper names. It is not necessary here to repeat what is said elsewhere, nor is it intended to give anything like a resumé of the botany of Palestine. All that is aimed at is to give some of the leading features of the botany of the country—to mention some of the principal plants now existing, and the localities in which they abound. The diversity of climate in Palestine has already been noticed. There is a regular gradation from the cold of northern Europe to the heat of the tropics. This produces a corresponding variety of plants. Many of the plants of Europe, Asia, and Africa, are found in the respective departments of Palestine. On the mountain-tops of Hermon, Bashan, and Galilee, the products of the cold regions of the north grow luxuriantly; on the coast plain are some peculiar to Eastern Asia; and in the deep valley of the Jordan, African flora abound.\*

On the northern mountain ridges, and in Bashan, the oak and pine are the principal trees; the former sometimes forming dense woods, and growing to a great size. The cedar is now, and probably always was, confined to the higher regions of Lebanon. Among smaller trees and bushes are the juniper, dwarf elder, sumac (*Rhus*), and hawthorn;

the ivy, honeysuckle, and some species of rose are met with, but not in great abundance. The celebrated 'oak of Bashan' appears to be the *Quercus Aegilops*; it has a massive trunk, short gnarled arms, and a round, compact top. It also abounds in Gilead, all over Jebel el-Hish, and Galilee. An oak of another and smaller variety (*Quercus Coccifera*), growing in bushes, not unlike English hawthorn in form, and having a leaf resembling holly, but smaller, spreads over Carmel, the ridge of Samaria, and the western slopes of the mountains of Judæa, sometimes forming impenetrable jungles. Intermixed with it in some places are found the arbutus, hawthorn, pistachio, and carob or locust-tree. Common brambles are abundant, as well as the styrax, the bay, the wild olive, and more rarely the thorny *Palurus Aculeatus*, or 'Christ's thorn.' In the lowlands are the plane-tree, sycamore, and palm; but none of them abundant. Along the sandy downs of Sharon and Philistia grows the maritime pine; and on the banks of streams are the willow, oleander, and gigantic reeds. In the Jordan valley, and along the Dead Sea, are found the nubk (*Zizyphus Spina-Christi*), papyrus, tamarisk, acacia, retama (a kind of broom), sea pink, Dead Sea apple (*Solanum Sodomeum*), the *Balanites Aegyptiaca*, and on the banks of the river several species of willow and reed.

The hills and plains of Palestine abound in flowers. In early spring large sections of the country are covered with them, looking like a vast natural parterre. The most conspicuous among them are the lily, tulip, anemone, poppy, hyacinth, cyclamen, star of Bethlehem, crocus, and mallow. Thistles are seen on plain and mountain in infinite number and great variety—some small and creeping, with bright blue spines, others large and formidable, with heads like the 'flails' of the ancient Britons. On the hills are also found vast quantities of aromatic shrubs, which fill the air with fragrance; among them are the sage, thyme, and sweet marjoram.

The cultivated trees and plants in Palestine include most of those common in Europe, with many others peculiar to warmer climates. The vine may be regarded as the staple product of the hills and mountains. It is still extensively cultivated; and those terraces now seen on the sides of valley, hill, and mountain, were doubtless clothed with vines in ancient times. The olive is scarcely less abundant. It is found at almost every village in Western Palestine; but its greatest groves are at Gaza, Nâbulus, and on the western declivities of Galilee. It is not met with in the Jordan valley, and it is extremely rare in Gilead and Bashan. Some of the trees grow to a great size, though the branches are low and sparse. The writer saw an olive tree in the plain of Damascus upwards of forty feet in girth.\* The fig is abundant, especially among the hills of Judah and Samaria. Other fruit-trees less common are the pomegranate, apricot, walnut, almond, apple, quince, and mulberry. Date-palms are found at various places along the maritime plain; there are very few in the mountains, and they have

\* Schubert says on this point:—'My report would become a volume were I to enumerate the plants and flowers which the season exhibited to our view; for whoever follows this comparatively short course of the Jordan from the Dead Sea northward, along the borders of the lakes of Gennesareth and Merom, and onward to the utmost springs in Anti-Libanus, traverses in a few days climates, zones, and observes varieties of plants, which are in other countries separated by hundreds of miles.'

\* The season for gathering olives begins in the lowlands in November, and does not end in the higher regions till January. A good account of the olive-tree and its culture may be seen in Thomson's *Land and the Book*, pp. 52, seq.

altogether disappeared from Jericho, the 'city of palm trees;' though dwarf-palms grow at various places along the Jordan valley, as at Gennesaret. In the orchards of Joppa are the orange, lemon, citron, and banana; and the prickly pear in great abundance formed into hedges. The principal cereals are wheat, barley, rye, Indian corn, and rice in the marshy plain of the upper Jordan. Of pulse we find the pea of several varieties, the bean, large and small, and the lentil. Among esculent vegetables are the potato, recently introduced, carrots, lettuce, beet, turnip, and cabbage. In the sandy plains, and in the Jordan valley, cucumbers, melons, gourds, and pumpkins are grown in immense quantities. Hemp is common, flax less so, and cotton is produced in large quantities. Mr. Poole states that indigo and sesame are grown in the valley of Nâbulus (*Journal R. G. S.*, xxvi. 57).\*

On the botany of Palestine the following works may be consulted:—Shaw, *Travels in Barbary and the Levant*, 1808; Hasselquist, *Voyages and Travels in the Levant*, 1766; Schubert, *Reise*, 1840; Kitto, *Physical Hist. of Pal.*; Russell, *Natural Hist. of Aleppo*; also papers in *Transactions of Linn. Society*, xxii.; and *Natural Hist. Rev.* No. v.; and Smith's *Dict. of Bible*, in art. *Palestine*, the valuable paper on botany by Dr. Hooker.

ANIMALS.—The zoology of the Bible, like the botany, is fully treated in this work under the names of the several animals. All that is needed in this place, therefore, is to group together the principal animals at present found in the different parts of Palestine, referring the reader for fuller particulars to the separate articles, and to the works mentioned at the close. It may be remarked that comparatively little is known as yet of the animals of Palestine. The great majority of travellers who visit the country have not time, and even if they had they do not possess the scientific knowledge necessary to minute researches in natural history. It is to be hoped that the recent expedition under the superintendence of the Rev. H. B. Tristram will add largely to our present store of information. As yet the results of his investigations are not known.

The *Domestic Animals* of Palestine are, with one or two exceptions, those common in England. The horse is small, hardy, and sure-footed; but not famed either for speed or strength. The best kinds are bought from the Bedawîn of the Arabian desert. Asses are numerous; some small and poor; others large and of great strength; and others, especially the white kinds, prized for their beauty and easy motion (cf. *Judg.* v. 10). Mules are

chiefly used as beasts of burden. As there are no roads and no wheeled carriages, the mules are the carriers of the country, and are met on all the leading thoroughfares in immense files, garnished profusely with little bells and cowries. The camel is also employed for carrying heavier burdens, for performing more lengthened journeys, and for traversing the neighbouring deserts. The best camels are bought from the wandering Arabs. The ox of western Palestine is mostly small and poor, owing doubtless to hard work and insufficient food; but the writer has seen great droves of fine fat cattle upon the rich pastures of Jaulân. There is a very tall, lanky, species in the plain of Damascus, and in parts of the Haurân. Oxen are now very rarely slaughtered for food in the interior. They are mainly kept for field-labour and for 'treading out the corn.' The buffalo is found in the valley of the upper Jordan; but the writer has not met it elsewhere in Palestine. Large-tailed sheep abound, and form the principal article of animal food. Flocks of the long-eared Syrian goat cover the mountains in all parts of the land. They are the chief producers of milk and butter. The common street dog infests the towns, villages, and encampments, belonging to no one, though tolerated by all as a public servant—the only sanitary officer existing in Palestine. There is another variety employed by shepherds. Cats, like dogs, are common property, and are rarely seen domesticated like our own.

The *Wild Animals* include the brown Syrian bear, found in the upper regions of Galilee, and in Jabel el-Hîsh; the panther in the hills of Judæa and Samaria, and in the thickets of the Jordan; jackals in immense numbers everywhere; wolves, hyenas, foxes; wild swine in the marshes of the Jordan, and in the thickets of Bashan and Gilead; gazelles and fallow deer on the plain; the ibex or wild goat in the wilderness of Judæa; the hare and the coney (called by natives *zeber*: the writer saw great numbers at the old castle of Baniâs on the northern border); the squirrel, mole, rat, mouse, and bat. Porcupines and hedgehogs are rare; Mr. Poole says badgers abound at Hebron (*Journal R. G. S.*, xxvi. 58).

Reptiles exist in great variety. Some parts of the country swarm with them. The most common are lizards, which may be seen basking on every rock, and bobbing their hideous heads up and down on every ruin. Serpents of various kinds are numerous; the scorpion, tarentula, and chameleon are not so numerous. Frogs in vast numbers crowd the marshes and moist districts, and fill the air with their roar on the still summer evenings; the tree-frog and toad are also found; and little tortoises crawl over dry plains, and along the banks of pond and stream. The crocodile is said to exist in the Crocodile river, now called *Nahr Zerka*, in the plain of Sharon. Of this Dr. Thomson writes: 'You will be surprised to hear that there are now living crocodiles in the marsh, but such is the fact. These millers say they have seen them often; and the government agent, a respectable Christian, assures me that they recently killed one eighteen spans long, and as thick as his body. I suspect that, long ages ago, some Egyptians accustomed to worship this ugly creature settled here, and brought their gods with them!' (*The Land and the Book*, p. 497). The creature seen at this place (if indeed the whole story was

\* The sugar-cane was formerly extensively cultivated in the Jordan valley, especially around Jericho. Indigo is still grown in the gardens of Jericho, and in the plain of Gennesaret. The tobacco-plant is common in Lebanon, and among the villages of western Palestine. Silk is extensively produced. Mulberry groves are rapidly increasing along the seaboard, and everywhere among the mountains of western Palestine. At present silk is the most valuable of the exports. The growth of cotton is also increasing. But the heavy exactions of the government, and the insecurity of life and property, prevent capitalists from planting trees and cultivating the great plains (Note by Rev. S. Robson, of Damascus).

not a pure fiction on the part of the Arabs) was doubtless the *Monitor Niloticus*.

*Birds* of prey are very numerous, including eagles and vultures, in the neighbourhood of Lebanon; hawks in great variety, and ravens all over the land; and owls, which hoot and scream during the still night. Storks pay passing visits, and occasionally the white ibis is met with; the heron, gull, and lapwing are found. The rocky hill-sides abound with partridges and quails; the cliffs in the glens with pigeons; the bushes with turtle-doves; and the lakes and marshes with ducks, teal, and other water-fowl. We also find the jay in some beautiful varieties; the king-fisher, the wood-pecker, the sparrow, the swallow, the cuckoo, and many others. Domestic fowls are not numerous in Palestine. A few barn-door fowls may be seen in the villages; but ducks, geese, and turkeys are extremely rare.

*Insects* are so numerous in some parts of the land as almost to become a plague. They include the common fly and mosquito; the bee, wasp, and hornet; great numbers of horse-flies; many species of butterflies; ants, spiders, grasshoppers, beetles, earwigs, and the beautiful glow-worm and firefly. The most formidable of the insects which infest Palestine is the *locust*. Some few are seen every year, but great flights are fortunately rare. The writer saw one in the summer of 1853 which nearly desolated eastern Syria. In many places they completely covered the ground; and for several days the air was so filled with them that the light of the sun was obscured as if by a mist.

Writers on the zoology of Palestine, or rather on Biblical zoology, are numerous. The following are the most important:—Bochart, *Hierozoicon*, ed. Rosenmüller, 1793-96; Hasselquist, *Travels*; Russell, *Nat. Hist. of Aleppo*; *Description de l'Égypte*, tom. xx.-xxii.; Schubert, *Reise*; Kitto, *Physical Hist. of Palestine*.

IV. GEOLOGY.—Although several eminent geologists have passed through Palestine, we have as yet no full scientific delineation—not even a satisfactory outline—of its geology. The country ought in many respects to be the most interesting in the world to the geologist. It possesses some unique features. It bears marks of tremendous volcanic convulsions, extending over a vast period. Its wonderful history has been considerably affected by these agencies. It is not intended in this place to attempt to supply this great want. The writer feels himself incompetent to the task, were it even admissible in such a work as the present. All he aims at is an outline of the leading geological features of Palestine, so far as they are known, such as may throw light on the peculiarities of its physical structure, the varieties of its soil and products, and some remarkable incidents in its history.

The general geological formation of Palestine is simple. The basis of the country—the great body of its hills and plains—is Jura limestone; the same which extends over Lebanon, the desert of Arabia, and the plateau southwards to the mountains of Sinai. Russegger says it may 'be classed with the Upper Jura formation, the oolite, and the Jura dolomite.' The rock is not uniform in character, composition, or colour. Most of it is compact, regularly stratified, of a dark cream or gray colour, and abounding in fossils. As a general rule it becomes softer towards the south. At Bethel are 'large masses of blue limestone with shells,' and on the sides of Gerizim 'is nummulitic limestone;

in some parts the rocks had been in a liquid state, for one kind had overflowed and encased the other' (Poole, in *Journal of R. G. S.*, xxvi. 56). Around Jerusalem dolomite prevails. The ancient buildings of the city appear to have been chiefly constructed of it. It is veined with red and white like marble, compact, partially crystallized, and takes a high polish. Traces of an upper cretaceous formation of a more recent period are visible over the whole mountains. In many places the action of the atmosphere and the washing of winter rains have stripped it from the firmer strata. It was filled with masses and nodules of flint; and these are now strewn over the surface where the soft chalk, in which they were originally embedded, has entirely disappeared. Between Nâbulus and Samaria the ground is covered with flints (Poole, 57); they abound in the wilderness of Judæa. On the road from Bethany to Jericho, Poole says, 'white nodules with black flint in the centre were thickly strewed about' (*id.*) In some places less exposed the upper crust remains; and thin layers of sandstone, soft and friable, alternate occasionally with the chalk (*id.*) Towards the borders of the Dead Sea some important changes are observed in the strata. Of the mountain of Neby Mûsa, Poole says, 'The soil smelt very strong of sulphur, and I got specimens of limestone of an oolite structure, also of a seam of bituminous and calcareous limestone, with pectens about six inches thick' (58). On the northern shore of the Dead Sea he got a specimen of bituminous stone. In the mountain along the south-west coast, 'the chalk showed in several places overlaid by limestone,' probably owing to the tilting of the strata, or some other volcanic agency. In eastern Palestine the limestone is found in Hermon, and throughout Gilead and Moab; but at Kerak it gives place to the ruddy sandstone strata which constitute the mountains of Edom, and which also appear beneath the limestone along the eastern shore of the Dead Sea. This eastern region has not been visited by any practical geologist, and the notices of it are brief and unsatisfactory.

This field of limestone, which thus extends over all Palestine, has been interrupted and broken in several places, and in a very remarkable manner, by volcanic agency; an agency, however, which operated at a very remote geological period. In eastern Palestine lava ejected from the earth in a state of fusion has flowed over the limestone, covering the whole area of the kingdom of Bashan. The centre of eruption appears to have been in Jebel Haurân, at the now extinct craters Tell Abu Tumeis and Kuleib. From these two craters lava streams flowed westward to the Lejah; and the Lejah itself is filled with smaller craters. The little conical and cup-shaped tells, which stud the surface of Haurân, were all at one time active volcanoes. The basalt thus emitted from numerous openings spread over the whole region, forming the lofty peaks of Jebel Haurân, and sweeping across the plain to the Jordan. Neither the breadth nor the exact limits of this lava-field are yet known. On the north-west it runs up the sides of Jebel el-Hîsh; on the north it is bounded by the river Awaj (Pharpar), which separates it from the limestone in the plain of Damascus. On the south it runs to the banks of the Yarmuk, and in places across the ravine to northern Gilead. The Lejah is geologically the most remarkable province in

Palestine. The hard black rock covers the entire surface to a depth of from thirty to one hundred feet—now stretching out in broad wavy reaches, divided by fissures of great depth—now thrown up in vast heaps of jagged fragments—now partially crystallized, and extending in long ridges like the Giant's Causeway. The rock is very hard, gives a metallic sound when struck, and is filled with air-bubbles. Spherical boulders of the same material are strewn over portions of the western declivity of the plain (Porter's *Damascus*, ii. 241, *seq.*; Wetzstein, *Reisebericht über Haurân*, pp. 27, *seq.*; Wilson, *Lands of the Bible*, ii. 318, *seq.*; Burckhardt, *Travels*, pp. 111, *seq.*)

On the west side of the Jordan, opposite Bashan, are two other lava-fields. The northern has its centre about three miles north-west of Safed, near the village of Jîsh. Dr. Robinson thus describes it:—'We soon came out upon a high open plain; and the volcanic stones increased as we advanced, until they took the place of every other; and, besides covering the surface of the ground, seemed also to compose the solid formation of the tract. In the midst of this plain we came upon heaps of black stones and lava, surrounding what had evidently once been the crater of a volcano. It is an oval basin, sunk in the plain . . . between three and four hundred feet in length, and about one hundred and twenty feet in breadth. The depth is perhaps forty feet. The sides are shelving, but steep and ragged, obviously composed of lava; of which our friend Mr. Hebard had been able to distinguish three different kinds or ages. . . . All around it are the traces of its former action, exhibited in the strata of lava and the vast masses of volcanic stones. It may not improbably have been the central point, or *Ableiter*, of the earthquake of 1837' (*B. R.*, ii. 444). From this place the lava-streams and boulders radiate to a considerable distance. The high terrace which projects from the eastern side of this ridge to the Jordan below Merom is chiefly basalt; but it seems to be connected with the Haurân field, as it is of a hard, firm texture, while that of Jîsh is soft and porous.

Another centre of volcanic action in former ages is on the high plain south-west of Tiberias, called Ard el-Hamma. The whole plain is a lava-field; and the double peak of Kurûn Hattîn, on its north side, is basalt, and so also is the ridge which bounds the Sea of Galilee on the south. The rock is similar to that of Bashan. The thickness of the bed may be seen in the cliffs on the mountain-side behind the warm baths of Tiberias. The base of these cliffs is limestone, while the whole superincumbent mass is black or dark-gray basalt. This field extends northward to the plain of Gennesaret, westward to Sefûrieh, and southward to Esdraelon. The soil covering it is thick black mould like that of Bashan. It appears that the greater portion of the substratum of Esdraelon is basalt, hidden beneath the soil (Wilson, ii. 304). But Jebel ed-Duhy (Little Hermon), and all the hills south of the plain, are limestone; and volcanic rock is not again seen in western Palestine (Anderson, *Geological Reconnaissance in Lynch's Official Report*, pp. 124, *seq.*) On the east of the Dead Sea basalt appears in boulders dotting the plateau between the river Arnon and Kerak; and Burckhardt says it is more porous than any specimens he had found farther northward (*Travels*, p. 375, *cf.*; Anderson, p. 191).

But the grand geological feature of Palestine is the central valley or chasm. Hugh Miller has said—'the natural boundaries of the geographer are rarely described by straight lines. Whenever these occur, the geologist may look for something remarkable' (*Old Red Sandstone*, p. 120). No better proof of this could be found than the Jordan valley. It runs in a straight line through the centre of Palestine. Its formation was probably simultaneous with those volcanic agencies that created the eastern and western lava-fields. It is a tremendous rent or fissure a hundred and fifty miles in length, rending asunder the whole limestone strata from top to bottom. Its extreme depth from the lips of the fissure to the bed of the Dead Sea is above 4000 feet, no less than 2624 of which is beneath the level of the ocean.\* Such a cleft in the earth's crust is without a parallel. It is singular that, though the rent was doubtless effected by a volcanic convulsion, and though volcanic rock covers such a large area on both sides of the northern part of the valley, there are no traces of it in the southern and deepest part, except at one or two points to be afterwards noticed. The sides of the valley, and the rock in its bed, so far as visible, are limestone, ranged occasionally in horizontal strata, but usually upheaved and tossed into wild confusion. Along the eastern shore of the Dead Sea, the limestone strata give place to sandstone (SEA). The sides of the valley, and the general conformation of the adjoining ridges, would seem to indicate that the limestone crust had been heaved up by some tremendous volcanic agency running from south due north, and causing that huge rent which forms the basin of the Dead Sea and the Jordan valley. May it not be that this agency was the lava-stream which at length found an exit at the craters of Tiberias, Jîsh, and Haurân? This subject is well worthy the attention of future geologists.

The evidences and often fearful results of recent as well as remote volcanic agency are visible along the whole Jordan valley, and over a large section of the adjoining districts. Beginning at the north we have the crater of Jîsh, extinct indeed at the surface, but giving palpable proof in tremendous throes of earthquakes that internal fires are still raging. Next follow the copious saline springs of Tabighah, on the northern shore of the Sea of Galilee; then the sulphureous springs of Tiberias, where the water gushes from the rock at a temperature of 144° Fahr. On the eastern side of the Jordan, in the glen of the Yarmuk, are the still hotter and more copious springs of Amatha, issuing from beneath lofty cliffs of igneous rock (Burckhardt, p. 376; *Handbook for S. and P.*, pp. 320, 423). It is deserving of special note, that at the time of the great earthquake of 1837, and, as the writer has been informed, on every recurrence of an earthquake in the region, these springs well out in much greater abundance, and their waters increase in warmth. There is thus evidently a subterranean connection between them. The investigations of the writer have tended to establish another point of considerable interest. The towns and villages which have been most severely shaken by earthquakes in this region are those situated on the trap fields; while

\* The depression of the Dead Sea is 1,316 + depth of sea as ascertained by Lynch, 1308 feet = 2624.—*Official Report*.

villages between them built upon the limestone strata have in many cases escaped almost without injury.

Proceeding still farther south, we find the 'copious salt-springs' of Wady Mâlih, where the water is 98° Fahr., and emits 'a fetid odour' (Robinson, iii. 308). Next come the springs of Callirrhoe, near the mouth of Wady Zurka Main, which opens into the north-eastern part of the Dead Sea. They rise in the bottom of a sublime gorge. The base of the cliffs on each side is ruddy ferruginous sandstone, above and through which black and dark gray trap appears, while the great body of the mountain behind is limestone. 'In one place a considerable stream of hot water is seen precipitating itself from a high and perpendicular shelf of rock, which is strongly tinted with the brilliant yellow of sulphur deposited upon it. On reaching the bottom we find ourselves at what may be termed a hot river, so copious and rapid is it, and its heat so little abated; this continues as it passes downwards by its receiving constant supplies of water of the same temperature . . . . We passed four abundant springs, all within the distance of half a mile, discharging themselves into the stream. . . . We had no thermometer, but the degree of heat in the water seemed very great; near the source it scalds the hand, which cannot be kept in for the space of half a minute' (Irby and Mangles, p. 468). Lynch found the temperature of the stream to be 95° Fahr. The temperature must be much higher at the source.

Along the shores of the Dead Sea are numerous saline springs and salt marshes. At its southern end is the remarkable ridge of hills called Khashim Urdûm, composed in a great measure of pure salt. Large quantities of bitumen are often found floating on the Dead Sea, especially, it is said, after earthquakes, as if thrown up by the action of subterranean fires. And away at the northern extremity of the valley, at the western base of Hermon, are pits of bitumen (*Handbook*, p. 453).

All these things indicate volcanic agencies still in action beneath the surface, and tend to illustrate some of the most remarkable events in the long history of Palestine, from the overthrow of Sodom and Gomorrah down to the earthquake of 1837. Palestine has in all ages been a country of earthquakes. The sacred writers show that they were familiar with them. The Scriptures abound in allusions to them, and figures drawn from them. From earthquakes the Psalmist borrows his figures, when he speaks of 'mountains being carried into the midst of the sea' (xlv. 2); of their 'skipping like rams, and the little hills like lambs' (cxiv. 4-6). To earthquakes the prophet alludes in his striking language—'The earth shall reel to and fro like a drunkard, and be removed like a cottage' (Is. xxiv. 20; cf. Ps. civ. 32; 1 Chron. xvi. 30; Jer. x. 10; Hab. iii. 6-8, etc.). There are, however, only two earthquakes expressly named in Scripture. The first was of such serious importance as to form a kind of epoch. Amos dates his vision 'two years before the earthquake' (i. 1). It took place 'in the days of Uzziah' (Zech. xiv. 5). The other instance of an earthquake mentioned in Scripture is that of the quaking of the earth and rending of the rocks at the crucifixion (Matt. xxvii. 51). In the seventh year of Herod the Great, Palestine was visited by a tremendous earthquake. (Joseph. *Antiq.* xv. 5. 2). We read of numerous others since that period (see Kitto, *Physical Hist. of Palestine*, ch. iv.)

The present bed of the Jordan valley is of a much later formation than either the limestone of the adjoining mountains, or the rock of the trap fields. The crust varies from 100 to 200 feet in depth, and through this the river has hollowed out for itself a deep tortuous channel, showing along its banks vertical sections. The lower parts consist mainly of tertiary deposits of indurated marl and conglomerate; while the upper stratum, now composing the surface of the plain, appears to be made up to a large extent of the washings and detritus of the chalk crust which originally covered the neighbouring highlands, enriched here and there with vegetable mould. The coast-lands, Sharon and Philistia, are coated with a light soil—in some places chalky, in others sandy, with a large admixture of red alluvial clay, and on the top rich vegetable mould. The plains of Esdraelon, Ard el-Hamma, Gennesaret, and Haurân, are coated with deep black clay of extraordinary fertility. It is composed in a great degree of disintegrated lava, and perhaps, to some extent, volcanic ashes, together with a large quantity of decomposed vegetable matter—the residue of the forests that appear to have at one period extended over all Palestine.

Besides the incidental notices in the travels of Burckhardt, and Drs. Wilson, Robinson, and Thomson, the following works contain the fullest information we possess on the geology of the different parts of Palestine:—1. Anderson's *Geological Reconnaissance*, in Lynch's *Official Report*. His researches were confined to the Jordan valley and the regions immediately adjoining. 2. Russegger's *Reisen*, vol. iii. This work embraces an account of the environs of Jerusalem, Hebron, and Joppa, and parts of Galilee around Nazareth and Tiberias. 3. Poole's short paper in the *Journal of R. G. S.*, vol. xxvi., giving brief notes of his journey from Joppa to Jerusalem and the Dead Sea, and then along the western shore, and round the southern end to the promontory of Lisân. 4. Wetzstein's *Reisebericht über Hauran und die Trachonen*, giving some account of the remarkable trap-fields of the Lejah, Jebel Haurân, the Safah, etc. 5. Porter's *Five Years in Damascus*, containing a full description of the physical geography of Bashan.

V. POLITICAL AND HISTORICAL GEOGRAPHY. It now only remains to give a brief sketch of the political divisions of Palestine under the rule of the tribes and nations which have in succession occupied it. These divisions are sometimes minutely described, frequently directly mentioned, and more frequently incidentally alluded to, by the sacred writers. It is mainly with the view of illustrating these Scripture references that the present sketch is given. All that is aimed at, however, is a brief, general, and connected view. Nothing more is needed in this place, for all the ancient tribes and more important provinces and districts are treated of fully in separate articles.

To facilitate reference and prevent confusion, the historical geography of Palestine is divided into five periods, corresponding to the leading events in the annals of the country.

1. *The Patriarchal Period*.—This period extends from the earliest ages to the conquest of Palestine by the Israelites. The first notices we have of the land are contained in the 10th chapter of Genesis, where the sacred writer describes the country colonized by Canaan, the grandson of Noah. From this patriarch Palestine got its first name—a name

which clings to it still. In that most remarkable chapter, the borders of the Canaanitish territory are defined. They extended from Sidon on the north along the coast, to Gaza on the south. Thence the border ran eastward, apparently in the line of Wady Gerar, to the plain of Sodom, now the southern section of the Dead Sea. Thence it was drawn to Lasha, the site of which is not known, but it probably stood at the north-eastern end of the Dead Sea. [LASHA.] It would seem that ancient Canaan corresponded almost exactly with western Palestine.

The families and tribes which sprung from Canaan are mentioned; and it appears from their subsequent history, as given in the Pentateuch, that each of them settled down permanently in a territory of its own. [CANAAN.] The boundaries of these territories are not given, but the locality of each is indicated either by direct statement or indirect allusion. *Sidon* was the firstborn of Canaan, and he colonized Phœnicia on the coast. His capital, to which he gave his name, was outside the boundary of Palestine, but a section of his territory, which extended as far south as Carmel, was included in the land. The *Hittites* were a powerful tribe, who settled among the mountains in the south, with Hebron apparently for their capital (Gen. xv. 20; xxiii. 16; HITTITES). The  *Jebusites* had their stronghold on Zion; and they held it and the surrounding territory down to the time of David (Josh. xv. 63; 2 Sam. v. 6). The *Amorites*, probably the most powerful of all the Canaanitish tribes, were widely spread (Josh. xxiv. 18). They had settlements in the mountains of Judah (Gen. xiv. 7, 13; Num. xiii. 29), but their main possessions were on the east of the Jordan, where they occupied the whole country from Arnon on the south to Hermon (Num. xxi. 13, 26; xxxii. 33; Deut. iii. 8). The *Girgashites* appear to have been located among the mountains of central Palestine, but there is no description of their exact territory in the Bible, and the theories of geographers are not satisfactory. [GIRGASHITES.] The *Hivites* founded Shechem, in central Palestine; Gibeon, Beeroth, Chephirah, and Kirjath-jearim, farther south; and a little principality under Hermon, on the northern border (Gen. xxxiv. 2; Josh. ix. 3, 7; xi. 19; 2 Sam. xxiv. 7; Josh. xi. 3). Canaan's other sons settled beyond the bounds of Palestine:—the *Arkites* and *Sinites* in Lebanon; the *Arvadites* on an island off the coast of Phœnicia; and the *Hamathites* in Hamath.

But besides the Canaanitish tribes, there are traces of other races—or perhaps another race—of aborigines in Palestine. The *Rephaim* are frequently mentioned. We find traces of them in widely different parts of the country. They gave their name to a little upland plain beside Jerusalem (Josh. xv. 8), and to a section of Mount Ephraim (xvii. 15). Bashan seems to have been occupied by them long previous to its conquest by the Amorites (Gen. xiv. 5; Deut. iii. 11). At the same remote period the *Zuzim* dwelt in Gilead, and the *Enim* held the plateau of Moab. These are all spoken of as men of huge stature, and they appear to have been different sections of one great family. Of their history we know nothing, except a few isolated facts; but it is remarkable that traditions of these giants cling to various localities in Palestine. Their marvellous exploits are recorded, their tombs of huge dimensions are pointed out, and the colossal houses they

built and occupied are still shown in the ancient cities of Bashan. [REPHAIM.] The race either died out or was extirpated in Bashan by the warlike hordes of Amorites. The Moabites and Ammonites conquered the giant tribes south of Bashan, and long occupied their territory; and the ruins of Rabbath-Ammon and Rabbath-Moab still remain as memorials of their rule (Deut. ii. 20, 21). On the south-east of Palestine, along the coast of the Mediterranean, the *Avim*, another primæval tribe of giants, had their abode; but they were conquered by the Caphtorim, or Philistines; and the giant warriors Goliath, Sippai, and Lahmi, were probably among the last of the race (1 Sam. xvii. 4; 2 Sam. xxi. 16-20; 1 Chron. xx. 4-8). The *Amalekites* were nomads, who roamed over the scanty pastures of the southern desert, scarcely crossing the border of Palestine.

At the time of the Exodus, all Western Palestine was held by these Canaanitish and Philistine tribes; and the country east of the Jordan was divided into three kingdoms. On the north lay the kingdom of the giant Og, the last of the Rephaim, which extended over Bashan and the section of Gilead north of the Jabbok. Between the Jabbok and the Arnon was the kingdom of Sihon; while the region south of the Arnon was possessed by the Moabites.

In addition to the tribes now enumerated, Moses mentions the Kenites, Kenizzites, and Kadmonites; but these, though included in the land promised to Abraham, had their territories in Arabia, beyond the boundaries of Palestine (Gen. xv. 18-21; KENITES, etc.) The *Perizzites* are also mentioned as a tribe distinct from the Canaanites, residing in some part of Western Palestine. Little is known either of their origin or their possessions, and that little is given elsewhere [PERIZZITES].

2. *The Period from Joshua to Solomon.*—At the commencement of this period, an entire change was wrought in the political geography of Palestine. The country was divided among the twelve tribes of Israel. The eastern section was first apportioned. Moab's territory south of the Arnon was left untouched. A very clear and full account of the allotment of all the rest is given in Num. xxxii. The tableland (Mishor) extending from the Arnon to Heshbon was given to the tribe of Reuben (cf. Josh. xiii. 15, *seq.*) Gad received the region between Heshbon and the river Jabbok, together with an additional strip along the east bank of the Jordan, extending up to the Sea of Chinnereth (vers. 24-28). The rest of Gilead and all Bashan were allotted to Manasseh, and this was at once the largest and the richest allotment made to any of the tribes (29-31).

Western Palestine was divided by Joshua among the remaining tribes. Judah received the country lying between the parallel of Jerusalem and the southern border; but subsequently a section on the south-east was given to Simeon; and another section was taken off its western side and allotted to Dan. These two tribes were thus, as regards their possessions, amalgamated with Judah (Josh. xv. 1, 40-47). North of Judah lay Benjamin, confined to a narrow strip stretching across the country from the Jordan to Beth-Horon, between the parallels of Jerusalem and Bethel (xviii. 11-25). Next to Benjamin came the children of Joseph, grouped close together—Ephraim on the south, and Manasseh on the north. Their united portion reached from the Jordan to the sea, and

from Bethel to the border of Esdraelon (xvi., xvii.) In addition to this large mountain territory, the cities of Beth-shean, Taanach, Megiddo, and a few others situated in Esdraelon, were allotted to them. To Issachar was given the noble plain of Esdraelon—a territory, however, whose fertility was more than overbalanced by its exposed situation (xix. 17-23). Zebulun received his lot amid the picturesque hills and plains of Lower Galilee, having Tabor on the east, and the Great Sea, at the base of Carmel, on the west (10-16). Asher got the fertile plain of Acre, and the coast of Phœnicia up to Sidon (24-31). In the mountains, on the northern border, Naphtali found a beautiful highland home (32-39). The lot of Dan was too small, and the Philistines hemmed the tribe in so that they were unable to cultivate the rich soil of the Shephelah. They consequently made an expedition to the far north, and established an important colony on the plain of the upper Jordan (47; cf. Judg. xviii.)

But though the whole land was thus allotted, it was not conquered. The Philistines still held their plain; and the mercantile Canaanites, whom the Greeks called Phœnicians, remained in their great seaports. Many cities, also, in different parts of the country, were retained by their Canaanitish founders (Judg. i. 21, *seq.*)

3. *From the Death of Solomon to the Captivity.*—On the death of Solomon, the tyranny and folly of his son rent the nation of Israel. Long before that time there had been rivalry between the powerful families of Judah and Ephraim; Rehoboam's folly was the occasion of its breaking out into open hostility. The boundaries of the tribes were not disturbed by the rupture in the nation. Benjamin clung to Judah, and its northern border became the line of demarcation between the two kingdoms. Dan and Simeon occupied portions of the allotted territory of Judah, and were therefore reckoned parts of that tribe (1 Kings xii. 17); hence the southern kingdom is usually said to have consisted of only the two tribes of Judah and Benjamin, while in reality it included four (1 Kings xix. 3; 2 Chron. xi. 10; with Josh. xix. 41, 42). The remaining tribes east and west of the Jordan chose Jeroboam as their king; but Bethel (2 Chron. xiii. 19) and some other cities farther north were afterwards added to Judah (xv. 8).

The next change in the political geography of the land was brought about by the conquests of Assyria. The northern kingdom was invaded, Samaria its capital taken, and the whole people of the land carried away captive. Foreign colonists were placed in their room; and these, adopting the Jewish law, and conforming to some extent to the Jewish ritual, were the founders of the nation and sect of the SAMARITANS. A great part of Palestine—nearly the whole of the kingdom of Israel—now became a province of the Assyrian empire, and afterwards passed with it into the hands of the Babylonians. About a century and a half later, Nebuchadnezzar, king of Babylon, took Jerusalem, and led the other section of the Jewish nation captive. Thus all Palestine lost its nationality, and was ruled by a provincial satrap.

4. *From the Captivity to the Destruction of Jerusalem by Titus.*—This was the most eventful period of Jewish history, and the most remarkable for the changes which it brought about in the political geography of Palestine. The division of the land

into tribes was now completely broken up, and was never again established. Many of the ancient nations which the Israelites had driven from their borders wholly or partially, returned to their possessions. The Moabites reoccupied the Mishor immediately after the first captivity; and hence 'the burden of Moab,' written by Isaiah (xv., xvi.), and the terrible prophetic curse pronounced by Jeremiah (xlviii.), include that country which the Moabites originally possessed before the conquests of Sihon (Num. xxi. 26, 30), and which they reoccupied after the captivity of the tribes of Reuben and Gad, to whom Moses had allotted it. It appears also that the ancient tribes of Bashan regained their old territories, and re-established the old names—*Bashan*, *Argob*, *Haurân*, *Golan*—which were subsequently better known as the Greek provinces of *Batanea*, *Trachonitis*, *Auranitis*, and *Gaulonitis* (Porter's *Damascus*, vol. ii.) The Idumeans or Edomites having been driven out of their own mountain homes by the Nabatheans, established themselves along and within the borders of southern Palestine, to which they gave the name *Idumæa* [IDUMÆA]. The neighbouring nations and tribes also seem to have encroached upon the territories of the northern tribes of Israel; and a large Gentile element was then and afterwards introduced into Galilee, which produced important effects upon the subsequent history of the Jews in that province [GALILEE].

Under the mild rule of Cyrus the captive Jews were permitted to return to their own land. Ezra and Nehemiah re-established the ancient worship, and rebuilt the temple; but politically, the country remained a province of the Babylonian and Persian empires till the time of Alexander the Great, when it fell under Greek rule. On the death of Alexander the kingdom of the Seleucidæ was established in Syria, and that of the Ptolemies in Egypt. Palestine became at first a part of the former; but the rival dynasty soon attacked and captured it, and it remained for more than half a century, nominally at least, under the rule of the Egyptian monarchs. Then war broke out between Syria and Egypt, and the maritime plain of Palestine became the battle-field. Aided by the Seleucidæ, the Jews threw off the yoke of the Ptolemies (B.C. 198), and became subject to the former. During all these troubles the Jews had an ecclesiastical government of their own, the high-priest being chief. But when Antiochus Epiphanes ascended the throne of Syria, he captured Jerusalem, put thousands of the inhabitants to death, and attempted to abolish their worship. These acts of barbarity roused the spirit of the whole nation. The priestly family of the Maccabees headed a noble band of patriots, and after a long and heroic struggle succeeded in establishing the independence of their country [MACCABEES]. The Maccabees gradually extended their conquests over Samaria, Galilee, and a part of the country beyond Jordan. But internal dissensions and civil wars sprang up, and gave occasion for the interference of Rome; and Pompey invaded Palestine and captured Jerusalem in the year B.C. 63. A heavy tribute was levied, but the people were still permitted to retain their own rulers. In the year B.C. 39, Herod the Great received the title of 'King of Judæa' from the Roman emperor, and two years afterwards he succeeded in establishing himself on the throne [HERODIAN FAMILY].

At his death Herod bequeathed his kingdom to his three sons, Archelaus, Antipas, and Philip; but the supreme authority was in the hands of the Roman prefect and procurators. In the N. T., and in the writings of Greek and Roman geographers of that age, Palestine is usually spoken of as divided into a number of provinces. Those on the west of the Jordan were *Judæa* on the south, *Samaria* in the centre, and *Galilee* on the north, and the latter was subdivided into *Upper* and *Lower*. The provinces east of the Jordan were *Peræa*, embracing Gilead and the Mishor of Moab; and the four subdivisions of Bashan already mentioned—*Gaulonitis*, *Auranitis*, *Batanea*, and *Trachonitis*.

5. *From the Destruction of Jerusalem to the present time*.—On the establishment of Christianity in the Roman empire, a new ecclesiastical division of Palestine appears to have been made, into *Prima*, *Secunda*, and *Tertia*; but the boundaries are not defined, the lists of their cities are confused, and the territory embraced extended far beyond Palestine proper (See Reland, pp. 204-214).

After the Mohammedan conquest. Palestine became a province of the empire of Khalifs, and on the dismemberment of the empire this unhappy country was the theatre of fierce struggles between rival dynasties. About the middle of the 10th century the Fatimites seized it; and a century later it was overrun by the Seljukian Turks, whose cruelty to Christian pilgrims roused the nations of western Europe to the first *Crusade*. Jerusalem was taken by the Franks in the year 1099, and Palestine was made a Christian kingdom. But the rule of the Crusaders was brief. Defeated by Saladin, they took refuge in a few of their strongholds. At length, in the year 1291, Acre was stormed by the Mamluke Sultan of Egypt, and thus terminated the dominion of the Crusaders in Palestine.

For more than two centuries after this period Palestine was the theatre of fierce contests between the shepherd hordes of Tartary and the Mamlukes of Egypt. In 1517 it was conquered by Sultan Selim; and from that time till the present it has formed part of the Ottoman empire.

*Modern Divisions*.—Palestine now forms part of two great pashalics—(1.) *Sidon*, embracing the whole of western Palestine; and (2.) *Damascus*, embracing all east of the Jordan. That part of Palestine lying within the pashalic of Sidon is divided into the subpashalics of Jerusalem and Akka.\*

*Inhabitants*.—The modern inhabitants of Palestine are a mixed race, made up of the descendants of the ancient Syrians, and of the Arabs who came in with the armies of the Khalifs. The number of the latter being small, the mixture of blood did not visibly change the type. This is seen by a comparison of the Christians with the Mohammedans—the former are of pure Syrian descent, while the latter are more or less mixed; yet there is no visible distinction, save that which dress makes. In addition to these there are a few Jews, Armenians, and Turks; all of whom are easily recog-

nised as foreigners. The Druses who live in Haurân, and occupy a few villages in Galilee and on Carmel, are converts from Mohammedanism.

No census has been taken of the country, and the number of the inhabitants it is impossible to ascertain with any near approach to accuracy. One thing is manifest to every observer—the greater part of the country is desolate. Jerusalem, its largest city, has but 20,000 inhabitants; and the only other places of any note are Gaza, Joppa, Acre, and Nâbulus. Even villages are few, and separated by long reaches of desolate country. The following is the nearest approach which can now be made to the population of the country:—

Pashalic of Jerusalem (Ritter, <i>Pal. und Syr.</i> , iii. 833)	602,000
Pashalic of Acre (Robinson, iii. 628)	72,000
Remaining part of the pashalic of Sidon, in Palestine (estimate)	50,000
Eastern Palestine (estimate)	100,000
Total	824,000

Of these about 80,000 are Christians, 12,000 Jews, and the rest Mohammedans.

*AUTHORITIES*.—It is not necessary to give a list of all the books and treatises which have been written by geographers and travellers on Palestine. A select list has already been presented in the article GEOGRAPHY, to which the student is referred; and fuller catalogues may be seen in the works of Ritter, Robinson, and Van de Velde. It may be well, however, in an article like the present, to state the leading authorities from which the facts and descriptions it contains are derived, and also to direct the student to those works to which he may confidently turn for fuller details.

As to authorities, the writer thinks it proper to state that while he has read with care nearly all that has been written upon Palestine, he has depended mainly, in so far as regards the physical geography and topography of the country, on his own observations and researches, which were prosecuted during a period of nine years, and embraced the whole land with the exception of the region east of the Dead Sea.

The authorities on botany, zoology, and geology have already been given. The following works embody nearly all that is yet known of the geography:—

1. HADR. RELAND, *Palästina ex Monumentis Veteribus Illustrata*, 1714. This is still the best work on the ancient geography of Palestine. The author has collected with scrupulous accuracy everything important written upon the geography down to the close of the Crusades; and he has combined and classified his materials with great ability.

2. RITTER, *Palästina und Syrien*, embracing four volumes of his great *Erdkunde*, 1848-55. Ritter has to some extent followed the plan of Reland. He has collected with wonderful labour and patience nearly everything that has been written upon Palestine—in book, article, or missionary letter—down to his own time. The work is often confused, and the statements contradictory; and the learned writer, not having himself visited the country, cannot always separate fact from fancy in those he quotes.

3. BURCKHARDT, *Travels in Syria and the Holy Land*, 1822. Burckhardt was a careful observer, and he gives a simple honest account of

\* The official residence of the Pasha of Sidon is now in Beyrout, and hence his province is sometimes called the *Pashalic of Beyrout*. The pashas of Jerusalem and Akka are subject to the Pasha of Sidon, whose province extends from Latikea on the north to Gaza on the south.

what he saw. His travels are chiefly valuable for the information they give of Eastern Palestine.

4. ROBINSON, *Biblical Researches in Palestine in 1838 and 1852*, London 1856. This great work combines the vast learning of a laborious geographer, with the careful observation and research of a traveller. Dr. Robinson went to Palestine at two periods, thoroughly prepared for the work of exploration. He was accompanied on both occasions by Dr. Eli Smith, who had an extensive knowledge of the country, its language, and its people. The Biblical Researches only include Western Palestine, and do not even extend to all parts of it; but so far as they go they may be regarded as almost exhausting the physical and historical geography.

5. LYNCH, *Official Report of Expedition to the Dead Sea and the River Jordan*, 1852. This contains the fullest account yet published of the River Jordan and its valley, and of the Dead Sea.

6. STANLEY, *Sinai and Palestine in connection with their History*, 1856. This is deservedly one of the most popular works on Palestine. Its author is an accomplished scholar, and a graceful writer. He has more imagination than Robinson, and his pictures, though clear and beautiful, are frequently overdrawn. He labours too much after minute details; and in his attempts to make each picture perfect, he is sometimes obliged to peril, and even to sacrifice, strict truthfulness. His peculiar views on prophecy also occasionally manifest themselves, and do not accord well with his own observations. The chief value of the book consists in the skill and vividness with which many of the leading events of Bible history are grouped upon their old scenes.

7. DREW, *Scripture Lands in connection with their History*, 1862. Mr. Drew follows to some extent the plan of Dean Stanley, but his arrangement is chronological, and not topographical. The book displays much thought, and considerable knowledge of historical geography.

8. WILSON, *The Lands of the Bible Visited and Described*, 1847. Chiefly valuable for its extended notices of the people of Palestine.

9. PORTER, *Five Years in Damascus, with Travels and Researches in Palmyra, Lebanon, and the Haurân*, 1855. This work contains the fullest account yet published of the physical and historical geography and antiquities of the ancient kingdom of Bashan.

10. WETZSTEIN, *Reisebericht über Hauran und die Trachonen*, Berlin 1860. M. Wetzstein was Prussian Consul in Damascus, and had greater facilities than most of his predecessors for travelling in its environs. His statements and conclusions cannot always be relied upon. His work is accompanied by a large map, drawn by Kiepert, the principal part of which is taken from that of Mr. Porter; and some of the details which have been added require farther confirmation.

11. *Handbook for Syria and Palestine*, Murray, 1858. The design of this work is stated in the preface: 'Something more than a mere book of roads has been aimed at. . . . On the whole, this volume will perhaps be found to contain a more complete summary of the Scriptural and historical geography of Syria and Palestine than any other work in the language.'

12. VAN DE VELDE, *Memoir to accompany the Map of the Holy Land*, Gotha 1858. Valuable for its elevations, distances, observations for latitude and longitude, etc.

The works of Williams, Tobler, Barclay, Pierotti, and De Vogüé, treat of Jerusalem, and the minute topography of places round it.

MAPS.—Van de Velde's large map contains all Palestine, and is unquestionably the best hitherto published. The beautiful map now prepared for this work, though much smaller than Van de Velde's, embraces the chief results of the most recent researches both east and west of the Jordan, and contains some important corrections and additions. Many points in Palestine still require more minute adjustment, and many sections of the country, especially east of the Dead Sea and the lower Jordan, fuller research, before a perfectly accurate map can be constructed. The map now issued with this work may be regarded as containing, as far as is possible on such a scale, a full representation of our present knowledge of the geography of Palestine.—J. L. P.

PALM. [WEIGHTS AND MEASURES.]

PALMER-WORM. [GAZAM.]

PALM-TREE. [TAMAR.]

PALSY. [DISEASES.]

PALTITE (פַּלְתִּית; Κελωσί; Alex. Φελλωνεῖ; *Phalti*). In 2 Sam. xxiii., a list of David's warriors is given, and among them is *Helez the Paltite* (ver. 26). Pelet, Palti, and other forms of the same root, are common in Scripture as names of men (1 Chron. ii. 47; xii. 3; Num. xiii. 9; xxxiv. 26); and hence it might be supposed that Paltite is a patronymic; but the analogy of the context is against this. Paltite points to the native-place of Helez; he was from *Palet*; which might be identical with Beth-*Palet*, an ancient town in the south of Judah (Josh. xv. 27). But a difficulty arises from the parallel passages in 1 Chron. xi. 27 and xxvii. 10, both of which describe this man as '*Helez the Pelonite*' (פֶּלֹנִי, Φαλλωνεῖ); and besides, the Alex. text of the LXX. has Φελλωνεῖ in 2 Sam., instead of the Vat. Κελωσί, which is manifestly a corruption. From this it would seem that probably the two Hebrew letters נ and פ may have been, by an error of some early copyist, changed to the double-stroked letter ב. It is well to remember, however, that the Hebrew MSS. exhibit no variation; and Jerome's text must 'have been like our own, as he has *Phalti*.'—J. L. P.

PAMPHYLIA (Παμφυλία), a province of Asia Minor mentioned several times in the Acts of the Apostles. It lies upon the southern coast, and bends in the form of a crescent round a wide open bay, which was hence called *Pamphylus Sinus*; and as a portion of Cilicia bordered upon the same bay, it is correctly termed by Luke 'the sea which lies off Cilicia and Pamphylia' (τὸ πέραλος τὸ κατὰ τὴν Κιλικίαν καὶ Παμφυλίαν; Acts xxvii. 5). This bay, or sea, is now called Adalia, from a town of that name (anciently *Attaleia*). Round the head of the bay sweeps an undulating plain, shut in in the background by a semicircle of lofty mountains. Both on the west and east sides the mountains approach the shore, to which they break down in steep wooded slopes, and here and there in cliffs of remarkable wildness and grandeur (Fellows, *Asia Minor*, pp. 184, seq.) The plain is narrow—nowhere more than twenty miles broad; and its surface is furrowed by a series of alternate

low rocky ridges and broad picturesque valleys, down which wind rivers and torrents. This strip of plain constituted the ancient province or principality of Pamphylia. According to Strabo its western boundary was the fortress of *Olbia*, situated between the city of Phaselis (now *Tekirava*) and the river Catarrhactes (*Deden-su*), and its eastern boundary was Coracesium (now *Alara*), where it joined Cilicia. 'The whole of the voyage,' he adds, 'along the coast of Pamphylia, is 640 stadia' (xiv. 4, p. 667). Its total length was thus about eighty miles, and its breadth did not average more than fifteen. In later times, when Roman power prevailed in Asia Minor, the boundaries of Pamphylia were greatly extended, and included a large section of Pisidia on the north, and of Lycia on the west. At one period the proconsul of Pamphylia ruled all Lycia (Dio Cass. ix. 17). His province was 150 miles long by forty wide. The greater part of it was wild and mountainous, but intersected by beautiful vales. It presented a great variety of soil and climate, ranging from the perpetual snow region on the summits of Taurus, down to the orange-groves that to this day encircle the town of Adalia. The southern aspect and sheltered situation of the coast give it a temperature higher than that of most parts of Palestine. Luke, however, distinguishes Lycia from Pamphylia; for he states that when they passed the sea of Pamphylia they 'came to Myra, a city of Lycia' (Acts xxvii. 5). At the time of Paul's voyage Lycia appears to have formed part of proconsular Asia, to which the ship, on leaving Caesarea, directed its course (ver. 2; cf. Smith, *Voyage and Shipwreck of St. Paul*, p. 60. 2d ed.); but the arrangement of the proconsular divisions in Asia Minor was frequently altered.

Perga was one of the chief cities of Pamphylia, situated on the river Cestrus, about eight miles from the coast. It was the first place in Asia Minor which Paul visited in his earliest missionary journey. Luke tells us that they 'loosed from Paphos (in Cyprus) and came to Perga in Pamphylia.' They sailed up the wide bay, having in front and on each side some of the grandest scenery in the East. They entered the mouth of the Cestrus, and finally landed at Perga. There is no record of apostolic work or missionary success there; only one incident is mentioned, and it was a sad one, which led to estrangement and final separation between Paul and one of his dearest friends. John, for some reason, probably through timidity, left them and turned back (Acts xiii. 13); and on a future occasion, when projecting another mission tour, Barnabas wished to take John with him, but Paul would not again trust him, 'and the contention was so sharp between them, that they departed asunder one from the other' (xv. 36-39).

From Perga the apostles travelled to Antioch of Pisidia (xiii. 14). It was a wild mountain road, running over the snowy summits of the Taurus range. It was beset with dangers of many kinds—natural dangers in swollen torrents and storms; and 'perils of robbers,' for 'the lawless and marauding habits of the population of those mountains which separate the table-land in the interior of Asia Minor from the plains on the south coast, were notorious in all parts of ancient history' (Conybeare and Howson, *Life of St. Paul*, i. 175); and the Pisidians, through whose territory the apostles had to pass, were the worst of them

(Strabo, xii. 7; Xen. *Anab.* i. 1. 11; iii. 2. 14, etc.) The sight of the rugged mountains, and the stories of the bloodthirsty bandits that infested their fastnesses, which were no doubt freely spoken of in the streets of Perga, may have had much to do with John's desertion of his companions and his work (*Life of St. Paul*, i. c.)

After a successful journey through the interior, the apostles returned again by Pisidia into Pamphylia, apparently following the same route over the mountains from Antioch to Perga. Leaving the latter city, they descended (*κατέβησαν*) to Attaleia on the coast, and thence sailed for Syria (xiv. 24, 25).

Various accounts have been given of the origin of the Pamphylians. Some say they were a mixed race, composed of a number of amalgamated tribes, and hence their name Πάμφυλοι ('mingled tribes'). This appears to be the opinion of Herodotus (vii. 91) and Pausanias (vii. 3). Others maintain that they sprang from a Dorian chief called *Pamphylus* (Rawlinson's *Herod.* iii. 276, note); others from *Pamphyle*, the daughter of Rhacius (Steph. Byz., s. v.). The truth seems to be that there was an ancient tribe of this name, speaking a language of its own, and which in more recent times partly amalgamated with the Greeks who overran Asia Minor. It is this language to which Luke refers in Acts ii. 10. It was probably a barbarous *patois*, known only to the residents in the little province of Pamphylia (cf. Arrian, *Anab.* i. 26); and hence the astonishment of those who heard the apostles speak it.

The greater part of Pamphylia is now thinly populated, and its soil uncultivated. There are still a few little towns and villages near the coast, surrounded by fruitful fields and luxuriant orchards. Some of these occupy ancient sites, and contain the remains of former grandeur.—J. L. P.

PAN. Six Hebrew words are thus rendered in the A. V.

1. כִּיר or כִּיר, a basin of metal used for boiling or stewing (1 Sam. ii. 14; LXX. λέβητα τὸν μέγαν; Vulg. *lebetum*); also as a laver or basin for washing (Exod. xxx. 18; LXX. λουτήρα; Vulg. *labrum*; 1 Kings vii. 38, 40, 43; LXX. χυτροκαύλους; Alex. χυτρογαύλους; Vulg. *luteræ*); and for carrying fire (Zech. xii. 6; A. V. 'hearth'; LXX. δαλὸν πυρός; Vulg. *caminum ignis*).

2. מִבְּחַב (from חָבַת, obs., prob. to *cook*, comp.

Arab. خَبَز, *khabaza*, to *prepare food*), a shallow vessel used for baking cakes (Lev. ii. 5; vi. 14 [A. V. 21]; vii. 9; 1 Chron. xxiii. 29 ['flat plate,' marg. A. V.]; Ezek. iv. 3); LXX. τήγανον; Vulg. *sartago*.

3. מִשְׁחֶת, a flat vessel for baking cakes, probably like the girdle used for oat-cakes in Scotland (2 Sam. xiii. 9; LXX. τήγανον). Gesenius says the etymology is uncertain, but suggests that the word may be derived from a root שָׁהַ or שָׁהַ = Arab. شَرَى, to *shine*, and was applied to the pan because it was kept bright.

4. כִּיר, a deep vessel used for cooking food, properly a large pot or caldron. [CALDRON.]

5. פִּירֹר (LXX. ὑτρά; Vulg. *Olla*), a vessel used for baking the manna (Num. xi. 8), for hold-

ing soup (Judg. vi. 19), and for boiling flesh (1 Sam. ii. 14). Gesenius says it is for פֶּאֶרֶר, *heat*, from פֶּאֶר = Arab. نَار, *to boil, to be hot*; Fürst questions this, and derives it from פָּרַר, *to excavate, to deepen*.

6. צִלְחֹת. pl. of צִלְחָה, large dishes or platters (2 Chron. xxxv. 13; LXX. λέβησι). The cognate צִלְחָה denotes a dish which may be held in the hand and turned over for the purpose of wiping it (2 Kings xxi. 13); in Prov. xxvi. 13 it is used tropically of the bosom.

To these may be added מְרִחֶשֶׁת, from רָחַשׁ, *to boil up, or over*, rendered in the A. V. in both places where it occurs (Lev. ii. 7; vii. 9) *frying-pan*; LXX. ἐσχάρα; Vulg. *craticula*. In both passages it is distinguished from the מִחֶבֶת, but whether it is properly translated 'frying pan' may be doubted. Gesenius calls it a pot or kettle for boiling.—W. L. A.

PANNAG (פֶּנֶן) occurs only once in Scripture (Ezek. xxvii. 17), but so much uncertainty exists respecting the meaning of the word, that in many translations, as, for instance, in the Authorized English Version, the original is retained. From the context of the passage in which it occurs, it is evident that wheat, oil, and honey were conveyed by Judah and Israel—that is, the products of their country as an agricultural people—as articles of traffic, to the merchants and manufacturers of Tyre, who, it is certain, must, from their insular position, have obtained their chief articles of diet from the neighbouring land of Syria. It is probable, therefore, that *pannag* was the produce of Palestine, or at least of Syria. Some have considered *pannag* to indicate *balsam*, others *cassia*, and some again *sweetmeats*. 'Chaldeus *kolija* Græca voce, quam interpretatur Hesychius *παργύλια*, bellaria ex melle.' Some of the Rabbins have also thought that it was a district of Judæa, which, like Minnith, yielded the best wheat; others, as Junius and Tremellius, from the similarity in the name, have thought it might be the original of the name of Phœnicia. Hiller (*Hierophytica*, ii. p. 51) says: '*Pannag*, nisi magnopere fallor, est *Panax* vel *Panaces*, vox Græcæ vel Syriacæ originis ad Græcam etymologiam aptata, quo videatur ipso nomine omnium morborum remedia promittere.' The name *panax* occurs as early as the time of Theophrastus (ix. 10), and several kinds are described by him, as well as by Dioscorides; one kind is called especially Syrian *panax*. Of one of these plants, now supposed to be species of *Ferula laserpitium* or *Heracleum*, the juice was called *opopanax*. This was in great repute among the ancients, and still holds its place as a medicine, though not possessed of any remarkable properties; but its name is the origin of our *panacea*, from πανάκεια, 'an universal remedy.' It is curious, however, that the plant yielding the *opopanax* of commerce is still unknown, as well as the exact locality where it is produced, whether in Syria, or in some part of the Persian empire. By the Arabs it is called *juroasheer*. Lady Calcott has supposed the *panax* of the ancients to refer to *Panax quinquefolium*, or *ginseng* of the Chinese, which they also suppose to be a universal remedy, though not possessed of any active properties. But the name *panax* was not applied to this plant until the time of Linnæus,

and there is no proof, nor indeed is it probable, that it found its way from China at any such early period—at all events, the Israelites were not likely to convey it to Tyre. The Syrian version, however, translates *pannag* by the word *dokhon*, which, we have already seen [DOCHAN], signifies 'millet.' Newcome, therefore, translates *pannag* by the word *panis*, signifying the species of millet which was employed by the ancients as an article of diet, and which still is so by the natives of the East. Dr. Harris quotes Cæsar, as stating that the Massilienses, when besieged, 'panico vetere omnes alebantur.' From the context, it would seem most likely that this *pannag* was a produce of the country, and probably an article of diet. One objection to its being the millet is, that this grain has a name, *dochan*, which is used by the same prophet in Ezek. iv. 9. Notwithstanding the authority of Hiller, there does not appear sufficient proof in support of his opinion, that the juice of the *panax* or *opopanax* was the article intended, and therefore *pannag* must still be considered undetermined.—J. F. R.

#### PAPER. [WRITING.]

PAPHOS (Πάφος), a city of Cyprus, at the western extremity of the island, and the seat of the Roman governor. That officer, when Paul visited the place, was named Sergius Paulus, who was converted through the preaching of the apostle and the miracle performed on Elymas (Acts xiii. 6-11). Paphos was celebrated for a temple of Venus, whose infamous rites were still practised here 400 years afterwards, notwithstanding the success of Paul, Barnabas, and others, in preaching the gospel. Paphos is now a poor and inconsiderable place, but gives its name to a Greek bishopric.—J. K.

PAPPENHEIM, SALOMON b. SELIGMANN, a very eminent Hebraist, grammarian, lexicographer, and synonymist. He was born at Breslau in 1740, where his distinguished attainments and great piety secured for him the Rabbinate of the Jewish community, and where he died March 4, 1814. The work which has immortalised his name is a lexicon of the Hebrew synonyms of the Bible, entitled *The Curtains of Solomon* (וִירְעוֹת שְׁלֹמֹה), 3 vols. 4to. The first volume, which was published in Dyhernförth 1784, consists of an introduction (הקדמה) and three parts or sections (חברות), subdivided into forty-nine paragraphs (וִירְעוֹת). The introduction (i.-xi.) contains a grammatical dissertation (תוספת אותיות) (האמנותיו ובסבתו וא"י המהפכת חברה), pp. 1-33) consisting of seven paragraphs (וִירְעוֹת), treats on those words which denote *time*, or on such substantives, adjectives, and verbs as express the idea of *beginning*, *end*, *hurry*, *tarrying*, *youth*, *age*; the second part (חברה), pp. 33-66, consisting of eleven paragraphs (וִירְעוֹת), treats on those words which denote *space*, or on expressions conveying the idea of *place*, *even*, *straight*, *uneven*, *crooked*, *way*, *neighbourhood*, etc.; etc.; whilst the third part (pp. 66-118), consisting of thirty-one paragraphs, embraces words which convey the idea of *motion* in its various modifications, ex. gr., *going*, *flying*, *springing*, *flowing*, etc., etc. The second volume, which was published in Redelheim 1831, after the death of the author, with notes by the celebrated Wolf Heidenheim [HEIDENHEIM], consists of an introduction (הקדמה) and four parts (חברות), subdivided

vided into twenty-six paragraphs (יריעות). The introduction (pp. 1-8) contains a psychological treatise (על אופן התקשרות הנפש עם הגוף); the first part (pp. 9-39), consisting of fourteen sections, treats on words which express the idea of *speaking*, or *utterance*, in its various modifications; the second part (pp. 39, 40) discusses words which denote *hearing*; the third part (pp. 40-57), consisting of twelve sections, treats on words which refer to *sight*; whilst the fourth part (pp. 57-75), consisting of twenty-three sections, treats on words which relate to the *touch* and *smell*. The third volume, which was published in Dyhrenföth 1811, consists of a general introduction (הקדמה) and one part (הברה), subdivided into fifty-seven sections (יריעות), and treats on שמות נרדפים המתייחסות

(אל המלאכה) those synonyms which convey the idea of *action*. The importance of this work can hardly be overrated. It is the only lexicon which embraces the synonyms of the whole Biblical Hebrew, as the contributions of Wessely, Luzzato, and others to this department are confined to single groups of words. Pappenheim's marvellous mastery of the Hebrew style, his keen perception, refined taste, critical acumen, and his philosophical mind, pre-eminently fitted him for this task. He has also written a lexicon, or treatise, embracing those words and particles which are formed from the letters

ההסג, entitled הישג שלמה, *The Delight of Solomon*, of which, however, only one part appeared, Breslau 1802; and he has left in MS. *A Critico-etymological and Synonymical Hebrew Lexicon*, which has not as yet been published (comp. Geiger, in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvii., Leipzig 1863, p. 325, ff.; Fürst, *Bibliotheca Judaica*, iii. 64, etc.—C. D. G.

#### PAPYRUS. [GOME.]

PARABLE. The word parable is derived from παραβολή, which comes from παραβάλλειν, to *compare*, to *collate*. In the N. T. it is employed by our translators as the rendering of παραβολή; in the Old it answers to מִשְׁלָּה, *proverb*. 1. It denotes an obscure or enigmatical saying, *ex. gr.*, Ps. xlix. 4,

‘I will incline mine ear to a *parable*;

I will open my *dark saying* upon the harp.’

And Ps. lxxviii. 2,

‘I will open my mouth in a *parable*;

I will utter *dark sayings* of old.’

2. It denotes a fictitious narrative, invented for the purpose of conveying truth in a less offensive or more engaging form than that of direct assertion. Of this sort is the parable by which Nathan reproved David (2 Sam. xii. 2, 3), that in which Jotham exposed the folly of the Shechemites (Judg. ix. 7-15), and that addressed by Jehoash to Amaziah (2 Kings xiv. 9, 10). To this class also belong the parables of Christ. 3. Any discourse expressed in figurative, poetical, or highly ornamented diction is called a *parable*. Thus it is said, ‘Balaam took up his *parable*’ (Num. xxiii. 7); and, ‘Job continued his *parable*’ (Job xxvii. 1). Under this general and wider signification the two former classes may not improperly be included.

In the N. T. the word seems to have a more restricted signification, being generally employed

in the second sense mentioned above, viz., to denote a fictitious narrative, under which is veiled some important truth. It has been supposed, indeed, that some of the parables uttered by our Saviour narrate real and not fictitious events; but whether this was the case or not is a point of no consequence. Each of his parables was *essentially* true; it was true to human nature, and nothing more was necessary. Another meaning which the word occasionally bears in the N. T. is that of a *type* or *emblem*, as in Heb. ix. 9, where παραβολή is rendered in our version *figure*. According to Macknight, the word in Heb. xi. 19 has the same meaning, but this is probably incorrect.

Parables or fables are found in the literature of all nations. They were called by the Greeks αἶνοι, and by the Romans *fabulae*. It has been usual to consider the parable as composed of two parts: viz., the *protasis*, conveying merely the *literal sense*; and the *apodosis*, containing the *mystical* or *figurative* sense. It is not necessary, however, that this second part should be always expressed. It is frequently omitted in the parables of our Lord, when the truth illustrated was such as his disciples were unable at the time fully to comprehend, or when it was his design to reveal to them something which was to be hidden from the unbelieving Jews (comp. Matt. xiii. 11-13).

The excellence of a parable depends on the propriety and force of the comparison on which it is founded; on the general fitness and harmony of its parts; on the obviousness of its main scope or design; on the beauty and conciseness of the style in which it is expressed; and on its adaptation to the circumstances and capacities of the hearers. If the illustration is drawn from an object obscure or little known, it will throw no light on the point to be illustrated. If the resemblance is forced and inobvious, the mind is perplexed and disappointed in seeking for it. We must be careful, however, not to insist on too minute a correspondence of the objects compared. It is not to be expected that the resemblance will hold good in every particular; *non enim res tota rei toti necesse est similis sit*, says Cicero; but it is sufficient if the agreement exists in those points on which the main scope of the parable depends.

The parable of the *Ten Virgins*, for example, is designed to teach the importance and necessity of being always prepared for the coming of the Lord; and therefore no inference can be drawn as to the number of those finally saved, from the circumstance that five of the virgins were wise and five of them were foolish. Nor does the parable of the *Householder* teach that there will be no difference in the rewards of the righteous hereafter, because each of the labourers received a penny. The design of the parable as expressed in the words ‘Is it not lawful for me to do what I will with mine own?’ is to set forth the perfect *sovereignty* of God in the dispensation of his rewards, the truth that all reward is of *grace*, and that it is consistent with the strictest justice for him to treat some *better* than they deserve, since none are treated *worse*.

If we test the parables of the O. T. by the rules above laid down, we shall not find them wanting in any excellence belonging to this species of composition. What can be more forcible, more persuasive, and more beautiful than the parables of

Jotham (Judg. ix. 7-15), of Nathan (2 Sam. xii. 1-14), of Isaiah (v. 1-5), and of Ezekiel (xix. 1-9)?

But the parables uttered by our Saviour claim pre-eminence over all others on account of their number, variety, appositeness, and beauty. Indeed it is impossible to conceive of a mode of instruction better fitted to engage the attention, interest the feelings, and impress the conscience, than that which our Lord adopted. Among its advantages may be mentioned the following:—1. It secured the attention of multitudes who would not have listened to truth conveyed in the form of abstract propositions. It did so in virtue of two principles of human nature, viz., that outward and sensible objects make a more vivid impression than inward notions or ideas; and that the particular and the concrete affect the mind more than the general and the abstract. Thus a virtue or vice may be held up for abhorrence or admiration far more successfully by exhibiting its effects on the character of an individual than by eulogizing or declaiming against it in the abstract. How could a disquisition have exhibited the contrast between humility and self-confidence so vividly as does the parable of the Pharisee and the publican? Or how could so effectual a sermon have been preached against worldliness as by the parable of the rich man who said to his soul, 'Eat, drink, and be merry?'

2. This mode of teaching was one with which the Jews were familiar, and for which they entertained a preference. They had been accustomed to it in the writings of their prophets, and, like other eastern nations, listened with pleasure to truths thus wrapped in the veil of allegory.

3. Some truths which, if openly stated, would have been opposed by a barrier of prejudice, were in this way insinuated, as it were, into men's minds, and secured their assent unawares. Whenever ancient prejudices stand in the way of the reception of truth, it is important that the teacher should adopt such a circuitous mode of approach as may for a time conceal his design, and secure for his instructions an impartial hearing.

4. The parabolic style was well adapted to conceal Christ's meaning from those who, through obstinacy and perverseness, were indisposed to receive it. This is the meaning of Isaiah in the passage quoted in Matt. xiii. 13. Not that the truth was ever hidden from those who sincerely sought to know it; but it was wrapt in just enough of obscurity to veil it from those who 'had pleasure in unrighteousness,' and who would 'not come to the light lest their deeds should be reproved.' In accordance with strict justice, such were 'given up to strong delusions, that they might believe a lie.' 'With the upright man thou wilt show thyself upright; with the froward thou wilt show thyself froward.'

The scope or design of Christ's parables is sometimes to be gathered from his own express declaration, as in Luke xii. 16-20; xiv. 11; xvi. 9. In other cases it must be sought by considering the context, the circumstances in which it was spoken, and the features of the narrative itself, i. e., the literal sense. For the right understanding of this, an acquaintance with the customs of the people, with the productions of their country, and with the events of their history, is often desirable. Most of our Lord's parables, however, admit of no doubt as to their main scope, and are so simple and perspicuous that 'he who runs may read,' 'if there

be first a willing mind.' To those more difficult of comprehension more thought and study should be given, agreeably to the admonition prefixed to some of them by our Lord himself, 'Whoso heareth, let him understand.'—The following are among the principal works on the parables:—Gray, *Delineation of the Parables*, 1777; Bulkley, *Discourses on the Parables*, 1771; Collyer, *Discourses on the Parables*, 1815; Kromm, *Homilien über die Parabeln Jesu*, 1823; Unger, *De Parabolis Jesu*, 1828; Bailey, *Exposition of the Parables*, 1829; Schultze, *De Parabolis Jesu Christi*, 1827; Lisco, *Die Parabeln Jesu*, translated in the *Edinburgh Biblical Cabinet*, 1832; Trench, *on the Parables*; Steir, *Words of the Lord Jesus*, 1855.

PARACLETUS (Παρακλητος). This word is applied to Christ in 1 John ii. 1. Indeed, in that famous passage in which Christ promises the Holy Spirit as a paraclete to his sorrowing disciples, he takes the title himself: 'I will send you another paraclete' (John xiv. 16), implying that he was himself one, and that on his departure he would send another. The question then is, In what sense does Christ denominate himself and the Spirit sent from him and the Father, παρακλητος, paraclete? The answer to this is not to be found without some difficulty, and it becomes the more difficult from the fact that in genuine Greek the verb παρακαλεῖν has a variety of significations:—1. To call to a place; to call to aid. 2. To admonish; to persuade; to incite. 3. To entreat; to pray. To which may be added the Hellenistic signification, 'to console,' 'to soothe,' 'to encourage.' Finally, the Rabbins also in their language use the word

פֶּרַקְלִיטָא, *peraklita*; a circumstance which must also be taken into consideration. In the explanation of the word the leading circumstance to guide us must be to take that signification which is applicable to the different passages in which it occurs. For we may distinguish three explanations:—1. Origen explains it where it is applied to the Holy Spirit by 'Consolator' (παραμυθητής), while in 1 John ii. 1 he adopts the signification of 'Deprecator.' This is the course taken by most of the Greek commentators (Suicer, *Thesaur.*, s. v.), and which has been followed by Erasmus, Luther, and others. But to this Tholuck and others object that, not to insist that the signification cannot be grammatically established (for no *admissible* instance can be adduced where the passive παρακλητος is used in an active sense for παρακλητωρ), it is suitable to but a very few passages only, while to others it is either too circumscribed or altogether inappropriate. 2. Aware of this, others, after the example of Theodore of Mopsuestia, sanctioned by Mede, Ernesti, and others, would translate it *teacher*. But neither does this sense seem adapted to all the passages. It would also be difficult to deduce it from the usages of the language; for—not to mention that in this case also the active signification would be assumed for the passive form—we are pressed with the question, whether the verb παρακαλεῖν can anywhere in the N. T. be found in the sense of 'to teach,' as this hypothesis assumes. It is at least very certain that this sense never was transferred to the Rabbinical פֶּרַקְלִיטָא; and since the word occurs here also, this must necessarily be taken into account in determining the signification. 3. The considerations which tell against these views in-

cline the balance in favour of a third sense, which is that of 'assistant,' 'helper,' 'advocate' (intercessor). Demosthenes uses it with this force in a judicial sense (see Index, ed. Reiske); and it occurs in the same sense in Philo (see Loesner, *Observatt.*), and in the Rabbinical dialect. It is supported by Rom. viii. 26, and, which is still more to the purpose, is appropriate to all the passages in the N. T. where the word occurs. After the example of the early Latin fathers, Calvin, Beza, Lampe, Bengel, Knapp, Kuinoel, Tittmann, and many others, have adopted this sense. Tertullian and Augustine have *advocate*. The A. V. renders the word by 'advocate' in 1 John ii. 1, but in other places (John xiv. 16, 26; xv. 26; xvi. 7) by 'comforter.' How much better, however, the more extensive term 'helper' (including teacher, monitor, advocate) agrees with these passages than the narrow term 'comforter,' may be shown by a single instance. Jesus says to his disciples, 'I will send you another paraclete' (John xiv. 16), implying that he himself had been such to them. But he had not been in any distinguishing sense a 'comforter' or 'consoler,' because, having Him present with them, they had not mourned (Matt. ix. 15). But he had been eminently a helper, in the extensive sense which has been indicated; and such as he had been to them—to teach, to guide, and to uphold—the Holy Spirit would become to them after his removal (see the Commentators above named, particularly Tholuck and Tittmann on John xiv. 16; also Knapp, *De Sp. S. et Christi Paracletis*, Halle 1790).—J. K.

PARADISE, the term which by long and extensive use has been employed to designate the GARDEN of Eden, the first dwelling-place of human beings. Of this word (*παράδεισος*), the earliest instance that we have is in the *Cyropædia* and other writings of Xenophon, nearly 400 years B.C.; but his use of it has that appearance of ease and familiarity which leads us to suppose that it was current among his countrymen. We find it also used by Plutarch, who lived in the 1st and 2d century of our era. It was by those authors evidently employed to signify an extensive plot of ground, enclosed with a strong fence or wall, abounding in trees, shrubs, plants, and garden culture, and in which choice animals were kept in different ways of restraint or freedom, according as they were ferocious or peaceable; thus answering very closely to our English word *park*, with the addition of *gardens*, a *menagerie*, and an *aviary*.

The circumstance which has given to this term its extensive and popular use, is its having been taken by the Greek translators of the Pentateuch, in the 3d century B.C., and following them, in the ancient Syriac version, and by Jerome in the Latin Vulgate, as the translation of the *garden* (*גן* *gan*) which the benignant providence of the Creator prepared for the abode of innocent and happy man. Those translators also use it, not only in the twelve places of Gen. ii. and iii., but in eight others, and two in which the feminine form (*gannah*) occurs; whereas, in other instances of those two words they employ *κήπος*, the usual Greek word for a garden or an enclosure of fruit-trees. But there are three places in which the Hebrew text itself has the very word, giving it the form פֶּרְדֵּס *pardees*. These are, 'the keeper of

the king's forest, that he may give me timber' (Neh. ii. 8); 'orchards' (Eccles. ii. 5); 'an orchard of pomegranates' (Song of Solomon, iv. 13). Evidently the word is not proper Hebrew, but is an exotic, imported from a more eastern tongue, probably the Persian, from which source also Xenophon derived it. But the best authorities carry the derivation farther back. 'The word is regarded by most learned men as Persian, of the same signification as the Hebrew *gan*. Certainly it was used by the Persians in this sense, corresponding to their *darchen*; but that it is an Armenian word is shown both from its constant use in that language, and from its formation, it being compounded of two Armenian simple words, *part* and *ses*, meaning *necessary grains* or *edible herbs*. The Armenians apply this word, *pardees*, to denote a garden adjoining to the dwelling, and replenished with the different sorts of grain, herbs, and flowers for use and ornament' (Schröderi *Thesaur. Ling. Armen. Dissert.*, p. 56, Amst. 1711). With this E. F. C. Rosenmüller accords (*Bibl. Alterthumsk.*, vol. i., part i., p. 174). 'It corresponds to the Greek *παράδεισος*, a word appropriated to the pleasure-gardens and parks with wild animals around the palace of the Persian monarchs. The origin of the word, however, is to be sought with neither the Greeks nor the Hebrews, but in the languages of Eastern Asia. We find it in Sanscrit *paradeesha*, a region of surpassing beauty; and the Armenian *pardees*, a park or garden adjoining to the house, planted with trees for use and ornament' (Gesenius and Robinson, combining the Leipzig and the American editions of the *Hebr. Lex.*) 'A *paradise*, i.e., an orchard, an arboretum, particularly of pomegranates, a park, a fruit-garden; a name common to several Oriental languages, and especially current among the Persians, as we learn from Xenophon and Julius Pollux. Sanscrit, *paradeesha*; Armenian, *pardez*; Arabic, *firdaus*; Syriac, *fardaiso*; Chaldee of the Targums, *pardeesa*' (Furst, *Concord. V. T.*, p. 920, Leipzig 1840).

In the apocryphal book of Susanna (a moral tale or little novel, possibly founded on some genuine tradition), the word *paradise* is constantly used for the garden. It occurs also in three passages of the Son of Sirach, the first of which is in the description of Wisdom: 'I came forth as a canal dug from a river, and as a waterpipe into a *paradise*' (ch. xxiv. 30). In the other two it is the objective term of comparisons: 'kindness is as a *paradise* in blessings, and mercifulness abideth for ever—the fear of the Lord is as a *paradise* of blessing, and it adorns above all pomp' (ch. xl. 17, 27). Josephus calls the gardens of Solomon, in the plural number, 'paradises' (*Antiq.* viii. 7. 3). Berosus (cent. iv. B.C.), quoted by Josephus (*c. Apion.* i. 20), says that the lofty garden-platforms, erected at Babylon by Nebuchadnezzar, were called the *Suspended Paradise*.

The term, having thus become a metaphor for the abstract idea of exquisite delight, was transferred still higher to denote the happiness of the righteous in the future state. The origin of this application must be assigned to the Jews of the middle period between the O. and the N. T. In the Chaldee Targums, 'the garden of Eden' is put as the exposition of heavenly blessedness (Ps. xc. 17, and other places). The Talmudical writings, cited by the elder Buxtorf (*Lex. Chald. et Talm.*,

p. 1802), and John James Wetstein (*N. T. Gr.*, vol. i. p. 819), contain frequent references to *Paradise* as the immortal heaven, to which the spirits of the just are admitted immediately upon the liberation from the body. The book *Sohar* speaks of an earthly and a heavenly *Paradise*, of which the latter excels the former 'as much as darkness does light' (Schöetgen. *Hor. Hebr.*, vol. i., p. 1096).

Hence we see that it was in the acceptance of the current Jewish phraseology that the expression was used by our Lord and the apostles: 'To-day thou shalt be with me in Paradise;' 'He was caught up into Paradise;' 'The tree of life, which is in the Paradise of my God' (Luke xxiii. 43; 2 Cor. xii. 4; Rev. ii. 7).

EDEN is the most ancient and venerable name in geography, the name of the first district of the earth's surface of which human beings could have any knowledge. The word is found in the Arabic as well as in the Hebrew language. It is explained by Firuzabadi, in his celebrated Arabic Lexicon (*Kamûls*), as signifying *delight, tenderness, loveliness* (see Morren, in *Edinb. Biblical Cabinet*, vol. xi., pp. 2, 48, 49). Major Wilford and Professor Wilson find its elements in the Sanscrit. The Greek ἡδονή is next to identical with it in both sound and sense. It occurs in three places (Is. xxxvii. 12; Ezek. xxvii. 23; Amos i. 5) as the name of some eminently pleasant districts, but not the Eden of this article. Of them we have no certain knowledge, except that the latter instance points to the neighbourhood of Damascus. In these cases it is pointed with both syllables short; but, when it is applied to the primitive seat of man, the first syllable is long. Those passages, in addition to Gen. ii., iii., iv. 16, are the few following, of which we transcribe the chief, because they cast light upon the primeval term: 'He will make her wilderness like Eden, and her desert like the garden of Jehovah.' 'Thou hast been in Eden, the garden of God.' 'All the trees of Eden, that were in the garden of God, envied him.' 'This land which was desolate is become like the garden of Eden' (Is. li. 3; Ezek. xxviii. 13; xxxi. 9, 16, 18; xxxv. 35; Joel ii. 3).

All this evidence goes to show that *Eden* was a tract of country; and that in the most eligible part of it was the *Paradise*, the garden of all delights, in which the Creator was pleased to place his new and pre-eminent creature, with the inferior beings for his sustenance and solace.

We now present the passage from the Hebrew Archives to which this disquisition belongs—

Genesis ii. 8—'And Jehovah Elohim planted a garden in Eden, on the east; and placed there the man whom he had formed. And Jehovah Elohim caused to grow out of the ground there every tree agreeable to the sight, and good for eating; and the tree of life in the midst of the garden, and the tree of the knowledge of good and evil. And a river proceeded from Eden, for the watering of the garden; and from thence it was divided, and became into four heads. The name of the first, Pishon; it surroundeth the whole country of Havilah, where is the gold, and gold of that land is good; there is the *bedolach* and the stone *shoham*. And the name of the second river, Gihon; it surroundeth the whole country of Cush. And the name of the third river, Hiddekel; it is that which goeth easterly to Assyria. And the fourth river, it is the Phrat.'

Upon this description, we shall offer our sentiments in the shortest manner that we can.

I. It is given in that simple, artless, childlike style which characterises the whole of the primeval Hebrew Scriptures. This is the style which was alone adapted to the early stages of the human history. Our whole race had to pass through a long succession of trying and training circumstances, which formed truly the collective education of mankind. The communications of knowledge must have been made and recorded in such terms and phrases as the men of the age could at the first *understand*; and which yet should possess a suggestive and attractive character, which would gradually capacitate for higher and more spiritual disclosures. (See the observations on the modes of divine manifestation to the first human beings, in the article ADAM, vol. i. p. 60.) If it were objected, that thus 'the revelation would be clothed in the imagery of gross and sensible objects, with the imperfections and misconceptions under which those objects appeared to men possessing only the rude ideas of a primeval state of society,' and this would of necessity produce a rude and imperfect language [ANTHROPOMORPHISM], we reply, that the spirit of the objection would require 'that the terms and style of the revelation should have been in the most pure and abstract kind of phrase that human diction could afford, the most nearly approaching to the spirituality of the divine nature and the majesty of eternal things; and this would be equivalent to saying that it ought to have anticipated by many centuries the progress of man as an intellectual and social being; that it ought to have been written, not in the language of shepherds and herdsmen, but in that of moral philosophers and rhetoricians; not in Hebrew, but in Greek or English. It would also follow, that a revelation so expressed would have been *unintelligible* to the ages and generations of primitive time, and to the generality of mankind in all times' (Pye Smith, *On Scripture and Geology*, p. 242).

Upon this principle we understand the expression, 'the Lord God *planted*,' *caused to grow, placed*; he, the supreme and omnipotent cause, produced those effects, in ways, immediate or mediate, the most worthy of his perfections.

II. The *situation* of Eden: though מִקְרֵם is literally *from the east*, it answers to our phrase *on the east or eastwards*, precisely as the Latin *ab occasu*. The supposed station-point we cannot suppose to be any other than Palestine. In every country, the region of the rising sun must always be pre-eminent, on account of the beauty and majesty of the sky; and hence it is a natural representative of excellence; and this most interesting of regions, the birth-place of mankind, did lie eastward from the land of the Israelites. Also, the earliest traditions of human and divine knowledge were associated with the splendours of the east.

Upon the question of its exact geographical position dissertations innumerable have been written. Many authors have given descriptive lists of them, with arguments for and against each. The most convenient presentation of their respective outlines has been reduced to a tabulated form, with ample illustrations, by the Rev. N. Morren, annexed to his Translation of the younger Rosenmüller's *Biblical Geography of Central Asia*, pp. 91-98, Edin. 1836. He reduces them to nine principal theories. But the fact is that not one of them answers to all

the conditions of the problem. We more than doubt the possibility of finding any locality that will do so. That *Phrat* is the Euphrates, and *Hiddekel* the Tigris, is agreed, with scarcely an exception; but in determining the two other rivers, great diversity of opinion exists; and, to our apprehension, satisfaction is and must remain unattainable, from the impossibility of making the evidence to cohere in all its parts. It has been remarked that this difficulty might have been expected, and is obviously probable, from the geological changes that may have taken place, and especially in connection with the deluge. This remark would not be applicable, to the extent that is necessary for the argument, except upon the supposition beforementioned, that the earlier parts of the book of Genesis consist of primeval documents, even antediluvian, and that this is one of them. There is reason to think that *since the deluge* the face of the country cannot have undergone any change approaching to what the hypothesis of a postdiluvian composition would require. But we think it highly probable that the principal of the immediate causes of the deluge, the 'breaking up of the fountains of the great deep,' was a subsidence of a large part or parts of the land between the inhabited tract (which we humbly venture to place in E. long. from Greenwich, 30° to 90°, and N. lat. 25° to 40°) and the sea which lay to the south; or an elevation of the bed of that sea [DELUGE]. Either of these occurrences, produced by volcanic causes, or both of them conjointly or successively, would be adequate to the production of the awful deluge, and the return of the waters would be effected by an elevation of some part of the district which had been submerged; and that part could scarcely fail to be charged with animal remains. Now the recent geological researches of Dr. Falconer and Capt. Cautley have brought to light bones, more or less mineralized, of the giraffe (*camelopardalis*), in the Sewalik range of hills, which seems to be a branch of the Himalaya, westward of the river Jumna. But the giraffe is not an animal that can live in a mountainous region, or even on the skirts of such a region; its subsistence and its safety require 'an open country and broad plains to roam over' (Falconer and Cautley, in *Proceed. Geol. Soc.*, Nov. 15, 1843). The present position, therefore, of these fossil remains ('of almost every large pachydermatous genus, such as the elephant, mastodon, rhinoceros, hippopotamus, sus (swine), horse, etc.' *ib.*, also deer and oxen)—lodged in ravines and vales among the peaks, at vast elevations—leads to the supposition of a late elevation of extensive plains.

Thus we seem to have a middle course pointed out between the two extremes; the one, that by the deluge the ocean and the land were made to exchange places for permanency; the other, that very little alteration was produced in the configuration of the earth's surface. Indeed, such alteration might not be considerable in places very distant from the focus of elevation; but near that central district it could not but be very great. An alteration of level, five hundred times less than that effected by the upthrow of the Himalayas, would change the beds of many rivers, and quite obliterate others.

We therefore decline to enter into disquisitions, interminable and surely disappointing, upon the rivers Pishon and Gihon, and the countries of

Havilah and Cush. Etymological similarities afford no safe ground for conclusions; for many names of close resemblance are to be found in the Asiatic languages, but of which the natural history and collateral circumstances are incompatible with other parts of this (as we think) antediluvian fragment of topography. Also Gihon certainly, and probably Pishon, were used in the ancient Oriental languages as appellatives, separate or prefixed, signifying a stream in general; as the old British *Avon*, which has the same meaning, has become the proper name of several rivers in England, Wales, and Scotland.

III. We venture to give a summary of this description. It was a tract of country, the finest imaginable, lying probably between the 33d and the 37th degree of N. latitude, of such moderate elevation, and so adjusted, with respect to mountain-ranges and watersheds and forests, as to preserve the most agreeable and salubrious conditions of temperature and all atmospheric changes. Its surface must therefore have been constantly diversified by hill and plain. From its hill-sides, between the croppings out of their strata, springs trickled out, whose streamlets, joining in their courses, formed at the bottom small rivers, which again receiving other streams (which had in the same way flowed down from the higher grounds), became, in the bottom of every valley, a more considerable river. These valleys insolated, as must consequently their contained streams; wider valleys or larger plains appeared; the river of each united itself with that of its next neighbour; others contributed their waters as the augmenting stream proceeded; and finally it quitted the land of Eden, to continue its course to some sea, or to lose its waters by the evaporation of the atmosphere or the absorption of the sandy desert. In the finest part of this land of Eden, the Creator had formed an enclosure, probably by rocks and forests and rivers, and had filled it with every product of nature conducive to use and happiness. Due moisture, of both the ground and the air, was preserved by the streamlets from the nearest hills, and the rivulets from the more distant; and such streamlets and rivulets, collected according to the levels of the surrounding country ('it proceeded from Eden'), flowed off afterwards in four larger streams, each of which thus became the source of a great river.

This metaphor deviates from what is commonly thought to be the meaning of the original, but not, we think, from its true signification and intention.

1. It is a metonymy occurring probably, though not very frequently, in all languages, that a collective noun is sometimes used when the idea is compound and distributive. The usage is recognised in the Hebrew language, by Gesenius in his *Lehrgebäude*, p. 525; Ewald, *Gramm.*, sec. 346; and Nordheimer, *Gramm.*, sec. 738-750. This kind of synthesis would be likely to find place in a primitive and consequently very simple language. The multitude of droppings and tricklings, rills and streamlets, having one beneficial design, and ever tending to confluence, would, in the mind of a primeval writer, readily coalesce into a singular term, a river. We have an appropriate example in Ps. lxx. 10, where the aggregate of showers is called 'the river of God, full of water.' The

principle applies equally to נהר פלנ. It is therefore no unwarrantable liberty to understand

by the 'river,' a number of rills and rivulets dispersed throughout the ground, and flowing into one channel about the issue into the external country. If the water entered the garden as a river properly—that is, in one body—it could not 'water the garden' without artificial appliances; and it would have divided the garden, making one part inaccessible from the other, without a boat or a bridge.

2. That a river should be 'divided into four heads,' or sources of new rivers, is naturally impossible. If to a running stream, small or large, two or more channels be presented, it will not divide itself distributively, but will pour its whole mass of water into the deepest channel: it will ever seek the lowest bottom. We must therefore understand the passage as saying that, from four different collections of rills, which had flowed down different declivities in the same neighbourhood, the sources were formed of four rivers, which in their progress became great and celebrated. To controvert this reasoning it would not be sufficient to adduce the division of a great river into branches as it approaches the sea, and meets an extensive swamp or flat shore, as in the deltas of the Rhine (forming, with many inferior streams, the Leck and the Waal), the Po, the Nile, the Ganges, and many others. The soft and almost horizontal level causes the water to cease flowing, or nearly so, and the vast extent of mud or sand permits branches of the stream to take place when some small change of the surface gives occasion. But the rivers of Paradise must have been in high ground, and have had a considerable fall. It is possible, indeed, that rocky obstacles might exist, connected backwards with a mountainous country, presenting their heads against the stream, and thus separating it, as islets are formed in the higher course of the Rhine. But the conditions necessary to derive four great rivers out of one, in this way, are scarcely conceivable as occurring in one place. The origin of two or more rivers from different fountains in the same locality of high ground, but on different levels, and then pursuing different courses, is not an unexampled phenomenon. The Rhine and the Rhone rise but about eight English miles from each other; and, which applies to the case directly before us, the sources of the *Euphrates* and the *Tigris*, on the eastern frontier of Armenia, so far as they can be followed up, are only fifteen miles apart.

Here, then, in the south of Armenia, after the explication we have given, it may seem the most suitable to look for the object of our exploration, the site of PARADISE. From this opinion few, we think, will dissent.

But the stringent difficulty is to find any two rivers that will reasonably answer to the predicates of the Pishon and the Gihon; and any countries which can be collocated as Havilah and Cush. The latter name, indeed, was given by the Hebrews and other Orientals to several extensive countries, and those very distant both from Armenia and from each other. As for Havilah, we have the name again in the account of the dispersion of the descendants of Noah (ch. x. 29), but whether that was the same as this Havilah, and in what part of Asia it was, we despair of ascertaining. Reland and others, the best writers upon this question, have felt themselves compelled to give to these names a comprehension which destroys all preciseness. So, likewise, the meaning of the two names of natural products can be little more than matter

of conjecture; the *bedolach* and the stone *shoham*. The former word occurs only here and in Num. xi. 7. The Septuagint, our oldest and best authority with regard to terms of natural history, renders it, in our passage, by *anthrax*, meaning probably the ruby, or possibly the topaz; and in Numbers by *crystallos*, which the Greeks applied not merely to rock-crystal, but to any finely transparent mineral. Any of the several kinds of odoriferous gum, which many ancient and modern authorities have maintained, is not likely; for it could not be in value comparable to gold. The pearl is possible, but not quite probable; for it is an animal product, and the connection seems rather to confine us to minerals; and pearls, though translucent, are not transparent as good crystal is. Would not the diamond be an admissible conjecture? The *shoham* occurs in ten other places, chiefly in the book of Exodus, and in all those instances our version says onyx; but the Septuagint varies, taking onyx, sardius, sardonyx, beryl, prase-stone, sapphire, and smaragdus, which is a green-tinctured rock-crystal. The preponderance seems to be in favour of onyx, one of the many varieties of banded agate; but the idea of *value* leads us to think that the emerald is the most probable. There are two remarkable inventories of precious stones in Exod. xxxix. 10-13, and Ezek. xxviii. 13; which may be profitably studied, comparing the Septuagint with the Hebrew.

A nearer approach to the solution of our problem we cannot hope to make.

The numerous attempts of modern German writers to resolve this part and all the rest of the Mosaic Archaeology into what they call a *Mythic Philosophy* (an allegory made up of tradition and fancy), would require a large space to detail and examine them. They are full of arbitrary assumptions and inconsistencies; their tendency and design are to undermine all the facts of supernatural revelation, to destroy the authority of the Mosaic and the prophetic Scriptures, and consequently of the Christian, and thus eventually to supersede all religion that rests upon any other ground than egotistical reasonings and romantic fancies. They form a great part of a multifarious scheme of infidelity and pantheism, which requires to be met by the proofs of the existence of a personal, intelligent, and efficient God, and the evidences that HE has bestowed upon man a positive manifestation of his authority and his love.

Dr. M. Baumgarten (*Theol. Commentar zum A. T.*, vol. i. p. 39) has proposed to eliminate the perplexities in a new way. Admitting the impossibility of finding any place, in the present condition of the earth, that will answer to the description, yet believing that it was realized at the time, he conceives that it pleased the Author of revelation to combine with the historical fact a symbolical and prophetic intention. We shall conclude this article by citing a passage from that work:—

'Amidst all this litigation of contending and contradictory opinions, it has been altogether overlooked, that we ought to inquire for *what reason* this remarkably circumstantial description was given; for it is not the manner of the Holy Scriptures to communicate minute particulars for the gratification of useless curiosity. The word of God never loses sight of its chief object; and it puts all its minor parts into connection with that.

The question then is, *What connection* does the description of Paradise hold with the rest of the history? That the mention of the river, flowing out of Eden, hath its proper and important place, is plain from the purpose ascribed to it—the *watering of the garden*, the impartation of life and fertility, that it might be sufficiently adapted for the abode of the first human creatures. But what now must be the design of the branches of the river, which are expressly pointed out as not belonging to the garden? It evidently must be the same as in the first case, the watering of some ground; and that ground can be no other than the countries through which those derived streams are declared to flow. Here then we are met with the particulars stated concerning Havilah and the other geographical names. The four branches go out into the country of gold, of precious stones, and of aromatics: they go out into the countries in which men first formed communities and founded mighty kingdoms—the lands of Cush, Assyria, and Babylon. Thus, the great river which comes from the east, and has its rise in Eden, and thence immediately waters the garden, is that which pours its waters into the principal countries of the world, as the streams of life to the nations. The number also of both the streams and the countries claims consideration; it is *four*. Bähr (in his work on *Symbols*, vol. i. p. 155-174) has shown that this number was the symbolical sign of *proportion and order*; and was consequently regarded as a designation of the world, considered as a work of order and proportional arrangement—the proper idea of the Greek *κόσμος*. At a later period, we find the Scripture assigning *four* as the number of the great monarchies of the world (Dan. vii.) The description must therefore be understood as directing us far forward into the future, and as giving a prophetic intimation of its own meaning. The life of the human race began in Paradise; but from thence it was to diffuse itself into all other regions, and bring the morning-beam of divine light, which enlightened man in the garden, to be enjoyed over the whole earth. And indeed those countries are the most immediately pointed out, which held ready their fulness and power, and as it were kept in their view the coming of their Lord, in order to do him homage (Matt. ii. 11). But now, with respect to the geographical question, it should not be forgotten that between the commencement of history and our times there lies a great revolution, the Deluge. It cannot be supposed that such a mighty shock of the whole terrestrial globe could do otherwise than greatly disfigure the earth's surface. It might indeed be thought that this consideration would justify an entire relinquishment of attempts to collate the description with now existing localities. But, on the other hand, it should be considered that the Deluge did not take away the identity of the earth; and that the special names, as Phrat and Assur, without doubt have their reference to the earth's subsequent condition. The two names Phrat and Hiddekel appear to determine explicitly the track of country through which they flow; and consequently we may be led to conceive of the whole matter thus: that from the region of Armenia a river flowed, and then divided itself into four branches, of which the two eastern corresponded to the rivers afterwards denominated the Euphrates and the Tigris, and the two

western had their course through Arabia; but that country (Arabia) in some following age was elevated (by volcanic action) above the original river-bed. Prof. Ritter (of the University of Berlin, the father of what may be called a new science, *Comparative Geography*, and which he has happily combined with Ethnography) has remarked that, even within the modern period, the Euphrates has not inconsiderably changed its course. (See his *Geography in relation to Nature and the History of Mankind*, vol. ii. p. 121, 1st ed.) In the following times of history, we have seen how the river of mankind from the mountains of Armenia poured itself into the plains of the Tigris and the Euphrates. The tribes of men went forth into the regions of the streams of Paradise, acquired power and gathered riches. But of gold they made gods, decked them with jewels, and brought incense to the things which have noses and smell not. Their power rebelled against God and his people, and by the rivers of Babylon the children of Israel sat down and wept. Thus, in the world's history, has the track of the four branch rivers maintained itself; but, by the intrusion of sin, the glorious future of the primeval Paradise has been changed into a mournful present.

We have thought it but fair to put our readers into possession of this interpretation, presenting the passage as, though literally true, yet having an allegorical and prophetic intention. It is ingenious and striking; but what we want is some solid ground of *evidence*.—J. P. S.

PARAH (פָּרָה, 'the cow'; Παρά; Alex. Ἀφάρ; *Aphara*), one of the towns in the territory of Benjamin, grouped by Joshua between Bethel and Ophrah, and only once mentioned in Scripture (Josh. xviii. 23). Jerome states that the village (*vicus*) still existed in his time, and was situated five miles from Bethel towards the east (*Onomast.*, s. v. *Aphra*). It seems highly probable that we have this old name retained in the wild glen called *Wady Fārah*, which runs down the eastern declivities of Benjamin. It falls into Wady Suweinit, about three miles below Michmash, and there, in the fork, are the ruins of an ancient village called *Khurbet Fārah* ('ruin of Fārah'). The name Fārah in Arabic has a different signification from the Hebrew Parah (פָּרָה, 'mouse,' is however equivalent to the Hebrew פָּרָה for פָּאֲרָה); but this does not affect the identity of the site (see, however, Robinson, ii. 439, note). The ruins appear to have been visited or seen by Kraftt, and are mentioned by Ritter (*Pal. und Syrien*, iii. 529) and Van de Velde (*Memoir*, 339). Dr. Barclay gives a long account of Wady Fārah, which he incorrectly interprets 'Valley of Delight' as if written فَرَح, *farakh*, instead of فَاَرَح, *fārah*. He discovered in it a

large intermitting fountain, and supposes it to be the *Enon*, where 'John was baptizing, because there was much water there' (John iii. 23); but he does not appear to have thought of its identity with the old Benjamite town of Parah (*City of the Great King*, 558, seq.)—J. L. P.

PARAN (פָּאָרָן, 'a place of caves,' from פָּאָר, Arab. فَار, 'to excavate'; *Φαράν*; *Pharan*), a name given in the Bible to a wilderness, and to a mountain.

1. *The wilderness of Paran* (מִדְבַּר פָּאָרָן; ἡ ἔρημος τοῦ Φαράν).—The situation and boundaries of this wilderness are set forth with considerable exactness by a number of incidental notices in Scripture. It had Palestine on the north, the valley of Arabah on the east, and the desert of Sinai on the south. Its western boundary is not mentioned in the Bible, but it appears to have extended to Egypt and the Mediterranean. The first notice of Paran is in connection with the expedition of the Eastern kings against Sodom. After defeating the giant tribes east of the Jordan, they swept over Mount Seir (Edom) 'unto the terebinth of

*Paran* (פֶּתַח פָּאָרָן; ἐως τῆς τερεβίνθου τῆς Φαράν; *usque ad Campesiria Pharan*), which is in the wilderness' (Gen. xiv. 6). Doubtless some well-known sacred tree is here referred to. It stood on the western border of Seir, and consequently in the Arabah [SEIR]; and it was 'in the wilderness'—that is, the wilderness of Paran, apparently considerably south of Kadesh. From the terebinth of Paran they turned back, 'and came to En-mishpat, which is Kadesh.' When Abraham sent away Hagar and Ishmael from his tent at Beersheba, they went out into 'the wilderness of Paran;' and Ishmael dwelt there, allying himself doubtless with the nomad tribes who made that place their home (Gen. xxi. 14, 21). But it is from its connection with the wanderings of the Israelites that Paran derives its chief and abiding interest—'And the children of Israel took their journeys out of the wilderness of Sinai; and the cloud rested in the wilderness of Paran' (Num. x. 12). From this it might be thought that Paran lay close to Mount Sinai, where the Israelites had been long encamped; but the full narrative which is afterwards given shows that from the encampment at Sinai they made a four days' march to Hazeroth (x. 33; xi. 3, 34, 35); and then the next march brought them into 'the wilderness of Paran' (xii. 16). From Paran the spies were sent to survey Canaan (xiii. 3); and after completing their mission they returned to the camp 'unto the wilderness of Paran, to Kadesh' (ver. 26). There is an apparent difficulty here. At first sight it would appear as if Kadesh in Paran was only a single march from Hazeroth; while Hazeroth has been identified with Ain Hudherah, which is 140 miles distant from Kadesh. The difficulty is solved by a reference to the detailed itinerary in Num. xxxiii. Paran is not mentioned there, because it was the name of a wide region, and the sacred writer records only the names of the camp-stations. Hazeroth is mentioned, however, and so is Kadesh; and between them there are eighteen stations (17-36). Most probably all these stations were in Paran, for it is said that when they 'took their journeys out of the wilderness of Sinai, the cloud rested in the wilderness of Paran' (x. 12); and Moses also states—'When we departed from Horeb, we went through all that great and terrible wilderness which ye saw by the way of the mountain of the Amorites; and we came to Kadesh-barnea' (Deut. i. 19). The wilderness of Paran in fact extended from Hazeroth, and the desert of

Sinai (or Horeb) on the south, to the foot of the mountains of Palestine on the north; and its eastern border ran along the valley of Arabah, from the gulf of Akabah to the southern shore of the Dead Sea. Through this wide region the Israelites marched, not in a straight line, but, like the modern Arab tribes, from pasture to pasture; and it was when entering upon that long and toilsome march that Moses said to his father-in-law, 'Leave us not, I pray thee; forasmuch as thou knowest how we are to encamp in the wilderness, and thou mayest be to us instead of eyes' (Num. x. 31). Jethro was intimately acquainted with the whole wilderness. As a nomad pastoral chief he knew the best pastures and all the wells and fountains; and hence Moses was most anxious to secure his services as guide.

The reference made to Paran in 1 Sam. xxv. shows that it bordered upon the southern declivities of the mountains of Judah. Probably its boundary was not very accurately defined; and whatever part of that region lay beyond the limits of settled habitation was called 'the wilderness, or pasture-land, of Paran.' It thus included a large section of the Negeb [NEGEB]. The reference to Paran in Deut. i. 1, is not so clear. The object of the sacred writer is to describe the place where Moses gave his long address to the Israelites. It was 'on this (the east) side of Jordan, in the wilderness (or *Midbar* of Moab; cf. ver. 5), *in the plain* (the Arabah, עֲרֵבָה) over against the Red

Sea (or 'opposite to Suf,' סוּף), *between Paran and Tophel*, etc. ('between Paran, and between Tophel and Laban,' etc.) The sense appears to be that the Arabah in which Moses stood was opposite to the northern gulf of the Red Sea, and had on the one side Paran, and on the other Tophel, etc. It must not be inferred that Paran extended up to Jericho; all that seems to be meant is that it formed the western boundary of the greater part of the Arabah. It would seem from the incidental statement in 1 Kings xi. 18 that Paran lay between Midian and Egypt. The region here called Midian was situated on the south of Edom [MIDIAN], apparently at the head of the Ælanitic gulf; and the road taken by the fugitive Hadad was most probably that now traversed by the Egyptian Haj, which passes through the whole desert of Tih.

It is strange that both Eusebius and Jerome speak of Paran as a city, which they locate three days' journey east (πρὸς ἀνατολὰς, but they must evidently mean *west*) of Aila\* (*Onomast.*, s. v. *Paran*). They refer doubtless to the old town of Faran, the ruins of which still exist in the valley of Feirân, at the foot of Mount Serbâl, in the desert of Sinai. Feirân was an important place in the early ages of Christianity (Burckhardt, *Travels in Syria*, p. 616; Robinson, i. 126, 592); but it lies nearly thirty miles beyond the southern boundary of Paran. Josephus mentions a valley of Paran; but it was situated somewhere in the wilderness of Judæa (*Bell. Jud.* iv. 9. 4).

Paran is not strictly speaking 'a wilderness.' The sacred writers call it *Midbar*; that is, a pasture-land, as distinguished from an agricultural country. Its principal inhabitants were nomads; though it had a few towns and some corn-fields

\* Jerome is followed by Stephan. Byz.; Reland, p. 556; Raumer, and others.

(Robinson, *B. R.*, i. 190, *seq.*) The leading features of its physical geography are as follows :—The central section, from Beersheba to Jebel el-Tih is an undulating plateau, from 600 to 800 feet in height, traversed by bare rounded ridges, and shallow dry valleys, running on the one side into the Arabah, and on the other to the Mediterranean. The soil is scanty, white, and thickly strewn with nodules of flint. In early spring it is partially covered with grass, shrubs, and weeds;\* but during the heat and drought of summer all vegetation disappears, and the whole surface assumes that aspect of dreary desolation which led the Israelites to call it a great and terrible wilderness' (Deut. i. 19); and which suggested in recent times the somewhat exaggerated language of Mr. Williams—'A frightfully terrific wilderness, whose horrors language must fail to describe' (*Holy City*, i. App. I. p. 464). Fountains are rare, and even wells and tanks are far apart. The plateau rises considerably towards the north-east; and, as deep glens descend from it to the Arabah, this section presents the appearance of a series of parallel ridges extending east and west. Their southern sides are mostly bluffs of naked white rock, which seem from a distance like colossal terrace walls. These are the mountains of the Amorites mentioned in Deut. i. 19, 20, to which the Israelites approached through the wilderness, and which formed the southern barrier of Canaan.

Besides these there is a line of bare white hills running along the whole western border of the Arabah, and forming the support of the table-land of Paran. Toward the valley they descend in steep shelving slopes and rugged precipices, averaging about a thousand feet in height; and everywhere deeply furrowed by wild ravines. The passes from Arabah to Paran are difficult, and a comparatively small band of resolute men might defend them against an army. The southern declivities of the mountain of the Amorites would also present serious obstacles to the advance of a large host.

These natural features enable us to understand more fully some points in the history of the wilderness journey, and to illustrate many incidental expressions in the sacred narrative. They show why the Israelites feared to enter Canaan from Kadesh, until they had ascertained by the report of the spies that those formidable mountain-passes were open (Deut. i. 22). They show how the Amorites, 'which dwelt in that mountain,' were able to drive

\* Mr. Drew's notes on his route from Sinai by Nukhl to Beersheba clearly describe the appearance of the wilderness of Tih in spring: 'Every step of our journey to-day (the second day after crossing Jebel el-Tih) has shown how abundant water was at one time here. . . . Our course has almost entirely lain along the beds of ancient torrents. . . . We met with continuous vegetation. . . . The turfa (tamarisk) was abundant. (April 6th). Again came on extensive spaces covered with vegetation. Some acres, about a mile from Nukhl, are under field cultivation: in fact, pure desert, *i.e.*, a sandy or stony surface, without vegetation, has hitherto been the exception. (April 10th). Our camping-ground to-night is on the borders of a wady, as fruitful and picturesque as Ghurundel or Feiran: grain is growing on it, and birds are singing' (*Scripture Lands*, p. 80, note).

them back when they attempted to ascend (ver. 44; cf. Num. xiv. 40-45). They show how expressive and how natural is the language so often used by Moses at Kadesh. When he sent the spies 'he said unto them, *Get you up this way southward, and go up into the mountain*;' 'so they *went up*. . . they *ascended* by the south'. . . 'Caleb said, *Let us go up* at once. But the men that *went up* with him said, We be not able to *go up* against the people' (xiii. 17, 21, 22, 30, 31). And again, in describing the defeat of the people, —'They rose up early . . . and *gat them up into the top of the mountain*, saying, We will go *up* into the place which the Lord hath promised. . . . Moses said, *Go not up*. . . . But they presumed to *go up*. . . and the Amalekites *came down*,' etc. (xiv. 40, 42, 44, 45).

It is worthy of special note that the wanderings of the Israelites through Paran became to it as a new baptism. Its name is now, and has been for ages, *Badu et-Tih*, 'The wilderness of wandering' (Abulfeda, *Tab. Syr.*, ed. Köhler, p. 4; Jaubert's *Edrisi*, i., p. 360). In addition to the authorities already referred to, notices of Paran will be found in the writings of Burckhardt, *Travels in Syria*, 444), Seetzen (Zach's *Monatl. Correspond.*, xvii.), Ruppell (*Reisen*, 241), Bartlett (*Forty Days in the Desert*, 149, *seq.*), Ritter (*Pal. und Syr.*, i. 147, *seq.*, 1079, *seq.*), Olin (*Travels in Egypt*, etc., ii. 59, *seq.*), and Martineau (*Eastern Life*, 418, *seq.*)

2. *Mount Paran* (הַר פָּאֵרָן) is mentioned only in two passages, both sublime odes celebrating the Divine Majesty. The same glorious event, whatever it may have been, is plainly alluded to in both. Moses says, 'The Lord came from Sinai, and rose up from Seir unto them; he shined forth from *Mount Paran*,' etc. (Deut. xxxiii. 2); and Habakkuk writes; 'God came from Teman, and the Holy One from *Mount Paran*' (iii. 3). The object of both writers is to call attention to those places where the most striking manifestations of divine power and majesty were made to Israel. Next to Sinai, Kadesh stands out as the theatre of the Lord's most remarkable workings. It lies in the valley of Arabah, with Seir on the one side and the highlands of Paran on the other. The summits of both these ranges were, doubtless, now illumined, now clouded, like the brow of Sinai, by the divine glory (KADESH, cf. Num. xvi. 19-35, 42; xx. 1, 6-12). Teman was another name for Edom, or Seir [TEMAN]; and hence the local allusions of Moses and Habakkuk are identical. It may therefore be safely concluded that Mount Paran is that ridge, or series of ridges, already described, lying on the north-east part of the wilderness of Tih. There is nothing in Scripture which would lead us to connect it more closely with Sinai than with Seir, or to identify it with Mount Serbâl, which overlooks Wady Feiran.—J. L. P.

PARASH (פָּרָשׁ). A riding horse or steed. As distinguished from רֹכֵב the word denotes specifically a horse for riding (1 Kings v. 6 [iv. 26]; Ezek. xxvii. 14; Hos. i. 7; Joel ii. 4). In Is. xxii. 6 it is used of a chariot horse ('chariots of men [and] horses,' *i.e.*, chariots drawn by mounted horses). It is once used (Is. xxviii. 28) of horses employed to tread out grain; but these had riders. In the A. V. it is rendered always by 'horseman' or 'horsemen;' but though the word has this

meaning (Gen. i. 9; Jer. iv. 29; Ezek. xxiii. 6, 12; Nah. iii. 3, etc.), it seems in the passages above cited rather to designate the horse than his rider. Which signification is the primary one; whether, regarding the rider and his horse as one, the Hebrews applied the word properly designating the rider sometimes to his horse (as the Romans did with *equus*, Aul. Gell. xviii. 5; Macrob. *Sat.* vi. 9), or the word designating the horse sometimes to the rider, remains uncertain. These *parashim* or riding horses were imported into Judea from Egypt,

422. Egyptian Horse.

Armenia, and Persia. Whether there is any connection between פרש *Parsh*, *Persia*, as some have asserted, is doubtful. Ibn Ezra derives פרש

423. Persian Horse.

from the verb פרש *parash*, which in the hiph. signifies *to sting*, *to prick*, because of the spurs which the rider wore on his feet (on Prov. xxiii. 32, quoted by Bochart, *Hieroz.* ii. c. 6). Fürst, with more probability, finds in it the motion of *bounding*, *springing*, from פרש *parash*, *to cleave*, *break through*, *stretch forth*.—W. L. A.

PARBAR (פַּרְבָּר). In detailing the stations and numbers of the watchmen and door-keepers in and around the Temple, the sacred historian says—'Eastward were six Levites, northward four a day, southward four a day, and toward Asuppin two and two. At *Parbar* westward, four at the causeway, and two at *Parbar*' (1 Chron. xxvi. 17, 18). The meaning is not clear, and we cannot gather from the sentence what the word *Parbar* signifies. It is manifestly a proper name, and was given to some structure connected with the gates on the western side of the Temple-court. The words of the Septuagint are even more obscure than the Hebrew. There is, besides, a repetition of a preceding clause, which adds to the

difficulty of interpretation, and to the confusion of the passage. Ver. 18 is attached to the last clause of the preceding verse—*καὶ εἰς τὸν Ἑσephim δύο εἰς διαδεχομένους, καὶ πρὸς δυσμαῖς τέσσαρες, καὶ εἰς τὸν τρίβον δύο διαδεχομένους*. The word *διαδεχομένους* is the equivalent of פָּרַבֵּר; it is connected with *δύο*, and must signify, as here used, 'by turns'—'And at Esephim two by turns,' or 'relieving each other' (cf. Xen. *Anab.* i. 5. 2). The Hebrew will not bear such a rendering. Jerome translates as follows: 'In *cellulis* quoque janitorum ad occidentem quatuor in via, binique per *cellulas*;' but what these *cellule* were does not appear. The word *Parbar* does not occur in any other part of Scripture; but it is supposed to be the same as פָּרֹר in 2 Kings xxiii. 11, translated 'suburbs' in the A. V. The LXX. read Φαρουφίμ. Gesenius says פָּרֹר and פָּרַבֵּר are equivalent to the Persian فَرَوَار, 'a summer-house,' open upon all

sides to admit air. He supposes that it was an open porch which adjoined the Temple (*Thesaurus*, p. 1123). The Rabbins give the name פָּרֹר to the 'suburbs' of a city—the part without the gate or wall. Probably there were at the western gates of the Temple some open porches or chambers for the accommodation of guards or servants, and to these was given the foreign name *Parbar*.—J. L. P.

#### PARCHMENT. [WRITING.]

PARCHON, SALOMON b. ABRAHAM, one of the earliest grammarians and lexicographers, who flourished about 1130 at Calatajud in Aragon. He afterwards emigrated to the peninsula of Salerno, where he most probably died about 1180. Being anxious to furnish his co-religionists in southern Italy with the results of the grammatical and exegetical labours of his brethren in Spain, Parchon compiled, in the year 1160, a Hebrew lexicon, entitled מִנְחַבֶּת הָעֵרֶךְ. Though it is substantially a translation of Ibn Ganach's celebrated lexicon [IBN GANACH], yet Parchon also introduces in it the labours of Chajug, Jehadah Ha-Levi, Ibn Ezra, etc. etc., and explains many words by the aid of passages from the Targumim, the Mishna, Tosefta, and the Talmud. The work is divided into two parts; the first containing a grammar of the Hebrew language, and the second a lexicon. It has been published by Stern, Presburg 1844, with a valuable introduction by Rappaport, in which this erudite scholar gives a succinct history of the study of the Hebrew language, and of the different periods in which the great grammarians lived. Parchon has also written a commentary on the Prophets and Hagiographa, which has not as yet come to light (comp. Steinschneider, *Bibliographisches Handbuch*, Leipzig 1859, p. 108; Fürst, *Bibliotheca Judaica*, iii. 66).—C. D. G.

PAREUS, DAVID, was the son of John Wängler, and born at Francostein, a Silesian town, in 1548. He was educated at Hirschberg and Heidelberg, and made great proficiency in Latin, Greek, and Hebrew. In accordance with a custom not unfrequent with scholars of that age, and of which Melancthon is an instance, he substituted for his father's name its Greek equivalent [Παρεῖος being the literal rendering of *Waengler*; from Παρεῖα (German *Wänge*), a cheek]. Pareus, who had at Hirschberg been induced by his tutor, Christopher

Schilling, to renounce Lutheranism, became a warm adherent of the Reformed Communion. After this he wrote much in opposition to the special Lutheran doctrines; nor were his polemics confined to Protestant opponents, as his treatises against Cardinal Bellarmine, and his dispute with the Jesuit Magirus, attest. It is, however, for his Biblical pursuits, which were considerable, that Pareus has a place in our work. His son Philip, who published his father's works in three [actually four in three] folio volumes, at Frankfort in 1647, has, in the appendix of his biographical sketch, enumerated upwards of fifty treatises on the Holy Scriptures. Most of these are *Adversaria*, or brief notes on certain books. The full *Commentarii* are confined to the books of Genesis, St. Matthew, the Epistle to the Romans, the First Epistle to the Corinthians, the Epistle to the Galatians, the Epistle to the Hebrews, the Epistle of St. James, the Epistles of St. Peter, and the Apocalypse. Philip Pareus, his learned son, added *Commentarii* on the Epistles to the Colossians, to Philemon, and of St. Jude. It will give the reader an idea of the difference between the *Commentarii* and the *Adversaria*, if we state that 'the Commentary' on Genesis occupies 381 pages, and 'the Notes' on Exodus, only 21 pages of the first of the folio volumes. Although the Biblical writings of Pareus are generally superseded, it is impossible to deny to them considerable merit, both in the exegetical exposition of the sacred text and in the practical deductions which are appended to the chapters as *Theoremata practica*. The greatest drawback to this merit arises from the long theological (chiefly polemical) discussions with which the commentary is overburdened. Pareus, who from advanced years declined the office of commissioner to the Synod of Dort, to which he had been nominated as a mark of respect by the States-General, died at Heidelberg in 1622.—P. H.

PARKHURST, JOHN, M.A., was born at Catesby House, in Northamptonshire, in June 1728. He was educated at Rugby and Cambridge, and being possessed of an ample fortune he served gratuitously as curate for a friend, but never sought any preferment in the church. He devoted himself to Biblical studies, and rendered service of no small importance at the time to the cause of sacred learning by his *Hebrew and English Lexicon and Grammar*, published first in 1762, and his *Greek and English Lexicon to the N. T.*, to which is prefixed a *Greek Grammar*, published in 1769. These works have since been very much superseded by more perfect works, but they are still worthy of being consulted, and are monuments of the author's industry, ingenuity, and piety. Parkhurst wrote also a work on the *Divinity and Pre-existence of our Lord*, 1787. He died 21st Feb. 1797.—W. L. A.

PARLOUR. [HOUSE.]

PARMENAS (Παρμενᾶς), one of the seven first deacons of the church formed at Jerusalem (Acts vi. 5). Nothing more is known of him; but the Roman martyrologies allege that he suffered martyrdom under Trajan.

PARTHIA (Παρθία, Ptol.; Παρθαία, Strabo and Arrian), the country of the Parthians (Πάρθοι), mentioned in Acts ii. 9, as being, with their neighbours the Medes and Elamites, present at Jeru-

salem on the day of Pentecost. The persons referred to were Jews from Parthia, and the passage is a strong evidence showing how widely spread were members of the Hebrew family in the first century of our era. The term originally referred to a small mountainous district lying to the north-east of Media. Afterwards it came to be applied to the great Parthian kingdom into which this province expanded. Parthia Proper, or Ancient Parthia, lying between Aria and Hyrcania, the residence of a rude and poor tribe, and traversed by bare mountains, woods, and sandy steppes, formed a part of the great Persian monarchy, being a dependency on the satrapy of Hyrcania. Its inhabitants were of Scythian origin. They formed a part of the army of Xerxes, and were found in that of the last Darius. In the breaking up of the kingdom of Alexander the Parthians took sides with Eumenes, and became subject to Antigonius and the Seleucidæ. About 256 years before Christ, Arsaces rose against the Syro-Macedonian power, and commenced a new dynasty in his own person, designated by the title of Arsacidæ. This was the beginning of the great Parthian empire, which extended itself in the early days of Christianity over all the provinces of what had been the Persian kingdom, having the Euphrates for its western boundary, by which it was separated from the dominions of Rome. It was divided into eighteen provinces. Now at peace, now in bitter hostilities with Rome, now the victor and now the vanquished, the Parthians were never subjugated by the Romans. At length Artaxerxes

424-

founded a new dynasty. Representing himself as a descendant of the ancient Persian kings, and calling upon the Persians to recover their independence, he raised a large army, defeated the Parthians in a great battle, succeeded to all the dominions of the Parthian kings, and founded the new Persian empire, to the rulers of which is commonly given the name of the Sassanidæ. The government of Parthia was monarchical; but as there was no settled and recognised line of succession, rival aspirants were constantly presenting themselves, which weakened the country with internal broils, especially as the Romans saw it to be their interest to foster dissensions and encourage rivalries, and led eventually to the overthrow of the dynasty in the case of the successful aspirant, Artaxerxes. During the Syro-Macedonian period the Parthian and Jewish history kept apart in separate spheres, but under the Romans the Parthians defended the party of Antigonius against Hyrcanus, and even took and plundered Jerusalem (Joseph.

*Antiq.* xiv. 13. 3; *De Bell. Jud.* i. 13). The geography of Parthia may be studied, besides the ancient authorities, in *Cellar. Notit.* ii. 700; Mannert, v. 102.—J. R. B.

PARTRIDGE. [QORE.]

PARVAIM (פַּרְוַיִם); Sept. Φαρவுμ, a region producing the finest gold (2 Chron. iii. 6). There is very strong reason to conclude, with Bochart, that it is the same with Ophir. Castell, however, identifies it with Barbatia on the Tigris, which is named by Pliny (*Hist. Nat.* vi. 32); and Gesenius, seeking the root of the name in the Sanskrit *pūrva*, 'before,' i.e. 'eastern,' concludes it to be a general term, corresponding to our Levant, meaning east country; so that 'gold of Parvaim' means Eastern gold.—J. K.

PASDAMMIM (הַפֶּסֶח דָּמִיִּם), 'The hand of astonishment or confusion'; Φασδομμιν; Alex. Φασδομμιν; *Phesdomim*). This place is only mentioned in 1 Chron. xi. 13, where the sacred historian is describing the scene of a fierce contest with the Philistines. Its position is not indicated. It seems, however, to be the same place which in 1 Sam. xvii. 1 is called *Ephes-dammim* (הַפֶּסֶח דָּמִיִּם); 'Εφεσμέν; Alex. Ἀφεσδομμειν; in *finibus Dommim*), and which was situated on the side of the valley of Elah between Shochoh and Azekah. Probably the latter was the full name, and the other a contracted form. It is not certain whether Ephes-dammim was a town or a little district so called. The latter seems more probable, as the Philistines encamped in it, and it was on more than one occasion the scene of deadly conflicts. Van de Velde mentions a ruin called Dāmūn (*Travels*, ii. 193); and in his map he locates it three miles east of Shochoh, up the valley. The writer visited and carefully surveyed this region. He came to the conclusion that the camp of the Philistines must have been west and not east of Shochoh, and he does not therefore identify Ephes-dammim with Dāmūn.—J. L. P.

PASHUR (פַּשְׁחֹר); Sept. Πασχώρ, son of Immer, a priest, and chief overseer of the Temple, who smote Jeremiah and put him in the stocks for his prophecies of captivity and ruin; on which the prophet was commissioned to declare that he should be one of those to go into exile, and that he and all his friends should die in Babylon, and be buried there (Jer. xx. 1-6).

2. Son of Melchiah, a high officer of king Zedekiah, and one of those at whose instance Jeremiah was cast into prison (Jer. xxi. 1; xxxviii. 1-6). A descendant of his is mentioned among the new colonists of Jerusalem after the captivity (Neh. xi. 12).—J. K.

PASOR, GEORG, professor of Greek successively at Herborn and at Franeker, was born 1st August 1570 at Ellar in Nassau, and died 10th December 1637. He was the author of *Lexicon Gr. Lat. in N. T.*, Amst. 1631; this has often been reprinted; the last and best edition was edited by J. F. Fischer, Lips. 1774; and of *Grammat. Gr. Sac. N. T. in tres libros tributa*, Gröning. 1655, a posthumous work published by his son, and of which Winer speaks in high terms (*Gram. des N. T. lichen Sprachidioms*, Einleit., p. 6). The grammar was only once reprinted (1787), and is now very rare.—W. L. A.

PASSOVER, THE FEAST OF (חַג הַמִּצּוֹת, חַג הַפֶּסֶח), the first of the three great annual festivals—the other two being *Pentecost* and the *Feast of Tabernacles*—on which the male population appeared before the Lord in Jerusalem.

1. *Name and its signification.*—The name פֶּסַח [from פָּסַח, to pass through, to leap, to halt (2 Sam.

iv. 4; 1 Kings xviii. 21), whence חַפְצָה, a passage, a ford (1 Kings v. 4 [iv. 24]), then tropically to pass by in the sense of sparing, to save, to show mercy (Exod. xii. 13, 23, 27; Is. xxxi. 5)], denotes—i. an overstepping, passover, and is so rendered by Joseph. *Antiq.* ii. 14. 6 (ὑπερβασία), Aquila (ὑπερβασος), and the English version. ii. The paschal sacrifice, by virtue of which, according to the divine appointment, the passing over, or saving, was effected (Exod. xii. 21, 27, 48; 2 Chron. xxx. 18). iii. The paschal meal on the evening of the fourteenth of Nisan, whilst the seven following days are called חַג הַמִּצּוֹת, the feast of unleavened bread (Lev. xxiii. 5, 6), and hence the expression חַג הַמִּצּוֹת הַבֹּרֵךְ, the mornrow of the passover, for the fifteenth of Nisan (Num. xxxiii. 3; Josh. v. 11). And iv., it is used synecdochically for the whole festival of unleavened bread, which commenced with the paschal meal (Deut. xvi. 1-3; comp. also Ezek. xlv. 21, where פֶּסַח is explained by חַג הַפֶּסַח שֶׁבַע יָמִים, written fully פֶּסַח שֶׁבַע יָמִים (Exod. xxxiv. 25). The whole feast, including the paschal-eve, is also denominated חַג הַמִּצּוֹת, the festival of unleavened bread, ἡ ἑορτὴ τῶν ἄζυμων, ἡμέραι τῶν ἄζυμων, festum azymorum (Exod. xxiii. 15; Lev. xxiii. 6; 2 Chron. viii. 13; Ezra vi. 22; Luke xxii. 1, 7; Acts xii. 3; xx. 6), or simply חַג הַמִּצּוֹת = τὰ ἄζυμα (Exod. xii. 17; Mark xiv. 1). The simple name *Pesach* (פֶּסַח = φασέκ; Sept. 2 Chron. xxx. 15; xxxv. 1, 11; Aramæan פֶּסְחָא = τὸ πάσχα; Mark xiv. 1), however, is the one commonly used by the Jews to the present day to denote the festival of unleavened bread; and it is for this reason that this appellation is retained untranslated in the Sept. and N. T. Some of the fathers, not knowing that πάσχα = φασέκ (Sept. Exod. xii. 11, 21; Joseph. *Antiq.* v. 1. 4) is the Aramæan form פֶּסְחָא for the Hebrew פֶּסַח (i. q. φασέκ, which is also retained in the Sept.), have derived it from the Greek πάσχω, to suffer. Thus Chrysostom tells us, πάσχα λέγεται, ὅτι τότε ἐπάθεν ὁ Χριστὸς ὑπὲρ ἡμῶν (*Homil.* v. in i. Tim.). Irenæus says—'Α Μοϋσε ostenditur Filius Dei, cujus et diem passionis non ignoravit, sed figuratim pronunciavit eum pascha nominans' (*Adv. Hær.* iv. 22); Tertullian affirms, 'Hanc solemnitatē—præcanebat (sc. Moyses) et adjecit, Pascha esse Domini, id est, passionem Christi' (*Adv. Judæos*, x. sub. fin.); comp. also Suicer, s. v.

2. *Institution and observance of the Passover.*—In describing the institution of this festival, and the rites and ceremonies connected therewith, it is necessary to distinguish between the Mosaic enactments and those practices which obtained during the post-exile period. We shall therefore divide our description into three periods, viz.—A. The period dating from the original institution of this festival to the Babylonish captivity; B. The post-exile period; and, C. From the dispersion of the Jews to the present day.

A. THE PERIOD FROM THE INSTITUTION OF THIS FESTIVAL TO THE BABYLONISH CAPTIVITY.—In the first institution of the Passover, it is or-

dained that the head of each family is to select, on the tenth of Nisan (*i. e.*, four days beforehand, meant to represent the four generations (דורות) which had elapsed since the children of Israel had come to Egypt, Gen. xv. 16), a male lamb or goat of the first year, and without blemish, to kill it on the eve of the fourteenth,\* sprinkle the blood with a sprig of hyssop on the two side-posts and the lintel of the door of the house—being the parts of the

\* The precise meaning of the phrase **בין הערבים**, which is used with reference to the time when the paschal animal is to be slain (Exod. xii. 6; Lev. xxiii. 5; Num. ix. 3, 5), as well as in connection with the offering of the evening sacrifice (Exod. xxix. 39, 41; Num. xxviii. 4), and elsewhere (Exod. xvi. 12; xxx. 8), is greatly disputed. The Samaritans, the Karaites, and Ibn Ezra, who are followed by Michaelis, Rosenmüller, Gesenius, Maurer, Kalisch, Knobel, Keil, and most modern commentators, take it to denote the space between the setting of the sun and the moment when the stars become visible, or when darkness sets in, *i. e.*, between six and seven o'clock. Accordingly, Ibn Ezra explains the phrase *between the two evenings* as follows:—'Behold we have two evenings, the first is when the sun sets, and that is at the time when it disappears beneath the horizon; whilst the second is at the time when the light disappears which is reflected in the clouds, and there is between them an interval of about one hour and twenty minutes' (*Comment.* on Exod. xii. 6). Tradition, however, interprets the phrase '*between the two evenings*' to mean from afternoon to the disappearing of the sun, the first evening being from the time when the sun begins to decline from its vertical or noon-tide point towards the west; and the second from its going down and vanishing out of sight, which is the reason why the daily sacrifice might be killed at 12.30 P.M. on a Friday (*Mishna, Pesachim*, v. 1; Maimonides, *Hilchoth Korban Pesach*, i. 4). But as the paschal lamb was slain after the daily sacrifice, it generally took place from 2.30 to 5.30 P.M. (*vide infra*, and Joseph. *de Bell. Jud.* vi. 9. 3). We should have deemed it superfluous to add, that such faithful followers of Jewish tradition as Saadia, Rashi, Kimchi, Ralbag, etc., espouse this definition of the ancient Jewish canons, were it not for the assertion which is made in some of the best Christian commentaries, and which is repeated in the excellent article *Passover* in Smith's *Dictionary of the Bible*, that 'Jarchi [= Rashi] and Kimchi hold that the two evenings were the time immediately before and immediately after sunset, so that the point of time at which the sun sets divides them.' Now Rashi most distinctly declares, 'From the sixth hour [= twelve o'clock] and upwards is called *between the two evenings* (**בין הערבים**), because the sun begins to set for the evening. Hence it appears to me that the phrase *between the two evenings* denotes the hours between the evening of the day and the evening of the night. The evening of the day is from the beginning of the seventh hour [= immediately after noontide], when the evening shadows begin to lengthen, whilst the evening of the night is at the beginning of the night' (*Commentary on Exod. xii. 6*). Kimchi says almost literally the same thing: '**בין הערבים** is from the time when the sun begins to incline towards the west, which is from the sixth

house most obvious to passers-by, and to which texts of Scripture were afterwards affixed [MEZUZA]—to roast the whole animal with its head, legs, and entrails, without breaking a bone thereof, and when thoroughly done, he and his family are to eat it on the same evening together with unleavened bread and bitter herbs, having their loins girt, their sandals on their feet, and their staves in their hands. If the family, however, are too small in number to consume it, a neighbouring family may join them, provided they are circumcised sons of Israel, or household servants and strangers who have been received into the community by the rite of circumcision. The whole of the *Pesach* is to be consumed on the premises, and if it cannot be eaten up it is not to be removed from the house, but burned on the spot on the following morning. The festival is to be celebrated seven days, *i. e.*, till the twenty-first of the month, during which time unleavened bread is to be eaten, but cessation from all work and trade is only to be on the first and seventh day of the festival. Though instituted to exempt them from the general destruction of Egypt's first-born, the Israelites are told to regard the Passover as an ordinance for ever, to teach its meaning to their children, and that the transgression of the enactments connected therewith is to be punished with excision (Exod. xii. 1-28, 48-51). Thus far the account of the pre-exodus institution of the Passover.

In the post-exodus legislation on this festival several enactments were introduced at different times, which both supplement and modify the original institution. Thus it is ordained that all the male members of the congregation are to appear in the sanctuary before the Lord with the offering of firstlings (Exod. xxiii. 14-19, xxxiv. 18-26); that the first sheaf of the harvest (**עומר**) is to be offered on 'the morrow after the Sabbath' (Lev. xxiii. 4-14), that those who, through defilement or absence from home, are prevented from keeping the Passover on the 14th of Nisan, are to celebrate it on the 14th of the following month (Num. ix. 1-14), that special sacrifices are to be offered on each day of the festival (Num. xxviii. 16-25), that the paschal animals are to be slain in the national sanctuary, and that the blood is to be sprinkled on the altar instead of the two door-posts and lintel of the doors in the respective dwellings of the families (Deut. xvi. 1-8). The ancient Jewish canons, therefore, rightly distinguished between the *Egyptian Passover* (**פסח מצרים**) and the *Permanent Passover* (**פסח דורות**), and point out the following differences between

hour [= twelve o'clock] and upwards. It is called **ערבים** because there are two evenings, for from the time that the sun begins to decline is one evening, and the other evening is after the sun has gone down, and it is the space between which is meant by *between the two evenings*' (*Lexicon*, s. v. **ערב**). How this blunder could have originated in the face of such plain language, it is impossible to divine. Eustathius, in a note on the seventeenth book of the *Odyssey*, shows that the Greeks too held that there were two evenings, one which they called the latter evening (**δελη ὥρα**) at the close of the day; and the other the former evening (**δελη πρωία**), which commenced immediately after noon (*Vid.* Bochart, *Hierozoic.*, part 1, lib. ii. cap. 1, *Oper.*, tom. ii. p. 559, edit. 1712).

them :—*i.* In the former the paschal animal was to be selected on the tenth of Nisan (Exod. xii. 3). *ii.* It was to be killed by the head of each family in his own dwelling, and its blood sprinkled on the two door-posts and the lintel of every house (Exod. xii. 6, 7, 22). *iii.* It was to be consumed in haste, and the eaters thereof were to be dressed in their journeying garments (Exod. xii. 11). *iv.* Unleavened bread was to be eaten with the paschal animal only on the first night, and not necessarily during the whole seven days, although the Israelites were almost compelled to eat unleavened bread, because they had no time to prepare leaven (Exod. xii. 39). *v.* No one who partook of the *Pesach* was to go out of the house until the morning (Exod. xii. 22). *vi.* The women might partake of the paschal animal. *vii.* Those who were Levitically impure were not necessarily precluded from sharing the meal. *viii.* No firstlings were required to be offered. *ix.* No sacrifices were brought; and *x.* The festival lasted only one day, as the Israelites commenced their march on the 15th of Nisan (*Mishna, Pesachim*, ix. 5; *Tosiftha, Pesachim*, vii.; Maimonides, *Iad Ha-Chezaka, Hilchoth Korban Pesach*, x. 15). Now, these regulations were peculiar to the first Passover, and were afterwards modified and altered in the *Permanent Passover*.

Dr. Davidson, indeed (*Introduction to the O. T.*, vol. i. p. 84, etc.), insists that the Deuteronomist (xvi. 1-7) gives other variations—that he, *i.* mentions both צאן, *small cattle*, and בקר, *oxen*, as the paschal sacrifice, and *ii.* states that the paschal victim is to be *boiled* (בשל), whilst in the original institution in Exod. xii. it is enacted that the paschal sacrifice is to be a שֶׁה only, and is to be *roasted*. But against this is to be urged that—*i.* The word פסח in Deut. xvi. 1, 2, as frequently, is used for the whole festival of unleavened bread, which commenced with the paschal sacrifice, and which indeed Dr. Davidson a little further on admits, and that the sacrifices of sheep and oxen in question do not refer to the paschal victim, but to all the sacrifices appointed to be offered during the seven days of this festival. This is evident from ver. 3, where it is distinctly said, ‘Thou shalt eat no leavened bread (עליו) therewith [*i.e.*, the פסח in ver. 2], seven days shalt thou eat (עליו) therewith [*i.e.*, the פסח] unleavened bread,’ thus showing that the sacrifice and eating of פסח is to last seven days, and that it is not the paschal victim which had to be slain on the 14th and be consumed on that very night (Exod. xii. 10); *ii.* בשל simply denotes to *cook, dress, or ripen for eating in any manner*, and here unquestionably stands for בשל באש, to *roast in fire*, as in 2 Chron. xxxv. 13. This sense is not only given in the ancient versions (Sept., Vulg., Chaldee paraphrase of Jonathan b. Uzziel, etc.), and by the best commentators and lexicographers (Rashi, Rashbam, Ibn Ezra, Ibn Saruk, Kimchi, Fürst, Keil, etc.), but is supported by Knobel (*Comment. on Exod. and Levit.*, p. 98), who is quite as anxious as Dr. Davidson to establish the discrepancy between the two accounts; and *iii.* We know from the non-canonical records that it has been the undeviating practice of the Jews during the second Temple to offer a שֶׁה only as a paschal sacrifice, and to *roast* it, but not to *boil* it. Now the Deuteronomist, who, as we are assured by

Dr. Davidson and others, lived at a very late period, would surely not contradict this prevailing practice of a later time. Besides, if the supposed variations recorded by the Deuteronomist describe practices which obtained in later times, how is it that the non-canonical records of the Jewish practices at a later period agree with the older description, and not with the supposed variations in Deuteronomy?

That the Israelites kept the Passover on the evening before they left Egypt, is distinctly declared in Exod. xii. 28. Bishop Colenso, however, argues against the Mosaic institution of the Passover, and against the possibility of its having been celebrated; because—*i.* Moses having received the command about the Passover on the very day at the close of which the paschal lambs were to be killed, could not possibly have communicated to every head of a family throughout the entire country the special and strict directions how to keep it; *ii.* The notice to start at once in hurried flight in the middle of the night could not suddenly and completely be circulated; and *iii.* As the people were 2,000,000 in number, and if we take 15 persons for each lamb, there must have been slain 150,000 paschal lambs, all males, one year old; this premises that 200,000 male lambs and 200,000 ewe-lambs were annually produced, and that there existed a flock of 2,000,000 (*The Pentateuch and Book of Joshua critically examined*, part i., cap. x.) But *i.*, From Exod. xii. 2, 3, it is evident that, so far from receiving it on the 14th of Nisan, Moses received the command at the very beginning of the month, and that there was therefore sufficient time for the elders (comp. Exod. xii. 1, 2, with ver. 21) to communicate the necessary instruction to the people, who were a well organized body, presided over by the heads of families and leaders (Exod. v. 6-23; Num. i. 1, etc.; Josh. vii. 14, etc.) The expres-

sions כחצות הלילה (xii. 12), and כחצות הלילה (xi. 4), on which Dr. Colenso lays so much stress, do not refer to the night following the day of the command, but to the night following the day when the command was to be executed. כחצות here, as frequently elsewhere, denotes *the same*, and expresses simultaneousness, whether past, present, or future, inasmuch as in historical narrative not only that which one can see, or, as it were, point his finger at, is regarded as present, but that which has just been mentioned (Gen. vii. 11, 13; Exod. xix. 1; Lev. xxiii. 6, 21; Job x. 13), and that which is immediately to follow (Gen. v. 1; vi. 15; xlv. 19; Is. lvi. 2; Jer. v. 7; Ps. lxxiv. 18). *ii.* The notice to quit was not momentary, but was indicated by Moses long before the celebration of the Passover (Exod. xi. 1-8), and was most unmistakably given in the order to eat the paschal meal in travelling attire, so as to be ready to start (Exod. xii. 11); and *iii.* The average of fifteen or twenty persons for each lamb, based upon the remark of Josephus (*de Bell. Jud.* vi. 9. 3), is inapplicable to the case in question, inasmuch as those who, according to later legislation, went up in after times to Jerusalem to offer the paschal sacrifice, were all full-grown and able-bodied men, and every company of twenty such persons, when the Jews were in their own land, where there was every facility for obtaining the requisite flocks, might easily get and consume a sheep in one night. But among the several millions of Israelites in Egypt and in the wilderness, there were myriads of women, children,

invalids, uncircumcised and unclean, who did not partake of the Passover, and those who did eat thereof would fully obey the divine command if one or two hundred of them simply ate a morsel of one and the same animal when they found any difficulty in obtaining flocks, inasmuch as the paschal sacrifice was only to be commemorative; just as one loaf suffices for hundreds of persons at the sacrament of the Lord's Supper. Instead, therefore, of 150,000 being required for this purpose, 15,000 animals would suffice. Moreover, Dr. Colenso, misled by the A. V., which renders *שֶׁה* by *lamb*, makes a mistake in restricting the paschal sacrifice of Egypt to a *lamb*. Any Hebrew lexicon will show that it denotes *one of the flock*, i.e., *either a sheep or a goat*, and it is so used in Deut. xiv. 4, *שֶׁה כְּבָשִׁים וְשֶׁה עִזִּים*, *one of the sheep and one of the goats* (comp. Gesenius' and Fürst's Lexicons, s. v. *שֶׁה*). This mistake is all the more to be deplored, since at the institution of the Passover it is expressly declared that it is to be *שֶׁה*, *one of the sheep or of the goats* (Exod. xii. 5). It is well known to scholars that the Jewish canons fixed a *lamb* for this purpose long after the Babylonish captivity. Hence the Targumim's rendering of *שֶׁה* by *אֶמְרָא* or *אֶמְרָא*, which is followed by the A. V. It is well known also that goats have always formed a large admixture in Oriental flocks, and in the present which Jacob sent to Esau the proportion of sheep and goats is the same (Gen. xxxii. 14). Now, the fifteen thousand paschal-sacrifices divided between the lambs and the goats would not be such an impossible demand upon the flocks.

After the celebration of the Passover at its institution (Exod. xii. 28, 50), we are told that the Israelites kept it again in the wilderness of Sinai in the second year after the exodus (Num. ix.) Between this and their arrival at Gilgal under Joshua, about thirty-nine years, the ordinance was entirely neglected, not because the people did not practise the rites of circumcision, and were therefore legally precluded from partaking of the paschal meal (Josh. v. 10, with Exod. xii. 44-48), as many Christian expositors will have it, since there were many thousands of young people that had left Egypt who were circumcised, and these were not legally disqualified from celebrating the festival; but because, as Rashi, Ibn Ezra, and other Jewish commentators rightly remark, Exod. xii. 25, xiii. 5-10, plainly show that after the first Passover in the wilderness, the Israelites were not to keep it again till they entered the land of Canaan. Only three instances, however, are recorded in which the Passover was celebrated between the entrance into the promised land and the Babylonish captivity, viz., under Solomon (2 Chron. viii. 13), under Hezekiah, when he restored the national worship (2 Chron. xxx. 15), and under Josiah (2 Kings xxiii. 21; 2 Chron. xxxv. 1-19).

**B. THE POST-EXILE PERIOD.**—After the return of the Jews from the captivity, where they had been weaned from idolatry, the spiritual guides of Israel reorganised the whole religious and political life of the nation, and defined, modified, and expanded every law and precept of the Mosaic code, so as to adapt them to the altered condition of the people. The celebration of the Passover, therefore, like that of all other institutions, became more regular and systematic during this period; whilst the different colleges which were now established,

and which were attended by numerous disciples [EDUCATION], have faithfully transmitted to us all the sundry laws, rites, manners and customs, connected with this and all other festivals, which it was both impracticable and impossible to record in the limited space of the canonical books of the O. T. Hence it is that the manners and customs of this period, which were those of our Saviour and his apostles, and which are therefore of the utmost importance and interest to Christians, and to the understanding of the N. T., can be more easily ascertained, and more minutely described. Hence also the simple summary notice of the fact that the Israelites kept the Passover after their return from Babylon, contained in the canonical Scriptures (Ezra vi. 19-22), may be supplemented by the detailed descriptions of the manner in which this festival was celebrated during the second Temple, given in the non-canonical documents. The various practices will be better understood and more easily followed if given in connection with the days of the festival on which they were respectively observed.

*The Great Sabbath* (*שַׁבַּת הַגָּדוֹל*), *Shabbath Ha-Gadol*, is the Sabbath immediately preceding the Passover. It was regarded as and is called the great Sabbath in the calendar, because, according to tradition, the tenth of the month on which the Lord commanded every head of a family to select the paschal sacrifice (Exod. xii. 3), happened to fall on the Sabbath: and though in later legislation the animal was not required to be set aside four days beforehand, yet the Jewish canons determined that the Sabbath should be used to instruct the people in the duties of this great festival. Hence special prayers (*יְצִירָתוֹ*) bearing on the redemption from Egypt, the love of God to Israel, and Israel's obligations to keep the Passover, have been ordained for this Sabbath, in addition to the ordinary ritual. Mal. iii. 1-18; iv. 1-6, was read as *Maphṭir* (*מַפְתִּיר*) = the lesson for the day [*HAPHTARA*], and discourses were delivered by the spiritual guides of the community explanatory of the laws and domestic duties connected with the festival (*Tur Orach Chajim*, sec. 430). Though the present synagogal ritual for this day is of a later date, yet there can be no doubt that this Sabbath was already

distinguished as the great Sabbath (*שַׁבַּת הַגָּדוֹל*, *μεγάλη ἡ ἡμέρα τοῦ σαββάτου*, John xix. 31) in the time of the second Temple, and was used for preparing the people for the ensuing festival.

**13th of Nisan.**—On the evening of the 13th, which, until that of the 14th, was called the *preparation for the Passover* (*עֶרֶב פֶּסַח*, *παρασκευή τοῦ πάσχα*, John xix. 14), every head of the family searched for and collected by the light of a candle all the leaven (*Mishna, Pesachim*, i. 1). Before beginning the search he pronounced the following benediction:—‘Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments, and hast enjoined us to remove the leaven’ (*Talmud, Pesachim*, 7a; Maimonides, *Iad Ha-Chetzeka, Hilchoth Chamez U-Maza*, iii. 6). After the search he said, ‘Whatever leaven remains in my possession which I cannot see, behold it is null, and accounted as the dust of the earth’ (Maimonides, *ibid.*) What constituted leaven will be understood when the ancient definition of unleavened bread is known. According to the Jewish canons, the command to eat unleavened bread (Exod. xiii. 6; xxiii. 15; xxxiv. 18;

Lev. xxiii. 6; Num. xxviii. 17; Deut. xvi. 3) is executed by making the cakes (מַצוֹת) which are to be eaten during the seven days of this festival of wheat, barley, spelt, oats, or rye (*Mishna, Pesachim*, ii. 5). From these five kinds of grain (חֲמִשָּׁה דָּגָן) which can be used for actual fermentation, the cakes are to be prepared before the dough begins to ferment; anything else made from one of these five kinds of corn with water constitutes leaven, and must be removed from the house and destroyed. Other kinds of produce and preparations made therefrom do not constitute leaven, and may be eaten. Thus we are told, 'Nothing is prohibited on the Feast of Passover because of leaven except the five kinds of corn, viz., wheat, barley, spelt, oats, and rye. Leguminous plants, such as rice, millet, beans, lentils, and the like, in these there is no leaven; and although the meal of rice or the like is kneaded with hot water and covered with cloths till it rises like leavened dough, yet it may be eaten, for this is not leaven but putrefaction. And even the five kinds of corn, if simply kneaded with the liquor of fruit, without water, are not accounted leaven. Though the dough thus made stands a whole day and rises yet it may be eaten, because the liquor of fruit does not engender fermentation but acidity. The fruit-liquor, oil, wine, milk, honey, olive-oil, the juice of apples, of pomegranates, and the like, but no water, is to be in it, because any admixture of water, however small, produces fermentation' (Maimonides, *Seder Ha-Chetzaka Hilchoth Chamez U-Maza*, v. 1, 2).

14th of Nisan.—On this day, which, as we have seen, was till the evening called the preparation for the Passover (עֶרֶב פֶּסַח, παρασκευὴ τοῦ πάσχα), and which was also called the first day of Passover or of unleavened bread (Lev. xxiii. 5, 6; Num. ix. 3; xxviii. 16; Josh. v. 10; Ezek. xlv. 21; 2 Chron. xxx. 15; xxxv. 1; Joseph. *Jewish Wars*, v. 3. 1), or the reason stated under the 13th of Nisan, handicraftsmen, with the exception of tailors, barbers, and laundresses, were obliged to relinquish the work either from morning or from noon, according to the custom of the different places in Palestine (*Mishna, Pesachim*, iv. 1-8). Leaven was only allowed to be eaten till mid-day, when all leaven collected on the previous evening and discovered on this day had to be burned. The time for desisting from eating and burning the leaven was thus indicated:—'Two desecrated cakes of thanksgiving-offering were placed on a bench in the Temple; as long as they were thus exposed all the people ate leaven, when one of them was removed they abstained from eating but did not burn it, and when the other was removed all the people began burning the leaven' (*ibid.*, i. 5). It was on this day that every Israelite who was not infirm, ceremonially impure, uncircumcised, or who was on this day fifteen miles without the walls of Jerusalem (*Mishna, Pesachim*, ix. 2; Maimonides, *Hilchoth Korban Pesach*, v. 89), appeared before the Lord in Jerusalem with an offering in proportion to his means (Exod. xxiii. 15; Deut. xvi. 16, 17). Though women were not legally obliged to appear in the sanctuary, yet they were not excluded from it (1 Sam. i. 7; Luke ii. 41, 42). The Israelites who came from the country to Jerusalem to celebrate the Passover were gratuitously accommodated by the inhabitants with the necessary apartments (Luke xxii. 10-12; Matt. xxvi. 18); and the guests left in return to their hosts the skins

of the paschal lambs, and the vessels which they had used in their religious ceremonies (*Toma*, 12 a). It was, however, impossible to house all the pilgrims in Jerusalem itself, since the circumference of the city was little more than one league, and the number of the visitors was exceedingly great. Josephus tells us that there were 3,000,000 of Jews at the Passover A.D. 65 (*de Bell. Jud.* ii. 14. 3), and that at the Passover in the reign of Nero there were 2,700,000, when 256,500 lambs were slain (*ibid.*, vi. 9. 3),\* and most of them must therefore have encamped in tents without the walls of the town, as the Mohammedan pilgrims now do at Mecca. It is therefore not surprising that seditions broke out on these occasions, and that the Romans, fearing lest these myriads of pilgrims should create a disturbance, and try to shake off the foreign yoke when thus massed together, took all the precautionary measures of both force and conciliation during the festival (Joseph. *Antiq.* xvii. 9. 3; *de Bell. Jud.* i. 3, etc.; Matt. xxvi. 5; Luke xiii. 1).

The Offering of the Paschal Lamb.—Having selected the lamb, which was neither to be one day above a year nor less than eight days old (Maimonides, *Hilchoth Korban*, i. 12, 13)—being an extension of the law about firstlings and burnt-offerings (Exod. xxii. 30; Lev. xxii. 27)—and agreed as to the exact number of those who were to join for one lamb, the representatives of each company went to the temple. The daily evening sacrifice (Exod. xxix. 38, 39), which was usually killed at the eighth hour and a half (= 2.30 P.M.), and offered up at the ninth hour and a half (= 3.30 P.M.), was on this day killed at 1.30, and offered at 2.30 P.M., an hour earlier; and if the 14th of Nisan happened on a Friday, it was killed at 12.30, and offered at 1.30 P.M., two hours earlier than usual (*Mishna, Pesachim*, v. 1; Maimonides, *Hilchoth Korban Pesach*, i. 4). All the representatives of the respective companies were divided into three bands or divisions. 'The first division then entered with the paschal sacrifices, until the court of the temple was filled, when the doors of the court were closed, and the trumpets were sounded three times, differing in the notes (הַקֵּץ הָרִאשׁוֹן, הַקֵּץ הָאֶמְטָה, הַקֵּץ הַשְּׁלִישִׁי). The priests immediately placed themselves in two rows, holding bowls of silver and gold in their hands, i.e., one row holding silver bowls and the other gold ones. These bowls were not mixed up, nor had they stands underneath, in order that they might not be put down and the blood become coagulated. The Israelites themselves killed their own paschal sacrifices, the nearest priest caught the blood, handed it to his fellow-priest, and he again passed it on to his fellow-priest, each receiving a full bowl and returning an empty one, whilst the priest nearest to the altar sprinkled it in one jet towards

\* In confirmation of Josephus's statement, which has been impugned by sundry writers, it is to be remarked that ancient *Baraita*, preserved in *Tosefta Pesachim*, cap. iv. (*sub fin.*), and *Babylon Pesachim*, 64 b, relates as follows:—Agrippa was anxious to ascertain the number of the Jewish population. He therefore ordered the priests to put down the number of the paschal lambs, which were found to be 1,200,000; and as there was to every lamb a company of no less than ten persons ואין לך כל פסחופסח שלא היו עליו יותר מעשרה (יימון) the number of Jews must have been tenfold.

the base of the altar. Whereupon the first division went out, and the second division entered; and when the second again went out, the third entered; the second and third divisions acting in exactly the same way as the first. The Hallel was recited [HALLEL] the whole time, and if it was finished before all the paschal animals were slain, it might be repeated a second, and even a third time. . . . The paschal sacrifice was then suspended on iron hooks, which were affixed to the walls and pillars, and its skin taken off. Those who could not find a place for suspending and skinning it, had pieces of wood provided for them which they put on their own shoulders, and on the shoulders of their neighbour, and on which they suspended the paschal sacrifice, and thus took off its skin. When the 14th of Nisan happened on a Sabbath, on which it was not lawful to use these sticks, one of the offerers put his left hand on the right shoulder of his fellow-offerer, whilst the latter put his right hand on the shoulder of the former, whereon they suspended the paschal sacrifice, and took off its skin. As soon as it was opened, and the entrails to be sacrificed on the altar were removed (comp. Lev. i. 9; iii. 3-5), they were placed on a dish, and offered with incense on the altar. On the Sabbath, the first division, after leaving the court, remained on the Temple Mountain, the second between the ramparts (*i.e.*, the open space between the walls of the court of the women and the trellis-work in the temple, comp. *Mishna, Middoth*, ii. 3), whilst the third remained in its place. When it became dark, they all went out to roast their paschal sacrifices' (*Mishna, Pesachim*, v. 5-10). A spit, made of the wood of the pomegranate-tree, was put in at the mouth of the paschal lamb, and brought out again at its vent; it was then carefully placed in the oven so as not to touch its sides, lest the cooking should be affected (comp. Exod. xii. 9; 2 Chron. xxxv. 13), and if any part of it happened to touch the earthenware oven, it had to be pared off; or if the fat which dripped from it had fallen on the oven and then again fallen back on the lamb, the part so touched had also to be cut out (*Pesachim*, vii. 1, 2). If any one broke a bone of the paschal lamb, so as to infringe the command in Exod. xii. 46, he incurred the penalty of forty stripes (*Pesachim*, vii. 11). The bone, however, for the breaking of which the offender is to receive the stripes, must either have some flesh on it or some marrow in it, and he incurs the penalty even if some one has broken the same bone before him (Maimonides, *Hilchoth Korban Pesach*, x. 1, 3).

*The Paschal Supper.*—The paschal sacrifices having been taken to the respective abodes of the companies, and the meals prepared, the parties arranged themselves in proper order, reclining at ease on the left side, round the table. A cup of wine was filled for every one, over which the following benediction was pronounced:—'Blessed art thou, O Lord our God, King of the Universe, who hast created the fruit of the vine! Blessed art thou, O Lord our God, King of the Universe, who hast chosen us above all nations, and exalted us above all peoples, and hast sanctified us with thy commandments. Thou hast given us, O Lord our God, appointed seasons for joy, festivals and holydays for rejoicing, such as the feast of unleavened bread, the time of our liberation for holy convocation, to commemorate our exodus from Egypt. Yea, thou hast chosen us,

and hast sanctified us above all nations, and hast given us thy holy festivals with joy and rejoicing as an inheritance. Blessed art thou, O Lord, who hast sanctified Israel and the festivals! Blessed art thou, O Lord our God, King of the Universe, who hast preserved us, and kept us, and hast safely brought us to this period!' The cup of wine was then drunk, and a basin of water and a towel were handed round, or the celebrators got up to wash their hands (John xiii. 4, 5, 12), after which the blessing belonging thereunto was pronounced. A table was then brought in, upon which were bitter herbs and unleavened bread, *the Charoseth* (חרוסת), which was a compound, made with dates, raisins, and other fruits, with vinegar, to commemorate the lime, etc., with which the Jews were forced to labour in Egypt, the body of the paschal lamb, and the flesh of the *Chagiga* or feast offering. The president of the meal then took the herb, dipped it in the *Charoseth*, and, after thanking God for creating the fruits of the earth, he ate a piece the size of an olive, and gave a similar portion to each one reclining with him at the table (Matt. xxvi. 23; John xiii. 26). A second cup of wine was then poured out, and the son, in accordance with Exod. xii. 26, asked his father as follows:—'Wherefore is this night distinguished from all other nights? On all other nights we may eat either leavened or unleavened bread, but, on this night, unleavened bread only; on all other nights we may eat every kind of herbs, but, on this night, bitter herbs only; on all other nights we may eat meat either roasted, boiled, or cooked in different ways, but, on this night, we must eat roasted meat only; on all other nights we may dip once what we eat, but, on this night, twice! On all other nights we eat either sitting or reclining, but on this night, reclining only.' To which the father replied, 'Once we were slaves to Pharaoh in Egypt, but the Lord our God delivered us therefrom with a strong hand and outstretched arm. If the Holy One—blessed be he—had not delivered our fathers from Egypt, we and our children, and our children's children, might still be in Egyptian bondage; and although we may all be sages, philosophers, elders, and skilled in the Law, it is incumbent upon us to speak of the exodus from Egypt, and whoso dwells much on the exodus from Egypt is all the more to be praised.' The father then expounded Deut. xxvi. 5-12, as well as the import of the paschal sacrifice, the unleavened bread, and the bitter herbs; saying with regard to the latter, 'The paschal sacrifice is offered because the Lord passed over the houses of our ancestors in Egypt, in accordance with Exod. xii. 27; the unleavened bread is eaten because our ancestors were redeemed from Egypt before they had time to leaven their dough, and the bitter herbs are eaten because the Egyptians embittered the lives of our ancestors. It is therefore incumbent on every one, in all ages, to consider as though he had personally gone forth from Egypt, as it is said in Exod. xii. 27. We are therefore in duty bound to thank, praise, adore, glorify, extol, honour, bless, exalt, and reverence him who wrought all these miracles for our forefathers and for us; for he brought us forth from bondage to freedom. He changed our sorrow into joy, our mourning into a feast; he led us from darkness into a great light, and from servitude to redemption. Let us therefore sing in his presence Hallelujah!' The first part of the Hallel was then recited [HALLEL], *i.e.*, Ps. cxiii. and cxiv., and the

following blessing pronounced: 'Blessed art thou, O Lord our God, King of the Universe, who hast redeemed us, and redeemed our forefathers from Egypt,' etc. etc. A third cup of wine was then poured out, and the grace after meals was recited. After pouring out the fourth cup, the Hallel was finished (*i.e.*, Ps. cxv.-cxviii.), and the blessing of

the song (*i.e.* יהללוך and נשמת) was said (*Mishna, Pesachim*, x. 1-8; Maimonides, *Iad Ha-Chezaka Hilchoth Chomez U.-Maza*, viii. 1-3).

**15th of Nisan.**—On this day there was a holy convocation, and it was one of the six days on which, as on the Sabbath, no manner of work was allowed to be done; with this exception, however, that whilst on the Sabbath the preparation of the necessary articles of food was not allowed (*Exod.* xvi. 5, 23, 29; xxxv. 2, 3), on holy convocation it was permitted (*Exod.* xii. 16; *Lev.* xxiii. 7; *Num.* xxviii. 18). The other five days on which the Bible prohibits servile work are the seventh day of this festival, the day of Pentecost, New Year's day, and the first and last days of the feast of Tabernacles. The needful work which was lawful to be done on these days is defined by the Jewish canons to be such as killing beasts, kneading dough, baking bread, boiling, roasting, etc.; but not such work as may be done in the evening of a fast-day, as, for instance, reaping, thrashing, winnowing, or grinding; whilst servile work is building, pulling down edifices, weaving, etc. If any one engaged in servile work he was not to be stoned to death, as in the case of violating the Sabbath (*Num.* xv. 32, 35), but received forty stripes save one (Maimonides, *Iad Ha-Chezaka Hilchoth Iom Tob*, i. 1, etc.) In addition to the daily ordinary sacrifices, there were offered on this day and on the following six days, two young bullocks, a ram, and seven lambs of the first year, with meat-offerings for a burnt-offering, and a goat for a sin-offering (*Num.* xxviii. 19-23). Besides these public sacrifices, there were the voluntary offerings which were made by every private individual who appeared before the Lord in Jerusalem, in accordance with the injunction in *Exod.* xxiii. 15; *Deut.* xvi. 16. The Jewish canons ordained that this free-will offering from every attendant at the sanctuary (*רציה*) was to be a three-fold one: 1. A burnt-offering of not less in value than one *meah* silver = 16 grains of corn; 2. A festive-offering, called *Chagiga* (*חגיגה*), of not less value than two *meahs* = 32 grains of corn; and 3. A peace or joyful offering (*Deut.* xxvii. 7), the value of which was entirely left to be determined by the good-will of the offerer, according to *Deut.* xvi. 16. The two last were alike denominated *Peace-offerings*. They were generally offered on the first day of the festival, and if any one failed to bring them on this day they might be brought on any other day of the festival; but if they were neglected during the festival, they could not be offered afterwards (*Chagiga*, i. 6; Maimonides, *Hilchoth Chagiga*, i. 4, 5). Those who contracted any legal impurity were not allowed to offer the *Chagiga* (*Mishna, Pesachim*, vi. 3). The victim, which might be taken either from the flock or the herd, and might be either a male or female, had to be without blemish, and was slain in the court of the sanctuary by the offerer, who laid his hand upon its head. The blood was sprinkled on the altar, the inside fat, with the kidneys, was burned by the

priests, who took the breast as a wave-offering, and the right shoulder as a heave-offering (*Lev.* iii. 1-5; vii. 29-34), whilst the remainder belonged to the offerer, who might eat it with his guests during two days and one night; but if any portion of it was left till the third day after the animal was slain, it had to be burned (*Lev.* vii. 16-18; *Mishna, Pesachim*, vi. 4). The *Chagiga* could not be offered on a Sabbath, but it might be slain on the fourteenth of Nisan, if the paschal lamb was insufficient for the number of those who fixed to eat it (*Pesachim*, vi. 3).

**16th of Nisan.**—On the 16th, or the day after the holy convocation, called '*the morrow after the Sabbath*,'\* the omer (*עומר*, *τὰ δράγματα*, *munipulus epicarum*) of the first produce of the harvest was brought to the priest, to be waved before the Lord in accordance with the injunction in *Lev.* xxiii. 10-14—which was of barley, being the grain which ripened before the wheat (*Exod.* ix. 31, 32; 2 *Sam.* xxi. 9; *Ruth* ii. 23; 2 *Kings* iv. 42; *Manachoth*, 84 a). The omer had to be from the best and ripest standing corn of a field near Jerusalem. The measure of an omer had to be of the meal obtained from the barley offering. Hence three *seahs* = one *ephah*, or ten omers, were at first gathered in the following manner:—'Delegates from the Sanhedrim went [into the field nearest to Jerusalem] a day before the festival, and tied together the ears in bundles, whilst still fastened to the ground, so that they might easily be cut. [On the afternoon of the 16th] the inhabitants of the neighbouring towns assembled together that the reaping might take place amidst great tumult. As soon as it became dark, each of the reapers asked, Has the sun gone down? To which the people replied, Yes. He asked again, Has the sun gone down? To which the people again replied, Yes. Each reaper then asked, Is this the scythe? To which the people replied, Yes. Is it the scythe? Yes, was again the reply. Is this the box? Yes, they replied. Is it the box? Yes, was again the reply. Is this Sabbath? Yes, it is Sabbath, they replied. Is it the Sabbath? Yes, this is the Sabbath, was again the reply. Shall I cut? Yes, cut, they replied. Shall I cut? Do cut, they again replied. Every question was asked three times, and the people replied to it each time. This was done because of the Boëthuseans (*ביתוסים*), who maintained that the reaping of the omer was not to be at the exit of the festival. When cut it was laid in boxes, brought into the court of the temple, thrashed with canes and stalks, that the grains might not be crushed, and laid on a roast with holes, that the fire might touch each grain; it was then spread in the court of the temple for the wind to pass over it, ground in a barley-mill [which left the hulls unground]. The flour thus obtained was sifted through thirteen different sieves [each one finer than its predecessor], and in this manner was the prescribed omer, or tenth part, got from the *seah*. The residue was redeemed and could be used by every one. They mixed the omer of meal with a log [= half a pint] of oil, put on it an handful of frankincense (*Lev.* ii. 15), as on other meat-offerings, waved it, took a handful of it, and caused it to ascend in smoke (*ibid.* ii. 16), and the residue was

\* The meaning of the phrase מחרת השבת is discussed in the article PENTECOST, THE FEAST OF.

eaten by the priests.' Immediately after the ceremony, bread, parched corn, green ears, etc. etc., of the new crop were exposed for sale in the streets of Jerusalem, as prior to the offering of the omer no use whatever was allowed to be made of the new corn (*Mishna, Menachoth*, x. 2-5; Maimonides, *Iad Ha-Chesaka, Hilchoth Tamidin U-Mosaphin*, vii. 4-21; comp. also Josephus, *Antiq.* iii. 10. 5). From this day the fifty days began to be counted to the day of Pentecost (Lev. xxiii. 15).

*17th to 20th of Nisan.*—From the 17th to the 20th was half-holyday (חול המועד), called *the middle days of the festival*, or *the lesser festival* (מועד קטן), which had already commenced with the 16th. The people either left Jerusalem and returned to their respective homes, or remained and indulged in public amusements, as dances, songs, games, etc., to fill up the time in harmony with the joyful and solemn character of the festival. The work allowed to be done during the middle days of the festival was restricted to irrigating dry land, digging water-courses, repairing conduits, reservoirs, roads, market-places, baths, whitewashing tombs, etc. etc. Dealers in fruit, garments, or in utensils, were allowed to sell privately what was required for immediate use. Whatever the emergencies of the public service required, or was necessary for the festival, or any occupation the omission of which might cause loss or injury, was permitted. Hence no new graves were allowed to be dug, nor wives espoused, nor houses, slaves, or cattle purchased, except for the use of the festival. Mourning women, though allowed to wail, were not permitted to clap their hands together. The work allowed to be done during these days of the festival is strictly regulated by the Jewish canons contained in *the Mishna, Moed Katon*. In the temple, however, the additional sacrifices appointed for the festival were offered up, only that the lesser *Hallel* was now recited and not *the Great Hallel*.

*21st of Nisan.*—On the last day of the festival, as on the first, there was again a holy convocation. It was in all respects celebrated like the first day, only that it did not commence with the paschal meal.

*The Second or Little Passover.*—According to the injunction in Num. ix. 9-12, any one who was prevented by legal impurity, or by being at too great a distance from Jerusalem, from celebrating the regular Passover on the eve of the 14th of Nisan, was obliged to keep it on the 14th of the following month. This is called by the ancient Jewish tradition *the Second or the Little Passover* (פסח קטן), and the Jewish canons also add, most justly, that those who have been prevented from observing the first or ordinary Passover through error or compulsory force, are likewise bound to keep the second Passover. The difference between the two Passovers is thus summed up in these canons:—*i.* In the case of the First Passover no leaven was to be seen or found in the house, the paschal sacrifice could not be offered with leaven, no piece thereof was allowed to be removed from the house in which the company ate it, the *Hallel* had to be recited at the eating thereof, the *Chagiga* had to be brought with it, and it might be offered in uncleanness in case the majority of the congregation contracted it by contact with a corpse; whilst in the case of the Second

Passover, both leavened and unleavened bread might be kept with it in the house, the *Hallel* had not to be recited at the eating of it, portions thereof might be removed from the house in which the company ate it, no *Chagiga* was brought with it, and it could not be offered under the above-named legal impurity' (*Mishna, Pesachim*, ix. 3; Maimonides, *Hilchoth Korban Pesach*, x. 15).

C. THE MANNER IN WHICH THE PASSOVER IS CELEBRATED IN THE PRESENT DAY.—With the exception of those ordinances which were legal, and belonged to the Temple, and the extension and more rigid explanation of some of the rites, the Jews to the present day continue to celebrate the feast of Passover as in the days of the second Temple. Several days before the festival all the utensils are

cleansed (הנעלת כלים); on the eve of the 13th of Nisan the master of the family, with a wax candle or lamp in his hand, searches most diligently into every hole and crevice throughout the house, lest any crumb of leavened bread should remain in the premises (בריקת חמץ). Before the search commences he pronounces the benediction, and after this he recites the formal renunciation of all leaven given in the former part of this article. On the 14th of Nisan, the Preparation Day (ערב פסח), all the first-born males above thirteen years of age fast in commemoration of the sparing of the Jewish first-born at the time when all Egypt's first-born were destroyed. On this evening the Jews put on their festive garments, resort to the synagogue, and offer up the prayers appointed for the occasion, after which they return to their respective homes, where they find the houses illuminated and the tables spread. Three of the thin, round, and perforated unleavened cakes, which are made of wheat flour, resembling the oatmeal bread made in Scotland, and which are eaten during the whole of the Passover week, are put on a plate, wrapped up in a napkin in such a manner as to be separated from each other, though lying one above the other. These three cakes represent the division of the Jews into the three orders, viz., Priests, Levites, and Israelites [HAPHTARA]. A shank-bone of a shoulder of lamb, having a small bit of meat thereon roasted on the coals to commemorate the paschal lamb, and an egg roasted hard in hot ashes, to signify that it was to be roasted whole, are put on another dish; the bitter herbs are on a third dish, whilst *the Charoseth* (חרוסת), in remembrance of the bricks and mortar which the Israelites made in Egypt, and some salt water or vinegar in memory of their passage through the Red Sea, are put in two cups. When all the family have sat round the table, including the servants, to remind them that they were all alike in bondage and should equally celebrate their redemption; and when the paterfamilias, arrayed in his death-garments, has reclined at the head of the table to indicate the freedom of Israel, the following order is gone through—*i.* (קריש) Each one has a cup of wine, over which they all, standing up and holding their respective cups in their hand, pronounce the blessing for the juice of the grape, welcome the festival, and drink the first cup leaning on the left side; *ii.* (רחץ) Whereupon the head of the family washes his hands; *iii.* (כרפס) Takes the parsley or servil, dips it into the salt water, and hands it round to every one at the table, pronouncing the following benediction:—

'Blessed art thou, O Lord our God, King of the Universe, who hast created the fruit of the earth;' *iv.* (יִחַד) He then breaks in two the middle of the three unleavened cakes on the dish, conceals one half for an after dish (אֲפִיקֶמָן=*epikema*), leaves the other half on the dish; *v.* (מִנִּיר) He then uncovers the unleavened cake, takes the egg and the bone of the lamb from the dish, holds them up and says, 'Lo! this is the bread of affliction which our forefathers ate in the land of Egypt. Whosoever is an hungry let him come and eat with us, whosoever is needy let him come and celebrate with us the Passover! This year we are here, next year we shall be in the land of Israel; this year we are servants, next year we shall be free children!' The second cup is then filled, and the son asks the father the meaning of this festival, who replies to him in the manner described above. Having given a summary of the Egyptian bondage, and the deliverance therefrom, they all, lifting up the cup, exclaim, 'Therefore it is our duty to give thanks,' etc. etc. The cup is then put down, the unleavened cakes covered, and the first part of the *Hallel* is recited. The unleavened cakes are again uncovered, the cups of wine taken up, and the following benedictions are pronounced: 'Blessed art thou, O Lord our God, King of the Universe, who hast redeemed us and redeemed our forefathers from Egypt, and preserved us this evening to eat thereon unleavened bread and bitter herbs. Let us thus, O Lord our God, and our fathers' God, also peacefully reach other festivals and holy days, to which we look forward! Cause us to rejoice in the rebuilding of thy city, and to be joyful in thy service, so that we may there eat of the thanksgiving offering, and the paschal sacrifices, whose blood was sprinkled on the sides of thine altar as an acceptance. Then shall we sing unto Thee a new song for our redemption and deliverance. Blessed art thou, O Lord, who redeemeth Israel!' The blessing over the second cup is then pronounced and the wine drank, whereupon each one washes his hands and says, 'Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments, and enjoined us to wash the hands!' The master of the family takes up all the three unleavened cakes together in the order in which they are arranged, pronounces the following blessing over the uppermost cake, 'Blessed art thou, O Lord our God, King of the Universe, who bringest forth food from the earth!' and then pronounces the blessing for eating unleavened bread over the middle broken cake, which is as follows:—'Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy commandments and enjoined us to eat unleavened cakes!' He then breaks off a piece from the upper whole cake, and a piece from the half central cake, dips them in salt, and eats the two pieces in a reclining position. He then takes some of the bitter herbs, dips them in the *Charoseth*, pronounces the blessing over them, distributes them all round, and they eat them, not reclining. The master then takes a piece from the undermost cake and some of the bitter herbs, and eats them in a reclining position, saying, 'In remembrance of the Temple according to Hillel! Thus Hillel did at the time when the Temple still existed. He wrapped up unleavened cakes with bitter herbs and ate them together, in order to perform what is said, It shall be eaten with unleavened cakes and bitter herbs.' This concludes

the first part of the ceremony, and the supper (שֻׁלְחַן עֹרֵךְ) is now served. After the supper the master takes the half cake, which has been concealed (נֶפֶס) for the after-dish (אֲפִיקֶמָן), eats thereof the size of an olive, and gives each one of the household a similar piece; whereupon (בִּרְךְ) the third cup is filled, the usual grace after meals is said, the blessing over the fruit of the vine is pronounced, and the third cup drunk in a reclining position. A cup of wine is now poured out for the prophet Elijah, when profound silence ensues for a few seconds; then the door is opened for this harbinger of the Messiah to enter, and the following passages of Scripture are recited at the moment when he is expected to make his appearance:—'Pour out thy wrath upon the heathen that have not known thee, and upon the kingdoms that have not called upon thy name, for they have devoured Jacob and laid waste his dwelling-place (Ps. lxxix. 6, 7). Pour out thine indignation upon them, and cause thy fierce anger to overtake them—pursue them in wrath, and destroy them from under the heavens of the Lord' (Lam. iii. 66). The fourth cup is then filled and the *Hallel* is finished, pieces are recited which recount the power and goodness of God, the wonderful things which he wrought at midnight in Egypt, and in connection with the passover; the blessing is pronounced over the fourth cup, which is drunk, and after which the following last blessing is said: 'Blessed art thou, O Lord our God, King of the Universe, for the vine and for the fruit of the vine, and for the increase of the field, and for that desirable good and broad land wherein thou hast pleasure, and which thou hast given to our forefathers as an inheritance, to eat of its fruit and be satisfied with its goodness. Have mercy, O Lord our God, on Israel thy people, on Jerusalem thy city, on Zion the habitation of thy glory, on thine altar. Rebuild Jerusalem the holy city speedily in our days, bring us back to it, cause us to rejoice in it, that we may eat its fruit, be satisfied with its goodness, and we shall bless thee for it in holiness and purity. Cause us to rejoice on this day, the feast of unleavened bread, for thou, O Lord, art good and gracious to all. We will therefore praise thee for the land and the fruit of the vine. Blessed art thou, O Lord, for the land and for the fruit of the vine!' The whole is concluded with the singing of the soul-stirring Paschal Hymn.

He is mighty, He will rebuild His house speedily; Quickly, quickly in our days, speedily God build, God build, O build thy house speedily; etc. etc.

The same service is gone through the following evening, as the Jews have doubled the days of holy convocation, for the reason given in the article FESTIVALS in this Cyclopaedia. In the morning and evening of the festive week the Jews resort to the synagogue and recite the prayers appointed for the feasts. The lessons from the law and prophets read on the days of holy convocations, as well as on the middle days of the festival, are given in the article HAPHTARA. It must be remarked, that in accordance with the injunction in Lev. xxiii. 10, 11, 15, 16, the Jews to the present day begin to count the forty-nine days until Pentecost at the conclusion of the second evening's service, when they pronounce the following benediction:—'Blessed art thou, O Lord our God, King of the Universe, who hast sanctified us with thy command-

ments, and hast enjoined us to count the omer! This day is the first day of the omer. May it please thee, O Lord our God, and the God of our fathers, to rebuild the sanctuary speedily in our days, and give us our portion in thy law!

4. *Origin and Import of the Feast of Passover.*—That the feast of Passover was instituted to commemorate the deliverance of the Israelites from Egypt will be admitted by all who give credence to the historical veracity of the Pentateuch. Its institution, however, to commemorate this great historical fact by no means precludes the idea that a festival, of somewhat similar rites, was celebrated by the Jews at this season, in common with other nations of antiquity, containing a reference to the annual course of nature. Indeed, when the first appeal was made to Pharaoh to let the Israelites go, it was that they might celebrate an approaching festival (Exod. iii. 10; v. 1). Moreover, it is a well-known fact that all the eastern nations who were dependent upon the course of the sun, celebrated two principal annual festivals referring to the seasons—viz., the spring festival, at the time when the sun *passes over* (פסח) into the sign of Aries, and when the corn began to ripen; and the other, the autumn festival, when the last fruits were gathered in, which is identical with the feast of Tabernacles (סוכות). We are told that, since the time of this spring festival was both an occasion of gratitude and anxiety—inasmuch as not only was the barley gathered, but it decided the fertility or the barrenness of the year—the spring festival was celebrated in a double manner:—i. As a token of gratitude, the fresh grains of barley were quickly ground into flour, bread made of the dough at once, before it had time to leaven, and thus offered; and ii. As an expression of anxiety, and of a desire to conciliate the divine favour, an expiatory sacrifice was offered for the transgressions of the past year. Indeed Epiphanius declares (*Adv. Har.* cap. xix. 3) that the Egyptians on this occasion marked their sheep with red, because of the general conflagration which once raged at the time when the sun passed over into the sign of Aries, thereby to symbolize the fiery death of those animals which were not actually offered up; whilst Von Bohlen assures us that the ancient Peruvians marked with blood the doors of the temples, royal residences, and private dwellings, to symbolize the triumph of the sun over the winter (*Altes Indien*, i. 140; also by the same author, *General Introduction to the Pentateuch*, p. 140; Kalisch, *Commentary on Exodus*, p. 184; Ewald, *Die Alterthümer*, p. 390). Now, it is admitted that two of the three great Jewish festivals—viz., Pentecost and Tabernacles—refer to the annual course of nature [FESTIVALS], and that the festival of New Moon, which existed prior to the Mosaic legislation, was introduced by the inspired legislator into the cycle of Jewish festivals [NEW MOON, FEAST OF THE]. There can therefore be no difficulty in admitting that the third festival was also celebrated in the patriarchal age as a barley harvest festival, which is indicated by the very name, Abib (אֲבִיב), of this month, and that God in his infinite wisdom and goodness chose to redeem Israel at the time of this festival, and thus connected with the celebration of the regeneration of nature the celebration of the birth of the nation (Is. xliii. 1, 15-17; Ezek. xvi. 4; Hos. ii. 5), superadding thereunto rites and ceremonies commemorative of the historical event, as well as

assigning to some already existing ceremonies a spiritual and original significance. This explains the fact why the unleavened bread, which was undoubtedly connected with sacrifices before the institution of the Passover, and which was enjoined to be eaten with the paschal sacrifices, without giving to it any significance in the original ordinance (Exod. xii. 1-20), was *afterwards* made to symbolise the haste in which the children of Israel had to leave Egypt (Exod. xii. 34; Deut. xvi. 3). That the unleavened bread could not from the first have been the symbol of the fact that there was no time for the dough to leaven (Exod. xii. 33, 34, 39), is evident from Exod. xii. 8, 15, where the Israelites were commanded to eat unleavened bread *before* their departure, and when there was plenty of time for the dough to leaven. Moreover, the fact that this primæval festival has been divested of many old superstitions, and invested with new ideas of a most exalting tendency, in being made to commemorate the exodus as well as the barley harvest, sets aside the arguments brought against the possibility of its having been celebrated at the exodus, inasmuch as the people were quite prepared for the celebration, as far as arrangements and cattle were concerned.

5. *Literature.*—The *Mishna*, Tractates *Pesachim*, *Chagiga*, and *Moed Katon*; and the *Talmud* or *Gemara* on these Tractates; Maimonides, *Iad Ha-Chetzaka*, *Hilchoth Chamez U-Maza*; *Hilchoth Korban Pesach*., and *Hilchoth Chagiga*; Lightfoot, *The Temple Service*, cap. xii.-xiv. pp. 951, 961, vol. i. folio edition; Meyer, *De tempp. sacris Hebræorum*, p. 278, seq.; Bähr, *Symbolik des Mosaischen Cultus*, ii. 613, ff., 627, ff.; Saalschütz, *Das Mosaische Recht*, Berlin 1853, p. 406, ff.; Ewald, *Die Alterthümer des Volkes Israel*, Göttingen 1854, p. 390, ff.; Kalisch, *Historical and Critical Commentary on Exodus*, p. 178, etc.; Keil, *Handbuch der biblischen Archäologie*, p. 380, ff.; Knobel, *Die Bücher Exodus und Leviticus*, pp. 91, ff., 532, ff.; *The Jewish Ritual*, entitled *Derech Ha-Chajim*, Vienna 1859, p. 233, ff.; Landshuth, *Hagada Vortrag für die beiden Pessachabende*, which contains a masterly dissertation on the respective ages of the different portions constituting the Passover service, written in Hebrew by the editor, and a valuable treatise on the bibliography of the Passover service, written in German by the erudite Steinschneider.—C. D. G.

PASTURAGE. In the first period of their history the Hebrews led an unsettled pastoral life, such as we still find among many Oriental tribes. One great object of the Mosaic polity was to turn them from this condition into that of fixed cultivators of the soil. Pasturage was, however, only discouraged as a *condition of life* unfriendly to settled habits and institutions, and not as a pursuit connected with agriculture. Hence, although in later times the principal attention of the Hebrews was given to agriculture, the tending of sheep and cattle was not at any time neglected.

The shepherds who move about with their flocks from one pasture-ground to another, according to the demands of the season, the state of the herbage, and the supply of water, are called *nomads*—that is, not merely *shepherds*, but *wandering shepherds*. They feed their flocks on the 'commons,' or the deserts and wildernesses, which no settled or cultivating people have appropriated. At first, no

pastoral tribe can have any particular property in such tracts of ground in preference to another tribe; but, in the end, a particular tract becomes appropriated to some one tribe, or section of a tribe, either from long occupation, or from digging wells therein. According to the ideas of the East, the digging of a well is so meritorious an act, that he who performs it acquires a property in the waste lands around. In the time of the patriarchs, Palestine was but thinly peopled by the Canaanites, and offered many such tracts of unappropriated grounds fit for pasturage. In these they fed their flocks, without establishing any exclusive claims to the soil, until they proceeded to dig wells, which, being considered as an act of appropriation, was opposed by some of the inhabitants (Gen. xxi. 25, 26). After the conquest of Canaan, those Israelites who possessed large flocks and herds sent them out, under the care of shepherds, into the 'wildernesses,' or commons, of the east and south, where there are rich and juicy pasturages during the moist seasons of the year (1 Sam. xvii. 28; xxv. 4-15; 1 Chron. xxvii. 29-31; Is. lvi. 10; Jer. l. 39). The nomads occupy, successively, the same stations in the deserts every year. In summer, when the plains are parched with drought, and every green herb is dried up, they proceed northwards, or into the mountains, or to the banks of rivers; and in winter and spring, when the rains have re-clothed the plains with verdure, and filled the watercourses, they return. When these pastors remove, they strike their tents, pack them up, and convey them on camels to the next station. Nearly all the pastoral usages were the same, anciently, as now. The sheep were constantly kept in the open air, and guarded by hired servants, and by the sons and daughters of the owners. Even the daughters of emirs, or chiefs, did not disdain to tend the sheep (Gen. xxiv. 17-20; xxix. 9; Exod. ii. 16). The principal shepherd was responsible for the sheep intrusted to his care, and if any were lost he had to make them good, except in certain cases (Gen. xxxi. 39; Exod. xxii. 12; Amos iii. 12). Their services were often paid by a certain proportion of the young of the flock (Gen. xxx. 30). On the more dangerous stations, towers were erected, from which the approach of enemies might be discovered. These were called the Towers of the Flock (Gen. xxxv. 21; 2 Chron. xxvi. 10; Micah iv. 8).—J. K.

PATARA (Πάρα), a town of Lycia in Asia Minor, situated on the sea-coast. The Apostle Paul visited it on his journey from Greece to Syria. His itinerary is given with great minuteness by Luke (Acts xx.) From Miletus he went by Coos and Rhodes to Patara, where he found a ship sailing to Phœnicia, and embarked in it (xxi. 1). Patara was a very ancient city, and is said to have been founded by Patarus (Strabo xiv. 3, p. 665), a son of Apollo (Steph. Byz., s. v.). It was already celebrated in the time of Herodotus for a temple and oracle of this deity (i. 182). It appears to have been colonised by the Dorians. Strabo tells us that Ptolemy Philadelphus repaired it, and called it the Lycian Arsinoe, but its old name was retained (l. c.). At the time of Paul's visit it must have been a splendid as well as an influential and populous city. Some of its ruins are of great extent and beauty; and Livy, speaking of Lycia, calls Patara

'caput gentis' (xxxvii. 15; cf. Pomp. Mel. i. 15; Polyb. xxii. 26).

In sailing from Rhodes to Patara, Paul had before him some of the grandest scenery in the east. The western extremity of the Taurus range descends from a serried line of snow-crowned peaks, in a series of rugged cliffs and wooded slopes, till at length it dips its rocky base in the Mediterranean. Crossing the channel from the little harbour of Rhodes, the vessel would skirt for a time the bold coast, and then, passing a noble headland, it would open up the rich valley of the Xanthus, and the little plain at its mouth, which extends some eight miles along the shore, and six or seven inland. Near the eastern extremity of this plain stood Patara, close upon the beach, separated from the river Xanthus by a broad belt of drift sand, which the wind and waves have drifted up into bleak mounds and hills. The site of the city is now a desert; many of its principal buildings are almost covered with sand; and its harbour, into which Paul sailed, and which was the port of the great city of Xanthus (Appian, B. C. iv. 81), is now a dismal, pestilential marsh. The walls of Patara can still be traced. The triple arch of one of its gates is standing; so also are the remains of a theatre scooped out in the side of a hill (Leake, *Asia Minor*, p. 320); of baths near the sea; of an old castle commanding the harbour; and of temples, altars, columns, and houses, now ruined and mutilated. A Greek inscription over the great city gateway mentions 'Patara the metropolis of the Lycians' (Fellows, *Lycia*, pp. 222, seq.; Beaufort, *Karmania*, pp. 2, seq.; Spratt and Forbes, *Travels in Lycia*, i. pp. 30, seq., ii. 189). The desolate ruins now bear the same name. St. Paul did not remain long at Patara; he probably left a few hours after his arrival; yet Christianity obtained a footing in the city, and it subsequently became the seat of a bishop, and was represented in the Council of Nice (*Car. a St. Paul. Geol. Sac.* p. 239).—J. L. P.

PATMOS (Πάτμος), a rocky and bare island of the Ægean Sea, about fifteen miles in circumference, and reckoned as one of the Sporades (Plin. *Hist. Nat.* iv. 23; Strabo x. 480). On account of its stern and desolate character, the island was used, under the Roman empire, as a place of banishment, which accounts for the exile of John the Baptist 'for the testimony of Jesus' (Rev. i. 9) [JOHN]. He was here favoured with those visions which are contained in the Apocalypse, and to which the place owes its Scriptural interest. The external aspect of the island, as viewed from the sea, and the associations connected with it, are neatly indicated by the Scottish Deputation (*Narrative*, p. 326):—'We saw the peaks of its two prominent hills, but our course did not lie very near it. Still it was intensely interesting to get even a glance of that memorable spot where the beloved disciple saw the visions of God; the spot, too, where the Saviour was seen, and his voice heard, for the last time till he comes again. John's eye often rested on the mountains and the islands among which we were passing, and on the shores and waves of this great sea; and often, after the vision was passed, these natural features of his place of exile would refresh his spirit, recalling to his mind how 'he stood on the sand of the sea' (Rev. xiii. 1), and how he had seen that 'every

island fled away, and the mountains were not found' (Rev. xvi. 20).

On approaching the island the coast is found to be high, and to consist of a succession of capes, which form so many ports, some of which are excellent. The only one in use is, however, a deep bay, sheltered by high mountains on every side but one, where it is protected by a projecting cape. The town attached to this port is situated upon a high rocky mountain, rising immediately from the sea; and this, with the Scala below upon the shore, consisting of some shops and houses, forms the only inhabited site of the island. The best and most recent account of this island is that of Schubert in his *Reise nach Morgenland*, iii. 424-442.

Patmos is deficient in trees, but abounds in flowering plants and shrubs. Walnuts and other fruit trees are grown in the orchards; and the

wine of Patmos is the strongest and best-flavoured of any in the Greek islands. Maize and barley are cultivated, but not in a quantity sufficient for the use of the inhabitants, and for the supply of their own vessels and others which often put in at the great harbour for provisions. The island now bears the names of Patino and Palmosa, and the inhabitants do not exceed 4000 or 5000, many of whom are immigrants from the neighbouring continent. About half way on which, whereon the town is built, is shown a natural grotto in the rock, where St. John is supposed to have seen his visions, and to have written the Revelation. In and around it is a small church, connected with which is a school or college, where the ancient Greek literature is said to be well taught and understood. On the top of the mountain, and consequently in the middle of the town, is a monastery, which, from its situation, has a very

425. Patmos.

majestic appearance. It was built by Alexius Comnenus, and in the library are a great many printed books and manuscripts. The latter have been examined and described by Dr. Clarke and Professor Carlisle. See also Turner, *Journal of a Tour*, iii. 98-101, and Schubert, *Reise ins Morgenland*, iii. 424-434.

**PATRIARCH** (πατριάρχης). The meaning of the word is 'head of a family or tribe.' It is compounded of πατριὰ (a race, family) and ἀρχή (the beginning). St. Paul (Eph. iii. 15) calls attention to the fact that the title of πατριὰ comes from Πατήρ, 'the great Father of all the πατριαι both of angels and men' (Ellicott); and thus, constructively, 'Patriarch' in its highest sense, is a title of him whose offspring all men are. In common use it is applied to those 'chief of the fathers' (רִאשֵׁי הַאֲבוֹת, 2 Chron. xxvi. 12) to whom later genera-

tions in ancient days looked up as the founders or leading men of their respective families. Thus, in the N. T., not only are Abraham and the sons of Jacob called patriarchs, but David also (Acts ii. 29); and the word has been adopted in the Christian church as the designation of its highest spiritual rulers.

By the *patriarchal state* is meant that condition of life, both civil and religious, in which all mankind lived from the period of their first increase to that of their first great dispersion; and in which afterwards, more especially Abraham, Isaac, Jacob and his descendants, lived, down to the time when the Israelites became slaves to the Egyptians. Thus the period embraced extends over about 2300 years, and is covered by the narrative in the book of Genesis. In dealing with a subject thus extended, it will be desirable to sketch first the condition of the *Antediluvian Patriarchs*. We find Adam and Eve driven out of Paradise, and having their

first child, Cain, born to them, without any more exact indication of their whereabouts in the world than may be derived from what had been said already of Paradise itself. Nor, up to the deluge, is there any landmark supplied, except that mention is made of Nod, the country of Cain's wandering, to the east of Eden (Gen. iv. 16). The ark itself, which had probably, from its construction, not floated very far from the country in which it was built, rests on the mountains of the region of Ararat : and when, after the flood, men arrive in the land of Shinar or Babylonia, they have journeyed from the East (Gen. xi. 2). If at the flood the waters of 'the great deep' were those of the Persian Gulf, we might suppose the country inhabited by the patriarchs at that time to have possibly been bounded eastward by the nearest range of mountains, and to have extended to the west but little beyond the valley of the Euphrates.

As to their numbers, we have for our guide the enumeration of ten males in one direct line from Adam, through Seth, to Noah, and of eight through Cain to Jabal.

The age to which these patriarchs attained is proverbial. In this more than in anything are they distinguished from ourselves. The youngest whose death is recorded (Lamech), reached 777 years, and the longest liver attained to 969. Nor is this the only particular in which their natural constitution was different from our own. We have the record of the date at which each of ten of these patriarchs became the father of his eldest son, and in no case was the parent of less age than sixty-five years.

The following table is copied from Archdeacon Wordsworth's *Commentary on Genesis and Exodus*.

PATRIARCHS.	HEBREW TEXT.			SAMARITAN TEXT.			SEPTUAGINT VERSION.		
	Years before birth of Son.	Rest of Life.	Extent of whole Life.	Years before birth of Son.	Rest of Life.	Extent of whole Life.	Years before birth of Son.	Rest of Life.	Extent of whole Life.
1. Adam . . .	130	800	930	130	800	930	230	700	930
2. Seth . . .	105	807	912	105	807	912	205	707	912
3. Enos . . .	90	815	905	90	815	905	190	715	905
4. Cainan . . .	70	840	910	70	840	910	170	740	910
5. Mahalaleel . . .	65	830	895	65	830	895	165	730	895
6. Jared . . .	162	800	962	62	785	847	162	800	962
7. Enoch . . .	65	300	365	65	300	365	165	200	365
8. Methuselah . . .	187	782	969	67	653	720	187	782	969
9. Lamech . . .	182	595	777	53	600	653	188	565	753
10. Noah . . .	500	—	950	500	—	950	500	—	950

There is, of course, nothing to forbid us supposing that many other children were born besides those enumerated. This indeed is taken for granted in the case of women. The names of the wives are not mentioned, until the case of Lamech, who appears to have been the first polygamist, brings them into unenviable notice ; and Cain found a wife, though we have no notice of any woman having as yet been born into the world (see also Gen. v. 4).

When we endeavour to picture to ourselves the sort of life which these first patriarchs led, we seem invited to think of them as wearing at first coats of skins (Gen. iii. 21), and at a later time probably some woven garment (Gen. ix. 23), tilling the ground (Gen. iv. 2), keeping sheep (*ib.*), building cities (Gen. iv. 17), and in later times handling the harp and organ, and working in brass and iron (Gen. iv. 21, 22). But the great proof of the acquaintance of the primeval patriarchs with mechanical arts is to be found in the construction of the ark itself, which, from its enormous dimensions, must have made huge demands both upon the architect himself and the numerous workmen employed by him.

As regards their *spiritual condition*, there is enough to prove that their knowledge of God was intimate, and their trust in God eminently real. But by the knowledge of God must not be understood such knowledge as consists in accurate theological definition. The reformer Bullinger says : 'Out of all this it is easy to understand what faith

and knowledge Adam had of our Lord Christ ; namely, that he knew in him very Godhead and manhood, and that he saw in faith his passion and cross afar off' (The Old Faith). He even attributes to the 'holy fathers' the teaching of the doctrine 'that the Father, the Son, and the Holy Ghost are one God in the most reverend Trinity' (First Decade). Doubtless the first intimations of a Mediator were such as to include within them all subsequent revelation, but there is nothing to show that they were so understood by those who then received them. At the same time God did reveal himself to Adam, to Enoch, and to Noah, as well as to Abraham afterwards, and perhaps to many others. 'The traditional knowledge concerning a promised Mediator was no doubt carefully cherished, and served to enlighten much, which in the law, and even in the prophets, might have been otherwise unintelligible. And hence the Mediator, though but faintly shadowed out, was yet firmly believed in. We have our Lord's assurance, that 'Abraham rejoiced to see his day ; he saw it, and was glad' (John viii. 56). We have St. Paul's assurance that the same Abraham, having received the promise of the Redeemer, believed in it, and was justified by faith (Rom. iv. 1-20 ; Gal. iii. 6-9, 14-19). And we may well suppose that the faith which guided Abraham, guided others, both before and after him' (Bp. Browne on Art. vii.) Then as to their knowledge of a future state, we have (Gen. v. 24) a statement concerning Enoch which seems

to show that the antediluvian patriarchs were familiar with the idea of a better life than the present. It has been argued that the very brevity and obscurity of the phrase 'God took him,' prove this familiarity. His being 'taken' was a reward for his piety, a still greater blessing than the long life vouchsafed to so many of his contemporaries. 'Now people who knew of the translation of Enoch, must have known something of that state of bliss to which he was removed' (Bp. Browne). But, besides, in the first 930 years of the world, Adam still lived, and the communion which he had enjoyed with God could by him never have been forgotten. Is it possible that Adam was not well acquainted with a future life? This communion of God with man is again noticeable in the case of Noah (Gen. vi. 13; vii. 1; viii. 15; ix.), as with Abraham and others afterwards. In a general way the earliest patriarchs appear therefore to have lived the simple lives of a pastoral and also agricultural people, furnished with clothing, provided with houses, using herbs, and grain, and fruits, and

probably also, by sufferance, animals for food, offering to God both of the produce of the earth and also slain beasts in sacrifice, able to distinguish the clean from the unclean, speaking one language, holding firmly to the promise of a great blessing to come, familiar with the idea of God's presence in the world, and looking for some better life when this should be ended.

*The Patriarchs after the flood* were at first, in all, but four persons, with each his wife. Noah became the second father of the human race. They were exceedingly fruitful, as God had ordained they should be. The tenth chapter of Genesis is a wonderful document, describing the vast emigrations of the families of the sons of Noah. The number of nations there enumerated is reckoned by the Hebrew expositors as seventy; from Japheth fourteen, from Ham thirty, and from Shem twenty-six. But they no longer lived to the age of their antediluvian forefathers. The following table, given by Archdeacon Wordsworth, presents a synoptical view of the lineage of the family of Shem:—

PATRIARCHS.	HEBREW TEXT.			SAMARITAN TEXT.			SEPTUAGINT VERSION.		
	Years before birth of Son.	Rest of Life.	Extent of whole Life.	Years before birth of Son.	Rest of Life.	Extent of whole Life.	Years before birth of Son.	Rest of Life.	Extent of whole Life.
1. Shem . . . .	100	500	600	100	500	600	100	500	600
2. Arphaxad . . . .	35	403	438	135	303	438	135	400	535
3. (Kaivān) . . . .	—	—	—	—	—	—	130	330	460
4. Salah . . . .	30	403	433	130	303	433	130	330	460
5. Eber . . . .	34	430	464	134	270	404	134	270	404
6. Peleg . . . .	30	209	239	130	109	239	130	209	339
7. Reu . . . .	32	207	239	132	107	239	132	207	339
8. Serug . . . .	30	200	230	130	100	230	130	200	330
9. Nahor . . . .	29	119	148	79	69	148	179	125	304
10. Terah . . . .	70	135	205	70	75	145	70	135	205
11. Abraham . . . .	—	—	—	—	—	—	—	—	—

To this it may be added, that Abraham was 90 at the birth of Ishmael, and about 100 at the birth of Isaac; that Isaac was 60 at the birth of Esau and Jacob, and died at 180; that Jacob died at 147, and Joseph at 110. It will be observed, also, that as human life was shortened, children were usually born at an earlier period in the life of their parents. A providential compensation was thus supplied, by which the human family was multiplied, and large portions of the earth occupied. The language of men was, however, no longer one. When an attempt was made to concentrate the race, instead of occupying the earth and replenishing it, the scheme was defeated by the miraculous confusion of tongues. From that time the patriarchal state was preserved, or revived in its purity, chiefly, if not wholly, in the family of Abraham, the friend of God. Nations grew up on the right hand and on the left. In Babylonia there arose the kingdom of Nimrod. 'Out of that land went forth Asshur and builded Nineveh.' Without notice from the sacred historian the marvellous civilisation of Egypt then sprang up, and the thirty pyramids themselves were probably already built when Abraham first arrived in that land. Idolatry, moreover, was fast taking the place of the primeval religion, and if the name of the true God was ever

in danger of being wholly forgotten in the world, it was probably then, when Abraham was called to go forth from Ur of the Chaldees. In the book of Joshua (xxiv. 2, 14), we read, that the original fathers of the Jewish race, who dwelt beyond the Euphrates, served other gods. Such was probably the case with Terah, the father of Abraham. 'If we are asked,' says Professor Max Müller, 'how this one Abraham passed through the denial of all other gods to the knowledge of the one God, we are content to answer that it was by a special divine revelation.' 'It is true,' adds Dean Stanley, 'that Abraham hardly appears before us as . . . a teacher of any new religion. As the Scripture represents him, it is rather as if he was possessed of the truth himself than as if he had any call to proclaim it to others. His life is his creed; his migration is his mission. . . . His faith transpires not in any outward profession of faith, but precisely in that which far more nearly concerns him and every one of us—in his prayers, in his actions, in the righteousness, the 'justice,' . . . the 'uprightness,' the moral 'elevation' of soul and spirit which sent him on his way straight forward, without turning to the right hand or to the left.' Indeed Abraham must be regarded as the type, 'the hero' as he has been called, of the Patriarchal

state. He was acquainted with civilisation and organised government, but in his own person and family adhered to the simple habits of a nomad life. With him and his, the father of the family was the Patriarchal priest, the family itself the Patriarchal church. Dean Stanley has remarked how exactly, when Abraham and Lot 'went forth' to go into the land of Canaan, they resembled two Arabian chiefs at the present day on a journey or a pilgrimage. He notes how at this day, as so many centuries ago, 'the chief wife, the princess of the tribe, is there in her own tent, to make the cakes, and prepare the usual meal of milk and butter; the slave or the child is ready to bring in the red lentile soup for the weary hunter, or to kill the calf for the unexpected guest. Even the ordinary social state is the same: polygamy, slavery, the exclusiveness of family ties; the period of service for the dowry of a wife; the solemn obligations of hospitality; the temptations, easily followed, into craft or falsehood' (*Lectures on Jewish Church*, Lect. i., p. 12).

But if Abraham was in all outward respects like any other sheikh, there was that which distinguished him, as it did Noah before him, and Isaac, Jacob, Joseph, and others, after him, from all the world. This distinction consists partly in the *covenant* whereby these men were especially bound to God, and secondarily in the *typical character* of their recorded actions. Thus God made a league or covenant [COVENANT] with Noah (Gen. ix. 8, 9), and afterwards with Abram (Gen. xv. 8-18), when, as Dean Stanley says, 'the first covenant, 'the Old Testament,' was concluded between God and man,' and when there was represented by outward signs that which had its 'highest fulfilment' in one who, far more than the Jewish people, reflected in his own 'union of suffering and of triumph, the thick darkness of the smoking furnace, the burning and the shining light.' This league was often renewed, as with Abraham when circumcision was enjoined (xvii. 10), and with Isaac prospectively (xvii. 19), but with each of these as being themselves types of 'another seed . . . and another son of promise, in whom the covenant was to be accomplished' (see Dean Jackson, *Creed*, book ix. ch. xvi.)

The lives of the patriarchs are eminently *typical*. By this is not meant, of course, that in themselves the patriarchs were different from other men, but that the record of their lives is so written as to exhibit this typical character in them. 'The materials of the history of Genesis are so selected, methodized, and marshalled, as to be like rays converging steadily from various points to one central focus. The incidents in the lives of the Patriarchs, which seem trivial when read literally, and which would never have been recorded unless they had possessed a prospective value, and unless he who guided the writer had perceived them to have that prospective value, all fall into their proper place when they are read by the light which is shed on them by the gospel of Christ. . . . They are so selected as to be full of instruction' (Wordsworth, *Introd. to Gen.*, etc., p. xxxiv.) To this may be added, from the same authority, the beautiful illustration of St. Augustine (c. Faust. *Manich.* xxii. 94): 'As it is in a harp, where only the strings which are struck emit the sound, and yet all things in the instrument are so fitted together as to minister to the strings which send forth the music, so in

these prophetic narratives of the Pentateuch, the incidents which are selected by the prophetic spirit either send forth an articulate sound themselves, and pre-announce something that is future, or else they are there inserted in order that they may bind together the strings which produce the sounds.'—W. L. M.

PATRICK, SYMON, D.D., successively Bishop of Chichester (consecrated A.D. 1689) and Ely (translated 1691), one of the brightest ornaments of the English Church, was born at Gainsborough, in Lincolnshire, in 1626; was educated at Queen's College, Cambridge, of which he became fellow in 1648, and of which, thirteen years afterwards, he was by a majority of the fellows elected Master; but the election was annulled by the arbitrary interference of the king. In 1651 he graduated M.A., and about the same time was ordained by Bishop Hall, the ejected of Norwich; his D.D. degree he took at Oxford (having been admitted at Christ Church) in 1666. His ecclesiastical preferments, previous to the two highest already mentioned, were the vicarage of Battersea, in 1658; the rectory of St. Paul's, Covent Garden, in 1662; in 1672 the prebend of Westminster; and in 1679 the deanery of Peterborough. He died in 1707. In the appendix of his *Autobiography*, and the *Memoir* of his life, first published in 1839 at Oxford, there is a list of no less than fifty-one works which this excellent man found time to write in the intervals of his active avocations; many of these are among the very best devotional divinity of the Church of England, but admit not of enumeration in this work. As early as 1678 he published his *Paraphrases* on Job and the Psalms; and these were followed by two similar works on Proverbs, and on Ecclesiastes and the Song of Solomon, in 1681. These minor expositions were followed a few years afterwards by the *Commentaries*, which have been deservedly celebrated as, on the whole, the most valuable ever published in the English language (Bp. Watson). In 1694 appeared his *Commentary on Genesis*; *Exodus* in 1696; *Leviticus* in 1698; *Numbers* in 1699; *Deuteronomy*, 1700; *Joshua*, *Judges*, and *Ruth*, also in 1700; *1 and 2 Samuel* in 1703; *1 and 2 Kings* in 1704; and *1 and 2 Chronicles*, *Ezra*, *Nehemiah*, and *Esther*, in 1705. These commentaries and paraphrases of Bishop Patrick are supplemented by Lowth on the *Prophets*, Arnald on the *Apocryphal Books*, Whitby and Lowman on the *N. T.* The entire series was more than once, during the last century, republished in six folio volumes, always without Lowman on the *Revelation*, and occasionally also without Arnald—Patrick's portion of the work being comprised in the first two volumes. More recent editions are that of 1809, edited by the Rev. J. Pitman, 7 vols 4to; that of 1822, in 6 vols. royal 4to; and that of 1842, with the text, 4 vols. imp. 8vo, reissued in 1853. This frequent reproduction of so large a work bespeaks its value. Patrick, whose contribution is the best part of the commentary, possessed some of the highest qualities of a good expositor of Holy Scripture. Besides learning, he displays invariably reverence in his subject, perspicuity of style unembarrassed by lengthy dissertation, and an accurate command of the drift and connection of the book he is treating; added to which, he never perplexes his reader with merely detailing various opinions on difficult texts

without giving his own conclusion; and over all his work he has thrown the charm of good sense and sound discretion. Besides these express Biblical treatises, many of this good man's writings admirably illustrate portions of Scripture—such as his *Christian Sacrifice*, his works on the sacraments, and on the Roman controversy. His *Theological Works*, including his Autobiography, were published (the Rev. A. Taylor being the editor) at Oxford, in nine octavo volumes, in 1859. Appended to his Autobiography is a *Paraphrase on Romans* ix.—P. H.

PATROBAS (Πατροβάς), a Christian at Rome to whom St. Paul sends salutations (Rom. xvi. 14). The name seems to be a shorter form of Πατρόβιος; at least the same person, apparently, is called by the one name by Martial (ii. 32. 3) and by the other by Suetonius (*Galba*, c. 20). The Church of Rome makes him a disciple of St. Peter, and assigns his martyrdom to the 4th of November.—W. L. A.

PAU (פֹּא, 'bleating'; Φογώρ; *Phau*). In giving a list of the kings who reigned in Edom before there yet reigned a king over Israel, the sacred historian mentions as the last in order Hadar; and he adds, 'the name of his city is *Pau*' (Gen. xxxvi. 39). The parallel passage in 1 Chron. i. 50 reads *Pai* (פִּי); it is not unusual in the present day to spell the names of places in Syria and Arabia in different ways. The site of *Pau* is unknown. It was probably in Idumæa, and appears to have been constituted capital during the reign of Hadar, for it is said 'the name of his city is *Pau*'; whereas in the case of those who were foreigners, or who did not reside in their native place, their native place is mentioned in a different way: thus, 'Samlah of Masrekah' (36), 'Saul of Rehoboth' (37).—J. L. P.

PAUL (Παῦλος), originally *Saul* (סָאῦל, asked for; Σαῦλος), was a native of Tarsus, a city of Cilicia (Acts xxii. 3, etc.), and was of pure Jewish descent, of the tribe of Benjamin (Phil. iii. 5). According to an ancient tradition he was born in the second year after Christ (Chrysost. *De Petro et Paulo*, *Opp.* vol. viii. Montf.), a statement not in itself improbable, and falling in with the description of him as *pearlas* at the time of Stephen's martyrdom (Acts vii. 57). From his father he inherited the rights of Roman citizenship, which may have been earned by one of his ancestry through services rendered to the Roman state (Lardner, *Works*, i. 228, ed. 1788, 8vo; Grotius, *ad Act.* xxii. 28), or may have been purchased by one of them (Deyling, *Obs.* *Sacc.* iii. obs. 40, p. 388). The supposition that he enjoyed them in virtue of being a native of Tarsus is not well founded; for though that city had been created by Augustus an *urbs libera* (Dio Chrysost. ii. 36, ed. Reiske; Plin. *Hist. Nat.* v. 27), it does not follow from this that all its natives enjoyed the privilege of Roman citizenship; and besides, from Acts xxi. 39, compared with xxii. 24, 27, it may be inferred that, as the chief captain knew Paul to be a native of Tarsus, and yet was not aware of his Roman citizenship, the latter of these was not necessarily associated with the former. From his receiving the name *Saul* it has been supposed that he was the first-born son of his parents, and that they had long desired and often asked for

such a favour from God; that he was not their only child, however, appears from the mention made (Acts xxiii. 16) of his 'sister's son.' Whether Andronicus, Junia, and Herodion, whom he terms, in the Epistle to the Romans (xvi. 7, 11), *συγγενεῖς μου*, were of the number of his blood relations, or only belonged to the same tribe with him, is a question on which learned men have taken different sides (comp. Lardner, *Works*, vi. 235; Estius, *Comm.*, in loc.)

At that time Tarsus was the rival of Athens and Alexandria as a place of learning and philosophical research (Strabo, xiv. p. 673); but to what extent the future 'Apostle of the Gentiles' enjoyed the advantage of its schools we have no means of accurately determining. Attempts have been made to show from his writings that he was familiar with Greek literature, and Dr. Bentley has not hesitated to affirm that 'as Moses was learned in all the wisdom of the Egyptians, so it is manifest from this chapter alone (Acts xvii.), if nothing else had been now extant, that St. Paul was a great master in all the learning of the Greeks' (*Boyle Lectures*, Sermon. iii. *sub. init.*) An authority like that of Bentley in a question of Greek literature is not to be lightly set aside; yet, on referring to the evidence which has been furnished both by himself and others in support of the opinion to which he has lent his sanction, it will not be found, we think, such as to justify the strong and decided language he has employed. This evidence consists, (1) of a few supposed references, in the discourse alluded to by Dr. Bentley, to certain dogmas of the Greek philosophers; but even supposing the apostle to have had these in his eye, it will not follow that he must have studied the writings in which these dogmas were unfolded and defended, because he might have learned enough of them to guide him to such references, as by the supposition he makes in that discourse, from those controversial encounters with 'the philosophers of the Epicureans and of the Stoics,' which we are told he had in the marketplace of Athens, previous to the delivering of his oration on the Areopagus; (2) of three quotations made by him from Greek poets, one from the *Phænomena* (ver. 5) of his countryman Aratus (Acts xvii. 28), one from a lost play of Menander (1 Cor. xv. 33), and one from Epimenides (Tit. i. 12), all of which, however, bear the general character of gnomes or proverbs, and might consequently find their way to the apostle merely as part of the current coin of popular conversation, without his having once visited the treasury whence they were originally drawn; and (3) of certain similarities of idea and expression between some passages of the apostle and some that are found in classic authors (Horne's *Introduction*, iv. 343); but none of which are of such a nature as to necessitate the conclusion that the coincidence is more than purely accidental. It must be allowed, however, that the mere circumstance of having spent his early years in such a city as Tarsus could not but exert a very powerful influence on the mind of such a man as Paul, in the way of sharpening his faculties, refining his tastes, and enlarging the circle of his sympathies and affections. 'If, even to the meanest citizen,' as Eichhorn remarks, 'such a circumstance affords—unless he be by nature utterly unobservant—much information which otherwise he could not have obtained, and in consequence of this a certain activity of mind; how much greater

may not its effect be supposed to have been on a great mind like that of Paul! To his birth and early residence in Tarsus may be traced the urbanity which the apostle at no time laid aside, and of which he was frequently a perfect model; many insinuating turns which he gives to his epistles; and a more skilful use of the Greek tongue than a Jew born and educated in Palestine could well have attained' (*Einleit. ins N. T.*, iii. 5).

But whatever uncertainty may hang over the early studies of the apostle in the department of Greek learning, there can be no doubt that, being the son of a Pharisee, and destined, in all probability, from his infancy to the pursuits of a doctor of Jewish law, he would be carefully instructed from his earliest years in the elements of Rabbinical lore. It is probable also that at this time he acquired his skill in that handicraft trade by which in later years he frequently supported himself (*Acts xvii. 3; 1 Cor. iv. 12*, etc.); for it was a maxim among the Jews, that 'he who does not teach his son a trade, teaches him to steal.' This trade is described by Luke as that of a *σκεντοποιός*, a word regarding the meaning of which there has been no small difference of opinion. Luther makes it 'carpet-maker;' Morus (*in Act. xviii. 3*) and others, 'maker of mats or mattresses;' Michaelis (*Einl. ins N. T.*, sec. 216) and Haenlein (*Einl. ins N. T.*, iii. 301), 'tool-maker;' Chrysostom and others, 'worker in leather' (= *σκευοτόμος*); Hug (*Introd. p. 505*, Fosdick's Trans.) and Eichhorn (*Einl. ins N. T.*, iii. 8), 'maker of tent-cloth;' but most critics agree with our translators in rendering it 'tent-maker' (comp. Kuinoel, Dindorf, Rosenmüller, Olshausen, *in loc.*; Winer, *Realwörterb.* Art. 'Paulus;' Schleusner, *in voc.*) There was a fabric manufactured in Cilicia from the hair of a species of goat indigenous to the district, and from its source called *Cilicium*, *κίλικία*. This was used for tents, and for the protection of soldiers in assaulting a fortified place (*Plin. N. H.*, vi. 33; Veget, *De Re Milit.* iv. 6). Paul may have been a maker of this; but we need not suppose he was confined to this.

At the proper age (supposed to be after he was fourteen years old), the apostle proceeded to Jerusalem to prosecute his studies in the learning of the Jews. Here he became a student under Gamaliel a distinguished teacher of the law, and to whom first the title 'Rabban' was given (*Lightfoot, Horæ Hebr. in Act. v. 34; Neander, Apostol. Zeitalter*, u. s. w. s. 62; Otho, *Lex. Rabbinico-Phil.* s. v. 'Rabbi'). Besides acquaintance with the Jewish law, and a sincere conviction of the supreme excellence of Judaism, Gamaliel appears to have possessed a singularly calm and judicious mind, and to have exercised a freedom of thought as well as pursued a range of study very unlike what was common among the party to which he belonged (*Acts v. 34-39; comp. Neander, loc. cit.*) [*GAMALIEL I.*] How much the instructions and the example of such a teacher may have influenced the mind of Paul in a direction favourable to the course he was subsequently called to pursue, it is easy for us to imagine, though from the absence of all testimony on the subject it is not competent for us to affirm.

We now approach the period in Saul's history when he became a prominent figure on the page of the sacred historian, and when, consequently, the facts of his life can be more confidently

narrated. The points about which differences of opinion chiefly exist relate to the chronology of the events recorded concerning him. Deferring the consideration of this for the present, we shall proceed to narrate briefly the apostle's history, without any attempt to ascertain the year either of his own life, or of the Christian era when each event occurred.

He is introduced to our notice by the sacred historian for the first time in connection with the martyrdom of Stephen, in which transaction he was, if not an assistant, something more than a mere spectator. He is described as at this time 'a young man' (*νεανίας*); but this term was employed with so much latitude by the Greeks, that it is impossible from the mere use of it to determine whether the party to whom it was applied was under thirty, or between that and forty. The probability is, that Paul must have reached the age of thirty at least; for, otherwise, it is not likely that he would have shared the counsels of the chief priests, or been intrusted by them with the entire responsibility of executing their designs against the followers of Jesus, as we know was the case (*Acts xxvi. 10, 12*). For such a task he showed a painful aptitude, and discharged it with a zeal which spared neither age nor sex (*Acts viii. 1-3; xxvi. 10, 11*). Accounting it, apparently, his special vocation to uphold the Mosaic law, and to put down all who were unfaithful to it, he devoted himself to the persecution of the Christians; and infuriated by the thought that the dispersion of them after the death of Stephen had only tended to the wider diffusion of their doctrines, he obtained the authority of the high-priest to pursue them to Damascus for the purpose of arresting and bringing back as prisoners to Jerusalem those who had fled thither. He probably hoped in this way not only to punish those whom he might seize, but by arresting them, to prevent the spreading of Christianity eastwards through Mesopotamia and Babylonia, to which Damascus was the door. If Aretas also, the friend of the Jews, had then an ethnarch in Damascus, he might count on his aid in carrying out his purpose against the Christians. But whilst thus, in his ignorance and unbelief, he was seeking to be 'injurious' to the cause of Christ, the great author of Christianity was about to make him a distinguished trophy of its power, and one of the most devoted and successful of its advocates. Whilst journeying to Damascus, and when he had almost completed his journey, he was suddenly arrested by a miraculous vision of Christ, who, addressing him from heaven, demanded the reason of his furious zeal, in the remarkable words, 'Saul, Saul, why persecutest thou me?' Struck to the ground by the suddenness and overwhelming splendour of the vision, and able only to ask by whom it was he was thus addressed, he received for answer, 'I am Jesus of Nazareth whom thou persecutest. It is hard for thee to kick against the goad' (*i. e.*, in vain dost thou resist my arrangement to make thee my servant, as in vain does the ox, by kicking against the goad, endeavour to exempt itself from the control of its driver); but arise, and go into the city, and it shall be told thee what to do.' This command the con-founded and now humble zealot immediately rose to obey; but, as the brilliancy of the light which had shone around him had dazzled him to blindness, he had to be led into the city by his attend-

ants. Here he remained for three days and nights in a state of deep mental conflict and dejection, tasting neither meat nor drink, until a person of the name of Ananias appeared, at the command of Christ, to relieve his distress, and to admit him into the Christian fraternity by baptizing him for the name of the Lord (Acts ix. 1-18; xxii. 6-8; xxvi. 14-16).

Of the three accounts which we have of this event, one is furnished by the historian of the Acts and two by St. Paul himself. Between these accounts there are one or two slight discrepancies, which, however, may be easily reconciled. Thus, Luke tells us, that the men who accompanied Saul 'stood speechless, hearing a voice but seeing no man' (Acts ix. 7); whilst he himself says, in the one account, 'they that were with me saw the light and were afraid, but they heard not the voice of him that spake to me' (xxii. 9); and in the other, 'when we were all fallen to the ground, I heard a voice speaking,' etc. (xxvi. 14). Now, as respects the posture of Saul's companions, it is quite credible that *both* statements may be correct. Bengel suggests that '*cesiderant illi quoque sed ante Saulum surrexerunt sua sponte*,' and this Kuinoel and Baumgarten adopt; but it is more probable that the reverse was the case; that the men, startled by the sudden flash, stood for a while aghast, and then, awed by the supernatural character of the transaction, fell, as Jews naturally would do, on their faces, in which state Saul found them when he came to himself. This will best account for *his* describing them as fallen and on the ground; for, as he could not well take any note of their state at the beginning of the scene, whilst he could not but observe how they were at the close of it, their recumbent position would be naturally that which would most fix itself on his memory. As to the other discrepancy in these statements, it may be got over by the simple suggestion, that they heard the *sound* of the voice that addressed Saul, but did not discriminate articulately the *words* that were uttered. These, with the presentation of the Person of Jesus, were for the future apostle alone.

Another discrepancy appears between ix. 15 and xxii. 15-21, in the former of which certain words are introduced as addressed by the Lord to Ananias, and in the latter the same, or nearly the same words are said to have been addressed by the Lord to Saul. But may not the same words have been addressed to both, so that the *whole* of what the Lord said is to be gathered from combining the two accounts? Or may not the apostle, in his address to Agrippa, have purposed, in order to condense his narrative, to combine into one utterance all that the Lord said to him, both what He said immediately, and what He conveyed to him through Ananias? Either supposition will suffice to relieve the discrepancy.

Attempts have been made to extrude the supernatural from this scene, and to account for the whole on natural grounds. But these attempts commence invariably by eviscerating the problem of its real contents. Were the fact with which we have to deal merely the existence of a rumour or belief, among the disciples at a later age, of such an occurrence having taken place at the conversion of the great apostle, there might be room for the supposition of the magnifying of a natural occurrence into something supernatural, or for the gathering of a mythic halo around the outset of so

important a career. But when the real fact presented to us is, that the apostle himself believed that he had seen this vision by the way to Damascus, as he distinctly asserts, not only in the addresses preserved by Luke, but oftener than once in his epistles (see 1 Cor. ix. 1; xv. 8); and when it is remembered that the reality of the vision was believed by Ananias (Acts ix. 17), by Barnabas, and on his testimony by the apostles at Jerusalem (ix. 27), there seems no possible conclusion at which we can arrive but that of accepting the whole narrative as it stands, with all its supernatural characters. No combination of natural causes will meet the phenomena of the case; and we must either adopt the apostle's own statement of it, as he gives it, or we must suppose him and Ananias to have colluded in a great falsehood, or to have been visited simultaneously with the same mental hallucination, which they conveyed to Barnabas, the apostles, and the church at large, and from which Paul's companions, the servants and soldiers of the high-priest, were not exempt.

The design of this extraordinary scene was, on the one hand, to turn the mind of Saul, by one decisive impulse, from his former state of enmity to the cause of Christianity, to one of firm and deep conviction of its divine authority; and, on the other, to fit him for being a competent witness of the resurrection of Jesus, by having had personal evidence of the fact, in having 'seen the Lord' in his heavenly state. For these ends, the scene through which he passed on the road to Damascus was admirably adapted. The appearance in glory of Jesus was proof sufficient of *two* things—of his actual resurrection from the dead by the power of God, and of his acceptance and exaltation as the mediator between God and man, and the king of the spiritual kingdom; and in the presence of these truths the mind of Saul, sincere, truthful, and accustomed to processes of reasoning, could not hesitate as to the conclusion to be drawn in favour of the divinity of that system which he had been madly seeking to destroy. No mere mental vision, no mere verbal revelation, no mere announcement, however impressive, could have gained these ends. It was the presentation to the view of Saul, of Him who could say, 'I am Jesus of Nazareth whom thou persecutest,' which could alone meet the requirements of the case. Such a presentation the future apostle had on the road to Damascus; and it changed the whole tenor of his convictions, and gave a new direction and a new impulse to his subsequent life.

Such a change produced by such means presupposes the existence in the mind of the apostle of a sincere desire to be in accordance with the mind of God, and to follow the path of truth according to conviction. As Neander justly remarks, 'A Caiaphas would never by any miracle have been changed into a herald of the gospel' (*Ap. Zeit.*, p. 119). But Saul was no Caiaphas. As he himself tells us, he was moved to what he did against the followers of Jesus by believing that thereby he was doing God service. He had a zeal for God, though it was not according to knowledge. He was a sincere and blameless Jew (Phil. iii. 6), who believed the religion in which he had been educated to be the only true religion, and who persecuted the Christians because he thought Jesus an impostor and Christianity a blasphemy. Nor can we suppose that Saul had never seriously pondered the

question, 'May not this new religion be true after all?' The faith, piety, and firmness of Stephen, and the zeal, sincerity, and constancy of the believers in Jesus, amid persecution and suffering, could not but attract his attention and occupy his thoughts. His prejudices, it is true, retained their ascendant in his mind, and the conflict he had within him only tended, under their predominancy, to render him more impetuous and impassioned in his attempts to put down Christianity; but we cannot doubt that a certain preparation of the kind described had gone on within him, which rendered him more open to a right impression from the transaction on the road to Damascus. He had all along *meant* to be honest and true to conviction, and it only needed something that should force on him the conviction that Christianity was from God, and that Jesus was the Messiah, to turn the whole current of his ardent soul towards the adoption and advocacy of that belief.

As was natural, the first emotions of Saul, after conviction had flashed on his mind, were those of horror, contrition, and self-abasement—emotions so strong and overwhelming, that his spirit was crushed beneath their weight, and his whole frame became paralysed with weakness. But as light continued to pass into his mind, and especially after the decisive step had been taken of joining himself to the Christians, his energies revived, and he set himself with all his native zeal and ardour to proclaim to his nation the truth he had received (Acts ix. 15-22). How long he continued in Damascus thus engaged after his conversion we do not know; but it was apparently only for a short time. Driven away, probably by the fury of the Jews, he retired into Arabia (Gal. i. 17). This may have been not very far from Damascus—for Arabia, in the wider application of the name, included the district bordering on the northern part of Syria; or it may have been the country more strictly called Arabia, the stony Arabia. How long he remained here is uncertain; he himself specifies three years as elapsing between his conversion and his going up for the first time after that to Jerusalem (Gal. i. 18); but these three years include the time spent at Damascus before he went into Arabia, and the *ἡμέραι ἱκαναί* spent at Damascus after his return (Acts ix. 23), as well as the time spent in Arabia. There can be little doubt, however, as to the *object* for which he thus retired into solitude. Having received his commission from Christ himself, he did not feel that it behoved him to seek instruction from any inferior source. He therefore did not go up to Jerusalem to them that were apostles before him, but retired into solitude, for the purpose, doubtless, of yielding himself to the teaching of Christ, to meditation and study, and to whatever else was needful to prepare him for the work to which he had been called. As the other apostles had enjoyed a period of preparation for their work under the immediate teaching of Christ, so it seemed fitting that a similar course of preparation should be gone through by the one who had been since the Lord's resurrection added to their number. It is probably to what transpired while he was in Arabia that the apostle refers, when he says that he received that gospel which afterwards he preached 'by revelation' from Christ (Gal. i. 12). Neander (*l. c. s. 121*) and Anger (*De Tempp. in Actis App. Ratione*, p. 123), have endeavoured to show that Paul went into

Arabia to preach the gospel; but the reasons they adduce have little weight (comp. Olshausen on Acts ix. 20-25).

Returning from Arabia to Damascus, the apostle commenced his public efforts in the service of Christ, by boldly advocating in the synagogues of the Jews the claims of Jesus to be venerated as the Son of God. At first astonished, the Jews were afterwards furiously incensed at this change in the opinions and conduct of Saul, and, in consequence of their attempts upon his liberty and life, he was obliged to make his escape from Damascus. This he effected with difficulty by the aid of the Christians, some of whom let him down in a basket from the window of a dwelling erected upon the outer wall of the city (Acts ix. 21, etc.; 2 Cor. xi. 32). After this he went up to Jerusalem (for the *first* time after his conversion), where, on the testimony of Barnabas, he was acknowledged as a Christian brother, and admitted by the apostles to that place in their fraternity which had been assigned to him by Christ. From Jerusalem he was soon driven by the hostility of the Jews; when, after visiting Cæsarea, he went to his native town Tarsus, where he abode a considerable time, perhaps two years (Acts ix. 26-30). From this retreat he was summoned by Barnabas, who, having been appointed by the apostles at Jerusalem to visit the church at Antioch, where accessions had been made to the number of the followers of Jesus from among the Gentiles as well as the Jews, and finding the need of counsel and co-operation in his work, went to Tarsus to procure the assistance of Saul (Acts xi. 22-25). After residing and labouring for a year in Antioch, these two distinguished servants of Christ were sent up to Jerusalem with certain contributions which had been made among the Christians at Antioch, on behalf of their brethren in Judæa, who were suffering from the effects of a dearth (Acts xi. 27-30). This was the apostle's *second* visit to Jerusalem after his conversion.

Having discharged this commission they returned to Antioch, accompanied by John Mark, the nephew of Barnabas, and were shortly afterwards despatched by that church, in obedience to an injunction from heaven, on a general missionary tour. In the course of this tour—during the earlier part only of which they were accompanied by Mark, in consequence of his shrinking from the toils and dangers of the journey, and returning to Jerusalem—they visited Seleucia, Cyprus, Perga in Pamphylia, Antioch in Pisidia, Iconium, Lystra and Derbe, cities of Lycaonia (in the former of which the fickle populace, though at first they had with difficulty been prevented from offering them divine honours, were almost immediately afterwards, at the instigation of the Jews, led to stone the apostle until he was left for dead); and then they returned by way of Attalia, a city of Pamphylia, by sea to Antioch, where they rehearsed to the church all that God had done by them (Acts xiii.-xiv.). This formed the apostle's *first* great missionary tour.

In the narrative of this journey given by Luke, the historian, without assigning any reason for so doing, drops the name Saul and adopts that of Paul, in designating the apostle. It is probable from this, that it was during this journey that the apostle's change of name actually took place. What led to that change we can only conjecture; and of conjectures on this point there has been no

lack. Jerome and Augustine, whom, among recent writers, Olshausen follows, ascribe the change to the conversion of Sergius Paulus, whose name the apostle assumed in commemoration of so important an event. Chrysostom, followed by Theophylact and Theodoret, imputes it to the apostle's determination that, as Peter had two names, he would not, even in this respect, 'be behind the chiefest of the apostles.' Nicephorus (*Hist. Eccles.* ii. 37) thinks he received the name as a sort of nickname from the Romans, on account of his diminutive stature; *Paulus*, quasi *Pusillus*. Lightfoot, Hammond, and others, suppose that from his birth the apostle had the two names, the one in virtue of his Hebrew descent, the other in virtue of his Roman citizenship, and that he used the one among the Jews, but adopted the other when he came to labour chiefly among Gentiles. But the most probable opinion is that of Beza, Grotius, Doddridge, Kuinoel, etc., that as the Romans and Greeks were in the habit of softening the Hebrew names in pronunciation, and accommodating their form to that of the Latin or Greek (comp. Jason for *Ἰησους*, Silvanus for *Σίλας*, Pollio for *Πολλῆς*, etc.),

they substituted Paulus for *Παῦλος*, and the apostle henceforward adopted the substituted name as his usual designation.

Not long after Paul and Barnabas had returned to Antioch, they were deputed by the church there again to visit Jerusalem, to consult the apostles and elders upon the question, which certain members of the church at Jerusalem had raised in that at Antioch, whether converts from heathenism required to be circumcised, and so become Jews before they could be saved? The apostle on this occasion visited Jerusalem for the *third* time after his conversion; and after the question had been settled by the parties in that city with whom the power to do so lay, he and his companion returned to Antioch. After restoring peace to the church there Paul proposed to Barnabas to undertake another missionary tour, to which the latter cordially assented; but, unhappily, on the very eve of their departure, a contention arose between them, in consequence of Barnabas being determined to take with them his nephew John Mark, and Paul being equally determined that one who had on a former occasion ingloriously deserted them, should not again be employed in the work. Unable to come to an agreement on this point they separated, and each pursued his own path of labour. This occurrence is often referred to as affording a warning instance of how good men may allow a very small matter so to excite angry feelings within them that their intercourse is interrupted and their co-operation in good causes brought to an end. But this is not altogether a just representation of the case. The error of these two servants of Christ lay, not in their allowing their passion to get the better of them, but in their attaching undue importance to feelings, in themselves innocent, if not laudable. No one can blame Barnabas for desiring, under the influence of natural affection, to give his relative Mark another trial; nor is Paul to be blamed because, attaching great importance to steadfastness and courage on the part of those who engaged in the service of Christ, he had misgivings as to the expediency of taking with them, on a laborious and it might be perilous enterprise, one whose fortitude had on a former occasion

proved unequal to the trial. But both carried these feelings too far. Each was too tenacious of his own ground. And the lesson which their separation teaches is that it is not wise or proper to be so determined to carry our own point, even when good, as to refuse all concessions to another. Perhaps the apostle, when he came to reflect on what had happened, learned experimentally the importance of what he so often enjoins in his epistles—the duty of Christians 'submitting themselves one to another in the fear of God' (Eph. v. 21), and not being 'wise in their own conceit' (Rom. xii. 16).

After this separation from his former companion and faithful fellow-labourer, Paul, accompanied by Silas, commenced his second missionary journey, in the course of which, after passing through Syria and Cilicia, he revisited Lystra and Derbe. At the former of these places he found Timothy, whom he associated with Silas, as the companion of his further travels, after he had been ordained by the apostle and the presbytery of the church of which he was a member (1 Tim. iv. 14). Paul then passed through the regions of Phrygia and Galatia, and, avoiding Asia strictly so called, and Bithynia, he came with his companions by way of Mysia to Troas, on the borders of the Hellespont. Hence they crossed to Samothracia, and thence to Neapolis. From this they travelled to Philippi, whither he had been summoned in a vision by a man of Macedonia, saying, 'Come over and help us.' After some time spent in this city they passed through Amphipolis and Apollonia, cities of Macedonia, and came to Thessalonica, where, though they abode only a short time, they preached the gospel with no small success. Driven from that city by the malice of the Jews, they came by night to Berea, another city of Macedonia, where at first they were favourably received by the Jews, until a party from Thessalonica, which had followed them, incited the Bereans against them. Paul, as especially obnoxious to the Jews, deemed it prudent to leave the place, and accordingly retired to Athens, where he determined to await the arrival of Silas and Timothy. Whilst residing in this city, and observing the manners and religious customs of its inhabitants, his spirit was stirred within him when he saw how entirely they were immersed in idolatry; and unable to refrain, he commenced in the synagogues of the Jews, and in the market-place, to hold discussions with all whom he encountered. This led to his being taken to the Areopagus, where, surrounded by perhaps the shrewdest, most polished, most acute, most witty, and most scornful assemblage that ever surrounded a preacher of Christianity, he, with exquisite tact and ability, exposed the folly of their superstitions, and unfolded the character and claims of the living and true God. For the purpose of more effectually arresting the attention of his audience, he commenced by referring to an altar in their city, on which he had read the inscription *ἀγνώστῳ θεῷ*, *to an unknown God*; and, applying this to the true God, he proposed to declare to them that Deity, whom thus, without knowing him (*ἀγνοοῦντες*), they were worshipping. Considerable difficulty has been found by many interpreters to reconcile this with the fact, that no mention is made by the classic authors of any altar in Athens bearing this inscription, whilst we are told by Pausanias (*Attic.* i. 4; *Eliac.* v. 14, 6) and Philostratus

(*Vit. Apollonii Tyan.*, vi. 3), that there were several altars inscribed ἀγνώστους θεοῖς, in the plural; and different suppositions have been made to account for the apostle's language (Kuinoel, in *Act.* xvii. 23). But why should we not receive the apostle's own testimony on this subject, as reported by the inspired historian? It is certain that no one is in circumstances to affirm that no altar existed in Athens bearing such an inscription at the time Paul visited that city; and when, therefore, Paul, publicly addressing the Athenians, says he saw such an altar, why should we hesitate for a moment to take his words for what they literally mean? Besides, there is nothing in what Pausanias and Philostratus affirm that is really incompatible with Paul's assertion. It is to be observed, that neither of them says there were altars, on each of which the inscription was in the plural number, but only there were 'altars of gods called unknown' (βασιλεῖς θεῶν ὀνομαζομένων ἀγνώστων); so that, for aught that appears to the contrary, each altar might bear the inscription which Paul says he saw upon one.

On being rejoined by Timothy (1 Thes. iii. 1), and perhaps also by Silas (comp. Greswell's *Dissertations*, ii. pp. 31, 32), the apostle sent them both back to Macedonia, and went alone to visit Corinth, whither they soon after followed him (*Acts* xviii. 5). Here he abode for a year and a half preaching the gospel, and supporting himself by his trade as a tent-maker, in which he was joined by a converted Jew of the name of Aquila, who, with his wife Priscilla, had been expelled from Rome by an edict of the emperor, forbidding Jews to remain in that city. Driven from Corinth by the enmity of the Jews, he, along with Aquila and Priscilla, betook himself to Ephesus, whence, after a residence of only a few days, he went up to Jerusalem, being commanded by God to visit that city, at the time of the approaching passover. His visit on this occasion—the fourth since his conversion—was very brief; and at the close of it he went down to Antioch, thereby completing his second great apostolic tour.

At Antioch he abode for some time, and then, accompanied as is supposed by Titus, he commenced another extensive tour, in the course of which, after passing through Phrygia and Galatia, he visited Ephesus. The importance of this city, in relation to the region of Hither Asia, determined him to remain in it for a considerable time; and he accordingly continued preaching the gospel there for three years, with occasional brief periods of absence, for the purpose of visiting places in the vicinity. With such success were his efforts crowned, that the gains of those who were interested in supporting the worship of Diana, the tutelary goddess of the city, began to be seriously affected; and at the instigation of one of these, by name Demetrius, a silversmith, who had enjoyed a lucrative traffic by the manufacture of what appear to have been miniature representations of the famous temple of Diana (ναὸς ἀργυροῦς Ἀρτέμιδος, comp. Kuinoel, in *Act.* xix. 24; Neander, *Apost. Zeit.*, s. 350), a popular tumult was excited against the apostle, from the fury of which he was with difficulty rescued by the sagacity and tact of the town-clerk, aided by others of the chief men of the place, who appear to have been friendly towards Paul. By this occurrence the apostle's removal from Ephesus, on which, however, he had already determined (*Acts* xix. 21), was in all

probability expedited; and accordingly he, very soon after the tumult, went, by way of Troas, to Philippi, where he appears to have resided some time, and from which, as his head-quarters, he made extensive excursions into the surrounding districts, penetrating even to Illyricum, on the eastern shore of the Adriatic (*Rom.* xv. 19). From Philippi he went to Corinth, where he resided three months, and then returned to Philippi, having been frustrated in his design of proceeding through Syria to Jerusalem by the malice of the Jews. Sailing from Philippi, he came to Troas, where he abode seven days; thence he journeyed on foot to Assos; thence he proceeded by sea to Miletus, where he had an affecting interview with the elders of the church at Ephesus (*Acts* xx. 17, ff.); thence he sailed for Syria, and, after visiting several intermediate ports, landed at Tyre; and thence, after a residence of seven days, he travelled, by way of Ptolemais and Caesarea, to Jerusalem. This constituted his fifth visit to that city after his conversion. It was during this period that the epistles to the Galatians, the Romans, and the Corinthians were written.

On his arrival at Jerusalem he had the mortification to find that, whilst the malice of his enemies the Jews was unabated, the minds of many of his brother Christians were alienated from him on account of what they deemed his too lax and liberal notions of the obligations of the Mosaic ritual. To obviate these feelings on their part, he, at the suggestion of St. James, joined himself to four persons who had taken on them the vows of a Nazarite, and engaged to pay the cost of the sacrifices by which the Mosaic ritual required that such should be absolved from their vows. [NAZARITE.] With what success this somewhat questionable act of the apostle was attended, as respects the minds of his brethren, we are not informed, but it had no effect whatever in securing for him any mitigation of the hatred with which he was regarded by the unconverted Jews; on the contrary, his appearance in the temple so much exasperated them, that before his vow was accomplished, they seized him, and would have put him to death, had not Lysias, the commander of the Roman cohort in the adjoining citadel, brought soldiers to his rescue. Under the protection of Lysias, the apostle addressed the angry mob, setting forth the main circumstances of his life, and especially his conversion to Christianity, and his appointment to preach the gospel to the Gentiles. Up to this point they heard him patiently; but no sooner had he insinuated that the Gentiles were viewed by him as placed on a par with the Jews, than all their feelings of national bigotry burst forth in a tempest of execration and fury against the apostle. Lysias, ignorant of what Paul had been saying, from his having addressed the people in Hebrew, and suspecting from these vehement demonstrations of the detestation in which he was held by the Jews, that something flagrantly vicious must have been committed by him, gave orders that he should be examined, and forced by scourging to confess his crime. From this indignity Paul delivered himself by asserting his privileges as a Roman citizen, whom it was not lawful to bind or scourge. Next day, in the presence of the Sanhedrin, he entered into a defence of his conduct, in the course of which, having avowed himself a believer in the doctrine of a bodily resurrection, he awakened so fierce a

controversy on this point between the Pharisees and the Sadducees in the council, that Lysias, fearing he might be torn to pieces among them, gave orders to remove him into the fort. From a conspiracy into which above forty of the Jews had entered to assassinate him he was delivered by the timely interposition of his nephew, who, having acquired intelligence of the plot, intimated it first to Paul, and then to Lysias. Alarmed at the serious appearance which the matter was assuming, Lysias determined to send Paul to Cæsarea, where Felix the procurator was residing, and to leave the affair to his decision. At Cæsarea Paul and his accusers were heard by Felix; but though the apostle's defence was unanswerable, the procurator, fearful of giving the Jews offence, declined pronouncing any decision, and still retained Paul in bonds. Some time after he was again summoned to appear before Felix, who, along with his wife Drusilla, expressed a desire to hear him 'concerning the faith in Christ'; and on this occasion the faithful and fearless apostle discoursed so pointedly on certain branches of good morals, in which the parties he was addressing were notoriously deficient, that Felix trembled, and hastily sent him from his presence. Shortly after this Felix was succeeded in his government by Porcius Festus, before whom the Jews again brought their charges against Paul; and who, when the cause came to be heard, showed so much of a disposition to favour the Jews, that the apostle felt himself constrained to appeal to Cæsar. To gratify King Agrippa and his wife Bernice, who had come to Cæsarea to visit Festus, and whose curiosity was excited by what they had heard of Paul, he was again called before the governor, and 'permitted to speak for himself.' On this occasion he recapitulated the leading points of his history, and gave such an account of his views and designs, that a deep impression was made on the mind of Agrippa favourable to Christianity and to the apostle; so much so that, but for his having appealed to Cæsar, it is probable he would have been set at liberty. His cause, however, having by that appeal been placed in the hands of the emperor, it was necessary that he should go to Rome, and thither accordingly Festus sent him. His voyage was long and disastrous. Leaving Cæsarea when the season was already considerably advanced, they coasted along Syria as far as Sidon, and then crossed to Myra, a port of Lycia; thence they sailed slowly to Cnidus; and thence, in consequence of unfavourable winds, they struck across to Crete, and with difficulty reached a port on the southern part of that island called 'The Fair Haven,' near the town of Lasea. There Paul urged the centurion, under whose charge he and his fellow-prisoners had been placed, to winter; but the place not being very suitable for this purpose, and the weather promising favourably, this advice was not followed, and they again set sail, intending to reach Phœnice, a port in the same island, and there to winter. Scarcely had they set sail, however, when a tempest arose, at the mercy of which they were driven for fourteen days in a westerly direction, until they were cast upon the coast of Malta, where they suffered shipwreck, but without any loss of life. Hospitably received by the natives, they abode there three months, during which time Paul had a favourable opportunity of preaching the gospel, and of show-

ing the power with which he was endued for the authentication of his message by performing many miracles for the advantage of the people. On the approach of spring they availed themselves of a ship of Alexandria, which had wintered in the island, and set sail for Syracuse, where they remained three days; thence they crossed to Rhegium, in Italy; and thence to Puteoli, from which place Paul and his companions journeyed to Rome (Smith, *Voyage and Shipwreck of St. Paul*). Here he was delivered by the centurion to the captain of the guard, who permitted him to dwell in his own hired house under the surveillance of a soldier. And thus he continued for two years, 'receiving all that came to him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus Christ, with all confidence, no man forbidding him' (Acts xxi. 17; xxviii. 31). It was during these two years that the epistles to the Ephesians, the Philippians, the Colossians, and Philemon, were written. To this also we refer the composition of the epistle to the Hebrews.

At this point the evangelist abruptly closes his narrative, leaving us to glean our information regarding the subsequent history of the apostle from less certain sources. Tradition steadfastly affirms that he suffered martyrdom at Rome, and that the manner of his death was by beheading (Tillemont, *Mémoires*, i. p. 324); but whether this took place at the close of the imprisonment mentioned by Luke, or after a second imprisonment incurred subsequent to an intervening period of freedom and active exertion in the cause of Christianity, has been much discussed by modern writers. The latter hypothesis rests chiefly on some statements in Paul's second epistle to Timothy, which it is deemed impossible to reconcile with the former hypothesis. The consideration of these belongs properly to the literary history of that epistle [SECOND EPISTLE TO TIMOTHY], and we shall not therefore enter upon them here. Suffice it to remark that, though the whole subject is involved in much obscurity, the preponderance of evidence seems to be in favour of the supposition of a second imprisonment of the apostle. The testimonies of some of the later fathers in support of this supposition cannot, however, be allowed much weight, for they all rest upon Eusebius, and he rests upon a mere 'rumour' (his words are λόγος ἔχει, *Hist. Eccles.* ii. 22), and upon the apostle's expressions in the second epistle to Timothy. More weight is due to the testimony of Clemens Romanus, because of his proximity in time to the apostle, and of his residence at Rome; but all the information he furnishes bearing on this question is that Paul, 'after having proclaimed the gospel both in the east and in the west . . . and taught righteousness to the whole world, and having come to the boundary of the west (τέρμα τῆς δύσεως), and having testified before the rulers (or having suffered martyrdom by order of the rulers, μαρτυρήσας ἐπὶ τῶν ἡγουμένων), thus left the world and went to the holy place' (Eph. i. ad Cor. c. 5). By 'the boundary of the west' it is affirmed, on the part of the advocates of a second imprisonment of the apostle, that Clement means Spain, or perhaps the extreme west part of Spain; and as Paul never visited this during the portion of his life of which we have record in the N. T., it is inferred that he must have done so at a subsequent period after being liberated from imprisonment. But this is not very cogent reasoning; for

it is still open to question whether by τὸ τέρμα τῆς δόσεως Clement really intended to designate Spain. We may give up at once the opinion of Hensen, that the place referred to is Illyricum, as fanciful and untenable; nor do we feel inclined to contend strenuously for Rome as the place intended, though this is not altogether improbable; but is not so easy to get over the suggestion that Clement means nothing more by the phrase than simply the western part of the Roman empire, without intending to specify any one place in particular. It is to be observed that his language is, through the whole sentence, vague and exaggerated, as when, for instance, he affirms that Paul 'had taught righteousness to the whole world;' and, in such a case, it is attributing too much to his assertion to insist upon understanding it of some definite locality. Besides, the use of ἐλθων by Clement would seem to intimate that he was himself residing at the place or in the region which was present to his mind while writing as the *terminus ad quem* of the apostle's journeyings; and, moreover, if by the succeeding clause we understand him as alluding to Paul's having suffered martyrdom by order of the emperor (which is the rendering usually given by those who adduce the passage as favouring the hypothesis of a second imprisonment), does it not appear to follow that the τέρμα τῆς δόσεως was the place where that occurred? Both these suggestions are in favour of Rome, or of the West generally, as the place referred to by Clement; and adopting this interpretation of his words, the inferential evidence they have been supposed to yield in favour of the hypothesis that the apostle enjoyed a period of labour, and suffered a second imprisonment subsequent to that mentioned by Luke, is of course destroyed.

If, on the evidence furnished by the allusions in the Second Epistle to Timothy, we adopt the supposition above stated, it will follow that Paul, during the interval between his first and second imprisonments, undertook an extensive apostolic tour, in the course of which he visited his former scenes of labour in Asia and Greece, and perhaps also fulfilled his purpose of going into Spain (Rom. xv. 24-28). He probably also visited Crete and Dalmatia (comp. Greswell, vol. ii. pp. 78-100).

In the apostle's own writings, one or two incidents of his life are alluded to, of which no notice has been taken in the preceding sketch of his history, in consequence of the obscurity in which they are involved, in some cases as to the time when they occurred, and in others as to the nature of the event itself. These are his visit to Jerusalem, mentioned Gal. ii. 1; his rapture into the third heavens (2 Cor. xii. 1-4); the thorn in the flesh with which he was afflicted after that event (ver. 7); and his fighting with wild beasts at Ephesus, mentioned 1 Cor. xv. 32. As to the first of these, it does not readily synchronise with any visit of the apostle to Jerusalem noticed by Luke. That it was not the visit mentioned Acts xv. appears from various considerations, especially (1.) Paul says he went up, on the occasion referred to by him κατ' ἀποκάλυψιν, i.e., by special divine direction, whereas the visit mentioned in the Acts was by appointment of the church at Antioch, an objection which cannot be got over by adducing Acts ix. 29, 30, and xxii. 17, 21, as showing that both might be true, for the cases are not parallel. There is a great difference between a church sending a man as its delegate on a matter of busi-

ness, and a man's friends finding means to help him to obey a divine mission. (2.) The apostle went up to Jerusalem, he says, to obtain the recognition of his apostleship; whereas, when he was sent by the church at Antioch, it was to obtain the judgment of the church at Jerusalem, as to the necessity of imposing Jewish rites on Gentile converts. (3.) The apostle lays stress on his having confined himself to private interviews with the chief leaders of the church; whereas, in the Acts, stress is laid on the whole question at issue having been discussed and settled in a meeting of the brethren convened on purpose. If it be said that the apostle may have had his own personal end to answer as well as a public duty to discharge, it is replied that in that case we should have expected him to state, not that he went up on purpose to obtain recognition of his apostleship, but simply that he availed himself of the opportunity afforded by his visiting Jerusalem on public business, to have his own personal affair settled. (4.) It is improbable that *after* the decision of the church at Jerusalem, members of that church, under the sanction of James, should have come down to Antioch, and persuaded Peter, Barnabas, and other Jewish Christians, to separate themselves from Gentile Christians as unclean; and the inconsistency would have been especially manifest in Peter and Barnabas, the latter having appeared in the so-called council as the delegate of the liberal party in the church at Antioch, and the former having guided the decision of the assembly in their favour by laying down the position that, as the Lord had made no difference between Gentile and Jewish converts, so neither ought they (Acts xv. 9, 10). These considerations compel us to regard the visit mentioned in Galatians as different from that of Acts xv. On the other hand, we cannot place that visit after the meeting at Jerusalem; because almost immediately after this Paul and Barnabas ceased to co-operate in the same sphere of labour. Was it, then, the visit of Acts xi. 30 to which St. Paul refers? Against this are the facts—(1.) That the apostle describes his visit as *spontaneous*, whereas, on the occasion referred to in Acts, he was *sent* on a special mission. (2.) His sole companion on the one occasion was Barnabas, whereas, on the other, he took with him Titus also. (3.) Paul could hardly, at this early period, have substantiated his claims to be regarded as the apostle of the Gentiles, so as to be put on a par with Peter as the apostle of the circumcision; and (4.) As the visit of the Acts cannot have taken place later than A. D. 46, fourteen years before that would place his flight from Damascus in the year 32, when Aretas could not possess it, and his conversion in the year 29, which is incredible. But if the visit mentioned by the apostle can be identified with neither of these, the only supposition to which we can resort is that during the interval which elapsed between what are commonly reckoned the apostle's *second* and *third* visits to Jerusalem (an interval of about *five* years), a short visit was paid by him and Barnabas, along with Titus, of a private nature, and probably with a view of coming to a distinct understanding with the older apostles as to their relative position and independent working.

As respects the rapture into the third heavens, one thing appears very certain, viz., that those are mistaken who attempt to identify this with the vision on the road to Damascus which led to the apostle's conversion. The design, character, and

consequences of the one are so different from those of the other, that it is surprising any should have imagined the two events were the same (Neander, *Apostol. Zeitalter*, i. 115). It is not improbable that the *ὁρτασία* of which Paul writes to the Corinthians was the same as the *ἐκστασις* referred to by him in the recapitulation of the events of his life in his address to the Jews as recorded in Acts xxii. 17. When in an ecstasy or trance an individual might be well described as *ἀρπάζεις*, for all outward perception was suspended, and the whole mind was wrapt in contemplation of the objects presented in the vision. The date, moreover, which the apostle assigns to the event mentioned in the Epistle to the Corinthians, agrees very closely with that of the event mentioned in the Acts. The latter, Paul says, occurred when he was in Jerusalem for the first time after his conversion: the former, he says, took place 'about fourteen years' before the time of his writing the Second Epistle to the Corinthians. Now, according to almost all the chronologers, a space of fourteen years intervened between the apostle's first visit to Jerusalem and his writing that epistle; so that it is highly probable that the vision referred to in the two narratives is the same.

What 'the thorn in the flesh' was with which the apostle was visited after his vision, has proved indeed a *questio vexata* to interpreters (cf. *Poli Synops. Crit.*, in loc.) The conclusion to which Neander has come on this subject appears to us much the most judicious. 'We must regard it as something entirely personal, affecting him not as an apostle, but as Paul; though, in the absence of any information as to its characteristics, it would be foolish to decide more precisely *what* it was' (*Apostol. Zeit.* i. 228).

Respecting the apostle's fighting with wild beasts at Ephesus, the question is whether this should be understood *literally* of an actual exposure in the theatre to the assault of savage beasts, or *figuratively* of dangers to which he was exposed from the attacks of savage men. It is no objection to the literal interpretation that Luke has not noticed any such event in his narrative; for from Rom. xvi. 4, we find that the apostle must have encountered many deadly perils at Ephesus of which no notice is taken by Luke. As little force is there in the objection that Paul, as a Roman citizen, could not legally be subjected to such a punishment; for however his privileges in this respect may have availed him on some occasions, we know that they did not on all, else he would not have endured the indignity of being scourged, as he was at Philippi (Acts xvi. 23), and, according to his own testimony, often besides (2 Cor. xi. 24, 25). Tradition is in favour of the literal interpretation (Nicephori *Hist. Eccles.* ii. 6. 25); and no exegesis of the whole clause seems better than that of Theodoret: *κατὰ ἀνθρώπων λογισμὸν θηρίων ἐγενήθη βορά, ἀλλὰ παραδόξως ἐσώθη*; for it is far from improbable that the furious mob might have raised the cry '*Ad leones*' against the apostle, and that some unperceived interposition had saved him from the fearful doom. To interpret this statement of his treatment at the hands of Demetrius, is absurdly to make him refer to an event which at the time he was writing had not occurred.

*Chronology of St. Paul's Life.*—For this the date of the entrance of Festus into the government of Palestine is most important. That event took place about Whitsuntide A.D. 60. Counting back from

this two years, during which Paul was a prisoner at Cæsarea (Acts xxiv. 27), we are brought to Whitsuntide 58, as near the time when the apostle returned from his third journey from Greece to Jerusalem. At Easter A.D. 58, he was at Philippi, shortly after which he left for Troas (Acts xx. 6). Previous to this he had spent three months in Achaia (ver. 3), and counting these from Easter A.D. 58, we are brought to the close of A.D. 57 as the date of his arrival in Greece after leaving Ephesus. At Ephesus he had tarried nearly three years before this (Acts xix. 8, 10; xx. 31), so that he must have arrived in that city in the third quarter of A.D. 54. At the Easter before this he had made a hasty journey from Greece to Jerusalem, and thence to Antioch, where he tarried some time, and then entered upon the tour which ended in his residence at Ephesus; so that this visit to Jerusalem was at Easter A.D. 53. Previous to this, he abode one year and six months at Corinth (Acts xviii. 11); deducting this from the preceding date, and making allowance for the 'good while' that elapsed before he left Corinth and reached Jerusalem, we may fix his arrival at Corinth in the third quarter of A.D. 52. What time was spent by the apostle on the missionary tour which ended at Corinth, we have no means of exactly ascertaining; but from what is recorded Acts xv. 36-xvii. 34, we shall probably not greatly err if we allow somewhat more than a year for it, thus bringing the commencement of this tour to the second quarter of A.D. 51. The events preceding this in St. Paul's life it is less easy to fix chronologically. From Acts ix. 24-26 compared with Gal. i. 18, we learn that about three years after his conversion Damascus was under the government of Aretas. Now Aretas must have ceased to be ruler of Damascus before the end of A.D. 39, because Caligula allotted the whole of that district to Herod Agrippa I. soon after he became emperor, which was in A.D. 36; and Agrippa, between two and three years after, entered on the occupancy of it (Joseph. *Antiq.* xviii. 7). If, then, we place the apostle's flight from Damascus towards the close of Aretas's occupancy of it, we shall arrive at the year 36 as that of his conversion.

The apostle's first visit to Jerusalem after his conversion was thus in A.D. 39. From Jerusalem he went to Tarsus, where he abode a considerable time, and thence to Antioch, where he stayed a whole year (Acts ix. 30; xi. 25, 26). Allowing three years for this interval, we are brought to 42 as the date of the prophecy of Agabus concerning the dearth; and allowing two years to elapse between this and the arrival of Paul and Barnabas with the money sent for the relief of the poor saints at Jerusalem, we arrive at the year 44 as that of Paul's second visit to that city. This synchronizes with two events the dates of which are ascertained—the death of Herod Agrippa, and the dearth in the fourth year of Claudius, both of which took place A.D. 44. The apostle's stay at Jerusalem at this time, we may presume, was not very long; so that, at the latest, he was again at Antioch in the beginning of 45. Between this and the year 51, when, as we have seen, he commenced his second apostolic tour, we have a period of about six years in which to place the events recorded Acts xiii. 3-xv. 35, and along with them the visit to Jerusalem not recorded by Luke, but mentioned by Paul (Gal. ii. 1). If then, we allow three years for the

duration of the apostle's first tour, a year and a half for his residence at Antioch on his return from this tour (Acts xiv. 28), and a year for his residence at Antioch before commencing it (Acts xii. 25-xiii. 3), there remains only half a year unaccounted for. This we may divide between the two visits to Jerusalem, that of Gal. ii. 1, and that of Acts xv. 2; and as the latter took place immediately before his second tour commenced, we must place it in A.D. 51. We may thus conjecturally place the commencement of his first tour in the spring of A.D. 46; and if we suppose the visit of Gal. ii. 1 to have taken place during it, say A.D. 49-50, we arrive, by deducting fourteen years from this, at A.D. 36 as that of St. Paul's conversion, the date already reached by us from other data. This assumes that the fourteen years Gal. ii. 1 are to be reckoned from the apostle's conversion, and not from his first visit to Jerusalem; but on this nearly all are agreed.

Counting forward from the year 60, in the third quarter of which St. Paul left Cæsarea, we place his arrival at Rome in the spring of 61; there he lived two years in his own hired house; after A.D. 63 his history becomes obscure.

The dates above specified can, in the earlier parts of the apostle's life, only be assumed as conjecturally probable. The reader will find the whole subject of the chronology of St. Paul's life thoroughly discussed in the following works:—Anger, *De Temporum in Actis App. ratione*, Lips. 1833; Wieseler, *Chronologie des Apostol. Zeitalters*, Gött. 1848; Conybeare and Howson, *Life and Letters of St. Paul*, Lond. 1850; Davidson's *Introduction to the N. T.*, vol. ii. Lond.; Lewin, *Elements of Early Christian Chronology*.

*Personal appearance and character.*—All testimony, his own included (2 Cor. x. 10), leads to the conclusion that in outward appearance the apostle had nothing to command admiration or respect. His figure was diminutive, his eyesight defective (comp. Acts xxiii. 5; Gal. iv. 15), and his speech such as produced little effect. An ancient writer adds that he was bald and had a hooked nose like an eagle's beak. The combination of these features presents such a figure as one may often see among the Jews of our own day, especially in the humbler class of them. Such pictorial representations of the apostle as have come down to us in paintings and mosaics, agree in the main with this, though they give more of power and dignity to the apostle's countenance than this would lead us to expect.

A diminutive and feeble body is often the tenement of a great soul and an ardent energetic spirit. Such was the case with St. Paul. When he first comes before our view in the history, we see a man of intense energy, firm decision, iron resolution, and uncompromising zeal; and these qualities, tempered by purer religious feeling, guided by higher knowledge, and modified by experience, continue to characterise him so long as he appears upon the stage of life. His natural mental endowments were of the highest order. He had great breadth of view, great clearness of apprehension, a capacity of firmly grasping principles, the power of arranging his thoughts in their proper logical order, and the ability to utter them in forcible and fitting words. The dialectician predominates in his writings; but he could also play the orator after no mean fashion, and there are passages in his epistles which could have come only from the pen of one who

had in him the faculties of the poet. In his moral development everything is great and noble. To honesty of purpose and sincerity of speech, he added humility and self-distrust, generous regard for the welfare of others, a tender sympathy with those he loved, and a philanthropy that embraced the race; while the absence of everything mean, mercenary, or selfish, and a noble devotedness, at whatever cost, to the interests of a great cause, combine to shed around a character, in other respects so beautiful, traits of sublimity and grandeur. We feel that here is a man at once to be admired and loved—a teacher at whose feet one might sit with unhesitating docility—a friend on whose bosom one might lean with confidence and affection. The vigorous intellect and the large heart which belonged to him by nature, would have brought him distinction under any circumstances; but his highest claim to honour is derived from his having, under the constraining power of the love of Christ, consecrated himself body, soul, and spirit, to the service of God in promoting the best interests of men. In this respect he stands foremost among the church's heroes and the benefactors of the race.

On the *writings* of the apostle Paul, see the articles in this work under the titles of his different epistles.

Zeitalt.*, bd. ii. 1854.

PAULUS, HEINRICH EBERHARD GOTTLÖB, was born Sept. 1, 1761, at Leonberg near Stuttgart. In 1779 he entered the university of Tübingen as a theological student, and gave himself with especial zest to the study of the Oriental languages. He early avowed himself a convert to the principles of what is now commonly described as the older rationalistic school, of which school he was subsequently, and during a long course of years, one of the most distinguished leaders. In 1787 he received an invitation to become university preacher at Göttingen, but a travelling exhibition having been given to him by the Baron von Palm, he declined the invitation to Göttingen, and visited

various seats of learning in Germany, Holland, and England, giving a large share of his time to the manuscript treasures at Oxford. In the early part of 1789 he received, through the recommendation of Griesbach and Döderlein, a call to the chair of Oriental languages at Jena, and in 1793, on the death of Döderlein, he was appointed professor of theology. In 1803 he accepted an invitation to Wartburg as professor of theology and counsellor of the consistory. In consequence of the opposition of the Catholics, he was permitted to fulfil the duties of the former office during a short time only, and for a few years he was chiefly engaged as inspector of schools. In 1811 he was appointed professor of ecclesiastical history and exegesis in the university of Heidelberg, and this office he continued to fill until 1844. He died Aug. 10, 1851. The following are the most important of his exegetical works:—1. *Clavis zu dem Psalmen* Jena 1791, 8vo. 2. *Clavis zum Isaia*, Jena 1793, 8vo. 3. *Theologische-Exegetisches Conservatorium oder Auswahl aufbewahrungswerther Aufsätze und zerstreuter Bemerkungen über die alt- und neutestamentlichen Religionsurkunden. Lieferung i. Ueber die Entstehungsart der drei ersten kanonischen und mehrerer apokryptischen Evangelien. ii. Ueber den Ursprung der alt-hebräischen Litteratur durch Samuels Geist und seine Propheten Schulen*, Heid. 1822, 8vo. 4. *Philologisch kritischer und historischer Commentar über das Neue Testament*, Leip. 1800-1804, 4 Thle. 8vo, 2d edit., Lübeck 1804. In this work Paulus endeavours with wonderful ingenuity to reduce all the miracles of our Lord to natural events. 5. *Leben Jesu, als Grundlage einer reinen Geschichte des Urchristenthums; Dargestellt durch eine Gerichtszählung über alle Abschnitte der vier Evangelien und eine wortgetraue Uebersetzung derselben*, 2 Thle. Heidelb. 1828, 8vo. 6. *Drei Briefe des Heilige Johannes wortgetraue übersetzt und erklärt*, Heidelb. 1829, 8vo. 7. *Exegetisches Handbuch über die drei ersten Evangelien*, 3 Thle. Heidelb. 1830-33, 8vo. 8. *Das Apostels Paulus Ermahnungs-Schreiben an die Hebräer-Christen wortgetraue übersetzt*, Heidelb. 1833, 8vo. There are dissertations by Paulus in Pott and Rupert's *Sylloge Comm. Theolog.*, vols. i. and iii. —S. N.

PAULUS OF BURGOS, or *De Burgos*, also called *De Sancta Maria*, bishop of Carthage, was born of Jewish parents 1351 or 1352, his Jewish name being (רבי שלמה הלוי דבורגוס) *Rabbi Solomon Ha-Levi of Burgos*. His parents gave him the best Jewish education, and Solomon became remarkably proficient in his knowledge of Hebrew, the Bible, the Talmud, and the whole cycle of Rabbinical literature. His distinguished attainments, as well as his great piety and scrupulous observance of the Jewish practices, raised him to the dignity of Rabbi. He was regarded as a pillar of Judaism, and some of the most distinguished Hebrew literati of the day were among his pupils and friends. His eminent position and qualities recommended him to Henry III., who appointed him Jewish almoner, which brought him in daily contact both at court and elsewhere with Christians, who got him to discuss the questions at issue between Judaism and Christianity. This led him to study the patristic literature, and, as he himself tells us, the reading of Thomas Aquinas' writings convinced him of the truth of Christianity. He

made a public profession of the Christian religion, and was baptized July 21, 1390, in his fortieth year, and in consequence was deserted by his wife and sons. His conversion created the greatest sensation among the Jews, who were filled with fear lest the example of so learned and influential a rabbi might be followed by those who revered him. R. Solomon, the illustrious rabbi of the synagogue, having now assumed the name of Paul of Burgos, determined, like his namesake of Tarsus, to become teacher in the Church, and for this purpose went to the University of Paris. His thorough knowledge of the Hebrew language and the Bible, his mastery of other departments of literature, his extraordinary zeal for the new faith, and his marvellous eloquence, rapidly advanced him to positions of honour in the Church. Benedict XIII., who was then (Sept. 28, 1394) anti-pope at Avignon, successively made him archdeacon of Trevingo, canon of Seville, and bishop of Carthage, whilst Don Henry III., King of Castile, made him chancellor of Castile and his privy councillor. He wrote (1) *Additiones ad Postillam Nicolai de Lyra super Biblias*, which he finished in 1429, and which were first published with De Lyra's *Commentary*, Nuremberg 1493, and frequently since. (2) *Questiones XII. de nomine divino Tetragrammato*, published with notes by Drusius, who also added to it his own work on the Tetragrammaton, Amsterdam 1634. (3) *A defence of the Messiahship of Christ*, in Hebrew, being a reply to his friend Josua Alorqui, printed in the Hebrew Annual, entitled *Ozor Nechmad*, vol. ii., Vienna 1857, p. 5, ff.; and (4) *Scrutinium S. Scripturarum sive Dialogus Sauli et Pauli*, in two books, which he finished in 1434, in his eighty-second year. It was first published Rome 1470, then Mantua 1475, then Paris 1520, and frequently since. Paulus died Aug. 29, 1435, in his eighty-third year. Though more thoroughly conversant with Hebrew literature than Nicolas de Lyra, Paulus de Burgos had not his impartiality of judgment, and his bitterness against Judaism prevented him from making that use of the Jewish grammarians and expositors which might have been expected from so great a scholar. Comp. Graetz, *Geschichte der Juden*, vol. viii., Leipzig 1864, p. 84-93.—C. D. G.

PAVEMENT. [GABBATHA.]

PAVILION. [TENT.]

PAXTON, GEORGE, D.D., was professor of divinity to the Associate Synod of Original Seceders in Edinburgh when he died, at the advanced age of 75, in 1837. He was a man greatly respected in the denomination to which he belonged, and possessed in his youth and prime rare gifts of popular eloquence. He is known as an author chiefly by his work entitled *Illustrations of Scripture*, which has run the course of three editions. The last is the most valuable and complete, from the care expended on it by the editor, Dr. R. Jamieson of Glasgow. The work includes three divisions—geography, natural history, and manners and customs. Since the date of the last edition, 1842, subsequent research has shed great light upon all the topics embraced under these divisions. But the work of Paxton has three distinctive merits. It is an able summary of the most reliable information that had been obtained up to his day, and indeed he draws liberally from preceding writers, such as Bochart, for the materials. His

own careful study of the original enables him to make a skilful use of his materials in the illustration of many passages of Holy Writ. His work, moreover, is written simply, yet eloquently, so as to form pleasant reading, and is by no means a mere book of reference.

PEACOCK. [TUKIYIM.]

PEARCE, ZACHARY, D.D., a learned English prelate, born in 1690, was the son of a distiller in Holborn. He was educated at Westminster School, from which he passed to Trinity College, Cambridge, where he became distinguished as a classical scholar. Having dedicated his edition of Cicero *De Oratore* to the Lord Chief-Justice Parker, he secured a friendship which proved of great advantage to himself. For when the learned judge was made Lord-Chancellor, he took Mr. Pearce into his family as private chaplain; and various preferments followed, till, at length, the chaplain was made Dean of Westminster in 1739; bishop of Bangor in 1748; and bishop of Rochester in 1756. To secure time for the completion of certain literary works, he expressed a desire to resign his see, but George III. told him it must not be thought of. He died at Little Ealing, Jan. 29, 1774. His published works, literary and theological, are various, but the following is the most valuable of them, and that by which he is best known:—*A Commentary, with Notes, on the Four Evangelists and Acts of the Apostles, together with a New Translation of St. Paul's First Epistle to the Corinthians, with a Paraphrase and Notes; to which are added other Theological Pieces.* London 1777, 2 vols. 4to. This work, which was published after the author's death, is pronounced by Dr. A. Clark 'invaluable,' displaying 'deep learning and judgment beyond all praise.'—I. J.

PEARLS. [GABISH; PENINIM; MARGARITES.]

PEGANON (πήγανον). The word *rue* occurs only in Luke xi. 42. 'But woe unto you, Pharisees! for ye tithe mint and rue and all manner of herbs, and pass over judgment,' etc. In the parallel passage, Matt. xxiii. 23, *dill* (ἀνηθον), translated *anise* in the English Version, is mentioned instead of *rue*. Both dill and *rue* were cultivated in the gardens of Eastern countries in ancient times as they are at the present day. Dioscorides describes two kinds, πήγανον ὀρεῶν, *Ruta montana*, and πήγανον κηπευτῶν, *Ruta hortensis*. 'Ex hortensi autem esui magis idonea, quæ juxta ficos provenit.' These are considered by botanists to be distinct species, and are called respectively, the first, *Ruta montana*, which is common in the south of Europe and the north of Africa; the other is usually called *Ruta graveolens*, and by some *R. hortensis*, which is found in the south of Europe, and is the kind commonly cultivated in gardens. *Rue* was highly esteemed as a medicine, even as early as the time of Hippocrates (comp. also Pliny, *N. H.*, xix. 8; Columella, *De Re Rust.*, xii. 7. 5). That it was employed as an ingredient in diet, and as a condiment, is abundantly evident from Apicius, as noticed by Celsius, and is not more extraordinary than the fondness of some Eastern nations for assafoetida as a seasoning to food. That one kind was cultivated by the Israelites, is evident from its being mentioned as one of the articles of which the Pharisees paid their tithes, though they neglected the weightier matters of the law. Rosenmüller

states that in the Talmud (*Tract Shebiith*, cap. ix., sec. 1) the *rue* is indeed mentioned amongst kitchen herbs (*asparagus portulacæ et coriandro*); but, at the same time, it is there expressly stated, that it is tithe free, it being one of those herbs which are not cultivated in gardens, according to the general rule established in the Talmud.' Celsius long previously observed, with reference to this fact: 'Cum autem dicunt ibidem, rutam a decimatione immunem esse, ostendunt, quantum recesserint a consuetudine majorum, quos decimas ex ruta separasse, ipsum affirmat os veritatis' (*Hierobot.* ii. p. 253).—J. F. R.

PEIRCE, JAMES, was born in the east of London in the year 1673, and was brought up, in consequence of the early death of both his parents, in the family of Matthew Mead, one of the ejected ministers of 1662, and then pastor of the Nonconformist congregation at Stepney. He studied first at Utrecht, under Witsius and Leydecker, and afterwards at Leyden, under Perizonius and Spanheim. Having entered the nonconformist ministry, he accepted an invitation to the pastoral charge of the church at Cambridge, from which place he removed in 1713 to Exeter, where he remained until his death, March 30, 1726. Whilst residing at Cambridge he became intimate with Whiston, and subsequently adopted the same theological sentiments. His writings are chiefly controversial. He took an active part in the discussions occasioned by Hoadley's celebrated sermon on the Church of Christ; and in the Salter's Hall controversy, on the side of the Arian party. His sole contribution to Biblical literature is—*A Paraphrase and Notes on the Epistle of St. Paul to the Colossians, Philipians, and Hebrews, after the manner of Mr. Locke, to which are annexed several critical Dissertations on particular Texts of Scripture.* London 1727, 4to. This was a posthumous publication, and was left in an unfinished state. It ends with Heb. x. 34, but adds a fragment on Heb. xii. 25-29. [HALLETT]. This work attained to considerable repute both in England and in other countries. It was translated into Latin by J. D. Michaelis, and published at Halle 1747, 4to.—S. N.

PEKAH (פֶּכָח, *open eyed*; Sept. Φακέ), the officer who slew Pekahiah and mounted the throne in his stead (B.C. 758), becoming the eighteenth king of Israel. He reigned twenty years. Towards the close of his life (but not before the seventeenth year of his reign) he entered into a league with Rezin, king of Damascene-Syria, against Judah; and the success which attended their operations induced Ahaz to tender to Tiglath-pileser, king of Assyria, his homage and tribute, as the price of his aid and protection. The result was that the kings of Syria and Israel were soon obliged to abandon their designs against Judah in order to attend to their own dominions, of which considerable parts were seized and retained by the Assyrians. Israel lost all the territory east of the Jordan, and the two and a half tribes which inhabited it were sent into exile. These disasters seem to have created such popular discontent as to give the sanction of public opinion to the conspiracy headed by Hosea, in which the king lost his life (2 Kings xv. 25, *seq.*; xvi. 5, *seq.*; Is. vii.; viii. 1-9; xvii. 1-11). [An Assyrian inscription commemorates the defeating of Rezin and the taking of Damascus by Tiglath-

piles, as well as his receiving tribute from the king of Samaria. The name given to the latter on the inscription is Menahem, not Pekah; but this may be a mere mistake of the graver (Rawlinson, *Bampton Lect.*, p. 135, 409). There seems no ground for Mr. Rawlinson's statement that two invasions of Israel by the Assyrians took place during the reign of Pekah; there is no allusion to this in the monuments, and the narrative in 2 Kings xvi. 7-9 is only the fuller account of what is alluded to in ch. xv. 29.]

**PEKAHIAH** (פִּקְחִיָּהּ, *Jehovah has opened his eyes*; Sept. *Φακελίας, Φακελας*), son and successor of Menahem, king of Israel, who began to reign in B.C. 760. He patronised and supported the idolatry of the golden calves; and after an undistinguished reign of two years, Pekah, one of his generals, conspired against him, and with the aid of Argob and Arieah, and fifty Gileadites, slew him in the haram of his own palace (2 Kings xv. 22-25).

**PEKOD** (פִּקְדָּה), a name applied to Babylonia, or part of it (Jer. l. 21), and to the inhabitants collectively (Ezek. xxiii. 23). The name may contain an allusion to פִּקַּד, *to visit, to punish* (comp. Jer. l. 18), and פִּקְדָּה, *visitation* (ver. 27, 31), and may be applied to Babylonia and its people as the object of Jehovah's wrath. The Rabbins mention a city called *P'god*, in Babylonia, where there was a school. [KOA.]-W. L. A.

**PELEG**, son of Eber, and fourth in descent from Shem. His name, פֶּלֶג, means *division*, and is said to have been given him 'because in his days the earth was divided' (Gen. x. 25; xi. 16). [NATIONS, DISPERSION OF.]

**PELICAN.** [QAATH.]

**PELITHITES.** [CHERETHITES and PELITHITES; PHILISTINES.]

**PELLICAN**, CONRAD, in German Kürschner, born at Ruffach, in Alsace, in 1478, began his studies, which were interrupted by an attack of the plague, at six years of age; at thirteen entered the university of Heidelberg, of which his maternal uncle was rector, but left it for want of means. At fifteen he entered a convent of Franciscan monks, and studied theology, philosophy, and mathematics, at Bâle and Tübingen. Having obtained a volume of the Hebrew Bible from a brother Franciscan, who had been a Jew, he devoted himself with ardour to its study, and soon constructed a dictionary and grammar of the language. At twenty-three he was ordained priest, and exhibited such talents as a teacher of theology, philosophy, and astronomy, in the convent of Bâle, that Cardinal Raymond would have given him the degree of Doctor in theology, had it not been for the jealousy of his superior. He afterwards took a leading position in the order, and was himself superior of the convent at Bâle in 1519, about which time he secretly became a convert to the opinions of Martin Luther, but maintained his post in the convent till 1526, when, at the pressing request of Zwinglius, he became professor of Hebrew at Zurich. He refused a similar office at Stuttgart in 1534 on conscientious grounds, was twice married, and died at Zurich in 1556. His works are numerous. Those which bear most on Biblical literature

are—1. *Psalterium Davidis ad Hebraicam veritatem interpretatum cum scholiis brevissimis*, Strasburg 1527, in 8vo. The Zurich edition of 1532, in 8vo, is more carefully prepared and more complete. 2. *Commentarii Biblicorum cum vulgata editione, sed ad Hebraicam lectionem accuratè emendatâ*, Zurich, from 1531 to 1536, five volumes folio. Richard Simon says of this work:—'He keeps to the literal sense, and does not lose sight of the words of his text. Though well read in rabbinical authors, he seeks more to be useful to his readers than to display his rabbinical lore. He considers it safest to borrow nothing from the Jews but grammatical observations, and that the sense must be found by a comparison of one passage of Scripture with another, and the help of the ancient Greek and Latin commentators. He says much in few words, and is not one of those who superstitiously believe that the providence of God has secured the sacred text against the smallest change.' 3. *Commentarii in Novum Testamentum*, Zurich 1537, folio, 2 vols. Pellican is less happy in these commentaries than in those on the O. T. 4. *Grammatica Hebraica, necnon et margarita Philosophica*, Strasburg 1540, 8vo. Father Courayer is of opinion that Reuchlin was much assisted in his works by Pellican. Pellican certainly reviewed the Bible of Leo of Juda, and furnished it with a preface (*Vita Theologorum Germanorum. Notices biographiques et littéraires sur les hebraisants de Tubingue*).—M. H.

**PELONITE** (פֶּלֹנִי). There are some remarkable variations in the form of this word, both in the Hebrew text and in versions, which it may be well to notice. In 1 Chron. xi. 27, 36, and xxvii.

10, the Hebrew has פֶּלֹנִי; but the following variations occur in the LXX. and Vulgate:—xi. 27, Φελωνί; Alex. Φαλλωνί; *Phalonites*: ver. 36, Φελλωνί in both copies; *Phelonites*: xxvii. 10, ἐκ Φαλλοῦς in both copies; *Phallonites*. Again, in 1 Chron. xi. 27 Helez is called 'the *Pelonite*,' whereas in the parallel in 2 Sam. xxiii. 26 he is called 'the *Paltite*.' [PALTITE.] Also, in Chron., 'Ahijah the *Pelonite*' is mentioned, whereas in 2 Sam. (xxiii. 34) his name is recorded as 'Ahitophel the *Gilonite*.' These discrepancies most probably arise from the different ways of spelling the names.

It appears from the scope of the context that the term *Pelonite* is not a patronymic (as is represented in the Targum), but a descriptive name indicating the native place:—Helez and Ahijah were inhabitants of *Palon* (פֶּלֹן), a place now unknown. It cannot be another name for the town of Beth-palet, in the south of Judah, as some suggest, for Helez the *Pelonite* 'was of the children of Ephraim' (1 Chron. xxvii. 10): *Palon* was thus most probably in the territory of Ephraim.—J. L. P.

**PEN.** [WRITING.]

**PENIEL** or **PENUEL** (פְּנִיֵּל, in Gen. xxxii. 31; τὸ εἶδος τοῦ θεοῦ; in ver. 30, פְּנִיָּהּ; Εἶδος θεοῦ; elsewhere Φανουῖλ; *Phenuel*). The origin of this name, and the position of the place, are given in the remarkable narrative of Gen. xxxii. 24, seq. The interview between Laban and Jacob was over, and the latter having sent messengers to his brother Esau, they on their return reported that he

was coming to meet him, with an escort of four hundred men (6). Jacob was afraid, and made all necessary preparations to appease, and, if unsuccessful, to escape from his brother. The final arrangements having been made on the banks of the Jabbok, 'Jacob was left alone; and there wrestled a man with him until the breaking of day' (24). The place appears to have been the north bank of the stream. 'The man' (אִישׁ) who

wrestled with him declared himself to be God (28, אֱלֹהִים); 'and he blessed him there' (29); 'and Jacob called the name of the place *Peni-El* ('The face of God'): for I have seen God face to face' (30). It does not appear that there was any town or village upon the spot at the time of this wondrous event; but it was probably then marked by some rude cairn or stone to serve as a record of the divine presence. We hear no more of it for five hundred years. After the defeat of the Midianites in the valley of Jezreel, Gideon pursued them to their home in the eastern desert. On reaching the fords of the Jordan at Succoth, he asked the people of that city to supply food to his fainting followers; they refused, 'and he *went up thence to Peniel*, and spake unto them likewise' (Judg. vii. 8). He probably ascended from the valley of the Jordan through the glen of the Jabbok, which falls into the Jordan a few miles below Succoth. This would bring him direct to the site of Peniel, on which a city appears to have been built in the interval. It was natural, and in accordance with Eastern custom, that a holy place such as Peniel should become the nucleus of a town. In the time

of Gideon there was a *tower* (מִגְדָּל) at Peniel, which Gideon destroyed on his return from the conquest of the Midianites. It would seem too that the city was then completely depopulated (ver. 17). It may have remained a ruin till the days of Jeroboam, of whom we read that after taking up his abode in Shechem, he 'went out from thence, and built Peniel' (1 Kings xii. 25). We hear no more of Peniel in Scripture. Josephus merely repeats the Scripture notices (*Antiq.* i. 20. 2; viii. 8. 4), as do Eusebius and Jerome (*Onomast.*, s. v. *Fanuel*). They do not appear to have known the exact site; and indeed Jerome represents the Peniel of Jacob, Gideon, and Jeroboam as distinct places. The site has not been discovered, nor has that section of country been as yet explored with sufficient minuteness to enable us to say whether any ruins exist.—J. L. P.

PENINIM (פְּנִינִים, pl. of פְּנִינָה, once [Prov. iii. 15] פְּנִינִים, for which the Keri has פְּנִינִים), a precious stone of a ruddy colour (Lam. iv. 7), hence supposed by some to be the ruby, by which the word is always rendered in the A. V. (Job xxviii. 18; Prov. iii. 15; viii. 11; xx. 15; xxxi. 10; Lam. iv. 7). Michaelis suggested *red coral* as more probably the article intended, and this opinion has been generally followed since. Gesenius adduces in support of it the etymology, deriving the word from פָּנָה, *to divide or branch out*; but this is a doubtful etymology from a supposititious source. Fürst traces the word to פָּנָה, *to shine*, with more probability. Bochart follows some of the Rabbins in making it the *pearl*; but to this Lam. iv. 7 is clearly opposed, unless the allusion there be to the pinkish hue which sometimes is found in pearls.

It has been objected to Michaelis's suggestion that the coral is called by another name, *Ramoth* [which see]; but it is possible that the red coral may have had a special designation as the more ornamental of the two. A more serious objection, and the strongest argument in favour of the Peninim being pearls, is furnished by the improbability of a laudatory comparison of men's complexions to red coral or rubies.—W. L. A.

PENINNAH (פְּנִינָה, *coral*; Sept. Φερνάνα), one of the two wives of Elkanah, the father of Samuel (1 Sam. i. 2).

PENNY. [DENARIUS.]

PENTATEUCH, the name applied to the five books of Moses, which form the earliest portion of the O. T. canon—viz., the books of Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The term expresses the unity of this portion of Scripture as well as the variety of books comprised in it. Its unity depends upon the identity of authorship, of historical sequence, and of inspired authority, and has found expression alike in the form in which it has been preserved and the ancient titles given to it. In Hebrew manuscripts it constitutes but one roll or volume, divided into 669 sections, called *perashioth*, a division of high antiquity, certainly earlier than the Talmud, and believed by many to have been contemporaneous with the books themselves. In the Jewish canon, this portion of Scripture is termed 'the Book of the Law' (Deut. xxviii. 61; xxix. 20; xxx. 10; xxxi. 26), or simply 'the Law' (1 Chron. xvi. 40; Luke x. 46; xxiv. 44; Acts xxiv. 14, etc.), or 'the Law of Moses' (Mal. iv. 4; John vii. 23; xiii. 39, etc.), or 'the Law of the Lord' (2 Kings x. 31; Ezra vii. 10; Luke ii. 39). The Rabbinical writers call it five-fifths of the Law. The Greek name πεντάτευχος, from πέντε and τεύχος, which in the Alexandrian idiom signifies a volume, has been commonly accepted as an apt and convenient term. To what date the division into five books is to be ascribed, is, however, a matter of dispute. As the names of the separate books are of Greek origin, it has been supposed that the division is due to the Septuagint translators (B.C. 285). Josephus, however, states that 'five books belong to Moses' (*c. Apion.* i. 8), without any hint of this subsequent arrangement; and the structural peculiarities of the books themselves lead to the belief that the division was original. The general accuracy with which the Greek names describe the contents of each book, indicates a substantial division of subject, and points to the same conclusion. Thus the book of Genesis is exclusively occupied with the events preceding the settlement in Egypt, and lying beyond the memory of the generation for whom Moses primarily wrote, and stops rigidly at that point of the history. The book of Deuteronomy in the same way deals immediately with the new generation who had grown up in the wilderness, and serves to mark their identity, naturally by immediate descent, religiously by the covenanted promises inherited by them, with the people that came out of Egypt. Each of the three books which lie between has its own peculiarity of subject. The book of Exodus contains an historical sketch of the events preceding and connected with the promulgation of the law, and closes with the consecration of the priesthood, and the establishment of the tabernacle services.

Leviticus is exclusively occupied with the laws regulating the services of the tribe and family of Levi. Numbers supplies the historical events which followed the formal establishment of the Mosaic code, and links that central point of Jewish history with the forty years' wanderings in the wilderness, and the final entrance into Canaan. Thus the central book of the five, as regards its order, stands like an historical resting-point amid the grand events which preceded and followed it.

The Mosaic authorship and inspired authority of the Pentateuch are very closely connected with each other. In asserting the Mosaic authorship, it is not intended to include every portion in that exception, such, for instance, as the portion which narrates the death of Moses (Deut. xxxiv.) Unless recourse is had to the violent and unnecessary supposition that Moses was inspired to narrate beforehand his own death, which would convert history into prophecy, it is naturally impossible that this chapter can have been written by the great lawgiver himself. But the absolute nature of the impossibility clears away any imaginary difficulty, for so transparent and palpable a fraud as the ascription of these concluding verses to Moses himself, can never have been intended by those who framed the canon of Scripture, and cannot be imputed to our Master himself without blasphemy. No parallel can be drawn between them and other portions of the Pentateuch, for there are no other to which the same conditions apply. These verses form the necessary and natural conclusion to the preceding books, and possess the same canonical authority, though they do not claim the same authorship as the other portions of the Pentateuch. The old deistical objection to the Mosaic authorship from these verses may at once be put out of the way as unworthy of further or more serious notice.

It is necessary to take a rapid survey of the evidence on which the Mosaic authorship and authority of the Pentateuch is founded, before the object and purport of modern objections can be properly appreciated. We begin with the divine commands, in obedience to which Moses committed to writing the books of the law. These commands are repeated, and it is only by observing their cumulative evidence that the strength of the case is seen; objections which might be possibly urged against single passages become inapplicable to the whole. The first passage occurs in Exod. xvii. 14. After the victory over the Amalekites, the lawgiver is directed to record the facts, together with the divine declaration that he 'would utterly put out the remembrance of Amalek from under heaven.' This one event only is specified, but then it was to be inscribed in 'the book' (בִּסְפָּר). In Exod. xxiv. 4, 7, the language

becomes more specific. First of all, the immediate revelation of the three preceding chapters is declared by Moses to the people. He 'told the people all the words of the Lord and all the judgments,' then 'Moses wrote all the words of the Lord.' Lastly, a particular book bearing a definite character is specified as being that in which they were written. 'And he took the book of the covenant and read in the audience of the people.' That the word covenant has reference not to any one special act, but to the whole relation in which the chosen people stood towards God, and therefore to the whole series of promises and commandments on which it was based, may be seen by a

careful comparison of Lev. xxvi. 42-45, Deut. iv. 31, 2 Kings xxiii. 2-21. It must be regarded as a continuation of the same work that 'Moses wrote their goings out according to their journeys by the commandment of the Lord' (Num. xxxiii. 2). The perpetual obligation of this written code is affirmed in the provisions for the future establishment of the kingly power among the people. 'He (the king) shall write him a copy of this law out of that which is before the priests, the Levites' (Deut. xvii. 18). Upon their future obedience to it the promises of the divine blessing upon the people were made dependent. 'If thou wilt not observe to do all the words of the law that are written in this book' (Deut. xxviii. 58). The completion and final closing up of this portion of the divine revelation is recorded immediately before the death of Moses himself, by the addition of the song which God commanded Moses to teach the people (Deut. xxxi. 22). And, lastly, the permanence which the book was designed to have, and the object it was to fulfil, are formally announced. 'Take this book of the law (a phrase employed on three previous occasions, Deut. xxviii. 61; xxix. 21; xxxi. 26), and put it in the side of the ark of the covenant of the Lord your God, that it may be there for a witness against thee.'

The purpose which this book was thus designed to serve was one which a definite written revelation could alone accomplish. For history conclusively proves that no oral tradition can be preserved in its purity and integrity, as seen in the experience alike of the Jewish and the Christian Church. A system which looked so far forward into the future, and which contemplated the preservation of its authoritative records in such an exact form as to constitute a standing witness of the obedience or disobedience of the people, could only rest on written documents. It is remarkable, in this point of view, that in the second promulgation of the moral law on the top of Sinai, this principle was affirmed, since the commandments appear to have been written twice over, once by God himself on the tablets of stone, and a second time by Moses, in the book, we must believe, which was thus gradually advancing towards its completed form. 'I will write on these tables the words which were in the first tables' (Exod. xxxiv. 1; Deut. x. 2). On the other hand, the statement is equally definite: 'And the Lord said unto Moses, Write thou these words . . . and he wrote upon the tables the words of the covenant, the ten commandments' (Exod. xxxiv. 27, 28).

It is true that these passages do not define the limits of the book, nor prove its absolute identity with the existing copies of the Pentateuch. But other evidences will be found to supply this proof. We have already the fact that a book was written by Moses under the immediate authority of God, and that this book was intended to be of perpetual obligation. Now, supposing that the Scriptural testimony of the Mosaic authorship of the Pentateuch had ended here, although we shall see this not to be the case, yet even so no moral doubt could exist that this design was carried into effect, and that the books thus preserved were substantially identical with those which have come down to us. For at this period the Jewish people suddenly take their place amid the settled nations of the world, and enter upon that grand and mysterious national life which has continued till our own day. It will

not be denied by any that this race was distinguished from all others by many peculiar characteristics. Some of their national habits exhibited affinity in various points of detail with the surrounding polytheism amid which they dwelt; but their whole system was sharply separated, alike by the grandeur of its religious monotheism and by its complex social and civil organisation, from that of all other nations. Their code of laws was penetrating enough to affix its indelible peculiarities on the race who lived under them, and to endow it with a force and elevation, a perpetuity of national life, and a world-wide influence, to which no parallel can be found in history. Such an effect would itself prove the existence of a cause as permanent as itself, for the precise ritual and ceremonial enactments of the system could never have been maintained without an authorised code of directions. When we inquire into the nature of that peculiar polity to which it is to be attributed, we find it in the books of Moses. The Pentateuch contains a system which explains the national life of the Jewish race, and which in its turn is equally explained by it. As we know, on the one side, that the Pentateuch was reduced by Moses to a written form, and, on the other side, that the phenomena of national Jewish life can only be explained by the influence of a positive written code, it is impossible not to put the two facts together, and identify the Mosaic books of the law with the code of subsequent times. In other words, the permanence of the effect proves the permanence of the cause. The subsequent history of the Jewish race would have sufficed to prove that the Mosaic code must have existed in a permanent form from that period till the present, even if no positive external proofs of the fact had existed.

But the testimony of the subsequent books of the O. T. canon positively affirms the same conclusion. Joshua was instructed 'to observe to do according to all the law which Moses, my servant, commanded you' (Josh. i. 7). After the taking of Ai, in accordance with the instructions given to Moses (Deut. xxvii. 4-8), Joshua wrote upon the memorial-stones, in Ebal, 'a copy of the law of Moses,' and afterwards 'read all the words of the law . . . according to all that is written in the book of the law' (Josh. viii. 32-34). And in dismissing to their settlements, on the other side of Jordan, the Reubenites and Gadites, and half-tribe of Manasseh, he laid upon them the parting charge, 'Take diligent heed to do the commandments and the law' (Josh. xxii. 5). The Psalms of David are full of references to this law, under expressions inapplicable to anything but a definite written code. Thus he calls it God's law, God's word, his statutes, his ordinances, his testimonies, his commandments. The obligation of the law formed the prominent topic of David's charge to Solomon, 'Fulfil the statutes and judgments which the Lord charged Moses with' (1 Chron. xxii. 13). In the troubled times succeeding the separation of Israel and Judah, the formal copy lodged in the temple appears to have been lost, for we are told of its recovery in the days of Josiah, amid the restorations which his pious zeal carried out in the temple buildings: 'And Hilkiah the high-priest said unto Shaphan the scribe, I have found the book of the law in the house of the Lord' (2 Kings xxii. 8); and the book is subsequently designated by the title which it bore in the days of Moses himself, 'The Book of the Covenant.' The tem-

porary loss of this temple-copy is not to be confounded with the total oblivion of the law itself, and the entire neglect of its precepts; for, in the interval, we are told that Asa commanded Judah to do the law, that Jehoshaphat made it prominent in the directions given to the judges, that Hezekiah kept the Passover 'according to the law of Moses, the man of God,' and that king Amaziah, in punishing the murderers of his father Joash, was guided by its regulations, 'the children of the murderers he slew not, according to that which is written in the book of the law of Moses' (2 Kings xiv. 6). And after Samaria had been taken into captivity, the settlers who were brought from the east to occupy the land vacated by the captive Israelites, were warned of the 'statutes, and the ordinances, and the commandments which God wrote for the children of Jacob.' Such language could not have been employed by the priest who 'came and dwelt at Bethel,' unless he had been acquainted with the written code. These passages, therefore, suffice to show that the book produced by Hilkiah was not an imposture of his own, but was only the authentic copy of a written law, known and recognised meanwhile; and they serve to carry the recognition of the Pentateuch consistently through the intervening period down to the days of Josiah. The preservation of the Mosaic code in its positive written shape during the Babylonish captivity is declared with the same explicitness: 'Ezra was a ready scribe in the law of Moses which the Lord God of Israel had given' (Ezra vii. 6); the covenant into which Israel entered after the restoration was done 'according to the law' (Ezra x. 3). At the public gathering of the people, Ezra read out of 'the book of the law of Moses, which the Lord had commanded to Israel' (Neh. viii. 1). Lastly, about fifty years later, when the last tones of O. T. prophecy were sounding, the recognition of the law was blended with its accents: 'Remember ye the law of Moses, my servant, which I commanded unto him in Horeb for all Israel, with the statutes and judgments.' Thus, during the whole interval from the death of Moses down to the close of the O. T. canon, we find repeated references to the existence of the books of the Pentateuch. The longest pause in this consecutive line of testimony extends from the death of Joshua till the accession of David, a period of national decline and widespread apostasy, during which fragmentary glimpses of events alone have been afforded to us; though they are fragments which, in their place in the inspired volume, fall in with wonderful consistency into the purpose and structure of the whole. But, after David's time, no long period of silence remains; David, Solomon, Asa, Jehoshaphat, Amaziah, Hezekiah, Josiah, Ezra, Nehemiah, and Malachi, bear continuous witness both to the Mosaic authorship and to the inspired authority of this portion of the canon.

If this direct verbal testimony had been absent, the entire structure of the scriptural books from Joshua to Malachi would have necessitated the same conclusion. These books never could have been written in their existing form, unless by men familiarly conversant with the Pentateuch. Hence are derived the ultimate principles which underlie the whole. They are united to it by a mass of reference so complex, intricate, and minute, as to constitute a study in itself. The grand monotheism which pervades the whole, the over-ruling Provi-

dence which is everywhere thrown into the foreground, the national election of the Jew, and his relation to his forefathers in the perpetual covenant sealed between God and them, would all be inexplicable without this reference to the transactions of the past. Throughout the prophetic books especially, the tone of thought and feeling, the language employed, the illustrations used, the accents of blended reproach, warning, and promise, the allusions to the past, and the predictions of the future, would be unintelligible to the student if the Pentateuch were not in his possession to interpret them. This is as true, and perhaps more forcibly evident in regard to the N. T. and the teaching of our Lord and his apostles, than it is in the O. T. and in the language of the prophets. The Pentateuch is the thread of gold which runs—now latent, now prominent—throughout the whole body of the Scriptures. Retain it in its place, and the whole is united by a consistent purpose from end to end; take it away, and all the rest of revelation becomes a mass of inextricable confusion. The recognition of this bearing of the authority of the Pentateuch on the authority of the other scriptural books is most necessary. For the purpose, however, of succinctly stating the positive argument in favour of the authorship and divine authority of the five books of Moses, it is sufficient to trace the line of testimony down to the time of Malachi, for here we find that firm footing in the acknowledged facts of profane history which enables us to close every single avenue against the objections of unbelief.

For if the argument stood at the point to which we have now brought it, we should be liable to the retort that the witnesses themselves lie under the taint of unfaithfulness. It might be, as it has been broadly argued, that the whole of the scriptural books altogether are an imposture, a fraud which priestcraft has succeeded in palming upon the credulity of mankind, and are consequently devoid of historic existence and credibility. On this supposition, it might be imagined that the mind or minds which conceived the composition of the Pentateuch, conceived at the same time the composition of the later books, and that the authors naturally took care to make the one consistent with the other, and to pervade what purport to be the later compositions with such references to what purport to be the earlier, as would accord with that theory of successive compositions on which the fraud was based. In this point of view, every instance in which the language of the Pentateuch is employed in the later books would only constitute a further evidence of imposture.

A passing glance must be given at the improbability of this hypothesis on the ordinary standards of literary criticism. For the deliberate fabrication of accidental references, neither so prominent as to obtrude themselves forcibly on the attention, nor so wholly latent as to defy detection, stand foremost among the most difficult of tasks. The long history of spurious publications, and the definite canons which a cautious criticism has adopted to guide investigation into their claims, suffice to prove that in no other case, at all events, has human ingenuity succeeded in accomplishing such a work; and if it has been successfully done in the case of the Scriptures the instance stands absolutely alone. In all other cases a minute examination has detected undeniable anachronisms and contradictions. We

claim, on the positive side of the argument, that a minute examination of the Scriptures only tends to bring into notice a number of minute and latent harmonies which a more cursory investigation had overlooked. The negative and controversial side of this question still remains for further notice. Meanwhile a perusal of such a book as Professor Blunt's *Undesigned Coincidences* will show in regard to the O. T. what Paley's *Horæ Paulinæ* shows in regard to the N., the strong *primâ facie* evidence afforded by these coincidences in favour of the genuineness and credibility of the Scriptures, and against the hypothesis of their fraudulent origin.

But let it be supposed that this difficulty was overcome, and that the theory of an imposture was admitted as a possible explanation of the facts so far as we have yet considered them; we are now brought into contact with another set of facts altogether, which renders the theory absolutely incredible. For at the time of Malachi we enter the domain of recognised history, and listen to witnesses absolutely impartial. Profane history here enables us to get a clear view of the world as it existed at the time, of its dominant nations, and of their mutual relations towards each other. History became at this date a recognised branch of human study. Herodotus, Thucydides, Xenophon, Polybius, Dionysius, Diodorus, Arrian, and Plutarch, constitute the links of the historical literature which unites together the times of the later prophets and the times of Christ. On the great salient facts of this period not even the scepticism of modern historical criticism has ventured to cast a doubt.

Now, when in this full blaze of historic light we look at the condition of the world, we find the Jew prominent in the picture. If we saw him as the member of a great nation already compacted into unity under the influences of a national constitution without parallel in the history of the other nations of the world, the case would be a strong one. But we see more than this: we see the Jew, when this stage of national existence had already become a thing of the past; we see him already transferred into a later stage, that of national decay. We find him scattered among every known nation of the world, and yet in every place and under every circumstance retaining his peculiar national type. The case is not, we must clearly remember, that of an exiled people banished into some distant spot or into the midst of a lonely barbarism, and there nursing in sullen isolation the exclusive pride of his race, and maintaining as the pledge of his former greatness the law which had been the stay of his happier times. But it is that we find him dispersed in separate communities up and down the world, seen in all the great cities, and mingling with the ordinary business of mankind, and yet retaining all over the world the same ineffaceable characteristics. At the seats of learning the Jew is found more than usually prominent, such as Alexandria, Pergamos, Tarsus, Antioch. At Alexandria his history was a fact so notorious that the Scriptures, which had impressed upon his race their own stamp, had become the object of literary curiosity, and were given to the world in a Greek version, the Septuagint, which remains to our own day.

There can therefore be no possible question that the Jew, such as we know him, and the Jewish Scriptures, such as we have them in our own day, existed at the time of the Ptolemies; that is, the Jewish Scriptures of that day were the Scriptures

of the O. T. as now received, not only containing the Pentateuch as an integral part of themselves, but as the characteristic part of the whole—the historical starting-point of their national history, and the authoritative code of laws which had coloured and moulded it from the beginning downwards. The existence of the people, with their distinctive religious creed, their peculiar civil regulations, and their exclusive ritual, constitutes one fact; the existence of their Scriptures constitutes another. The facts are distinct, but not separate. The law could not have survived without the nationality; the nationality could not have existed without the law. To explain either the one fact or the other without an extensive antecedent history running far back into the past would be impossible. The two together supply an argument for the historical reality of the events of the Jewish history and the divine authority of the Jewish Scriptures, which never has been answered, and is, we believe, unanswerable.

If the events of early Jewish history, as narrated in the Pentateuch, really took place, and are to be accepted as historically true, then it is impossible to deny the divine legation of Moses and the authority of the books which bear his name. If, on the other hand, the Pentateuch is to be regarded as unhistoric—a compilation of ancient traditions and old myths unworthy of credit—then the events narrated in the Pentateuch can never have taken place. The miraculous call of Abraham, the captivity in Egypt, the exodus, the giving of the law upon Sinai, and the forty years' wanderings in the wilderness, must be regarded as popular tales, so exaggerated and amplified by national vanity and superstition as to be unworthy of all belief. This conclusion is boldly accepted by modern scepticism. Let us see to what contradictions and impossibilities it leads in regard to both of the ascertained facts of the date of the Ptolemies, the fact of the existence of the Jewish people, and the fact of the existence of the Jewish Scriptures. Let us try them all in their turn.

The Jewish people, scattered at this date widely over the known world, and living, not in a remote corner, but in the full blaze of the civilisation and learning of the day, unanimously accepted the facts of their past history recorded in the Pentateuch as real events, connected together by a close sequence of cause and effect from the call of Abraham downwards. The settlement in Canaan grew out of the exodus; the adoption of the monarchical form of government out of the settlement; the imperial greatness of the reigns of David and Solomon out of the establishment of the monarchy; the division of the united empire into two kingdoms out of the luxury and despotism of Solomon's reign; the captivity, on its human side, out of the elements of national weakness introduced by the schism; the restoration out of the captivity; and the re-establishment of the Jewish race in Judæa, side by side with their wide dispersion in all lands, grew out of the captivity and the restoration together. All human events arise from a combination of prominent moral causes, and would be impossible without them. Break any one of the links of the series, and at that point, wherever it may be, we get an effect without a cause, a consequent without an antecedent. The Jews of the period of the restoration traced their history backward by unbroken succession to the times of Moses and Abraham. In the hypothesis now under consideration they were mistaken in this belief, and were as far wrong as the

Romans were in tracing their national origin to two outcast boys suckled by a wolf, and in ascribing the framework of their laws to the communications of Numa Pompilius with the nymph Egeria. The question occurs, At what epoch of their history did this strange deception begin, and how was it cemented into that firm, universal, national belief which formed the very heart and life-blood of the nation, as it is found to have existed at the epoch of authentic profane history?

The apparent parallel of Jewish belief with Roman mythology has been much dwelt upon, and it has been confidently asked why we should be at liberty to discard the mythical legends of the history of the Roman and not be at liberty to do the same with the history of the Jew? It might be enough to reply that the facts are so different, that the critical process which reduces into order and probability the Roman history only dislocates and destroys the Jewish. But the difference of the two cases needs to be stated more precisely. The belief of the Jew was not the mere instinct of a national vanity seeking to put honour on his race by linking its fortunes on to a fabulous past, but it involves definite particulars relative to his own government and polity. He not only believed that his forefathers received their law direct from the Deity himself; but in this belief he submitted himself to a rigorous code which separated him from all other nations, cut him off from pleasures deemed lawful by all the other peoples of antiquity, controlled him by a strict moral law, and regulated with even vexatious minuteness all the details of his personal, social, and civil life. He believed that in this submission he was but following the example of his forefathers and carrying out the principles instilled into him by the education of his childhood. He not only believed that his nation had passed through great vicissitudes, and had enjoyed signal deliverances by the hand of God, but he believed likewise that in commemoration of them a variety of public and formal celebrations had been observed by his people from time immemorial—such as the passover in commemoration of the deliverance from Egypt. The belief of the Jew, consequently, was not like that of the Roman, a traditional legend, the truth or falsehood of which affected in no conceivable manner the condition of himself or of the people to whom he belonged; but it was a belief bound up with the habits of his everyday life, inseparable from all his experience, connected with all the disasters of his race, identified with his deepest and most solemn convictions, perpetuated by the great public acts of his faith, as three times a year all the men of his race flocked to their holy city to celebrate the religious ordinances, every act of which was significant of some past event in his history.

Yet if the Pentateuch was not the inspired work of Moses, this belief must have been utterly wrong after all—a mere idle and empty superstition. How then came the race thus widely dispersed to believe it, to accept it as a veritable witness of the past, and to accept a code of law entirely based upon it? Trace the line of descent upward from the days of the Ptolemies, and we try in vain to find the period or conceive the circumstances which admitted the rise and growth of such a prodigious error. Is it conceivable that the men of the restoration could be mistaken in the fact of the captivity from which they had just emerged, or could be de-

ceived in the fact that their ancient Scriptures were in the hands of their fathers before them? Could the men of the captivity be mistaken in believing in the Jerusalem which had been captured, with its temple and services and ritual, or in the kingdom which had been overthrown and the fertile land which had been laid waste? Could the generations who lived during the troubled times of the kings be mistaken in the fact of a kindred people with whom they were at strife claiming the same descent as themselves and acknowledging the same law of Moses, or as to the events which led to the fatal disruption of the grand empire of Solomon and David? Could the men of Solomon's days be mistaken as to the erection of the temple and all the graphic details of sacrifice and service laid down in the law of Moses? Could the men of David's days be mistaken as to the bringing back of the ark from the land of the Philistines, or the men who instituted the monarchy under Saul be mistaken in believing in the government of the Judges which preceded it? Could the men who found themselves settled amid the warlike Canaanitish nations be mistaken in believing in the conquest of the land and the crossing of Jordan; or the men who crossed Jordan as to the reality of the wanderings in the wilderness and the solemn institution of the law amid the awful solemnities of Sinai? That any one generation should have believed in a definite and immediate past which never had an existence save in a kind of religious romance, and should have submitted to a law which was invented in their own days, under the conviction that they had themselves been educated in it from their earliest infancy, is the most incredible proposition ever submitted for human acceptance. If the Pentateuch be authoritative, and the events recorded in it historically true, then from this beginning everything follows in its order, each event springing consistently out of the event preceding it, and each generation inheriting the belief and the fortunes of the generation before it. If the Pentateuch be an imposture, and the events it records unhistorical, then the whole Jewish history is a confused heap of irreconcilable contradictions.

To take the facts of the books subsequent to the Pentateuch, and reduce them to anything like consistency, on the supposition that the Pentateuch itself is mythical, framing a connected and credible story out of them, is a task which baffles all human ingenuity. The only alternative appears to be to make a clean sweep of the history altogether; but this is no sooner proposed to the mind than both the past and the present lift up their protest against it. The past forbids it, because at many points the history of the Jew has come into contact with the history of the other great nations of antiquity, and to destroy the one would involve the destruction of the other likewise; for modern research has conclusively proved the harmony of sacred history with profane in a very considerable number of instances. The Mosaic authorship is expressly affirmed by Hecateus, Manetho, Lysimachus, Tacitus, Juvenal, and Longinus. In regard to the Pentateuch itself, the Mosaic cosmogony, the scriptural account of the deluge, and the dispersion of mankind at Babel, receive confirmation from Berosus the Chaldean; the ethnological list in Genesis is strongly corroborated by the Babylonian monuments; the account of the exodus, by the distorted narrative of Manetho the Egyptian. Coming to later times, the Jewish

conquest of Canaan is confirmed by an ancient Phœnician inscription noticed by three old writers; David's conquest of Syria by two heathen writers of repute; the history of his relations with Hiram king of Tyre, by Herodotus, Diodorus, and Menander. Similar points of contact occur all down the history, till, in the period of the captivity, we emerge from the darkness of pre-historic times to the period of authentic history (see Rawlinson's *Bampton Lectures, and Ancient Monarchies*). If the Jewish history be all fabulous, what becomes of the profane? and how is it that the ancient Babylonian monuments, now yielding their precious stores of information to the diligence of modern inquiry, corroborate in so many points the statements of the sacred books. The two branches of history, the sacred and the profane, are so interwoven, that the denial of the one must involve likewise the denial of the other. Say that the past history of the Jew before the times of the Ptolemies is a myth altogether, and the history of the Egyptian, the Babylonian, and the Assyrian must become at least equally apocryphal. Acknowledge the history to be true, and the truth of the history involves the divine authority of the Pentateuch which records it.

But the witness of the present is not less decisive against the theory which would refuse credit to the ancient Jewish history altogether, than is the testimony of the past. For if the history be taken away, how is the existence of the Jew at the time of the Ptolemies to be explained, with his strange isolation, his intensely national peculiarities, his venerated Scriptures, and his grand traditions of the past? Did the race spring into being in a day, and produce self-developed its own history and religion? Still more, how is the Jew of the nineteenth century to be accounted for? How comes he to exist? Whence is derived his distinctive nationality? How is it that all his undying peculiarities survive the waves of time and change that have rolled over the world? How is it that he still lives, as closely reflecting even now the spirit and character of the Pentateuchal law as the plastic wax bears the image of the stamp which is impressed upon it. Truly the effort to get rid of the supernatural in the past, by destroying the historic authority of the Pentateuch, only succeeds in transferring the miracle into the present; for what less than miraculous becomes the existence of the Jew when the past is denied out of which alone he can have been produced?

But the argument is at least equally strong when we trace the line of proof upward from the time of the Ptolemies, in regard to the existence of the Jewish Scriptures, as in regard to the facts of Jewish history. The still extant Septuagint proves the existence of the O. T. Scriptures in their completed form at this date, and that they were universally received by the Jewish race as the authoritative and divinely-inspired compositions of the authors to whom they are ascribed. The Pentateuch, for instance, was implicitly received as being the work of Moses, and as supplying the divinely-ordained platform on which the whole superstructure of Jewish polity and religion had been reared, and as the authoritative record of it. To cast a doubt on its genuineness and sacred authority would have been esteemed blasphemy. The case is strengthened by the position held by the Pentateuch as the most ancient of their writings, and as underlying, so to

speak, all the rest. For they were accepted not only as existing from former times, but as the first of a long series of sacred books, united by a regular historical sequence with each other, and all of them received from the tradition of the preceding times. The supposition, therefore, that the Pentateuch is unhistorical does not end with the destruction of the sacred authority of the Mosaic books, but destroys the authority of all the rest of the O. T. Scriptures likewise; for all these without exception are founded on the authority of the Pentateuch and the historic reality of the events recorded in it. If this is denied, either the later books must be considered part of the same imposture as that which produced the Pentateuch in its connected form; or their authors must have knowingly endorsed and availed themselves of this imposture; or, lastly, they must ignorantly have received human and imaginary compositions as veritable and divinely-inspired history. Either of these three alternatives is equally fatal to the sacred character of the post-Mosaic books of the O. T. canon. Hence it follows that the blow which destroys the authority of the Pentateuch must be equally fatal to the entire canon of the O. T.

But if so, on what conceivable principles is the fact to be explained, that the Jews at the date of authentic history undeniably believed in the authority of all these books. If the books were all of them equally ancient, and had been handed down all together from a date indefinitely remote, the difficulty would have been much lessened. But they are a connected series of books—a chain, each link of which depended on the preceding link, and the last of which came down almost to their own times. Whatever influence national vanity may be supposed to have had in inducing them to accept the Pentateuch from the grand past with which it identified them, it could have had no place, at all events, in regard to the later books, which record the crying sins and the fatal decline of their church and nation. Each book of the series links itself on to the events of its appropriate epoch, and the continually lengthening chain was handed down by each generation to its descendants. Each book, therefore, brought with it its own verification and the verification of all that went before, till the whole line reached the days of Malachi, and was brought almost within the personal knowledge of the translators of the Septuagint.

The enormous difficulty of even conceiving the possibility of a fraud under such circumstances is increased by the wide dispersion of the Jewish race, and the mighty separation which had divided the original people into two jealous if not hostile nations. If one portion of the dispersed had been disposed to acquiesce in the fraud, or, in the depth of their superstitious ignorance, had been induced to accept a religious romance composed by some member of the college of the prophets as the ancient Scriptures of their nation, still it is inconceivable that all the communities of Jews established in the different cities of the known world could have been brought to the same conclusion. Or if the exclusive and intense spirit of nationality by which they were actuated, and which becomes on this supposition itself an effect without a cause, can be believed to have accomplished even this result, it still remains to be conceived how the Samaritan people could have been induced to adopt the same belief, instead of indignantly protesting,

as a people so sensitively jealous would inevitably have done, against what must have been either an enormous folly or a criminal imposture. Yet an independent Samaritan version of the Pentateuch carries the evidence for the national acceptance of the Mosaic writings as high as the times of Solomon and David, within little more than 400 years of the conquest of Canaan. Every theory hitherto suggested to explain the existence of the Jewish Scriptures, and the profound veneration entertained for them during all periods by the historic Jew, bristles with difficulties which contradict every experience of human history, and every known principle of human conduct.

The two lines of proof furnished respectively by the facts of Jewish life at the date of the Ptolemies, and by the authoritative existence of the Jewish Scriptures, must be regarded together before the force of the historical argument can be appreciated. In fact, the whole series of proofs authenticating the claims of the Pentateuch, whether drawn from the contents of Scripture or from the facts of history, constitute one body of positive evidence. Each part of it mutually gives and derives strength from every other part, and forms altogether a mass of testimony complete and indivisible. No profane composition in the whole world is authenticated by evidence for a moment capable of being compared with that which affirms the Mosaic authorship and authority of the Pentateuch. The student who wishes to master the topics hastily touched in the foregoing sketch is referred to Stillingfleet's *Origines Sacre*; Prideaux, *Connection of the O. and N. T.*; Leslie's *Short and Easy Method*; Faber's *Horæ Mosaicæ*; Graves on the *Pentateuch*; Marsh's *Authenticity of the Five Books of Moses*; Hengstenberg on the *Pentateuch*; Hävernick's *Introduction*; Kurtz on the *Old Covenant*; Horne's *Introduction by Ayre*; and Macdonald's *Introduction*, etc. An excellent digest of the argument will be found in Wine's *Commentaries*.

The extreme reverence with which the Jewish people have ever regarded the Pentateuch supplies a strong confirmation to the evidence. For though the later books of the O. T. canon have been rejected by some of the Jewish sects, no diversity of opinion has ever existed in regard to the five books of Moses. To their divine authority the whole Jewish race has at all times paid an allegiance as emphatic as it has been almost unanimous. The Christian church has accepted them with no less confidence, and regarded them with no less honour. If, instead of looking from the epoch of the Ptolemies backward to the past, we now turn our eyes to the other direction, and look from the same stand-point forward to the times of our Lord and his apostles, we shall see that the proofs of the inspired authority of the Pentateuch are still stronger to the Christian than to the Jew; for in addition to the testimonies accepted by the Jew, he has other evidences of his own which the Jew does not recognise. There is additional strength in this fact, for his rejection of Christianity places the acceptance of the Pentateuch on the part of a Jew beyond the most remote suspicion of partiality.

It has already been remarked that references to the institutions, principles, and historical facts of the Pentateuch pervade the N. T. to at least as great a degree, if not greater, than the Old. Putting direct and verbal allusions for a moment out of the question, the facts and principles of the

old covenant so permeate the whole thought and language of the N. T. writers, that if they were taken away and relegated into the region of the mythical and the unhistorical, the N. T. would itself become unintelligible. The truth of its history and the reality of its religious institutions, as things still existing and familiarly known, is assumed equally in the Gospels as in the Epistles; and the proof of this would suffer little appreciable diminution if the elaborate comments of the Epistle to the Hebrews were left altogether out of the question. But in addition to this, both our Lord and his apostles have left upon record testimonies both to the Mosaic authorship and to the divine authority of the Pentateuch of the most positive and explicit kind. Twelve times (Matt. xix. 7, 8; xxiii. 2; Mark x. 3; xii. 26; John iii. 14; v. 45, 46; vi. 32; vii. 19, 22, 23) our Lord referred to Moses by name. In fourteen places he has made reference to 'the law'; in five of these coupling it with the name of the lawgiver; and in one adding the significant declaration—'And the Scripture cannot be broken' (Matt. v. 17, 18, 40; xi. 13; xii. 5; xxii. 36, 40; xxiii. 23; Luke xvi. 17; John i. 17; vii. 19, 23; x. 34; xv. 25). Seven times our Lord quoted from the Pentateuch as from the authoritative word of God; three of these occasions being during his temptation, when the quotation will be found to involve not only the authority of the words, but also the historical verity of the facts in connection with which they were originally uttered (Deut. viii. 3 compared with Matt. iv. 4; Luke iv. 4; Deut. vi. 16 with Matt. iv. 7; Deut. vi. 13 with Matt. iv. 10; Exod. xx. 12 with Matt. xix. 18; Lev. xix. 18 with Matt. xix. 19; xxii. 39; Exod. iii. 6 with Matt. xxii. 32; Mark xii. 27; Luke xx. 37; Deut. vi. 5 with Matt. xxii. 37; Mark xii. 30; Luke x. 27). On thirteen different occasions (Matt. viii. 4; x. 15; xi. 23; xvii. 3; xxiii. 35; xxiv. 37; Luke xvi. 29, 31; xvii. 28, 32; xx. 37; xxiv. 27; John iii. 14; vi. 31; viii. 17, 56), our Lord directly set the seal of his own authority to persons or events recorded in the Pentateuch. These instances are taken from our Lord's personal history alone, and the limits of our article alone forbid the multiplication of similar instances from the teaching of the apostles. In regard to all these references, there are but two alternatives for adoption;—either the Pentateuch is the inspired book of Moses, and then our Lord gave authoritative testimony to what is true; or the Pentateuch is not the inspired work of Moses, and then our Lord gave authoritative testimony to what is false. In the latter case we are shut up to the conclusion, either that our Lord believed what he stated, and was therefore deceived in attaching historical reality to persons and events which never had existence; or else our Lord knew them to be false, and yet spoke of them as true, and therefore must have been a wilful deceiver. Neither supposition can be entertained without something akin to blasphemy. Belief in the divine nature and commission of the Son of God carries with it, therefore, belief in the divine authority of the five books of Moses. A man who accepts the truth of Christianity must accept likewise the truth of the Mosaic law, and the authority of the Pentateuch which establishes it.

There is, however, another side to this argument. If the truth of Christianity involves the acceptance of the Pentateuch, the disproof of the divine authority of the Pentateuch equally involves

the denial of Christianity. Just in proportion as we draw tighter the links of the one argument, we equally draw tighter the links of the other. The N. T. Scriptures involve the authority of the Mosaic books; if, therefore, the Mosaic books can be proved to be unauthoritative, the N. T. must be founded on a falsehood; and, whatever may be its apparent evidences, must itself necessarily be void of all authoritative obligation upon the human mind and conscience. It was not likely that the opponents of Christianity would fail to perceive this result, or would neglect this line of attack; for there are manifest facilities for an attack upon the O. T., and especially upon its earlier portion, which do not attach to an attack upon the N. T. Scriptures, since the facts of Christianity fall within the recognised historic period, and were consequently enacted amid such a comparative blaze of light as to render all assaults upon them peculiarly embarrassing. A glance at M. Coquerel's able reply to Strauss will suffice to illustrate this. (This reply has been brought within the reach of the English reader by Dr. Beard's *Voices of the Church*.) With the Mosaic books it is different. The remote antiquity of their date, and the consequent absence of those collateral proofs largely supplied by profane history to the later books of the O. T. canon, the condensed form of a narrative comprising the history of a thousand years within a few verses, the consequent absence of precise details, and of the connecting links between effects and their prominent causes, render the Pentateuch as favourable a sphere as can be conceived for the exercise of a criticism, as arbitrary and capricious as it is destructive. It is a matter of familiar experience how, in the absence of some one part of a whole series, all the rest may appear unintelligible and even contradictory. An interesting example of this may be found in Ebrard, *Kritik der Evang. Geschichte*, sec. 72. In proportion to the remote distance of recorded events, and the condensed character of the outlines which alone have been preserved to us, will be the width of the door opened to the ingenious objections of a speculative criticism. It is natural, therefore, that the attacks of unbelief should have been long directed against the Pentateuch, as being, so to speak, the key of the position, and offering peculiar facilities for attack. It is true, indeed, that if Christianity were subverted, the authority of the Pentateuch might still be maintained to a certain degree, as in the case of modern Judaism. But, on the other side, if the authority of the Pentateuch be subverted, Christianity cannot possibly survive.

The tendency of unbelief to take the shape of an assault upon the authority of the Pentateuch was first developed in the 2d century of the Christian era. The form in which it first appeared in the teaching of the ancient Ebionites is so remarkable as to deserve a somewhat more extended notice than the limits of this article will make it possible for us to give to the subsequent disciples of free thought. But in one or other of the two divisions of the Ebionites, which Neander has respectively designated as the Pharisaic and the Essenian, almost every branch of modern rationalistic argument has been anticipated. It is true that the Pentateuch was professedly placed by them in the first class of inspired writings; but it was maintained that the Mosaic books were made up of traditional fragments, that they had been many times re-written,

and that corrupting elements had been introduced into the purity of the original revelation. The genuineness of the Pentateuch was thus boldly assailed, and passages which appeared to conflict with the favourite hypothesis were got rid of by a critical charge of interpolation and corruption of the text. When it is added that the fall of man was rejected as being blasphemy against God, that the supernatural was disavowed, that the highest appeal was made to the inner human consciousness in contrast to an outward revelation, that the inspiration of Scripture was referred to a general not a special action of the Holy Spirit upon the mind of the writers, that in the truth implanted by God in the depths of the human soul all other truth is contained, and that the revelation of the Divine Spirit does but awaken the consciousness of it, we find in this scheme the pregnant prototype of modern rationalism (see Neander's *Church History*, London, Bohn, vol. i.) Other early heretics followed in the same path, such as several branches of the Gnostics and the Manicheans, who boldly pronounced whatever conflicted with their own views in the Mosaic books to be corruptions of the original.

When the spirit of religious inquiry began to move men's minds, towards the close of the dark ages, these speculative objections again made their appearance. In the beginning of the 11th century a learned Jew, Isaac Ben Jasos, maintained that portions of the Pentateuch belonged to a later age than the Mosaic, and referred them to the time of Jehoshaphat. In the 12th century Aben Ezra argued for the interpolation of some portions of the Pentateuch. In the 16th century John Carlstadt and Masius held the same opinion; the former arguing from the impossibility of the lawgiver recording his own death, and the latter conjecturally ascribing their authorship to Ezra. In the 17th century the English deist Hobbes, and still more specially the celebrated Jew Spinoza, repeated the same attacks on the authority of the Mosaic books. The writings of Spinoza especially have been the great armoury out of which later writers have gathered their weapons. In the 18th century a whole array of deistical writers—the third Earl of Shaftesbury, Collins, Tindal, Blunt, Toland, Morgan, Chubb, and Lord Bolingbroke—followed in the same track, rejecting the Mosaic books as offensive to man's self-respect, and repugnant to human reason. Unfortunately the line of argument which some professed friends of the Bible adopted in defence of it only served to increase the mischief. Already in the 17th century Dr. Spencer had endeavoured to show that the great object of the Mosaic ritual was to wean the Israelitish people from the idolatrous habits contracted by them in Egypt, and that with this view the utmost possible indulgence was accorded to their inclinations. His views were mainly adopted by Bishop Warburton in the next century. To the same school and about the same period belonged the learned Michaelis. Dr. Geddes, a Roman Catholic divine, freely doubted both the Mosaic authorship of the Pentateuch and the historical character of the narrative. At the close of the 18th century began the age of criticism, and of what has been called the 'higher criticism' of Germany. The historical scepticism of F. A. Wolf, professor of philosophy at Halle, led the way. Among the many disciples of historical criticism who claimed to pronounce the verdict of modern

inquiry, a few names stand prominent as marking the successive theories in regard to the composition of the Pentateuch, which one after the other have been adopted and rejected. Thus, Astruc and Eichhorn are the authors of the document hypothesis, which regards the Pentateuch, and especially the book of Genesis, as a compilation from other earlier memoirs. The work of critical disintegration still advancing, the number of supposed original writers was multiplied till the whole became torn into shreds, and hence arose the fragment hypothesis, of which Vater and De Wette may be taken as the representatives. Lastly followed the complement hypothesis of Tuch and Stähelin, which regards the Pentateuch as the work of two writers, the latter of whom revised and supplemented the work of his predecessor. This represents the last and existing phase of German rationalistic opinion, of which Von Bohlen is one of the most extreme and conspicuous advocates. It is unnecessary to carry the list further. As regards our own country, the names of Dr. Davidson, Dr. Donaldson, the Essayists and Reviewers, and Bishop Colenso, are too familiarly known to make any sketch of their opinions necessary. On the other side, a number of valuable works have been published in vindication of the Pentateuch. Of these apologies the most important will be found to be among the Germans: the works of Hengstenberg, Kurtz, and Hävernick, which have been published in an English version by Messrs. Clark of Edinburgh. In the English, Stillingfleet's *Origines Sacrae*; *Horæ Mosaicæ*, by G. S. Faber; Dean Graves *On the Pentateuch*; Blunt's *Undesigned Coincidences*; *Critical History of the O. T. Canon*, by Moses Stuart; Rawlinson's *Bampton Lectures*; Hoare's *Veracity of Genesis*; Marsden's *Mosaic Code*, etc.

Now, the objections urged against the Mosaic authorship and divine authority of the Pentateuch may be conveniently classed under four general heads—critical, historical, scientific, and moral. Any exhaustive statement of these objections would vastly exceed the possible limits of an article. We shall only supply brief particulars under each head to elucidate the ground and nature of the argument.

1. *Critical*.—These are directed to prove that the Mosaic books are not the production of any one author, but consist of a variety of ancient fragments, which some later compiler has arranged into order; or, in another form of the objection, that they consist of traditional tales, subsequently shaped into a kind of religious romance, without any deliberate intention on the part of the compiler to give them historic authority. The grounds on which the objections are based are mainly three: (1.) Alleged repetitions in the narrative, indicating, as it is thought, a plurality of writers: thus Gen. ii. 1-7 is held to be a mere useless repetition of Gen. i.; Gen. xxi. 9-21 is asserted to be only another version of Gen. xvi. 4-16; the sojourning of Isaac among the Philistines to be an imitation of the previous narrative of Abraham's residence in Egypt (Gen. xiii. 10; xxvi. 1); and objections of a similar kind have been urged against the genealogical lists of Gen. x. and xi. (2.) The alleged diversity of style, and, in some instances, the difference of terms and passages by which the book of Deuteronomy is distinguished from the four books preceding. Objectors on this ground forget the distinctive nature of the circumstances under which

the last exhortations of the great lawgiver to the people were delivered, and how naturally the difference of style arises from this difference of circumstance. (3.) The main foundation of these critical objections rests on the diverse use of the names of God, 'Elohim' and 'Jehovah.' It is assumed that the use of 'Elohim' marks an earlier writer, and the use of 'Jehovah' a later. The English student may understand the degree in which the words are mutually used, by comparing, in the A. V., the expressions 'God' and 'Lord God;' for instance, in Gen. ii. and iii. In its compound equally as in its simple form, the word 'Jehovah' is confidently assumed to be the irrefragable mark of a later date.

In regard to this class of objections, it is only necessary that two cautions should be borne in mind. We must remember that the supposition that Moses embodied ancient documents in his books, such as genealogical lists or accounts of events, is perfectly consistent with a devout belief in their inspired authority, so long as we recognise the divine guidance under which the lawgiver acted. Portions which admit of such a supposition derive authority, not from their original authors, but from the inspired prophet who has embodied them into his own composition. It is only when the theory is used to support a post-Mosaic authorship that they become absolutely irreconcilable with a devout belief in their inspiration. It must also be borne in mind, that the use of the two words 'Elohim' and 'Jehovah,' and the rapid transition from one to the other in some cases, and the union of the two in other cases, admits of a totally different solution to that of the rationalistic objector. A close examination will show that in all cases the selection of the particular term is made intentionally, and has reference to the conditions of place, person, and time, under which it was employed, just as in the N. T. Scriptures various titles of God are used, but used with a most exact and appropriate relation to the whole nature of the context (see articles on Genesis).

2. *Historical.*—It is most important to observe, that in no one single instance are these objections drawn from any comprehensive view of the relation in which the Pentateuch stands towards the later treatises, on the one side, or profane history upon the other. They are derived exclusively from a captious and capricious criticism of details. The publicity these objections have recently received makes it almost unnecessary to supply illustrative instances under this head. But we may mention the objection raised to the number of the Hebrew people at the time of the exodus, the census of the people in the wilderness, and the number of the sacrifices alleged to have been required during the forty years' wanderings. What it is important to bear in mind under this head is the logical position which alone such difficulties can hold in relation to the general evidences for the Pentateuch. They are wholly devoid of force unless they prove an impossibility in the events against which they are alleged. If they simply prove our ignorance of details, they prove no more than that, in the condensed records of exceedingly remote events, many details must necessarily be omitted. A very small acquaintance with history is sufficient to show the influence which one single and apparently minute particular may exercise upon a whole series of events. Consequently, there is no necessity placed upon the

Christian apologist, to prove that the events did take place in any one mode, or to tie his defence to one invariable explanation. All he needs to show is, that the events are possible; to point out how they may have taken place, not to prove how they did take place. The different explanations of certain difficulties, for instance in relation to the birth of Hezron and Hamul, Gen. xlv. 12, which have been offered by different writers, afford no handle to the unfriendly criticism to which they have been subjected; but, when viewed in relation to the logical requirements of the argument, strengthen, in proportion to their number, the pleas in defence of the Pentateuch.

3. *Scientific.*—This class of objections rests on alleged contradictions between the language of the Mosaic books and the facts of science. For instance, the Adamic creation is declared to contradict the conclusions of geology, inasmuch as the period required for bringing the crust of the earth into its existing condition must have included countless centuries, and not a brief period of six days. In the same way it is first argued, that the Scriptural narrative involves an universal deluge, and then, this meaning being assumed, that such a deluge, with all its accompanying circumstances, as recorded in Genesis, cannot have taken place without a miracle wholly stupendous. A third objection is grounded on the chronology of the Bible, and on the asserted fact, that the duration of man upon the earth has extended to a period at least exceeding four or five times over the 6000 years allotted to him in the Pentateuch. A fourth objection is directed against the descent of all mankind from a single pair, and their primary migrations as recorded by Moses. It assumes that the physical peculiarities distinguishing the various races of the world are the results of a difference in species, not of a variety caused by the influence of climatic, physical, and social circumstances. There are many other minor objections of a more frivolous character, such as that which insists on fixing upon the word 'firmament,' in Gen. i. 6, the sense of a permanent solid vault, and then pointing out the opposition in which such an idea stands to astronomical science; or such as the objection against the language of Joshua (x. 12), which is sufficiently answered by reference to the language of any modern almanac, and by the observation, that if the ancient Scriptures had been written in the terminology of science, they would have been simply unintelligible to the generation to which they were first given. But these captious difficulties are of little weight compared to the four objections mentioned above, all of which touch questions of the gravest importance. In addition to those general elements of error which we shall proceed to point out as belonging in common to all the modern objections urged against the Pentateuch, there are some considerations bearing specially upon this scientific class of difficulties to which it is necessary briefly to call attention.

In regard to theories of the creation and the deluge, it is necessary to distinguish with the utmost possible precision between the language of Scripture and any private interpretations of it. When the question is propounded, whether the six days of the Adamic creation were literal days of one revolution of the globe, or were successive periods of time; when it is asked, whether the deluge was partial or universal, the particular opinion which

each man may form must not be fastened on the scriptural language, as if it were its necessary and only admissible interpretation. It must be acknowledged that opinions on either side are equally consistent with a devout acceptance of the inspired word. Experience teaches the necessity of this caution; for the lessons of geology have compelled us to separate between the creation and the beginning of Gen. i. 1 and the Adamic creation of the later verses, and to allow the existence of untold periods between them. Now that we are accustomed to this, we find that the change of interpretation has not put any dishonour on the text, and we must feel that what has happened in regard to one verse may happen in regard to others. Modern science has undoubtedly proved the pre-existence of immense geological periods; but we are quite able to reconcile them with the scriptural narrative, either on the hypothesis of the late lamented Hugh Miller, or on the optical hypothesis, of which the Rev. T. R. Birks is the living exponent. But we are not called to fix either one or the other inseparably upon the text.

The truth is, that, with reference to the creation, we are not yet in a position, and perhaps we never shall be, even to enter upon the work of reconciliation between Scripture and science. For the first preliminary is evidently to know what we are to reconcile; and till science can fix some acknowledged principles of cosmogony, it is evident that even the preliminary step cannot be taken. With the sole exception of the immense geological periods already referred to, science has hitherto settled nothing. Its advocates are still at war among themselves on the first principles of the scheme, uniformitarian and catastrophist arguing with equal vehemence for their conflicting theories. Till modern science can assert definite and acknowledged conclusions, it is manifestly premature to attempt a reconciliation between them and Scripture. The attempt only gives rise to speculative interpretations full of danger.

The same observation applies to the question of the deluge, and it may well be doubted whether the time is not at hand when that great catastrophe, as narrated in Scripture, will be accepted by men of science themselves as the true solution of many phenomena now referred to other causes. It is certain that the glacier hypothesis, now most in vogue among geologists, is weighted with the most enormous scientific difficulties. It is also observable that objections confidently urged against the ark and its capability of containing the animals which were miraculously gathered together into it, rest wholly on the unproved supposition that the fauna of the antediluvian age were as widely and equably dispersed over the surface of the globe as the fauna of the post-diluvian. But, however these questions may be finally solved, the apologist for the Pentateuch must stand by the text of Scripture, and whether he believes in a partial deluge or an universal deluge, must not confuse the infallible text with his own fallible interpretation of it.

Lastly, the state of the controversy relative to the antiquity of man and the origin of races, illustrates with peculiar force the crude and incomplete state of all scientific investigation on these subjects, and the consequent rashness of all conclusions drawn from them unfavourable to the authority of the Pentateuch. For the rationalistic attack is urged from two contrary directions, and is supported by

arguments directly contradictory to each other. On the one side we are told that the distinctive physical peculiarities of different human races are so deep, so irremovable, that they must be considered to indicate diversity of species and not simply varieties of one species; that no climatic and social influences can explain them; that consequently the races of men must have been created distinct, and the scriptural narrative which asserts the common descent of all mankind must be unworthy of credit. On the other side, the very fact of an intelligent creation is called into question, on the ground that there are in the world no distinctions of fixed species, but only variations so mutable that all existing differences are the mere result of natural causes. The inevitable conclusion from such premises is, that all forms of life whatever are self-developed out of one common primal form, and the idea of creation becomes superfluous, for the original monad can scarcely be considered as less self-developed than all the forms which have sprung from it. That such is the natural tendency of Mr. Darwin's theory of the origin of species we have a most impartial witness. 'This theory, when fully enunciated, founds the pedigree of living nature upon the most elementary form of vitalised matter. One step further would carry us back, without greater violence to probability, to inorganic rudiments, and then we should be called upon to recognise in ourselves, and in the exquisite elaborations of the animal and vegetable kingdoms, the ultimate results of mere material forces left free to follow their own unaided tendencies' (Sir W. Armstrong at the British Association at Newcastle, 1863). On the one side, we are called to believe in the evidence of fixed species; and on the other side, to believe in their non-existence. We are asked to believe that all living beings whatever, including man himself, have descended from original monads, and at the same time to believe that the races of mankind cannot have descended from a common parentage. The two arguments are totally irreconcilable, and till something like congruity can be introduced into our scientific theories, it is premature even to suggest their possible contradiction to the inspired authority of the Pentateuch.

4. *Moral.*—This class of objections is so indefinite in its nature as to make explanation and refutation, in the brief space of an article, equally difficult. They are all founded on the sufficiency of the human consciousness to pass a verdict on the propriety or impropriety of certain acts ascribed to God in the Pentateuch. The form they take is, however, more subtle than this. Certain acts imputed to God are contrary to the ideal the human mind frames of the Deity; therefore it is argued that God cannot have done them, and consequently the books which attribute them to him cannot declare the truth, cannot be divinely inspired. The ideal God in the human consciousness is made into the standard whereby revelation is measured. For instance, it is argued that the destruction of the Canaanitish nations by the sword of Israel under express command was a cruel deed, at which the human mind revolts, and which it is impossible to believe that God can have done. Objections of the same kind are urged against the Mosaic law, both against its positive enactments, as in the case of slavery, and against the minute and apparently trivial character of many of its details. And then, in support of these allegations, a contrast is drawn

between the spirit of the Mosaic code and the spirit of the gospels and epistles. It will be enough for the present purpose to reply, that these objections rest almost entirely, and derive any force they may appear to have, from a misapprehension of the facts of the case, and an erroneous estimate of the Mosaic code on the one side, and of the Christian dispensation upon the other. A candid examination of all the narrative shows that the destruction of the Canaanitish nations was purely a judicial act, wherein God was the judge and the people of Israel the authorised and divinely-appointed executioners. It will be found that the utmost care was taken to present the whole transaction in this specific aspect, and that this act of judicial severity stood in the sharpest possible contrast to the general tenor of the Mosaic law, which was tolerant, gentle, and singularly beneficent both in spirit and in its positive provisions. Looking at the Pentateuch, we find in it the same law of love which we find in the gospels; and looking at the gospel, we find in God the same attribute of punitive justice which stands conspicuous in the law. The argument may be carried farther, for the analogy between God's character and dealings in providence and his dealings in grace, as contained in the book of revelation, is close and exact in the highest degree.

Into the details of these various objections, critical, historical, scientific, and moral, this article will not further enter, partly from considerations of space, partly because many of them will be found treated in other articles of this publication. The student is referred, for their more formal refutation, to the almost voluminous literature which the controversy of the last few years has called into existence. With reference to the special form they have assumed in the *Critical Examination of the Pentateuch*, by Dr. Colenso, bishop of Natal, every information will be found in recent publications. The general questions of scholarship will be found ably handled in the *Examination* of Dr. Colenso's work, issued by the late lamented Dr. M'Caul. Reference may also be usefully made to *Colenso's Defections Examined*, by Dr. Benisch, a Jewish doctor. For the numerical calculations, the student should refer to the *Exodus of Israel*, by Rev. P. R. Birks, in which they are submitted to a searching examination. For questions of topography, a smaller work by Professor Porter of Belfast, the well-known author of *Five Years in Damascus*, Murray's *Handbook of Syria*, etc., will be found full of valuable information. But, passing these details over, there are certain general considerations bearing upon them in common, the statement of which may well occupy the remainder of this article.

In the first place, it will be seen that in the whole range of the rationalistic armoury, there has not been found a single argument to invalidate the positive historical evidences for the Mosaic authorship and inspired authority of the Pentateuch, which have been rapidly and imperfectly sketched in the former part of this article. Not a single fact involved in the argument has been called into question; not a single conclusion has been invalidated. So completely do the positive evidence in favour of the Pentateuch, and the rationalistic objections against it, move upon different lines altogether, that if every one of these objections could be substantiated, the positive evidence would yet remain where it was, and what it was before. Its force would not be weakened in one solitary point;

rather would be made stronger, would become not providential, which we believe it to be, but actually miraculous. For if the rationalistic objections could be substantiated, they would prove the Pentateuch to be no more than a series of traditional fragments; yet the structural unity of these fragments, and the historical links of proof which connect as with bands of adamant every one of these books with the marvellous national history of the Hebrew race, must be acknowledged to exist as they did before; for, as we have said, there is not even an attempt made to invalidate them. Let it be said that the Pentateuch is really the inspired work of Moses, and the subsequent history of the Jew follows consecutively and naturally from it. But let it be said that the Pentateuch is unhistorical, and its recorded events fictitious, and the subsequent history becomes utterly inexplicable. Not only, therefore, do not these objections touch the force of the positive evidence in one single particular, but they invest it with a still higher character, and change the providential into the miraculous.

If, however, this were the case, the position of the whole controversy would be singularly anomalous. For the positive historical evidence would authenticate the authority of the Mosaic books on the one side as strongly as the rationalistic objections would destroy it upon the other. In such a dilemma, we could only conclude the existence of some great fallacy in the one line of proof or in the other; for it would be incredible that truth should be really two-sided, and should affirm and deny at the same time. But on which side lies the fallacy, and what is its character? The apologist for the Pentateuch may fairly claim the verdict even of his opponents that the fallacy is not in the positive historical argument, since his opponent makes no effort to overthrow it. He neglects it, he ignores its existence, he treats it as if it was not, but he makes no effort to controvert it. Thus, for instance, the recent publications of Bishop Colenso pass over the positive evidence in such absolute silence, that the reader is almost tempted to doubt the author's knowledge of its very existence. It may, therefore, be fairly argued that the fallacy lies somewhere in the argument of the rationalistic objector. Nor have we to look far, before the false assumptions, which vitiate the whole process of hostile criticism and destroy the value of its every conclusion, meet the eye. The following brief notes must be accepted as indicating the source of the fallacy rather than defining or formally refuting it. But from what has been already stated, the following conclusions may be derived:—

1. That the objections recently urged against the Mosaic authorship and authority of the Pentateuch are not the necessary result of modern research and of a more enlightened criticism, but are the re-echo of arguments some of which may be traced back nearly to the time of the apostles. It is not intended by this to deny their modern garb, or the ingenuity which has marshalled them, or the advanced critical appliances which have been freely called into use, but only to deny their substantial novelty. We are therefore entitled to disavow the claim which has been made in their behalf, and to regard them not as the expression of modern criticism protesting against the ignorant errors of a past age, but as another effort of an old enemy, a new outburst of the sceptical spirit which has endeavoured, in past ages, to undermine the authority of the Bible, but which, baffled in times gone by,

has now renewed the attack with more refined weapons and a greater subtlety of argument than before.

2. Through every class of objection which has hitherto been urged runs the common assumption, that the highest standard of truth and the last court of appeal lies in the human consciousness. In one sense it is most true that reason must be the arbiter of truth; for we can exercise no faith unless we have first reasons on which to ground it. But then it is on the question of evidence that reason must be exercised. Have we the same evidence for believing the Pentateuch to be the work of Moses as we have for referring their respective works to Herodotus or Thucydides, Plato or Cicero? Is the evidence for the divine inspiration of the Pentateuch such as to compel us to accept it unless we are prepared to deny the force of similar evidence in matters of secular investigation? If the answer must be in the affirmative, mere *à priori* conjectures gathered out of the mind itself can have very little force against this evidence of facts. Yet it is the common vice of all the four classes of objections enumerated, that they rest on some conjectural assumption of the mind itself. The critical objections rest largely on the gratuitous assumption that two names for the Deity would not have been used by one and the same author, although the analogy of the N. T. Scriptures proves that a similar adaptation of the titles used to the context was the familiar habit of the apostolic writers. The historical objections rest on the supposition that at an enormous distance from the event the human mind is yet able so accurately to balance the antecedent probability or improbability of human transactions as to outweigh the evidence of positive documents. The scientific objections are dependent on the supposition that theories in geological and ethnological science, about which men of science are themselves disagreed, are yet to be treated as if they were proved facts by which the language of Scripture must be tested and condemned. The moral objections are based on the assumption that the human consciousness is an adequate measure of God, and that even with a very imperfect knowledge of all the facts of the case, it is competent absolutely to pronounce what things God did or did not do, what acts are worthy or unworthy of the divine character and government. In all these cases it is remarkable that rationalism works by no certain and recognised canons, but trusts wholly to what has been called an 'historical instinct,' and to conclusions as arbitrary and capricious as the individual minds which form them. In proof of this, it is only necessary to allege the endless discrepancies of opinion among modern critics of the Pentateuch belonging to this school. Scarcely can any two be found to agree together either in their conclusions or their reasons for them: their only point in common is opposition to the inspired Scriptures. Of the inherent uncertainty and waywardness of such criticism it is impossible to speak too strongly. The irrefragable grounds on which plain sense protests against such a mode of investigation are stated with great force by that distinguished scholar, the late Sir G. C. Lewis, in his lectures on the credibility of ancient Roman history.

3. Another distinctive feature of these objections is the strict naturalism on which they are founded. Their advocates agree in discarding the supernatural—that is, the miraculous—from the sacred history,

and leaving no sphere for its operation. With them, to prove that an event could not have taken place without a miracle, is tantamount to proving that it has not taken place at all. Now, it must be remembered that the very hypothesis of the Bible involves the supernatural in the ordinary sense of the word; for it claims to be a revelation from God, and as God is above nature, so a written communication of God to men must necessarily be beyond the sphere of the natural—that is, it must be miraculous. To object to Scripture that it contains the supernatural is to object to its being what it is—is to find fault with that very attribute without which a Bible, a divine revelation, could not possibly exist. While, therefore, on the one side, we should shrink from placing interpretations of our own on the Bible, which would needlessly multiply the necessities for miraculous interference, and so imply in the divine Being a prodigality of miracles which we know to be contrary to the whole economy of his government; on the other hand, we must not shrink from believing an event because it is miraculous. A man who believes in God must believe in the possibility of miracles. For a God incapable of acting would be no God; and the actings of a God must necessarily be supernatural—that is, more or less miraculous. Nor should it be forgotten that with the Omnipotent there can be no degrees of great or little, of easy or difficult. What seems to us a stupendous miracle may be really no more than what seems to us a small one, and it is even conceivable that the greater miracle may hold the balance of creation more even, and consequently imply less disturbance in the ordinary order of things, than the lesser one may do. At all events, objections resting on a disbelief in the supernatural must be void of all weight to the mind of a believer in the existence and government of an intelligent Deity.

4. Lastly, it must not be supposed that all criticism on the internal contents of Scripture is necessarily adverse criticism. The protest lies against modern criticism, not because it is destructive, but because it is false. The study of the contents of Scripture has already been productive of great results, and may be expected, as it is more devotedly pursued, to be productive of still greater. For instance, Blunt's *Undesigned Coincidences*, and Birk's *Exodus of Israel*, will be found not only to remove objections, but to point out latent unities and harmonies which constitute a positive argument for the authority of the Pentateuch of the most conclusive kind. It is in this storehouse that the most effective weapons of the Christian apologist must after all be found.

The remembrance of these principles will guide the student through many apparent difficulties, and enable him to discern the latent fallacy that vitiates the whole processes of rationalistic criticism. That there exist difficulties of detail in the explanation of the Pentateuch which our present knowledge does not enable us to remove, and which very probably never will be removed on this side of the better world, may be most readily admitted; but the great lines of evidence in proof of the Mosaic authorship and inspired authority of the Pentateuch have never yet been shaken. And inasmuch as the proof is based on common principles of evidence lying at the bottom of all human knowledge whatever, it never can be overthrown unless we are prepared to overthrow the whole struc-

ture of human belief at the same time. The structural unity of the Mosaic books; the intimate identity subsisting between the events and the books which record them; the close interdependence on which the Pentateuch stands both towards the subsequent books of the O. and N. T. canon, and towards the whole course of national Jewish history; the support which the history of the Hebrew nation derives at many points of contact from profane history, and signally from recent topographical and antiquarian discovery; the strength of the general historical argument contrasted with the weakness of the detailed objections, their variable and capricious character, and their claim to make the inward consciousness of man the ultimate criterion of truth on which they rest—all lead to the same conclusion. The most searching investigation which all the appliances of modern criticism enable us to exercise, only ratifies the conclusion of a devout faith in recognising in the Pentateuch the most ancient and certain of histories, standing in the highest class of historical credibility, because authenticated by the personal knowledge of the man who was the principal actor in the events; and claiming the implicit obedience of faith, as being stamped with the indelible signet of divine inspiration.—E. G.

[LITERATURE.—On the critical history of the Pentateuch the following works are the most important:—The *Einleitungen* of Eichhorn, Bertholdt, De Wette, Hävernick (translated by A. Thomson, Edin., 1850), and Bleek; Davidson's *Introduction to the O. T.*; Horne's *Introduction*, by Ayre; Ranke, *Untersuchungen über den Pent.*, 2 bde, Erlangen 1834-40; Hengstenberg, *Die Authentie des Pent.*, 2 bde, Ber. 1836-39 (translated by Ryland, 2 vols. 8vo); König, *Alttest. Studien*, 2 parts, 1839; Bertheau, *Die sieben gruppen Mos. Gesetz . . . ein beitrage zur Kritik d. Pent.*, Gött. 1840; Stähelin, *Krit. untersuch. üb. d. Pent.*, etc., Ber. 1843; Ewald, *Gesch. des Volkes Israel bis Christus*, bd. i.; C. von Lengerke, *Kanaan, Volks- und Religions-Gesch. Israels*, Königsb. 1844; Warburton, *Divine Legation of Moses*, 1738-1765; Faber, *Horæ Mosaicæ*, 2 vols., 1800, 1817; Hamilton, *The Pentateuch and its Assaults*, Edin. 1852; Colenso, *The Pentateuch and the Book of Joshua critically examined*, Lond. 1863, etc.; *The Historic Character of the Pentateuch vindicated, in reply to Colenso*, by a Layman of the Church of England, 1863; *The Mosaic Origin of the Pent. considered*, by the same, 1864; Birks, *The Exodus of Israel, its Difficulties examined*, 1863; and very many other works [see above] called forth in reply to Colenso.

PENTECOST (Πεντηκοστή, scil. ἡμέρα), the second of the three great annual festivals on which all the males were required to appear before the Lord in the national sanctuary, the other two being the Feasts of Passover and Tabernacles.

1. *Name and its signification.*—This festival is called—i. השבועות, הַנָּהֵפֶסֶת, ἑορτὴ ἑβδομάδων, *semitas hebdomadarum*, the *Festival of Weeks* (Exod. xxxiv. 22; Deut. xvi. 10, 16; 2 Chron. viii. 13), because it was celebrated seven complete weeks, or fifty days, after the Passover (Lev. xxiii. 15, 16); for which reason it is also called in the Jewish writings הַנִּסְחִים יוֹם (comp. Joseph. de Bell. Jud. ii. 3. 1), whence ἡμέρα τῆς Πεντηκοστῆς (Tob. ii. 1; 2 Maccab. xii. 32; Acts ii. 1; xx. 16; 1 Cor. xvi. 8), the Latin *Pentecoste*, and our appellation Pentecost. ii. הַנִּסְחִים יוֹם, the *festival of the harvest* (Exod. xxiii. 16), because it concluded the harvest of the later grains. iii. יוֹם הַבְּכֹרִים, ἡμέρα τῶν νέων, *DIES PRIMITIVORUM*, 'the day of first-fruits' (Num. xxviii. 26), because the first loaves made from the new corn were offered on it on the altar (Lev. xxiii. 17), for which reason Philo (*Opp.* ii. 294) calls it ἑορτὴ πρωτογεννημάτων. iv. It is also denominated in the post-canonical Jewish writings הַנִּסְחִים יוֹם, the *festival of conclusion*, i. e., of the Passover, or simply עֶצְרַת (comp. Πεντηκοστή, ἡν' Ἑβραῖοι Ἀσπαρὰ [= עֶצְרַת, Chaldee] καλοῦσι, σημαίνει δὲ τοῦτο Πεντηκοστή, Joseph. *Antiq.* iii. 10. 6; *Mishna Bikkurim*, i. 3, 7, 10; *Rosh Ha-Shana*, i. 2; *Chagiga*, ii. 4), because it completed what the Passover commenced; and v. זְמַן מִתְּנוּת הַתּוֹרָה, the *time of the giving of our law*, because the Jews believe that on this day the revelation of the decalogue took place.

2. *The time at which this Festival was celebrated.*—The time fixed for the celebration of Pentecost is the fiftieth day reckoning from 'the morrow after the Sabbath' (מִמָּחָר הַשַּׁבָּת) of the Passover (Lev. xxiii. 11, 15, 16). The precise meaning, however, of the word שַׁבָּת in this connection, which determines the date for celebrating this festival, has been matter of dispute from time immemorial. The Boëthusians (בִּיתוּסִים) and the Sadducees in the

time of the second Temple (*Mishna, Menachoth*, x. 3), and the Karaites since the 8th century of the Christian era (comp. Jehudah Hedessi, *Eshkol Ha-Kopher*, Alphab. 221-224; *ibid.*, p. 85 b), took **שבת** in its literal and ordinary sense as denoting *the seventh day of the week, or the Sabbath of creation*, and maintained that the omer was offered on the day following this weekly Sabbath, which might happen to fall within the seven days of the Passover, so that Pentecost would always be on the first day of the week. But against this it is urged that —*i.* Josh. v. 11, where **ממחרת הפסח** is used for **ממחרת השבת**, shows that **שבת** in Lev. xxiii. 11 denotes the first day of Passover, which was to be a day of rest. *ii.* The definite article in **השבת** in Lev. xxiii. 11 refers to one of the preceding festival days. *iii.* The expression **שבת** is also used for the day of Atonement (Lev. xxiii. 32), and the plural **שבתון** is applied to the first and eighth days of Tabernacles (*ibid.*, ver. 39) and the Feast of Trumpets (*ibid.*, xxiii. 24), as well as to *week* (Lev. xxiii. 15; xxv. 8); hence this use of **σάββατον** in the N. T. (Mark xvi. 2, 9; Luke xviii. 12). *iv.* According to Lev. xxiii. 15 the seventh week, at the end of which Pentecost is to be celebrated, is to be reckoned from this Sabbath. Now, if this Sabbath were not fixed, but could happen on any one of the seven Passover days, possibly on the fifth or sixth day of the festival, the Passover would in the course of time be displaced from the fundamental position which it occupies in the order of the annual festivals. *v.* The Sabbatic idea which underlies all the festivals, and which is scrupulously observed in all of them, shows that the reckoning could not have been left to the fifth or sixth day of the festival, but must have fixedly begun on the 16th of Nisan. Thus, each Sabbath comes after *six even periods*—1. the Sabbath of days, after six days; 2. the Sabbath of months, after six months; 3. the Sabbath of years, after six years; 4. the Sabbath of Sabbatic years, after six Sabbatic years; 5. the Sabbath of festivals=the Day of Atonement, after six festivals [FESTIVALS; JUBILEE, THE YEAR OF]; hence the Sabbath of weeks, *i. e.*, Pentecost, must also be at the end of six common weeks after Passover, which could be obtained only by reckoning from the 16th of Nisan, as this alone yields *six common weeks*; for the first week during which the counting goes on belongs to the feast of Passover, and is *not common*; and *vi.* The Sept. (*ἡ ἐπαύριον τῆς πρώτης*), Josephus (*τῇ δευτέρᾳ τῶν ἡμέρων ἡμέρα*, *Antiq.* iii. 10. 5. 6), Philo (*Opp.* ii. 294), Onkelos (**ממחרת יומא טובא**), and the synagogue, have understood it in this way and acted upon it, and most Christian commentators espouse and defend the traditional interpretation. Still more objectionable is the hypothesis of Hitzig (*Ostern und Pfingsten*, Heidelberg 1837), defended by Hupfeld (*De primit. et vera festorum ap. Hebraeos ratione*, ii. 3, *seq.*), and Knobel (*Die Bücher Exodus und Leviticus*, Leipzig 1857, p. 544), that the sacred or festival year of the Hebrews always began on the Sabbath, so that the 7th (*i. e.*, the first day of Passover), the 14th (*i. e.*, the last day of the festival), and the 21st of Nisan, were always Sabbath days; and that the omer was offered on the 22d day of the month, which was 'the morrow after the Sabbath' terminating the festival, and from which the fifty days were reckoned (Hitzig, Hupfeld), or that the omer was offered on the 8th of the month, which was also 'the morrow after the Sabbath,' thus prevent-

ing it from being *post festum* (Knobel). It will be seen that this hypothesis, in order to obtain Sabbaths for the 14th and 21st days of the month as the beginning and termination of Passover, is always obliged to make the religious new year begin on a Sabbath day, and hence has to assume a stereotyped form of the Jewish year, which as a rule terminated with an incomplete week. Now this assumption—*i.* Is utterly at variance with the unsettled state of the Jewish calendar, which was constantly regulated by the appearance of the disc of the new moon [NEW MOON, FESTIVAL OF THE]; *ii.* It rudely disturbs the weekly division, which is based upon the works of creation, and which the Jews regarded with the utmost sanctity; and *iii.* It is inconceivable that the Mosaic law, which, as we have seen, regarded the Sabbatic division of time as so peculiarly sacred that it made it the basis of the whole cycle of festivals, would adopt a plan for fixing the time for celebrating the Passover whereby the last week of almost every expiring year is to be cut short, and the hebdomadal cycle, as well as the celebration of the Sabbath, be interrupted (comp. Keil *On Leviticus* xxiii. 11). It is therefore evident that the Jews, who during the second Temple kept Pentecost fifty days after the 16th of Nisan, rightly interpreted the injunction contained in Lev. xxiii. 15-22. The fiftieth day, or the feast of Pentecost, according to the Jewish canons, may fall on the 5th, 6th, or 7th of *Sivan* (**סיון**), the third month of the year from the new moon of May to the new moon of June (*Rosh Hashana*, 6 b; *Sabbath*, 87 b).

3. *The manner in which this Festival was celebrated.*—Not to confound the practices which obtained in the course of time, and which were called forth by the ever-shifting circumstances of the Jewish nation, we shall divide the description of the manner in which this festival was and still is celebrated into three sections, *viz.*—A, The Pentateuchal ordinances as to how it is to be celebrated. B, The post-exile mode in which it was observed; and C, How it is kept to the present day.

A. *The Pentateuchal ordinances.*—The Mosaic enactments about the manner in which this festival is to be celebrated are as follows:—On the day of Pentecost there is to be a holy convocation; no manner of work is to be done on this festival (Lev. xxiii. 21; Num. xxviii. 26); all the able-bodied male members of the congregation, who are not legally precluded from it, are to appear in the place of the national sanctuary, as on Passover and Tabernacles (Exod. xxiii. 14, 17; xxxiv. 23), where 'a new meat-offering' (**מנחה חדשה**) of the new Palestine\* crop (Lev. xxiii. 16;

\* **מושבתיכם** (Lev. xxiii. 17) has been explained by the Jewish canons, which obtained during the time of the second temple, as an ellipsis for **מארג מושבותיכם** (Num. xv. 2), *the land of your habitations*, *i. e.*, *Palestine* (*Menachoth*, 77 b, with *Mishna, Menachoth*, viii. 1); hence the rendering of Jonathan b. Uzziel's reputed Chaldee paraphrase, **מאתר מושבתיכון**, the Sept. **ἀπὸ τῆς κατοικίας ὑμῶν**, *from your habitation*, in the singular referring to Palestine; the remark of Rashi, **מושבתיכם**, **לארץ**, *from where your habitations are, but not from any part outside the land*, *i. e.*, *of Israel*; Rashban (*in loco*) and Maimonides (*Iad Ha-Chazaka, Hilchoth Tamidin U-Mosaphin*, viii. 2),

Num. xxviii. 26; Deut. xvi. 10), consisting of two unleavened loaves, made respectively of the tenth of an ephah (= about  $3\frac{1}{2}$  quarts) of the finest wheat flour (Exod. xxiv. 18; Lev. xxiii. 17), is to be offered before the Lord as firstlings (בכורים, Exod. xxxiv. 17), whence this festival derived its name, *the day of firstlings* (יום בכורים, Num. xxviii. 26). With the two loaves were to be offered as a burnt-offering seven lambs of the first year and without blemish, one young bullock, and two lambs, with the usual meat and drink offerings; whilst a goat is to be offered as a sin-offering, and two lambs of the first year are to be offered as a thanksgiving or peace-offering (Lev. xxiii. 18-20). The peace-offering, consisting of the two lambs with the two firstling loaves, are to be waved before the Lord by the priests. These are to be additions to the two loaves, and must not be confounded with the proper festival sacrifice appointed for Pentecost, which is given in Num. xxviii. 27, and which is to be a burnt-offering, consisting of two bullocks, one ram, and seven lambs. That these two passages are not contradictory, as is maintained by Knobel (*Comment. on Lev. xxiii. 15-22*); Vaihinger (*Herzog's Real-Encyklop. s. v. Pfingstfest*, p. 480), and others, but refer to two distinct sacrifices, viz., one to accompany the wave-loaves (על הלחם, Lev. xxiii. 18), and the other the properly appointed sacrifice for the festival (Num. xxviii. 27), is evident from the context and design of the enactments in the respective passages, as well as from the practice of the Jews in the temple, where both prescriptions were obeyed. Hence Josephus, in summing up the number of animal sacrifices on this festival, says that there were fourteen lambs, three young bullocks, and three goats; the number *two*, instead of three goats, being manifestly a transcriber's error, as Vaihinger himself admits (*Antiq. iii. 10. 6*). When Vaihinger characterises this statement of Josephus 'as one of the many exegetical and historical blunders of the Jewish historian,' and maintains that it does not follow from *Menachoth*, iv. 2; we can only say that—I. Josephus simply describes what he himself saw in the temple, and

who rightly distinguish between מושבתיכם as here used, and בכל מושבתיכם (Exod. xii. 20; xxxv. 3; Lev. iii. 17; vii. 26; xxiii. 3, 14, 21; Num. xxxv. 29), the former referring to injunctions which are binding in the land of Canaan, and the latter to commandments to be observed in every place, or wherever the Jews might reside; comp. Rashban on Lev. xxiii. 16. The rendering of the Vulgate (*ex omnibus habitaculis vestris*), therefore, which is followed by Luther (*aus allen eueren Wohnungen*), inserting בכל, is most arbitrary and unjustifiable. Inadmissible too, is the opinion of Calvin, Oslander, George (*Die alt. jüd. Feste*, pp. 130, 273), etc., that *two loaves* were brought out of every house, or at least out of every town, based upon the plural מושבתיכם, or the view of Vaihinger (in *Herzog's Real-Encyklopädie*, s. v. *Pfingstfest*, p. 479); and Keil (on Lev. xxiii. 17), that the plural מושבתיכם is used in a singular sense, i. e., *from one of your habitations* (comp. Gen. vii. 4; Judg. xii. 7; Neh. vi. 2; Eccl. x. 1); and denotes that the two loaves are to be offered from the habitations of the Israelites, and not from those prepared for the sanctuary or from its treasury.

what every ancient Jewish document on the same subject declares; 2. The third section of the very Mishna (*Menachoth*, iv. 3) which Vaihinger quotes distinctly declares—'The kind of sacrifice prescribed in Numbers [xxviii. 27] was offered in the wilderness, and the kind of sacrifice enjoined in Leviticus [xxiii. 18] was not offered in the wilderness; but when they [*i. e.*, the Israelites] entered the promised land they sacrificed both kinds' (שכל

האמור בחומש הפקודים קרב במרבר וכל האמור בתורת כהנים לא קרב במרבר משבאו לארץ (קרבנו אלו ואלו); see also the Gemara on this Mishna, *Babylon Menachoth*, 45 b, where the reasons are given more largely than in the Mishna, why the former kind of sacrifice was not offered in the wilderness; and 3. Maimonides, who also summarises the ancient canons on these two kinds of sacrifices for Pentecosts, shows beyond the shadow of a doubt how these enactments were carried out in the second temple. He says, 'On the fiftieth day, counting from the offering of the omer, is the feast of Pentecost and Azereth (עצרת). Now, on this day additional sacrifices are offered, like the additional ones for New Moon [NEW MOON, THE FEAST OF], consisting of two bullocks, one ram, and seven lambs, all of them being burnt-offerings, and of a goat as sin-offering. These are sacrifices ordered in Num. xxviii. 26, 27, 30, and they constitute the addition for the day. Besides this addition, however, a new meat-offering of two loaves is also brought, and with the loaves are offered one bullock, two rams, and seven lambs, all burnt-offerings; a goat for a sin-offering, and two lambs for a peace-offering. These are the sacrifices ordered in Lev. xxiii. 18. Hence the sacrifice on this day exceeds the two daily sacrifices by three bullocks, three rams, fourteen lambs (all these twenty animals being a burnt-offering); two goats for a sin-offering, which are eaten; and two lambs for a peace-offering, which are not eaten' (*Iad Ha-Chezaka Hilchoth Tamidin U-Mosaphin*, viii. 1). Besides the two loaves with their accompanying sacrifices, and the special festival sacrifices which were offered for the whole nation, each individual who came to the sanctuary was expected to bring, on this festival, as on Passover and the feast of Tabernacles, a free-will offering according to his circumstances (Deut. xvi. 10-12), a portion of which was given to the priests and Levites, and the rest was eaten by the respective families, who invited the poor and strangers to share it.

B. *The post-exile observance of this Festival.*—More minute is the information in the non-canonical documents about the preparation of the sacrifices and the observance of this festival in and before the time of Christ. The pilgrims went up to Jerusalem the day previous to the commencement of the festival, when they prepared everything necessary for its solemn observance; and the approach of the holy convocation was proclaimed in the evening by blasts of the trumpets. The altar of the burnt-sacrifice was cleansed in the first night-watch of the preparation-day, and the gates of the temple, as well as those of the inner court, were opened immediately after midnight for the convenience of the priests, who resided in the city, and for the people, who filled the court before the cock crew, to have their burnt-sacrifices and thanksgiving offerings duly examined by the priests. When the time of sacrifice arrived, the daily morn-

ing sacrifice was first offered, then the festival sacrifices prescribed in Num. xxviii. 26, 27, 30, whilst the Levites were chanting the *Great Hallel*, in which the people joined [HALLEL]; whereupon the congregation solemnly and heartily thanked God for the successful harvest, and the loaves of the new corn, with the accompanying sacrifices prescribed in Lev. xxiii. 18, were offered to the Lord. The two loaves for the wave-offering were prepared in the following manner:—‘Three *seahs* of new wheat were brought into the court of the temple; they were beaten and trodden like all meat-offerings, and ground into flour, two omers (= 3½ quarts) of which were sifted through twelve sieves, and the remainder was redeemed and eaten by any one. The two omers of flour, of which the two loaves were made, were respectively obtained from a *seah* and a half . . . kneaded separately and baked separately. Like all meat-offerings, they were kneaded and prepared outside, but baked inside the Temple, and did not set aside the festival, much less the Sabbath, so that they were baked on the day preceding the festival. Hence, if the preparation day (ערב יום טוב) happened to be on a Sabbath, the loaves were baked on Friday (ערב שבת), and eaten on the third day after they were baked, which was the feast day. They were leavened loaves according to the declaration of the law, and made as follows:—The leaven was fetched from some other place, put into the omer, the omer filled with flour, which was leavened with the said leaven. The length of each loaf was seven handbreadths; the breadth, four handbreadths; and the height, four fingers (Maimonides, *Iad Ha-Chezaka Hilchoth Tamidin U-Mosaphin*, viii. 3-10, with *Mishna Menachoth*, vi. 6, 7; xi. 2; iv. 9). The two loaves thus prepared were then offered as wave-offerings, with two lambs, constituting the peace-offering, in the following manner:—‘The two lambs were brought into the Temple and waved together by the priest while yet alive, as it is written, ‘and he shall wave them . . . a wave-offering’ (Lev. xxiii. 20); but if he waved each one separately, it was also valid, whereupon they were slain and flayed. The priest then took the breast and the shoulder of each one (comp. Lev. vii. 30, 32), laid them down by the side of the two loaves, put both his hands under them, and waved them all together as if they were one, towards the east side—the place of all wave-offering—doing it forwards and backwards, up and down; but it was also valid if he waved each separately. Hereupon he burned the fat of the two lambs, and the remainder of the flesh was eaten by the priests. As to the two loaves, the high-priest took one of them, and the second was divided among all the officiating priests (הכמסורות), and both of them were eaten up within the same day and half the following night, just as the flesh of the most holy things’ (Maimonides, *Iad Ha-Chezaka Hilchoth Tamidin U-Mosaphin*, viii. 11, with *Mishna Menachoth*, v. 6; Joseph. *Antiq.* iii. 10. 6). After the prescribed daily sacrifice, the festival and the harvest sacrifice were offered for the whole nation. Each individual brought the free-will offering, which formed the cheerful and hospitable meal of the family, and to which the Levite, the widow, the orphan, the poor, and the stranger were invited. The festival in a minor degree continued for a whole week, during which time those who did not offer on the first day repaired their defects or negligence (*Rosh Ha-*

*Shana*, 4 b). The offering of the first-fruits also began at this time (*Mishna Bikkurim*, i. 7, 10); and it was for this reason, as well as for the joyous semi-festival days which followed the day of Holy Convocation that we find so large a concourse of Jews attending Pentecost (Acts ii.; Joseph. *Antiq.* xiv. 13. 14; xvii. 10. 2).

C. *The Observance of this Festival to the present day.*—This festival, like all the feasts and fasts ordained or sanctioned in the O. T., is annually and sacredly kept by the Jews to the present day on the 6th and 7th of *Sivan*, i.e., between the second half of May and the first half of June. We have already seen [PASSOVER] that in accordance with the injunction in Lev. xxiii. 15, 16, the Jews regularly count every evening the fifty days from the second day of Passover until Pentecost, and that they recite a prayer over it, which is given in the article Passover. As the counting (ספירה) of these fifty days, on the first of which the sickle was brought out for cutting the corn, and on the last of which it was laid up again because the harvest was entirely finished, is not only a connecting link between Passover and Pentecost, but may be regarded as preparatory for the feast of Pentecost, we must notice the events and practices connected therewith. Owing to a fearful plague which broke out on the second day of Passover or the first of Omer, and which, after raging thirty-two days and carrying off between Gabath and Antiparos no less than 24,000 (י"ב אלף זוגות) disciples of the celebrated R. Akiba, suddenly ceased on the eighteenth of *Far* (י"ח באייר), the second month, i.e. (ל"ג בעומר), the thirty-third of Omer (*Babylon Tzabmoth*, 62 b; *Midrash Bereshith Rabba*, Seder, ח"י שרר, sec. lxi., p. 134, ed. Stettin 1863), it was ordained that, in memory of this calamity, three days are to be kept as a time of mourning, during which no marriage is to take place, no enjoyments and pleasures are to be indulged in, nor even is the beard to be removed (*Orach Chajim, Hilchoth Pesach*, sec. 493); and that the thirty-third of Omer (ל"ג בעומר), on which the epidemic disappeared, is to be kept as a holiday, especially among the students, for which reason it is called the scholars' feast. The reason which R. Johanan b. Nori assigns for regarding this period as a time of mourning—i.e., that the wicked are punished in hell in these days, and that judgment is passed on the produce of the land—is simply a modern Kabbalistic form given to an ancient usage.

The three days preceding the festival, on which, as we shall see hereafter, the Jews commemorate the giving of the law on Sinai, are called שלשת ימי הנבלה (*the three days of separation and sanctification*), because the Lord commanded Moses to set bounds around the mountain, and that the people should sanctify themselves three days prior to the giving of the law (Exod. xix. 12, 14, 23). On the preparation day (ערב שביעות), the synagogues and the private houses are adorned with flowers and odoriferous herbs; the male members of the community purify themselves by immersion and confession of sins, put on their festive garments, and resort to the synagogue, where, after the evening prayer (מועריב), the hallowed nature of the festival is proclaimed by the cantor in the blessing pronounced over a cup of wine (קידוש), which is also done by every head of the family at home before

the evening repast. After supper both the learned and the illiterate are either to go again into the synagogue or to congregate in private houses and read all night—*i.* The three first and the three last verses of every book in the Hebrew Scriptures, but some portions have to be read entire; *ii.* The first and last Mishna of every tractate in the Talmud; *iii.* The beginning and end of the *Book Jetsirah*; *iv.* Passages from the *Sohar*; *v.* The 613 commandments into which the Mosaic law is divided [EDUCATION]; and *vi.* The Song of Songs. The whole must be recited in thirteen divisions, so that the prayer *Kadish* (קדיש) might be said between each division and the letters of the word *אחד* (the unity in the Deity) =  $4 + 8 + 1 = 13$  be obtained (comp. *Magen Abraham, Orach Chajim*, sec. 494). The reason for this watching all night, given by R. Abraham, the author of *The Magen Abraham*, is as follows:—When God was about to reveal his law to Israel, he had to wake them up from their sleep. Now, to remove the sin of that sleep, the Jews are now to wake all night (comp. Brück, *Rabbinische Ceremonialgebräuche*, Breslau 1837, pp. 8-22, and

the ritual for this night, entitled *ליל שבועות* (תהיקן ליל שבועות).

In the morning general festival service special prayers are inserted for this day, which set forth the glory of the lawgiver and Israel, the glory of the Lord in creating the universe, etc. etc., and in which the decalogue is interwoven, the great Hallel is recited, Exod. xix. 1, xx. 26 is read as the lesson from the law, Num. xviii. 26-31 as *Maphtir*, and Ezek. i. 1-28, iii. 12, as the lesson from the prophets [HAPHTARA]; whereupon the *Musaph* is offered, and the priests, after having their hands washed by the Levites, pronounce chantingly the benediction (Num. vi. 23-27) on the congregation, who receive it with their heads covered by the fringed wrapper [FRINGES]. On the second evening they again resort to the synagogue, use the ritual for the festivals, in which are again inserted special prayers for this occasion, being chiefly on the greatness of God and the giving of the law and the decalogue; the sanctification of the festival (קידוש) is again pronounced, both by the prælector in the synagogue and the heads of families at home; and prayers different from those of the first day, also celebrating the giving of the law, are intermingled with the ordinary festival prayers; the Hallel is recited, as well as the Book of Ruth; Deut. xv. 19-xvi. 17; Num. xxviii. 26-31 is read as the lesson from the law; Habbak. ii. 20-iii. 19, or iii. 1-19, as the lesson from the prophets; the prayer is offered for departed relatives; the *Musaph* *Ritual* recited; the priests pronounce the benediction as on the former day; and the festival concludes after the afternoon service, as soon as the stars appear or darkness sets in. It must be remarked that milk and honey form an essential part of the meals during this festival, which is of a particularly joyous character, to symbolize 'the honey and milk which are under the tongue of the spouse (*Song of Songs*, iv. 11), by virtue of the law which the bridegroom gave her.

4. *Origin and Import of this Festival*—Looking simply at the text of the Bible, there can be little doubt that Pentecost owes its origin entirely and exclusively to the harvest which terminated at this time. It is to be expected that, in common with other nations of antiquity who celebrated the ingathering of the corn by offering to the Deity, amongst

other firstling offerings, the fine wheat of flour as *θαλυσίος ἄπρος* (Eustath. ad Iliad., ix. 530; Athen., iii. 80; Theocrit., vii. 3), the Jews, as an agricultural people, would thankfully acknowledge the goodness of God in giving them the fruits of the earth, by offering to the Bountiful Giver of all good things the first-fruits of their harvest. That this was primarily the origin and import of Pentecost is most unquestionably indicated by its very names, *ex. gr.*, the festival of (הקציר) the cut off corn, *i. e.*, end of the harvest (Exod. xxiii. 16), which commenced on the morrow of the Passover, when the sickle was first brought into the field (Deut. xvi. 9); and so intimately connected are the beginning of the harvest at Passover with the termination of it at this festival, that Pentecost was actually denominated, during the time of the second Temple, and is called in the Jewish literature to the present day,

עצרת, the conclusion or פסח של פסח, the termination of Passover. To the same effect is the name חג השבועות, the festival of weeks, which, as Bähr rightly remarks, would be a very strange and enigmatical designation of a festival, simply because of the intervening time betwixt it and a preceding festival, if it did not stand in a fixed and essential relationship to this intervening time, and if in its nature it did not belong thereunto, since the weeks themselves have nothing which could be the subject of a religious festival, except the harvest which took place in these weeks (*Symbolik*, ii. 647). Being the culmination of Passover, and agrarian in its character, the pre-Mosaic celebration of this festival among the Jews will hardly be questioned; for it will not be supposed that the patriarchs, who in common with other nations were devoted to agriculture, would yet be behind these nations in not celebrating the harvest festival, to acknowledge the goodness of God in giving them the fruits of the earth, which obtained among the heathen nations from the remotest times. And indeed, the Book of Jubilees, as will be seen in the sequel, actually ascribes a pre-Mosaic existence to it. In incorporating this festival into the cycle of the canonical feasts, the Mosaic legislation, as usual, divested it of all idolatrous rites, consecrated it in an especial manner to him who filleth us with the finest of wheat (Ps. cxlvii. 14), by enjoining the Hebrews liberally to impart to the needy from that which they have been permitted to reap, and to remember that they themselves were once needy and oppressed in Egypt, and are now in the possession of liberty and of the bounties of Providence (Deut. xvi. 11, 12). The Mosaic code, moreover, constituted it a member of the Hebrew family of festivals, by putting Pentecost on the sacred basis of seven, which, as we have seen, underlies the whole organism of feasts.

But though the canonical Scriptures speak of Pentecost as simply a harvest festival, yet the non-canonical documents show, beyond the shadow of a doubt, that the Jews, at least as early as the days of Christ, connected with, and commemorated on the 6th of *Sivan*, the third month, the giving of the Decalogue. Thus, the Talmud declares, that 'the Rabbins propounded that the Decalogue was given to Israel on the 6th of *Sivan*' (ת"ר בשש"י) *Sabbath*, 86 b), and this is deduced from Exod. xix., for, according to tradition, Moses ascended the mountain on the 2d of *Sivan*, the third month (Exod. xix.

1-3); received the answer of the people on the third (ver. 7); reascended the mountain on the fourth (ver. 8); commanded the people to sanctify themselves three days, which were the fourth, fifth, and sixth (vers. 12, 14, 23); and on the third of these three days of sanctification, which was the sixth day of the month, delivered the Decalogue to them (vers. 10, 11, 15, 16). This is the unanimous voice of Jewish tradition. It is given in the *Mechilta* on Exod. xix. (p. 83-90, ed. Wilna, 1844 [MIDRASH]); in the Chaldee paraphrase of Jonathan ben Uzziel, which renders יוהי ביום

והיה ביומא תליתאה (Exod. xix. 16), by בשיטא בירחא, and it came to pass on the third day, on the sixth of the month, i. e., Sivan; by Rashi (*Comment. on Exod.* xix. 1-16)\* and by Maimonides, who remarks: 'Pentecost is the day on which the Law was given, and in order to magnify this day, the days are counted from the first festival [i. e., Passover] to it, just as one who is expecting the most faithful of his friends is accustomed to count the days and hours of his arrival; for this is the reason of counting the Omer from the day of our Exodus from Egypt to the day of the giving of the Law, which was the ultimate object of the Exodus, as it is said: I bare you on eagles' wings, and brought you unto myself. And because this great manifestation did not last more than one day, therefore we annually commemorate it only one day' (*More Nebuchim*, iii. 43). To this effect is R. Jehudah (born circa 1086 [JEHUDAH HA-LEVI]), in his celebrated work *Cusari*, iii. 10; Nachmanides (born about 1195 [NACHMANIDES]), in his commentary on the Pentateuch, Exod. xix. 1-25; Lev. xxiii. 17, and all the Jewish commentators, as well as the ritual for this festival. Even Abravanel, who denies that the primary object in the institution of this festival was to celebrate the gift of the Law, most emphatically declares, that the Decalogue was given on Mount Sinai, on Pentecost, as may be seen from the following remark: 'The Law was not given with a design to this festival, so that it should commemorate the gift of the Law, since the festival was not instituted to commemorate the giving of the Law; as our divine Law and the prophecy are their own witnesses, and did not require a day to be sanctified to commemorate them; but the design of the feast of weeks was to commence the wheat harvest. For just as the feast of tabernacles was intended to finish the ingathering of the produce, so the festival of weeks was intended to begin the harvest, as it was the will of the Lord that at the commencement of the ingathering of the fruits, which are the food of man, the first of which is the wheat, and which began to be cut on the feast of weeks, a festival should be celebrated to render praise to him who giveth food to all flesh; and that another festival should be celebrated at the

end of the ingathering of the fruits. Still, there is no doubt that the Law was given on the day of the feast of weeks, although this festival was not instituted to commemorate it' (*Commentary on the Pentateuch*, *Parshath Aḥar*, p. 211 a, ed. Hanau, 1710). Those early fathers who were best acquainted with the Jewish tradition testify to the same thing, that the Law was given on Pentecost, and that the Jews commemorate the event on this festival. It was therefore on this day, when the apostles, in common with their Jewish brethren, were assembled to commemorate the anniversary of the giving of the Law from Sinai, and were engaged in the study of Holy Writ, in accordance with the custom of the day, that the Holy Spirit descended upon them, and sent them forth to proclaim 'the wonderful works of God,' as revealed in the gospel (Acts ii.) Thus, St. Jerome tells us, 'Supputemus numerum, et inveniemus quinquagesimo die egressionis Israël ex Ægypto in vertice montis Sinay legem datam. Unde et Pentecostes celebratur solemnitas, et postea evangelii sacramentum in Spiritus Sancti descensione completur' (*Epist. ad Fabiolam*, *Mansio* xii. c; *Opp.*, tom. i. p. 1074, ed. Par. 1609). Similarly St. Augustine, 'Pentecosten etiam, id est, a passione et resurrectione Domini, quinquagesimum diem celebramus, quo nobis Sanctum Spiritum Paracletum quem promiserat misit; quod futurum etiam per Judæorum pascha significatum est, cum quinquagesimo die post celebrationem ovīs occisæ, Moyses digito Dei scriptam legem accepit in monte' (*Contra Faustum*, lib. xxxiii. c. 12). Comp. also De Lyra, *Comment. on Lev.* xxiii.; Bishop Patrick *on Exod.* xix. It is very curious that the apocryphal Book of Jubilees, which was written in the 1st century before Christ [JUBILEES, BOOK OF], should connect this festival, which was celebrated on the third month, with the third month of Noah's leaving the ark, and maintain that it was ordained to be celebrated in this month, to renew annually the covenant which God made with this patriarch not to destroy the world again by a flood, cap. vi. 57, ff. Such an opinion would hardly have been hazarded by a Jew if it had not been believed by many of his co-religionists that this festival had a pre-Mosaic existence. Since the destruction of Jerusalem, and the impossibility of giving prominence to that part of the festival which bears on the Palestinian harvest, the Jews have almost entirely made Pentecost to commemorate the giving of the law, and the only references they make in the ritual to the harvest, which was the primary object of its institution, is in the reading of the book of Ruth, wherein the harvest is described.

5. *Literature*.—*Mishna Menachoth*, and *Bikkurim*; *Joseph. Antig.* xiv. 13. 4; xvii. 12. 2; *De Bell. Jud.* ii. 3. 1; Maimonides, *Iad Ha-Chesaka Hilchoth Tamidin U-Mosaphin*, cap. viii.; Abravanel, *Commentary on the Pentateuch*, p. 211, ed. Hanau 1710; Meyer, *De Fest. D. G.

\* Hence Keil is incorrect in his assertion, that it is 'the later Rabbins who connected this festival with the giving of the Law;' as well as in his quotation of Maimonides in corroboration of it, and in his conclusion: 'accordingly, the earlier Christian theologians, who, in addition to harvest festival, make it also to commemorate the gift of the law, cannot even quote Jewish tradition for their support' (*Handbuch der biblischen Archäologie*, vol. i., section 83, p. 399, note 6).

PEOR (הַפְּעוֹר, with the article, 'The opening'; Φοργς; *Mons Phogor*), the name of a mountain on the plateau of Moab, to the top of which Balak led Balaam that he might see the whole host of Israel and curse them (Num. xxiii. 28). It appears to have been one of the ancient high places of Moab dedicated to the service of Baal (cf. xxii. 41; xxiii. 13, 27). Its position is described as 'looking to the face of Jeshimon,' that is, the wilderness of Arabia. [JESHIMON.] If it was in sight of the Arabah of Moab, on the east bank of the Jordan, where the Israelites were then encamped, and if at the same time it commanded a view of the eastern desert, it must have been one of those peaks on the western brow of the plateau which are seen between Heshbon and the banks of the Arnon (cf. Joseph. *Antiq.* iv. 6. 4). Two other incidental notices of the sacred writers tend to fix its position. There can be little doubt that it was connected with the town of Beth-Peor, which is described as 'over against' the site of the Israelitish camp (Deut. iii. 29; cf. xxiv. 6). [BETH-PEOR.] Josephus says it was sixty stadia distant from the camp (*Antiq.* iv. 6. 4); Eusebius states that it lay above Libias, six miles distant from it (*Onomast.*, s. v. *Fogor* and *Beth-fogo*); and Jerome mentions Mount Phogor as situated between Libias and Heshbon (*Onomast.*, s. v. *Arabothe Moab*). It would seem, therefore, that this mountain was one of those peaks on the south side of Wady Heshbon commanding the Jordan valley. The name has disappeared, and it may not be possible now to identify the exact peak to which it was given in ancient times.

'The matter of Peor' (דְּבַר פֵּאֵר) mentioned in Num. xxv. 18, and xxxi. 16; and 'the iniquity of Peor' (עֲוֹן פֵּאֵר), spoken of by Joshua (xxii. 17), refer to the Midianitish deity Baal-peor, and not to the mountain. By following the counsels of Balaam, the Midianites seduced the Israelites to take part in their worship, and the licentious revels by which it appears to have been accompanied; and thus they brought upon them the divine vengeance (Num. xxxi. 16; xxv. 1, *seq.*) The temple or shrine of Baal-peor probably stood on the top of the mountain; and the town of Beth-peor may have been situated at its base.

Jerome mentions a village called *Fogor*, which is the Greek form of Peor (Φοργς), on the west of the Jordan, near Bethlehem (*Onomast.*, s. v.) It is doubtless identical with the *Phagor* (Φαγόρ) found in the LXX. version of Josh. xv. 59, and with the ruined village now called Beit Faghûr, about four miles south-west of Bethlehem (Robinson, *B. R.*, iii. 275; Reland, *Pal.*, p. 643).—J. L. P.

PERAZIM, MOUNT (הַר פְּרָצִים, 'mountain of breaches'; ὄρος ἀσβεῶν; *mons divisionum*). The prophet Isaiah, in warning the Israelites of the divine vengeance about to come upon the nation, and with which they did not seem sufficiently impressed, refers to exhibitions of God's wrath exhibited in their past history in these words, 'The Lord shall rise up as in *Mount Perazim*, he shall be wroth as in the valley of Gibeon' (Is. xxviii. 21). Commentators are not agreed as to the events here alluded to. Mount Perazim is not mentioned in any other part of Scripture. Hendewerk thinks reference is made to 'the breach of Uzzah' (פְּרִץ עֲזָה, *Perez-Uzzah*) described in 2 Sam. vi. 6-8 (*Die*

*deutero-Jesaiaschen Weissag.*, ad loc.); but that narrative contains no mention of any mount. Ewald supposes the prophet may allude to the slaughter of the Canaanites at Gibeon by Joshua (*Die Propheten*, ad loc.); though in another place he distinctly states that Mount Perazim is the same place which is called Baal-Perazim in 2 Sam. v. 20 (*Geschichte des Volkes Israel*, iii. 187, note 3). It seems much more probable that Isaiah in this passage alludes to David's conquest of the Philistines, 'And David came to Baal-perazim, and smote them there, and said, The Lord hath broken forth (פָּרַץ) upon mine enemies before me, as the breach of waters (כַּפְרֵץ מַיִם). Therefore he called the name of that place Baal-perazim' (בעל פְּרָצִים, 2 Sam. v. 20). The play upon the word is characteristic. It seems probable, as Ewald states (*l. c.*), that there was a high-place of Baal upon the top of the mount, and hence the name Baal-perazim. This view is confirmed by the fact that in the second clause of the passage Isaiah mentions another instance of divine wrath in the valley of Gibeon, and in 1 Chron. xiv. the historian connects with the victory at Baal-perazim a second victory of David over the Philistines, in which it is said 'they smote the host of the Philistines from *Gibeon* even to Gazer' (ver. 16). The exact locality of Mount Perazim is unknown; but it must have been some of the heights on the borders of the valley of Rephaim (1 Chron. xiv. 9; 2 Sam. v. 18), and consequently not far distant from Jerusalem.—J. L. P.

PERÈ (פֶּרֶא, the swift runner, from פָּרָא, to run swiftly), the name of an animal mentioned in Scripture as frequenting waste places in troops (Job xxiv. 5; Is. xxxii. 14), and as the image of wildness, rudeness, and irrationality (Job xi. 12; Gen. xvi. 12; Hos. xiii. 15). The LXX. render by δναργος, ὄνος ἀργος, ὄνος ἐρεμνής, and ὄνος ἐν ἀργος. There can be no doubt that it is a species of wild ass that is intended; but it is not easy to determine the distinction between it and the 'Arod. [AROD.] The Perè may be the Koulan, or wild ass of Persia; but others with more probability identify it with the Kiang or Djiggetai (*As. Hemionos*).

426 Wild Ass.

This animal does not bray, which shows that it cannot be the 'Arod. The Kiang has a smooth fur of a bright rufous-bay tint; the legs are of a pale straw colour; and a dark broad streak runs along the central line of the back. The males are sometimes as much as fourteen hands in height at

the shoulder, and neigh like horses. This animal is found in small troops roaming over the sandy steppes of Central Asia.—W. L. A.

PERED (פֶּרֶד), or PIRDAH (פִּרְדָּה), an animal used both for riding and for carrying burdens (2 Sam. xiii. 29; xviii. 9; 1 Kings xviii. 5; 2 Kings v. 17; Is. lxvi. 20). The mule is undoubtedly intended, an animal which appears in the sacred history for the first time in the age of David. This animal is sufficiently well known to require no par-

427. Mules: from an Egyptian Painting—Brit. Museum.

ticular description. Where, or at what period, the breeding of mules was first commenced is totally unknown, although, from several circumstances, Western Asia may be regarded as the locality; and the era as coinciding with that of the first kings of Israel. In the time of David, to be allowed to ride on the king's own mule was an understood concession of great, if not sovereign, authority, and several years before the mention of this event all the king's sons already rode upon mules. It does not appear that the Hebrew people, at this early period at least, bred mules; they received them from Armenia, the large Persian race being considered the offspring of the Onager and mare; but the most beautiful were no doubt brought from the vicinity of Bassora.

PERES (פֶּרֶס, in our versions 'ossifrage,' Lev. xi. 13; Deut. xiv. 12). Although *Neser* is unquestionably the Hebrew name of the eagle, a genus so conspicuous, and to this moment so common in Palestine, probably possessed more than one designation in the national dialects of the country. *Peres*, though by some translators referred to a hawk, which they denominate *Accipiter*, has generally been identified with the ossifrage or great sea-eagle. The name ossifrage is applied to this bird from some idea of its breaking the bones of its prey; but as it subsists mostly on fish, or on carrion, and only by chance on birds, whose bones in all genera are very hard, destitute of marrow, and likewise without nutritious matter, the name is not appropriate in its use. Besides, breaking the bones must be effected by the beak, which is strong indeed, but only formed to strike, tear, or hold, not to masticate; and if the bones are broken for that purpose, where are they to be found? in the crop, the succentorial ventricle, or in the gizzard?—organs in birds of prey far from vigorous, or so well defined as they are in other orders of the class, particularly in Gallinacæ. In fact, there is in nature no such bird as one that breaks the bones of warm-blooded animals in order to swallow them; consequently, no identification can

be made with any of the sea-eagles. But when we place together *Peres*, a name derived from a root denoting 'to crush' or 'break,' and find that by the Greek name φῆν (Phene), the Hellenic nations called the Lämmer Geyer of the Swiss, which Savigny (*Oiseaux d'Égypte et de Syrie*) has proved to be the ossifrage of the Romans; then it becomes an immediate question, why such a denomination should have been bestowed. The answer is, we think, satisfactory; for, constituting the largest flying bird of the old continent, and being a tenant of the highest ranges of mountains in Europe, western Asia, and Africa, though sometimes feeding on carrion, and not appearing to take up prey like eagles in the talons, it pursues the chamois, young ibex, mountain deer, or marmot, among precipices, until it drives, or, by a rush of its wings, forces the game over the brink, to be dashed to pieces below, and thus deservedly obtained the name of bone-breaker.

The species in Europe is little if at all inferior in size to the *Condor* of South America, measuring from the point of the bill to the end of the tail four feet two or three inches, and sometimes ten feet in the expanse of wing; the head and neck are not, like those of vultures, naked, but covered with whitish narrow feathers; and there is a beard of bristly hair under the lower mandible: the rest of the plumage is nearly black and brown, with some whitish streaks on the shoulders, and an abundance

428. *Gypaëtos Barbatus*.

of pale rust colour on the back of the neck, the thighs, vent, and legs; the toes are short and bluish, and the claws strong. In the young the head and neck are black, and the species or variety of Abyssinia appears to be rusty and yellowish on the neck and stomach. It is the griffon of Cuvier, *Gypaëtos barbatus* of nomenclators, and γρύψ of the Seventy. The Arabs, according to Bruce, use the names Abou-Duch'n and Nisser-Werk, which is a proof that they consider it a kind of eagle, and perhaps confound this species with the great sea-eagle, which has likewise a few bristles under the throat; and commentators, who have often represented *Peres* to be the black vulture, or a great vulture, were only viewing the *Gypaëtos* as forming one of the order *Accipitres*, according to the Linnean arrangement, where *Vultur barbatus* (Syst. Nat.) is the last of that genus, although in the 13th

edition (by Gmelin) we find the name changed to *Fulco Barbatus*, and located immediately before *F. Albicilla*, or the sea-eagle, showing that until a still more accurate classification placed the species in a separate genus, ornithologists had no determined idea of the true place it should occupy, and consequently by what generical appellation it was to be distinguished.—C. H. S.

#### PEREZ. [PHAREZ.]

PEREZ-UZZAH, a place in the neighbourhood of Jerusalem, which obtained this name (meaning 'breach of Uzzah') from the judgment inflicted upon Uzzah for rashly handling the ark (2 Sam. vi. 8; 1 Chron. xiii. 11).

PERFUMES. In the article ANOINTING we have noticed the use of perfumes in Eastern countries; and in the botanical articles all the aromatic substances mentioned in Scripture are carefully examined. Here, therefore, we have only to add a few remarks, which the scope of those articles does not embrace.

The practice of producing an agreeable odour by fumigation, or burning incense, as well as that of anointing the person with odoriferous oils and ointments, and of sprinkling the dress with fragrant waters, originated in, and is confined to, warm climates. In such climates perspiration is profuse, and much care is needful to prevent the effects of it from being offensive. It is in this necessity we may find the reason for the use of perfumes, particularly at weddings and feasts, and on visits to persons of rank; and in fact on most of the occasions which bring people together with the intention of being agreeable to one another.

The ointments and oils used by the Israelites were rarely simple, but were compounded of various ingredients (Job xli. 22; comp. Plin. *Hist. Nat.* xxix. 8). Olive oil, the valued product of Palestine (Deut. xxviii. 40; Mic. vi. 15), was combined with sundry aromatics, chiefly foreign (1 Kings x. 10; Ezek. xxvii. 22), particularly bosome, myrrh, and nard [see these words]. Such ointments were for the most part costly (Amos vi. 6), and formed a much-coveted luxury. The ingredients, and often the prepared oils and resins in a state fit for use, were obtained chiefly in traffic from the Phœnicians, who imported them in small alabaster boxes [ALABASTER], in which the delicious aroma was best preserved. A description of the more costly unguents is given by Pliny (*Hist. Nat.* xiii. 2). The preparation of these required peculiar skill, and therefore formed a particular profession. The רֹקֶחִים *rokechim* of Exod. xxx. 25, 35; Neh. iii. 8; Eccles. x. 1, called 'Apothecary' in the A. V., was no other than a maker of perfumes. So strong were the better kinds of ointments, and so perfectly were the different component substances amalgamated, that they have been known to retain their scent several hundred years. One of the alabaster vases in the museum at Alnwick Castle contains some of the ancient Egyptian ointment, between two and three thousand years old, and yet its odour remains (Wilkinson, *Anc. Egyptians*, ii. 314).

The 'holy anointing oil,' employed in the sacerdotal unction, was composed of two parts 'myrrh' [MOR], two parts 'cassia' [KIDDAH], one part 'cinnamon' [KINNAMON], one part 'sweet calamus' [KANEH BOSEM], compounded 'according to the art of the perfumer,' with a sufficient quan-

tity of the purest olive oil to give it the proper consistence (Exod. xxx. 23, 25). It was strictly forbidden that any perfume like this—that is, composed of the same ingredients—should be used for common purposes, or indeed made at all (xxx. 32, 33); and we cannot but admire the course adopted in order to secure the object contemplated by the law. The composition was not preserved as a secret, but was publicly declared and described, with a plain prohibition to make any like it. Maimonides says that doubtless the cause of this prohibition was, that there might be no such perfume found elsewhere, and consequently that a greater attachment might be induced to the sanctuary; and also, to prevent the great evils which might arise from men esteeming themselves more excellent than others, if allowed to anoint themselves with a similar oil (*More Nevochim*, ch. xx.) The reasons for attaching such distinction to objects consecrated by their holy appropriations, are too obvious to need much elucidation.

The prodigious quantity of this holy ointment made on the occasion which the text describes, being no less than 750 ounces of solids compounded with five quarts of oil, may give some idea of the profuse use of perfumes among the Hebrews. We are, indeed, told by the Psalmist (cxxxiii. 2), that when the holy anointing oil was poured upon the head of Aaron, it flowed down over his beard and dress, even to the skirts of his garments. This circumstance may give some interest to the following anecdote, which we translate from Chardin (*Voyages*, iv. 43, edit. Langles). After remarking how prodigal the eastern females are of perfumes, he gives this instance: 'I remember that, at the solemnization of the nuptials of the three princesses royal of Golconda, whom the king, their father, who had no other children, married in one day, in the year 1679, perfumes were lavished on every invited guest as he arrived. They sprinkled them upon those who were clad in white; but gave them into the hands of those who wore coloured raiment, because their garments would have been spoiled by throwing it over them, which was done in the following manner. They threw over the body a bottle of rose-water, containing about half a pint, and then a larger bottle of water tinted with saffron, in such a manner that the clothes would have been stained with it. After this, they rubbed the arms and the body with a liquid perfume of ladanum and ambergris, and they put round the throat a thick cord of jasmine. I was thus perfumed with saffron in many great houses of this country, and in other places. This attention and honour is a universal custom among the women who have the means of obtaining this luxury.'—J. K.

PERGA (Πέργη), a town of Pamphylia, in Asia Minor, situated upon the river Cestrus, sixty stades from its estuary. Perga was originally the capital of Pamphylia; but when that province was divided into two, Side became the chief town of the first, and Perga of the second Pamphylia (Strabo, xiv. p. 667; Pliny, *Hist. Nat.*, v. 26; Pomp. Mela, i. 14; Cic. *Verr.*, i. 30). The site has been established by Col. Leake as that where extensive remains of vaulted and ruined buildings were observed by General Köhler on the Cestrus, west of Stavros. It is called by the Turks Eskikalesi. [PAMPHYLIA.]—J. K.

PERGAMOS (Πέργαμος), or PERGAMUM, a town of the Great Mysia, the capital of a kingdom of the same name, and afterwards of the Roman province of Asia Propria. The river Caicus, which is formed by the union of two branches meeting thirty or forty miles above its mouth, waters an extensive valley not exceeded in natural beauty and fertility by any in the world. In this valley, in N. lat.  $39^{\circ} 4'$ , E. long.  $27^{\circ} 12'$ , stood Pergamos, at the distance of about twenty miles from the sea. It lay on the north bank of the Caicus, at the base and on the declivity of two high and steep mountains, on one of which now stands a dilapidated castle. About two centuries before the Christian era, Pergamos became the residence of the celebrated kings of the family of Attalus, and a seat of literature and the arts. King Eumenes, the second of the name, greatly beautified the town, and increased the library of Pergamos so consider-

ably that the number of volumes amounted to 200,000. As the papyrus shrub had not yet begun to be exported from Egypt, sheep and goat skins, cleaned and prepared for the purpose, were used for manuscripts; and as the art of preparing them was brought to perfection at Pergamos, they, from that circumstance, obtained the name of *pergamena*, or parchment. The library remained at Pergamos after the kingdom of the Attali had lost its independence, until Antony removed it to Egypt, and presented it to Queen Cleopatra (Pliny, *Hist. Nat.*, iii. 2; Plutarch, *Anton.*) The valuable tapestries, called in Latin *aulæa*, from having adorned the hall of King Attalus, were also wrought in this town. The last king of Pergamos bequeathed his treasures to the Romans, who took possession of the kingdom also, and erected it into a province under the name of Asia Propria (Martial, *Epig.*, ix. 17). Pergamos retained under the Romans

429. Pergamos.

that authority over the cities of Asia which it had acquired under the successors of Attalus, and it still preserves many vestiges of its ancient magnificence. Remains of the Asclepium and of some other temples; of the theatre, stadium, amphitheatre, and several other buildings; are still to be seen. Even now, Pergamos, under the name of Bergamo, is a place of considerable importance, containing a population estimated at 14,000, of whom about 3000 are Greeks, 300 Armenians, and the rest Turks (Macfarlane's *Visit*). The writer just cited says, 'The approach to this ancient and decayed city was as impressive as well might be. After crossing the Caicus, I saw, looking over three vast tumuli, or sepulchral barrows, similar to those of the plains of Troy, the Turkish city of Pergamos, with its tall minarets and taller cypresses, situated on the lower declivities and at the foot of the Acropolis, whose bold gray brow was crowned by the rugged walls of a barbarous castle, the

usurper of the site of a magnificent Greek temple.' The town consists for the most part of small and mean wooden houses, among which appear the remains of early Christian churches, showing 'like vast fortresses amid vast barracks of wood.' None of these churches have any Scriptural or Apocalyptic interest connected with them, having been erected 'several centuries after the ministry of the apostles, and when Christianity was not a humble and despised creed, but the adopted religion of a vast empire.' The Pagan temples have fared worse than these Christian churches. 'The fanes of Jupiter and Diana, of Æsculapius and Venus, are prostrate in the dust; and where they have not been carried away by the Turks, to cut up into tombstones or to pound into mortar, the Corinthian and Ionic columns, the splendid capitals, the cornices and pediments, all in the highest ornament, are thrown into unsightly heaps.'

In Pergamos was one of 'the seven churches of

Asia,' to which the Apocalypse is addressed. This church is commended for its fidelity and firmness in the midst of persecutions, and in a city so eminently addicted to idolatry. 'I know,' it is said, 'thy works, and where thou dwellest, even where Satan's seat is' (Rev. ii. 13). Now there was at Pergamos a celebrated and much frequented temple of Æsculapius, who probably there, as in other places, was worshipped in the form of a living serpent, fed in the temple, and considered as its divinity. Hence Æsculapius was called the god of Pergamos, and on the coins struck by the town, Æsculapius appears with a rod encircled by a serpent (Berger, *Thesaur.*, i. 492). As the sacred writer mentions (Rev. xii. 9) the great dragon and the old serpent, there is reason to conclude that when he says, in the above passage, that the church of Pergamos dwelt 'where Satan's seat is,' he alludes to the worship of the serpent, which was there practised (Rosenmüller, *Bib. Geog.*, iii. 13-17; Macfarlane, *Visit to the Seven Apocalyptic Churches*, 1832; Arundell's *Asia Minor*, ii. 302-7; Leake's *Geog. of Asia Minor*, pp. 265, 266; Richter, *Wallfahrten*, p. 488, seq.; Schubert, *Reise ins Morgenland*; *Missionary Herald* for 1839, pp. 228-30).—J. K.

PERIZZITE (פֶּרִיזִי; Φερεζαῖοι, Φερεζαῖος; in Ezra δ Φερεζῖ; *Pherezaeus*), the name of one of the aboriginal tribes of Palestine. They are first mentioned in Gen. xiii. 7, where the sacred historian relates the story of the separation of Abraham and Lot. 'The Canaanite and the Perizzite dwelled then in the land.' The separation took place at Bethel, and it may be inferred that the Perizzites were then settled in that mountain region. Afterwards they are grouped with the Hittites and Rephaim (xv. 20); and they are mentioned in connection with the slaughter of the Shechemites by Simeon and Levi (xxxiv. 30). They appear to have been at that early period the most important tribe in the country next to the Canaanites; and the name is found in nearly all those lists in which the tribes of Canaan are enumerated (Exod. iii. 8, 17; xiii. 23; xxxiv. 11; Deut. vii. 1, etc.). Joshua locates them in the mountains with the Amorite, Hittite, and Jebusite (xi. 3). They were a warlike race like the Rephaim, and had their strongholds among the heights of Judah and Ephraim (xvii. 15). After the death of Joshua the tribes of Judah and Simeon joined in an expedition against the Canaanites and Perizzites, 'and slew of them in Bezek ten thousand men' (Judg. i. 4, seq.). The site of Bezek is not known; but we may infer that it was within the allotted territory of Judah, and could not therefore be the same place where Saul numbered his troops before his attack on the Ammonites at Jabesh-Gilead: that Bezek was only a short march from Jabesh (1 Sam. xi. 8-11), and must therefore have been on the north-eastern border of Ephraim. The Perizzites were not exterminated. Not only were they suffered to live in Palestine, but they even intermarried with the Israelites (Judg. iii. 5, 6); and this violation of the divine command was one of the charges brought by Ezra against the people (ix. 1). Solomon put them and other ancient tribes to tribute (1 Kings ix. 20).

Of the origin of the Perizzites nothing is known. They were not Canaanites, for they are not included among the Canaanitish tribes in Gen. x. An attempt has been made by philologists to prove that

they were not a distinct race, but only a class of the inhabitants to whom the name was given because of the peculiarity of their occupations. It is said that 'the etymology of the word Perizzite proves that they were the inhabitants of open towns and villages' (פְּרִיזִי); it is clearly explained by Ezekiel (xxxviii. 11) to denote the population of places 'without walls, and bars, and gates;' and it is, in the book of Esther (ix. 19), used for the unfenced cities, in contradistinction to the metropolis (ver. 18). The two names of the Canaanites and Perizzites, if so coupled, designate, therefore, both the inhabitants of the walled towns and of the open country' (Kalisch on Gen. xiii.; see also Gesenius, *Thes.* p. 1120; Hengstenberg, *Beiträge zur Einleitung*, iii., p. 186; Keil on *Joshua* iii. 10). This view, though supported by so many able scholars, appears to be plainly opposed to the Biblical narrative. The Perizzites are there spoken of in the very same terms in which the other tribes are spoken of. Their habits are nowhere specified; and the word Perizzite is manifestly as much a proper name as Hittite, Canaanite, or Hivite; and we have reason to believe that from whatsoever quarter they came they were among the very earliest inhabitants of Palestine (Reland, *Pal.* 139; Redslob, *Alt-Test. Namen der Bevölker. Pal.*, p. 103; Kurtz in Rudelbach's *Zeitschr.* 1845).—J. L. P.

PERSEPOLIS (Περσέπολις; *Persepolis*). This city is only mentioned once, and in 2 Maccab. ix. 2, where it is said that Antiochus Epiphanes 'entered [a city] called Persepolis, and went about to rob the temple and to hold the city;' but the inhabitants defending themselves, Antiochus was ignominiously put to flight. Persepolis was the capital of Persia at the time of the invasion of Alexander the Great, who, as is well known, wantonly burnt it, as has been supposed at the suggestion of the courtesan Thais, to revenge the taking of Athens by Xerxes, but this story probably rests on the sole authority of Cleitarchus (Cleitarch. *ap. Athen.*, xiii. p. 576 e; Diod. Sic., xvii. 71. 2, 3; 72. 6; Plut. in *Alex.*, 38; Quint. Curt., v. 7. 3). According to some authors, the whole city, as well as the magnificent palace, suffered in the general conflagration (Diod. Sic., *l.c.*; Arrian, iii. 18. 11; Pliny, *N. H.*, vi. 26); but according to others it was only the palace (τὸ βασιλεῖον) that was destroyed (Strabo, xv. p. 730; Plut. in *Alex.*, 38). Quintus Curtius (v. 7. 5) mentions that the palace was built with a great quantity of cedar, which increased the ardour of the flames. It is probable that the temples, which were of stone, escaped. That it could have been entirely destroyed seems hardly credible, for not only was it existing in the time of Antigonus, king of Asia (B.C. 306), who visited the palace himself (Diod. Sic., xix. 46. 6), but at the same period Peucestas and Eumenes, formerly generals of Alexander, and now antagonists of Antigonus, both visited Persepolis, and the latter moved his camp there and held it as the seat of government (προῖον τῆς Περσίδος εἰς Περσέπολιν τὸ βασιλεῖον, Diod. Sic., xix. 21. 2; 22. 1). From this it would appear as if the city itself was called τὸ βασιλεῖον. Moreover, at the time of Antiochus Epiphanes, as recorded above (2 Maccab. ix. 2), it seemed to have still been a repository of treasure; and Ptolemy (Geog., vi. 44; viii. 5. 13) mentions it as existing in his time. The extensive ruins now remaining would

prove that it must either have been rebuilt or not totally destroyed by Alexander.

Persepolis has been considered by many as identical with Pasargadæ (Niebuhr, *Lect. on Ant. Hist.*, i. 115; Ouseley, *Travels*, ii. 6, 18), and in one passage of an ancient author there is some obscurity (Arrian, iii. 18. 11), but the two cities are afterwards distinguished (vii. 1. 1). All other ancient authors, however, carefully distinguish the position of the two cities (Strabo, xv. p. 729; Plin., vi. 26; Ptol., vi. 4), and it is now ascertained that the ruins of these two cities are more than 40 miles apart. Persepolis was situated near the plains of *Merdusht*, near the junction of two streams, the Araxes (*Bendamtr*) and the Medus (*Pulwan*), whilst Pasargadæ was about 49 miles from Persepolis on the plain of *Murghab*, where even now exist the ruins of the tomb of Cyrus (Arrian, vi. 29). The ruins of Persepolis, which are very extensive, bear the name of *Chd Minar* or Forty Pillars, the remains of the palaces built by Dareius, son of Hystaspes, and his son Xerxes. Great light has been thrown upon these ruins by the interpretation of the cuneiform writing, commenced by Grotefend, and they have been so frequently described, and are of such extent, that it will be sufficient to refer to the various writers who have described them. (Le Bruyn, *Voy. au Levant*, iv. p. 301; Chardin, ii. p. 140; Niebuhr, *Reise nach Arabien*, etc., ii. p. 121; Sir R. K. Porter, *Travels*, i. 576; Heeren, *Asiatic Nations*, i. 91; Fergusson, *Palaces of Nineveh and Persepolis Restored*, p. 89; Vaux, *Nineveh and Persepolis*, p. 360; Ussher, *A Journey from London to Persepolis*, p. 532, etc.) Persepolis is about four miles from Istakhr, the earliest occurrence of which name appears on a coin of the Mohammedan conquerors of Persia, struck at this place A.H. 94 = A.D. 712; and as, according to Mr. Fergusson, 'Pasargadæ had been the royal residence of the Achæmenidæ [*βασιλειον ἀρχαίων*, Strabo, xv. 3. 7], so Persepolis became the new town when Dareius removed to Istakhr—the latter having been, in all ages subsequent, *the city par excellence*' (Fergusson, p. 92; Vaux, *Nin. and Pers.*, pp. 397, 401).

It is curious that, whilst Herodotus and other ancient writers mention Susa, Babylon, and Ecbatana, no contemporary author mentions Persepolis; and moreover they 'mark the portions of the year which the Persian monarchs used to spend at their several residences in such a manner as to leave no portion of the year vacant for Persepolis' (Heeren, *As. Nations*, i. p. 92). Athenæus (*Deipnosoph.*, xii. p. 513, F), however, says that the Persian kings resided at Persepolis during the autumn of each year; but statements of other writers (Xen., *Cyrop.*, viii. 6. 22; Plut., *de Exil.*, xii. 10) leave this uncertain. Notwithstanding, it cannot be doubted that it was a royal residence, and as Strabo (xv. p. 729) states, after Susa, the richest city of the Persians.

It is, however, to be observed that the expedition of Antiochus Epiphanes to Persia is very differently related in 1 Maccab. vi. 1, 2. It is there stated that Antiochus, 'having heard say that Elymais, in the country of Persia, was a city (*ὅτι ἐστὶν Ἐλυμαῖς ἐν τῇ Περσίδι πόλις*; *ὅτι ἐστὶν ἐν Ἐλυμαῖς ἐν τῇ Περσίδι πόλις*, *Cod. Alex.*) greatly renowned for riches, silver, and gold, and that there was in it a very rich temple, wherein were coverings of gold, and breastplates, and shields, which Alexander, son of Philip, the Macedonian

king, who reigned first among the Grecians, had left there, came and sought to take the city and to spoil it,' but was defeated in the attempt.

This account is strictly followed by Josephus (*Antiq.* xii. 9. 1), who adds that it was the temple of Diana against which the expedition was made—a fact also recorded by Polybius (xxxi. 11), but by Appian (*Syr.*, 66) stated to have been the temple of Venus.

These statements receive some confirmation from the temple of the goddess 'Nanea' being mentioned as visited by Antiochus (2 Maccab. i. 13-15). Nanea has been identified with both Artemis and Aphrodite, and is evidently the 'Avairis of Strabo (xv. p. 532), the *numen patrimonium* of the Persians, Medes, and Armenians. (For an account of this deity, see Norris, in *Roy. As. Soc.*, xv. p. 161; Rawlinson, *Herod.*, vol. i. p. 634.) [NANEA.] It is quite evident that there is an error in the Maccabees and in Josephus, in both of which Elymais is called 'a city,' for all historians and geographers call it a province (Smith's *Dict. of Biog.*, s.v. *Elymais*) [ELAM], and it is even so particularised in the *Cod. Alex.*; and Strabo especially (xvi. p. 744), who mentions three temples—to Belus, Minerva, and Diana, called Azara—does not place them in the city of Elymais, but at different places in the country of the Elymæans. It was the temple of Belus that was attacked by Antiochus the Great in B.C. 187, when he was killed by the people, who rose in its defence (Strab., l. c. xvi. 1, 18; Diod. Sic., xxix. 15; cf. xxviii. 3; Justin, xxxii. ch. 2), against the opinion of Aurelius Victor (*De Viris Illust.*, 54), who says he was slain by his attendants during the carousals.

Taking the following facts into consideration :—  
1. That Persepolis, according to the account of most historians, was utterly destroyed, and all the treasures carried away; 2. that the expedition of Antiochus Epiphanes thereto is only recorded in the 2d Maccab.; 3. that Antiochus' father had already made an attack on the temple of Elymais, which was perhaps an inducement for the son to do the same; 4. that the expedition to Elymais and to its temple—the deity of which is named—is not only mentioned in the 1st and 2d Maccab., but is also recorded by Polybius and Appian, it seems more probable that it was against an *Elymæan* temple that Antiochus Epiphanes directed his attack, an opinion that has been already advanced by Grimm (*Kurzgef. Exeg. Handb. zu den Apok.*)—F. W. M.

PERSEUS (Περσεύς), the last king of Macedon, and successor of Philip V., whose son he was reputed to be, but whether legitimate, illegitimate, or supposititious, is uncertain. Involved in war with Rome he was utterly defeated (B.C. 168) by L. Aemilius Paulus, and carried by him captive to Rome, where he was compelled to grace the victor's triumph. After a short imprisonment he was allowed to retire to Alba, where he spent the rest of his life in an honourable captivity. He died B.C. 169 or 172. His name sometimes is written Perses (Madvig, *Lat. Gr.*, sec. 38, 3). His defeat by the Romans tended to impress upon the Jews a sense of their military power (1 Maccab. viii. 5).—W. L. A.

PERSIA (פָּרְס; Sept. Περσίς), properly the designation of the province of Fars or Farsistân, a

district bounded on the north by Media and Mount Aprassia, the Parachoathras of the ancients; on the south by Laristan and the Persian Gulf, on the west by Susiana, and on the east by Caramania. The name, however, is more frequently used both in Scripture and in the classics to denote the extensive empire of the Persians, which at one time stretched from India to Thrace and Egypt, and included parts of Europe, Asia, and Africa. In this sense it occurs 2 Chron. xxxvi. 20, 22; Ezra iv. 5, 7, 24; vi. 14; Esther i. 3, 14, 18; Dan. x. 13, 20; xi. 2. [PERSIANS.] In the more limited sense it is found Dan. viii. 20, and perhaps also Ezek. xxvii. 10 and xxxviii. 5, though the combination there of Persia with Lud and Libya renders it probable that it is to an African settlement of the Persians rather than to those who remained in their primitive seat that reference is made. Sallust (*Jug. xviii.*) speaks of Persian immigrants into Egypt, and these Pliny (*Nat. Hist. v. 8*) identifies with the Pathrusi.

The province of Persia proper is very mountainous; there are few plains in it of any extent, but many of the valleys are picturesque and fertile. Its principal cities were Pasargada, its earliest capital, Persepolis [PERSEPOLIS], Gabae, Taoce, and Aspadana.

Of the name two etymologies have been proposed; some tracing it to *Pārs*, which in the Zend signifies *clear, bright, pure as ether*; others to *Paras*, a horse. But these are mere conjectures, and are not satisfactory.—W. L. A.

PERSIANS, the name of a people and nation which occurs only in the later periods of the Biblical history, and then for the most part in conjunction with the Medes [MEDES]—a conjunction which tends to confirm the truth of the sacred records, since the most respectable historical authorities have found reason to conclude that the Medes and Persians were in truth but one nation, only that at an earlier period the Medes, at a later period the Persians, gained the upper hand and bore sway. This ascendancy, in the case of the Persians, as generally in the ancient Asiatic governments, was owing to the corrupting and enervating influence of supreme and despotic power on the one side, and on the other to the retention on the part of the mountaineers, or of tribes seated remotely from the centre of the empire, of primitive simplicity,—in laborious lives, hard fare, and constant exposure, which create patient endurance, athletic strength, manly courage, independence: qualities which in their turn refuse or throw off a yoke, and convert a subject into a conquering and ruling nation. At what precise time this great change was brought about in regard to the Medes and Persians, we are not in a condition to determine historically. With Cyrus the elder, however, begins (B.C. 558) the domination of the Persian dynasty which held rule over Media as well as Persia. Whether Cyrus came to the throne by inheritance, as the son-in-law of Cambyses II., according to Xenophon, or whether he won the throne by vanquishing Astyages, the last Median king, agreeably to the statements of Herodotus, is one of those many points connected with early eastern history which, for want of documents, and in the midst of historical discrepancies, must remain probably for ever uncertain. Meanwhile the existence of Cyrus and the great tenor of his influence remain the same, though

on this and on other points historians give irreconcilable statements—a remark which we make the rather because a certain school of modern theology has attempted to destroy the general historical credibility of the Gospels, on the ground that the several narrators are found to disagree.

The most interesting event to the reader of the Bible in the history of Cyrus, is the permission which he gave (B.C. 536) to the captive Jews to return to their native land. After a prosperous reign of the unusual length, in Asiatic monarchies, of thirty years, Cyrus died (B.C. 529). He was succeeded by Cambyses (B.C. 529), who, according to Herodotus, reigned seven years and five months. He is probably the Ahasuerus of Ezra iv. 6. Then came (B.C. 522) Smerdis, nominally brother of Cambyses, but in reality a Magian named Gomates; and as the Magi were of Median blood, this circumstance shows that, though the Medes had lost the sovereignty, they were not without great power. Smerdis being assassinated (B.C. 521), Darius Hystaspis was elected king. He favoured the Jews, and permitted them to resume and complete the building of their temple, which had been broken off by reason of jealousy on the part of the heterogeneous populations of Samaria (Ezra iv. 2; 2 Kings xvii. 24), and the influence which they exerted at the Persian court (Ezra iv. 11). The last monarch had for successor Xerxes (B.C. 485), who is probably the Ahasuerus of Esther and Mordecai. After a reign of twenty years, Xerxes was murdered by Artabanus, who, however, enjoyed his booty only for the short period of seven months. The next in order was Artaxerxes (I.) Longimanus (B.C. 465), who enjoyed his power for the surprisingly long period of forty years, and then quietly handed the sceptre over to his son Xerxes II. (B.C. 424), who reigned but two months. He was followed by his step-brother Sogdianus (B.C. 424), whose rule came to an end in seven months; thus making way for Darius Nothus, whose reign lasted nineteen years. Artaxerxes (II.) Mnemon next took the throne (B.C. 404), and is reported to have reigned forty or forty-three years (Diod. Sicul. xiii. 108; xv. 93). His successor was Artaxerxes Ochus (B.C. 364), who occupied the throne for twenty-six years. Then came Arses (B.C. 338), reigning three years. At last Darius Codomannus (B.C. 335) ascended the throne. But the valour, hardihood, and discipline which had gained the dominion, and which, as the length of several reigns in the succession shows, had sustained it with a firm and effectual hand, were almost at an end, having been succeeded by the effeminacy, the luxuriousness, and the vices which had caused the dissolution of earlier Asiatic dynasties, and among them that of the Medes, which the Persians had set aside. When this relaxation of morals has once taken place, a dynasty or a nation only waits for a conqueror. In this case one soon appeared in the person of Alexander, misnamed the Great, who assailing Darius on several occasions, finally overcame him at Arbela (B.C. 330), and so put a period to the Persian monarchy after it had existed for 219 years. On this the country shared the fate that befell the other parts of the world which the Macedonian madman had overrun; but, more fortunate than that of other eastern nations, the name of Persia and of Persians has been preserved even to the present day, as the representative of a people and a government.

The events which transpired during this succession of Persian kings, so far as they are connected with the Biblical history, may be thus briefly narrated:—Cyrus, having conquered Babylon, permitted the Jews to quit their captivity and return into Palestine, affording them aid for the reconstruction of their national house of worship. Under Cambyses, who invaded Egypt and became master of the land, adversaries of the Jews tried to render them objects of suspicion at the court; which intrigues, however, had full effect only in the reign of his successor, Smerdis, who issued a decree expressly commanding the building of the temple to cease (Ezra iv. 21); in which prohibition Smerdis, as he was of the Magian tribe, and therefore of the priestly caste, may have been influenced by religious considerations. A milder and more liberal policy ensued. Darius, having by search in the national records ascertained what Cyrus had done towards the Jews, took off the prohibition, and promoted the rebuilding of the temple. Darius Hystaspis was distinguished for great enterprises as well as liberal ideas. He carried the renown of the Persian arms to India, Libya, and Europe, and began the Persian attempt to subjugate Greece. What Xerxes undertook, and what success he had in his warlike undertakings against Greece, is known to all. His conduct towards the Jews, as well as his own despotism and luxuriousness, are exhibited in the book of Esther with great force as well as truth. Artaxerxes Longimanus led an army into Egypt, which had rebelled against its Persian masters. He was compelled to make peace with the Greeks. Palestine must have suffered much by the passage of troops through its borders on their way from Persia to Egypt; the new colony at Jerusalem began to sink, when the monarch permitted Nehemiah to proceed with full powers to the Jewish capital, in order to strengthen the hands of his brethren. Darius Nothus had to fight on all sides of his kingdom, and made Phœnicia the scene of a war against the combined forces of Egypt and Arabia. Even Artaxerxes Mnemon, though long busied with his arms in other parts, did not lose sight of Egypt, which had thrown off his yoke, and sent new Persian armies into the vicinity of Palestine. In consequence, the Jews had much to endure from the insolence of a Persian general, namely, Bagoses, who polluted the temple, and ‘punished the Jews seven years’ (Joseph. *Antiq.* xi. 7. 1). Ochus followed the plan of his father, subdued the revolted Phœnicians, and again fell

430. [Ancient Persian king on throne.]

upon Egypt. The remaining period of the Persian dominion over the Jews passed away peaceably (Winer, *Real-Wört.*; Joseph. *Antiq.*, lib. xi.; Jahn, *Archäol.* ii. 1, 231-312; Schlosser, *Alten Welt*, i. 242, seq.; J. G. Eichhorn, *Geschichte Der Alt. Welt*, i. 80, seq.)

The Biblical books, Daniel, Esther, Nehemiah, and Ezra, combine to present a true as well as high idea of the Persian court and government. We will give a few particulars from Esther, a book of deep and vivid interest, not only in its story, but also, and by no means less, in the indirect history (as it may be termed) which it contains regarding the (perhaps) most splendid dominion that ever existed upon earth. The extent of the government was from India to Ethiopia, including 127 provinces. The empire was under the control of vassal princes and nobles, ‘the power of Persia and Media,’ under whom were governors of various ranks, and officers for every species of duty. It was specially the duty of seven ministers of state (‘chamberlains’) to serve in the immediate presence of the monarch. Other officers, however high in rank, were admitted to the royal person only through the barriers of a strictly-observed ceremonial. Even the prime minister himself, and the favoured concubine, who was honoured with the title of queen, durst come no nearer than the outer court, unless, on making their appearance, the king extended towards them his sceptre of gold. The gorgeousness of the court dazzles the mind, and surpasses imagination. When the king sat upon his throne, his chief vizier and his beloved queen on either side, with rows of princes and nobles, like lessening stars, running in a line of fire-points from the monarch, the sun in whose light they shone, and in whose warm smile they were happy, feasting a hundred and fourscore days with his great men, in a hall and a palace of which the praise is too little to say they were not unworthy the grandeur of the monarch on an occasion when ‘he shewed the riches of his glorious kingdom, and the honour of his excellent majesty;’—or when the stately autocrat, relaxing in a measure the rigour of his greatness, and descending from his god-like throne to a nearer level with ordinary mortals, ‘made a feast unto the people, both unto great and small, seven days in the court of the garden of the palace,’ where were white, green, and blue pavilions, fastened with cords of fine linen and purple to silver rings and pillars of marble; couches, gold and silver, upon a tessellated pavement of red and blue, white and black marble; and drink was served all around in golden vessels of curious fabric and divers shapes; and wine in abundance, whose worth had gained for it the name of Royal, of which each person by express ordinance drank what he pleased;—or when, at the end of these seven days of popular enjoyment, the king feasted with Vashti, the queen, at a banquet for the women in her own palace, when the monarch commanded his seven high officers of state to bring Vashti, the queen, before the king with the crown royal, to show the people and the princes her beauty, for she was fair to look on;—or, finally, when a favourite servant, being clothed in the royal apparel, and set upon the horse that the king rode upon, with the crown royal upon his head, was conducted by the hand of one of the king’s most noble princes through the highways of the glittering city, while heralds proclaimed before the resplendent retinue, ‘Thus shall it be done to the man whom the king delighteth to honour;’—then blazed forth the glory of the Persian greatness, in pomp and splendour correspondent with the brilliancy of the heavens and the luxuriance of the earth under which and on which these luminaries shone. Nor, in the midst of all this outward pomp, were there wanting internal regulations fitted to sustain and give effect

to the will of the monarch and his council. A body of law was in existence, to which additions were constantly made by omnipotent decrees issued by the king. These rescripts were made out by officials, a body of men who are designated royal scribes or secretaries; and being drawn up in the prescribed form, were copied and translated for every people after their language.' Being then 'sealed with the king's ring,' the letters were sent 'by post,' 'on horseback and on mules, camels and young dromedaries,' to the king's lieutenants, and to the governors over every province, and to the rulers of every people of every one of the 127 provinces. History, as well as law, received diligent and systematic attention. 'A book of records of the chronicles' was kept, in which the events of each reign were entered, probably under the supervision of the learned caste, the Magi. This book the monarch used to consult on occasions of importance and perplexity, partly for instruction, partly for guidance; so that the present was modelled after the past, and the legislation and the conduct of the king formed one entire and, to some extent, consistent whole. Whence it appears that though the monarch was despotic, he was not strictly arbitrary. Aided by a council, controlled by a priesthood, guided by the past as well as influenced by the present, the king, much as he may have been given up to his personal pleasures, must yet have had a difficult office to fill, and heavy duties to discharge. Rulers are generally insecure in proportion to the degree of their despotism; and so we find, from the plot against the life of Ahasuerus (Xerxes, B.C. 485-465), which Mordecai discovered and made known, that even the recesses of a palace did not protect the kings of Persia from the attempts of the assassin. In the punishment, however, which fell upon the wicked Haman, we see the summary means which the Persian monarchs employed for avenging or defending themselves, as well as the unshared and unqualified power which they held over the life of their subjects even in the highest grades. Indeed it is not possible to read the book of Esther without fancying more than once that you are in the midst of the court of the Grand Signior. Not least among the causes of this illusion is what is narrated in regard to the harem of Xerxes. The women, it seems, had a palace of their own, and dwelt there apart from the king, who paid them visits of ceremony. This their abode, and they themselves, were under the care of a royal chamberlain, whose power in the harem was supreme, and who had abundance of resources for increasing the state and promoting the comfort of those who pleased him; nor may he have been without an influence in determining the king in his choice of his favourite mistress. To supply the harem, officers were appointed in the several provinces, whose duty it was to find out and procure for the monarch the fairest maidens in the world. Each of these, after she had been in the women's house a twelvemonth, and had gone through a certain course of preparation, visited the king for one night in turn; but she came in unto the king no more except the king delighted in her, and that she were called by name, in which case she became queen. 'And the king loved Esther above all the women, and she obtained grace and favour in his sight more than all the virgins; so that he set the royal crown upon her head, and made her queen instead of Vashti.'

The greatness of the power of the chief viziers of the Persian monarchy is illustrated in the recorded acts of Haman and Mordecai. The mode of delegating power was by presenting to the entrusted person the royal signet, which appears to have licensed him to do what he would, by such means as he pleased.

431. Ancient Persian Guards.

The great influence which Esther and Mordecai possessed with Xerxes is attributable to the noble qualities, both of mind and body, for which the Hebrew race were, and still are, conspicuous. These qualities won the heart and gained the favour of the king, and thereby proved instrumental in saving the Jews scattered throughout the empire from the bloody slaughter which Haman had designed should take place everywhere on the same day. Nor is it improbable that to influences connected with the same high qualities the decree may have been owing by which Cyrus set the people of the captivity free, that they might return home and build again the walls of Jerusalem. Cyrus, it is true, may have had some regard to justice; he may have thought it prudent to send away from his country at least the best of these highly-endowed men; he may not have been unwilling to see Jerusalem rise again into power, and prove a friendly barrier against Egypt; but the munificent manner in which the Jews were dismissed seems to betoken the agency of some personal influence, if not of some personal affection. Nehemiah (xiii. 6; comp. ii. 1, *seq.*) speaks expressly of a favour which he obtained of Artaxerxes (Longimanus, B.C. 465), or Xerxes II. (B.C. 424), after an interval of several days. By no means inconsistent with this personal favour, nor improbable in themselves, are the religious considerations by which the scriptural writers represent Cyrus as being actuated in setting the Jews at liberty. The religion of the Persians was in its essential and primitive form monotheistic, and must therefore have been anything but alien, in spirit at least, to that of the Hebrews. Nor is there anything extravagant in assuming that so great a prince as Cyrus, who could scarcely have yielded to the luxurious effeminacy in which his successors indulged, and whose mind must have been elevated as well as powerful, understood in a measure, and highly appreciated, the excellences of the Mosaic religion; while the same general feeling which directed the storm of the Persians against the polytheistic temples of Greece, may have prompted an earlier and better sovereign to liberate the Jews, and bring about the restoration of the monotheistic worship on Mount Zion. Certainly the terms are distinct and emphatic in which Cyrus is made to speak in our sacred books; nor

do we see any reason to suppose that a Jewish colouring has been given to these passages, or to question that we have in them a faithful translation of the original state documents (Ezra i. 1-4; i. 7-11; vii. 23; viii. 22). The two last passages here referred to would seem to justify the inference that the favour of the Persian government was owing not merely to general religious influences, but also to specific instances of good and ill connected with the will of the Almighty; probably national reverses, more or less directly and believingly ascribed to God, may have been in operation to aid the restoration of the temple worship.

A general impression prevails that, to use the words of Winer (*Real-Wörterb.* s. v. 'Persien'), 'no edict published bearing the king's signature could be revoked,' so that the 'laws of the Medes and Persians' altered not in the sense of being diminished or reformed. Winer refers, as an authority, to Esther i. 19; yet this book contains a striking fact which proves the contrary; for the decree which Haman had got promulgated for the destruction of the Jews was superseded by another procured by the influence of Esther and Mordecai, and this other of so decided a character as to give the Jews in all the provinces of the empire the power of assaulting and slaying their enemies. In truth, the words 'that it be not altered' seem, at least in the period to which the Biblical records refer, to signify little more than the general stability of the law, and the certainty of its penalties.

The extraordinary power entrusted to the Jews serves to show that the social constitution of the Persian empire was open to the greatest abuses. What could be worse than for the government itself to let loose on society a scattered horde of people, trembling for their lives, yet united in the strong bonds of religious fellowship? They would want no encouragement, if only relieved of the penalties commanded by the decree of Haman, to do all they could privately 'to be ready to avenge themselves on their enemies' (Esther viii. 13); but when couriers came riding post into all parts where they were, bearing the royal behests to the effect that, on the very day on which they themselves expected unsparing slaughter, they were allowed not only 'to stand for their life,' but 'to destroy, to slay, and to cause to perish all the power of the people and province that would assault them, both little ones and women, and to take the spoil of them for a prey' (Esther viii. 11), then, we may well believe, a dreadful vengeance would be taken, and frightful disorder caused, the possibility of which, in any social condition, is a proof that the first principles of justice are not understood; and the actual existence of which shows that, whenever occasion required, they were recklessly set at naught.

On the *religion* of the ancient Persians we refer to the articles *MAGI* and *MEDES*. [See also Hyde, *De Rel. Vet. Persarum*; Windischmann, *Zoroastriische Studien*, 1839; Bleek, *The Religious Books of the Parsees Translated*, 1864.]

The Persian language was diverse from the Shemitic, and connected with the Indo-Germanic tongues, of which the Sanscrit may be considered as the eldest branch. [Its oldest form appears in the Zendavesta, though not without corruptions from later sources; in the inscriptions of the Achaemenian kings we have it in its second stage, and happily without later admixture; and the Per-

sian gives it in a third stage. The modern Persian is its degenerate representative, being much corrupted by infusions from the Arabic. M. Müller, *Science of Language*, 1st ser. p. 192, ff.] (Adelung, *Mithridat.*, i. 255, seq.; O. Frank, *De Persidis Lingua et Genio*, Norimb. 1809; Wahl., *Gesch. d. Morgenländ Sprache v. Literatur*, p. 129, seq.)

The great Persian kingdom founded by Cyrus, in the period of its highest glory comprised all Asiatic countries from the Mediterranean to the Indus, from the Black and Caspian Sea to Arabia and the Indian Ocean. This vast empire was divided into many provinces or satrapies, one of which was Persia (properly so called) or Persis (Farsistan), which on the north was separated from Media by the range of mountains denominated Parthrates, on the west bordered on Susiana (Khusistan), on the south reached to the Persian Gulf, and on the east was bordered by Carmania (Kirman). The country that lies along the sea is a sandy plain, which the heat and poisonous winds render unfit for human abodes (Plin., *Hist. Nat.*, xii. 20). The interior is crossed by rocky mountains, whose summits are covered with snow the greater part of the year. This mountain-chain renders the north of the country rough and unfruitful, so that herdsmen and nomads alone dwell there. In the intermediate parts, however, are found many well-watered valleys and plains, which yield to few in fruitfulness and mildness of climate (Strabo, xv. p. 727; Ptolem., vi. 4; Mannert, *Geog.*, ii. 497). The inhabitants of this province of Persis were connected by blood with the Medes, and were divided into many tribes and clans (Herod., i. 125), three of which were noble—the Pasargadae, the Maraphii, and the Maspii. The Pasargadae held the pre-eminence; of which tribe was Cyrus, a circumstance to which he in part owed his power and influence.

The residences of the monarchs of the immense country denominated Persia were various. Pasargada, with its royal tombs, was most ancient. Persepolis rose not very far from it, and became a treasure-city. After the overthrow of the Babylonian kingdom, Cyrus, while preserving a regard for the more ancient cities of the empire, seems to have thought Babylon a more suitable place for the metropolis of Asia; but as it might not be politic, if it were possible, to make a strange place the centre of his kingdom, he founded a new city, Susa, where he was still on Persian ground, and yet not far distant from Babylon. There was also Ecbatana, the Median capital. These several royal abodes seem to have been occupied by the later monarchs, according as the season of the year called for a colder, warmer, or milder climate.

We have before seen that the Persian monarchy had its chronicles. These may have been consulted by our classical authorities, but are wholly lost to us. We are therefore thrown on two foreign sources of information regarding the Persian history: 1. The Jewish, to be elicited chiefly from the books of Ezra, Nehemiah, and Esther, of which something has been said. 2. Grecian writers. Of these, Ctesias availed himself of the Persian annals, but we have only extracts from his work in Photius. Herodotus appears also to have consulted the native sources of Persian history. Xenophon presents us with the fullest materials, namely, in his *Anabasis*, his *Hellenica*, and especially in his *Cyropædia*, which is an imaginary pic-

ture of a perfect prince, according to Oriental conceptions, drawn in the person of Cyrus the elder. Some of the points in which the classical authorities disagree may be found set forth in Eichhorn's *Gesch. der A. Welt.*, i. 82, 83. A representation of the Persian history, according to Oriental authorities, may be found in the *Hallische Allgemeine Weltgeschichte*, th. iv. A very diligent compilation is that of Brissonius, *De Regno Persarum*, 1591. Consult especially Heeren's *Ideen*, i. 1; and his *Handbuch der G. d. S. Allerth.*, i. 102. A full and valuable list of the older authorities in Persian affairs may be seen in the *Bibliotheca Historica* of Meusellius, vol. i., pt. ii., p. 28, seq. [See also Malcolm, *Hist. of Persia from the Earliest Ages*, 2 vols. 4to, 1816; Rawlinson's *Herodotus*, ii.; *Journal of the Asiatic Soc.*, vols. x. and xi.]—J. R. B.

**PESTILENCE.** The terms pestilence and plague are used with much laxity in our A. V. The latter, however, which generally represents the Hebrew מִדְּבָרָא, is by far the wider term, as we read of 'plagues of leprosy,' 'of hail,' and of many other visitations. Pestilence is employed to denote a deadly epidemic, and is the word by which דִּבְרָא (Sept. *θάνατος*, and occasionally *λοιμός*) is translated. In our time, however, both these terms are nearly synonymous; but *plague* is, by medical writers at least, restricted to mean the glandular plague of the East. There is indeed no description of any pestilence in the Bible, which would enable us to form an adequate idea of its specific character. Severe epidemics are the common accompaniments of dense crowding in cities, and of famine; and we accordingly often find them mentioned in connection (Lev. xxvi. 25; Jer. xiv. 12; xxix. 18; Matt. xxiv. 7; Luke xxi. 11). But there is no better argument for believing that 'pestilence' in these instances means the glandular plague, than the fact of its being at present a prevalent epidemic of the East. It is also remarkable that the Mosaic law, which contains such strict rules for the seclusion of lepers, should have allowed a disease to pass unnoticed, which is above all others the most deadly, and, at the same time, the most easily checked by sanitary regulations of the same kind.\* The destruction of Sennacherib's army (2 Kings xix. 35) has also been ascribed to the plague. But—not to insist on the circumstance that this awfully sudden annihilation of 185,000 men is not ascribed to any disease, but to the agency of an angel (since such passages as 2 Sam. xxiv. 15, 16, weaken this objection; and even Josephus understood the cause to be a pestilence, *Antiq.* x. 1. 5)—it is impossible that such a mortality could have been produced, in one night, by a disease which spread itself by contagion, like the Oriental plague; and the same remark applies, though in a less degree, to the three days' pesti-

lence in the reign of David (2 Sam. xxiv. 13). Those who entertain the common opinion about the means by which the destruction of Sennacherib's army was effected, regard the illness of Hezekiah (2 Kings xx. 1-11) as connected, both as to time and cause, with that event; and consider his 'boil' especially to afford direct evidence that he suffered from the plague. The boil would have certainly been a most characteristic symptom, if we had the least indication that his disease was pestilential; but we have no evidence whatever that any epidemic prevailed at that time at Jerusalem.

The glandular plague, like the small-pox, is an eruptive fever, and is the most virulent and most contagious disease with which we are acquainted. The eruption consists of buboes, carbuncles, and petechiæ. Buboes are inflamed and swollen glands; and the glands so affected are generally those of the groin, axilla, neck, and the parotid glands. More frequently there are two, three, or even four, such tumours. They sometimes subside of themselves; or, what is more commonly the case, they suppurate: and as this process seldom commences before the disease has taken a favourable turn, it is regarded as the cause, but more correctly as a sign, of approaching recovery. A carbuncle is an inflammation of the skin, giving rise to a hard tumour, with pustules or vesicles upon it. It resembles a common boil, but differs from it in this important respect. The carbuncle becomes gangrenous throughout its whole extent, so that when the eschar separates a large deep ulcer is left. Under the term petechiæ are included evanescent spots and streaks of various hues, from a pale blue to a deep purple, which give a marbled appearance to the skin. When such livid streaks occur in the face, they disfigure the countenance so much that a patient can hardly be recognised by his friends. The disease varies so considerably in its symptoms and course, that it is impossible to give one description that will suit even the majority of cases. Sometimes the eruption does not appear at all, and even the general symptoms are not of that violence to lead an ignorant person to suspect the least danger. The patient is suddenly attacked with a loss of strength, a sense of confusion, weight in the head, oppression at the heart, and extreme dejection of spirits. Such cases sometimes terminate fatally within twenty-four hours, and occasionally on the second or third day. Generally, however, the patient is attacked with shivering or coldness, which is soon followed by fever, giddiness, pain in the head, occasionally also by vomiting. Buboes and carbuncles in most cases make their appearance on the first day; and successive eruptions of them are not unusually observed during the course of the disease. There is a peculiar and characteristic muddiness of the eye, which has been described by Dr. Russell as a muddiness and lustre strangely blended together. The fever remits every morning, and increases during the day and night. The vomiting then increases; the tumours become painful; and the patient wanders, and is inclined to stupor. On the morning of the third day, in favourable cases, a sweat breaks out, which produces great relief, and sometimes even proves critical. The exacerbation on the fourth day is more severe than on the preceding ones, and continues intense until it is terminated by the sweat on the morning of the fifth day, which

\* Michaelis endeavours to explain why the Law contained no ordinances about the plague, by arguing that, on account of the sudden appearance and brief duration of the disease, no permanent enactments could have been efficient in moderating its ravages, but only such preventive measures as varied according to the ever-varying circumstances of the origin and course of its visitations (*Mos. Recht.* iv. 290).

leaves the patient weak, but in every respect relieved. After this, the exacerbations become slighter and slighter; and the buboes advancing favourably to suppuration, little or no fever remains after the beginning of the second week. In other cases, again, the symptoms are far more urgent. Besides vomiting, giddiness, and headache, there is also diarrhoea at the outbreak of the fever. During the night the patient becomes delirious or comatose. The pulse is full and strong; and though the tongue is not dry, the thirst is excessive. The fever abates somewhat on the succeeding morning, but the pulse is frequent, the skin hot and dry, and the patient dejected. As the second day advances, the vomiting and diarrhoea become urgent, the eyes are muddy, expression of countenance confused, the pulse quick, and sometimes low and fluttering, external heat moderately feverish, or occasionally intense in irregular flushings. There is pain at the heart, burning pain at the pit of the stomach, and incessant restlessness. When to these symptoms are joined faltering of the tongue, or loss of speech, and the surface of the body becomes cold or covered with clammy sweats, death is inevitable, although it may still be at some distance. When the patient has been much weakened by the vomiting, diarrhoea, or hæmorrhage, the third day proves fatal; but more commonly the disease is prolonged two or three days longer. In this form of plague, buboes appear on the second or third day, and sometimes later; but whether they advance towards suppuration or not, they seem to have no effect in hastening or retarding the termination of the disease. Lastly, in some cases, the eruption of buboes and carbuncles constitutes the principal symptom of the disease; and patients are so little indisposed, that they are able to go about the streets, or attend to their usual avocations, if not prevented by the inflammation of inguinal tumours.

Respecting the causes and origin of plague nothing is known. There cannot be the slightest doubt that it is propagated by absolute contact with, or a very near approach to, the bodies or clothes of persons infected; but we are entirely at a loss to know how it is generated afresh. Extremes of temperature have a decided effect in putting a stop to it; but Dr. Russell observed that, in the year 1761, the plague at Aleppo was mild, in 1762 it was severer, and in 1763 it was very fatal; and yet there was no appreciable difference in the respective seasons of these years. In Egypt, the plague commences in autumn, and is regularly put an end to by the heats of summer; and it is even asserted that contaminated goods are also disinfected at this time.

In Europe, the plague disappeared during the winter. This was remarked in all the epidemics, except that from 1636 to 1648, called the Great Plague, on account of its long duration; but even in this instance it abated considerably during the winter. It was a common superstition that the plague abated on St. John's day.

The most fatal, and at the same time the most general epidemic, was that which ravaged Asia, Africa, and the whole of Europe, in the 14th century. It was called by the northern European nations 'the Black Death,' and by the Italians 'la Mortilega Grande,' or the great mortality. According to Dr. Hecker, not less than twenty-five millions perished by it in the short space of three

years, from 1347 to 1350. Since the commencement of this century, Europe has been free from the plague, with the exception of two or three instances. It occurred at Noja, in the kingdom of Naples, in 1815 and 1816; at the Lazaretto of Venice, in 1818; in Greiffenberg in Silesia in 1819. It has not been seen in Great Britain since the great epidemic of 1665, which is stated to have carried off eight thousand in one week. Quarantine was first performed in one of the islands near Venice, in 1485. Persons who had been cured of plague in the Lazaretto on one of the adjoining islands were sent there, and all those with whom they had had intercourse, where they were detained forty days. This period was probably fixed upon on account of some medical hypothesis. The fortieth day was regarded as the last day of ardent diseases, and that which separated them from chronic. Forty days constituted the philosophical month of alchymists. Theological, and even legal derivations, have been also given. The forty days of the flood; Moses' sojourn on Mount Sinai; our Lord's fast; and, lastly, what is called the 'Saxon term' (Sächsische Frist), which also lasts forty days. Bills of health were probably first established in 1507, by a council of health established at Venice during a fatal plague that visited Italy for five years; but they were not generally used until 1665. It is to these great measures that Europe is indebted for its present immunity from this terrible scourge; and it cannot be doubted that, but for the callous indifference of the Orientals (which proceeds from their fatalism, love of gain, and ignorance), the same measures would be adopted in the East with the same success. (Hecker's *Hist. of the Epidemics of the Middle Ages*; Dr. Brown, art. 'Plague,' in *Cyclop. of Pract. Med.*; Dr. Russell, *Hist. of Aleppo*.)—W. A. N.

PETER (Πέτρος; Aram. ܡܬܝܬܐ, originally SIMEON or SIMON (שִׁמְעוֹן, *heard*), was a native of Bethsaida in Galilee (John i. 45), and was the son of a certain Jonas, whence he is named on one occasion in the gospel history Simon Barjona, that is, son of Jona (Matt. xvi. 17). His place of residence was Capernaum (Luke iv. 31, 38), where he had a wife, and where his mother-in-law dwelt (Matt. viii. 14; Luke iv. 38, 39; comp. 1 Cor. ix. 5). According to tradition, his wife's name was Concordia or Perpetua, and she is said (Clem. Alex. *Strom.*, vii. 11. 63) to have suffered martyrdom before him. According to the same authority, also (*Strom.*, iii. 6. 52), he had children. Along with his father and his brother Andrew, he followed the occupation of a fisherman on the Sea of Galilee. It is probable that, before they were chosen by Christ, they were both disciples of John the Baptist. That Andrew was so we are expressly informed by the evangelist John; and as his brother seems to have been of the same mind with him on religious matters, it is extremely likely that he was so likewise. Their attaching themselves to Jesus was owing to John's pointing him out after his baptism to Andrew and another disciple (probably the evangelist John), as 'the Lamb of God;' on which they immediately followed Jesus, and spent some time in receiving his instructions. It would appear that before the conference began they went forth to seek Simon, and Andrew having found him first carried him to

Jesus, who, on receiving him as his disciple, bestowed upon him that surname by which he has since that time been most commonly designated (John i. 42): 'When Jesus beheld him he said, Thou art Simon, the son of Jona; thou shalt be called Cephas, which is by interpretation a stone (*πέτρος*).'<sup>\*</sup> That for a season after this interview Peter attached himself to Jesus, and, along with others, accompanied him to Galilee (John ii. 2, 12), thence to Jerusalem (ver. 17), thence into the land of Judea and the vicinity of the Jordan, where the disciples of Jesus baptized (iii. 22; iv. 2), and thence through Samaria (iv. 8) into Galilee (iv. 43), can hardly be doubted. During the subsequent residence of Jesus, however, at Capernaum (Matt. iv. 13), Peter, with his brother and James and John, returned to their occupation as fishers; and it was whilst so engaged that Jesus finally called them to be his disciples and witnesses. The accounts given of this by the synoptists agree, excepting that Matthew places it before our Lord's preaching through Galilee, the delivery of the sermon on the mount, and the healing of Peter's wife's mother (iv. 18; viii. 14); Mark also places it before the healing of Peter's wife's mother, but omits the preaching through Galilee and the sermon on the mount (i. 16-31); while Luke places it *after* the healing of Peter's wife's mother and the preaching through Galilee (iv. 38; v. 1, ff.) Luke also adds several particulars which the other evangelists omit. The call which Jesus on this occasion addressed to Peter was decisive and final. Deeply conscious of unworthiness and of his immeasurable inferiority to Jesus, he recognised in him his 'Lord,' and for his sake forsook all and followed him. With James and John he shared peculiar intimacy of intercourse with Jesus, and was present at scenes in his history from which all but these three were excluded—such as the transfiguration on the mount and the agony in Gethsemane. The intimate relation between Peter and our Lord is indicated by the fact that it was to him that the tax-collector came to know if his Master paid tribute (Matt. xvii. 24), and that to him and John was entrusted the duty of providing the lamb for the paschal supper (Luke xxii. 8); though it was another that 'had the bag' (John xii. 16). In the course of the evangelical history several incidents relating to Peter are recorded, for the purpose, doubtless, principally of illustrating the character and teaching of our Lord, but which tend also to throw light upon the history and character of his attached disciple. Such are the accounts furnished by the evangelists of his walking upon the agitated waters of the Sea of Galilee to meet his master (Matt. xiv. 22, ff.; Mark vi. 45, ff.); of his bold and intelligent avowals of the undoubted Messiahship of Jesus, notwithstanding the difficulties which he, along with the rest of the disciples, felt in reconciling what they saw in him with what they had fondly expected the Christ to be (Matt. xvi. 13-20); of his rash but affectionate rebuke of his Lord for speaking of suffering and death as in prospect for him, and as forming a necessary part of his mediatorial work (Matt. xvi. 21-23); of his conduct in first rejecting, with an earnestness bordering on horror, the offer of Christ to wash his feet, and then, when the symbolical nature of that act had been explained to him, his over-ardent zeal that not his feet only, but also his hands and his head, might be washed (John xiii. 4, ff.); of his bold and some-

what vaunting avowal of attachment to his Master, and his determination never to forsake him, followed by his disgraceful denial of Jesus in the hour of trial (John xiii. 36, 37; Mark xiv. 29, etc.); of his deep and poignant contrition for this sin (Matt. xxvi. 75); and of his Lord's ample forgiveness of his offence, after he had received from him a profession of attachment as strong and as frequently repeated as his former denial of him (John xxi. 15-18). From these notices it is easy to gather a tolerably correct conception of the predominating features of the apostle's character up to this period. He seems to have been a man of undoubted piety, of ardent attachment to his Master, and of great zeal for what he deemed his Master's honour; but, at the same time, with a mind rather quick than accurate in its apprehensions, and with feelings rather hasty in their impulse than determined and continuous in their exercise. Hence his readiness in avowing his opinions, and his rashness in forming them; and hence also the tendency which beset his honest openness to degenerate into bravado, and his determinations of valour to evaporate into cowardice at appalling forms of danger. His fall, however, and his subsequent restoration, connected as these were with the mysterious events of his Master's crucifixion and resurrection, and with the new light which had by them been cast around his character and work, produced a powerful change for the better upon the apostle's mind. From this time forward he comes before us under a new aspect. A sober dignity and firmness of purpose have displaced his former hasty zeal; sagacity and prudence characterise his conduct; and whilst his love to his Master shows no symptom of abatement, it displays itself rather in active labour and much-enduring patience in his service, than in loud protestations or extravagant exhibitions of attachment. In the subsequent Scripture history he is presented to us as the courageous herald of the kingdom of Christ, by whose mouth the first public declaration of salvation through the crucified Jesus was made to the people; by whose advice and counsel the early churches were planted and governed; and by whom the prejudices of Judaism were first fairly surmounted, and the gospel preached in all its universal freeness to the Gentile world. The Acts of the Apostles contain recitals of many interesting incidents which befell him whilst engaged in these efforts. Of these, the chief are his imprisonment and trial before the Sanhedrim for preaching Christ, and his bold avowal of his determination to persist in that work (Acts iv. 1-22); his miraculously inflicting the punishment of death on the infatuated couple who had dared to try an experiment upon the omniscience of the Holy Ghost (v. 1-11); his visit to Samaria, and rebuke of Simon Magus, who deemed that the miracles of the apostle were the result of some deep magic spell of which he had not yet become possessed, and which, consequently, he was desirous of purchasing from Peter (viii. 14-24); the vision by which he was taught that the ancient ritual distinctions between clean and unclean had been abolished, and thereby prepared to attend on the summons of Cornelius, to whom he preached the gospel (x. 1-48); his apprehension by Herod Agrippa, and his deliverance by the interposition of an angel, who opened for him the doors of his prison, and set him free (xii. 3-19); and his address to the council at Jerusalem, on the occasion of a request for advice and direction being sent to the

church there by the church in Antioch, in which he advocated the exemption of Gentile converts from the ceremonial institutes of the law of Moses (xv. 6-11). In all these incidents we trace the evidences of his mind having undergone an entire change, both as to its views of truth and impressions of duty, from what is displayed by the earlier events of his history. On one occasion only do we detect something of his former weakness, and that, strangely enough, in regard to a matter in which he had been the first of the apostles to perceive, and the first to recommend and follow, a correct course of procedure. The occasion referred to was his withdrawing, through dread of the censures of his Jewish brethren, from the Gentiles at Antioch, after having lived in free and friendly intercourse with them, and his timidly dissembling his convictions as to the religious equality of Jew and Gentile. For this Paul withstood him to the face, and rebuked him sharply, because of the injury which his conduct was calculated to produce to the cause of Christianity. With this single exception, however, his conduct seems to have been in full accordance with the name which his Master had prophetically bestowed on him when he called him Simon the Rock, and with the position which Paul himself assigns him, at the very time that he recounts his temporary dereliction, as one of 'the pillars of the church' (Gal. ii. 9, 14).

Thus far we are enabled, from the inspired documents, to trace the history of this apostle; but for what remains we must be indebted to evidence of a less explicit and certain character. Ecclesiastical tradition asserts that he performed an extensive missionary tour throughout those districts, to the converts in which his epistles are addressed. 'Peter,' says Origen, 'appears to have preached to the Jews in the dispersion, in Pontus, Galatia, Bithynia, Cappadocia, and Asia' (*In Genesis*, tom. iii.; Euseb. *Hist. Eccles.* iii. 1. 4). This tradition, however, though deriving some countenance from 1 Pet. v. 13, is very uncertain; even Origen, in adducing it, speaks doubtfully (*κεκρυμέναι ἔσκειν*). The fact that no allusion appears in his epistles to any personal acquaintance on the part of the apostle with those to whom they are addressed, militates strongly against its authenticity. Another tradition reports the apostle as having towards the close of his life visited Rome, become bishop of the church in that city, and suffered martyrdom in the persecution raised against the Christians by Nero. The importance of these points in connection with the claims urged by the Catholics on behalf of the supremacy of the pope, has led to a careful and sifting examination of the accuracy of this tradition; the result of which seems to be, that whilst it is admitted as *certain* that Peter suffered martyrdom, in all probability by crucifixion (Tertullian, *De Præscript.*, 36; Lactantius, *De Mortibus Persecutorum*, c. ii.), and as *probable* that this took place at Rome, it has, nevertheless, been made pretty clear that he never was for any length of time resident in that city, and morally certain that he never was bishop of the church there (Barrow, *On the Pope's Supremacy*; *Works*, vii. 207, ff., Lond. 1831; Cave's *Life of St. Peter*, sec. 11; Campbell, *Eccles. Hist.* lect. xii.; Neander, *Gesch. d. Pflanz. und Leit. u. s. w.*, ii. 474; Winer, *Real-Wörterb.*, in 'Petrus'; Ellendorf, *Ist Petrus in Rom gewesen*, Darmst. 1841; Wieseler, *Chronol. des Apost. Zeit*, p. 552 ff., etc.) By some an attempt has been made to

obtain the support of the apostle's own testimony in favour of his having at one period resided at Rome, by interpreting the words, 'the church that is at *Babylon*,' the salutations of which he sends to those to whom he wrote his first epistle, as applying to the church at *Rome*; an attempt which Dr. Campbell justly stigmatizes as 'poor, not to call it ridiculous.' Even if we admit that at the time when this epistle was written it was understood amongst the Christians that *Babylon* was the prophetic name for *Rome*—an admission, however, which is entirely unsupported by evidence—it would remain unexplained why the apostle, in such a mere matter-of-fact affair as the communication of the friendly salutations of one church to another, should have employed the obscure and symbolical language of prophecy, when his meaning could have been so much more distinctly conveyed by a simple statement. This would be the more inexplicable, that the style of Peter is remarkably plain and perspicuous throughout the entire epistle. It seems much more consistent, therefore, with rational principles of interpretation, to understand the statement literally of the Assyrian *Babylon*, in which city, as we learn from Josephus, there was a great multitude of Jews (*ἐνθα καὶ πλῆθος ἦν Ἰουδαίων*, *Antiq.* xv. 2. 2; see also c. 3. 1), and to which, consequently, it is probable that at some period of his life 'the apostle of the circumcision' (Gal. ii. 8) must have paid a visit. Some have suggested that *Babylon* in Egypt is probably intended; but this is set aside by the fact, that at this time the Egyptian *Babylon* was nothing more than a Roman fort (*Strabo*, xvii. 1).

The assertion that Peter was bishop of Rome is connected with another, by which the claims of the papacy are sought to be established, namely, that to him was conceded a right of supremacy over the other apostles. In support of this, an appeal is made to those passages in the Gospels where declarations supposed to imply the bestowal of peculiar honour and distinction on Peter are recorded as having been addressed to him by our Lord. The most important of these are: 'Thou art Peter, and on this rock will I build my church' (Matt. xvi. 18); and, 'Unto thee will I give the keys of the kingdom of heaven,' etc. (Matt. xvi. 19). At first sight these passages would seem to bear out the assumption founded on them; but, upon a more careful investigation, it will be seen that this is rather in appearance than in reality. The force of both is greatly impaired for the purpose for which Catholics produce them, by the circumstance, that whatever of power or authority they may be supposed to confer upon Peter, must be regarded as shared by him with the other apostles, inasmuch as to them also are ascribed in other passages the same qualities and powers which are promised to Peter in those under consideration. If by the former of these passages we are to understand that the church is built upon Peter, the apostle Paul informs us that it is not on him *alone* that it is built, but upon *all* the apostles (Ephes. ii. 20); and in the book of Revelation we are told, that on the twelve foundations of the New Jerusalem (the Christian church) are inscribed 'the names of the *twelve apostles of the Lamb*' (xxi. 14). As for the declaration in the latter of these passages, it was in all its essential parts repeated by our Lord to the other disciples immediately before his passion, as announcing a privilege which, as his apostles, they were to pos-

sess in common (Matt. xviii. 18; John xx. 23). It is, moreover, uncertain in what sense our Lord used the language in question. In both cases his words are metaphorical; and nothing can be more unsafe than to build a theological dogma upon language of which the meaning is not clear, and to which, from the earliest ages, different interpretations have been affixed. And finally, even granting the correctness of that interpretation which Catholics put upon these verses, it will not bear out the conclusion they would deduce from them, inasmuch as the judicial supremacy of Peter over the other apostles does not necessarily follow from his possessing authority over the church. On the other side, it is certain that there is no instance on record of the apostle's having ever claimed or exercised this supposed power; but, on the contrary, he is oftener than once represented as submitting to an exercise of power upon the part of others, as when, for instance, he went forth as a messenger from the apostles assembled in Jerusalem to the Christians in Samaria (Acts viii. 14), and when he received a rebuke from Paul, as already noticed. This circumstance is so fatal, indeed, to the pretensions which have been urged in favour of his supremacy over the other apostles, that from a very early age attempts have been made to set aside its force, by the hypothesis that it is not of Peter the apostle, but of another person of the same name, that Paul speaks in the passage referred to (Euseb. *Hist. Eccles.* i. 13). This hypothesis, however, is so plainly contradicted by the words of Paul, who explicitly ascribes apostleship to the Peter of whom he writes, that it is astonishing how it could have been admitted even by the most blinded zealots (vers. 8, 9). Whilst, however, it is pretty well established that Peter enjoyed no judicial supremacy over the other apostles, it would, perhaps, be going too far to affirm that no dignity or primacy whatsoever was conceded to him on the part of his brethren. His superiority in point of age, his distinguished personal excellence, his reputation and success as a teacher of Christianity, and the prominent part which he had ever taken in his Master's affairs, both before his death and after his ascension, furnished sufficient grounds for his being raised to a position of respect and of moral influence in the church and amongst his brother apostles. To this some countenance is given by the circumstances that he is called 'the first' (πρῶτος) by Matthew (x. 2), and this apparently not merely as a numerical, but as an honorary distinction; that when the apostles are mentioned as a body, it is frequently by the phrase, 'Peter and the eleven,' or, 'Peter and the rest of the apostles,' or something similar; and that when Paul went up to Jerusalem by divine revelation, it was to Peter particularly that the visit was paid. These circumstances, taken in connection with the prevalent voice of Christian antiquity, would seem to authorise the opinion that Peter occupied some such position as that of προεστῶς, or president in the apostolical college, but without any power or authority of a judicial kind over his brother apostles.

Besides the two epistles which form part of the canonical Scriptures [see next article] there were in the Apocryphal literature of the church several works ascribed to St. Peter. Eusebius mentions (*Hist. Eccles.* iii. 3) four works of this class; his Εὐαγγέλιον, his Ἰπράξεις, his Κήρυγμα, and his Ἀποκάλυψις. Of these the Κήρυγμα and the Ἀποκάλυψις are cited by Clem. Alex. (*Strom.*

vi. 5. 42; vi. 48; *Hypotypos* ap. Euseb. *H. E.* vi. 14; and in Theodoti *Epitom.*, appended to the *Stromata*). The Apocalypse is mentioned also in the *Canon Muratori*, sec. 310; Origen (*Expos. in Joann. Ev.*, tom. xiii.) mentions the Κήρυγμα, and speaks also of a διδάχη of Peter (*De Princ.* praef. 8). In addition to the above Jerome names *Judicium Petri* (*Catal. S.E.*); and Epiphanius names Περύδοι Πέτρον, as a book among the Ebionites (*Haeres.* xxx. 15). It is probable that several of these are only different names of the same book (Schwegler, *Nach-apost. Zeitalt.*, ii. 30). St. Peter is the great hero of the pseudo-Clementine literature, where he is exalted at the expense of St. Paul (Schliemann, *Die Clementinen nebst den verwandten Schriften*, 1814). Among other legends which have come down to us concerning St. Peter is that relating to his contention at Rome with Simon Magus. This seems to have no better foundation than a misunderstanding of an inscription by Justin Martyr (*Apol.* i. c. 26). [SIMON MAGUS.]

The tradition of Peter's being crucified with his head downward is probably also to be relegated to the regions of the fabulous. Tertullian, who is the first to mention Peter's crucifixion, says simply (*De Praescr. Haeres.*, 36), 'Petrus passioni Dominicae adaequatur;' which would rather lead to the conclusion that he was crucified in the usual way, as our Lord was. The next witness is Origen, whose words are: ἀνεσκολοπίσθη κατὰ κεφαλῆς οὕτως αὐτὸς ἀζώσας παθεῖν (Ap. Euseb. *H. E.*, iii. 1); and these are generally cited as intimating the peculiarity traditionally ascribed to the mode of Peter's crucifixion. But do the words really intimate this? Allowing that the verb may mean 'was crucified,' can κατὰ κεφαλῆς mean 'with the head downwards?' No instance, we believe, can be adduced which would justify such a translation. The combination κατὰ κεφαλῆς occurs both in classical and biblical Greek (cf. Plato, *Rep.*, iii., p. 398; Plut. *Apopht. de Scipione Jun.*, 13; Mark xiv. 3; 1 Cor. xi. 4), but in every case it means, 'upon the head' (comp. κατὰ κόρην πατάξαι, Lucian, *Gall.*, c. 30, and κατὰ κόρην παλεῖν, *Catal.*, c. 12). According to analogy, therefore, Origen's words should mean, that the apostle was impaled, or fastened to the cross upon, i. e. by, the head. When Eusebius has to mention the crucifying of martyrs with the head downwards, he says distinctly οἱ δὲ ἀνάπαλιν κατωκάρᾳ προσηλωθέντες (*H. E.*, viii. 8). It is probably to a misunderstanding of Origen's words that this story is to be traced; and it is curious to see how it grows as it advances. First, we have Origen's vague and doubtful statement above quoted; then we have Eusebius's more precise statement: Πέτρος κατὰ κεφαλῆς σταυροῦνται (*Dem. Ev.*, iii. p. 116, c.); and at length, in the hands of Jerome, it expands into 'Affixus cruci martyrio coronatus est capite ad terram verso et in sublime pedibus elevatus, ascrens se indignum qui sic crucifigeretur ut Dominus suus' (*Catal. Script. Eccles.*, i.) (Campbell, *Eccles. Hist.*, lect. v. and xiii.; Barrow, *ubi sup.*, etc.; Eichhorn, *Einleit.* iii. 599; Hug. *Introd.* p. 635; Fosdick's tr.; Horne, *Introd.*, iv. 432; Lardner, *Works*, vols. iv. v. vi., ed. 1788; Cave, *Antiquitates Apostolicae*; Davidson, *Introduction to N. T.*, iii.; Neander, *Apostol. Zeitalt.*; Lange, *Apost. Zeitalt.*; and Weiss, *Petrin. Lehrbegriff*, etc.)—W. L. A.

PETER, FIRST EPISTLE OF.—*Genuineness and Canonicity*.—This epistle found an early place in the canon by universal consent. The other epistle, by calling itself *θεντέρα*, refers to it as an earlier document (2 Peter iii. 1). Polycarp, in his Epistle to the Philippians, often uses it, quoting many clauses, and some whole verses, as 1 Peter i. 13, 21, in chapter ii.; iii. 9, in chap. v.; ii. 11, in chap. vi.; iv. 7, in chap. vi.; and ii. 21-24, in chap. viii., etc. It is to be observed, however, that in no case does this father refer to Peter by name, but he simply cites the places as from some document of acknowledged authority; so that Eusebius notes it as characteristic of his epistle, that Polycarp used those citations from the First Epistle of Peter as *μαρτυρίαι* (*Hist. Eccles.* iv. 14). The same historian relates of Papias, that in his *Λογίων κυριακῶν ἐξηγήσεις*, he, in a similar way, used *μαρτυρίαι* from this epistle (*Hist. Eccles.* iii. 39). Irenæus quotes it expressly and by name, with the common formula, *et Petrus ait* (*Hær.* iv. 9, 2), citing 1 Pet. i. 8; using the same quotation similarly introduced in *do.*, v. 7. 2; and again, *et propter hoc Petrus ait*, citing 1 Pet. ii. 16; *do.* iv. 16. 5. Other quotations, without mention of the apostle's name, may be found, *do.* iii. 16. 9, and iv. 20. 2, etc. Quotations abound in Clement of Alexandria, headed with *ὁ Πέτρος λέγει* or *φησὶν ὁ Πέτρος*. These occur both in his *Stromata* and *Paedag.*, and need not be specified. Quotations are abundant also in Origen, certifying the authorship by the words *παρὰ τῷ Πιτρῷ*; and, according to Eusebius, he calls this epistle *μὴν ἐπιστολὴν δημολογουμένην* (Euseb. *Hist. Eccles.*, vi. 25). The quotations in Origen's works need not be dwelt upon. In the letter of the churches of Vienne and Lyons, A. D. 177, there is distinct use made of 1 Pet. v. 6. Theophilus of Antioch, A. D. 181, quotes these terms of 1 Pet. iv. 3—*ἀνεμύταις εἰδωλολατρείαις*. Tertullian's testimony is quite as distinct. In the short tract *Scorpice* this epistle is quoted nine times, the preface in one place being *Petrus quidem ad Ponticos* (*Scorp.* xii.), quoting 1 Pet. ii. 20. Eusebius himself says of it, *Πέτρον . . . ἀνωμολόγηται* (*Hist. Eccles.*, iii. 25). It is also found in the Peshito which admitted only three of the catholic epistles. See Mayerhoff, *Einleitung in die Petrin. Schriften*, p. 139, etc.

In the canon published by Muratori this epistle is not found. In this fragment occurs the clause, *Apocalypses etiam Johannis et Petri tantum recipimus*. Wieseler, laying stress on *etiam*, would bring out this meaning—in addition to the epistles of Peter and John we also receive their Revelations; or also of Peter we receive as much as of John, two epistles and an apocalypse. But the interpretation is not admissible. Rather with Bleek may the omission be ascribed to the fragmentary character of the document (*Einleit. in das N. T.*, p. 643; Hilgenfeld, *der Canon und die Kritik des N. T.*, p. 43, Halle 1863). Other modes of reading and explaining the obscure sentence have been proposed. Hug alters the punctuation: *Apocalypsis etiam Johannis. Et Petri tantum recipimus*; certainly the *tantum* gives some plausibility to the emendation. Believing that the barbarous Latin is but a version from the Greek, he thus restores the original *καὶ Πέτρον μόνον παραδεχόμεθα*, and then asks *μόνον* to be changed into *μονήν*—an alteration which of course brings out the conclusion wanted (*Einleit.*, sec. 19). Guericke's effort

is not more satisfactory. Thiersch, with more violence, changes *tantum* into *unam epistolam*, and *quam quidem* in the following clause into *alteram quidem*. This document, so imperfect in form and barbarous in style, is probably indeed a translation from the Greek, and it can have no authority against decided and general testimony (see the canon in Routh's *Reliquiæ Sacrae*, vol. i. 396, edited with notes from Freindall's *Commentatio*, London 1862). Nor is it of any importance whether the words of Leontius imply that this epistle was repudiated by Theodore of Mopsuestia, and if the Paulicians rejected it, Petrus Siculus gives the true reason—they were *perissime adversus illum affecti*—personal prejudice being implied in their very name (*Hist. Manich.* p. 17).

In later times, the genuineness of the epistle has been impugned, as by Cludius in his *Ursichten des Christenthums*, p. 296, Altona 1808. He imagined the author to have been a Jewish Christian of Asia Minor, and his general objection was that the similarity in doctrine and style to Paul was too great to warrant the belief of independent authorship. His objections were exposed and answered by Augusti in a program, Jena 1808, and by Bertholdt, *Einleit.*, vol. vi. sec. 667. Eichhorn, however, took up the theory of Cludius so far as to maintain that as to material Peter is the author, but that Mark is the actual writer. De Wette also throws out similar objections, hinting that the author may have been a follower of Paul who had been brought into close attendance upon Peter. While there is a similarity between the thoughts and style of Peter and Paul, there is at the same time a marked individuality, and there are also many special characteristics, in this first epistle.

And, first, as proof of its genuineness, there is a peculiar and natural similarity between this epistle and the speeches of Peter as given in the Acts of the Apostles. Not to mention similarity in mould of doctrine and array of facts, there is resemblance in style. Thus Acts v. 30, x. 39, 1 Pet. ii. 24, in the allusion to the crucifixion and the use of *ξύλον*, the tree or cross; Acts ii. 32, iii. 15, 1 Pet. v. 1, in the peculiar use of *μάρτυς*; Acts iii. 18, x. 43, 1 Pet. i. 10, in the special connection of the old prophets with Christ and his work; Acts x. 42, 1 Pet. iv. 5, in the striking phrase, 'judge quick and dead'; Acts iii. 16, 1 Pet. i. 21, in the clauses *ἡ πίστις ἢ δι' αὐτοῦ—τοὺς δι' αὐτοῦ πιστοὺς*; and in the mode of quotation (Acts iv. 2; 1 Pet. ii. 7). Certain favourite terms occur also—*ἀναστροφὴ*, and *ἀγαθοποιεῖν* with its cognates and opposites. There are over fifty words peculiar to himself in this brief document, nearly all of them compounds—as if in his profound anxiety to express his thoughts as he felt them, he had employed the first, and to him at the moment the fittest terms which occurred. He has such phrases as *ἐλπίς ζωῆς*, i. 3; *συνειδήσις θεοῦ*, ii. 19; *σφύρες διανοίας*, i. 13; *φίλημα ἀγάπης*, v. 14. The nouns *δόξα*, i. 11, and *ἀρεταί*, ii. 9, occur in the plural. He uses *εἰς* before a personal accusative no less than four times in the first chapter. The article is often separated from its noun, iii. 2, 3, 19; iv. 2, 5, 8, 12. Peter has also a greater proneness than Paul to repetition—to reproduce the same idea in somewhat similar terms—as if he had felt it needless to search for a mere change of words when a similar thought was waiting for immediate utterance. Compare i. 6-9 with iv. 12, 13; ii. 12 with iii. 16, iv. 4; iv. 7 with

v. 8. And there are in the epistle distinct and original thoughts—special exhibitions of the great facts and truths of the gospel which the apostle looked at from his own point of view, and applied as he deemed best to a practical purpose. Thus the visit of Christ ‘to the spirits in prison’ (iii. 19); the typical connection of the deluge with baptism; the desire of the old prophets to study and know the times and the blessings of the gospel—are not only Petrine in form, but are solitary statements in Scripture. Thus, too, the apostle brings out into peculiar relief regeneration by the ‘word of God,’ the ‘royal priesthood’ of believers, and the qualities of the future ‘inheritance,’ etc.

Again, in phrases and ideas which in the main are similar to those of Paul, there is in Peter usually some mark of difference. Where there might have been sameness, the result of imitation, there is only similarity, the token of original thought. For example, Paul says (Rom. vi. 10, 11)—*ζῆν τῷ θεῷ*; Peter says (ii. 24)—*ζῆν τῇ δικαιοσύνῃ*. The former writes (Rom. vi. 2)—*ἀποθνήσκει τῇ ἁμαρτίᾳ*; the latter (ii. 24)—*ταῖς ἁμαρτίαις ἀπογίνεσθαι*. Besides, as Brückner remarks, the representation in these last clauses is different—death to sin in the passage from Romans being the result of union with the sufferings and death of Christ, while in Peter it is the result of Christ’s doing away sin (Sündenvernichtung, De Wette, *Erklärung*, ed. Brückner, p. 9). So, too, the common contrast in Paul is *σὰρξ* and *πνεῦμα*, but in Peter *πνεῦμα* and *ψυχὴ*; *ἐκλογὴ* is connected in Paul with *χάρις*, or it stands absolutely; but in Peter it is joined to *πρόβρωσις*; government is with the first *τοῦ θεοῦ διαταγή*, Rom. xiii. 2; but with the second it is *ἀνθρωπινῇ κτίσις*, ii. 13; the expression with the one is *καὶνὸς ἄνθρωπος*, Ephes. iv. 24; but with the other *ὁ κρυπτὸς ἄνθρωπος*, iii. 4; what is called *ἀφορμή* in Gal. v. 13 is named *ἐπικάλυμμα* 1 Pet. ii. 16, etc. Now, not to insist longer on this similarity with variance, it may be remarked that for many of the terms employed by them, both apostles had a common source in the Septuagint. The words found there and already halloved by religious use were free to both of them, and their acquaintance with the LXX. must have tended to produce some resemblance in their own style. Among such terms are *ἀγνώστια*, *δωρεῖα*, *εὐσπλαγχνος*, *καταλαλία*, *ὑπερέχειν*, *φρουρεῖν*, *χορηγεῖν* (compare Mayerhoff, *Histor. Crit. Einleitung in d. Petrin. Schrift.*, pp. 107-8). That two apostles, in teaching the same system of divine truth, should agree in many of their representations, and even in their words, is not to be wondered at, since the terminology must soon have acquired a definite form, and certain expressions must have become current through constant usage. But in cases where such similarity between Peter and Paul occurs, there is ever a difference of view or of connection; and though both may refer to ideas so common as are named by *ὑπακοή*, *δόξα*, or *κληρονομία*, there is always something to show Peter’s independent use of the terms. One with his ‘beloved brother Paul’ in the general view of the truth, he has something peculiar to himself in the introduction and illustration of it. The Petrine type is as distinct as the Pauline—it bears its own unmistakable style and character. The Galilean fisherman has an individuality quite as recognisable as the pupil of Gamaliel.

And to show how baseless is the objection drawn from Peter’s supposed dependence on Paul,

it may be added that similarity in some cases may be traced between Peter and John. In many respects Paul and John are utterly unlike, yet Peter occasionally resembles both, though it is not surmised that he was an imitator of the beloved disciple. Such accidental resemblance to two styles of thought so unlike in themselves, is surely proof of his independence of both, for he stands mid-way, as it were, between the objectivity of Paul and the subjectivity of John; inclining sometimes to the one side, and sometimes to the other, and occasionally combining both peculiarities of thought. Thus, one may compare 1 Pet. i. 22 with 1 John iii. 3 in the use of *ἀγνίζω*; 1 Pet. i. 23 with 1 John iii. 9 in the similar use of *σπορᾶς* and *σπέρμα*, denoting the vital germ out of which regeneration springs; 1 Pet. v. 2 with John x. 16 in the use of *ποιμὴν*; 1 Pet. iii. 18 and 1 John iii. 7 in the application of the epithet *δικαίος* to Christ; 1 Pet. iii. 18, John i. 29, in calling him *ἀμνός*. Such similarities only prove independent authorship. In the resemblances to James, which are sometimes adduced, the chief similarity consists in the use of O. T. quotations. Thus compare 1 Pet. i. 24 with James i. 10; ii. 5, with James iv. 6, 10; iv. 8 with James v. 20. What, then, do these more frequent resemblances to Paul, and the fewer to John and James prove? not, with De Wette, the dependence of Peter on Paul; nor, with Weiss, the dependence of Paul on Peter (*Der Petrin. Lehrbeg.*, p. 374); but that Peter, in teaching similar truths, occasionally employs similar terms; while the surrounding illustration is so various and significant that such similarity can be called neither tame reiteration nor unconscious reminiscence. With much that is common in creed, there is more that is distinctive in utterance, originating in difference of spiritual temperament, or moulded by the adaptation of truth to the inner or outer condition of the churches for whom this epistle was designed.

But apart from the style and language of the epistle, objections have been brought against it by Schwegler, who alleges the want of special occasion for writing it, and the consequent generality of the contents (*Das Nachapostol. Zeital.*, ii. p. 7). The reply is that the epistle bears upon its front such a purpose as well suits the vocation of an apostle. Nor is there in it, as we have seen, that want of individuality which Schwegler next alleges. It bears upon it the stamp of its author’s fervent spirit; nor does its use of O. T. imagery and allusions belie his functions as the apostle of the circumcision (Wiesinger, *Einl.* 21). If there be the want of close connection of thought, as Schwegler also asserts, is not this want of logical sequence and symmetry quite in keeping with the antecedents of him who had been trained in no school of human learning? Nor is it any real difficulty to say that Peter in the East could not have become acquainted with the later epistles of Paul. For in various ways might Peter have known Paul’s epistles; and granting that there is a resemblance to some of the earlier of them, there is little or none to the latest of them. Schwegler holds that the epistle alludes to the persecution under Nero, during which Peter suffered, and that therefore his writing it at Babylon is inconsistent with his martyrdom at the same period at Rome. The objection, however, takes for granted what is denied. It is a sufficient reply to say that the persecution referred to was not, or may not have been, the Neronian persecution, and

that the apostle was not put to death at the supposed period of Nero's reign. There is not in the epistle any direct allusion to actual persecution; the *ἀπολογία* (iii. 15) is not a formal answer to a public accusation, for it is to be given to every one asking it (Huther, *Kritisch Exegetisch Handbuch über den 1. Brief des Petrus*, Einleit., p. 27). The epistle in all its leading features is in unison with what it professes to be—an earnest and practical letter from one whose heart was set on the well-being of the churches, one who may have read many of Paul's letters and thanked God for them—and who, in addressing the churches himself, clothes his thoughts in language the readiest and most natural to him, without any timid selection or refusal of words and phrases which others may have used before him.

*Place and Time.*—The place is indicated in v. 13, in the clause ἀσπάζεται ὑμᾶς ἡ ἐν βαβυλῶνι συνεκλεκτή. Babylon is named as the place where the apostle was when he wrote the epistle, as he sends this salutation from it, on the part of a woman, as Mayerhoff, Neander, Alford, and others suppose; or on the part of a church, as is the opinion of the majority. It is remarkable, however, that from early times Babylon has been taken to signify Rome. This opinion is ascribed by Eusebius on report to Papias and Clement of Alexandria (*Hist. Eccles.*, ii. 15). Jerome and Ecumenius also held it. In later times it has been espoused by Grotius, Cave, Lardner, Hengstenberg, Windischmann, Wiesinger, Baur, Thiersch, Schott (*der 1. Brief Pet. Erklärt.*, p. 346, Erlangen 1861), and Hofmann (*Schriftb.* i. 201). But why discover a mystical sense in a name set down as the place of writing an epistle? There is no more reason for doing this than for assigning a like significance to the geographical names in i. 1. How could his readers discover the church at Rome to be meant by ἡ συνεκλεκτή in Babylon? And if Babylon do signify a hostile spiritual power, as in the Apocalypse (xviii. 21), then it is strange that Catholic critics as a body should adopt such a meaning here and admit by implication the ascription of this character to their spiritual metropolis. Dr. Brown of Edinburgh puts a somewhat parallel case—'Our own city is sometimes called Athens from its situation, and from its being a seat of learning; but it would not do to argue that a letter came from Edinburgh because it is dated from Athens' (*Expository discourses on 1st Peter*, vol. i. p. 548).

Some, again, think that Babylon may mean a place of that name in Egypt. Of this opinion are Le Clerc, Mill, Pearson, Pott, Burton, Greswell, and Hug. Strabo (*Geog.*, xvii. 1. 30) calls it not a town, but a strong fortress built by refugees from Babylon, and a garrison for one of the three legions guarding Egypt. The opinion that this small encampment is the Babylon of our epistle has certainly little plausibility. It is equally strange to suppose it to be Ctesiphon or Seleucis; and stranger still to imagine that Babylon represents Jerusalem, as is maintained by Cappellus, Spanheim, Harduin, and Semler. The natural interpretation is to take Babylon as the name of the well-known city. We have indeed no record of any missionary journey of Peter into Chaldaea, for but little of Peter's later life is given us in the N. T. But we know that many Jews inhabited Babylon—οὗ γὰρ ὄλγοι μυριάδες, according to Josephus—and was not such a spot, to a great extent a

Jewish colony or settlement, likely to attract the apostle of the circumcision? Lardner's principal argument, that the terms of the injunction to loyal obedience (ii. 13, 14) imply that Peter was within the bounds of the Roman empire, proves nothing; for as Davidson remarks—'The phrase, 'the king,' in a letter written by a person in one country to a person in another, may mean the king either of the person writing, or of him to whom the letter is written.' Granting that the Parthian empire had its own government, he is writing to persons in other provinces under Roman jurisdiction, and he enjoins them to obey the emperor as supreme, and the various governors sent by him for purposes of local administration. Moreover, as has been often observed, the countries of the persons addressed in the epistle (i. 1) are enumerated in the order in which a person writing from Babylon would naturally arrange them, beginning with those lying nearest to him, and passing in circuit to those in the west and the south, at the greatest distance from him. The natural meaning of the designation Babylon is held by Erasmus, Calvin, Beza, Lightfoot, Wieseler, Mayerhoff, Bengel, De Wette, Bleek, and perhaps the majority of modern critics.

But if Peter wrote from Babylon on the Euphrates, at what period was the epistle written? The epistle itself contains no materials for fixing a precise date. It does not by its allusions clearly point to the Neronian persecution; it rather speaks of evil and danger suffered now, but with more in prospect. Suffering was endured and was also impending, and yet those who lived a quiet and blameless life might escape it, though certainly trials for righteousness' sake are implied and virtually predicted. About the year 60 the dark elements of Nero's character began to develop themselves, and after this epoch the epistle was written. The churches addressed in it were mostly planted by Paul, and it is therefore thought by some that Paul must have been deceased ere Peter would find it his duty to address them. Paul was put to death about 67 A.D.; but such a date would be too late for our epistle, as time would not, on such a hypothesis, be left for the apostle's going to Rome, according to old tradition, and for his martyrdom in that city. It may be admitted that Peter would not have intruded into Paul's sphere had Paul been free to write to, or labour in, the provinces specified. Still it may be supposed that Paul may have withdrawn to some more distant field of labour, or may have been suffering imprisonment at Rome. Davidson places the date in 63; Alford between 63 and 67. If the Mark of v. 13 be of whom Paul speaks as being with him in Rome (Coloss. iv. 10), then we know that he was purposing an immediate journey to Asia Minor; and we learn from 2 Tim. iv. 11 that he had not returned when this last of Paul's epistles was written. It is surely not impossible for him to have gone in this interval to Peter at Babylon; and as he must have personally known the churches addressed by Peter, his salutation was naturally included by the apostle. Sylvanus—by whom the apostle was sent, if the same with the Sylvanus mentioned in the greetings 1 Thess. i. 1; 2 Thess. i. 1—seems to have left Paul before the epistles to Corinth were written. He may have in some way become connected with Peter, and as the Silas of the Acts, he was acquainted with many of the

churches to whom this epistle was sent. The terms, 'a faithful brother as I suppose,' 'the faithful brother as I reckon,' do not imply any doubt of his character, but are only an additional recommendation to one whose companionship with Paul must have been known in the provinces enumerated by Peter.

But Schwegler ascribes the epistle to a later period—to the age of Trajan; and of course denies its apostolic authorship (*Nachapostol. Zeitalt.*, ii. 22). The arguments, however, for so late a date are very inconclusive. He first of all assumes that its language does not tally with the facts of the Neronian persecution, and that the tone is unimpassioned (*leidenschaftlose Ton*)—that Christians were charged with definite crime under Nero—that his persecution did not extend beyond Rome—that it was tumultuary, and not, as this epistle supposes, conducted by regular processes, *unter rechtlichen Formen*, and that the general condition of believers in Asia Minor, as depicted in the epistle, suits the age of Trajan better than that of Nero. The reply is obvious—that the tranquillity of tone in this epistle would be remarkable under any persecution, for it is that of calm heroic endurance, which trusts in an unseen arm and has hopes undimmed by death; that the persecution of Christians simply for the name which they bore was not an irrational ferocity peculiar to Trajan's time; that in the provinces Christians were always exposed to popular fury and irregular magisterial condemnation; that there is no allusion to judicial trial in the epistle, for the word *ἀπολογία* does not imply it; and that the sufferings of Christians in Asia Minor as referred to or predicted do not agree with the recorded facts in Pliny's letter, for according to it they were by a formal investigation and sentence doomed to death (Huther, *1st Peter, Einleit.*, p. 28). The persecutions referred to in this epistle are rather such as Christians have always to encounter in heathen countries from an ignorant mob easily stirred to violence, and where the civil power, though inclined to toleration in theory, is yet swayed by strong prejudices, and prone, from position and policy, to favour and protect the dominant superstition.

*Persons for whom the Epistle was addressed.*—From some expressions in the epistle many have thought that it was meant for Jewish Christians. The words of the salutation are—*ἐκλεκτοῖς παρ' ἐξ ἡμῶν διασπορᾶς Πόντου*, etc.—'to the elect strangers of the dispersion,' etc. Viewed by themselves the words seem to refer to Jews—*διασπορά* being often employed to designate Jews living out of Palestine. This opinion is held by many of the fathers, as Eusebius, Jerome, and Theophylact, and by Erasmus, Calvin, Beza, Grotius, Bengel, Hug, and Pott. A modification of this extreme view is maintained by Gerhard, Wolf, Jachmann, and Weiss, viz., that Jewish converts were chiefly regarded in the mass of Gentile believers. The arguments of Weiss need not be repeated, and they are well met by Huther, *1st Peter, Einleit.*, p. 21. But there are many things in the epistle quite irreconcilable with the idea of its being meant either solely or principally for Jewish believers. He tells his readers that 'sufficient was the past for them to have wrought out the will of the Gentiles—as indeed ye walked in lasciviousness, wine-bibbing, revellings, drinking-bouts, and forbidden idolatries'—sins all of them, and the last particularly, which

specially characterised the heathen world. Similarly does he speak (i. 14) of 'former lusts in your ignorance;' (iii. 6), of Sarah 'whose daughters ye have become'—*ἐγενήθητε*—they being not so by birth or blood. In ii. 9, 10, they are said to be 'called out of darkness,' to have been 'in time past not a people, but now the people of God.' The last words, referring originally to Israel, had been already applied by Paul to Gentile believers in Rom. ix. 25. The term *διασπορά* may be used in a spiritual sense, and such a use is warranted by other clauses of the epistle—i. 17, 'the time of your sojourning;' ii. 11, 'strangers and pilgrims.' Peter, whose prepossessions had been so Jewish, and whose soul moved so much in the sphere of Jewish ideas from his very function as the apostle of the circumcision, instinctively employs national terms in that new and enlarged spiritual meaning which, through their connection with Christianity, they had come to bear. Besides, the history of the origin of these churches in Asia Minor shows that they were composed to a large extent of Gentile believers. Many of them may have been proselytes, though, as Wieseler has shown, it is wrong in Michaelis, Credner, and Neudecker, to apply to such exclusively the terms in the address of this epistle. Nor is it at all a likely thing that Peter should have selected one portion of these churches and written alone or mainly to them. The provinces (i. 1) included the churches in Galatia which are not named in Acts, as Ancyra and Pessinus, and the other communities in Iconium, Lystra, the Pisidian Antioch, Miletus, Colosse, Laodicea, Philadelphia, Thyatira, Ephesus, Smyrna, Pergamus, Troas, etc. (Steiger, *Einl.*, sec. 6). That the persons addressed in the epistle were Gentiles is the view of Augustine, Luther, Wetstein, Steiger, Brückner, Mayerhoff, Wiesinger, Neander, Reuss, Schaff, and Huther.

*Contents and Characteristics.*—We need not occupy space in going over the general contents, which are patent to every reader. But a few distinctive features may be looked at. The churches addressed were in trials—such trials as the spirit of that age must necessarily have brought upon them (iii. 17; iv. 12-19). Those trials originated to some extent in their separation from the heathen amusements and dissoluteness in which they had mingled prior to their conversion (iv. 4, 5). They are exhorted to bear suffering patiently, and ever to remember the example, and endure in the spirit, of the Suffering One—the Righteous One who had suffered for them. And while affliction would come upon them in the present time, they are ever encouraged to look with joyous anticipation to the future. Peter indeed might be called the apostle of hope. Doctrine and consolation alike assume this form. The 'inheritance' is future, but its heirs are begotten to a 'living hope' (i. 3, 4). Their tried faith is found unto glory 'at the appearance of Jesus Christ' (i. 7). The 'end' of their faith is 'salvation' (i. 9), and they are to 'hope to the end for the grace to be brought at the revelation of Jesus Christ' (i. 13). Their ruling emotion is therefore 'the hope that is in them' (iii. 15); so much lying over in reserve for them in the future, their time here is only a 'sojourning' (i. 17); they were merely 'strangers and pilgrims' (ii. 11); nay, 'the end of all things is at hand' (iv. 7). Suffering was now, but joy was to come when his 'glory shall be revealed' (v. 1). In Christ's own experi-

ence as Prototype suffering led to glory (i. 11; iv. 13), the same connection the apostle applies to himself, and to faithful ministers (v. 1-4). There are also allusions to Christ's words, or rather reminiscences of them mingle with the apostle's thoughts. Compare i. 4 with Matt. xxv. 34; i. 8 with John xx. 29; i. 10 with Luke x. 24; i. 13 with Luke xii. 35; ii. 12 with Matt. v. 16; iii. 13-15 with Matt. v. 16, x. 28; v. 6 with Matt. xxxiii. 12, etc.

There were apparently some tendencies in those churches that required reproof—some temptations against which they needed to be warned, as 'former lusts,' 'fleshly lusts' (i. 14, 11); dark and envious feelings (ii. 1; iii. 8, 9); love of adornment on the part of women (iii. 3); and ambition and worldliness on the part of Christian teachers (v. 1-4). God's gracious and tender relationship to his people was a special feature of the old covenant, and Peter reproduces it under the new in its closer and more spiritual aspects (ii. 9, 10; iv. 17; v. 2). The old economy is neither eulogised nor disparaged, and no remark is made on its abolition, the reasons of it, or the good to the world springing out of it. The disturbing question of its relation to Gentile believers is not even glanced at. In his view it had passed away by its development into another and grander system, one with it in spirit, and at the same time the realisation of its oracles and types. His mind is saturated with O. T. imagery and allusions, but they are freely applied to the spiritual Israel, which, having always existed within the theocracy, had now burst the national barriers, and was to be found in all the believing communities, whatever their lineage or country. To him the Jewish economy was neither supplanted by a rival faith nor superseded by a sudden revolution; Israel had only put off its ceremonial, the badge of its immaturity and servitude, and now rejoiced in freedom and predicted blessing. What was said of the typical Israel may now be asserted with deeper truth of the spiritual Israel. But the change is neither argued from premises laid down nor vindicated against Jews or Judaizers, and the results of the new condition are not held up as matter of formal congratulation; they are only seized and put forward as recognised grounds of joy, patience, and hope. The Redeemer stood out to Jewish hope as the Messiah; so Peter rejoices in that appellation, calling him usually Jesus Christ, and often simply Christ (i. 11; ii. 21; iii. 16-18; iv. 1, 13, 14); and it is remarkable that in nearly all those places the simple name Christ is used in connection with his sufferings, to the idea of which the Jewish mind had been so hostile. The centre of the apostle's theology is the Redeemer, the medium of all spiritual blessing. The relation of his expiatory work to sinners is described by *ὑπέρ* (ii. 12; iii. 18); or it is said he bore our sins—*τὰς ἁμαρτίας ἀνέθηκεν*; or died *περὶ ἁμαρτιῶν*. 'The sprinkling of blood' and the 'Lamb without spot' were the fulfilment of the old economy, and the grace and salvation now enjoyed were familiar to the prophets (i. 10). Christ who suffered is now in glory, and is still keeping and blessing his people.

In fine, the object, as told by the author (v. 12), is twofold. 'I have written briefly, exhorting' (*παρακαλῶν*); and the epistle is hortatory—not didactic or polemical; 'and testifying (*ἐπιμαρτυρῶν*) that this is the true grace of God wherein ye stand.' The true grace of God—*ἀληθὴς χάρις*—

could not be doctrine imparted through the apostle's personal teaching. Some of the fathers, indeed, affirm that Peter visited the provinces specified in this epistle. Origen gives it as a probable conjecture; and Eusebius says that the countries in which Peter preached the doctrine of Christ appear from his own writings, and may be seen from this epistle. The assertion has thus no basis, save in the idea that Peter must have preached in the churches to which he sent an epistle. Jerome repeats the statement, and Epiphanius, as his wont is, intensifies it; but it has no foundation. Nay the apostle, by a change of person, distinguishes himself from 'them that have preached the gospel unto you' (i. 12). So that the 'true grace' in which those churches stood was the gospel which they had heard from others, and especially from Paul, by whom so many of them had been founded. The epistle, then, becomes a voucher for the genuineness of the gospel preached in Asia Minor by the apostle of the uncircumcision. Not that, as Schwegler supposes, it attempts to mediate between James and Paul; for it proclaims the same truths, touching the peculiar aspects common to the two, without any dilution of Paul's distinctive forms, or any modification of Peter's as given in his oral addresses—both being in inner harmony, and differing only in mode of presentation, caused by mental diversity, or suggested by the peculiar circumstances, tendencies, or dangers of the churches which were warned or addressed.

*Style.*—The epistle is characterised by its fervour. The soul of the writer stamped its image on his thoughts and words—*ὁ πανταχοῦ θερμὸς* is the eulogy of Chrysostom. The epistle bears his living impress in his profound emotions, earnest convictions, and zealous thoroughness. He was never languid or half-hearted in what he said or did, though the old impulsiveness is chastened; and the fire which often flashed up so suddenly is more equable and tranquil in its glow. He is vivid without vehemence, and hurries on without impetuosity or abruptness. The epistle is throughout hortative, doctrine and quotation being introduced as forming the basis or warrant or as showing the necessity and value, of practical counsel or warning. There is in it little that is local or temporary; it is suited to the church of all lands and ages; for believers are always in the present time 'strangers and sojourners,' with their gaze fixed on the future, exposed to trial and borne through by hope. The apostle infuses himself into the epistle, portrays the emotions which swayed and cheered him, as he reveals his own experience, which had been shaped by his past and present fellowship with a suffering and glorified Lord. What he unfolds or describes never stands apart as a theme by itself to be wrought out and argued; nor is it lifted as if to a lofty eminence that it may be admired from afar; but all is kept within familiar grasp, and inwrought into the relations, duties, and dangers of everyday Christian existence. The truths brought forward are treated not in themselves, but in their immediate bearing on duty, trial, and hope; are handled quite in the way in which one would describe air and food in their essential connection with life.

The language, though not rugged, is not without embarrassment. Ideas are linked together often by a relative pronoun. There is no formal development of thought, though the order is lucid and logical. Some word employed in the previous

sentence so dwells in his mind that it suggests the sentiment of the following one. The logical formulae are wanting—*οὐν* not preceding an inference, but introducing a practical imperative, and *ὅτι* and *γάρ* not rendering a reason, but prefacing a motive conveyed in some fact or quotation from Scripture. Thoughts are re-introduced, and in terms not dissimilar. What he has to say, he must say in words that come the soonest to an unpractised pen. In short, we may well suppose that the apostle wrote under the pressure of the injunction long ago given to him—‘When thou art converted, strengthen thy brethren;’ and this divine mandate might be prefixed to the epistle as its motto.

Jac. et Pet.*, 1815; Steiger, *der erste Brief Peter ausgelegt*, 1832; De Wette, *Kurze Erklärung*, ed. Brückner, 1853; Huther in *continuation of Meyer's Kommentar*, 2 ed., 1859; Wiesinger, in *continuation of Olshausen's Biblischer Kommentar*, 1856; Lecoultrre, *sur la 1 Ep. de Pierre*, 1839; Theodor Schott, *der 1 Brief Petri erklärt*, 1861. *Practical*, Kohlbrügge, *Predigten*; Besser, *die B. St. Petri in Bibelstunden*, 1854. In English—Byfield's *Sermons*, 1637; Nisbet, *Brief Exposition*, 1658; Leighton, *Practical Commentary*, 1693; Brown, *Expository Discourses*, 2d ed. 1849.

PETER, SECOND EPISTLE OF.—The genuineness of this second epistle has long been disputed, though its author calls himself ‘Simon Peter,’ *δοῦλος καὶ ἀπόστολος*, ‘a servant and an apostle of Jesus Christ.’ It is hard to say whether the alleged quotations from it by the Fathers are really quotations, or are only, on the one hand, allusions to the O. T., or, on the other, the employment of such phrases as had grown into familiar Christian commonplaces. Thus Clement of Rome, in his First Epistle to the Corinthians, chap. vii., says of Noah, *ἐκήρυξε μετάνοιαν*, and of those who obeyed him, *ἐσώθησαν*, language not unlike 2 Pet. ii. 5; but the words can scarcely be called a quotation. The allusion in the same epistle to Lot (chap. xi.) is of a similar nature, and cannot warrant the allegation of any proof from it. A third instance is usually taken from chap. xxiii., in which Clement says, ‘miserable are the doubleminded,’ a seeming reminiscence of James i. 5; but adds, we are grown old, and none of those things have happened to us (*γεγηράκαμεν καὶ οὐδὲν ἡμῖν τούτων συμβέβηκεν*), as if in allusion to 2 Pet. iii. 4. The appeal to Hermas is as doubtful, in Lib. i, Vis. iii. 7, the words *reliquerunt viam veram* have a slight resemblance to 2 Pet. ii. 15; in another place (I. iv. 3) the clause, *qui effugistis sæculum hoc*, is not a citation of *ἀποφύγοντες τὰ μύσματα τοῦ κόσμου*, 2 Pet. ii. 20. Justin Martyr says, ‘a day with the Lord is as a thousand years’ (*Dialog. cum Tryph.*, cap. 81; *Opera*, ii. p. 278., ed. Otto, Jenae 1843), but the clause may as well be taken from Ps. xc. 4 as from 2 Pet. iii. 8. Similar statements occur twice in Irenæus, and have probably a similar origin, as citations from the O. T. The epistle is not quoted by Tertullian, the Alexandrian Clement, or Cyprian who speaks only of one epistle. A passage in Hippolytus (*De Antichristo*, ii.), in asserting of the prophets that they did not speak ‘by their own power’ (*ἐξ ἑαυτῶν δυνάμεως*), but

uttered things which God had revealed, appears to be a paraphrase of 2 Pet. i. 21. Another statement made by Theophilus, in which he describes the prophets as *πνευματοφόροι πνεύματος ἁγίου*, is not unlike 2 Pet. i. 20, *ὑπὸ πνεύματος ἁγίου φερόμενοι* (*Ad Autolyicum*, lib. ii. p. 87). Theophilus again describes the word shining as a lamp in a house—*φάτων ὥσπερ λύχνος ἐν οἰκίᾳ*; but the figure is different from that in 2 Pet. i. 19, *ὡς λύχνος φάινοντι ἐν ἀνυχμῇ τόπω*—‘as a light shining in a dark place.’ Clement of Alexandria commented, we are told by Eusebius and Cassiodorus, on all the canonical Scriptures, Eusebius specifying among them ‘Jude and the other catholic epistles’—*καὶ τὰς λοιπὰς καθολικὰς ἐπιστολάς* (*Hist. Eccles.* vi. 14). But a second statement of Cassiodorus mentions expressly the first epistle of Peter, as if the second had been excluded, and adds, ‘1 and 2 John and James,’ thereby also excluding Jude, which Eusebius, however, had distinctly named (*De Institut.*, cap. viii.) The testimony of Origen is no less liable to doubt, for it seems to vary. In the translation of Rufinus, who certainly was not a literal versionist, we find the epistle at least three times referred to, one of them being the assertion, ‘Petrus enim duabus epistolarum suarum personat tubis’ (*Hom. iv.* on Joshua). In Homily iv. on Leviticus, 2 Pet. i. 4 is quoted, and in Homily xiii. on Numbers, ii. 16 is quoted. Somewhat in opposition to this, Origen, in his extant works in Greek, speaks of the first epistle as *ἐν τῇ καθολικῇ ἐπ.*; nay, as quoted by Eusebius (*Hist. Eccles.* vi. 25), he adds that ‘Peter left one acknowledged epistle,’ adding—*ἔστω δὲ καὶ δευτέραν ἀμφιβάλλεται γάρ*. This is not a formal denial of its genuineness, but is tantamount to it. Nor can the words of Firmilian be trusted in their Latin version. Yet in his letter to Cyprian he seems to allude to 2 Peter, and the warnings in it against heretics (Cyprian's *Opera*, p. 126, ed. Paris 1836). In a Latin translation of a commentary of Didymus on the epistle it is called *falsata, non in canone*. Now Falsare, according to Du Fresne in his *Glossar. med. et infim. Latinitat.*, does not mean to interpolate, but to pronounce spurious. Eusebius has placed this epistle among the *ἀντιλεγόμενα* (*Hist. Eccles.* iii. 25), and more fully he declares ‘that called his second epistle we have been told has not been received, *οὐκ ἐνδιάθετον*; but yet appearing to many to be useful it has been diligently studied with the other Scriptures.’ Jerome says explicitly, *Scripsit duas epistolas . . . quarum secunda a plerisque ejus esse negatur*; adding as the reason, *propter styli cum priore dissonantiam*, and ascribing this difference to a change of amanuensis, *diversis interpretibus* (*De Script. Eccles.* cap. i, epist. cxx., ad Hedib. cap. xi.) Methodius of Tyre makes two distinct allusions to a peculiar portion of the epistle (iii. 6, 7, 12, 13), the conflagration and purification of the world (Epiphan. *Hæres.* lxiv. 31, tom. I, pars post., p. 298, ed. Oehler 1860). Westcott (*On the Canon*, p. 57) points out a reference in the martyrdom of Ignatius, in which (cap. ii.) the father is compared to ‘a divine lamp illuminating the hearts of the faithful by his exposition of the holy Scriptures’ (2 Pet. i. 19). The epistle is not found in the Peshito, though the Philoxenian version has it, and Ephrem Syrus accepted it. The canon of Muratori has it not, and Theodore of Mopsuestia rejected it. But it was received by Athanasius, Philastrius, Cyril, Rufinus, and Augustine. Gregory of Nazianzum, in

his *Carmen* 33, refers to the seven catholic epistles. It was adopted by the council of Laodicea 367, and by the council of Carthage 397. From that period till the Reformation it was acknowledged by the church. Not to refer to other quotations often given, it may suffice to say that though the epistle was doubted, it usually had a place in the canon; that the objections against it were not historical, but critical in nature, and had their origin apparently among the Alexandrian scholars; and that in one case at least, that of Cosmas Indicopleustes, doctrinal prepossessions led to its rejection. Gregory, at the end of the 6th century, seems to allude to others whose hostility to it had a similar origin, adding,—*si ejusdem epistolæ verba pensare voluissent, longe aliter sentire potuerant.* (See Olshausen, *Opuscula*, where the citations are given at length.) The old doubts about the epistle were revived at the time of the Reformation, and not a few modern critics question or deny its genuineness. In earlier times strong disbelief was expressed by Calvin, Erasmus, Grotius, and Salmasius. Scaliger, Semler, Credner, De Wette, Neander, and Mayerhoff, deny its Petrine origin. Pott, Windischmann, Dahl, Gausson, and Bonnet, on the other hand, make light of many objections to it. But the proofs adduced on its behalf by Dietlein (*der 2 Ep. Petri*, 1851) are many of them unsatisfactory, the result of a dexterous and unscrupulous ingenuity on behalf of a foregone conclusion. Yet amidst early doubts and modern objections we are inclined to accept this epistle, and to agree with the verdict of the early churches, which were not without the means of ample investigation, and to whom satisfactory credentials must have been presented.

The objections, as Jerome remarks, were based on difference of style, and we admit that there is ground for suspicion on the point. Still no doubter or impugner who placed the epistle among the *ἀντιλεγόμενα* gives any historical ground for his hostility. No one of old is ever brought forward as having denied it in his own name, or in the name of any early church, to be Peter's. If the apostolic fathers do not quote it, it can only be inferred either that it was not in universal circulation, or that they had no occasion to make any use of it. Their silence would not warrant the assertion that the epistle was not in the canon during their period, and for half a century afterwards. The earliest impugnors never speak of it as a book recently admitted into the canon, or admitted on insufficient evidence or authority. One objection of this nature would have been palpable and decisive. It may be added that there appears to be no probable motive for a forgery. Neither personal ambition nor ecclesiastical pretensions are in any way forwarded by the epistle. There is nothing in it that an apostle might not have written, nothing that comes into direct conflict with Peter's modes of thought, either as recorded in the Acts or as found in the first epistle. No little circumstantial evidence can be adduced in its favour, and its early appearance in the canon is an element of proof which cannot be easily turned aside.

There are points of similarity in style between it and the first epistle. The salutation in both epistles is the same, and there are peculiar words common to both, though found also in other parts of the N. T. Both epistles refer to ancient prophecy (1 Pet. i. 16; 2 Pet. i. 20, 21); both use *ἀπερὶ* as applicable to God (1 Pet. ii. 9; 2 Pet. i. 3);

and both have *ἀπὸθεός* (1 Pet. iii. 21; 2 Pet. i. 14), which occurs nowhere else in the N. T.; *ἀναστροφή* is a favourite term (1 Pet. i. 15, 17, 18; ii. 12; iii. 1, 2, 16; 2 Pet. ii. 7-18; iii. 11); the verb *ἐποπτεύειν* in 1 Pet. ii. 12, iii. 20, corresponds to the noun *ἐπόπτης* (2 Pet. i. 16); the peculiar collocation *ἀσπίλος καὶ ἁμώμος* (1 Pet. i. 19) has an echo of itself (2 Pet. ii. 13; iii. 14); *πέπνυνται ἁμαρτίας* (1 Pet. iv. 1) is not unlike *ἀκαταπαύστοις ἁμαρτίας*, etc. (2 Pet. ii. 14). We have also, as in the first epistle, the intervention of several words between the article and its substantive (2 Pet. i. 4; ii. 7; iii. 2). The frequent use of *ἐν* in a qualifying clause is common to both epistles (2 Pet. i. 4; ii. 3; iii. 10). The recurrence of similar terms marks the second epistle, but it is not without all parallel in the first. Thus, 2 Pet. i. 3, 4, *δεωρημένης, δεδώρηται*; ii. 7, 8, *δίκαιος*, three times; ii. 12, *φθοράν, ἐν τῇ φθορᾷ καταφθαρῆσονται*. So, too, in 1 Pet. iii. 1, 2, *ἀναστροφῆς, ἀναστροφή*; and ii. 17, *τιμῆσατε, τιμᾶτε*, etc. Then too, as in the first epistle, there are resemblances to the speeches of Peter as given in the Acts. Comp. *ἡμέρα κυρίου* (iii. 10) with Acts ii. 20—the phrase occurring elsewhere only in 1 Thess. v. 24; *λαχοῦσιν* (i. 1), with *ἐλαχε* (Acts i. 17); *εὐσεβελαν* (i. 6), with Acts iii. 12; and *εὐσεβεῖς* (ii. 9), with Acts x. 2-7; *κολαζομένους δο.* with Acts iv. 21—an account which Peter probably furnished. We have likewise an apparent characteristic in the double gentives (2 Pet. iii. 2; Acts v. 32).

It is also to be borne in mind that the epistle asserts itself to have been written by the apostle Peter, and distinctly identifies its writer with the author of the first epistle—'This epistle now, a second, I write unto you, in both which I stir up'—averring also to some extent identity of purpose. It is not anonymous, like the epistle to the Hebrews, but definitely claims as its author Peter the apostle. Nay, the writer affirms that he was an eye-witness of the transfiguration, and heard 'the voice from the excellent glory.' He uses, moreover, two terms in speaking of this event, which belong to the account of it in the gospels; comp. i. 13, *σκηνώματι*, with his own words *σκηνὰς τρεῖς*; also in 15, *ἔξοδον*, in reference to his own death—the same word being employed to denote Christ's death, *τὴν ἔξοδον αὐτοῦ*, this being the theme of conversation on the part of Moses and Elias (Luke ix. 31). Ullmann supposes the reference in the words *δίκαιον δὲ ἡγοῦμαι διεγείρειν* (i. 13) to be to Mark's gospel said to have been composed on Peter's authority; but the allusion seems to be to the paragraph immediately under his hand. It would have been a profane and daring imposture for any one to personate an apostle, and deliver to the churches a letter in his name, with so marked a reference to one of the most memorable circumstances and glories in the apostle's life. A forgery so glaring could make no pretence to inspiration,—to be a product of the Spirit of Truth. The inspiration of the epistle is thus bound up with the question of its authorship, so that if it is not the work of Peter it must be rejected altogether from the canon.

There are serious difficulties, however, in the way of its reception; and these are usually said to be difference of style, difference of doctrine, and the marked correspondence of portions of the epistle with that of Jude. Yet Gausson makes the astounding statement—'The two epistles when carefully compared reveal more points of

agreement than difference,' but he has not taken the trouble of noting them (*On the Canon*, p. 359). The employment of *ὡς* is different in the second epistle from the first. There, though it occurs otherwise, it is generally employed in comparisons, and its frequency makes it a characteristic of the style; but it occurs much more rarely in the second epistle, and usually, though not always, with a different meaning and purpose. The use of *ἀλλά* after a negative clause and introducing a positive one, is common in the first epistle, and but rare in the second. There are many *ἅπαξ λεγόμενα* in the second epistle. The first and second epistles differ also in the use of *Χριστός*. In the first epistle *Χ.* stands in the majority of instances without the article and by itself, either simply *I. X.* or *X. I.*; but in the second epistle it has usually some predicates attached to it (i. 1, 2, 8; ii. 14-16). The name *θεός* occurs nearly forty times in the first epistle, but only seven times in the second. Again, *κύριος* is applied to Christ only once in the first epistle (i. 3), but in the second epistle it is a common adjunct to other names of the Saviour. In the first epistle it means the Father in all cases but one (ii. 3), but in the second epistle it denotes the Son, in harmony with Peter's own declaration (Acts ii. 36; x. 36). The epithet *σωτήρ*, so often applied to Christ in the second epistle, is not found in the first. The second coming of our Lord is also expressed differently in the two epistles, *ἀποκάλυψις*, or its verb, being used in the first epistle (i. 5, 7, 13; iv. 13; v. 1); or it is called *τὸ τέλος πάντων* (v. 7); or *χρόνοι ἔσχατοι* (i. 20). But in the second epistle it is called *ἡμέρα κρίσεως* (ii. 9), *παρουσία* (iii. 4), *ἡμέρα κυρίου* (iii. 10), *ἡμέρα θεοῦ* (iii. 12). These are certainly marked diversities, and it is difficult to offer any explanation of them. It may, however, be replied, that with the sacred writers the divine names are not used, as with us, without any prominent or distinctive application. In the first epistle the Redeemer's names are his common ones, the familiar ones in the mouths of all believers—for the writer brings into prominence the oneness of believers with him in suffering and glory; with him still as Jesus wearing his human name and his human nature with all its sympathies; or as the Christ who, as the Father's servant, obeyed, suffered, and was crowned, the Spirit that anointed him still being 'the unction from the Holy One' to all his people. In the second epistle the writer has in view persons who are heretics, rebellious, dissolute, false teachers; and in warning them his mind naturally looks to the authority and lordship of the Saviour, which it was so awful to contend and so vain to oppose. If the last day be set in different colours in the two epistles, the difference may be accounted for on the same principle; for to those suffering under trial it shines afar as the hope that sustains them, but to those who are perverse it presents itself as the time of reckoning which should alarm them into believing submission.

The aspects under which the gospel is represented in this second epistle differ from those in the first. The writer lays stress on *ἐπίγνωσις*, or *γνώσις* (i. 2, 3, 5, 8; ii. 20, 11; iii. 18). In this epistle the gospel is generally *Χριστοῦ δύναμις καὶ παρουσία* (i. 16), *ὁδὸς τῆς δικαιοσύνης* (ii. 21), *ἀγία ἐντολή*, etc.; whereas the first epistle throws into prominence *ἐλπίς*, *σωτηρία*, *ῥαντισμὸς αἵματος* I. X., *χάρις* (i. 10) *ἀλήθεια* (i. 22), *λόγος* (ii. 8), *πίστις*, etc.

The answer may be ventured that the persons addressed in the second epistle were in danger of being tempted into error; and that a definite and progressive knowledge of Christianity was the safeguard against those loose speculations which were floating around them. On this account, too, we have admonition suggested and pointed by their perilous circumstances—to 'make their calling and election sure' (i. 10; iii. 14); nay the purpose of the epistle seems to be given in iii. 17—'Ye therefore, beloved, knowing beforehand, take heed lest being led away with the error of the lawless, ye fall away from your own steadfastness, but grow in grace and in the knowledge of our Lord and Saviour Jesus Christ.' The *ἐπίγνωσις* is the grand theme of counsel and the real prophylactic presented, for it embodies itself in that *δικαιοσύνη* on the possession of which so much depends, as is seen in the allusions to Noah and Lot, and to the want of which are traced in contrast the judgment of the flood and the fate of Sodom, the selfish character of Balaam, and the dark and deceitful ways and works of the false teachers.

There is also a characteristic difference in the mode of quotation from the O. T. Quotations are abundant in the first epistle, either formally introduced by *διότι γέγραπται* (i. 16), or by *διότι περιέχει ἐν τῇ γραφῇ* (ii. 6), or are woven into the discourse without any prefatory statement, as if writer and readers were equally familiar with them (i. 24; ii. 3, 4, 5, 7, 9, 10, 22, 24, 25; iii. 9, 10, 11, 15). But in the second epistle quotations are unfrequent, though we have Ps. xc. 4 in iii. 8, and Is. lxxv. 17 in iii. 13. Of a different kind are the allusions to Noah and the flood, to Lot and Sodom, and to Balaam. But we may still reply that the modes of handling and applying the O. T. may differ according to the purpose which any writer has in view. In a longer and fuller epistle there may be quotations at length, but in a shorter only apposite allusions to facts and incidents. The objection would have been stronger if in an epistle ascribing itself to Peter there had been no use made of the O. T. at all; but a third of this epistle consists of references to the O. T. or to warnings drawn from it.

The peculiar similarity of a large portion of this epistle to that of Jude has been often commented on. The second chapter and portion of the third are so like Jude that the resemblance cannot be accidental, for it is found in words as well as thoughts. It has been conjectured by some that both borrowed from a common source. Bishop Sherlock supposed that this source was some ancient Hebrew author who had portrayed the false teachers, Jude having used the epistle of Peter as well as this old authority (*Use and Intent of Prophecy*, Dissert. i. p. 200, Lond. 1725). Herder and Hasse holding this theory conjecture the document common to both writers to be the Zend-avesta. This opinion has no foundation, and relieves us of no difficulty. Others imagine that Jude followed Peter, and several reasons have been alleged in favour of this opinion by Mill, Michaelis, Storr, Dahl, Wordsworth, Thiersch, Heydenreich, Hengstenberg, and Gausson. Their general argument is that Peter predicts what Jude describes as actually existing (Jude 18), and that Jude refers to prophecies which are found only in Peter. But it is really doubtful if both epistles refer to the same class of errorists. Those described by Peter are

rather speculatists, though their immoral practices are also noted, while those branded by Jude are specially marked as libertines and sensualists, whose life has perverted and undermined their creed. Others again hold that Peter took from Jude; such is the view of Hug, Eichhorn, Credner, Neander, Mayerhoff, De Wette, Guericke, and Bleek. One argument of no small force is that the style of Jude is the simpler and briefer, and Peter's the more ornate and amplified; that Jude's is more pointed and Peter's more indefinite; and that some allusions in Peter are so vague that they can be understood only by a comparison with Jude (comp. 2 Pet. ii. 4; Jude 6; 2 Pet. ii. 11; Jude 9). Thus Peter says, generally, 'angels bring not railing accusations'; Jude gives the special instance, Michael and Satan. Peter speaks of the 'angels that sinned'; Jude more precisely, they 'kept not their first estate, but left their own habitation.' Olshausen and Augusti in part think that the similarity may be accounted for by a previous correspondence between the writers; that Jude may have described to Peter the character and practices of the false teachers, and that Peter, relying on the truthfulness of the statement, made his own use of it without hesitation when he had occasion to refer to the same or a similar class of pernicious subverters of truth and purity. This hypothesis is scarcely probable, and it is more likely that Peter had read the epistle of Jude, and reproduced in his own epistle and in his own way its distinctive clauses, which must have deeply impressed him, but with such differences at the same time as show that he was no mere copyist. Is it unworthy of an apostle to use another writing divinely authorised, and can Peter's appropriation of so much of Jude's language be stigmatized, as by Reuss, as *offenbares plagiat*? Thus Jude uses the phrase 'clouds without water,' but Peter 'wells without water,' this figure being more suited to his immediate purpose. The *σπιδάδες* of Jude 12 was from reminiscence of sound before Peter's mind, but it is changed of purpose into *σπιδαι*; and Jude's phrase *ἐν ταῖς ἀγῶναις ὑμῶν* becomes in the same connection in Peter *ἐν ταῖς ἀπάταις αὐτῶν*. 2 Pet. ii. 17 shows a like similarity and difference compared with Jude 13. The claim of originality thus lies on the side of Jude, while original thinking characterises Peter's use of Jude's terser and minuter diction. There is no ground for Bertholdt's suggestion to reject the second chapter as spurious; or for Ullmann's, to refer both second and third chapters to a post-apostolic period; or for Lange to brand as spurious the whole of the second chapter with the last two verses of the first chapter, and the first ten verses of the third—that is, from the first *τοῦτο πρῶτον γινώσκοντες* to the other; or for Bunsen to receive only the first twelve verses and the concluding doxology (Bertholdt, *Einleit. in N. T.*, vol. vi.; Ullmann, *der zweite Brief Petri*; Lange, *Apostol. Zeitalter*, i. 152, and in Herzog's *Encyclop.* sub voce; Bunsen, *Ignatius von Antiochien*, p. 175).

Other objections against the epistle may be briefly alluded to. According to Mayerhoff (*Einleit.*, p. 187) the writer in iii. 2 separates himself from the apostles; Bleek (*Einleit.*, p. 576) and others supposing that he intended to characterise himself as an apostle, and having before him the somewhat parallel expression of Jude, he so far altered it, but in the alteration has failed to give lucid utterance to his purpose. The phrase, with the

double genitive *καὶ τῆς τῶν ἀποστόλων ὑμῶν ἐντολῆς τοῦ κυρίου*, naturally means, 'and the commandment of the Lord given by your apostles.' The pronoun *ὑμῶν* is the best sustained reading, and the English version does violence to the position of the words. As Olshausen and Windischmann have shown, the use of *ὑμῶν* does not exclude Peter, even though it be rendered 'the commandments of your apostles of the Lord Jesus.' In fact, it neither denies nor affirms his apostleship; though if *ἡμῶν* had been employed, and the phrase rendered 'our apostles,' the conclusion against its genuineness would certainly have some weight. But this objection that the writer excludes himself from the apostles neutralizes another, to wit, that the writer betrays too great anxiety to show himself as the apostle Peter. He could not certainly do both in the same document without stultifying himself. Does not the apostle Paul when it serves his object use pointedly the first person singular, refer to himself, and assert his apostolic office as Peter does, in i. 12, 13, 14, 15? The use of the name *Συμεῶν* in i. 1 can neither tell for the genuineness, as Dietlein supposes, nor against it, as Mayerhoff argues. The reference in iii. 1 to a former epistle is not for the purpose of identifying himself with the author of that epistle, but naturally comes in as a proof of his anxiety for his readers that they should bear in memory the lessons already imparted to them.

Three arguments have been adduced to prove that the epistle must belong to post-apostolic times. 1. It is alleged that the doubts about Christ's second coming, referred to in iii. 3, 4, could not have arisen in apostolic times, when the belief in it was so firm and glowing, and a period of some length must have elapsed ere it could be said that the fathers had fallen asleep.' But the scoffers referred to were probably Gnostics who never believed that event, or at all events spiritualized the truth of it away; and after one generation had passed they might use the language imputed to them; or 'the fathers' may denote the Jewish patriarchs, since whose decease uniformity had characterised all the processes and laws of nature. The Gnostic spiritualism which treated the resurrection as past early troubled the church, and its disciples might cast ridicule on the faith and hopes of others in the challenge which Peter quotes.

2. It is said that the allusion to Paul's epistles indicates a late date, as it supposes them to be collected in part at least, and calls them by the sacred name of *γραφὰς* (iii. 15, 16). But surely it may be granted that toward the close of Peter's life several epistles of Paul may have been brought together and placed in point of authority on the same level as the O. T.; and that other documents also—*τὰς λοιπὰς γραφὰς*, already occupied a similar place. Whatever exegesis be adopted, this is the general result. The writings of Paul, so well known to the readers of this epistle, are mentioned not as a completed whole; the phrase *ἐν πάσαις*, etc., is not to be taken absolutely, but relatively, as if denoting 'in all his epistles which he writes.' The 'things' referred to as discussed in these epistles (*περὶ τούτων*) are not their general contents, but the coming of our Lord and the end of the world, and in these discussions 'are some things hard to be understood.' The allusion certainly presupposes a late age, and the writer, as he informs us, was very near his death. The date of

Peter's death is not precisely known, and the common traditions concerning it may therefore be modified. As Alford says, a later date than the usual one may be assigned to it.

3. Again, it is held, as by Neander, that the epithet 'holy mount,' as applied to the hill of transfiguration, indicates a late period, for Zion only was so designated; and Mayerhoff affirms that the epithet suits Mount Zion alone. But the scene on which the glory of Jesus had been so displayed might many years afterwards be well called 'holy' by one who was an eyewitness, when he referred to it as a proof and symbol of 'the power and coming of the Lord Jesus.'

Still, while a partial reply may be given to objections based on difference of style and of doctrinal representation, it must in honesty be added that these differences are not all of them wholly accounted for. The style and matter, as a whole, are so unlike the first epistle, that one has considerable difficulty in ascribing both epistles to the same author. While there is similarity in some words or phrases, the spirit, tone, and manner of the whole epistle are widely diverse. Minute criticism may discover ἀπας λεγόμενα, and arrange them in proof parallel to similar usage in the first epistle; but such minutiae do not hide the general dissimilitude. It may be argued, and the argument is not without weight, that a forger would have imitated the salient peculiarities of the first epistle. No one of ordinary critical discernment would have failed to attempt the reproduction of its characteristic features of style and thought. But the absence of such studied likeness is surely in favour of the genuineness. It may be added also, that as there are in the first epistle statements so peculiar to it as to be found nowhere else, the same speciality in what seems to be undesigned coincidence marks the second epistle in the declarations of its third chapter. It would have been difficult in the 2d century to have imposed on the churches a second epistle forged in Peter's name, and so unlike in many points to his first. A direct imitation of his style might have deceived some of the churches by its obvious features of similitude, but the case is widely different when a writing so obviously unlike the first epistle won its way into circulation unchallenged in its origin and history, and was not doubted save at length by scholars and mainly on critical grounds. Why did not Origen and others tell us of the time of its first appearance, and how and by whom it was placed in the canon? Possibly on such points they were ignorant, or at least they knew nothing that warranted suspicion. Still the difference of manner between the two epistles remains, and perhaps one might account for it, as Jerome has hinted and Calvin has supposed, by the supposition that Peter dictated the epistle in Aramaic, and that the amanuensis was left to express the thoughts in his own forms and phrases. Difference of condition and purpose may account for difference of topic, and the change of style may be ascribed to the Greek copyist and translator. The genuineness of the epistle has been maintained more or less decidedly by Michaelis, Nitzsche, Flatt, Angusti, Storr, Dahl, Hug, Heydenreich, Lardner, Windischmann, Guericke, Thiersch, Stier, Dietlein, Hofmann, Luthardt, Brückner, and Olshausen. Feilmoser and Davidson incline to the same side. These are great names, and though we agree with their

opinion, we cannot venture to say, with Bonnet, that 'of all the books of the N. T. which have been controverted at certain times, there is not one whose authenticity was so certain as the second epistle of Peter' (*Nouv. Test.*, Introd., vol. ii. p. 701, Geneva 1852).

When and where the epistle was written cannot be definitely known. The place was Rome in all probability; for Peter, after coming to Rome, did not, so far as we know, leave that city till his death. His death is usually placed in 64, but it may have been later, and this epistle was written just before it. Mayerhoff ascribes it to a Jewish Christian of Alexandria about the middle of the second century. Huther places it in the last quarter of the first century or the beginning of the second.

The persons for whom the epistle is intended are 'those who have obtained like precious faith with us;' and iii. 1 identifies them with those addressed in the first epistle. It is objected that this epistle asserts that Peter had taught them in person—such not being the case with those addressed in the first epistle. But the phrase adduced—ἐγγυπλισαμεν ὑμῖν, i. 16, 'we made known unto you'—seems to refer not to oral discourse, but to various portions of the first epistle in which the coming and glory of Christ are dwelt on. The object of the epistle is to warn against 'false teachers,' 'bringing in damnable heresies,' 'denying the Lord that bought them,' holding a peculiar demonology—covetous, sensual, and imperious apostates, the victims and propagators of antinomian delusion. Probably they taught some early form of Gnostic error, which, denying the Lord's humanity and atoning death, ridiculed his second advent in man's nature, set aside the authority of law, and by this effrontery justified itself in licentious impurity. The false teachers were like the 'false prophets,' perhaps claiming divine basis for their teachings, and therefore the more able to shake the faith of others, and seduce them into perilous apostasy. So that, in brief, as he himself describes it (iii. 17), his object is, first, warning, or to caution his readers against seduction; 'beware lest ye also, being led away with the error of the wicked, fall from your own steadfastness'—προγυγνῶσκοντες—'as ye know those things beforehand,' that is, from his descriptive accounts; and secondly, counsel, or to urge on them, as the best of all antidotes to apostasy, to 'grow in grace and in the knowledge of our Lord and Saviour Jesus Christ.' For this χάρις and γνώσις would fortify them and make them invincible against those assaults which so often succeeded with the unwary who fell in their heedlessness, the graceless who trusted in their own strength, and the ignorant or half-informed, so liable from their partial knowledge to be imposed upon by any system that dealt in novel speculations, professed to unfold mysteries, or give license and warrant for lawless practices. The supposition of Grotius, that it was written in the reign of Trajan against the Carpocratians, and by Simeon, bishop of Jerusalem, is without any probability, as Bertholdt has more than sufficiently shown. The arguments of Schwegler for its place as Rome, its date the end of the 2d century, and its purpose as an effort to conciliate Petrine and Pauline theological differences, are answered conclusively by Huther. The contents of the epistle have been generally referred to in the previous parts of the article. It may only now be noticed that the description of the

origin and constitution of the globe in the third chapters is in harmony with the Mosaic cosmogony, and that its destiny as there predicted is in keeping with many facts and disclosures in geology. 'In omnibus epistolæ partibus,' says Calvin, 'spiritus Christi majestas se exserit.'

Among commentaries may be mentioned Bede's *Exposition*, Works, vol. xii., ed. Giles, London 1844; Luther, *Epistel Petri ausgelegt*, Wittenberg 1524; Gerhard, *Commentarius*, 1641; Semler, *Paraphrasis*, 1784; Thomas Smith, *Commentarius*, London 1690; Morus, *Praelect.*, 1794; Pott, in the *Editio Koppiana*; Ullmann, *der Zweite Brief B. Petri*, etc., 1822; Dietlein, *der Zweite Brief Petri ausgelegt*, 1851; Huther, in continuation of Meyer, 1852; De Wette, ed. Brückner, 1853; Wiesinger, in continuation of Olshausen, 1862. In English, Nisbet, *Brief Exposition*, 1658; Simson, *Commentary*, 1632; Thomas Adams, *Commentary*, 1633; Dr. John Brown's *Parting Counsels*, an exposition of the first chapter, Edinburgh 1856.—J. E.

PETERS, CHARLES, was born in Cornwall and educated at Exeter College, Oxford. He became rector of St. Mabyn's, Cornwall, in 1727, and died there in 1777. He was the author of an able and learned work on Job, entitled, *A Critical Dissertation on the Book of Job, wherein the account given of that book by the author of the Divine Legation of Moses demonstrated, is particularly considered; the antiquity of the book vindicated, the grand text (chap. xix. 25) explained; and a future state shown to have been the popular belief of the ancient Hebrews*, Lond. 1751, 4to. This work, although occasioned chiefly by Warburton's *Legation*, and in part a reply to it, is principally independent in its criticism of the book of Job, and is useful and valuable as throwing much light on all the subjects which it investigates. Its author holds to the theory that Job was himself the author of the book. Peters also published *An Appendix to the Critical Dissertation on the Book of Job; giving a further account of the Book of Ecclesiastes, etc.*, Lond. 1760.—W. J. C.

PETHEN (פֶּתֶן), a species of serpent. The word is generally rendered by *asp* in the A. V. (Deut. xxxii. 33; Job xx. 14, 16; Is. xi. 8), twice by *adder* (Ps. lviii. 5; xci. 13). From these passages it appears that the pethen was a venomous snake, which the charmers had not succeeded in bringing under their influence, and which is consequently said to be *deaf* (Bochart, *Hieroz.*, bk. iii. ch. 6). It is identified by Bochart with the *aspis* of the ancients, but there is uncertainty as to the species to which this is to be referred. Forskal describes a small serpent which he calls *Batan* (the *Coluber lebetina* of Linn.) as one foot long, the body spotted with black and white, ovoviviparous, and exceedingly poisonous. It is the *Naja hajè* of more recent naturalists; and is probably the *aspis* of the ancients, and the *Pethen* of Scripture.—W. L. A.

PETHOR (פֶּתוֹר; Φαθουρά), the native place of Balaam, the prophet, described by Moses as situated 'upon the river;' that is, the Euphrates (Num. xxii. 5); and also as in 'Aram Naharaim,' or Mesopotamia (Deut. xxiii. 4). It is not elsewhere mentioned in the Bible, nor does the name occur in classic writings. It is worthy of note that the word is omitted both in the LXX. and Vulgate versions of

Deuteronomy. The Vulgate in Numbers renders it *ariolum*, 'soothsayer,' and applies it to Balaam. *Misit . . . ad Balaam filium Beor ariolum*. This appears to be the meaning of the Hebrew word, from פֶּתֶר, *explicavit*; but the context shows clearly that Moses used it as the proper name of a place.—J. L. P.

#### PETRA. [SELAH.]

PFAFF, CHRISTOPHER MATTHEW, born at Stuttgart in 1686; was in 1699 admitted bachelor in the University of Tübingen, where his father was professor of theology. In 1702 he pronounced a discourse in Samaritan before the administrators of the theological school. At eighteen he began to preach and give lessons in theology. He afterwards travelled in Germany, Holland, and England, at the expense of the Duke of Wurtemberg; and extended his knowledge by intercourse with Rabbis and other learned men, from one of whom he acquired the Ethiopic language. Being appointed to travel with the hereditary Prince of Wurtemberg as his tutor and almoner, he received holy orders at Stuttgart in 1708, and accompanied the prince to Turin, where he drew out of their obscurity several important MSS., some of which he copied. On his return from his travels, honours and dignities—both civil and ecclesiastical—were showered upon him. He died in 1760 Chancellor of the University of Giessen, and Dean of the Faculty of Theology. His erudition was immense, and his works so numerous that they fill a whole sheet of the German bibliographies. 1. *The Bible known among the German Protestants as the Bible of Tübingen*, was published under his direction in one volume folio, in 1729. He also published, in 1709—2. *Dissertatio Critica de Genuinis librorum Novi Testamenti lectionibus*, Amsterdam 1709, in 8vo. His other works do not bear directly on Biblical literature. Among them may be mentioned—3. *Demonstrations Solides de la vérité de la Religion Protestante contre la religion prétendue Catholique*, Tübingen 1713, 1719. 4. *Institutiones Theologicae dogmaticae et morales*, Tübingen 1719, 8vo, Francfort 1721, 8vo. 5. *Institutiones historiae ecclesiasticae*, Tübingen 1721, 8vo, and a second enlarged edition in 1727, 8vo—a concise and methodical abridgment. 6. *Dissertatio de pacto inter Deum Patrem et Filium a Ludovico Molino confecto*, Tübingen 1726-27.—M. H.

PFEIFFER, AUGUSTUS, born 1640 at Lauenburg in Lower Saxony. After studying in various places, he took his degree of Master of Arts at Wittenberg, and was made one of the professors of its university. In 1671 he became Dean of Medzibor in Silesia, and afterwards attained to other honours and emoluments, till, having taken his doctor's degree in 1681, he became successively Archdeacon of St. Thomas' at Leipsic, ordinary professor of Oriental languages, and professor extraordinary of theology. He died in the office of superintendent at Lubeck in 1690. Pfeiffer was one of the most skilful philologists of his day. He is said to have known seventy languages. His library was rich in Hebrew, Arabic, Coptic, Armenian, Persian, and Chinese MSS.; and he left many learned works, of which we may mention—1. *Dubia vexata Scripturæ Sacrae sive loca difficiliora Vet. Test., circa quæ auctores dissident vel hærent, adductis et modestè expensis aliorum sententiis, succinctè decisa, tamque dilucide expedita, ut cuius de*

*vero sensu et diversis interpretamentis constari facile queat necnon ebraica atque exotica Novi e suis fontibus derivata*, etc., Leipsic 1685, 4to, ibid. 1713. The execution of this work is not inferior to its promise. At the end are dissertations on the *Conversation between Cain and Abel*; on *Enoch*; on the *primitive language*; on the *Seraphim*; on the *qualification given to Joseph*; on the *Shiloh*; on the *Vow of Jephtha*; on a passage of the 22d Psalm according to the Hebrew; on the *name of Jesus*; on the *Galilean dialect of Peter*. 2. *Hermeneutica Sacra, sive legitima Sacras literas interpretandi ratio*, Leipzig 1694, 8vo. 3. *Antiquitates ebraice selecte unde quamplurimis Scripturæ locis facula accenditur*, Leipsic 1687, 12mo; an excellent little work with ingenious solutions of several difficult passages of Scripture. 4. *Critica Sacra, quæ agit de Sacra codicis partitione, editionibus variis, etc., cui subjunguntur tractatus quatuor*—(1.) *de Antiquis ritibus Ebraeorum*; (2.) *de Naturâ, usu, et subsidiis linguarum orientalium omnium*; (3.) *de compendiariâ ratione legendi Scripta rabbinico-talmudica*; (4.) *de accentuatione tam prosaicâ quam metricâ facile descendâ*, Leipzig 1680, 8vo, Dresden 1680, 8vo—a work full of erudition; (5.) *Prælectiones in prophetiam Jonæ*, Wittenberg 1671 and 1706, Leipzig 1686, 4to; commended by Rosenmüller. 6. *Synopsis nobiliorum atque selectiorum e philologâ sacrâ questionum*, Wittenberg 1667, 12mo. All these works, and some others, are collected in two vols. 4to, published at Utrecht in 1704, with the title *Opera philologica*.—M. H.

PFEIFFER, JOACHIM EHRENFRIED, was born at Güstrow, Sept. 6, 1709. He studied at Rostock and Stralsund, in the former of which he took his master's degree in 1730, and delivered a course of lectures on Hebrew literature. After spending some years at Jena, first as a student and then as a teacher of philosophy, he was in 1743 appointed second ordinary professor of theology in the recently established University of Erlangen. Along with the duties of his chair he undertook, in 1744, those of the pastorate of the old town of Erlangen; and in 1745 the superintendence of the gymnasium at Bayreuth. In 1748 he became first professor of theology. He died Oct. 18, 1787. He is chiefly remembered as the author of a work which appeared first under the title *Elementa Hermeneutica universalis*, etc., Jenæ 1743, 8vo, but which was subsequently enlarged and published under the title *Institutiones Hermeneuticæ sacræ veterum atque recentiorum et proprias quasdam præceptiones complexa*, Erlang. 1771, 8vo. An outline of the contents of this book is given by Davidson, *Hermeneutics*, p. 695.—S. N.

PHALTI (פִּלְטִי, for פִּלְטִיָּה, *deliverance of Jehoshuah*; Sept. Φαλτι). 1. The head of the children of Benjamin sent as one of the spies to search the land of Canaan (Num. xiii. 9; A. V. Palti). 2. The son of Laish, to whom Saul gave Michal, David's wife (1 Sam. xxv. 44). When David became king he made the restoration of his wife the condition of his receiving Abner into favour; and Phalti (called here Phaltiel, פִּלְטִיָּהֵל) was compelled to yield her up, which he did with much regret (2 Sam. iii. 13-15).—†

PHARAOH (פֶּרַעֲוֶה; Sept. Φαραώ), the general title of the kings of Egypt in the O. T., and found

only there and in the writers who have drawn from that source. It often stands simply like a proper name (Gen. xii. 15; xxxvii. 36; xl. 2, *seq.*; xlv. 1, *seq.*; and so generally throughout the Pentateuch, and also in Cant. i. 9; Is. xix. 11; xxx. 2). 'King of Egypt' is sometimes subjoined to it (1 Kings iii. 1; 2 Kings xvii. 7; xviii. 21); and sometimes also the more specific designation, or real proper name of the monarch is indicated, as Pharaoh Necho (2 Kings xxiii. 33), Pharaoh Hophra (Jer. xlv. 30). Josephus intimates that the word signifies 'the king' in the Egyptian language (*Antiq.* viii. 6. 2). This is apparently confirmed by our finding the word 'king' written in the dialect of Memphis  $\text{OPO}$ , *ouro*, and with the masculine article  $\text{POPO}$ , *piouro* (Jablonsky, *Opusc.* i. 374; Peyron, *Lex. Copt.*, p. 150). The idea has, however, been more recently started that Pharaoh corresponds to the Egyptian  $\Psi\text{-PH}$ , *phm*, 'the sun,' which is written as an hieroglyphic symbol over the titles of kings (Rosellini, *Monument. Storici*, i. 117; Lepsius, *Lettre à Rosellini*, p. 25; Wilkinson, *Anc. Egyptians*, iv. 287). It seems to us that this explanation might be admitted without contradicting the other, seeing that it is not only possible, but highly probable, that the Egyptians should make the name of the sun a royal title, and that at length custom rendered it equivalent to 'king.' The practice of ancient, and, indeed, modern Oriental kings, of associating the idea of their own dignity with the glory of the sun, is well known.

1. The first Pharaoh mentioned in Scripture is in connection with the history of Abraham (Gen. xii. 10-20). In the uncertainty which hangs over early Egyptian chronology it is impossible to identify this prince with precision. It is probable, however, that he was one of the shepherd kings, who were of a Semitic race. Mr. Poole concludes that he was Salatis or Saïtas, the first king of the 15th dynasty, whose reign commenced B.C. 2080.

2. *The Pharaoh of Joseph* (Gen. xxxvii. 36, *seq.*) is supposed by Bunsen to be Sesertesen I., the head of the 11th dynasty, but Mr. Poole contends that this would place Joseph's history at too early a date, and is besides rendered improbable by the fact that Sesertesen I. was a native Egyptian prince who would hardly under any circumstances have elected a Hebrew slave to such eminence of dignity and favour as Joseph received. It is more probable that he was one of the shepherd kings; and there is reason to believe that Eusebius is right in calling him Apophis, who appears to have been the fifth or sixth king of the 15th dynasty.

3, 4. *The Pharaoh who oppressed the Israelites* is by Bunsen and others supposed to have been Rameses II., and his son Menephthah (Men-ptah = Ἀμενόψις), *the Pharaoh of the exode*. But there is little evidence for this beyond the statement of Manetho; and the date thus assigned to the exode is much too late. Mr. Poole thinks that the oppressor of the Israelites was probably a foreigner of Assyrian descent, and refers to Is. lii. 4 in corroboration of his opinion.

5. *Pharaoh the father-in-law of Mered*. [BITHIAH; MERED.]

6. *Pharaoh the father-in-law of Hadad*. Hadad was one of those who rose up against Solomon, and being defeated by him fled to Egypt, where he married the sister of Tahpanhes, the queen of

the Pharaoh. [HADAD.] It is not probable that this Pharaoh was the one whose daughter Solomon married; he may have been his predecessor, in which case he was Phinakes or Osochor of the 21st dynasty.

7. *Pharaoh the father-in-law of Solomon.* This was probably Pusemes II., a king of the 21st dynasty.

8. *Pharaoh the ally of the Jews against Sennacherib* (Is. xxxvi. 6). By many this 'king of Mizraim' is supposed to be the same person who appears as Tirhakah, king of Cush (2 Kings xix. 9), and So, king of Mizraim (2 Kings xvii. 4), and they identify him with Sevech II., the Sabacon of Herodotus (ii. 137, ff.), who reigned about 715 B.C. But others think the person styled Pharaoh was different from Tirhakah and So, and is to be identified with the Sethos of Herodotus (ii. 141).

9. *Pharaoh who besieged Gaza* (Jer. xlvii. 1). This can be none other than Psammetichus I. (Herod. ii. 157), who reigned contemporaneously with the last years of Manasseh, the reign of Amon, and the early years of Josiah.

10. *Pharaoh Necho.* [NECHO.]

11. *Pharaoh Hophra.* [HOPHRA.]

(See Bunsen, *Ægyptens Stelle*, translated by Cottrell, and his *Bibelwerk*, i. 225, ff.; the article *Egypt* in the *Encyclopædia Britannica*, and the art. *Pharaoh* in Smith's *Dict. of the Bible*, by Mr. Stuart Poole; and art. MANETHO in this work.)

PHAREZ (פָּרֶז; Sept. Φαρές), the elder of the twin sons of Judah by his daughter-in-law Tamar (Gen. xxxviii. 29). In the genealogical lists Pharez ranks as the second son of Judah next to Shelah, and his two sons Hezron and Hamul take the place of Judah's sons Er and Onan, who died without issue, and whose names were apparently blotted out from amongst the descendants of Jacob. From Pharez came the sept of the Pharizites (Num. xxvi. 20), one of the most numerous in the tribe, and rendered specially illustrious by being that from which sprang David and the kings of Judah, and eventually the Messiah. [GENEALOGY OF JESUS CHRIST.] It was divided into two branches, the Hamulites and the Hezronites, in the latter of which was the royal line.—W. L. A.

PHARISEES (פְּרוּשִׁים, Aramaic form פְּרוּשִׁין; N. T. and Joseph. Φαρισαῖοι, *Pharisæi*, more properly *Perushim* or *Perushin*), one of the three sects or orders of Judaism in the time of Christ, the other two being the *Essenes* and the *Sadducees*.

1. *Name of the Sect, and its signification.*—The name Φαρισαῖος = *Pharisee* is the Greek form of the Hebrew פָּרוּשׁ (passive of פָּרַשׁ, to separate, plur. פְּרוּשִׁים, Aramaic פְּרוּשִׁין), and properly denotes one who is separated, i. e., by special practices; or, as the *Aruch* (s. v.) defines it, 'one who separated himself from Levitical impurity and Levitically impure food' (comp. also *Talmud*, *Chagiga*, 18 b; *Sabbath*, 13 a). The derivation of it from פָּרַשׁ, to separate, to unfold, to explain, and the assertion that the followers of this sect were called *Pharisees* = interpreters of the Bible, in contradistinction to the *Sadducees*, who adhered to the letter of the Scriptures, as well as the more generally received notion that they were so called because they separated from the rest of the people, believing themselves to be more holy, are at variance with the most ancient and most authentic

authorities upon this subject. Besides, to take פָּרוּשׁ as interpreter is contrary to its grammatical form, which, as *transitive*, ought to be פָּרַשׁ. Of course the separation from that which was Levitically impure necessarily implied separation from those who were defiled by Levitically impure objects. It must be observed that the name *Pharisees* is given to them in the Mishna (*Jebamoth*, iv. 6, etc.) by their opponents the *Sadducees*, and that the names by which they were designated among themselves are חכמים, *sages*, or more modestly

תלמידי חכמים, *disciples of the sages*, but more generally חבֵּרִים, *associates*. By the term *Pharisees*, פְּרוּשִׁים, or its equivalent *Chaberim*, חבֵּרִים, i. e., *associates*, is therefore meant all those Jews who separated themselves from every kind of Levitical impurity, and united together to keep the Mosaic laws of purity. As it was natural that all the students of the law would, as a matter of course, be the first to join this association, the appellation חבֵּר, *member, associate*, or פָּרוּשׁ, *Pharisee*, became synonymous with *student, disciple, lawyer, scribe*, whilst those who refused to unite to keep the laws were regarded as עַם הָאָרֶץ, *country people, common people, illiterates, irreligious*.

2. *The qualifications for membership of the Pharisaic association.*—The most essential conditions which were exacted from every one who wished to become a *Chaber* or member of the Pharisaic association were two. Each candidate was required to promise in the presence of three members that—(i.) He would set apart all the sacred tithes on the produce of the land, and refrain from eating anything which had not been tithed, or about the tithing of which there was any doubt; and (ii.) He would scrupulously observe the most essential laws of purity which so materially affected the eating of food, and all family affairs. To understand these laws, which may seem trivial and arbitrary, as well as to see the extraordinary influence which they exercised upon the whole religious and social life of the Jewish nation in all its ramifications, the following facts must be borne in mind:—The Mosaic law enjoins that besides the (תרומה) priestly heave-offering every Israelite is annually to give to the Levites a tithe of all the produce (Num. xviii. 21-24), which the Jewish canons call the *first tithe* (מעשר ראשון); that a *second tithe* (מעשר שני), as it is termed in the same canons, is to be taken annually from the produce to Jerusalem, either in kind or specie, and consumed by the owner in the metropolis in festive celebration (Deut. xii. 5-18), and that every third year this second tithe is to be given to the poor (Deut. xiv. 28, 29), whence it is denominated the *poor tithe* (מעשר עני) in the ancient canons. Moreover, as each seventh year was a Sabbatic or furrow year, which yielded no harvest, it was fixed that in the first, second, fourth, and fifth years of the septennial cycle the *second tithe* is to be eaten by the owner in Jerusalem, whilst in the third and sixth years it is to be distributed among the poor, and be the *poor tithe*. When it is remembered that these tithal laws, which were originally enacted for Palestine, were in the post-exile period extended to Egypt, Ammon, Moab, and to every land in which the Jews had possessions, that they had more of a religious than civil import, that the portion of produce reserved as tithes was *holy*, that the eating of *holy things* was a deadly sin, and that the non-separation of the tithes

rendered the whole produce unlawful, thus affecting every article of food, the paramount importance of the first condition which the Pharisees, who were the conservators of the divine law, exacted from the candidates for fellowship will readily be understood (comp. *Bechoroth*, 30 b).

Of equal importance, and equally affecting the whole fabric of social and religious life, are the Mosaic laws upon the strength of which the second condition was exacted. These laws, which so rigidly enforce the eschewing of unclean food and defiling objects, even without the amplifications and expansion which obtained in the course of time, extend to and affect almost every action in public life, and every movement in family intercourse. Thus not only are numbers of animals proscribed as food, but their very carcasses are branded as unclean, and he who touches them is temporarily defiled, and pollutes every one and every thing wherewith he comes in contact (Lev. v. 2; xi.) A man that has an issue not only defiles everything upon which he lies, sits, or which he touches, but his very spittle is polluting (Lev. xv. 1-13). The same is the case with a man who comes in contact with a corpse (Num. xix. 14-22), with a woman in menstruum and child-birth (Lev. xii. 1-8; xv. 19-31), and with a husband after conjugal intercourse (*ibid.*, xv. 18). Individuals thus defiled were forbidden to come into the sanctuary (Num. xix. 20), and were visited with the severe punishment of excision if they ate the flesh of peace-offering (Lev. vii. 20, 21). Now the slightest reflection upon the workings of these laws will show that thousands upon thousands were daily unclean according to the Mosaic institutions, that these thousands of unclean men and women legally defiled myriads of people and things by contact with them, either wittingly or unwittingly, and that it therefore became absolutely necessary for those who were conscientiously desirous of discharging their religious duties in a state of legal purity to adopt such precautionary measures as would preclude the possibility of violating these laws. Hence the Jewish canons ordained that since one does not know whether he has been defiled by contact with any unclean person or thing, every *Chaber* (חבר) or member of the Pharisaic association is 'to wash his hands before eating his ordinary food, second tithes, or the heave-offering; to immerse his whole body before he eats the portions of holy sacrifices; and to bathe his whole body before touching the water absolving from sin, even if it is only his hands which are unclean. If one immersed himself for ordinary food, and designed it only for ordinary food, he could not eat second tithes; if he immersed for second tithes, and meant it only for second tithes, he could not eat of the heave-offering; if he immersed for the heave-offering, and meant by it the heave-offering, he was not allowed to eat the portions of the holy sacrifice; if he immersed for the holy sacrifice, and meant it for the holy sacrifice, he could not as yet touch the water absolving from sin; but he who immersed for the more important could share in the less important' (*Mishna, Chagiga*, ii. 5, 6). This gave rise to four degrees of purity, and to four divisions in the Pharisaic associations, so that every *Chaber* (חבר) or member belonged to that rank whose prescriptions of purity he practised. Each degree of purity required a greater separation from the above-named Mosaic defilements. The impure subjects themselves were

termed *the fathers of impurity*, that which was touched by them was designated *the first generation of impurity*, what was touched by this again was called *the second generation of impurity*, and so on. Now ordinary food, the first degree of holiness, became impure when touched by the second generation; heave-offering, the second degree of holiness, became defiled when touched by the third generation; the flesh of sacrifices, the third degree of holiness, when coming in contact with the fourth generation, and so on. These degrees of purity had even to be separated from each other, as the lower degree was impure in respect to the higher one. The same removal, both from defilement without and the different gradations within, was required of each member of the Pharisaic order corresponding to the degree to which he belonged. Hence 'the garments of an *Am Ha-Aretz* [for a publican, a sinner, as he is termed in the N. T., who neglected to pay the tithes and observe the laws of Mosaic purity] defile the Pharisee [*i.e.*, him who lived according to the first degree of purity], the garments of a Pharisee defile those who eat of the heave-offering [*i.e.*, the second degree], the garments of those who eat the heave-offering defile those who eat the sacred sacrifices [*i.e.*, the third degree], and the garments of those who eat the sacred sacrifices defile those who touch the water absolving from sin [*i.e.*, the fourth degree]' (comp. *Mishna, Chagiga* ii. 7 with *Taharoth* vii. 5).

The above-mentioned two conditions exacted from candidates for membership of the Pharisaic association are thus expressed in the *Mishna*:—'He who takes upon himself to be conscientious, tithes whatever he eats, and whatever he sells, and whatever he buys, and does not become the guest of an *Am Ha-Aretz* [*i.e.*, a non-Pharisee]; . . . and he who takes upon himself to become a member of the Pharisaic association must neither sell to an *Am Ha-Aretz* moist or dry fruit, nor buy of him moist fruit, nor become the guest of an *Am Ha-Aretz*, nor receive him as guest, in his garments, into his house (*Demai* ii. 2, 3, with *Matt.* xxiii. 23; *Luke* xvii. 12). It is in accordance with this regulation that Christ enjoins that an offender is to be regarded 'as an heathen man and publican' (*Matt.* xviii. 17), that the apostle Paul commands 'not to eat' with a sinner (1 *Cor.* v. 11), and it is for this reason that Christ was upbraided by the Pharisees for associating and eating with publicans and sinners (*Matt.* ix. 9-11; xi. 19; *Mark* ii. 16; *Luke* v. 30; vii. 34), with the neglectors of tithes and the transgressors of the laws of purity, which was not only in violation of the then prevailing Pharisaic and national law, but contrary to the Mosaic enactments. But he came to teach that, 'not that which goeth into the mouth [*i.e.*, untithed food or edibles handled by Levitically unclean persons] defileth a man, but that which cometh out of the mouth, this defileth a man' (*Matt.* xv. 11); and that it is not outward washing but inward purity which is acceptable, for which reason 'he sat down to meat with a Pharisee, and did not first wash before dinner' (*Luke* xi. 37-40); which, as we have seen, was in contravention of the very first degree of purity among the association. It must, however, be remarked, that the Jews were not peculiar in their laws of purity and defilement. Other nations of antiquity had similar statutes. Thus, amongst the ancient Indians, one who had

an issue was obliged to bathe and pray to the sun (*Manu*, ii. 181); among the Hierapolytans in Syria, every inmate of the house in which a death took place was thirty days unclean, and could not go to the temple during that time (Lucian, *de Syr. dea*, 53); the Greeks, too, were defiled by contact with a corpse, and could not resort to the temple (Theophrast., *Charact.*, 16; Eurip., *Iphig. Taur.*, 367; Diog. Laer., viii. 33); both the Parsees and the Greeks regarded a woman in childbirth as unclean (Kleuker, *Zend-Avesta*, iii. pp. 222, 223; Eurip., *Iphig. Taur.*, 367); and 'no Egyptian would salute a Greek with a kiss, nor use a Greek knife, spits, cauldrons, nor taste the meat of an ox which had been cut by a Greek knife. They drank out of bronze vessels, rinsing them perpetually. And if any one accidentally touched a pig he would plunge into the Nile without stopping to undress' (*Herodot.* ii. 37, 41, 47).

3. *The tenets and practices of the Pharisees.*—To state the doctrines and statutes of the Pharisees is to give a history of orthodox Judaism; since Pharisaism was after the return from the Babylonish captivity, and is to the present day, the national faith of the orthodox Jews, developing itself with and adapting itself to the ever-shifting circumstances of the nation. Of the other two sects, viz., the Essenes and the Sadducees, the former represented simply an intensified form of Pharisaism [ESSENES], whilst the latter were a very small minority. The Pharisees, as the erudite Geiger has conclusively shown, were the democratic party, the true representatives of the people, whose high vocation they endeavoured to develop by making them to realise, both in their practices and lives, that 'God has given to all alike the kingdom, priesthood, and holiness' (2 Maccab. ii. 17); in opposition to the small cast of the priestly aristocracy of Sadducees, who set the highest value upon their spiritual office, and who, by virtue of their hereditary rights, tried to arrogate everything to themselves, and manifested little sympathy with the people at large. Hence the Pharisaic enactments were such as to make the people realise that they were a *people of priests*, a *holy nation*, that by becoming a diligent student of the law, and by preparing one's-self for the office of a Rabbi or teacher, every such person, though not literally of the priestly cast, may be a priest in spirit, and occupy quite as important and useful a position as if he were actually of the Aaronic order, and even arrange his mode of life according to the example of those who minister in holy things. Thus the very name *חֲבֵר*, *étrapla*, which in olden times denotes a *priestly fraternity* (Hos. iv. 17; vi. 9), and was so used by the Jews on the Maccabean coins (*חֲבֵר הַיְּהוּדִים*),\* was adopted by the Pharisees for their

lay association. Their social meals were invested with a solemn character to resemble the social meals of the priests, made up from the sacrifices in the Temple. If the priests took care that the sacrifices which they offered up, and portions of which constituted their social meal, especially on the Sabbath and festivals, should be clean and without blemish, the Pharisees too took the utmost precaution that their meals should be free from the different degrees of defilement; they washed before partaking thereof, recited prayers before and after the repast, had a cup of blessing and offered incense. It is only from this point of view that some of the differences between the Pharisees and the Sadducees can be explained; as, for instance, the *ideal connection of places* for Sabbath purposes, called *עֵרֹב*, adopted by the former and rejected by the latter. In consequence of the rigorous laws about the observance of the Sabbath (Exod. xvi. 29; Jer. xvii. 21, with Neh. xiii. 15, etc.), it was enacted that no Israelite is to walk on the Sabbath beyond a certain distance, called a Sabbath day's journey, nor carry anything from one house to another. The Sadducees, or priestly party, who celebrated their meals on the Sabbath in different places, could go from one place to another, and carry to and fro anything they liked, because they regarded these meals as constituting part of their priestly and sacrificial service, which set aside the sanctity of the Sabbath. Now the Pharisees, who made their Sabbath repast to resemble the priestly social meals, had to encounter difficulties arising from the rigorous Sabbath laws. The distance which they had sometimes to walk to join a company in the social meal was more than a Sabbath day's journey; the carrying from one place to another the things requisite for the solemnities was contrary to the enactments about the sanctity of the day. Hence they contrived the *ideal connection of places* (*עֵרֹב*), which was effected as follows:—Before the Sabbath commenced (*i. e.*, Friday afternoon), an article of food was deposited by each member in the court selected for the social gathering, so that it might thereby become the common place for all; the streets were made to form one large dwelling-place with different gates, by means of beams laid across on the tops of the houses, and doors or gates put in the front; and meals were put in a house at the end of the distance permitted to walk, in order to constitute it a domicile, and thus another Sabbath day's journey could be undertaken from the first terminus. By this means the Pharisees could evade the law, and, like the priests, meet together in any place to celebrate their social meals on the Sabbath, and carry anything that was wanted for

and of whose idolatrous associations they are prohibited to become members (*חֲבֵר הַבְּזִי*). Hence the severest thing that Hosea could say against the kingdom of Israel was that *they formed themselves into associations in joining idols* (*חֲבֵר עֲצָבִים*, iv. 17), and that they are a *priestly association* (*חֲבֵר כֹּהֲנִים*, vi. 9). At the restoration of the state, however, this Semitic appellation was also used by the Jews in an honourable sense, and was given to the priestly senate. Hence we find the legend on the so-called Maccabæan coins the conjoint governing senate (*חֲבֵר הַיְּהוּדִים*) side by side with the high-priest (*Urschrift und Uebersetzungen der Bibel*, p. 121, etc.)

\* Comp. Levy, *Jüdische Münzen*, p. 50, etc., Leipzig 1862; Madden, *History of Jewish Coinage*, p. 54, etc., London 1864. [MONEY.] The erudite Geiger rightly remarks that 'the neighbouring Semitic nations, and especially the Phœnicians, also designated such priestly associations who shared in the government of the people by the appellation *חֲבֵר*, *étrapla*, and that in the earlier Biblical period these priestly fraternities of the neighbouring people are described as *oneirocritics*, *soothsayers*, etc., in whose revelries and social sacrificial feasts the Jews are forbidden to partake (Prov. xxi. 9; xxv. 24),

its sacred festival, as they had three common meals on the Sabbath (שלוש סעודות). On the Friday eve the entrance of the Sabbath was greeted with a cup of wine, or the cup of blessing, over which every member recited benedictions (קידוש), expressing the holiness of the day as well as the holiness of Israel, whom God sanctified to himself and made a people of priests, a royal nation, whereupon the sacred and social meal was eaten. The second meal was eaten on noon of the Sabbath, and the third began with the setting sun, and in the middle of it the Sabbath departed. When lights were kindled, a blessing was again pronounced

over a cup of wine (הברכה), and burning incense was offered up to accompany the exit of the holy day, which was regarded as a departing friend.

The paschal meal was the model for these social and sacred repasts. But the light in which this very model sacrifice is to be viewed was a point of dispute between the priestly party or the Sadducees and the Pharisees. Because the paschal lamb formed the social meal of the laity, the priestly party maintained that it is not to be regarded as a sacrifice for the congregation, urging in support of their notion the fact that the lambs were not numerically fixed like the other sacrifices in the Temple, but were regulated according to the number of families, and that they must therefore be viewed simply as family sacrifices, to be eaten by the respective owners, and must not set aside the sanctity of the Sabbath, *i. e.*, ought not to be offered on the 14th of Nisan, if the first day of the Passover falls on the Sabbath. Hillel, however, or the Pharisaic party whom he represented, succeeded in carrying their point, and in putting the sacred but private offerings of the Passover on an equality with the Temple sacrifices, and it was ordained, in opposition to the priestly party, that they are to set aside the sanctity of the Sabbath; thus making the social family meal of the laity, which the Passover constituted as sacred as the fraternal meal of the priests, consisting of the sacred sacrifices offered in the Temple (*Jerusalem Pesachim*, cap. vi.; *Babylon Pesachim*, 66 a; Geiger, *Jüdische Zeitschrift*, ii. 42, *seq.*, Breslau 1863). Having carried this point, the Pharisees also gave to their meals of the Sabbath and other holy days a sacrificial character after the model of the Passover.

As a people of priests and kings, the Pharisees considered themselves the guardians of the divine law and the ancestral customs, trusting implicitly that he who selected them to be his peculiar people would protect and shield them and theirs from all outward dangers which threatened the state. They were firmly penetrated by the conviction that as long as they were faithful to their God no power on earth, however formidable, would be permitted successfully to ravish his holy heritage. Hence they repudiated the time-serving policy of the aristocratic Sadducees, who maintained that a man's destiny was in his own hands, and that human ingenuity and state-craft ought to be resorted to in political matters. The noble motto of the Pharisees was, that 'everything depends upon God except a man's piety, which he, as a free being, can

show to the Greeks that his brethren had philosophical sects similar to their schools, he declares that they ascribe all to fate and God (Φαρισαῖοι εἰμαρμένῃ καὶ θεῷ προοράντων πάντα, *de Bell. Jud.* ii. 8. 14, with *Antiq.* xviii. 1. 4). The objections urged against this overruling Providence in all things, based upon the apparent absence of retributive justice in human dealings, as exhibited in the sufferings of the righteous and in the prosperity of the wicked, the Pharisees confronted with the doctrine of a future state, where the righteous judge will requite every man according to his deeds, whether they be good or evil, and where all present inequalities will be rectified. 'The reward of the righteous will assuredly be in the world to come' (*Aboth*, ii. 16). Hence the constant admonition to avoid that which is sinful and to remember the tribunal in the world to come. 'Heed three things and thou wilt eschew transgression; remember what is above thee, the all-seeing eye and the all-hearing ear, and that all thy deeds are written down in a book' (*Aboth*, ii. 1). 'Attend to three things and thou shalt not come to transgression; know whence thou comest, whither thou shalt one day go, and before whom thou must give an account of thyself. Thou comest from an offensive drop; thou goest to a place of dust, worms, and decay; and thou must give an account of thyself before the tribunal of the King of kings, blessed be he' (*Aboth*, iii. 1). 'Those that are born are to die, those that die are to rise again, those that rise again are to be judged. Know, therefore, teach it, and be assured that he is the Omnipotent; he is the Former, the Creator, the Omniscient; the Judge, the witness, and the prosecutor; and he will pronounce the sentence. Blessed be he, before his tribunal there is no injustice, no forgetfulness, no respect of persons, and no acceptance of a bribe, for everything is his. Know also that everything is to be accounted for; let not, then, thine evil lusts persuade thee that the grave is a place of refuge for thee' (*Aboth*, iv. 22).

With such serious views of time and eternity, the Pharisees led a temperate life, renouncing both excessive riches and immoderate pleasure, and striving above all to acquire a knowledge of that law, and to practise those precepts, which shall fit them for the life to come, as may be seen from the following declaration: 'The more flesh on the body the more worms [when it is dead], the more riches the more cares, the more wives the more witches, the more handmaids the more unchastity, the more man-servants the more robbery; but the more meditation in the divine law the better the life, the more schooling the more knowledge, the more counsel the more intelligence, the more benevolence the more satisfaction; he who acquires a good name acquires it for himself in this world, but he who acquires a knowledge of the divine law acquires for himself life in the world to come' (*Aboth*, ii. 17). In aiding the people to realise their high vocation, and to prepare themselves for the kingdom of heaven by obedience to the divine law, the Pharisees endeavoured to facilitate that obedience by putting a mild interpretation upon some of the rigorous Mosaic enactments, and to adapt them to ever-changing circumstances. Thus

either cultivate or neglect' (הכל בידי שמים הין) מיראת שמים; *Berachoth*, 33 b; *Nidah*, 16, 72). It is this which Josephus means when, wishing to

they explain the expression נבלה, *carcase*, in Lev. vii. 24, literally, and maintain that the statute in the verse in question only declares *the flesh of*

an animal which was torn and died a natural death to be defiling by contact, but not the skin, bones, etc.; and that, besides the human corpse and the dead bodies of a few reptiles in which the skin and flesh are to a certain extent identical, the skin and bones of all animals, whether clean and legally slaughtered for meat, or unclean and dying accidentally, do not defile, but may be made up into parchment, different utensils, etc. The haughty and aristocratic Sadducees, on the other hand, who stood on their priestly dignity, and cared little for

the comforts of the people, took the term נבלה in the unnatural sense of *an animal approaching the condition of becoming a carcase*, i. e., being so weak that it must soon expire, and maintained that an animal in such a condition may be slaughtered before it breathes its last; that its flesh must then be considered as a carcase, and is defiling, whilst the fat, skin, bones, etc., may be used for diverse purposes (*Jerusalem Megilla*, i. 9; *Babylon Sabbath*, 108 a). It requires but little reflection to perceive how materially and divergently these different views must have affected the whole state of society, when it is remembered that according to the Sadducees the touching of any book written upon the parchment made from the skin of an unclean animal, or contact with one of the numerous utensils made from the leather, bones, veins, etc., of animals not Levitically clean and not legally slaughtered, imparted defilement. Again, the Pharisees, with a due regard for the interests of the people, and following the requirements of the time, explained the *right of retaliation*, 'eye for eye, tooth for tooth, hand for hand, foot for foot,' etc. (Exod. xxi. 23, etc.), as requiring pecuniary compensation, while the Sadducees took it literally (*Baba Kama*, 83 b, 84 a, b; *Megillath Taanith*, cap. iv., *Tosephta*). The same consideration for the spiritual and temporal wellbeing of the people led the Pharisees to enact that in cases of danger, when the prescribed prayers cannot be offered, they are to offer a short prayer as follows:—'Do thy will in heaven above, and give peace of mind to those who fear thee on earth, and whatsoever pleaseth thee do. Blessed art thou, O Lord, who hearest prayer!' (*Berachoth*, 29 b). What a striking resemblance between this and some parts of the Lord's prayer! It was this humane and pious care for the interests of the people which made the Pharisees so popular and beloved, and accounts for the remark of Josephus that they had such influence with the multitude that if they said anything against a king or a high-priest they were at once believed (*Antiq.* xiii. 10. 5).

4. *Origin, development, and classes of the Pharisees*.—After the return from the Babylonish captivity the priesthood formed the centre of the new religious life, and the pious in Israel who were anxious to practise the commandments of the Lord naturally attached themselves to the divinely-appointed and time-honoured tribe of Levi. Besides the keeping pure from intermarriage with heathen, great and vital importance was attached to the setting aside of the soil and Temple taxes (Neh. x. 33, 36, etc.; *Ecclus.* vii. 31; *xlvi.* 20; *Tobit* i. 6; *v.* 13; *Judith* xi. 13; *i Maccab.* iii. 49), to the due observance of the Sabbath (Neh. x. 31; *xiii.* 19), the three pilgrim festivals, viz., the Passover (2 *Chron.* xxx. xxxv.; *Ezra* vi. 19-22), Pentecost (*Tobit* ii. 1), and Tabernacles (Neh. viii. 14), as well as the Sab-

batic year (Neh. x. 31; *i Maccab.* vi. 49, 53), and the abstinence from unclean food. He who allied himself to the national party with the solemn resolve to keep those ancestral laws divinely given to the nation, was called 'one who had separated himself unto them from the impurity of the country

people' (הנבדל מנוי הארץ אלהים, *Ezra* vi. 21), or 'one who had separated himself for the law

of the Lord from the country people' (הנבדל מנוי

הארץ אל תורת האלהים, *Ezra* ix. 1; *x.* 11; *Neh.*

*ix.* 2; *x.* 28). Hence the phrase נבדל מן obtained during this period a party signification. This name became the standing appellation for those who had thus separated themselves for the service of God, and continued the conservators of their ancestral religion, as may be seen from the taunt of the anti-national party, who warned them to join the Greek party, telling them in the days of the Maccabees that 'since we have separated from them (ἐξωρισθη-

μεν ἀπ' αὐτῶν, the translation of נבדל) many evils have come upon us' (*i Maccab.* i. 11). Those who yielded to the temptation, and, relinquishing the national party, joined the antinational portion, were denominated (התערב) the mixed (*Ezra* ix. 1) or (ערב) the mixture (*Neh.* xiii. 3). Hence the period before Alcimus was afterwards regarded as the *non-mixture* (ἀμιξία), whilst his own was looked upon as the mixture (ἐπιμύξ, *2 Maccab.* xiv. 3, 38). Afterwards, when the priestly party, or the Sadducees, who were at first the centre of the national movement, assumed a haughty position, stood upon their sacerdotal dignity, cared little for the real spiritual and temporal wants of the people, but only sought their own aggrandisement and preservation, allying themselves for this purpose with foreign nations, and espousing antinational sentiments, the real national portion of the people united themselves more firmly than ever, independently of the priests, to keep the law, and to practise their ancestral customs; and it is this party whom the opposite section called by the Aramaic name פרושין = *Φαρισαῖοι*, instead of its original Hebrew equivalent נבדלים, the separated (*Ezra* vi. 21; *ix.* 1; *x.* 11; *Neh.* ix. 2; *x.* 28).

With the definitions and explanations of such an extensive and gorgeous ritual as that of the Mosaic law, with the application and adaptation thereof to all the vicissitudes of the commonwealth, with the different degrees of holiness and uncleanness attached to the performance or neglect of each precept and rite, with the diverse dispositions and idiosyncrasies of the multitude about the respective merits of outward observances and a corresponding inward feeling, the Pharisees would have been superhuman if they had escaped the extravagances which in the course of time have more or less developed themselves in the established religions based upon a more spiritual code and a less formal ritual. To quote the enactment 'that the flesh of quadrupeds must not be cooked or in any way mixed with milk for food,' deduced from injunctions in *Exod.* xxiii. 19; *xxxiv.* 26; *Deut.* xiv. 21; or the enactment about 'the compulsory recitation of the *Shema* twice a day,' i. e., the declaration about the unity of the Deity (*Deut.* vi. 4-9) at a stated time; or the discussion on 'the lighting candles on the eve of the Sabbath,' which is the duty of every Jew; or 'the interdict to eat an egg

which had been laid on any feast day, whether such day was or was not the day after the Sabbath,' and to draw the conclusion therefrom, as is done by Mr. Plumptre in Smith's *Dictionary of the Bible*, s. v. *Pharisees*, that 'it certainly seems a degradation of human intelligence to exercise it on matters so trifling and petty,' and that 'viewed as a whole the Pharisees treated men like children, formalizing and defining the minutest particulars of ritual observance,' is not only unfair to the synagogue, but to ignore the acts and monuments of our own church. The Christian church, without any basis for it in the N. T., has a casuistry which may fairly compete with that of the Pharisees, who had to define an inspired code of minute rites and ceremonies. From Peter Lombard to Gabriel Biel the question was warmly discussed among all the Christian casuists. What is to be done with a mouse which has eaten of the consecrated wafer? \* Our own established church, which in excellency surpasses any other national church, has deduced from the words, 'Let all things be done decently and according to order' (1 Cor. xiv. 40), that 'no man shall cover his head in the church or chapel in the time of divine service, except he have some infirmity, in which case let him wear a nightcap or coif' (*Constitutions and Canons Ecclesiastical*, xviii.); has enacted that 'no minister, when he celebrateth the communion, shall wittingly administer the same to any but to such as kneel, under pain of suspension' (*ibid.* xxvii.); that 'upon Wednesdays and Fridays weekly, though they be not holy-days, the minister, at the accustomed hours of service, shall resort to the church or chapel, and, warning being given to the people by tolling of a bell, shall say the litany prescribed in the Book of Common Prayer: *whereunto we wish every householder dwelling within half a mile of the church to come or send one at the least of his household*, fit to join with the minister in prayers' (xv.); and that 'no ecclesiastical person shall wear any coif or wrought nightcap, but only plain nightcaps of black silk, satin, or velvet . . . in private houses and in their studies, the said persons ecclesiastical may use any comely and scholar-like apparel, provided that it be not cut or pinkt; and that in public they go not in their doublet and hose, without coats or cassocks; and that they wear not any light-coloured stockings' (lxxiv.) If, in the absence of the Levitical law, such enactments were judged necessary, how much more might the Pharisees, who lived under that law, and whose business it was to see it obeyed, be absolved from all intention to degrade the human intellect by their minute requisitions? That the multitudinous and minute rites and ceremonies imposed by the Mosaic law, and amplified by the requirements of time, should have given rise among many Pharisees to formalism, outward religiousness, self-complacency, ostentation, superstition, and hypocrisy, was to be expected, judging from the general tendency of gorgeous ritualism in more modern days. We are therefore not surprised that our Saviour found these pernicious features in the ranks of Pharisaism, and that he found occasion to expose

and to reprove most unsparingly their externalism (Matt. xxiii. 27; Luke vii. 39) and hypocrisy (Matt. xxiii. 13). But to conclude from this that all the Pharisees, or that the majority of them, were either self-righteous and superstitious, or a set of hypocrites, is as unjust as it is base to brand every section in our own church with the infirmities and extravagances of which individual members are guilty, and which are either denounced by their own more enlightened and spiritually-minded brethren, or exposed by the opposing sections. The language which the Pharisees themselves employed to denounce the proud, the formalists, the self-righteous, and the hypocrites in their own sect, is, to say the least, quite as strong as that which our Saviour used. In confirmation of this, we need only give the poignant Talmudic classification of the Pharisees. 'There are seven kinds of Pharisees,' says the Talmud; 'i. *The Shechemite Pharisee* (פרוש שכמי), who simply keeps the law for what he can profit thereby, just as Shechem submitted to the rite of circumcision that he might thereby obtain Dinah, the daughter of Jacob (Gen. xxxiv. 19); ii. *The Tumbling Pharisee* (פרוש נכפי), who, in order to appear humble before men, always hangs down his head, and scarcely lifts up his feet when he walks, so that he constantly tumbles; iii. *The Bleeding Pharisee* (פרוש קוהא), who, in order not to look at a woman, walks about with his eyes closed, and hence injures his head frequently, so that he has bleeding wounds; iv. *The Mortar Pharisee* (פרוש מרוביח), who wears a cap in the form of a mortar to cover his eyes, that he may not see any impurities and indecencies; v. *The What-am-I-yet-to-do Pharisee* (פרוש אדעה), who, not knowing much about the law, as soon as he has done one thing, asks, what is my duty now? and I will do it (comp. Mark x. 17-22); vi. *The Pharisee from Fear* (פרוש מיראה), who keeps the law because he is afraid of a future judgment; and vii. *The Pharisee from Love* (פרוש מאהבה), who obeys the Lord because he loves him with all his heart' (*Babylon Sota*, 22 b, with *Jerusalem Berachoth*, cap. ix.) Such stinging exposure of their own fanatics, worldly-minded, and hypocrites, assuredly shows that the Pharisees themselves would by no means tolerate outward sanctity, or a hollow profession of holiness. Besides, it was among the Pharisees that the glorious ideas were developed about the Messiah, the kingdom of heaven, the immortality of the soul, the world to come, etc. etc. It was the Pharisees who trained such men as the immortal Hillel, 'the just and devout Simeon, who waited for the consolation of Israel,' and who, taking up the infant Saviour into his arms, offered up thanks to God (Luke ii. 25-35); Zacharias, 'who was righteous before God' (Luke i. 6); Gamaliel, the teacher of Saul of Tarsish; St. Paul, the great apostle of the Gentiles, etc. Our Saviour himself occupied Pharisaic ground, and used the arguments of the Pharisees in vindication of his conduct and doctrines. Thus, when Jesus was charged by the Pharisees with allowing his disciples to break the Sabbath by plucking ears of corn in the field on this holy day, he quoted the very maxim of the Pharisees that 'the Sabbath is made for man, and not man for the Sabbath' (Mark ii. 27 with *Soma*, 85 b); and his proof is deduced according to the Pharisaic exegetical rule denominated גזירה שוה, analogy [HILLEL, rule i.] When

\* Comp. the excellent review of Müller's *Phariseer und Sadducäer, oder Judentum und Mosaismus*, Vienna 1860, in Dr. Löw's periodical entitled *Ben Chananja*, vol. iv. p. 364, etc., Szegedin 1861.

David was hungry, he ate of the priestly bread, and also gave some to those who were with him. Accordingly one who is hungry may satisfy his hunger with that which is otherwise only allowed to the priests. Now the priests perform all manner of work on the Sabbath without incurring the guilt of transgression; why, then, should one who is hungry not be allowed to do the same? (Matt. xii. 1-7.) We only add, in conclusion, that the Apostle Paul, who must have known all the denunciations of Christ against the Pharisees, never uttered a disrespectful word against this sect, but, on the contrary, made it a matter of boast that he belonged to them (Acts xxiii. 6; xxvi. 5; Phil. iii. 5). Now, it would be surpassing strange that, if the apostle entertained anything like the modern sentiments of Christians about the Pharisees, he should never have uttered a single word against them.

5. *Literature*.—Besides the *Mishna*, the *Talmud*, and the *Midrashim*, which embody the sentiments of the Pharisees, we must refer to the articles on EDUCATION, ESSENES, HAPHTARA, THE FEASTS and THE FASTS, HILLEL, GAMALIEL, MARRIAGE, MIDRASHI, etc. etc., in this Cyclopædia; to Herzfeld, *Geschichte des Volkes Israel*, ii. 258, etc., Nordhausen 1857; Jost, *Geschichte des Judenthums und seiner Secten*, i. 197, etc., Leipzig 1857; Graetz, *Geschichte der Juden*, iii. 72, etc. 454, etc., 2d ed., Leipzig 1863; and above all to the elaborate and masterly treatise of the erudite Geiger, *Urschrift und Übersetzungen der Bibel*, p. 103, etc., Breslau 1857. Geiger, who has created a new era in the history of the Jewish sects, shows what influence the Pharisees exercised on the formation and redaction of the Hebrew text, as well as on the ancient versions. He has supplemented his *Urschrift* by a treatise which appeared in the *Zeitschrift der deutschen morgenländischen Gesellschaft*, vol. xvi., p. 714, etc., Leipzig 1862; and by an article in his own *Jüdische Zeitschrift für Wissenschaft und Leben*, vol. ii. p. 11, etc., Breslau 1863, which has also been reprinted separately, Breslau 1863.—C. D. G.

PHARPAR (פַּרְפָּר, 'swift'; Arab. فَرَفَر; *Farfar*;

φάρ; Alex. Φαρφαρά; *Pharpar*), one of the two rivers of Damascus mentioned in the well-known exclamation of Naaman, 'Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel?' (2 Kings v. 12). The name does not occur elsewhere in Scripture, nor is it found in ancient classic authors. Eusebius and Jerome merely state that it is a river of Damascus (*Onomast.*, s. v. *Farfar*). Pliny says that 'Damascus was a place fertilised by the river Chrysorroos, which is drawn off into its meadows and eagerly imbibed' (v. 16); and Strabo says of this river, that 'it commences from the city and territory of Damascus, and is almost entirely drained by water-courses; for it supplies with water a large tract of country' (xvi. p. 755). But none of these writers speak of any second river. Various opinions have been entertained regarding the Pharpar. Benjamin of Tudela states that, while the Abana runs through the city, the Pharpar runs between the gardens and the orchards in the outskirts (*Early Travels*, Bohn, p. 90). He evidently refers to the two branches of the same river. The river *Barada* takes its rise in the upland plain of Zebdāny, at

the base of the loftiest peak of Anti-Lebanon. Its principal source is a fountain called *Ain Barada*. It cuts through the central chain in a sublime gorge, and flows in a deep wild glen down the eastern declivities. Its volume is more than doubled by a large fountain called *Fijeh*, which gushes from a cave in the side of the glen. The river leaves the mountains and enters the great plain of Damascus about three miles west of the city. The main stream flows through the city; but no fewer than seven large canals are taken from it at different elevations to irrigate the surrounding orchards and gardens. The largest of these is called *Nahr Taura* (توري), 'the river Taura,' and is probably

that which Benjamin of Tudela identified with the Pharpar (*l. c.*) The Arabic version of the Bible reads *Taura* for *Pharpar* in 2 Kings v. 12; but the words of Naaman manifestly imply the existence of two distinct rivers. Some have supposed that because the Barada has two great fountains, Naaman alluded to these; and Dr. Wilson would identify the Barada with the Pharpar, and Ain Fijeh with the Abana (*Lands of the Bible*, ii. 371, 373); but in reply we say that Naaman speaks of two 'rivers,' and not 'fountains.'

A short distance south of the city of Damascus flows the river *Awaj*. It has two principal sources—one high up on the eastern side of Hermon, just beneath the central peak; the other in a wild glen a few miles southward, near the romantic village of Beit Jann. The streams unite near Sasa, and the river flows eastward in a deep rocky channel, and falls into a lake, or rather large marsh, called Bahret Hijāneh, about four miles south of the lake into which the Barada falls. Although the Awaj is eight miles distant from the city, yet it flows across the whole plain of Damascus; and large ancient canals drawn from it irrigate the fields and gardens almost up to the walls. The total length of the Awaj is nearly forty miles; and in volume it is about one-fourth that of the Barada. The Barada and Awaj are the only rivers of any importance in the district of Damascus; and there can be little doubt that the former is the Abana, and the latter the *Pharpar*. The identity of the Awaj and Pharpar was suggested by Munro in 1833 (*Summer Ramble*, ii. 54), and confirmed by Dr. Robinson (*Bibliotheca Sacra*, May 1849, p. 371); but its sources, course, and the lake into which it falls, were first explored by the writer of this article in the year 1852 (*Bibliotheca Sacra*, January 1854; and April 1854, p. 329). He then heard, for the first time, the name *Barbar* applied to a glen on the east side of Hermon, which sends a small tributary to the Awaj; and it seems highly probable that we have in this name a relic of the ancient Pharpar. The Arabic فَرَفَر may be regarded

as equivalent to the Hebrew פַּרְפָּר (see *Five Years in Damascus*, i. 299; *Biblioth. Sac.*, l. c., p. 54). The mountain region round the sources of the river was occupied in a remote age by the warlike Maachathites (1 Chron. xix. 6, 7; Josh. xii. 5). Subsequently it formed part of the tetrarchy of Abilene (Luke iii. 1; Joseph. *Antiq.* xix. 5. 1). Farther down, the river Pharpar divided the territory of Damascus from Iturea [ITUREA]. The whole district through which the river flows is now called *Wady el-Ajam*, 'the valley of the Persians;'

the scenery is bleak and mountainous, but some parts of it are extremely fertile, and it contains upwards of fifty villages, with a population of 18,000 souls.

For a fuller account of the rivers of Damascus, see *Journal of Sacred Literature*, July and October 1853; Porter's *Damascus*, i. 279, *seq.*; Ritter, *Pal. und Syr.*, iv. p. 1322, *seq.*—J. L. P.

PHASELIS (Φάσηλις), a coast town on the confines of Lycia and Pamphylia, but assigned by Strabo to the former, to which the Romans wrote requiring all Jewish exiles who had taken refuge there to be given up to Simon the high-priest (1 Maccab. xv. 23). Phaselis was at an early period a place of considerable commerce (Thuc. ii. 69; Polyb. xxx. 9); but at a later date it became a resort of pirates (Cic. *in Verr.* iv. 10). Behind the town was a mountain-range called τὰ Σόλυμα, the highest peaks of which rose immediately behind the town. This mountain is named *Solyma* only by Strabo; but there can be no doubt he means the Mons Chimaera, the highest point of which (now *Takhtali*) is nearly 8000 feet in height. Homer mentions the 'Solyma mountains' (*Odys.* v. 283); and Herodotus says the Solymi were the aboriginal inhabitants of Lycia (i. 173). This shows what value is to be attached to the suggestion that 'the existence of the mountain Solyma and a town of the same name (?) in the immediate neighbourhood of Phaselis, renders it possible that the descendants of some of these Israelites formed a population of some importance in the time of Strabo' (Smith, *Dict. of the Bible*, ii. 830)—W. L. A.

PHEBE. [PHŒBE.]

PHENICE (Φοινίξ; *Phœnice*), or properly *Phœnix*, a town and harbour in the island of Crete, which the vessel in which the Apostle Paul sailed was attempting to reach when driven away by the euroclydon and wrecked (Acts xxvii. 12). The harbour or 'haven' (ἀμῆν) is described by Luke as 'looking down the south-west and north-west winds' (βλέποντα κατὰ λίβα καὶ κατὰ χῶρον), that is, in the direction towards which these winds blow. This interpretation has been disputed. The A. V. has, 'and lieth toward the south-west and north-west;' but Mr. Smith has shown that κατὰ in connection with winds means 'in the same direction as.' Hence βλέποντα κατὰ λίβα does not mean, as is generally supposed, that the haven looked to the point from which the Libs blows, but to the point towards which it blows. Consequently, the haven looked towards the north-east and the south-east (Smith, *Voyage and Shipwreck of St. Paul*, p. 86, *seq.*, 2d ed.) In this rendering Mr. Smith is sustained by ancient authorities, and also by some of the best modern critics (Alford, *ad loc.*; Conybeare and Howson, *Life of St. Paul*, ii. 334, note. See, however, for contrary opinion, Hackett *on Acts*, *ad loc.*)

The site of the town and harbour of Phœnix is now satisfactorily identified. Strabo locates it on the southern coast, at the narrowest part of the island (x. 4, p. 475). Hierocles identifies it with Aradena, and seems to place it opposite the island of Claudia (*Vet. Rom. Itin.*, ed. Wessel., p. 650, 651); and Stephen of Byzantium identifies Aradena and Acropolis (s. v.) On the south coast of Crete, at the narrowest part of the island, and opposite the island of Claudia, is the harbour of *Lutro*.

It is open to the east; but, as a little island lies almost in front of it, it has two entrances, one looking to the north-east (κατὰ λίβα), and the other to the south-east (κατὰ χῶρον). The harbour thus perfectly accords with the description of the sacred writer. It is thus described by Captain Spratt: 'Having in 1853 examined generally the south coast of Crete, I was fully convinced that Lutro was the Phenice of St. Paul, for it is the only bay to the westward of Fair Havens in which a vessel of any size could find any shelter during the winter months. By hauling inside the island, and securing to the south shore of the bay, a vessel is nearly land-locked. South-east and east winds only could endanger her; but with the former, where the fetch is greatest, the wind would not blow home against such a mountain as the White Mountains, so immediately over the bay, and rising to an elevation of 9000 feet' (Smith, p. 89). Mr. Brown, who since visited it, adds: 'It is the only secure harbour, in all winds, on the south coast of Crete' (*Id.*, p. 256, where a sketch-plan of the harbour is given. See also a plan in Conybeare and Howson, ii. 332). This identification is fully confirmed by the researches of Mr. Pashley (*Travels in Crete*, ii. 257), who discovered, a short distance above Lutro, a village called Acropolis ('upper city'), and another near it called Aradhena. These facts, taken in connection with the statements of Hierocles and Stephen Byz., leave it beyond doubt that the bay of Lutro is identical with the ancient haven of Phenice.'—J. L. P.

PHICOL (פִּיכֹל; Sept. Φιχόλ; Alex. Φικόλ; *mouth of all*, i.e., *all commanding*, according to

Gesen., but Fürst derives it from פִּכֹל, *to be strong*), the proper, or more probably, the titular name of the commander of the troops of Abimelech, the Philistine king of Gerar. If the Abimelech of the time of Isaac was the son of the Abimelech of the time of Abraham, we may conclude that the Phicol who attended on the second Abimelech was the successor of the one who was present with the first at the interview with Abraham (Gen. xxi. 22; xxvi. 26). But the whole subject of these interviews is beset with difficulties. [ABIMELECH; ABRAHAM; ISAAC.]

PHILADELPHIA (Φιλαδέλφεια), a city of Lesser Asia, and one of the seven containing the Christian churches to which the Apocalyptic admonitions were addressed. The town stood about twenty-five miles south-east from Sardis, in N. lat. 32° 28', E. long. 28° 30', in the plain of Hermus, about midway between the river of that name and the termination of Mount Tmolus. It was the second in Lydia (Ptolem. v. 2; Plin. *Hist. Nat.* v. 30), and was built by King Attalus Philadelphus, from whom it took its name. In B.C. 133 the place passed, with the dominion in which it lay, to the Romans. The site is reputed by Strabo (xiii. p. 628) to have been very liable to earthquakes; but it continued a place of importance and of strength down to the Byzantine age; and of all the towns in Asia Minor it withstood the Turks the longest. It was taken by Bajazet I. in A.D. 1392.

Philadelphia still exists as a Turkish town, under the name of Allah Shehr, 'city of God,' i.e., High-town. It covers a considerable extent of

ground, running up the slopes of four hills, or rather of one hill with four flat summits. The country, as viewed from these hills, is extremely magnificent—gardens and vineyards lying at the back and sides of the town, and before it one of most extensive and beautiful plains of Asia. The town itself, although spacious, is miserably built and kept, the dwellings being remarkably mean, and the streets exceedingly filthy. Across the summits of the hill behind the town and the small valleys between them runs the town wall, strengthened by circular and square towers, and forming also an extensive and long quadrangle in the plain below. The missionaries Fisk and Parsons, in 1822, were informed by the Greek bishop that the town contained 3000 houses, of which he assigned 250 to the Greeks, and the rest to the Turks. On the same authority it is stated that there are five churches in the town, besides twenty others which

were too old or too small for use. Six minarets, indicating as many mosques, are seen in the town; and one of these mosques is believed by the native Christians to have been the church in which assembled the primitive Christians addressed in the Apocalypse. There are few ruins; but in one part there are still found four strong marble pillars, which supported the dome of a church. The dome itself has fallen down, but its remains may be observed, and it is seen that the arch was of brick. On the sides of the pillars are inscriptions, and some architectural ornaments in the form of the figures of saints. One solitary pillar of high antiquity has been often noticed, as reminding beholders of the remarkable words in the Apocalyptic message to the Philadelphian church:—‘Him that overcometh will I make a pillar in the temple of my God; and he shall go no more out’ (Rev. iii. 12) (Smith, *Sept. Ecclesiarum Asiae*, p. 138;

**PHILEMON, EPISTLE TO.** That this epistle was written by the Apostle Paul is the constant tradition of the ancient church. Ignatius probably alludes to ver. 20 (*ad Ephes.* 2; *ad Magnes.* 12; *ad Polycarp.* 6); it is ascribed to St. Paul in the *Muratorian Canon*; it is expressly cited as his by Origen (*Homil. xix. in Jerem.*, tom. i. p. 185, ed. Huet.); it is referred to as his by Tertullian (*Adv. Marc.* v. 21); and both Eusebius (*Hist. Eccles.* iii. 25) and Jerome (*Proem. in Ep. ad Philem.* tom. iv. p. 442) attest its universal reception as such in the Christian world. The latter, indeed, informs us that some in his day deemed it unworthy of a place in the canon, in consequence

of its being occupied with subjects which, in their estimation, it did not become an apostle to write about, save as a mere private individual; but this he, at the same time, shows to be a mistake, and repudiates the legitimacy of such a standard for estimating the genuineness or authority of any book. It was also admitted as canonical by Marcion (*Hieronym. l. c.*; Tertullian, *l. c.*; Epiph., *Hæres.* xlii. 9). That this epistle should not have been quoted by several of the Fathers, who have quoted largely from the other Pauline epistles (*e.g.*, Irenæus, Clement of Alexandria, and Cyprian), may be accounted for partly by the brevity of the epistle, and partly by their not having occasion to refer to the subjects of which it treats. Paley has adduced the undesigned coincidences between this epistle and that to the Colossians with great force, as evincing the authenticity of both (*Horæ Paulinæ*, c. 14); and Eichhorn has ingeniously shown how a

person attempting, with the Epistle to the Colossians before him, to forge such an epistle as this in the name of Paul, would have been naturally led to a very different arrangement of the historical circumstances and persons from what we find in the epistle which is extant (*Einleit. ins N. T.*, iii. 302).

The epistle is inscribed to Philemon; and with him are joined Apphia (probably his wife), Archippus (his son or brother), and the church which is in their house, though throughout the epistle it is Philemon alone who is addressed. Philemon was a personal friend and apparently a convert of the apostle (13, 19); one who had exerted himself for the cause of the gospel and the comfort of those who had embraced it (2-7). His residence was probably at Colosse (comp. Col. iv. 9, 17); but whether he held any office in the church there remains uncertain. In the *Apostolical Constitutions* (vii. 46), he is said to have been ordained bishop of the church, but this is not sustained by any other testimony, and is expressly denied by the author of the commentary on St. Paul's epistles ascribed to Hilary.

Wieseler is of opinion that Philemon was a Laodicean; and that this epistle is that mentioned (Col. iv. 16) as sent by the apostle to the church in Laodicea. His ground for this is that the epistle is addressed to Archippus as well as Philemon, and he assumes that Archippus was bishop of the church at Laodicea; partly on the authority of Theodoret, who says he resided at Laodicea; partly on that of the *Apostolical Constitutions* (vii. 46), which say he was bishop of the church there; and partly on the connection in which the reference to him in Col. iv. 17 stands with the reference to the church at Laodicea, and the injunction given to the Colossians to convey a message to him concerning fidelity to his office, which it is argued would have been sent to himself had he been at Colosse. But the authorities cited have no weight in a matter of this sort; nor can the mere juxtaposition of the reference to Archippus with the reference to the church at Laodicea prove anything as to the residence of the former; and as for the injunction to counsel Archippus, it is more likely that it would be given by the apostle in a letter to the church to which he belonged than to another church. On the other hand, supposing Philemon to have been at Laodicea, it is not credible that the apostle would have requested the Colossians to send to Laodicea for a letter addressed so exclusively to him personally, and relating to matters in which they had no immediate interest, without at least giving Philemon some hint that he intended the letter to be so used. The letter to the church at Laodicea was doubtless one of more general character and interest than this.

This epistle was evidently written during the apostle's imprisonment (ver. 9, 10), and, as we have already endeavoured to show [COLOSSIANS, EPISTLE TO THE], during his two years' imprisonment at Rome. It was occasioned by his sending back to Philemon his runaway slave Onesimus, who, having found his way to Rome, was there, through the instrumentality of the apostle, converted to Christianity; and, after serving Paul for a season, was by him restored to his former master, without whose consent the apostle did not feel at liberty to retain him. The epistle commences with the apostle's usual salutation to those to whom he wrote; after which he affectionately alludes to the

good reputation which Philemon, as a Christian, enjoyed, and to the joy which the knowledge of this afforded him (ver. 1-7). He then gently and gracefully introduces the main subject of his epistle by a reference to the spiritual obligations under which Philemon lay to him, and on the ground of which he might utter as a command what he preferred urging as a request. Onesimus is then introduced. The change of mind and character he had experienced is stated; his offence in deserting his master is not palliated; his increased worth and usefulness are dwelt upon; and his former master is entreated to receive him back, not only without severity, but with the feeling due from one Christian to another (ver. 8-16). The apostle then delicately refers to the matter of compensation for any loss which Philemon might have sustained either through the dishonesty of Onesimus, or simply through the want of his service; and though he reminds his friend that he might justly hold the latter his debtor for a much larger amount (seeing he owed to the apostle his own self), he pledges himself, under his own hand, to make good that loss (ver. 17-19). The epistle concludes with some additional expressions of friendly solicitude; a request that Philemon would prepare the apostle a lodging, as he trusted soon to visit him; and the salutations of the apostle and some of the Christians by whom he was surrounded at the time (ver. 20-25).

This epistle has been universally admired as a model of graceful, delicate, and manly writing. 'It is a voucher,' says Eichhorn, 'for the apostle's urbanity, politeness, and knowledge of the world. His advocacy of Onesimus is of the most insinuating and persuasive character, and yet without the slightest perversion or concealment of any fact. The errors of Onesimus are admitted, as was necessary, lest the just indignation of his master against him should be roused anew; but they are alluded to in the most admirable manner: the good side of Onesimus is brought to view, but in such a way as to facilitate the friendly reception of him by his master, as a consequence of Christianity, to which he had, during his absence, been converted; and his future fidelity is vouched for by the noble principles of Christianity to which he had been converted. The apostle addresses Philemon on the softest side. Who would wilfully refuse to an aged, a suffering, and an unjustly imprisoned friend a request? And such was he who thus pleaded for Onesimus. The person recommended is a Christian, a dear friend of the apostle's, and one who had personally served him: if Philemon will receive him kindly, it will afford the apostle a proof of his love, and yield him joy. What need, then, for long urgency? The apostle is certain that Philemon will, of his own accord, do even more than he is asked. More cogently and more courteously no man could plead' (*Einleit. ins N. T.*, iii. 300).

PHILETUS, an apostate Christian, mentioned by Paul, in connection with Hymenæus, 2 Tim. ii. 17 [HYMENÆUS].

PHILIP (Φίλιππος). 1. One of the twelve apostles. He was of Bethsaida, 'the city of Andrew and Peter' (John i. 44). He became one of the disciples of John the Baptist, and was in the neighbourhood where John was baptising at the time of our Lord's baptism. Andrew and John, who were also disciples of the Baptist, heard the testimony concerning Jesus which the latter gave, and thenceforth attached themselves to him as the promised Messiah. Through Andrew his brother, Simon (Peter) was brought to Christ; and as on the next day Philip unhesitatingly accompanied Jesus when called to follow him, it is probable that his townsmen had previously spoken to him of Jesus as the long-expected Saviour (John i. 35-44). Philip was thus the fourth of the apostles who attached themselves to the person of Jesus—of those 'who left all and followed him.' The first act of Philip was to bring to the Lord Nathanael, who is supposed to have also become an apostle, under the name of Bartholomew (John i. 45-51). Little more is recorded of Philip in the Scriptures; but it is remarkable that when Christ beheld the five thousand people whom he afterwards fed with five loaves and two fishes, he singled out Philip for the question, 'Whence shall we buy bread that these may eat?' It is added, 'This he said to prove him, for he himself knew what he would do.' Bengel and others suppose that this was because the charge of providing food had been committed to Philip, while Chrysostom and Theodore of Mopsuestia rather suppose it was because this apostle was weak in faith. The answer of Philip agrees well enough with either supposition: 'Two hundred pennyworth of bread is not sufficient for them, that every one of them may take a little' (John vi. 1-7). But it is well to compare this with John xiv. 8, where the inappropriate remark of Philip, 'Lord, shew us the Father, and it sufficeth us,' evinces that he experienced, in a degree beyond his brother apostles, the difficulty which they generally felt in raising themselves above the things of sense.

Intermediately, we find recorded the application to Philip of certain 'Greeks' (proselytes of the gate) at Jerusalem, who wished to be introduced to Jesus, of whom they had heard so much. Knowing that his master was not forward to gratify mere curiosity, Philip was uncertain whether to comply with their wish or not, but first consulted Andrew, who went with him to mention the circumstance to Jesus (John xii. 21, 22). This incident, although slight, is indicative of character, as we feel sure that some of the other apostles—Peter for instance—would at once have complied with or declined this application on their own responsibility. The sacred history only adds to these facts, that Philip was present with the other apostles at the religious assembly following the Lord's resurrection (Acts i. 13).

The ancient commentators attribute to Philip the request of 'one of the disciples' to Christ, 'Suffer me first to go and bury my father' (Matt.

viii. 21; Luke ix. 59); but there seems no warrant for this, and it is not likely that it would have been overlooked by John in his account of Philip's call to the apostleship.

The later traditions concerning this apostle are vague and uncertain; but there is nothing improbable in the statement that he preached the gospel in Phrygia (Theodoret, *in Ps.* cxvi.; Niceph., *Hist. Eccles.*, ii. 39), and that he met his death at Hierapolis in Syria (Euseb., *Hist. Eccles.*, iii. 31; v. 24). The further statement, that Philip was married and had daughters (Euseb., *u. s.*; Clem. Alex., *Strom.*, iii. 192; Niceph. ii. 44), very probably arose from confounding him with Philip the Evangelist (Acts xxi. 8).

2. One of the seven first deacons (Acts vi. 5); also called an 'Evangelist' (xxi. 8), which denotes one of those ministers of the primitive church, who, without being attached to any particular congregation, preached the gospel from place to place (Eph. iv. 11; 2 Tim. iv. 5). Being compelled to leave Jerusalem by the persecution which ensued on Stephen's death, Philip was induced to take refuge in Samaria. He there came to a city where Simon Magus was held in high reverence through the wonders which he wrought. But the substantial and beneficent miracles which were performed by Philip in the name of Jesus drew away their attention from the impostor, and prepared their minds for the reception of the gospel. Simon himself seems to have regarded him as in league with some superhuman being, and looking upon baptism as the initiatory rite of a compact through which he might obtain the same powers, he solicited and obtained baptism from the Evangelist [SIMON MAGUS]. After Peter and John had come to Samaria to complete and carry on the work which Philip had been the means of commencing, the Evangelist himself was directed by a divine impulse to proceed towards Gaza, where he met the treasurer of Candace, queen of Ethiopia [CANDACE; ETHIOPIA], by whose conversion and baptism he became the instrument of planting the first seeds of the gospel in Ethiopia (Acts viii. 1-39). Philip then retraced his steps, and after pausing at Azotus, preached the gospel from town to town till he came to Cæsarea (ver. 40). At this place he seems to have settled; for when Paul was on his last journey to Jerusalem, he and his party were entertained in the house of Philip, on which occasion it is mentioned that he had 'four daughters, virgins, who did prophesy' (Acts xxi. 9), or who were endued with the faculty of speaking under divine inspiration, and of predicting future events, together with other supernatural gifts vouchsafed to the primitive Christians, in accordance with the prophecy in Acts ii. 18. With this fact the Scriptural history of Philip closes, and the traditions which refer to his subsequent proceedings are uncertain and conflicting. The Greek martyrologies make him to have been bishop of Tralles, in Lydia; but the Latins make him end his days in Cæsarea (*Acta Sanct.* ad 6 Juni); but in all old accounts Philip the Apostle and Philip the Evangelist are much confounded.

3. Son of Herod the Great, and tetrarch of Batanæa, Trachonitis, and Auranitis (Luke iii. 1) [HERODIAN FAMILY].

4. Called by Josephus Herod, son of Herod the Great, and first husband of Herodias [HERODIAN FAMILY].—J. K.

[Besides these, mention is made of Philip, king of Macedonia, father of Alexander the Great (1 Maccab. i. 1; vi. 2); of Philip V. of Macedonia, the conquest of whom by the Romans carried their name and fame into the East (1 Maccab. viii. 5); and of a Phrygian left by Antiochus Epiphanes as governor at Jerusalem, where he practised great cruelties on the Jews (2 Maccab. v. 22; vi. 11; viii. 8). This person is commonly identified with the Philip described as the friend and early companion (σύνητροφος) of Antiochus, whom the king appointed on his deathbed governor of Syria and guardian of his son (1 Maccab. vi. 14, 15, 55); but it is difficult to adjust the statements concerning the one Philip with those concerning the other into one harmonious narrative (see Winer, *Realw.*, s. v.)]

PHILIPPI (Φίλιπποι), a celebrated city of Macedonia, visited by the apostle Paul, and the seat of the earliest Christian church established in Europe. The double miracle wrought there, and the fact that 'to the saints in Philippi' the great apostle of the Gentiles addressed one of his epistles, must ever make this city holy ground.

The Philippi of Paul's day was situated in a plain, on the banks of a deep and rapid stream called Gangites (now *Angista*). The ancient walls followed the course of the stream for some distance; and in this section of the wall the site of a gate is seen, with the ruins of a bridge nearly opposite. In the narrative of Paul's visit it is said: 'On the Sabbath we went out of the gate by the river (ἐξῆλθοντες τῆς πόλεως παρά ποταμὸν), where a meeting for prayer was accustomed to be' (Acts xvi. 13). It was doubtless by this gate they went out, and by the side of this river the prayer-meeting was held. As Philippi was a military colony, it is probable that the Jews had no synagogue, and were not permitted to hold their worship within the walls. Behind the city, on the north-east, rose lofty mountains; but on the opposite side a vast and rich plain stretched out, reaching on the south-west to the sea, and on the north-west far away among the ranges of Macedonia. On the south-east a rocky ridge, some 1600 feet in height, separated the plain from the bay and town of Neapolis. Over it ran a paved road connecting Philippi with Neapolis. Though the distance between the two was nine miles, yet Neapolis was to Philippi what the Piræus was to Athens; and hence Paul is said, when journeying from Greece to Syria, to have 'sailed away from Philippi'; that is, from Neapolis, its port (Acts xx. 6).

Philippi was in the province of Macedonia, while Neapolis was in Thrace. Paul, on his first journey, landed at the latter, and proceeded across the mountain road to the former, which Luke calls 'the first city of the division of Macedonia' (πρώτη τῆς μερίδος τῆς Μακεδονίας πόλις, Acts xvi. 12). The word *πρώτη* does not, as represented in the A. V., signify 'chief.' Thessalonica was the chief city of all Macedonia, and Amphipolis of that division (*μερίς*) of it in which Philippi was situated (see Wieseler, *Chron. des Apost. Zeit.*, p. 37). *Πρώτη* simply means that Philippi was the 'first' city of Macedonia to which Paul came (Alford *in loc.*; Conybeare and Howson, *Life of St. Paul*, i. 311, note). In descending the mountain-path toward Philippi, the apostle had before him a vast and beautiful panorama. The whole plain, with its green meadows, and clumps of trees, and

wide reaches of marsh, and winding streams, lay at his feet; and away beyond it the dark ridges of Macedonia.

Strabo tells us that the old name of Philippi was *Krenides* (vii. p. 331); and Appian adds, that it was so called from the number of 'little fountains' (*κρηνίδες*) around the site. He also says that it had another name, *Datus*; but that Philip of Macedon, having taken it from the Thracians, made it a frontier fortress, and gave it his own name (*De Bell. Civ.*, iv. 105). Philip's city stood upon a hill, probably that seen a little to the south of the present ruins, which may have always formed the citadel. The famous battle of Philippi, in which the Roman republic was overthrown, was fought on this plain in the year B. C. 42 (Dio. Cass., xlv. i.; Appian, *l. c.*) In honour, and as a memorial of his great victory, Augustus made Philippi a Roman colony, and its coins bear the legend *Colonia Augusta Jul. Philippensis* (Conybeare and Howson, i. 312). The emperor appears to have founded the new quarter in the plain along the banks of the Gangites. As a colony (*κολωνία*, Acts xvi. 12) it enjoyed peculiar privileges. Its inhabitants were Roman citizens, most of them being the families and descendants of veteran soldiers, who had originally settled in the place to guard the city and province. They were governed by their own magistrates, called *Duumviri* or *Prætors* (in Greek *στρατηγοί*; ver. 20), who exercised a kind of military authority, and were independent of the provincial governor.

The missionary visit of Paul and Silas to Philippi was successful. They found an eager audience in the few Jews and proselytes who frequented the prayer-place on the banks of the Gangites. Lydia, a trader from Thyatira, was the first convert. Her whole house followed her example. It was when going and returning from Lydia's house that 'the damsel possessed with a spirit of divination' met the apostles. Paul cast out the spirit, and then those who had made a trade of the poor girl's misfortune rose against them, and took them before the magistrates, who with all the haste and roughness of martial law, ordered them to be scourged and thrown into prison. Even this gross act of injustice redounded in the end to the glory of God; for the jailer and his whole house were converted, and the very magistrates were compelled to make a public apology to the apostles, and to set them at liberty, thus declaring their innocence. The scene in the prison of Philippi was one of the most cheering, as it was one of the most remarkable, incidents in the history of the apostolic church.

After a short interval Paul revisited Philippi, and appears to have remained in the city and surrounding country a considerable time (Acts xx. 1-6). It would seem, as Alford says, that 'the cruel treatment of the apostle at Philippi had combined with the charm of his personal fervour of affection to knit up a bond of more than ordinary love between him and the Philippian church. They alone, of all churches, sent subsidies to relieve his temporal necessities' (Phil. iv. 10, 15, 18; 2 Cor. xi. 9; 1 Thess. ii. 2; Alford, *Greek Test.*, *Prol.*, vol. iii. p. 29). The apostle felt their kindness; and during his imprisonment at Rome wrote to them that *Epistle* which is still in our canon.

Philippi is now an uninhabited ruin. The remains of former greatness, though still visible, are all prostrate. The foundations of a theatre can be

traced; also the walls, gates, some tombs, and numerous broken columns and heaps of rubbish. The ruins of private dwellings are visible on every part of the site; and at one place is a mound of rubbish covered with columns and broken fragments of white marble, where a palace, temple, or perhaps a forum once stood. (See Clarke's *Travels*, vol. iii.; Leake, *Northern Greece*, vol. iii.; Cousinery, *Voyage dans le Maced.*; and especially Hacket's *Journey to Philippi in Bible Union Quarterly*, August 1860).—J. L. P.

PHILIPPIANS, EPISTLE TO THE. Of this part of the apostle Paul's writings the genuineness has been generally admitted. Professing to be written by that distinguished servant of Christ, it bears on every part of it the impress of his peculiar style, manner of thought, and form of doctrine; and the internal evidence of authenticity arising from the incidental allusions in it to persons and circumstances is very strong (*Horæ Paulinæ*, c. 7). It is referred to formally and expressly by Polycarp in his *Epistle to the Philippians* (sec. 3, 11), besides being repeatedly quoted by him. It is quoted by the churches at Vienne and Lyons, in their letter to the churches in Asia and Phrygia, preserved by Eusebius (*Hist. Eccles.*, v. 2); by Irenæus (*Cont. Hær.*, iv. 18, sec. 4); by Clement of Alexandria (*Pædag.* lib. i., p. 107; *Strom.* iv., p. 511; *Admon. ad Gentes*, p. 56); by Tertullian (*De Resur. Carnis.* c. 23); by Origen (*Cont. Cels.*, lib. iii., p. 122, ed. Spencer, *et sepius.*); by Cyprian (*Lib. Testim.* iii. 39), and by many of the later Fathers.

It is only in very recent times that any doubt has been suggested as to the genuineness of this epistle. Schrader (*Der Ap. Paulus*, v. 233) first insinuated that the passage iii. 1-iv. 9 is an interpolation; but he adduces no reason for this but the purely gratuitous one that the connection between ii. 30 and iv. 10 is disturbed by this intervening section, and that by the excision of this the epistle becomes 'more rounded off, and more a genuine occasional letter'—as if any sound critic would reject a passage from an ancient author because in his opinion the author's composition would be improved thereby! Baur goes further than this, and would reject the whole epistle as a Gnostic composition of a later age (*Paulus*, p. 458, ff.). But when he comes to point out 'the Gnostic ideas and expressions' by which the epistle is marked, they will be found to exist only in his own imagination, and can only by a perverse ingenuity be forced upon the words of the apostle. Thus, in the statement that Christ *ἐν μορφῇ θεοῦ ὑπάρχων οὐχ ἄρπαγμὸν ἡγήσατο τὸ εἶναι ἴσα θεῷ* (ii. 5, 6), Baur finds an allusion to the Gnostic æon Sophia in which 'existed the outgoing desire with all power to penetrate into the essence of the supreme Father.' But not only is this to give the apostle's words a meaning which they do not bear (for however we translate *ἄρπαγμὸν ἡγήσατο*, it evidently expresses an act in the past, not an aim for the future), it is manifest that the entire drift of the passage is not to set forth any speculative doctrine, but to adduce a moral inference. This is so manifest, that even Baur himself admits it, and by so doing overturns his own position; for it is only on the supposition that what the apostle refers to is a *fact*, and not a mere speculative fancy, that any moral conclusion can be drawn from it. Equally futile is the attempt to

find docketism in the use of the term *μορφῇ*—a term used by the apostle in reference to the divine nature—or of the terms *ὁμοίωμα*, *σχῆμα*, and *ἐν-ρεθῆναι*, all of which occur elsewhere in St. Paul's writings, and are here used to denote simply that Jesus Christ presented himself to the view of men actually as one of themselves (Lunemann, *Pauli ad Phil. Ep. cont. Baurium defendit*, Gött. 1847; Brückner, *Ep. ad Phil. Paulo auctori vindicata cont. Baur.*, Lips. 1848).

A question has been raised as to whether the extant epistle to the Philippians is the only one addressed by St. Paul to that church. What has given rise to this question is the expression used by the apostle (iii. 1), *τὰ αὐτὰ γράφειν ὑμῖν, κ.τ.λ.*, where the writing of the *same* things to them is supposed to refer to the identity of what he is now writing with what he had written in a previous letter. It has also been supposed that Polycarp knew of more than one epistle addressed by the apostle to the Philippians, from his using the plural (*ὅς ἀπὸν ὑμῖν ἐγράψεν ἐπιστολάς*) in reference to what he had written to them. To this, however, much weight cannot be attached, for there can be no doubt that the Greeks used *ἐπιστολάι* for a single letter, as the Latins used *literæ* (see a multitude of examples in Stephens' *Thesaurus*, s. v.) That Polycarp knew only one epistle of Paul to the Philippians has been supposed by some to be proved by the passage in the 11th chapter of his letter, preserved in the Latin version, where he says, 'Ego autem nihil tale sensi in vobis vel audivi, in quibus laboravit beatus Paulus qui estis in principio epistolæ ejus, etc.' But as Meyer points out, 'epistolæ' here is not the genitive singular, but the nominative plural; and the meaning is not 'who are in the beginning of his epistle,' which is hardly sense, but (with allusion to 2 Cor. iii. 1) 'who are in the beginning [*i. e.*, from the beginning of his preaching the gospel among you—a common use of *ἐν ἀρχῇ*, which was the expression probably used by Polycarp] his epistle.' It is going too far, however, to say that this passage has no bearing on this question; for if Meyer's construction be correct, it shows that Polycarp did use *ἐπιστολάι* for a single epistle. Meyer, indeed, translates 'who are his epistles;' but if the allusion is to 2 Cor. iii. 1, we must translate in the singular, the whole church collectively being the epistle, and not each member an epistle. But though the testimony of Polycarp for a plurality of epistles may be set aside, it is less easy to set aside the testimony of the extant epistle itself in the passage cited. To refer *τὰ αὐτὰ* to the preceding *χαίρετε ἐν κυρίῳ* seems altogether improbable, for nowhere in this epistle has the apostle previously enjoined on his readers *χαίρειν ἐν κυρίῳ*, and one does not see what on this hypothesis is the propriety of such expressions as *δκνηρὸν* and *ἀσφαλές*; and to lay the stress on the *γράφειν*, as Wieseler proposes (*Chronologie des Ap. Zeit.*, p. 458), so as to make the apostle refer to some *verbal* message previously sent to the Philippians, the substance of which he was now about to put into *writing*, seems no less so; for not only does the epistle contain no allusion to any oral message, but in this case the writer would have said *καὶ γράφειν*. A large number of critics follow Pelagius in the explanation, 'eadem repetere *quæ præsens dixeram*;' but it may be doubted if so important a clause may be legitimately dragged in

to complete the apostle's meaning, without any authority from the context. The probability seems to be that the apostle alludes to some written communication previously sent by him to the Philippians (so Hænlein, Flatt, Meyer, Bleek, Schenkel, etc.)

From allusions in the epistle itself, it appears that it was written at Rome during the period of the apostle's two years' imprisonment in that city, and in all probability towards the close of that period (i. 13, 14, 23, 26; ii. 18, 25). Several, however, would make Cæsarea the place whence it was written. But for this there is no adequate ground. It is true that the *πραιτώριον* (i. 13) may mean the residence of the procurator at Cæsarea, called (Acts xxiii. 35) *τὸ πραιτώριον τοῦ Ἡρώδου*, and the *ἀπολογία* (i. 17) may be that delivered before Felix (Acts xxiv. 10, ff.); but it is more probable that the former of these refers to the *castra prætoriana* at Rome, and the latter to the defence the apostle expected to deliver before the emperor. The expression *οἰκτα Καίσαρος* (iv. 22), also more probably means the imperial household at Rome, than the servants of the procurator at Cæsarea. What is farther in favour of Rome is, that the apostle, when writing this epistle, felt himself in a crisis between life and death, which would apply only to a trial in the last resort, a trial at the bar of the emperor himself. Credner's opinion (*De temp. et loco epistolæ ad Phil. scriptæ*, 1731), that the epistle was written at Corinth, is a mere whim, for which not the shadow of evidence can be adduced.

The epistle seems to have been composed on the occasion of the return to Philippi of Epaphroditus, a member of the church in that place, who had been deputed to Rome with a pecuniary contribution from the church in aid of the apostle. Full of gratitude for this work of friendly remembrance and regard, Paul addressed to the church in Philippi this epistle, in which, besides expressing his thanks for their kindness, he pours out a flood of eloquence and pathetic exhortation, suggested partly by his own circumstances, and partly by what he had learned of their state as a church. That state appears to have been on the whole very prosperous, as there is much commendation of the Philippians in the epistle, and no censure is expressed in any part of it, either of the church as a whole, or of any individuals connected with it. At the same time, the apostle deemed it necessary to put them on their guard against the evil influences to which they were exposed from Judaizing teachers and false professors of Christianity. These cautions he interposes between the exhortations suggested by his own state and by the news he had received concerning the Philippians, with which his epistle commences and with which it closes. We may thus divide the epistle into three parts. In the first of these (i. ii.), after the usual salutation and an outpouring of warm-hearted affection towards the Philippian church (i. 1-11), the apostle refers to his own condition as a prisoner at Rome; and lest they should be cast down at the thought of the unmerited indignities he had been called upon to suffer, he assures them that these had turned out rather to the furtherance of that great cause on which his heart was set, and for which he was willing to live and labour; though, as respected his personal feelings, he would rather depart and be with Christ, which he deemed to be 'far better'

(12-24). He then passes by an easy transition to a hortatory address to the Philippians, calling upon them to maintain steadfastly their profession, to cultivate humanity and brotherly love, to work out their own salvation with fear and trembling, and concluding by an appeal to their regard for his reputation as an apostle, which could not but be affected by their conduct, and a reference to his reason for sending to them Epaphroditus instead of Timothy, as he had originally designed (i. 25; ii. 30). In part second he strenuously cautions them, as already observed, against Judaizing teachers, whom he stigmatizes as 'dogs' (in reference probably to their impudent, snarling, and quarrelsome habits), 'evil-workers,' and 'the concision;' by which latter term he means to intimate, as Theophylact remarks (*in loc.*), that the circumcision in which the Jews so much gloried had now ceased to possess any spiritual significance, and was therefore no better than a useless mutilation of the person. On this theme he enlarges, making reference to his own standing as a Jew, and intimating, that if under the Christian dispensation Jewish descent and Jewish privileges were to go for anything, no one could have stronger claims on this ground than he; but at the same time declaring, that however he had once valued these, he now counted them, 'all but loss for the excellency of the knowledge of Christ' (iii. 1-12). A reference to his own sanctified ambition to advance in the service of Christ leads him to exhort the Philippians to a similar spirit; from this he passes to caution them against unnecessary contention, and against those who walk disorderly; concluding by reminding them of the glorious hopes which, as Christians, they entertained (ver. 13-21). In the third part we have a series of admonitions to individual members of the church at Philippi (iv. 1-3), followed by some general exhortations to cheerfulness, moderation, prayer, and good conduct (ver. 4-9); after which come a series of allusions to the apostle's circumstances and feelings, his thanks to the Philippians for their seasonable aid, and his concluding benedictions and salutations (ver. 10-23).

Heinrichs has advanced the opinion that the epistle, as it now appears, is a combination of two different epistles, the one (i. 1-iii. 1, and iv. 21-23) addressed to the church at large; the other (iii. 1-iv. 20) to confidential friends of the apostle (*Nov. Test. Koppian.* vii. Prol.) He has sought support for this utterly groundless opinion in the *τὰ αὐτὰ γράφειν* of iii. 1; but these words obviously lead to an opposite conclusion, for how could the writer excuse himself for writing the same things if the readers were not the same? Besides, the supposition of an esoteric as distinct from an exoteric circle in the church, is utterly foreign to the apostle's mode of thought. The epistle is formally addressed to *τοῖς ὅσιν ἐν Φιλιπποῖς σὺν ἐπισκόποις καὶ διακόνοις*; and there is nothing in that it was not befitting to read to the whole assembly. Heinrichs' hypothesis has been fully confuted by Krause (*An Epist. Pauli ad Phil. in duas epistolas . . . dispendenda sit?* Regiom. 1811), by Schott (*Isagoge in N. T.*, sec. 70), and others.

This epistle is written throughout in a very animated and elevated style. It is full of the most sublime thoughts and the most affectionate exhortations. It resembles more the production of a father addressing his children, than that of an

apostle laying down authoritatively what is to be received and followed. The whole of it shows, as Theophylact observes, how very much he loved and how highly he estimated those to whom it was addressed, ὡν ἕνεκεν ἀπάντων σφόδρα φιλῶν αὐτοῦς καὶ τιμῶν φαίνεται (*Proem. in Ep. ad Phil.*)

Of separate commentaries upon this epistle, a considerable number has appeared, especially on the continent. Of these the chief are the following: M. H. Schotanus, *Analys. et Comment.*, Franc. 1637, 4to; J. G. Am. Ende, *Pauli. Ep. ad Phil. Gr. Nova vers. Lat. et annot. perpet. illust.*, Vitemb. 1798, 8vo; G. F. H. Rheinwald, *Commentar*, Berlin 1827, 8vo; Flatt, *Vorlesungen*, 1829; Schinz, *Exeget. Versuch*, 1833; K. S. Matthies, *Erklärung*, Griefswald 1835, 8vo; H. G. Hölemann, *Comment.* 1839; Wessel Alb. van Hengel, *Comment. perpetuus*, Amstel. 1839; Weiss, *Philipp. Br. ausgelegt.*, Leipz. 1859; Rilliet, *Commentaire*, Geneve 1841. In English the works of Pearce and Ferguson may be mentioned.—W. L. A.

PHILIPPSOHN, MOSES, was born May 9, 1775, in Sandersleben, a small town on the Wipper, and was destined for a Rabbinate by his parents, who began to initiate him into Hebrew when he was scarcely four years of age. In 1787 he was sent to a Rabbinic school at Halberstadt, where he was instructed in the Talmud and other branches of Rabbinic literature. He then went to Brunswick, where he devoted himself to the study of the sciences generally, and in particular Hebrew philology, acquiring a most classical and charming style in Hebrew composition. In 1799, when only four-and-twenty, he was appointed master of the school at Dessau, founded by a society of young Jews for the instruction of their poor co-religionists. Here Philippsohn prosecuted more zealously than ever the study of Hebrew and the Hebrew Scriptures, and determined to continue, with the aid of his three colleagues, the great Bible work commenced by Mendelssohn [MENDELSSOHN], selecting the minor prophets for their conjoint labour. Philippsohn undertook to translate and to expound Hosea and Joel, being the two most difficult books of the twelve minor prophets; his colleague Wolf the translation and exposition of Obadiah, Micah, Habakkuk, and Zephaniah; his colleague Solomon undertook Haggai and Zechariah; whilst Neuman undertook Amos, Nahum, and Malachi; Jonah having already been published by Löwe [LÖWE]; and the whole was published under the title מנחה טהורה, a *Pure Offering*, at Dessau 1805. Three years later Philippsohn published a Hebrew grammar and Chrestomathy, entitled מורה לבני בינה, *Friend of Students*, Dessau 1808, 2d improved ed., *ibid.* 1823; and a Hebrew Commentary on the Book of Daniel, with a translation by Wolf, Dessau 1808. He also wrote essays on various subjects connected with Hebrew literature in the Hebrew periodical called המאסף, *The Gatherer*, and died April 20, 1814, in his thirtieth year (comp. Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2099, and the interesting biographical sketch by Dr. Ph. Philippsohn, Leipzig 1864).—C. D. G.

PHILISTIA. The same Hebrew word, פְּלִשְׁתִּי, is variously rendered in our A. V. In Exod. xv. 14 it is *Palestina* (Φυλιστιναι, *Philistim*); in Ps.

lx. 8, lxxxvii. 4, and cviii. 9, it is *Philistia* (ἀλλόφυλοι, *Alienigenæ*); in Ps. lxxxiii. 7 it is *Philistines* (ἀλλόφυλοι); in Is. xiv. 29, 31, and Joel iii. 4, it is *Palestine* (ἀλλόφυλοι, *Philisthaa, Palesthini*). This variety of rendering tends to create confusion in Biblical geography. The word occurs in the above passages only; and it has the same meaning in them all. It is the special name given to 'the land of the Philistines.' The way in which its English and Greek equivalents, *Palestine* or *Philistia* and *Παλαιστίνη*, came to be applied to a wider region has been explained in the article *PALESTINE*, to which the reader is referred. The Gentile noun is פְּלִשְׁתִּי, and is usually rendered 'Philistines' (Gen. xxi. 32, etc.).

Philistia, or, as it is sometimes called, 'The land of the Philistines' (אֶרֶץ פְּלִשְׁתִּים, ἡ γῆ τῶν Φυλιστινῶν, *terra Palestinorum*), embraced the coast plain on the south-west of Palestine, extending from Joppa on the north to the valley of Gerar on the south, a distance of about forty miles; and from the shore of the Mediterranean on the west to the foot of the Judean hills. Its breadth at the northern end was ten miles, and at the southern about twenty. It appears to have run as far inland as Beersheba (Gen. xxi. 33, 34; xxvi. 1, 14-18; Exod. xxiii. 31; Josh. xiii. 2, 3). A name very commonly given to it in the Bible is *Shephelah*, which signifies 'a low flat region,' and is descriptive (Deut. i. 7; Josh. ix. 1; x. 40 in the Hebrew; see Stanley, *S. and P.*, p. 480; *SHEPHELAH*). Its general features and physical geography have already been described. [*PALESTINE*].

Reland supposes that the name Philistia was originally given to the region between Egypt and Canaan, because the direct road between these countries is called by Moses 'the way of the land of the Philistines' (Exod. xiii. 17); that name, however, might have been rightly given to the coast road, though the Philistines had never possessed any part of the country south of Gaza. Their territory lay on the south-western border of Canaan next Egypt, and it is probable that they pastured their flocks along the whole coast plain as far south as el-Arish. The whole of Philistia was allotted to the tribes of Judah and Dan (see articles *JUDAH* and *DAN*); but was never completely conquered. After the captivity the Idumæans took possession of the southern section of it and held it for a time. [*IDUMÆA*]. For farther information, see the articles *PHILISTINES* and *PALESTINE* (also Reland, *Pal.*, p. 73; Robinson, *Physical Geogr. of the Holy Land*, p. 115; Porter, *Giant Cities of Bashan*, etc., pp. 185-220).—J. L. P.

PHILISTINES (פְּלִשְׁתִּים, sometimes פְּלִשְׁתִּים); LXX. in Pent. and Joshua Φυλιστινῆ, afterwards Ἀλλόφυλοι; Vulg. Philistim; Joseph. Παλαιστῖνοι;—the inhabitants, during the greater part of the Biblical times, of the south-eastern shore of Palestine, from 'the river of Egypt' (Wādīh Al-Arish), near Gaza in the south, to the river Rubin (Ekron) in the north—a plain known as the Shephelah, the Land of the Philistines, Philistia, or Συρτη Παλαιστίνῃ. The name of this plain has been

variously derived from a root פָּלַשׁ, cognate with פָּלַט, פָּלַם, פָּלַת (Hebr. and Æthiop.), to emigrate, wander about: whence, according to some,

the Abyssinian Jews have retained the designation Phalasiân or Falashas; or from שִׁפְלָה, שָׁפֶל (= שִׁפְלָה, Zeph. ii. 5), Lowland; or from Sanscr. valaksha, which would designate the inhabitants as 'white ones.' The Philistines have further been identified with the Pelasgi, with the 'Poloste' (Pulusatu, Pulost)—the name of a conquered tribe inscribed on Egyptian monuments; and with the 'Palatzu on the Western Sea,' read in a cuneiform record of Iva-Lush, king of Assyria. It was the Greeks who, following in the track of the Egyptian Pharaohs and Ptolemies, by degrees transferred the special name of this narrow strip of Philistia to the whole country of *Palestine*:—under which heading the physical features also of this part are more fully dwelt upon in this work.

Suffice it here to mention that two parallel tracts divide the plain: the sandy tract (Ramleh) with the maritime cities, and the cultivated tract, which contains the inland cities, and which is one of the most fertile in the whole region. An immense plain of corn-fields stretches from the edge of the sandy region right up to the hills of Judah, intersected by orchards and gardens, olive-groves and vineyards, wherever the eye rests. Five royal cities, the seats of the princes of the Philistine Confederacy, stand out prominently in the history of the people, besides a few no less conspicuous 'Daughter-cities.' At present, however, nothing remains in most instances but a small array of huts, or at most an insignificant village; one and all, however, gloriously embedded in luxuriant verdure, flowers, and blossoms. The cities so closely intertwined with Philistine history that we must at least rapidly mention them, are, proceeding from north to south, Jabne (Jabneel, Jamnia), now Yebna, on the western bank of Wadi Surâr, about two miles from the sea, and three from Ekron. It was taken by Uzziah together with Gath and Ashdod, and was a place of vast importance during the Maccabæan wars; in Philo's time it had risen to be one of the most populous cities of Judæa; and became after the destruction of Jerusalem the seat of the great Sanhedrim, and one of the most celebrated academies under Gamaliel. The Crusaders identified it with Gath, and erected a fortress upon it which they called Ibelin. Few traces of antiquity are left to it in these days. Next in order stands Ekron (Akkr), situated on the southern slope of a ridge which separates the plain of Philistia from Sharon. It was thither that the ark was sent from Gath, and whence it was instantly sped on to Bethshemesh. Alexander Balas, king of Syria, gave this city to Jonathan Maccabæus. In Jerome's time it was a well-peopled town; now it is a village of about fifty rotten mud-huts. Gath, which has now entirely disappeared, and the situation of which can only now be conjectured (Tell-as-Safieh), is known in Biblical history as the native-place of Goliath, and the place of refuge of David from Saul, where, having first had to feign madness in order to escape death at the hands of the Philistines (Ps. lvi.), he was afterwards received with kindness by Achish. When he had ascended the throne he conquered the city. It was in later times taken by the Syrians. Uzziah dismantled it together with the other principal fortresses, and from that time forth it ceased to play a part in history. Ashdod (Azotos), now Esdûd, midway between Gaza and Joppa, and situated

on the usual military route between Syria and Egypt, was a place of vast importance once, hotly contested for for a long time between Israelites and Philistines. Here it was that the ark was brought after the battle of Aphek, into the temple of Dagon. Uzziah dismantled the city, which subsequently was taken by the Assyrians, and again by Psammetichus, after a siege of 29 years—the longest on record. Destroyed by the Maccabees, it was rebuilt by Gabinius, the Roman governor of Syria, and Herod the Great presented it to his sister Salome. From here it was that many Jews, returning from the captivity, married wives, whose children spoke the mongrel dialect called Ashdodite. A small array of hovels now occupies its site. Next is Askalon (Askulân), between Ashdod and Gaza, the magnificent ruins of which still speak of its pristine glory. Notwithstanding its allotment to Judah, it did not fall under Jewish dominion for any length of time before the Maccabees. The birth-place of Semiramis and Herod the Great, it is also well known by the important part it played in the Crusades. Gaza (Ghuzzeh), about three miles from the sea, an important town still, and one of the oldest cities in the world, since it existed already before Abraham left his native country, the seat of 'giants' at Joshua's time, taken and retaken by Israel and the Philistines at different periods. It was to Gaza that Samson was brought blind and in fetters. Alexander the Great besieged and captured it, and after him Jonathan Maccabæus and Alexander Jannæus. Fortified again by Gabinius, it was taken by the Mohammedans in 634, fortified by the Christians in 1152, and retaken by Saladin. Some few traces are still left of the ancient port (Majuma). Last in the list stand Gerar, on the borders of Idumæa, remembered in the history of Abimelech, and Abraham, and Isaac; and Raphia (Refah), near which Antiochus Philopator vanquished Antiochus the Great, which was taken and destroyed by Alexander Jannæus, and rebuilt by Gabinius. Of these, Gaza, Ashdod, Ekron, Askalon, and Gath were the capitals of the five small principalities, and their hegemony varied with the peculiar circumstances of the commonwealth.

After this rapid sketch of the chief cities and the country itself, whose position—between Phœnicia and Syria on the north, and Egypt and Arabia on the south—whose physical conditions, its seaboard favourable to naval enterprise, its plain adapted for war-chariots, its elevations suggestive of fortresses and strongholds, and whose rare fertility of soil and variety of products, go far to explain the marvellous rapidity with which the people possessed themselves of an amount of wealth and power incredible almost at first sight, and by turns terrorised and subsidised that whole country of which they held but an extreme narrow strip: we turn to one of the most puzzling, and, we cannot forbear from adding, most barren problems, viz., the origin of the Philistines; premising, however, that we shall content ourselves in this place with merely indicating the principal opinions held on the subject, without entering into the very unsatisfactory controversy itself.

Two apparently contradictory statements are found in the Bible respecting this point. While the genealogical table in Genesis (x. 13, 14), in the enumeration of the Egyptian colonies, reads, 'And Mizraim begat . . . the Casluhim, from whence (כַּשְׁלִיטִים) came Philistines, and [begat, viz.] the Caphtorites;' Amos, on the other hand, makes

the Philistines come forth from Caphtor (ix. 7). This latter view is also taken in Deut. ii. 23, which speaks of the 'Caphtorim who came forth from Caphtor' as the destroyers of the Avvim, the people who held the south-western sea-coast before the Philistines supplanted them. Again, in Jer. xlvii. 4, the Philistines are called 'the remnant of the נ' (maritime country? island?) of Caphtor.'

Among the various solutions of this difficulty that have been attempted, we have to mention first of all the transposition of the word Caphtorim (Gen. x. 14) before the phrase 'whence [not 'out of whom'] came the Philistines:' thus making either the Caphtorim alone, or both them and the Casluhim the progenitors, as it were, of this people; which, indeed, exhibits many signs of being a compound race. Again, it has been assumed that the Caphtorim were originally a powerful neighbouring tribe of the Casluhim: the latter being the primitive denomination of the Philistines (before they 'emigrated'), and that in the course of time these Caphtorim subjected their less powerful neighbours, the Casluhim or Philistines, who by some means regained their liberty and left the country of Caphtor. Thus they might afterwards not only have been said to have come from Caphtor—indeed, to have been 'brought out' from there, as were the Israelites from Egypt, with whose exodus Amos compares theirs—but by a further stretch even been called *Caphtorites*.

Whether, however, or not, any of these or similar conciliatory explanations is accepted, or whether, simply, as in other instances, the genealogical table in Genesis is at variance with other ethnographical traditions of the Bible, the overwhelming evidence traces the Philistines to Caphtor. And here a new difficulty, not easy to solve with our as yet very scanty records, arises. Where was Caphtor? The Targum, LXX., Vulg., and the ancient commentators, followed by authorities like Bochart, Gesenius, etc., render it—palpably misled by the apparent similarity of sound—Cappadocia (קפדוקיָא). The real name of that country, however, as found upon cuneiform inscriptions, being Katapatuka in early times, this hypothesis falls to the ground; quite apart from the term island or maritime country being applied to Caphtor, which does not apply to Cappadocia—not to dwell upon many further objections. Another opinion, which makes it Cyprus (כפֿתר being transposed into Κυπρος), or the supposition of a fictitious כפֿתר, is disposed of by the existence of the special name of כְּתִים for Cyprus in the Bible. A further utterly untenable notion, based on a vague similarity of sound between Pelishtim and Pelusium, identifies the latter with the lost Caphtor. One of the most widely-adopted notions, however, is, that Caphtor represents the island of Crete; and for this hypothesis many and weighty reasons are given. The 'Kretim' are in several passages (Ezek. xxv. 16; Zeph. ii. 5; 1 Sam. xxx. 14) identified with the Philistines. As the Cretans were famous for their skill in handling the bow among the Greeks, so were the Philistines in Palestine; and the corps of the Crethi who constituted David's bodyguard may have been formed after the model of the skilled Philistine archers—as, indeed, the Targum renders כְּרִתִּים קִשְׁתָּיָא archer. There are, further, some traditions recorded in Greek and Roman writers pointing to the ancient connection between the

Cretans and the Philistines. Tacitus speaks of the Jews—confounding them with the Philistines or Palestinians—as having fled from Crete. Stephanus of Byzantium mentions that the ancient name of Gaza was Μινώα, so called from Minos, king of Crete. There also he records a temple of Jupiter Cretensis, worshipped under the name of Marnas (? מֶרְנָא = our Lord; Hitzig, *Varuna*, Sanscr.) Against this hypothesis it has been properly urged that Crethi in the Bible hardly means anything else but a Carian (as shown under the heading CARIA). Nor have the various other items alleged as proofs stood the test of close scrutiny, so that we are obliged still to look elsewhere. Passing over all further suggestions—also that of Caphtor = pomegranate, being Σελῶδ (which has the same signification, and is the name of a town in Pamphylia, where an Æolian colony is known to have dwelt once)—we arrive at that which seems the most probable (as it is likewise the one contained in the primeval Biblical tradition), viz., that the Casluhim and Caphtor must both be looked for in Egypt. Mediaeval writers, Saadia, Benjamin de Tudela, and others, render Caphtor by Damietta, while other indications seem to point to a somewhat different direction in that country. Etymologically, Caphtor was brought together with Koptos (Kebt), and hor = (Δι) γυνῆτος. A still existing place, Akifour (Kafar), in the Nile-Delta, is supposed to contain a faint trace of the ancient name. Herodotus speaks of pyramids erected by a shepherd of the time of Cheops and Chephrea, named Philiton (Philitis), in which again the Philistines are recognised by some. According to Stephanus of Byzantium, Ashdod (Ἀζωτος) was founded by a refugee from the Red Sea. Manetho's account in Josephus (*c. Ap. i. 26, 27*) of the shepherds—identified by him as the Jews—is supposed by some to refer in reality to the Philistines, or rather to that portion of them which the Bible emphatically called Casluhim. These—to sum up with the least improbable (but still very precarious) hypothesis—are supposed to have been aborigines of Cassiotis (פְּנִסְטִיכְנָא, Targ.), a region lying on the borders of Egypt towards Arabia Petraea, south of the Serbonian bog, and to have emigrated to Colchis, whence their special name. From there they would have wandered into Palestine, where they were joined at a later period by the affinitive Egyptian tribe of the Caphtorites, who may, when they first left Egypt, have settled in Crete for a time, and in consequence of some unknown events either left that island as a body, or only sent a colony as a kind of reinforcement to their kindred tribe. Their first immigration from Egypt would thus have to be placed subsequent to Amenoph, the third king of the 18th dynasty, or about 1970; the second at about the time of the Judges.—We need hardly add, that widely different views are held on every single item of this final hypothesis,\* but it seems to offer the greatest facility for a reconciliation of our widely-contradictory and palpably-defective sources of information.

\* Such as Knobel and Movers' notion of the Philistines having been carried from Palestine into Lower Egypt by the Hyksos at a period subsequent to Abraham, their having thence gone to Crete, and returned to Palestine in the time of the earlier judges; or Ewald's double immigration from Crete, etc.

We shall not here enter into that other hotly discussed question of the 'nationality of the Philistines'—that is, whether they are of Indo-German or of Shemitic stock. Considering that the whole sum and substance of their language that has come down to us consists of about a dozen words, which, for all we know, probably exhibit but very mutilated forms, and which, if they be Semitic, as they seem to be, may have been acquired in Palestine: nothing remains but the item of their being called ignominiously 'uncircumcised,' and the fact that the greater part of their vocabulary has also been traced\* to the Sanscrit. Further, that the Caphthorim are supposed to be connected with the (Egyptian) Ludim (called both Hamites and Shemites in Gen. x. 13, 22); and that, finally, Arabic writers call the Philistines Amalekites. That a variety of conclusions have been drawn from these different points in favour of either of these opinions, we need hardly add.

But the fact is, that, save the vague traditions and the still more vague allusions to their being a mixed race (cf. the 'Crethi' = Caphthorim and 'Plethi' = Casluhim, Homer's Ἐρεβκῆρτες and Πιλασγῶι, etc.), and the historical item of the Caphthorim originally holding the Negeb, while the Philistines proper held the Shephelah—absolutely nothing is known about the previous history, kindred, abode, etc., of the two or more tribes and their primitive names, which went to the composition of this people, and speculation has not succeeded in satisfactorily filling up this gap in our knowledge.

Their history as a people, or rather those few fragments biblical records contain of it—chiefly as far as they came in contact with the Israelites—need not be told here at length. The date of their first immigration into Palestine, or that part of it before them held by the Avvim, is, as we have said, most uncertain. It must, however, have taken place after that of the Canaanites, whose possessions at one time (Gen. x. 19) extended to Gerar and Gaza. At the time of Abraham we find the land of the Philistines mentioned, and Abimelech, king of Gerar, is in the history of Isaac called king of the Philistines.† At the time of the Exodus they held the country to the frontiers of Egypt, and had become so powerful already that Moses led Israel not through the way of the land of the Philistines, although that was near, 'for God said, lest peradventure they see war, and they return to Egypt.' At the time of Joshua they are found as a confederation of the five states of Gaza, Ashdod, Askalon, Gath, and Ekron, ruled by Princes; and such was their prowess, that about that period they simultaneously engaged in a war by land with the Sidonians, and at sea with the Egyptians. Yet what had not been done in the days of Moses was done in those of Joshua—the Philistines were numbered among the peoples to be

conquered, and their land was disposed of for the benefit of the tribe of Judah, although Joshua never in reality seems to have gone to war with them. Not long after his death, however, we find them holding the Israelites in bondage, until Shamgar, the son of Anath, 'slew of the Philistines 600 men with an ox-goad,'—a feat strangely enough not recorded by Josephus—'and thus delivered Israel.' But their deliverance was of but brief duration. Their guerilla raids continued under Jephthah, and still more under Samson, when they, in conjunction with the Ammonites, kept the Israelites in subjection for forty years. In the battle of Aphek they carried away the ark itself. Samuel first put an end to this period of national humiliation. In the battle of Mizpah the Philistines not only lost their sway over Israel, but had to yield to them their own territories of Ekron and Gath. This, however, seems to have been only a partial victory, and of short duration. Saul had to contend with them during the whole period of his reign. The valiant support of Jonathan and David gained for him the battles of Michmash, where the Philistines were completely routed and pursued to Ajalon, and of Socho (the place of the episode of Goliath), which ended in the Philistines being driven to flight and pursued to the gates of Gath and Ekron with a loss, according to Josephus, of 30,000 killed and twice that number wounded. They subsequently suffered several other defeats, chiefly at the hand of David, until the latter was himself obliged to seek refuge with Achish, King of Gath. Thus, at this time—perhaps induced by the recent disasters—the Philistines appear to have returned again to the primitive monarchical form in which we find them at the time of the patriarchs; nay, the primeval regal title of father-king (Abimelech) itself was resumed by the monarch. His power, however, seems to have been considerably circumscribed by his Princes, who, for instance, forced him to send David back from Gilboa against his own will. At this place it was where the Israelites suffered one of the heaviest reverses at their hands, and where Saul himself and his sons fell. When, after Ishbosheth's death, 'all Israel and Judah had submitted to David,' the Philistines, who hitherto had left him undisturbed, renewed their hostilities, but were repeatedly beaten—at Baal-Perazim, with the loss of their gods, and at Rephaim, where they suffered an immense slaughter. Nevertheless the war was not at an end yet. Many more times had David to march against them—his arms being always victorious—before 'their horn was broken asunder,' and he was able to leave to his son Solomon their territory as a conquered domain (1 Kings iv. 21; 2 Chron. ix. 26). The schism between Israel and Judah, and the civil war that ensued, was probably taken advantage of by the Philistines. Nadab, the second king of Israel, is found besieging one of their cities (Gibbethon) situated in the territory of Dan, and the siege was renewed again under Omri. Jehoshaphat made them, or part of them, tributary, but under his son Joram they, in conjunction with the Arabs, invaded Judah (according to Chronicles only) and carried all the treasures together with the whole royal family captive. Uzziah (again according to Chronicles only) soon afterwards carried war into their own territory, dismantled Gath—which in the time of Jehoash had been taken by Hazael king of Syria—Jabneh, and Ashdod, and erected strongholds on their land. Under Ahaz again

\* By Hitzig, who even went so far as to offer a *ducat* for four Philistine words derived more convincingly from the *Hebrew* than from the Indo-Germanic; forgetting that there is a certain difference between deriving words from the Semitic and from Hebrew.

† 1 Chron. vii. 21, 22, the men of Gath, who had slain certain sons of Ephraim, are called 'born in the land'; the Hebrew term for which seems to indicate both their foreign origin and their having lived in the country for one or more generations.

they revolted successfully, adding a large portion of western Judah to their own domain. This acquisition, however, did not remain long in their hands. Hezekiah overran their whole country, and gained several important advantages. About the same time, Sargon, king of Assyria, 'the smoke of the north,' sent Tartan his general against Palestine, the possession of which became, during the continuous contest between Egyptians and Assyrians, matter of highest import to both, and he took Ashdod, the frontier fortress, after a three years' siege. Under Sennacherib the greater part, if not all, of the strongholds, fell under Assyrian sway. Whether, after their defeat before Jerusalem, they were still able to hold Ashdod, is at least doubtful: at all events we find Psammetichus, king of Egypt, besieging it some time afterwards, for twenty-nine years, and finally taking it. About this period, it would appear, marauding Scythian hordes traversed Philistia on their way to Egypt, and spread desolation around them; spoiling even the temple of Venus at Askalon. In the course of the endless struggles for supremacy between the Egyptians and the Asiatic conquerors, Philistia, the butt of both, gradually sank into ruin and comparative insignificance, politically and otherwise, although the Chaldaean conquerors (to judge from the fierce denunciations of Zechariah, ix. 5) still seem to have left them a shadow of independence. At the destruction of Jerusalem the old hostility flamed up once more, for the last time. After the exile the once bitter enemies had so far forgotten their time-hallowed feud, that even intermarriages took place between them. And also, by this time, their very name of Philistines seems lost or forgotten. Nehemiah speaks of Ashdodite, not of Philistine, women, and the corrupt Hebrew which the offspring of these intermarriages spoke was Ashdodite and not Philistine. There is then no longer such a country as Philistia, but special cities of it are named. The inhabitants of the *Γῆ Φιλισταίου*, as, in the Maccabæan reawakening of the old traditions, the country is named once more (1 Maccab. iii. 24), are themselves but *ἀλλόφυλοι*, strangers, and were gradually lost among the nations that from time to time overran and held for a period the territory of their fathers, a territory which henceforth shared the general name of Palestine with the entire country between the Lebanon and Egypt. Alexander Balas annexed part of ancient Philistea to Judæa. Pompey incorporated some of its cities with Roman Syria; further portions fell to Herod's and to Salome's share. Its subsequent fortunes will be found noticed under PALESTINE.

Regarding the general character, the social, political, commercial, religious, and other institutions of the Philistines, our information is scanty enough. That they were an enterprising, warlike, industrious people, is clear enough throughout their history. Agriculture and commerce—for both of which, as we saw, their country offered extraordinary facilities—flourished among them at an early period. Corn, wine, oil, cattle: the products of their own land; linen, spices, and other imported goods—among which are also to be reckoned slaves—formed the staple of their trade by land and sea. Nor were their own manufactures unimportant. The skill of their smiths, armourers, builders, founders, workers in gold and silver, etc., must have reached a very high degree, and their wares were sought after in countries less advanced

in the arts of peace or war. Of their political institutions we know little save what has been mentioned already, that they at first seem to have formed a monarchy, afterwards a confederacy of five—respectively four—principalities, and finally a kind of limited monarchy. What was the exact *status* of the שְׁרָנִים, Seranim (= Axles; ? שֶׁרֶן,

Hebr. Prince; or Çarana, Sanscr. = Refuge), their rights and duties, we can only conjecture by analogy. Probably theirs was a kind of chief-governorship in times of peace, and the chief-commandership in times of war, over their special provinces and their armies. Their fully-developed military organisation, their dexterous administration of troops (for whose full armour we may refer to 1 and 2 Sam. passim), and their fortresses, enabling them to take the field at any moment, and almost against any combination of enemies, are astounding. But this admirable system of defence must also have had its drawbacks. An enormous army had to be kept in a state of efficiency even in times of peace, at the expense of the nation. Even if the extraordinary number in 1 Sam. xiii. 5\* is much reduced, enough must have remained to make them a heavy burden to the commonwealth. Many of their soldiers took foreign service like David's 'Krethi' (heavily armed) and 'Plethi' (lightly mounted) bodyguard. We have already stated the utter absence of reliable information respecting their language; and, unwilling to substitute hazy speculations for wanting facts, we shall at once turn to their religion, referring at the same time for more detailed information on their various deities to the special articles devoted to them. It was, in its general character, principally a worship of nature and its phenomena, and very much akin to that of the Phœnicians (*q. v.*) The general term for the Godhead was Elohim; and only those of them who are in foreign service swear by 'Jehovah' (2 Sam. xv. 20). Both their own individual gods, as Astaroth, Dagon, etc., and the Israelitish Jehovah, are denominated Elohim in several places, and by the same name are also known those representations of their deities which were either carried on the person as a kind of amulet or in larger figures taken into the battle. From the material in which they were wrought, they are also called Azabim (γλυπτὰ τῶν θεῶν, 1 Maccab. v. 68), and it is in the 'houses of the Azabim' that the tidings of victory are proclaimed. As the principal individual deity appears Dagon, who had a sanctuary in almost every Philistine city, and principal sanctuaries in Gaza and Ashdod. Several places were called after him (Bethdagon, Kaphardagon). He was represented with a human face and two hands, otherwise his body was that of a fish. His female counterpart was the goddess Derketo (Atergatis), *Ἡμισὴ μὲν γυνή, τὸ δὲ ὀκόσον ἐκ μηρῶν εἰς ἄκρους πόδας, ἐχθρὸς οὐρὴ ἀποτείνεται* (Lucian, *de Dea Syr.*, 14). The fishes were sacred to both, and were therefore not to be eaten. Besides these, they revered chiefly Astaroth (Aphro-

\* 'Thirty thousand chariots, six thousand horsemen, and people as sand on the sea-shore.' Of the many conjectures on these vast and rather disproportionate numbers we will only mention Ewald's, who proposes their transposition, so as to give the usual preponderance to the horsemen. Josephus records three hundred thousand foot, thirty thousand chariots, and sixty thousand horse.

dite) = Alilath, the Queen of Heaven (Jer. vii. 18, etc.), and Baal, the Lord of Heaven (Baal Samin), who was worshipped in Philistea principally as Baal Zebub (2 Kings i. 2), or the God of Flies (*Zeús 'Απόμυιος*, *Myiagrus Deus*), creator and destroyer of the pestiferous swarms of flies in the hot season (the *Deus Achor* of Pliny, *Hist. Nat.*, x. 28). He was worshipped on high mountains illumined by the morning sun, and he may thus also be taken as Sun- and Mountain-God. [BAAL.] The usual apparatus of oracles, priests, sorcerers, etc., was not wanting, and their aid was frequently enough invoked even by the Israelitish people and kings in their dire distress. The Philistines carried charms about their persons, and took their deities with them to the wars. Altogether there appears, as we said before, a great affinity between their religious *cultus* and that of the Phœnicians, although the scantiness of our information on that head is not sufficient entirely to abolish the hypothesis of their being Pelasgians, and their gods being Indo-Germanic gods, modified by Shemitic surroundings and traditions (cf. Knobel, *Völkertafel*; Ewald, Bertheau, *Geschichte*; Hitzig, *Urgeschichte*; Stark, *Gaza*; Movers, *Phanicië*; Reland, *Palestina*, etc.)

PHILO or PHILON, called by his own nation פִּילֹן הֵיחָד (Φίλων ὁ Ἰουδαῖος, PHILO JUDÆUS. See Bartolucci, iv. 345), is the name of the celebrated Jewish writer who, with his contemporary Josephus, has the glory of forming that Hellenist literature which has in all subsequent ages engaged the attention of the most intelligent critics in history, philosophy, and theology. Philo was a native, and throughout life an inhabitant, of Alexandria. He was descended from a priestly family, which seems to have been distinguished; as, according to Josephus (*Antiq.* xviii. 8. 1), his brother Alexander was alabareh, or governor of the numerous Jews of his native city. According to Eusebius (*Præp. Evang.* viii. 13), his father gave him an excellent education from the best teachers in all the doctrines, laws, and customs of his ancestors. Nor was his training confined to Jewish literature. His writings show him to have been an earnest student of the Greek, especially the Platonic philosophy, for the acquisition of which the most favourable opportunities would occur in Alexandria, at that time the very metropolis of the learned world, and the home of Greek philosophy. Philo (in his treatise *de Congressu*, xiv.) refers to his own attainments in grammar, philosophy, geometry, music, and poetry. His accomplished character was gracefully attested by his wife, who, when once asked why she alone of all her sex did not wear any golden ornaments, replied: 'Αὐράκης κόσμος ἐστὶ γυναικὶ ἢ ἀνδρὸς ἀρετή—The virtue of a husband is a sufficient ornament for his wife' (*Fragments*, ed. Richter, vi. 236). Although the bent of Philo's pursuits was contemplative, we find him engaged, on one memorable occasion at least, in public business of great importance, such as proves him to have been held in high esteem by his fellow-countrymen. On the insane attempt of Caius Caligula to extort from his subjects divine homage to his own statue, Philo was sent from Alexandria, at the head of an embassy of five (Joseph. *Antiq.* xviii. 8. 1; comp. *De Legat. ad Caium*, xxviii.), to deprecate the emperor's wrath, which threatened even the Jews with persecution for disobeying the

imperial decree. The date of this embassy, the winter of A.D. 39-40, gives us a clue to the time of Philo's birth. He describes himself in his interesting account of the legation as advanced in years. He was probably about 60 years old—if so, he was born about B.C. 20, and was contemporary with the events of the N. T. This circumstance, coupled with the man's high intelligence and interest in sacred learning, as well as with the fact that he once visited Jerusalem 'to offer up prayers and sacrifices in the temple' (although only one such visit is referred to by him [*Fragments*, Richter, vi. 200], his piety and devotion probably led to occasional repetitions of this pilgrimage, which were less likely to be mentioned because of his modesty and reserve in personal matters), led ancient writers to connect Philo intimately with Christianity. Photius (*Bibl. Cod. cv.*) makes him a friend of St. Peter; as do also Eusebius (*Hist. Eccl.* ii. 17), St. Jerome (*Catal. Script. Eccl.*), and Suidas. Photius goes so far as to say that Philo was admitted into the Christian church, from which he afterwards fell away. Such statements we have no means of testing. Philo's own extant writings give us no clue, and this fact tells against the probability of the story. Greater show of reason have those moderns who, seeing in Philo's writings a standard of Alexandrine Greek, adduce them as illustrations of the language of the N. T. Mr. Grinfield, in his *Hellenistic Greek Testament*, and the accompanying *Scholia*, has derived many of his notes from the works of Philo; in the application, however, of such illustrations, it must be borne in mind that Philo's style was hardly a *natural* one; it is very elaborate, and avoids Alexandrine provincialisms, and on that account often fails to elucidate the simple diction of the N. T., even where there is similarity in the subject-matter (comp. Carpzovii *Exer. Sacr. in Ep. ad Hebr.*, p. 140). But recent critics of the Rationalist school are not content with finding in Philo such illustration of the N. T. as might be expected to occur in a contemporary, and in some respects kindred, Greek writer; they go so far as to assert that some of the prominent doctrines of the sacred writers are little else than accommodations from the opinions of Philo, mediate or immediate. Thus Grossman (*Quest. Philon.*, sub. init.) does not scruple to say that Christianity is the product of the allegories of the Jewish synagogue and of Philo. Other writers, more measured in their terms, trace isolated truths to a like source. For instance, the well-disposed Ernesti (*Institutes*), and after him Lücke, who says: 'It is impossible to mistake as to the immediate historical connection of John's doctrine of the *Logos* with the Alexandrian in its more perfect form, as it occurs in Philo.' Similarly, Strauss, De Wette, and others; while others again apply the like criticism to St. Paul. Among these we must especially notice Gfrörer, whose work, *Philo und die Jüdisch-Alexandrinische Theologie*, has been made accessible to English readers, in an abridged form, by Professor Jovett in his Dissertation, *St. Paul and Philo*, contained in his commentary on St. Paul's Epp., vol. i., p. 363-417. No criticism, however, is to be tolerated by the believer in Revelation which does not start from the principle that the characteristic truths of Christianity are self-evolved, *i.e.* (to use Dorner's words), 'have not emerged from without Christianity, but wholly from within it' (*Person of Christ* [Clark],

vol. i., Introduction, p. 45).<sup>\*</sup> Although we cannot allow that the inspired volume of our religion owes in its origin anything to Philo, we do not deny to his writings a certain utility in the interpretation of the N. T. [PHILOSOPHY, GREEK.] Besides the explanation of words and phrases above referred to (a service which is the more valuable because of Philo's profound acquaintance with the Septuagint version, in which the writers of the N. T. show themselves to have been well versed also), the works of Philo sometimes contribute interesting elucidation of Scriptural facts and statements. We may instance his delineation of the character of Pontius Pilate (*de Legat. ad Caium*, xxxviii., Richter, vi. 134; Bohn iv. 164). This well-drawn sketch of such a man, from the masterly hand of a contemporary, throws considerable light on more than one point, such as the relations of Herod and Pilate, which are but lightly touched in the gospels (comp. Hale's *Analysis*, iii. 216-218). And, as a second instance, may we not regard the remarkable passage of St. Paul as receiving light from Philo's view of the twofold creation, first of the heavenly (*οὐράνιος*) or ideal man, and then of the earthly (*γῆινος*) man? (Comp. 1 Cor. xv. 46, 47, with Philo, *de Allegor. Legis*, i. 12, 13 [Richter, i. 68; Bohn, i. 60], and *de Mundi Opific.* 46 [Richter, i. 43; Bohn, i. 39]; and see Stanley on *Corinthians*, i. 331.) But then such illustration is rather an example of how Philo is corrected by St. Paul, than of how St. Paul borrowed from Philo. Respecting the allegorical method of interpreting the O. T., of which the apostle is alleged to have derived the idea from our author, it should be remembered that St. Paul, guided by the Divine Spirit, who had indited the ancient Scriptures, was directed to apply O. T. facts to N. T. doctrines, as correlative portions of one great scheme of providential dispensation; whereas Philo's adaptations of the same facts were only the product of an arbitrary and extremely fanciful imagination; so that in the case of the former we have an authoritative and sure method of interpreting ancient events without ever impairing their historical and original truth, whereas the

latter affords us nothing besides the conjectures of a mind of great vivacity indeed, but often capricious and inconsistent, which always postpones the truth of history to its allegorical sense, and oftentimes wholly reduces it to a simple myth. Readers of Philo are well aware of the extravagance and weakness of many of his allegories; of these some others are inoffensive, no doubt, and some are even neat and interesting, but none carry with them the simple dignity and expressiveness of the allegorical types of the N. T. St. Paul and Philo, it is well known, have both treated the history of Hagar and Sarah allegorically (comp. Galatians iv. 22-31 with Philo *de Congressu*, 1-5 [Richter, iii. 71-76; Bohn, ii. 157-162]; and see Dr. J. B. Lightfoot, *Epist. to Gal.*, pp. 189-191; and Dr. Howson's *Hagar and Arabia*, pp. 20, 36, 37); but although we have here one of the best specimens of Philo's favourite method, how infinitely does it fall short of St. Paul's! To say nothing of authority, it fails in terseness and point, and all the features of proper allegory. The reader will at once perceive this who examines both. In this article we are limited to a brief notice of the *Biblical* relations of our author, to the necessary exclusion of his philosophy and theology, or rather theosophical speculations. For an account of his philosophical and theological system in general, which was an effort to reconcile Moses and Plato, varied with a sprinkling of the Pythagorean (Clement of Alexandria expressly calls him *ὁ Πυθαγόρειος*, *Stromata*, i. 15, p. 131) and Stoic doctrines, the reader is referred to Mosheim's notes on Cudworth, pp. 640-649 [Trans. by Harrison, vol. ii., pp. 320-333], where Philo's influence on Patristic divinity and early heresy, especially the Sabellian, is clearly traced; to Ritter, *Hist. of Phil.* [Trans. by Morrison], vol. iv., pp. 407-478; and to Dollinger's *The Gentile and the Jew* [Trans. by Darnell], vol. ii., pp. 398-408. Philo's opinions about the divine *Logos* have been warmly discussed. The ancients, as we have seen, were fond of identifying them with Christian doctrine; Mangey, in the middle of the last century, accompanied his splendid edition of Philo's works (2 vols. folio) with a dissertation, in which he made our author attribute, in the Christian sense, a distinct personality to the *Logos*; Bishop Bull had stated a similar opinion (*Def. Fid. Nic.* [Trans. by the writer of this article for the Anglo. Cath. Lib.], vol. i., pp. 31-33); and, more recently, Bryant (*Sentiments of Philo Jud. concerning the λόγος*), and, very lately, Dr. Pye Smith (*Messiah*, vol. i., pp. 573-600). But the conclusions of these writers, however learnedly asserted, have been abundantly refuted in many works; the chief of which are Carpzovii *Disput. de λόγω Philonis, non Johannis*, adversus Mangey, 1749; Cæsar Morgan's *Investigation of the Trinity of Plato and of Philo Jud.*; Dr. Burton's *Bampton Lectures*, note 93, pp. 550-560; and Dörner's *Person of Christ* [Clarke], vol. i., pp. 22-41. (See also the able articles of Professors H. B. Smith and Moses Stuart, in the *Bibliotheca Sacra*, vol. vi., pp. 156-185, and vol. vii., pp. 696-732.) An interesting review of Philo's writings and their relation to Judaism, from the Jewish point of view, occurs in Jost's *Geschichte des Judenthums*, i. 379-393 (the chapter is designated *Die Gnosis im Judenthume*). But for the completest, and withal succinctest, examination of the entire field of Philo's opinions, we refer the student to J. G. Müller's art. 'Philo,'

<sup>\*</sup> Instead of making Philo, in any sense, a fountain-head of Christian doctrine, it would be more correct to regard him as the unconscious source of antichristian opinion;—*unconscious*, we say, for with all his knowledge and skill in style, Philo possessed not those energetic qualities which characterise founders of schools of opinion. To say nothing of Philo's influence upon the theosophising fathers of the Church, Clement of Alexandria and Origen, who borrowed largely from their Jewish predecessor and fellow-citizen, some of the salient heresies of the early centuries had almost their spring in the Philonian writings (for the affinity of the opposite opinions of Arius and Sabellius to certain opinions of Philo, see Mosheim's Notes on Cudworth cited below); while that Pagan philosophy, the Neo-Platonism of Alexandria, which derived much of its strength and obtained its ultimate defeat from the Christianity which it both aped and hated, is mainly traceable to our Philo. (For a popular but sufficiently exact statement of (1), Philo's relation to Neo-Platonism; and (2), Of the antagonism of this Neo-Platonism to Christianity, the reader is referred to Mr. Lewes's *Hist. of Philosophy*, pp. 260-278.)

in Herzog's *R. Encycl.* xi. 578-603. Shorter and more accessible, but inevitably imperfect notices occur in Schaff's *Apostolic Church* [Clarke], pp. 211-214; Horne's *Introd.* [by Eyre], pp. 277, 278; [by Davidson], pp. 363-365; Davidson's *Hermeneutics* [Clarke, 1843], pp. 63-65; Fairbairn's *Hermeneut. Man*, p. 47. A temperate review of Jowett's *Dissertation on Philo and St. Paul* may be found, written by Dr. J. B. Lightfoot, in *Journal of Philology*, vol. iii., pp. 119-121; and for sound views respecting Philo's doctrine of the λόγος, as bearing upon the writings of the N. T. (see Neander's *Planting of Christian Church* [Bohn], ii. 13-15; Westcott's *Introduction*, pp. 138-143, and Tholuck's *St. John* [Clarke], pp. 62-67. The interest of Jews in the writings of their philosophic countryman is curiously exhibited in the Hebrew version of certain of them. These are enumerated by Fuerst, *Bibl. Judaica*, ii. 90. As. de' Rossi, one of the translators, has revived Philo's synonym *Jedidiah*, by which he was anciently designated in Rabbinical literature (see Bartolucci, *ut supra*, and Steinschneider's *Bodl. Catal.*, s. v. Philon). We ought not to close this article without noticing the old opinion which made Philo the author of the beautiful *Book of Wisdom* in the Apocrypha. This opinion, which was at one time very prevalent, has not stood its ground before recent critical examination. For the literature of the question we can only refer our readers to Professor C. L. W. Grimm's *Das Buch der Weisheit*, Einleitung, sec. 6, where the authorities on both sides are given. Corn. a Lapide, in *Librum Sapientie*, also discusses Philo's claims to the distinguished honour which tradition had conferred on him, but decides against him [new edition by Vives, vol. viii., p. 264]. Besides Mangey's edition of Philo, mentioned above, may be added Turnebus's edition (Paris 1552, folio), emended by Hoeschelius (Colon. Allobrog. 1613; Paris 1640; Francof. 1691); Pfeiffer's edition, incomplete (Erlangen 1785-92, 5 vols. 8vo), and the convenient edition of Richter (Lips. 1828-30, 8 vols. 12mo). This last contains not only a reprint of Mangey, in the first six vols., but two supplementary volumes of Philo's writings, discovered by Angelo Mai in a Florentine MS., and by Bapt. Aucher in an Armenian version, and translated by him into Latin. A fuller account of these editions, with a list of the various versions of Philo's writings, which have been made from time to time into Latin, Hebrew, German, French, Italian, Spanish, and English, is contained in Fuerst's *Bibl. Jud.* Fuerst adds a catalogue of all the leading works in which Philo and his writings have been treated. To his list of versions we must here add the useful one published by Mr. Bohn, in four vols. of his *Eccles. Library*, by Mr. C. D. Yonge, B.A.—P. H.

**PHILOLOGUS** (Φιλόλογος), one of the Christians at Rome to whom Paul sent his salutations (Rom. xvi. 15). Dorotheus makes him one of the seventy disciples, and alleges that he was placed by the apostle Andrew as bishop of Sinope, in Pontus. But this seems altogether improbable.

**PHILOSOPHY.** This term may be properly used objectively in a wider and in a more restricted sense. In the former it is nearly synonymous with *science*, and embraces all departments of human knowledge capable of being scientifically classified—that is, where the facts are presented in their

causes, where phenomena are referred to principles, and arranged under laws. In the latter it is confined to speculative knowledge, that which the mind has of its own operations and laws, or which it acquires by reasoning from its own thoughts. We have no evidence that philosophy in the stricter sense was cultivated by the ancient Hebrews; nor have we much reason to consider that scientific study, even as regards external phenomena, was much followed by them. Forming our estimate from what of their literature has been preserved to us in the Bible, we must conclude that the ancient Hebrew mind was not specially characterised by those tendencies, nor largely endowed with those faculties which give birth to speculative research. The analytical and the logical are but slightly perceptible in their mental products, while the imaginative, the synthetic, and the historical largely predominate. We should be led to infer that they delighted rather in putting things together according to their analogies, than in distributing them according to their differences. They were careful observers of phenomena, and their minds sought scope in bold flights of imagination, or reposed in calm, protracted, and profound reflection; but it was as historians and poets rather than as philosophers that they looked on the world both of being and event.

The Hebrew theory of the world was so simple that little occasion was given to them for speculation on the mysteries of existence. Their conception of it was essentially and wholly monotheistic. They held the existence of one God, besides whom there was no other; and as the world had come into being by his simple fiat, so it was kept in being by his will, governed by his immediate agency, and subordinated to the fulfilment of his designs. No trace is discoverable in the Bible of those Pantheistic notions in which the thinkers and writers of other ancient nations seem so generally to have taken refuge from the perplexities arising out of the relations of the finite to the infinite, and which at a later period took such hold of the Jewish mind, as is attested by their Kabbalistic books (Freystadt, *Philosophia Cabbalistica et Pantheismus*, 1832). The world and the things in the world were regarded by them not as emanations from God, nor as in any sense God; they are all the work of his hands proceeding from him, but as distinct from him as the work is distinct from the workman. By the word of Jehovah all things were created, and by his word they are upheld. They all belong to him as his property, and he doth with them as he wills. They are his, but not in any sense He. As little do they seem to have realised the idea of an order of nature distinct from the will and power of God. The phenomena of being and event they referred alike to the immediate agency of the Almighty. Causation was with them simply God acting. They thus removed the distinction between the natural and the supernatural, not as some modern speculatists propose, by reducing all phenomena under natural laws, but by the reverse process, resolving all into the immediate operation of God. Man, as part of God's creation, is equally subject with the rest to his control. His times and ways are all in God's hand. By God's power and wisdom he has been fashioned; by God's goodness he is upheld and guided; by God's law his entire activity is to be regulated; at God's command he retires from this active sphere and passes into the

unseen world where his spirit returns to him who gave it.

But though this simple and childlike theory of the universe gave little scope for speculative thinking and inquiry, and though the Bible presents us with but little that indicates the existence of philosophic study among the ancient Hebrews, we are not entitled to conclude from such data that such pursuits had no existence among them. It is to be borne in mind that it was foreign to the design and pretensions of the sacred writers to discuss speculatively points on which they were commissioned to speak authoritatively in the name of God; nor must it be forgotten that we have not in the Bible the entire literature of the Hebrew people, and that as philosophic writings would, because not addressed to the popular mind, be precisely those most likely to be allowed to perish, it is possible that much may have been lost which, had it been preserved, would have showed how and to what extent scientific research flourished among the Hebrews. This suggestion acquires force, not only from the fact that we know that certain utterances by Solomon of a scientific kind, probably committed to writing, have perished (1 Kings iv. 33), but also from the statement in Eccles. xii. 12, which, besides indicating that the literature of the Hebrews was more copious than we now possess, leads, from its connection, to the conclusion that part of it at least was devoted to philosophic inquiry. The book of Ecclesiastes itself, as well as that of Job, may be held as proving that the Hebrew mind did not acquiesce wholly in simple faith, but had, like mind elsewhere, its seasons of doubt, question, and speculation on matters relating to man's condition and destiny. We may also point to Ps. xlix. lxxiii., and to many passages in the book of Proverbs, as indicating the same thing. Nor must we overlook the fact, that the Hebrew is rich in terms which are appropriate to philosophic inquiry, and indicate habits of analytic research among those by whom they were used. Of these may be mentioned **הַבְּנָה**, *wisdom*,

often used as we use *philosophy* (comp. Eccles. i. 13, where **בְּחַכְמָה** *tor* might almost be rendered to *philosophise*); **בֵּין** from **בֵּין**, *between, to separate, to discern, to understand*, i.e., to analyse perceptions into their component elements, so as to arrive at just notions of them, whence **בִּינָה**, *insight, intelligence, judgment*; **חֲקֹר** and **חָקַר**, *to investigate, to examine*; **הִנָּה**, *to think, to reflect*; **אָוֶן**, *to ponder*; **יָדַע**, *to know*, whence **דַּעַת** *knowledge*. To these may be added their names for the mental part of man, **רוּחַ**, *πνεῦμα*; **נַפְשׁ**, *ψυχή*; **נִשְׁמָה**, *anima*; **לֵב**, *καρδία*, *φρήν*.

It is further to be observed, that though the Bible does not present philosophic truth in a speculative form, it presents abundantly the materials out of which philosophies may be constructed. Philosophy thus exists in it as it exists in nature, not (to use the scholastic phraseology) in a manifest and evolute, but in a concrete and involute state; and it needs only a patient collection of its statements, and the arrangement of these according to their meaning and relations, to enable us to construct systematic developments of them. We may thus form not only a theology from the Bible, but an anthro-

pology, including physiology and a system of ethics. [THEOLOGY, BIBLICAL; Roos, *Fundamenta Psychologiae ex Sac. Script. Collecta*, 1769; Beck, *Umriss der Biblischen Seelenlehre*, 1843; Haussmann, *Die Bibl. Lehre vom Menschen*, 1848; von Schubert, *Gesch. der Seele*, 1850, 4th ed.; Delitzsch, *System der Bibl. Psychologie*, 1861, 2d ed.; Taylor, *Ductor Dubitantium*, 1660; Buddeus, *Instit. Theolog. Sittenlehre*, 2 vols.]

For the natural science of the Hebrews, see ASTRONOMY, BOTANY, ZOOLOGY, PHYSIC, and the articles on subjects of natural history in this work. For the exact sciences, see the articles CHRONOLOGY and NUMBER.

Of the Gentile philosophies, there are two which have a bearing on the due understanding of Scripture, and of which, therefore, some account may properly be given here. These are the Chaldaean and the Greek.—W. L. A.

I. CHALDAEAN PHILOSOPHY. This is a subject of interest to the student of the Bible, in consequence of the influence which the Babylonian philosophy exerted on the opinions and manner of thinking of the Israelites during their captivity in Babylon—an influence of a general and decided character, which the Rabbins themselves admit, in alleging that the names of the angels and of the months were derived by the house of Israel from Babylon (*Rosh Hashanah*, p. 56). The system of opinion and manner of thinking which the captives met with in Babylon cannot be characterised exclusively as Chaldaean, but was made up of elements whose birth-place was in various parts of the East, and which appear to have found in Babylon a not uncongenial soil, where they grew and produced fruit which coalesced into one general system. Of these elements the two principal were the Chaldaean and the Medo-Persian or Zoroastrian. It is to the first that the reader's attention is invited in this article.

The Chaldeans, who lived in a climate where the rays of the sun are never darkened, and the night is always clear and bright by means of the light of the moon and stars, were led to believe that light was the soul of nature. Accordingly it was by the light of the sun and stars that the universal spirit brought forth all things; and therefore the Chaldeans offered their homage to the Supreme Being in the heavenly bodies, where he appeared to them in a special manner to dwell. As the stars form separate bodies, imagination represented them as distinct existences, which had each their peculiar functions, and exerted a separate influence in bringing forth the productions of nature. The idea of a universal spirit disappeared, as being too abstract for the people, and not without difficulty for cultivated minds; and worship was offered to the stars as so many powers that governed the world. It is easy to see how the Chaldeans passed from this early corruption of the primitive religion of the Bible to a low and degrading polytheism.

As light was regarded as the only moving power of nature, and every star had its own influence, so natural phenomena appeared the result of the particular influence of that heavenly body which at any given time was above the horizon; and the Chaldaean philosophers believed that they found

the cause of events in its position, and the means of foretelling events in its movements. These views, and perhaps the extraordinary heat and the pestilential winds which in certain months prevail in the country, and against which there is no protection except in the hills, led the Chaldeans to the mountains which gird the land. On these observatories, which nature seems to have expressly formed for the purpose, they studied the positions and movements of the heavenly host. They thought they saw that similar phenomena were constantly accompanied by the same conjunction of the stars, which seemed to observe regular movements and a similar course. On this the Chaldean priests came to the conviction that natural events are bound together, and that sacrifices do not interrupt their course; that they all have a common origin, which works according to unknown principles and laws, whose discovery is so important as to deserve their best attention. The heavenly bodies themselves are obedient to these laws; their formation, position, and influence, are consequences of these universal laws, by which nature was controlled. This determined the Chaldeans to seek in the heavens the knowledge of the original cause which created the world, and of the laws which that cause followed in the formation of things and in the production of phenomena, since in the heavens dwelt the power which brings all things forth.

The stars were masses of light; the space which held them was filled with light; no other power appeared to operate therein: accordingly the Chaldeans held light to be the moving power which had produced the stars. It could not be doubted that this power possessed intelligence, and the operations of the mind appear to have so much resemblance to the subtlety and fleetness of light, that men who had only imagination for their guide had no hesitation to represent intelligence as a property of light, and the universal spirit or highest intelligence as light itself. The observations of the Chaldeans had taught them that the distances of the stars from the earth are unequal, and that light decreases in its approach to the earth, on which they concluded that light streams forth from an endless fountain far removed from the earth, in doing which it fills space with its beams, and forms the heavenly bodies in different positions and of different magnitudes. The creative spirit was therefore set forth by them under the image of an eternal inexhaustible fountain of light; they thought this fountain was to the universe what the sun is to the regions lighted and warmed by his beams.

As light becomes less in propagating itself, its fountain must be of an inconceivable subtlety and purity, and, accordingly, in its loftiest condition, intelligent. As its beams are removed from their source they lose their activity, and by the gradual waning of their influence sink from their original perfection; they therefore produced different existences and intelligences, in proportion as they become more distant from the fountain of light; at last, passing from one element into another, they lost their lightness, were pressed together, and made dense, till they became corporeal, and produced chaos. There accordingly was between the Supreme Being and the earth a chain of intermediate existences whose perfections decreased as they were more remote from the First Great Cause. This Supreme Being had communicated in a distinguished degree his primary radiations, intelli-

gence, power, productiveness; all other emanations had, in proportion to their distance from the highest intelligence, a less and less share in these perfections; and thus were the different regions of light, from the moon to the dwelling-place of the Supreme, filled with various orders of spirits.

The space which contained the First Cause, or Fountain of radiations, was filled with pure and happy intelligences. Immediately beneath this region began the corporeal world, or the empyreum, which was a boundless space, lighted by the pure light which flowed immediately from the Great Source; this empyreum was filled with an infinitely less pure fire than the original light, but immeasurably finer than all bodies. Below this was the ether, or grosser region, filled with still grosser fire. Next came the fixed stars, spread over a wide region where the thickest parts of the ethereal fire had come together and formed the stars. The world of planets succeeded, which contained the sun, moon, and the wandering stars. Then came the last order of beings—the rude elements which are deprived of all activity, and withstand the motions and influence of light. The different parts of the world are in contact, and the spirits of the upper regions can influence the lower, as well as descend and enter into them. As the chaotic elements were without shape and motion, the spirits of the higher regions must have formed the earth, and human souls are spirits sprung from them. To these spirits from above the system of the Chaldeans ascribed all the productions, appearances, and movements upon the earth. The formation of the human body, the growth of the fruits, all the gifts of nature, were attributed to beneficent spirits. In the space below the moon, in the midst of night, tempests arose, lightnings threaded the dark clouds, thunder broke forth and laid waste the earth; there were found spirits of darkness, corporeal demons spread through the air. Often, too, were flames of fire seen to rise out of the bosom of the earth, and the mountains were shaken. Earthly powers or demons were supposed to dwell in the centre of the earth; and since matter was held to be without activity, all movements were attributed to spirits. Storms, volcanoes, tempests, appeared to have no other object than to destroy human happiness; and these demons were held to be wicked spirits who produced these evils; to them every unfortunate event was ascribed, and a sort of hierarchy was formed of these evil beings, as had been done in the case of the good spirits. But why did not the Supreme mind put down, by an exertion of his power, this swarm of wicked spirits? Some thought it was beneath the dignity of the Primary Essence to contend with these demons; others were of opinion that these bad spirits were naturally indestructible, and as the Supreme could neither destroy nor improve them, he had banished them to the centre of the earth and to the region beneath the moon, where they indulged in their baseness and exercised their dominion: in order, however, to protect the human race against fiends so numerous and fearful, he commissioned good spirits, whose office it was to defend men against these corporeal demons. As the good and the bad spirits had various degrees of power and different offices, so they had names given to them which described their functions. As the good spirits were under an obligation to protect men

and furnish succour in their need, they were compelled to learn human language; accordingly, it was believed that a guardian angel against every evil was possessed by every one who bore his mysterious name—a name which was to be pronounced only when succour was needed. All manner of names were therefore devised, by which the good spirits were conjured or informed of human necessities; and all the combinations of the alphabet were exhausted in order to bring about a commerce between men and angels. Here is the origin of the Cabbala [KABBALA], which gave strange names to these spirits in order to bring them into connection with men, and by this means to do wonderful things (Matt. xii. 24-27). These names also sometimes served to drive bad spirits away: they were a kind of exorcism. For since it was believed that these demons had been banished to the centre of the earth, and that they could do evil only in consequence of having baffled the vigilance of the guardian spirits and escaped to the outer world, so, it was held, they were compelled to flee as soon as they heard the name of the good angels whose business it was to keep them shut up in subterranean caverns, and to punish them if they ventured from their prison-house. A power, too, was ascribed to the name of the spirit, or to the image which marked his office—a power which forced the spirit to come on being called; and, accordingly, it was held that this name carved on a stone kept the spirit near the person who wore the stone—a notion in which is probably found the origin of Talismans, which were formed either by words or symbolical figures.

The fragments of Berossus, preserved by Eusebius and Josephus, and to be found in Scaliger (*De Emendat. Temp.*), and more fully in Fabricius (*Bib. Gr.*, xiv. 175), afford some information on the subject of Chaldean philosophy. Berossus was a priest of the god Baal, at Babylon, in the time of Alexander the Great. The Talmud and other work of the Jewish Rabbins may also be advantageously consulted, together with the following authorities:—Euseb., *Præp. Evang.*, ix. 10; Philo, *De Mig. Mur.*; Selden, *De Diis Syris*, Proleg. 3; Stanley's *History of Oriental Philosophy*; Knorr's de Rosenroth, *Cabbala denudata, s. doctrina Ebraeorum transcendentalis et metaphysica atque theologica*, t. 1, Solisb. 1677, t. 2; *Liber Joh. restitutus*, Francof. 1684; Kleuker, *Ueber der Natur und den Ursprung der Emanationslehre bei den Kabbalisten*, Riga 1786; Molitor, *Philosophie der Geschichte*, 1827-28; Hartman, *Die enge Verbindung des A. T. mit dem N.*, 1831; Ketzner, *Lexicon von P. Fritz*, 1838; Brucker, *Hist. Crit. Phil.*; Ritter, *Geschich. der Phil.*; *Vergleichende Mythologie von Nork*, 1836.—J. R. B.

II. GREEK PHILOSOPHY. The purpose of the following article is to examine the question of the influence supposed by some writers to have been exercised by Greek philosophy on the doctrines of the New Testament. Thus stated, it is obviously but a limited portion of a more extensive subject—that of the general relation between philosophy and Christianity. But besides that this subject, in its full extent, could not be satisfactorily treated in an article like the present, the limits within which we propose to confine our remarks seem naturally suggested by the character of the article itself and of the work to which it belongs. On the religious side of the

question, a Cyclopædia of Biblical Literature, professing to deal, not with the later developments of Christian theology, but only with the foundations as laid in Holy Scripture, will naturally regard the speculations of philosophy only with respect to the influence which they may be supposed, rightly or wrongly, to have exercised on the composition of the Canonical Books, and not with respect to their position in the subsequent history of the Church; while, on the philosophical side, the fact that the Greeks are the only people before the Christian era who can be considered as having developed a system of pure philosophy as distinct from religion, seems to warrant the restriction of our view to the speculations of that country, and to the points of contact which may be supposed to have existed between Greek and Jewish thought before the close of the canon of Scripture. The relation of Scripture to Oriental religious ideas may be more conveniently discussed under other heads. [GNOSTICISM.]

The Jews indeed are sometimes spoken of as having had a philosophy of their own in the O. T.; but it was a philosophy in its results only, not in its method; or rather, it was a teaching which in many respects dispensed with the necessity of any philosophy at all. Many of the questions which philosophy endeavours to discuss are answered in Scripture—the personality of God, the origin of the world, the superintending providence of God, the efficacy of prayer, the free will of man, the obligation to virtue, the responsibility for vice—but the answer removes them from the domain of philosophy: they are facts to be believed, not theories to be comprehended; they are not proposed as problems to be solved by human reason, but assumed as certainties guaranteed by divine authority. Even the book of Job, which approaches most nearly to a philosophical discussion, and which has been regarded by a modern critic as an attempt on the part of the Jewish mind to construct by dialectic reasoning a theodicy, or justification of the ways of God (see Bunsen, *Hippolytus*, vol. ii., p. 7), is in truth rather an authoritative declaration by God himself of the insufficiency of such reasoning for such a purpose. The reasonings which would explain God's dealings with man are condemned; the faith which trusts in him, though he slay, is approved; but the only answer given to the questions raised is a declaration of the ignorance of man and of the unsearchableness of God's judgments. It is an answer quite in agreement with the general method of Scripture, which, even where it deals with questions common to it with human philosophy, contents itself with telling us what is to be believed as true, without attempting to satisfy the philosophical inquiry, 'How can these things be?'

The rise of philosophy in Greece may be stated in general terms as almost contemporaneous with the termination of the series of the Hebrew prophets. If we except, on the one side, the speculations of Thales and Anaximander, which belong to the first half of the 6th century B.C., and on the other side the prophecies of Malachi who wrote at the end of the 5th century B.C., the earliest developments of Greek thought fall into the latter half of the 6th century, contemporaneously with the date of those prophets who arose at the time of the return from the captivity. Even Malachi, the latest of the O. T. writers, is contemporary with

Socrates. It is manifest, therefore, that an inquiry into the influence, real or supposed, of Greek philosophy on the doctrines or the language of Scripture must be limited to the books of the N. T.; and the medium of that influence, if it was exercised at all, must be sought in the literature of the period intervening between the close of the first and the formation of the second canon.

The direct notices of Greek philosophy in the N. T. are very scanty. The words *philosophy*, *philosopher*, etc., occur only in two places, in both of which the philosophy spoken of is exhibited as antagonistic to the teaching of the gospel. In one of these (Col. ii. 8) the expression *διὰ τῆς φιλοσοφίας καὶ κενῆς ἀπάτης* apparently relates rather to the mixture of Jewish and Oriental speculations, in which might already be traced the germ of the later Gnosticism, than to the philosophy of Greece or the Jewish theories derived from it. The other place is the well-known passage in Acts xvii. 18, in which 'certain philosophers of the Epicureans and of the Stoics' are mentioned as having encountered St. Paul at Athens. The doctrines of these sects require notice only in so far as they are related to the teaching of the apostle, who, we are told, was regarded as 'a setter forth of strange gods, because he preached to them Jesus and the resurrection.' The doctrine of the resurrection of the body, or even of the immortality of the soul, would indeed be fundamentally at variance both with the materialism of the Epicureans and with the pantheism of the Stoics. The former, considering the soul to be, like other substances, a body composed of atoms, naturally concluded that it was resolved by death into its constituent elements; and even more rapidly than the body, as consisting of finer and more volatile particles (Lucret. iii. 178, *seq.*, 426, *seq.*; Laert. x. 63-67). The doctrine of the dissolution of the soul was even valued by these philosophers on account of its consolatory character, as enabling men to despise the terrors of the invisible world, and to look forward without fear to a release from the evils of life in the annihilation of their personal existence (Lucret. iii. 842, 850-854; cf. iii. 37; Laert. x. 124, 125).

The Stoics, on the other hand, from very opposite premises, arrived at a similar conclusion. With them, the soul of man was regarded as a portion and fragment of the divine principle of the universe,\* subject to that necessity by which the universe is governed, having no independent existence or action of its own, and destined, not indeed to perish with the body, but when a certain cycle of duration was accomplished, to be absorbed back again into the source from which it came.† It was a maxim of the Stoical philosophy that whatever has a beginning must also have an end.‡ They acknowledged

but one real existence, which, regarded from different points of view, was both matter and God; on its passive side an original substance, on its active side an original reason; an unformed material substance, the basis and substructure of all definite phenomena, and a pervading active power, by which that substance was supposed to develop itself into every variety of individual form.\* In this doctrine, 'the one remains, the many change and pass;' the Deity, or active power of the universe, produces all things from himself, and again, after a certain period of time, draws them back into himself, and then produces a new world in another cycle, and so on for ever.† The result of this theory, as regards the immortality of the human soul, may be given in the words of Cicero: 'Stoici autem usuram nobis largiuntur, tanquam cornicibus; diu mansuros aiunt animos; semper, negant' (*Tusc. Disp. i. 31*). The utmost duration that could be allotted to any individual soul was till the termination of the current world-cycle; and it was a disputed point among the philosophers of this sect, whether this extent of existence was conceded to the souls of all men, or only to those of the wise (Laert. vii. 157). Thus the same conclusion which the Epicureans deduced from the assumption of the multiplicity of matter was deduced by the Stoics from that of its unity: both alike recognised no real distinction between matter and spirit; and both alike inferred the impossibility of an immortal existence for any dependent being. This circumstance alone is sufficient to place a barrier between Stoicism and Christianity which cannot be removed by any approximation in moral precepts or doctrines of natural theology; and even the verbal resemblances which undoubtedly exist in these respects lose much of their significance when it is remembered that the Stoical morality was founded on fatalism, and their theology on pantheism.

It was natural, therefore, that the notice of the Greek philosophers at Athens should exhibit them in an aspect of antagonism to the central doctrine of apostolic preaching,—the resurrection of Christ, and, through him, the resurrection of all mankind; and it is probably from the same point of view that St. Paul, writing to the neighbouring city of Corinth, speaks of the preaching of Christ crucified as being 'to the Greeks foolishness.' A very different relation, however, has been asserted to exist between Christianity and one sect, at least, of Greek philosophy; and a modern critic has gone so far as to maintain that nearly all the doctrines which are usually regarded as distinctive of Christianity—the incarnation, the atonement, the free grace of God, the judgment to come—sprang from the circumstances of the age in which they were first preached, one of the principal of these circumstances being the changes produced by the influence of heathen philosophy in the Jewish ideas of God (Gfroerer, *Philo*, Preface, p. lxvi., 2d ed.) This assertion may be examined from two different points of view; first as regards the *doctrines* of the N. T.,

tius] quod nemo negat, quidquid natum sit, interire; nasci autem animos.

‡ Cicero, *Tusc. Disp.* i. 32. Vult enim [Panæ-

and secondly as regards the *language* in which those doctrines are expressed. The former involves an inquiry of the utmost importance in reference to the character and authority of the Christian revelation; the latter may be important or not, according to the conclusion at which we arrive concerning the other.

In considering the question of doctrines, it is obvious that our attention will be confined chiefly, if not entirely, to those points of teaching which are usually considered to be characteristic of Christianity as a revealed religion, as distinguished from those which belong to it in common with that natural religion of which it is, in some respects, a republication. Coincidences in the latter may be expected from the nature of the case; and however interesting and important it may be to compare, in this respect, the amount and extent of knowledge enjoyed by the heathen world with that which has been given to the Christian, such a comparison would throw but little light on the question of the supposed influence exercised by heathen philosophy on the Christian Scriptures. We shall therefore limit our inquiry to doctrines which have a special title to the name of Christian; and, in particular, to that which has been principally dwelt upon by writers adopting this point of view, and to which all other questions of the kind may be regarded as subordinate,—the doctrine concerning the Person of Christ.

In its revealed as well as in its natural character, Christianity may be considered as occupying a common ground with heathen religion and philosophy, and as presenting features in which we may naturally expect to trace a partial resemblance to them. If the conception of Christianity as a natural religion implies a communion with other religions in the truths attainable by man's natural reason, the conception of it as a revealed religion no less implies a communion in the problems which that reason endeavours, unsuccessfully, to solve. The value of a revelation to man implies its fitness to satisfy some pressing need of man's nature; and the previous consciousness of that need involves the previous effort, however unsuccessful, to meet it. The distinguishing feature of the revelation in this respect will consist, not in the introduction of wholly new ideas and feelings with no relation to the past, but in its containing an answer to questions and a supply to wants which men have vainly sought to satisfy without it. To examine the exact nature of the answer thus given, in its philosophical character, as demonstrative or authoritative, absolute or relative, appealing to faith or to reason, or to both, would be foreign to our present purpose: it is sufficient for the present to call attention to the fact that there must needs be a communion between philosophy and revelation in the problems with which both undertake to deal; and that, through that communion, the former may be expected to appear as in some sort the precursor of the latter.

The distinction between God as concealed and God as revealed has a necessary basis in the nature of human thought (Tholuck, *Commentary on the Gospel of St. John*, p. 58, Eng. tr.) It is impossible for a devout mind, whether Christian, Jewish, or heathen, to reflect on the great fact of the existence of God, and of his relation to the world, without seeing that it introduces us to a problem the most important and the most mysterious with

which philosophy can attempt to grapple. The end and aim of philosophy is to bring together into a system of connected thought the sensible and the supersensible, to determine the nature of that relation which it is compelled to believe as existing between the many and the one, between effect and cause, between the relative and dependent existences of the phenomenal world and the absolute and independent existence which they imply, and from which they spring. Thus far the problem of philosophy would seem to have a theoretical and metaphysical, rather than a practical and religious, interest. But along with this line of thought there runs another, which, commencing from a different starting-point, endeavours to converge towards the same end. In addition to the inquiry suggested by the phenomena of the world without us, there is another no less forced upon us by the facts of the consciousness within us. As a religious and moral being, man is conscious of a relation of a personal character, distinct from any suggested by the phenomena of the material world—a relation to a supreme Personal Being, the object of his religious worship, and the source and judge of his moral obligations and conduct. Could we follow these two lines of thought to the point at which they converge, could we grasp in a clear conception the identity of the one absolute existence to which philosophy aspires to lead us with the personal God, postulated by our religious feelings, philosophy and theology would become one, and would justify the ancient classification in which theology and first philosophy were synonymous terms. But this, under the present limits of human thought, we are unable to do: the meeting point of the two lines is at an infinite distance from us; and therefore, to our apprehension, they are as if they were parallel. And hence it is that, in various ages and among various nations, the philosophy that strives to ascend to the One and the Absolute has found itself driven to abstractions in which the personal attributes of the Deity have vanished out of sight; while the theology that keeps faithful to its essential principle of a personal God has been compelled to acknowledge the existence of a gulf beyond its highest conceptions, which hides from its apprehension the mystery of absolute being.

An example of these two opposite tendencies in ancient times is furnished by the Greek philosophy on the one side, and the Hebrew theology on the other. Plato, the most religious of Greek philosophers, and the one most fully possessed by the thought of the real identity of philosophy and theology, nevertheless, in his search after an absolute first principle of existence and truth, finds himself carried up to the assumption of an ideal good, which is not only beyond personality, but beyond definite existence itself.\* In a subsequent discus-

\* *Rep.* vi., p. 509. οὐκ οὐσίας ὄντος τοῦ ἀγαθοῦ, ἀλλ' ἐπὶ ἐπέκεινα τῆς οὐσίας πρᾶξις καὶ δύναμις ὑπερέχοντος; cf. vii., p. 517. For a commentary on this passage, and on the much-disputed question whether the Supreme Being in Plato's philosophy is conceived as a personal God, see Zeller, *Philosophie der Griechen*, vol. ii., p. 448, 2d ed. Cf. Herbart, *Lehrbuch zur Einleitung in die Philosophie*, sec. 146. The impersonal representation which prevails in the *Republic* is difficult to reconcile with the intelligence and personality attributed to the

sion, which forms a sequel to the former, we find an attempt made to exhibit this Supreme Being in relation to the world of definite and derived existences; and the apparent discrepancy between the language of this dialogue, the *Timæus*, and that previously employed in the *Republic*, has given rise to much forced interpretation, and, through that, to some wholly untenable theories concerning the character of the Platonic theology, and its relation to the doctrines of Christianity.

The Platonic cosmogony, as it is exhibited in the *Timæus*, appears to recognise three original and eternal existences: first, the Deity, the Creator, or rather the artificer or demiurge of the visible world; secondly, the ideal world or archetype, after the pattern of which the visible world was framed; and thirdly, the primitive matter out of which the world was framed; itself unformed and invisible, but susceptible of every variety of visible form; the substratum and recipient of those modes which constitute the material elements of the universe. The Deity, in framing the world out of the primitive matter, is said to act *from reason and design* (ἐκ λόγου καὶ διαβολῆς); *by intellect* (διὰ νοῦ); and his action is spoken of as *an exercise of reason* (λογισμός); but there is not the slightest evidence that this divine reason was represented by Plato as having a distinct personality, or as being anything more than an attribute of the divine mind. Indeed his whole language seems to necessitate the opposite interpretation. The author of the world, he says, being good, and desiring that all things should be like himself, framed the visible world after the ideal pattern; and because that which has intelligence is better than that which has it not, therefore he created the world as an intelligent being, having a soul as well as a body. Of the world as thus made, he says, that the father who made it admired it, and was rejoiced; and subsequently, after describing the creation of time, of the planets, the measures of time, and of the fixed stars, which are living beings divine and everlasting, he proceeds to tell us how the supreme Deity, having formed the souls of men, committed to these inferior deities the task of joining them to corruptible bodies. If this language is understood literally, it is difficult to reconcile the personality and intelligent action here ascribed to the Deity with the terms previously used in the *Republic* in relation to the supreme Good; and when we consider the evidently mythical character of many of its details, we shall perhaps be justified in regarding the cosmogony of the *Timæus* as a popular rather than a philosophical exposition, expressing the personal belief of the

author, rather than the logical result of his system; and as intended to express, under a symbolical form, a theory designed to fill up, or rather to leap over, the chasm which separates the ideal principle of being from the material ground of the phenomenal world, by means of the intermediate conception of a soul of the universe.\*

But the later Platonists of the Alexandrian school adopted a different interpretation. They evaded the difficulty by assuming, without any warrant from the text of the dialogue,† the existence of an impersonal supreme principle as understood, in addition to the principles expressly mentioned by Plato. To this principle, the ideal good, they assigned the highest place in the scale of existence, placing the intelligent author of the world, whom Plato calls the ever-existent God (ὁ ἀεὶ Θεός), in the second rank, as having a dependent existence derived from the first principle, and adding to these, as a third principle, the soul of the universe, the product of the divine intelligence.‡ These three constitute the celebrated Platonic or rather Neoplatonic triad of τὰ γὰρ ἅθροισμα, νοῦς, and ψυχὴ, which some of the Christian Fathers regard as an approximation to the doctrine of the Holy Trinity,§ and which has been employed in the same point of view for two opposite purposes in modern times, by Cudworth in support of Christianity, and by Gibbon in depreciation of it.|| But in truth this triad, though attributed to their master by Plotinus and others of the Neoplatonic school,¶ cannot without extreme violence be extorted from the text of Plato himself, nor fairly traced, in its complete form, to any teaching earlier than the Christian era.\*\* The most plausible evi-

\* See Zeller, *Philos. der Griechen*, ii. p. 490; Baur, *Lehre von der Dreieinigkeit*, i. p. 40; and the article 'Plato,' by Prof. Brandis in Smith's *Dictionary of Greek and Roman Biography*, p. 402.

† On this unwarranted addition, see Petavius *Dogm. Theol.*, De Trinitate, lib. i. c. 1, sec. 4.

‡ Whether these derived existences were regarded as created beings or not, has been a matter of dispute in modern times. Petavius, *l. c.*, maintains the affirmative, and hence regards the Neoplatonic doctrine as an anticipation of the Arian heresy. Cudworth, on the other hand, with whom his translator Mosheim partly agrees, considers the three principles as uncreated, and regards the Neoplatonic doctrine, in its genuine form, as an approximation to that of the Catholic church. See Harrison's ed. of *Cudworth*, vol. ii. pp. 372-389. Neither form of the theory is really Platonic, but the latter interpretation does even greater violence to the text of the *Timæus* than the former.

§ See Eusebius, *Præp. Evan.*, xi. 20; Cyril Alex. *c. Jul.* i. p. 34; iii. p. 97; viii. p. 271, ed. 1638; Theodoret, *Gr. Aff. Cur.*, Sermon. ii.

|| See Cudworth, *Intell. System*, ch. iv.; and Gibbon, *Decline and Fall*, ch. xxi.

¶ Plotin., *Enn.*, v. 1. 8; Porphyry, *apud Cyril. c. Jul.* i. p. 32; viii., p. 271. Other expositions, somewhat differing in details, are enumerated by Proclus in *Tim. Plat.*, ii. p. 93.

\*\* Theodoret (*Gr. Aff. Cur.*, Sermon. ii.) expresses an opinion that the later Platonists availed themselves of Christian doctrines in interpreting the language of their master. This is also maintained by Mosheim in his notes to Cudworth, who also calls attention to the fact that the chief evidence

Deity in the *Timæus* and elsewhere; and this discrepancy has given rise to the theories of the later Platonists. Perhaps the apparent inconsistency may be explained if we suppose that Plato himself was possessed by two separate convictions, both of which he believed to be true, yet which he was unable to combine into one theory. On the one hand he believed in a personal God, the author of the world; on the other, he was conscious that this conception fell short of the absolute first principle required by dialectic. Hence, while he generally adapts the language of his philosophy to the former belief, he occasionally intimates the existence of a higher truth, which his thought tends towards, without being able to reach. Cf. J. Simon, *Études sur la théodicée de Platon et d'Aristote*, p. 173.

dence in favour of an earlier date rests on two passages in the so-called Platonic Epistles, which, however, are too obscure to warrant any reliable inference, and which are now generally regarded as spurious, and are thought by some to bear traces of a Jewish, if not of a Christian origin.\* Nor can any greater weight be attached to another argument, also employed by some of the Fathers in support of a Platonic anticipation of Christianity, from the use by Plato and other philosophers of the term λόγος to denote the divine intelligence;† a term which, whether intended literally or figuratively, will be naturally used in relation to the divine mind, as it is in relation to the human, and which, in its earlier use, bears no trace of the theological signification afterwards assigned to it.‡ But in this respect again a distinction must be made between the language of Plato himself and that of his later followers, particularly of the Jewish Platonist Philo, whose speculations will require a separate examination.

The theory of the *Timæus* has a historical interest in relation to our present inquiry, from the use that has been made of it at various times, both by defenders and assailants of Christianity, who have regarded it, however erroneously, as an anticipation of the teaching of the gospel. Philosophically, however, it is, literally interpreted, an exception to, rather than an instance of, the general tendency of the Platonic philosophy, and of Greek philosophy in general, to carry the search for a first principle up to a simple and impersonal abstraction. In opposition to this tendency, we find the Hebrew Scriptures pervaded throughout with the idea of a personal God, the Creator of the world, and the

Ruler, in particular, of his chosen people. Yet it is intimated in various ways that this conception of personality, expressed, as it necessarily is, in terms properly denoting human attributes, though true, is but a partial and imperfect representation of the truth; that the absolute nature of God rather lies behind this representation than is fully manifested by it. This intimation appears partly in those passages which dwell on the difference between the attributes of God and those of man: 'He is not a man that he should repent;' 'I am the Lord, I change not;' 'my thoughts are not your thoughts, neither are your ways my ways' (1 Sam. xv. 29; Mal. iii. 6; Is. lv. 8); more directly in such places as Exod. xxxiii. 20-23, where Moses is permitted to see the back parts, but not the face of the Lord; Deut. iv. 12: 'Ye saw no similitude, only ye heard a voice;' in the words of Zophar in the Book of Job (xi. 7): 'Canst thou by searching find out God? canst thou find out the Almighty unto perfection?' and in the confession of the patriarch himself in the same book (xxiii. 8, 9): 'Behold I go forward, but he is not there; and backward, but I cannot perceive him: on the left hand, where he doth work, but I cannot behold him: he hideth himself on the right hand, that I cannot see him.' The same distinction between the hidden and the revealed God lies at the foundation of those passages of the Pentateuch, in which the Angel of the Lord is manifested as the divine Person, to whom especially is committed the economy of the old covenant\*—passages which the general voice of the Christian Church has interpreted as relating to the Second Person of the Holy Trinity.† The key being once supplied by these passages, we have less difficulty in acknowledging a similar distinction in places which might otherwise seem susceptible of a different meaning, such as those in which the creation of the world is ascribed to the Word of the Lord (רִבְרָא, λόγος) (See Ps. xxxiii. 6; cxlvii. 15; cf. Ps. cvii. 20, quoted by Eusebius, *Præp. Evang.* vii. 12), and possibly also those in which the wisdom of God is described in language approaching to the attribution of a distinct personality (Prov. viii. 22-31; cf. Job xxviii. 12-28). The doctrine thus partially intimated in the canonical books of the O. T. is in a slight degree further elaborated in the apocryphal books of Ecclesiasticus and Wisdom, which present somewhat more distinctly the personal representation of wisdom suggested by the Proverbs;‡

adduced by Cudworth in support of the Trinity of Plato is taken not from Plato but from Plotinus. A similar conclusion is maintained, after a careful examination of Plato, in Cæsar Morgan's *Investigation of the Trinity of Plato*. See also, Brucker, *Hist. Philos.* ii. p. 410; Tennemann, *Geschichte der Philosophie*, vi. p. 51; Ritter, *History of Philosophy*, vol. iv., p. 534, Eng. Tr.; Martin, *Études sur le Timée*, vol. ii., note xxix.; Burton, *Bampton Lectures*, note 90.

\* Epist. ii. p. 312; vi., p. 323. These passages are cited in support of the Platonic Trinity by Justin Martyr, *Apol.* i. 60; Clemens Alex., *Strom.* v., p. 255; Euseb. *Præp. Evang.* xi. 16; Theodoret, *Gr. Aff. Cur.*, serm. ii.; Cyril Alex. c. Jul. i., p. 34; viii., p. 271. On the spuriousness of the epistles in general, see Brandis, *Gesch. der Gr. Rom. Philos.*, ii. p. 180; and the recent dissertation of H. T. Karsten, *De Platonis quæ feruntur epistolis*, Traj. ad Rhen. 1864; and on these passages in particular, Prof. Thompson's note in W. A. Butler's *Lectures on Ancient Philos.*, ii., p. 38. Cf. Boeckh, *De Trag. Gr. Princ.*, p. 162; J. A. Grimm, *de Epist. Platonis*, pp. 4, 15, 17. Martin maintains the genuineness of Epist. ii., but explains it in a sense totally different from that of a trinity. See *Études sur le Timée*, vol. ii., pp. 61, 387. A similar interpretation is given by Karsten, p. 208, who regards the epistle as spurious, but not Christian.

† See Origen, *De Princ.*, i. 3 in Genes., Hom. xiv.; Euseb. *Præp. Evang.*, xi. 16; Cyril c. Jul., viii., p. 271; Theodoret, *Gr. Aff. Cur.*, serm. ii. iv.

‡ See Tennemann, *Syst. der Plat. Phil.*, iii., p. 150; *Gesch. der Phil.*, ii., p. 386; Burton, *Bampton Lectures*, p. 213.

\* See Hengstenberg, *Christology*, vol. i. p. 107, Eng. Tr. In Mal. iii. 1, the 'messenger of the covenant' is expressly identified with the Lord of the temple. In other places—*ex. gr.*, Gen. xvi. 7, 13; xxxi. 11, 13; Exod. iii. 2, 6; xiv. 19, 24—the same person is spoken of under the name of God and of an angel. To this language may perhaps be traced one portion of the later doctrine of the Logos as it appears in Philo. See Gfroerer, *Philo*, i. p. 294.

† See the authorities cited by Bishop Bull, *Def. Fid. Nic.*, sec. i. c. 1.

‡ Ecclus. i. 1-10; xxiv. 1-18; Wisd. vii. 22-30; viii. 1-9; ix. 9-11. Dähne (*Gesch. Darstellung der Jüdisch-Alex. Religionsphilos.*, vol. ii. pp. 130, 155), in opposition to Gfroerer and others, denies that the representation of wisdom in these books necessarily implies the hypothesis of a real personality as distinguished from a poetical personification.

and the latter of which has partially anticipated the use of the term *λόγος*, afterwards so conspicuous in Philo.\*

To us, reading the elder Scriptures by the light of a later revelation, it is natural to see in some at least of these obscure intimations, as well as in the more direct Messianic prophecies, a witness to and a preparation for him who was more perfectly to be made known in the fulness of time. But, before this light was shed upon them, they were destined to receive a different interpretation by connection with the speculations of Greek philosophy. The literature of Greece and Judæa came in contact at Alexandria; and the first known attempt to accomplish their fusion is that ascribed to the Jewish Peripatetic Aristobulus, in the reign of Ptolemy Philometor (B.C. 180-146);† but the principal extant specimens are to be found in the writings of the Jewish Platonist Philo, the date of whose birth may be placed about B.C. 20. Philo's system may be described as the result of a contact between the Hellenic theory of the absolute and the Jewish belief in God as represented in the O. T.‡ In his religion Philo was a Jew, with all a Jew's reverence for the oracles of God committed to the charge of his people;§ but his philosophical studies attached themselves to those doctrines of the Platonic philosophy which, while dealing with the same great question, approached it from an opposite point of view. The result in his writings was an attempted combination of the two—the Greek philosophy supplying the fundamental idea, while the Jewish Scriptures, through the Septuagint translation, contributed, by means of an extravagant license of allegorical interpretation, much of the language and illustration of the system, besides imparting to it the apparent sanction of a divine authority.|| The leading idea of Philo's teaching

is the expansion of that thought of Plato's which forms the connecting link between the philosophy of Greece and the pantheism of the east—that thought which represents the supreme principle of things as absolutely one and simple, beyond personality and beyond definite existence, and as such immutable and incapable of relation to temporal things.\*

In place of the God of the Hebrew Scriptures, who, even in his most hidden and mysterious nature, is never regarded as other than a person, Philo is led to substitute the Greek abstraction of an ideal good or absolute unity, as the first principle of a system in which philosophy and theology are to be reconciled and united; and though he is unable entirely to abandon the language of personality which the Scriptures at every page force upon their readers, he is at the same time unable, consistently with his philosophical assumptions, to admit an immediate personal relation between the Supreme Being and the creature.† The medium of reconciliation is sought in a development of the scriptural manifestation of the wisdom and the word of God, which takes the place of the soul of the world as it appears in the *Timæus*, being represented as a *second God*—the connecting link between the first principle and the world; in whom are concentrated those personal attributes which are indispensable to religious belief, and which are so conspicuously present in the Scripture theology.‡

The following short summary of Philo's system will serve to exhibit those of its features which are most nearly related to our present inquiry:§—The highest aim of philosophy, and the most perfect happiness, according to Philo, is the knowledge of God in his absolute nature, || in which he is exalted above all affinity to finite things, without qualities, and not to be expressed in speech.¶ Such know-

\* Wisd. ix. 1; xvi. 12; and perhaps (notwithstanding the protest of Gfroerer, ii. p. 232) xviii. 15. Cf. also Eccles. xliii. 26.

† Aristobulus is said to have been a Peripatetic; but of his exact relations to this philosophy nothing is known. From the few fragments which remain of his writings, he seems to have anticipated Philo in the employment of an allegorical interpretation of Scripture. His name, however, is more known in connection with forgeries of the Greek poets in support of his theory that the wisdom of the Greeks was borrowed from Moses. See Valckenær, *Diatribæ de Aristobulo*, Lugd. Bat. 1806, reprinted in Gaisford's edition of Eusebii *Præp. Evang.*; Dähne, ii. p. 73; Vacherot, *Histoire de l'école d'Alexandrie*, vol. i. p. 140.

‡ See Dorner, *Person of Christ*, vol. i., note A (p. 330, Eng. Tr.) For some of the details of this contact, see Dähne, vol. i. p. 31, seq.

§ For Philo's testimony to the divine authority of the Scriptures, see *Vit. Mos.* l. iii. c. 23 (p. 163, Mangey); *Quis rer. div. har.*, c. 52, 53, p. 510, 511. Other passages to the same effect are cited by Gfroerer, i. p. 54. Philo even maintains the divine inspiration of the Septuagint version, *Vit. Mos.* ii. cc. 6, 7, p. 139, 140.

|| It may be questioned whether Philo had any knowledge of Hebrew. He employs the Septuagint; and many of his commentaries are mere plays on the Greek words. He seems to have been unacquainted with the cabalistic doctrines of his Hebrew kinsmen, which, by a similar allegorical

use of Scripture, led the way to the Talmud. See Franck, *Dict. des Sciences Philosophiques*, Art. *Philon*.

\* Compare Plato, *Rep.* vi. p. 509; ii. p. 381. Gfroerer, vol. i. p. 134, and Franck, Art. *Philon*, regard this feature of Philo's theology as of Oriental origin. But his Greek studies might suggest the same idea, and much of his language seems to point to this origin. See Dähne, vol. i. pp. 31, 41.

† See *De Mut. Nom.*, c. 4, p. 582; Gfroerer, i. p. 144; Dähne, ii. p. 154. The various passages inconsistent with this, in which Philo seems to speak of a direct action of God in the world, may perhaps be explained by supposing this action to be exerted through the medium of the Logos. Cf. *Quod Deus sit immut.*, c. 12, p. 281; Gfroerer, i. pp. 199, 293.

‡ *Fragm.*, p. 625, ex Euseb. *Præp. Evang.*, vii. 13: *Διὰ τί ὡς περὶ ἑτέρου Θεοῦ φησὶ τὸ ἐν εἰκόνι Θεοῦ ἐποίησα τὸν ἄνθρωπον, ἀλλ' οὐχὶ τῇ ἐαυτοῦ; Παγκαλῶς καὶ σοφῶς τοῦτ' ἐκ χρησμῶδ' ἔσται. ὅτι οὐδὲν ἀπεικονισθῆναι πρὸς τὸν ἀνωτάτω καὶ Πατέρα τῶν ὄλων ἐδύνατο, ἀλλὰ πρὸς τὸν δευτέρου Θεοῦ, ὅς ἐστιν ἐκείνου Λόγος.*

§ In this summary, use has been made chiefly of that of Hegel, *Gesch. der Philos.*, *Werke*, xv. pp. 18-23, and of that of Zeller, *Philos. der Griechen*, iii. pp. 594-665.

|| *De Vita Contempl.*, c. 2, p. 473. Cf. *De Conf. Ling.*, c. 20, p. 419; *De Vict. Offerent.*, c. 16, p. 264; *De Monarch.*, i. 3, 4, p. 216.

¶ *Legis Alleg.*, i., c. 13, p. 50: *ἄποιος ὁ Θεός.*

ledge, though not fully attainable by any man, is nevertheless to be earnestly sought after, that it may be attained at least in that second degree in which we apprehend directly the existence of God, though falling short of a comprehension of his essence.\* Even this amount, however, of direct knowledge is not to be gained by any effort of human thought, but only by God's revelation of himself; and such a revelation is only possible in the form of an ecstatic intuition, in which the seer, himself passive, is elevated by divine inspiration above the conditions of finite consciousness, and becomes one with the God whom he contemplates.† But this ecstatic vision is possible only to a chosen few; for the many, who are incapable of it, there remains only that inferior and improper apprehension of God which can be gained through the means of derived and created existences, especially of his Word or Wisdom, who is the medium by which God is related to the world, the God of imperfect men, as the Supreme Being is the God of the wise and perfect.‡ This Word, or Logos, is described in various ways, some more naturally denoting an impersonal, others a personal being.§ He is the intelligible world, the archetypal pattern, the idea of ideas,|| the wisdom of God,¶ the shadow of God, by which, as by an instrument, he made the world:\*\* he is the eternal image of God,††

Ibid., c. 15, p. 53: *δεῖ γὰρ ἡγείσθαι καὶ ἀποιοῦν αὐτὸν εἶναι, καὶ ἀφθαρτὸν καὶ ἀτρέπτον. De Somn.*, i. 39, p. 655: *λέγεσθαι γὰρ οὐ πέφυκεν, ἀλλὰ μόνον εἶναι τὸ ὄν. Cf. De Vit. Cont.*, c. 1, p. 472; *Quod Deus immut.*, c. 11, p. 281.

\* *De Præm. et Pæn.*, c. 7, p. 415. Cf. Gfroerer, i. p. 135, 199. By this hypothesis of a primary and secondary knowledge, Gfroerer reconciles those passages in which the knowledge of God is spoken of as unattainable with others apparently of an opposite import: *ex. gr.*, *De Post. Caini*, c. 48, p. 258; *De Monarch.*, i. 6, p. 218, and those referred to in the next note.

† *De Poster. Cain.*, c. 5, p. 229; *Legis Alleg.*, iii. 33, p. 107; *De Abr.*, c. 24, p. 19; *De Migr. Abr.*, c. 31, p. 463; *Fragm.*, p. 654; *Quis rer. div. her.*, cc. 13, 14, p. 482; cf. Neander, *Church History*, i. p. 79, ed. Bohn. This ecstatic intuition is insisted upon also by Plotinus and the later Platonists, as in modern times by Schelling.

‡ *Legis Alleg.*, iii. 32, p. 107, iii. 73, p. 128; *De Abr.*, c. 24, p. 19; *De Migr. Abr.*, c. 31, p. 463; *De Conf. Ling.*, c. 28, p. 427.

§ Whether the Logos of Philo is to be regarded as a distinct person or not, is matter of controversy. The negative is maintained by Burton (*Bampton Lectures*, note 93) and by Dorner (*Person of Christ*, i., p. 27, E. T., and note A), against Gfroerer, Dähne, Lücke, and the majority of recent critics. An intermediate view is taken by Zeller, iii., p. 626, and to some extent by Professor Jowett, *Epistles of St. Paul*, i. p. 484, 2d ed.

|| *De Mundi Opif.*, c. 6, p. 5; elsewhere the λόγος is distinguished from the παράδειγμα. See *De Conf. Ling.*, c. 14, p. 414.

†† *De Conf. Ling.*, c. 28, p. 427. The contradiction between this representation and the concrete attributes ascribed to the Logos is pointed out by Hegel, *Werke*, xv., p. 20.

the eldest and most general of created things:\* he is the first-born of God, the eldest angel or archangel,† the high-priest of the world,‡ the interpreter of God,§ the mediator between the Creator and his creatures, the suppliant in behalf of mortals, the ambassador from the ruler to his subjects. || He is moreover the God in whose likeness man was made; for the supreme God cannot have any likeness to a mortal nature:¶ he is the angel who appeared to Hagar,\*\* the God of Jacob's dream and the angel with whom he wrestled,†† the image of God who appeared to Moses at the bush,‡‡ the guide of the Israelites in the wilderness. §§ This interposition of the Logos thus serves to combine the theology of contemplation with that of worship and obedience; it endeavours to provide one God for those whose philosophical meditations aspire to an intuition of the absolute, and another for those whose religious feelings demand a personal object; while at the same time it attempts to preserve the unity of God, by limiting the attribution of proper and supreme deity to the first principle only.

In addition to this, which may be regarded as the central point of Philo's system, some have endeavoured to elicit from his writings a closer approximation to Christian doctrine, in the recognition of a third divine being, distinct both from the supreme God and from the Logos. ||| A remarkable passage sometimes cited for this purpose occurs in his allegorizing commentary on the cherubim and the flaming sword placed in Eden. 'With the one truly existent God,' he says, 'there are two first and highest powers, goodness and authority: by goodness he has produced everything, and by authority he rules over that which he has produced; and a third, which brings both together as a medium, is reason; for by reason God is both a ruler and good. Of these two powers—authority and goodness—the cherubim are the symbol; and of reason, the flaming sword.'¶¶ In like manner he comments on the threefold appearance to Abraham in the plains of Mamre: 'The middle appearance represents the Father of the universe, who in the sacred writings is called by his proper name, the Existent (ὁ ὄν), and those on each side are the most ancient powers and nearest to the Existent; one of which is called the creative and the other the kingly power. And the creative power is God, for by this power he made and arranged the universe; and the kingly power is Lord, for it is meet that the Creator should rule over and govern the crea-

ture.\* The inference, however, which has been drawn from these and similar passages rests on a very precarious foundation. There is no consistency in Philo's exposition, either as regards the number or the nature of these divine powers. Even granting the disputed opinion that the powers represent distinct personal beings, we find in one of the above passages the three beings all distinguished from the supreme God: while in the other he seems to be identified with one of them; and the confusion is increased if we compare other passages in which additional powers are mentioned with further distinctions.† The truth seems to be that Philo indulged his allegorizing fancy in the invention of divine powers *ad libitum*, in any number and with any signification which the text on which he was commenting for the moment might happen to suggest; and he has no more difficulty in finding six divine powers to be represented by the six cities of refuge‡ than he has in finding three to suit the two cherubim and the flaming sword. In this kind of desultory playing with the language of Scripture, it is idle to look for any definite doctrine, philosophical or theological.

It must not be supposed that the doctrines here attributed to Philo are clearly and unambiguously enunciated in his writings. Many passages might be quoted apparently indicating different views; and probably no consecutive summary of doctrines could be drawn up, against which similar objections might not be urged. This difficulty is unavoidable in the case of a writer like Philo, who attempts to combine together two antagonistic systems, of whose antagonism he is himself but imperfectly, if at all, conscious. Philo's system has been called an eclecticism; but it was not so much an eclecticism founded on definite principles of selection, as an accumulation of speculations which he was unable to combine into a consistent whole, though persuaded of the existence of a common principle of truth concealed under them. There is a perpetual struggle between the Jewish and the heathen, the religious and the philosophical elements of his system, if system it can be called, which cannot be set at rest by all the latitude of interpretation which he so freely indulges in. Hence his religious convictions perpetually manifest themselves in language inconsistent with his philosophical theories; and the utmost that can be attempted in a short analysis of his teaching is to give an outline of the system as it probably would have been had it been logically carried out, not as it actually appears in his own very illogical attempt to carry it out.

In the language as well as in the doctrines of Philo, we may trace the influence of Greek philosophy in conjunction with the literature of his own nation. The theory, indeed, which would trace the term *Λόγος* to the few and unimportant pas-

sages in which it is employed by Plato, is too fanciful and far-fetched to be tenable; but the appearance in Philo of the Stoical distinction between *λόγος ἐνδιάθετος* and *λόγος προφορικὸς*, as well as his general use of the term, seems to indicate that in the employment of this word he was influenced by the language of the Greek philosophy, though perhaps in conjunction with that of the LXX.\* In the use of the cognate term *Σοφία*, as nearly, if not quite equivalent to that of *Λόγος*, he was probably more directly influenced by writers of his own nation, by the LXX. version of the Proverbs, and by the books of Ecclesiasticus and Wisdom.† Thus his language, no less than his matter, indicates the compound character of his writings; the two-fold origin of his opinions being paralleled by a similar two-fold source of the terms in which they are expressed.

It is necessary to dwell to some extent upon the writings of Philo, because it is through them, if at all, that the influence of the Greek philosophy on the Christian Scriptures is to be traced. Whether we admit the conjecture that St. John, during his residence at Ephesus, might have become acquainted with Philo's writings; or whether we regard these writings as the extant representatives of a widely diffused doctrine, which might have reached the apostle through other channels,‡ it is to the asserted coincidences between this evangelist and the Alexandrian philosopher, that we must look for the chief evidence for or against the theory which asserts an influence of Greek speculations on Christian doctrine. The amount of that influence, however, has been very differently estimated by different critics; one of whom, as has been before observed, ascribes to it nearly all the distinctive doctrines of the Christian church; while another considers that the whole resemblance between St. John and Philo may be accounted for by their common use of certain passages of the O. T., especially those concerning the angel of the Lord and the distinction between the hidden and the revealed God.§ The truth may perhaps be found in an intermediate view, if we distinguish between the Christian doctrine in itself and the language in which it is expressed. Notwithstanding the verbal parallels which may be adduced between the language of Philo and that of some portions of the N. T., the relation between the Alexandrian and the Christian doctrines is one rather of contrast than of resemblance. The distinguishing doctrine of the Christian revelation—that of the Word made flesh—not only does not appear in Philo, but could

\* *De Abr.*, c. 24, p. 19; cf. *De Sacr. Ab. et Cain.*, c. 15, p. 173.

† Cf. *De Mut. Nom.*, c. 4, p. 582, where a *ἐνεργητικὴ δύναμις* is mentioned as distinct from the *βασιλικὴ* and *ποιητικὴ*, and all three are distinguished from the supreme God.

‡ *De Prof.*, cc. 18, 19, pp. 560, 561. In this passage, again, the three higher powers, represented by the three cities beyond Jordan, are clearly distinguished from the supreme God.

\* On the *λόγος* of the Stoics and its relation to Philo, see Zeller, *Philos. der Griechen*, iii. p. 630. Cf. Wyttienbach on *Plutarch*, ii. 44 A. The distinction between *ἐνδιάθετος* and *προφορικὸς* *λόγος*, though acknowledged by Philo, is not applied by him directly to the divine reason (see Gfroerer, i. p. 177). On other affinities between Philo and the Stoics, see Valckenaer, *Diatr. de Aristobulo*, sec. xxxii.

† On the identity of *Λόγος* and *Σοφία* in Philo, see Gfroerer, i. p. 213, seq.

‡ See, for the one supposition, Dean Milman, in a note on Gibbon, ch. xxi.; and for the other, Gfroerer, i. p. 307; ii. p. 4.

§ See Tholuck on the *Gospel of St. John*, p. 65, Eng. Tr.

not possibly appear, consistently with the leading principles of his philosophy, according to which the flesh, and matter in general, is condemned as the source of all evil. The development of Philo's doctrine, if applied to the person of Christ, will lead, as has been pointed out, not to Christianity, but to docetism ; \* and in the distinction, which he constantly makes, between the absolute God and the secondary deity, who alone is capable of relation to finite things, we may trace the germ of a theory which afterwards, in various forms, became conspicuous in the different developments of Gnosticism.

In fact, the method of Philo, both in his philosophical theories and in his interpretations of Scripture, is so far from being, either in substance or in spirit, an anticipation of the Christian revelation, that it may rather be taken as a representative of the opposite spirit of rationalism, the tendency of which is to remove all distinction between natural and revealed religion, by striving to bring all religious doctrines alike within the compass of human reason. It is not the reception of divine truth as a fact, resting on the authority of an inspired teacher, telling us *that* these things are so ; it is rather an inquiry into causes and grounds, framing theories to explain *how* they are so. The doctrine of the Logos, as it appears in Philo, is a hypothesis assumed in order to explain how it is possible that the God whom his philosophy taught him to regard as above all relation to finite existence could nevertheless, as his religion taught him to believe, be actually manifested in relation to the world. To explain this difficulty, he has recourse to the supposition of an intermediate being between God and the world ; standing, as it were, midway between the abstract and impersonal on the one side and the definite and personal on the other ; and described in language which wavers between the two conceptions, without succeeding in combining them. In this respect the theory reminds us, not only of

those forms of Gnosticism which subsequently emanated from the Alexandrian philosophy under the influence of Christianity, as Philo's system emanated from the same philosophy under the influence of Judaism, but also, to some extent, of later speculations, which, in the endeavour to transfer the Catholic faith from a historical to a metaphysical foundation, have regarded the doctrine of the incarnation of the Divine Word, not as the literal statement of a fact which took place at an appointed time, but as the figurative representation of an eternal process in the divine nature.†

On the other hand, the Christian revelation, while distinctly proclaiming as a fact the reconciliation of man to God by One who is both God and man, yet announces this great truth as a mystery to be received by faith, not as a theory to be comprehended by reason. The mystery of the union between God's nature and man's does not cease to be mysterious because we are assured that it is real. No intermediate hypothesis is advanced to facilitate the union of the two natures by removing the distinctive attributes of either ; no attempt is made to overcome the philosophical difficulties of the doctrine by deifying the humanity of Christ or humanising his divinity. His divine nature is not less divine than that of his Father ; his human nature is not less human than that of his brethren. The intellectual difficulty of comprehending how this can be remains still ; but the authority of a divine revelation is given to enable us to believe notwithstanding.

But while we acknowledge the wide and fundamental differences which exist between the doctrines of the Alexandrian Judaism and those of the Christian Scriptures, we must also acknowledge the existence of some striking similarities of language between the writings of Philo and some parts of the N. T. The following instances exhibit some of the most remarkable parallels of this kind :—

## N. T.

John i. 1. Ἐν ἀρχῇ ἦν ὁ Λόγος, καὶ ὁ Λόγος ἦν πρὸς τὸν Θεόν, καὶ Θεὸς ἦν ὁ Λόγος.

John i. 3. Πάντα δι' αὐτοῦ ἐγένετο, καὶ χωρὶς αὐτοῦ ἐγένετο οὐδὲ ἓν ὃ γέγονεν.

John i. 4. Καὶ ἡ ζωὴ ἦν τὸ φῶς τῶν ἀνθρώπων. 9. ἦν τὸ φῶς τὸ ἀληθινὸν ὃ φωτίζει πάντα τὸν ἄνθρωπον.

John i. 18. Θεὸν οὐδεὶς ἑώρακε πώποτε· ὁ μονογενὴς υἱὸς ὁ ὢν εἰς τὸν κόλπον τοῦ πατρὸς, ἐκεῖνος ἐξηγήσατο.‡

1 John i. 5. Ὅτι ὁ Θεὸς φῶς ἐστὶ, καὶ σκοτία ἐν αὐτῷ οὐκ ἐστὶν οὐδεμία.

## Philo.

*De Conf. Ling.* 28, p. 427. τῆς αἰδίου εἰκόνας αὐτοῦ, λόγου τοῦ ιερωτάτου. *De Somn.* i. 39, p. 655. καλεῖ δὲ Θεὸν τὸν πρεσβύτατον αὐτοῦ νυνὶ λόγον. *Fragm.*, p. 625. πρὸς τὸν δεύτερον Θεὸν ὃς ἐστὶν ἐκεῖνου λόγος.

*De Monarch.* ii. 5, p. 225. Λόγος δὲ ἐστὶν εἰκὼν Θεοῦ, δι' οὗ σύμπας ὁ κόσμος ἐδημιουργεῖτο.

*De Mundi Opif.* 8, p. 6. καὶ ταύτης εἰκόνα τὸ νοητὸν φῶς ἐκεῖνο, ὃ θείου λόγου γέγονεν εἰκὼν τοῦ διερμηνεύσαντος τὴν γένεσιν αὐτοῦ.

*Legis Alleg.* iii. 73, p. 128. οὐ περὶ τῆς φύσεως αὐτοῦ διαγνῶναι δύναται, ἀλλ' ἀγαπητὸν, ἕαν τοῦ νοήματος αὐτοῦ δυνηθῶμεν, ὅπερ ἦν, τοῦ ἐρμηνεύς λόγου.

*De Somn.* i. 13, p. 632. ἐπειδὴ πρῶτον μὲν ὁ Θεὸς φῶς ἐστὶ.

\* See Dorner on the *Person of Christ*, vol. i., p. 17, Eng. Tr.

† See Fichte, *Anweisung zum seligen Leben*, Werke v., p. 482 ; Schelling, *Vorlesungen über Acad. Stud.*, p. 192 ; Hegel, *Philosophie der Geschichte*, Werke ix., p. 388 ; Baur, *Christliche Gnosis*, p. 715.

‡ The parallels sometimes adduced from John iv. 10 and vi. 32, as compared with *De Prof.* 18, p. 560, and *Legis Alleg.* ii. 21 ; iii. 56, 59, are very questionable. In both cases the allusion seems to arise naturally from the conversation, and not from any reference to Philo.

N. T.

Philo.

1 John ii. 1. Καὶ ἐάν τις ἁμάρτην, παράκλητον ἔχομεν πρὸς τὸν πατέρα, Ἰησοῦν Χριστὸν δίκαιον.

Rom. iv. 17. Θεοῦ τοῦ καλοῦντος τὰ μὴ ὄντα ὡς ὄντα.

1 Cor. iii. 1, 2. ὡς νηπίοις ἐν Χριστῷ· γάλα ὑμᾶς ἐπότισα καὶ οὐ βρώμα; cf. Heb. v. 12, 13.

1 Cor. iv. 1. ὡς ὑπηρέτας Χριστοῦ καὶ οἰκονόμους μυστηρίων Θεοῦ.

1 Cor. x. 4. ἔπινον γὰρ ἐκ πνευματικῆς ἀκολουθοῦσης πέτρας· ἡ δὲ πέτρα ἦν ὁ Χριστός.

1 Cor. xiii. 12. βλέπομεν γὰρ ἄρτι δι' ἐσόπτρου ἐν αἰνίγματι. 2 Cor. iii. 18. ἡμεῖς δὲ πάντες ἀνακαλυμμένῳ προσώπῳ τὴν δόξαν Κυρίου κατοπτριζόμενοι.

2 Cor. iii. 3. ἐπιστολὴ Χριστοῦ διακονηθεῖσα ὑφ' ἡμῶν, ἐγγεγραμμένη οὐ μελανι, ἀλλὰ πνεύματι Θεοῦ ζῶντος, οὐκ ἐν πλαξὶ λιθίναις, ἀλλὰ ἐν πλαξὶ καρδίας σαρκίνας.

2 Cor. iv. 4. τοῦ Χριστοῦ, ὅς ἐστιν εἰκὼν τοῦ Θεοῦ. cf. Colos. i. 15.

Colos. i. 15. πρωτότοκος πάσης κτίσεως; cf. Heb. i. 6.

1 Tim. ii. 5. Εἰς γὰρ Θεὸς, εἰς καὶ μεσίτης Θεοῦ καὶ ἀνθρώπων, ἄνθρωπος Χριστὸς Ἰησοῦς.

Heb. i. 2. δι' οὗ καὶ ἐποίησεν τοὺς αἰῶνας.

Heb. i. 3. ὁς ὢν ἀπαύγασμα τῆς δόξης καὶ χαρακτὴρ τῆς ὑποστάσεως αὐτοῦ.

Heb. iii. 1. Κατανοήσατε τὸν ἀπόστολον καὶ ἀρχιερέα τῆς ὁμολογίας ἡμῶν Χριστὸν Ἰησοῦν.

Heb. iii. 4. πᾶς γὰρ οἶκος κατασκευάζεται ὑπὸ τίνος· ὁ δὲ τὰ πάντα κατασκευάσας Θεός.

Heb. iv. 12. ζῶν γὰρ ὁ λόγος τοῦ Θεοῦ, καὶ ἐνεργής, καὶ τομώτερος ὑπὲρ πᾶσαν μάχαιραν διστομον, καὶ δικνούμενος ἄχρι μερισμοῦ ψυχῆς τε καὶ πνεύματος, ἀρμών τε καὶ μνηλῶν.

Heb. iv. 14, 15. ἔχοντες οὖν ἀρχιερεῖα μέγαν, διεληλυθότα τοὺς οὐρανούς, Ἰησοῦν τὸν υἱὸν τοῦ Θεοῦ, κρατῶμεν τῆς ὁμολογίας. Οὐ γὰρ ἔχομεν ἀρχιερεῖα μὴ δυνάμενον συμπάθῃσαι ταῖς ἀσθενείαις ἡμῶν, πεπειραμένον δὲ κατὰ πάντα καθ' ὁμοιότητα, χωρὶς ἁμαρτίας.

*De Vit. Mos.* iii. 14, p. 155. Ἀναγκαῖον γὰρ ἦν τὸν ἱερωμένον τῷ τοῦ κόσμου πατρὶ παρακλήτῳ χρῆσθαι τελειοτάτῃ τὴν ἀρετὴν υἱῷ πρὸς τε ἀμνηστειὰν ἁμαρτημάτων, κ.τ.λ.

*De Cherub.* 35, p. 162. αἴτιον μὲν αὐτοῦ τὸν Θεόν . . . ὄργανον δὲ λόγον Θεοῦ, δι' οὗ κατεσκευάσθη.

*De Mundi Opif.* 51, p. 35. πᾶς ἄνθρωπος κατὰ μὲν τὴν διάνοιαν φέκεται τῷ λόγῳ, τῆς μακαρίας [cf. *Sap. Sol.* vii. 26]. *De Plant. Noe*, 5, p. 332. φύσεως ἐκμαγεῖον ἢ ἀπόσπασμα ἢ ἀπαύγασμα γεγονὸς σφραγίδι Θεοῦ ἧς ὁ χαρακτήρ ἐστὶν αἰδὺς λόγος.

*De Somn.* i. 38, p. 654. ὁ μὲν δὲ μέγας ἀρχιερεὺς τῆς ὁμολογίας, κ.τ.λ.

*De Cherub.* 35, p. 162. οἰκία καὶ πόλις πᾶσα ἵνα κατασκευασθῇ, τίνα συνεισελθεῖν δεῖ; ἀρ' οὐ δημιουργόν, κ.τ.λ. . . . Μετελθὼν οὖν ἀπὸ τῶν ἐν μέρει κατασκευῶν, ἴδε τὴν μεγίστην οἰκίαν ἢ πόλιν, τὸνδε τὸν κόσμον· εὐρήσεις γὰρ αἴτιον μὲν αὐτοῦ τὸν Θεόν, κ.τ.λ.

*Quis rer. div. har.* 26, p. 491. τῷ τομῇ τῶν συμπάντων αὐτοῦ λόγῳ, ὅς εἰς τὴν δευστάτην ἀκονηθεὶς ἀκίην διαιρῶν οὐδέποτε λήγει τὰ αἰσθητὰ πάντα. 27, p. 492. Οὕτως ὁ Θεὸς ἀκονησάμενος τὸν τομέα τῶν συμπάντων αὐτοῦ λόγον, διαίρει τὴν τε ἁμορφον καὶ ἀποιοι τῶν ὄλων οὐσίαν.

*De Prof.* 20, p. 562. Λέγομεν γὰρ τὸν ἀρχιερεῖα οὐκ ἄνθρωπον ἀλλὰ λόγον θεῖον εἶναι, πάντων οὐχ ἑκουσίῳ μόνον, ἀλλὰ καὶ ἀκουσίῳ ἀδικημάτων ἀμέτοχον. *De Vict.* 10, p. 246. ὅτι ὁ πρὸς ἀλήθειαν ἀρχιερεὺς καὶ μὴ ψευδώνυμος ἀμέτοχος ἁμαρτημάτων ἐστίν.

N. T.

Heb. vi. 13. Τῷ γὰρ Ἀβραὰμ ἐπαγγεῖλάμενος ὁ Θεὸς, ἐπεὶ κατ' οὐδενὸς εἶχε μειζόνος ὁμόσαι, ὥμοσε καθ' ἑαυτοῦ.

Heb. vii. 25. πάντοτε ζῶν εἰς τὸ ἐντυγχάνειν ὑπὲρ αὐτῶν.\*

Heb. xi. 4. Καὶ δὲ αὐτῆς ἀποθανὼν ἔτι λαλεῖται.

An examination of these passages will, we believe, confirm the view which has been above taken of the doctrinal differences between them; while, at the same time, it will enable us to discern a purpose to be served by the verbal resemblances which they undoubtedly exhibit. If we except instances of merely accidental similarity in language, without any affinity in thought; or quotations by way of illustration, such as St. Paul occasionally borrows from heathen writers; or thoughts and expressions derived from the O. T., and therefore common to Philo and the apostles, as alike acknowledging and making use of the Jewish Scriptures; they may be reduced, for the most part, to two heads: first, the use of the name ὁ Λόγος, by St. John, as a title of Christ, and the application to him, both by St. John and St. Paul, of various attributes and offices ascribed by Philo to the Divine Word, and to the various philosophical representations with which the Word is identified: and secondly, the recognition, chiefly in the acknowledged writings of St. Paul and in the Epistle to the Hebrews, of a spiritual sense, in parts of Scripture, distinct from the literal interpretation; though this is employed far more cautiously and sparingly than in Philo, and as an addition to, rather than, as Philo for the most part employs it, as a substitute for the literal sense. The apostles, it would appear from these passages, availed themselves, in some degree, of the language already established in the current speculations of their countrymen, in order to correct the errors with which that language was associated, and to lead men's minds to a recognition of the truth of which those errors were the counterfeit. This is only what might naturally be expected from men desirous to adapt the truths which they had to teach to the circumstances of those to whom they had to teach them. There was an earlier Gnosticism founded in part on the perversion of the Law, as there was a later Gnosticism founded in part on the perversion of the Gospel; and it is probable that, at least at the time when St. John wrote, the influence of both had begun to be felt in the Christian church, and had modified to some extent the language of its theology.† If so, the adoption of that language, as a vehicle of Christian doctrine, would furnish the natural means both of correcting the errors which had actually crept into the church, and of counteracting the influence of the source from which they sprang. If the philosophical Jews of Alexandria, striving, as speculative minds in every age have striven, to lay

Philo.

*Legis Alleg.* iii. 72, p. 127. 'Ορᾶς γὰρ ὅτι οὐ καθ' ἑτέρου ὁμνύει Θεὸς, οὐδὲν γὰρ αὐτοῦ κρεῖττον, ἀλλὰ καθ' ἑαυτοῦ, ὅς ἐστι πάντων ἀριστος.

*Quis rer. div. her.* 42, p. 501. ὁ δ' αὐτὸς ἐκείτης μέν ἐστι τοῦ θνητοῦ κηραίνοντος ἀεὶ πρὸς τὸ ἀφθαρτον.

*Quod deter. potiori insid.* 14, p. 200. Μαρτυρήσει δὲ τὸ χρησθὲν λόγιον, ἐν ᾧ φωνῇ χρώμενος καὶ βοῶν ἃ πέπονθεν ὑπὸ κακοῦ συνθέτου τηλαυγῶς εἰρίσκειται. Πῶς γὰρ ὁ μηκέτ' ὦν διαλέγεσθαι δυνατός;

the foundations of their philosophy in an apprehension of the one and the absolute, were driven by the natural current of such speculations to think of the Supreme God as a being remote and solitary, having no relation to finite things, and no attributes out of which such a relation can arise, it is natural that the inspired Christian teacher should have been directed to provide, by means of their own language, the antidote to their error; to point, in the revelation of God and man united in one Christ, to the truth, and to the manner of attaining the truth; to turn the mind of the wandering seeker from theory to fact, from speculation to belief; to bid him look, with the eye of faith, to that great mystery of godliness in which the union of the infinite and the finite is realised in fact, though remaining still incomprehensible in theory. If the same philosophers, again, seeking to bridge over the chasm which their speculations had interposed between God and man, distorted the partial revelation of the Angel of the Covenant, which their Scriptures supplied, into the likeness of the ideal universe of the Platonist, or of the half-personified world-reason of the Stoic, it was surely no unworthy object of the apostolic teaching to lead them, by means of the same language, to the true import of that revelation, as made known, in its later and fuller manifestation, by the advent of the Word made flesh. If the platonising expositor of the Jewish Scriptures, eager to find the foreign philosophy which he adopted in the oracles of God committed to his own people, explained away their literal import by a system of allegory and metaphor, it was natural that the inspired writers of the New Covenant should point out the true meaning of those marks which the Jewish history and religion so clearly bear, of a spiritual significance beyond themselves, by showing how the institutions of the Law and the record of God's dealings with his chosen people are not an allegory contrived for the teaching of a present philosophy, but an anticipation, designed by the Divine Author of the whole as a preparation, directly and indirectly, by teaching and training, by ritual and prophecy, by type and symbol, to make ready the way for him that was to come.

The attempts made by Grossmann, Gfroerer, and others, to explain the origin of Christianity as an offshoot of the Jewish philosophy of Alexandria, rest mainly on these occasional coincidences of language, while overlooking fundamental differences of doctrine. The ideal Logos, the distinguishing feature of the Alexandrian philosophy, has no place in the teaching of the New Testament. The belief in one Christ, very God and very man, has not only no place in, but is diametrically opposed to, the philosophical speculations of Philo. But Christianity came into the world at a time when the Græco-Jewish modes of thought, of which Philo is

\* It may be questioned whether the allegorical commentary on Melchisedek (*Legis Alleg.* iii. 26, p. 103) is a fair parallel to Heb. vii. The latter seems more likely to have been taken directly from Ps. cx. without the intervention of Philo.

† See Burton, *Bampton Lectures*, p. 218.

the representative, were prevalent; and the earliest Christian teachers, so far as they had to deal with those to whom that philosophy was familiar, could do so most effectually by means of its language and associations. These considerations seem naturally to explain the resemblance and the difference between the two systems—resemblance as regards the language employed; difference as regards the doctrine which that language conveys.

The following works may be mentioned, as treating, from one side or the other, the subject discussed in the preceding article:—Gfroerer, *Philo und die Jüdisch-Alexandrinische Theosophie*; Dähne, *Geschichtliche Darstellung der Jüdisch-Alexandrinischen Religions-Philosophie*; Grossmann, *Quæstiones Philonæ*; Lücke, in *Studien und Kritiken*, 1831, p. 912, 1833, p. 532; *Commentar über das Evangelium des Johannes*, vol. i. p. 205, seq., ed. 1833; Keferstein, *Philo's Lehre von dem Göttlichen Mittelwesen*; Tholuck, *Commentary on the Gospel of St. John*, p. 57, seq., Eng. tr.; J. G. Müller, art. 'Philo,' in Herzog's *Real-Encyclopædie*; compare also the Introduction to Neander's *Church History*, vol. i. p. 68, seq., Eng. tr.; Dörner, *On the Person of Christ*, p. 13, seq., Eng. tr.; and Professor Jowett's Essay on *St. Paul and Philo*, in the first volume of his *Commentary on the Epistles*. The subject is also illustrated in the preface to Mangey's edition of *Philo*, p. ix., seq.; in Brucker's *Historia Critica Philosophiæ*, vol. ii., p. 797, seq.; in Cudworth's *Intellectual System of the Universe*, and in the notes of his translator Mosheim; in Cæsar Morgan's *Investigation of the Trinity of Plato and of Philo Judæus*; in Martin's *Études sur le Timée*; in Professor Burton's *Bampton Lectures*; in Matter's *Histoire de l'Ecole d'Alexandrie* and *Histoire Critique du Gnosticisme*; in Vacherot's *Histoire Critique de l'Ecole d'Alexandrie*.—H. L. M.

PHINEHAS (פִּינְחָס, *mouth of brass*; Sept.

Φινεάς). 1. Son of Eleazar and grandson of Aaron the high-priest. An incident which illustrates the zealous and somewhat passionate character of Phinehas occurred before the Israelites entered the Promised Land. The Israelites were encamped in the plains of Moab, and were lamenting the sin into which they had been seduced by the Midianites, when a prince of Judah named Zimri was beheld conducting a woman of Midian named Cozbi to his tent. The licentious effrontery of this act kindled the wrath of Phinehas, who hastened after them into the tent, and transfigured them both with his javelin (Num. xxv. 7, seq.). This bold act pointed out Phinehas to Moses as a proper person to accompany as priest the expedition which was immediately after sent forth, under the command of Joshua, against the Midianites, and by which the cause of the deluded Israelites was abundantly avenged (Num. xxxi. 6, seq.). After the conquest of the Promised Land, when the warriors of the two and half tribes beyond the Jordan were permitted to return to their homes, Phinehas was at the head of the deputation sent after them to inquire and remonstrate concerning the altar which, on their way, they had set up on the bank of the Jordan; and it was he doubtless who pronounced the forcible address to the supposed offenders. He was certainly the first to express his satisfaction and joy at the explanation which was given, and which, with a lightened heart, he bore back to the tribes assembled at Shiloh (Josh. xxii. 5, seq.).

It appears that while his father lived Phinehas filled the post of superintendent or chief of the Levites, probably after Eleazar became high-priest (Num. iii. 32; 1 Chron. ix. 20). At the death of his father he succeeded to the pontificate (Josh. xxiv. 33); but the only case in which he appears officially in the Bible is in connection with the unhappy circumstances recorded at the end of the book of Judges, in which he comes forward as high-priest to consult Jehovah. This mention of his name enables us to conclude that the chronological place of these occurrences would be rather towards the beginning than at the latter end of the book in which they are found. [JUDGES; PRIEST.]

2. Son of Eli the high-priest, and brother of Hophni. [ELI; HOPHNI; SAMUEL.]

PHLEGON (Φλέγων), one of the Christians of Rome to whom Paul sent his salutations (Rom. xvi. 14). The legend (*ap.* Dorotheus) makes him to have been one of the seventy disciples, and bishop of Marathon.

PHEBE (Φοβη), a member of the church at Cenchree, recommended to the kind attention of the church of Rome by St. Paul, who had received hospitable treatment from her (Rom. xvi. 1). It is probable that she was the bearer of the Epistle to the Romans. [DEACONESS.]

PHENICIA \* (Φωνικη; *Phanice*, variously derived from *φολιξ*, palm-tree, the abundance of which in this country also made it the emblem of its principal cities, Sidon and Tyre; from *φουβός*, purple, the staple of its commerce; or bay-colour, perhaps denoting the sun-burnt complexion of its inhabitants; from *Phoenix*, the son of Agenor and brother of Cadmus; from the Red (Erythrean) Sea, etc. etc.; Hebr. כְּנַעַן, Kanaan (*Xavadr*, *Xvâ*, Chna, Kna), from כָּנַע, to be low = Lowland) is the name applied to a country on the coast of Syria, bounded by the Mediterranean Sea on the west and the Lebanon on the east; Syria and Judæa forming its northern and southern limits respectively, situated between about 34° to 36° N. lat., and 35° to 36° E. long. Yet the extent of its territory varied so considerably at different times, that the geographical definitions of the ancient writers differ in a very remarkable manner. Thus, while in Gen. x. 19 Canaan does not reach northwards beyond Sidon—a place which in early times gave the name to the whole people (יִשְׂרָאֵל, *צִידֹן*, Deut., Judg.)—and Pyblus and Berytus are considered as lying beyond it (Gen. x. 15, ff.; Josh. xiii. 5); it comprised in the Persian period (Herod. iii. 91) Posidium, as high as 35° 52'. Later still (Pliny, Strabo, Ptolemy), the Eleutherus (34° 60'), and subsequently (Mela, Stephanus) the island of Aradus (34° 70'), were considered its utmost northern limits. To the south it was at times Gaza (Gen. x. 19; Zeph. ii. 5; Herod., Philo, Eustath.), at others Egypt (Num. xxiv. 5; Josh. xv. 4, 47; Strabo, Procop., etc.); and, from the Macedonian period chiefly, Cæsarea

\* All the special points in connection with this country, and the people inhabiting it—as far as they can be made to throw any light on Bible history—being treated in detail in the course of this work, it is intended in this place to give a general survey only of the principal results arrived at regarding its history and institutions.

is mentioned as its extreme point. Eastwards the country sometimes comprised parts of Syria and Palestine, beyond the mountain-ridges of the former and the hill-chains of the latter.

We must confine ourselves to pointing out some of the most famous ancient cities of this country—comprising in all about 2500 square miles, averaging 200 miles in length, and 20 in breadth—the hills, plains, islands, promontories, rivers, and bays of which swarmed with the densest, busiest, and wealthiest population of the old world. Proceeding from north to south we find Aradus (Ru-ad), an island city opposite the southern coast of Syria. Next is Tripolis on the sea-coast of the continent, built by the three cities of Sidon, Tyre, and Aradus, and originally consisting of three distinct towns, a stadium distant from each other, and inhabited by three different colonies. Here, as well as at Aradus, many ruins, pillars, brick-work, blocks, together with small remnants of ancient pottery, glass-ware, and figures of gods and goddesses, are found. Then comes Byblus (Batroun, Botrys, probably the Gebal of Ezekiel), whose inhabitants were specially skilled in masonry and navigation. Some of the stones now found among its ruins are twenty feet long, and bevelled in a way peculiar to the Phœnicians. To the south of this city flows the river Ibrim (Adonis), which assumes a red colour in summer:—the blood of the myth. Next in order stands Berytus (Beyrout), supposed to have been built in the time of Kronos, but not mentioned in Scripture or history in the time of Tyre or Sidon. It stands on the headland, at the most projecting point of the coast, in the greatest elongation of the plain, at the foot of the Lebanon, which here rises to nearly 9000 feet. Destroyed by Tryphon, it became, under Roman dominion, the ‘mother and nurse of the laws,’ and was one of the three academies to which Justinian confided the privilege of teaching jurisprudence. Sidon, ‘the eldest-born of Canaan,’ with its summer and winter harbour, stood on the north-west slope of a small promontory which runs into the sea. Sarepta (Zarpath) lies eight miles to the south of Tyre, and contains remains of ancient walls, sepulchral grottoes, etc. The river Kasimieh flows between Sarepta and Tyre—probably the Leontes of the ancients, now called El Litani. Five miles below stood Tyre herself, 200 stadia south of New Tyre, with her three different towns; 19,000 paces in circumference. The next city of importance is Acco (Acre, Ptolemais). Its port was the mustering-place for the Persian fleet when preparing for the invasion of Egypt. Of no less moment did it prove during the Crusades, and when Napoleon occupied Egypt. Immediately to the south of Acco is the Belas, a river which supplied the brilliant white sand so extensively used by the Phœnicians in their glass manufactures. Omitting many minor places, we conclude with Joppa (Jaffa), in 32° 2' N. lat., the port of Jerusalem, from which it is about forty miles distant—the medium of commercial intercourse between Judæa and Phœnicia. Hither came Jonah seeking a ship in which to go to Tarshish; and it was here that Andromeda was chained to the rock and rescued from the sea-monsters by Perseus. This rock was seen by Jerome; and the bones of that same monster were carried to Rome and exhibited to the people: together with a hippopotamus and other rare inhabitants of the deep.

The climate of Phœnicia (*plena gratiarum et venustatis, urbibus decorata magnis et pulchris, Ann. Marc. 14. 8*)—an item of immense moment in the history of a nation—varies very considerably. Near the coast, and in the lower plains, the heat in summer is at times tropical, while the more mountainous regions enjoy a moderate temperature, and in winter even heavy falls of snow are not uncommon. In the southern parts, the early rains begin in October, and are, after an interval of dry weather, followed by the winter rains, which last till March, the time of the ‘latter’ rains. From May to October the sky remains cloudless. The rare difference of temperature found in so small a compass is thus happily described by Volney:—‘If the heat of July is oppressive, a six hours’ journey to the neighbouring mountains transports you into the coolness of March; and if, on the contrary, the hoar-frost troubles you at Besharrai, a day’s travel will bring you into the midst of blooming May;’ or, as an Arabic poet has it, ‘Lebanon bears winter on its head, spring on its shoulders, autumn on its lap, and summer at its foot.’ Of the natural products of the country it is needless to speak here. It abounds in corn of all sorts, in silk, cotton, tobacco, indigo, sugar, etc.; its heights and plains are covered with cedars, pine, fir, cypress, palm, fig trees, and sycamores, while peaches, apricots, pomegranates, almonds, citrons, grapes, etc., are among the common garden fruits. Flocks of sheep and goats people the wide pasture-grounds; the forests still contain goodly sport, such as wolves, panthers, bears, and jackals; and the sea supplies shoals of fishes. Rivers and brooks descending from the ridges of the Lebanon supply the country with an abundance of water, so that droughts, if they occur, are of but small moment and short duration.

Respecting the ethnography of the Phœnicians we have only to observe that the opinions are as much divided on the subject as ever. According to Gen. x. 15, Canaan had eleven ‘sons’ (‘Canaan begat Sidon his first-born, and Heth, and the Jebusite, and the Amorite, and the Girgasite, and the Hivite, and the Arkite, and the Sinite, and the Arvadite, and the Zemarite, and the Hamathite: and afterwards were the families of the Canaanites spread abroad’), six of whom had settled in the north of Palestine; and although all his descendants are sometimes included, both by classical writers and the LXX. (*ex gr.*, in Josh. v. 1, 12) in the name of *Φοινίκες*, yet in general the term chiefly applies to the inhabitants of the north. Scripture speaks of them as descendants of primeval giants (Autochthons) who had inhabited Canaan since the flood: that is, from times immemorial. Considering the careful attention paid by the Biblical writers to the early history of Palestine, and the close contact between the Phœnicians and Israelites, it would appear as if all traditions of a time anterior to their sojourn in that land had been long lost. Gen. x. 6, on the other hand, calls Canaan a descendant of Ham—a statement which, unless explained to refer to their darker skins, would seem to war against their being indigenous inhabitants of Palestine, or a Semitic population: an assumption much favoured by their language. Herodotus, however, makes them, both on their own statements and by accounts preserved in Persian historians, immigrants from ‘the Erythrean Sea;’ and Justin backs the notion of immigration by recording that the

Tyrian nation was founded by the Phœnicians, and that these, being forced by an earthquake to leave their native land, first settled on the Assyrian Lake (Dead Sea or Lake of Gennesareth), and subsequently on a shore near the sea, where they founded a city called Sidon. The locality of the 'Erythrean Sea,' however, is a moot point still. It is taken by different investigators to stand either for the Arabian or Persian Gulf: the latter view being apparently favoured by the occurrence of Phœnician names borne by some of its islands (Strabo)—though these may have been given them by late Phœnician colonists. Some have seen in them the Hyksos driven to Syria. Without entering any further into these most difficult, and, in the absence of all reliable information, more than vague speculations, so much appears certain, that many immigrations of Semitic branches into Phœnicia, at different periods, and from different parts, must have taken place, and that these gradually settled into the highly-civilised nationality which we find constituted as early as the time of Abraham (Gen. xii. 6, **אֵל** = then, already; cf. Aben Ezra, *ad loc.*, and Spinoza, *Tract. Theol.-Pol.*, ch. viii.) It would be extremely vain to venture an opinion on the individuality of the different tribes that, wave-like, rushed into the country from various sides, at probably widely distant dates. The only apparently valuable tradition on the subject seems contained in the above-quoted passage of Gen. x. 15-18.

Two principal divisions existed anciently among these Canaanites; these were those of the interior of Palestine, and the tribes inhabiting the sea-coast, Phœnicia proper. By degrees, three special tribes, more powerful than the rest, formed, as it were, the nucleus around which the multitude of minor ones gathered and became one nationality, viz., the inhabitants of Sidon, of Tyre, and of Aradus. Three principal elements are to be distinguished, according to classical evidence (Cato, cf. *Serv. ad. Æn.*, iv. 682), in the constitution of Phœnician states:—1. The aristocracy, consisting of certain families of noble lineage, which were divided into tribes (**שָׁבֵט**), families (**מִשְׁפָּחָה**), Phœn. (**חֶבְרֹן**), and *gentes* (**בֵּית אֲבוֹת**), the last generally of the number of 300 in each state or colony. Out of the 'tribes' were elected 30 *principes* (Phœn. **רֶב**), who formed a supreme senate; besides which there existed another larger representative assembly of 300 members, chosen from the *gentes*. 2. The lower estates of the people, or 'plebs' itself, who do not seem to have had their recognised special representatives, but by constant opposition, which sometimes broke out in open violence, held the nobles in check. 3. The kingdom, at first hereditary, afterwards elective. Nor must the priesthood be forgotten: one of the most powerful elements in the Phœnician commonwealth, and which in some provinces even assumed, in the person of the high-priest, the supreme rule. There was a kind of federal union between the different states, which, according to their importance, sent either their kings or their judges, at the head of a large number of their senators, to the general councils of the nation, held at stated periods either at Sidon or Tyre. The colonies were governed much as the home-country, except that local affairs and the executive were entrusted to two (annual, as it would seem) judges (**שׁוֹפֵטִים**, *suffetes*) elected by the senate—an institution which

for some time also replaced the monarchical form in Tyre.

One of the most powerful and important nations of antiquity, Phœnicia has yet left but poor information regarding her history. According to Josephus, every city in Phœnicia had its collection of registers and public documents (cf. Targum to Kirjath-Jearim, Judg. i. 11, 15). Out of these, Menander of Ephesus, and Dias a Phœnician, compiled two histories of Tyre, a few fragments of which have survived. Sanchoniathon is said to have written a history of Phœnicia and Egypt, which was re-cast by Philo of Byblus, under the reign of Hadrian, and from his work Porphyrius (4th century A.D.) took some cosmogonical quotations, which found their way into Eusebius. Later Phœnician historians' works, mentioned by Tatianus (Theodotus, Hesyrcrates, Moschos), are utterly lost, so that nothing remains but a few casual notices in the Bible, some of the church fathers, and classical writers (Josephus, Syncellus, Herodotus, Diodorus, Justin), which happen to throw some light upon the history of that long-lost commonwealth. A great part of this history, however, being identical with the cities mentioned, in which by turns the hegemony was vested, fuller information will be found under their special headings. Broadly speaking, we may begin to date Phœnician history from the time when Sidon first assumed the rule, or about 1500 B.C. Up to that time it was chiefly the development of the immense internal resources, and the commencement of that gigantic trade that was destined soon to overspread the whole of the then known world, which seem to have occupied the attention of the early and peaceful settlers. The symbolical representative of their political history during that period is El, or Belitan, builder of cities, supreme and happy ruler of men. The conquest of Canaan by the Israelites marks a new epoch, of which lists of kings were still extant in late Greek times. We now hear first of Sidonian colonies, while the manufactures and commerce of the country seem to have reached a high renown throughout the neighbouring lands. The Israelites drive out Sidonian settlers from Laish, near the sources of the Jordan. Somewhat later (beginning of 13th century), Sidonian colonization spread further west, founding the (island-)city of Tyre, Citium and Hippo on the coast of Africa. About 1209, however, Sidon was defeated by the king of Askalon, and Tyre, assuming the ascendancy, ushers in a third period, during which Phœnicia reached the summit of her greatness. At this time, chiefly under the brilliant reign of Hiram, we hear also of a close alliance with the Israelites, which eventually led to common commercial enterprises at sea. After Hiram's death, however, political dissensions began to undermine the unparalleled peace and power of the country. His four sons ruled, with certain interruptions, for short periods, and the crown was then assumed by Ethbaal, the father of Jezebel. His grandson, Mattan, left the throne to his two children Pygmalion and Dido (Elissa). The latter, having been excluded from power by her brother, left the country together with some of the aristocratic families, and founded Carthage (New-Town) about 813 B.C. Of the century that followed, little further is known save occasional allusions in Joel and Amos, which tell of the piratical commerce of Tyrians and Sidonians. Assyrian, Chaldean, Egyptian invasions followed each other

in turns during the last phase of Phœnician history, dating from the 8th century, and soon reduced the flourishing country to insignificance. Deeds of prowess, such as the thirteen years' siege sustained by Tyre against overwhelming forces, could not save the doomed country. Her fleet destroyed, her colonies wrested from her or in a state of open rebellion, torn by inner factions, Phœnicia was ultimately—together with what had been once Nebuchadnezzar's reign—embodied with Persia in 538 B.C. Once more, however, exasperated by the enormous taxes imposed upon them, chiefly during the Greek war, together with other galling measures issued by the successive satraps, the Phœnicians, under the leadership of Sidon, took part in the vast revolution Egypt against Artaxerxes Mnemon and Ochus, about the middle of the 4th century, which ended very unhappily for them. Sidon, the only city that refused to submit at once at the approach of the Persian army, was conquered, the citizens themselves setting fire to it, and more than 40,000 people perished in the flames. Although rebuilt and repeopled shortly afterwards, it yet never again reached its ancient grandeur, and to Tyre belonged the hegemony, until she, too, had to submit, after a seven years' siege, to Alexander, who, through the battle on the Issus (333) had made all Phœnicia part and parcel of the gigantic Persian empire. Under Antiochus the Great, all except Sidon came under Seleucidian sway. Pompey, incorporating Phœnicia with Syria (65), made it a Roman province. During the civil wars of Rome, when Cassius divided Syria into small provinces, and sold them separately, Tyre again became for a short period a principality, with a king of its own. Cleopatra in her turn received Phœnicia as a present from Antony. What shadow of independence was still left to the two ancient cities was taken from them by Augustus (20). Tyre, however, retained much of her previous importance as an emporium and a manufacturing place through the various vicissitudes of Syrian history during the sixteen centuries that followed, until the Ottoman Turks conquered the country, and the opening up of the New World on the one hand, and of a new route to Asia on the other, destroyed the last remnant of the primitive grandeur of one of the most mighty empires of the ancient world, and one which has contributed one of the largest shares to the civilisation of all mankind.

Commerce and colonisation were the elements by which this task was chiefly accomplished. Regarding the former, we have already hinted at the overflowing wealth and almost unparalleled variety of home products which this small country furnished forth, and which, far too abundant for their own consumption, easily suggested the idea of exportation and traffic of exchange. This happy maritime position further enabled them to do that which Egypt and Assyria, with all their perfection of industry and art, were debarred from doing; partly, it is true, through their isolated habits and narrow laws, but chiefly by the natural limits of their countries. To Phœnicia alone it was given to supply the link that was to connect the East with the West, or at least with Europe and Western Africa. Communicating by means of Arabia and the Persian Gulf with India and the coast of Africa towards the equator; and on the north, along the Euxine, with the borders of Scythia,

beyond the Straits of Gibraltar, with Britannia, if not with the Baltic, their commerce divides itself into different great branches according to those natural highways. From the countries on the Persian Gulf and the Red Sea, the coasts of Arabia, Africa, and India, they exported spice, precious stones, myrrh, frankincense, gold, ivory, ebony, steel, and iron, and from Egypt embroidered linen and corn. In exchange they brought not only their own raw produce and manufactures, but gums and resins for embalming, wine and spices. From Mesopotamia and Syria came the emeralds and corals of the Red Sea; from Babylon the manifold embroideries; wine and fine wool from Aleppo and the Mesopotamian plains; from Judæa the finest wheat, grape-honey, oil, and balm. Another remote region, Armenia, furnished troops of riding and chariot horses and mules; and this same country, or rather the south-eastern coast of the Euxine, further furnished the Phœnician emporiums with slaves of a superior market-value—for pirating and slave-dealing went hand-in-hand with their maritime calling—with copper, lead, brass (or ichalcum), and tunnies, which they also fetched, together with conger-eels, from the Atlantic coast. Their extensive early commerce with Greece is frequently alluded to in Homer, and is further shown by the remarkable fact of the abundance of Semitic or Phœnician words in Greek for such things as precious stones, fine garments, vessels, spices, and eastern plants in general, musical instruments, weights and measures, etc. (comp. *μύρρα*, *נור*; *κίναμον*, *קנמן*; *κάννα*, *קנה*; *λίβανος*, *לבנה*; *χαλβάκη*, *גלבנה*; *γάλακτος*, *חלבנה*; *νάρδος*, *נדר*; *σάμψικρος*, *שפיר*; *τασπίς*, *ישפה*; *βύσσος*, *בז*; *κάρπασος*, *כרפס*; *νάβλα*, *נבל*; *τύμπανον*, *תב*; *σαμβύκη*, *סבבה*; *κύπρος*, *כפר*; *ὑσσώπος*, *אזוב*; *κιβύρυνον*, *כפור*; *σάκκος*, *שק*; *χάρτης*, *חרט*; *δέλτος*, *דלת*; *ἀρραβών*, *ערבון*; *μνά*, *מנה*; *κάβος*, *קב*; *δραχμή*, *דרכמן*; *κόρος*, *כר*, etc. etc.) Beyond the Strait, along the north and west coast of Africa, they received skins of deer, lions, panthers, domestic cattle, elephants' skins and teeth, Egyptian alabaster, castrated swine, Attic pottery and cups, probably also gold. Yet the most fabulously rich mines of metals—such as silver, iron, lead, tin—they found in Tartessus.

It appears almost incredible how, with the comparatively small knowledge of natural science which we must attribute to them, they could thus on their frail rafts traverse the wide seas almost from one end of the globe to the other, with apparently no more difficulty than their inland caravans, their chapmen and dealers, found in traversing the neighbouring countries. Yet it must not, on the other hand, be forgotten that theirs appears to have been an uncommon knowledge of astronomy and physical geography—witness their almost scientifically planned voyage of discovery under Hiram—and that, above all, an extraordinary amount of practical sense, of boldness, shrewdness, unscrupulousness, untiring energy and happy genius, went far to replace some of the safe contrivances with which modern discoveries have made our mariners familiar. These qualities also made and kept them the unrivalled masters of ancient commerce and navigation. They were, moreover, known rather to destroy their own ships and endanger their lives, than let others see their secret way and enterprise; and it would be very surprising

if theirs had not been also the greatest discoveries, the greatest riches and splendour and power for many a long century, though they owned but a small strip of country at home. Well might Tyre once say, 'I am of perfect beauty' (Ezek. xxvii. 3), and the prophet address Sidon, 'Behold thou art wiser than Daniel, there is no secret they can hide from thee: with thy wisdom and thine understanding thou hast gotten thee riches, and hast gotten gold and silver into thy treasures: by thy great wisdom and by thy traffic hast thou increased thy riches, and thine heart is lifted up because of thy riches' (Ezek. xxviii. 3-5). There can, indeed, not be fancied a fuller and more graphic account of the state of Phœnicia, especially as regards her commercial relations, than the two chapters of Ezekiel (xxvii. and xxviii.) containing the lamentation on Tyre: which, indeed, form our chief information on this point.

Thus much of their enterprises of commerce and navigation, and their results. Of their home manufactures, which occupied no small place in their trade; of the Tyrian purple, prized beyond all things throughout the ancient world; of Sidonian glass (the invention of which they probably derived from Egypt, whatever they pretended to the contrary)—a fuller account is given under these respective cities, and under the heads GLASS and COLOURS. What degree of perfection they had reached in metallurgy may be seen in the minute description of the mining process contained in Job (xxii. 1-11), probably derived from mines which they worked in the Lebanon, Cyprus, Thasos, Iberia, Tartessus, and wherever a trace of metal was found. That they had acquired a high standing in what we should call the fine arts may be gathered from the fact that not only architects, but skilful workers of all kinds, for the adornment and embellishment of the temple, were sent for by Solomon, when he intended to fulfil the task his father David had set himself, in all the magnificence and splendour worthy of his golden reign. Their sculptures—what there has been found of them—do not, it is true, give us a very high notion of their artistic perfection; but, for all we know, these may be only the archaic beginnings, or the remnants of a corrupt age or unskilful hands. Better things may come to light any day. There certainly exist some exceedingly skilful engravings of theirs on gems among the Assyrian remnants. We further know (cf. the gold-edged silver bowl, for instance, given to Telemachus by Menelaos, which had been previously given to Hiphaistos by the king of the Sidonians; the silver vase offered by Achilles as a prize at the funeral games for Patroclus; the columns and the magnificent vessels cast for the temple of Jerusalem by Tyrian artists, and the like) that they manufactured all kinds of beautiful vessels and ornaments in gold, silver, and ivory, and knew how to extract perfumes from the lily and cypress; but, as in every other respect, they must in this province also be declared to have been only the skilful appropriators of the knowledge of others, of which, however, they made use with a diligence and perseverance entirely unparalleled.

In broadly pointing out the routes their vessels took around the earth, we have indicated the line of their colonisation. We cannot do more in this place than hint at the wanderings of Baal (*q. v.*), Astarte (*q. v.*), and Melcarth (*q. v.*), as the prin-

cipal allegories in which the myth couched the primitive traditions of their settlements abroad. The whole of the Mediterranean, with its islands and coast, had been made theirs by rapid strides. Commencing with neighbouring Cyprus, they proceeded to Cythium, to Rhodes, Crete, the Cycladic and Sporadic Isles, Cilicia, Lycia, and Caria, Chios, Samos, Tenedos, Bithynia, the Euxine, Samothrace, Lemnos, Thasos (whither they had come 'in search of Europa'), Bœotia, and Eubœa. More difficult was the occupation of Sicily and the neighbouring islands, where Motya, Machanetti, Panormus, and other cities, testify to their successful settlements. Thence also, by way of Malta, they sailed to Africa, and founded Carthage, which afterwards possessed herself of all the colonies in Sicily, Sardinia, and Spain. In Sardinia and the Balearic Islands they had commercial establishments at Caralis (Cagliari), Minorca, Iviza, Elba. Spain was one of their earliest and principal settlements, where they founded Cadiz, Malago, Belon, Abdarach, and other cities. It is also more than probable, although we have no distinct evidence on the point, that they had colonies in the tin districts of Cornwall and the Scilly Isles, as also on the Baltic. They settled, further, both on the north-west coast of Africa (Mauritania, Cerne), and on its north coast (Hippo, Utica, Lepcis, Hadrumetum). How far Phœnicians may have had a more than temporary sojourn in India (Ophir =? Abhira), whither they went by way of the Red Sea, we are unable to determine at present.

The same lack of genuine and authentic information, of which we have spoken before, baffles our endeavours to arrive at anything like a proper understanding of the real character of the religion of the Phœnicians. The mutilated scraps contained in classical writers can be of as little use for its full reconstruction as the uncertain allusions of the Bible. As to Sanchoniathon, extracts of whose Phœnician writings (in Philo of Biblos' Greek version) are, as has been mentioned above, supposed to have survived in Eusebius,—all that can be said regarding them is that we have more than ample reasons to suspect both the author, the translator, and the church-father, not of wilful misinterpretation, but of a certain want of candour in doing that full and fair justice to both sides which we expect from an historian of our day. A few broken votive and sacrificial stones, a few coins and unshapely images, make up the rest of our sources of information for the present. A few lustres hence, however, we may, if our excavations are carried on with unflagging zeal, and are as successful as they have been of late years, have as ample a supply to work upon as we have now respecting the once—hardly fifteen years ago—much more unknown land of Nebuchadnezzar and Sennacherib, if not with respect even to Greece and Rome.

It will be sufficient here to indicate that Phœnician, like Canaanitic religion, in general consisted in a worship of the powers of nature under their favourable or creative (= female), and unfavourable or destroying, yet also begetting (= male) aspects. Still more concretely were these represented in the different phases of life, as child (Adonis), youth (Esmun), man (Baal-Hercules), or old man (Belitan). Again, as kings (Moloch) or queens (Astarte), and other characters most fitting to the idea symbolised in them. Their chief (visible)

representatives—the sun, the moon, the planets, and the elements—were revered as supreme deities, who, at the same time, were also the special Numina of particular tribes, places, and seasons, and some of their general designations, such as

King (מלך), Lord (אדון), Almighty (אל), etc., are also found in the Bible. To the supreme class of

deities (עליונים ועליונות) belong Baal and Astarte, with their different attributes and ramifications, *ex.*

*gr.*, Baalsamim, בעל שמים = Zeus Ὀλύμπιος, Optimus Maximus, Baalitan, Baal Ram, Baal Mon ;

Baal Melkarth, מלך קרתא, king of the city (Tyre) ; Astarte = Tanith, תנת, generally with the epithet רבת, the great one, who appears identical with the Egypto-Persian war- and moon-goddess Tanaith. Corresponding to this trias in the Syro-Sidonian worship, we meet in northern Phœnicia with the two Sidonian tribes : El (אל) or Kronos, the

founder of Byblus and Berytus ; Baaltis (בעלתי, my lady) = Aphrodite (Astronoe, Beruth) ; and Adonis (Gaus, Eljun, Esmun, etc.) Besides other well-known deities, such as Moloch and Dagon (Derketos, Atergatis)—for all of which we refer to the special articles treating of them—we find a certain mysterious number of minor gods, variously denominated the strong ones (Kabiri), or the children of the Just One (Zadik, צדיק, בכיר), the principal patrons of the seafarers, worshipped alike by all the Phœnician tribes (Dioscuri, Pætaei : Chusor-Phtha [Chusartis], Astarte, Cadmus (קדם) or Taaut, Adod, and principally Esmun (אשמון = Æsculapius). These, together with the infernal or Chthonic deities : Muth (מות = death), further a goddess only known to us as 'Persephone' (daughter of Jephtha with the Samaritan Siche-mites), or Dido (נדידה = the wandering one), or generally Elothi = my lady, my goddess, etc., are, as far as we know at present, the chief representatives of the Phœnician Pantheon, which, be it observed by the way, appears to have been almost as Catholic in the reception of foreign deities as that of imperial Rome. Like the Greeks, and after them the Romans, the Phœnicians also deified certain natural phenomena and 'elements' (sun, moon, stars, water, fire, earth, air), personal attributes, abstract ideas, allegories, the seasons of life, of the year, of the day, trades and professions, and even animals : probably as symbols only at first. The serpent (Agathodæmon, Esmun, Typhon), the bull (Ashtaroth-Karnajim), the lion, the ass (symbol of Semitic Baal-worship), the dog, fishes, doves, goats, etc., are found either representing divinities, or merely sacred to them. Anything like an investigation into the various phases of Phœnician mythology, which, stretching from the remotest pre-historic days far into the first Christian centuries, must needs contain the most contradictory, apparently irreconcilable, elements and data, lies beyond the scope of this article. We shall only mention that Sanchonia-thon distinguishes—a sure sign of the consciousness on the part of native writers of the hopeless confusion in the religious notions and traditions of their time—three periods or eras, with distinct circles of deities of special classes and families. The first period contains twelve families of gods. In the second three dynasties follow each other, and there are twenty-two supreme deities (accord-

ing to the letters of the Phœnician alphabet), at the head of whom stands El or Kronos, etc., as follows :—

ב, Baityl.	א, El, Kronos.	ע, Apollo.
ג, Dagon.	א, Astarte.	פ, Pontos.
ד, Atlas.	י, Rhea.	צ, Typhon.
ה, Persephone.	ב, Baaltis.	
ו, Athene.	ל, Heimarmene.	ק, Nereus.
ז, Zeus Demarus.	מ, Hora.	ר, Sido.
ח, Sadid.	נ, Kronos.	ש, Poseidon.
	ס, Zeus Belus.	ת, Hadod.

Of the third period only fragments of Sanchonia-thon have come down, but it would appear as if Zeus Belus had in this assumed the chief rank, equal to Kronos of the second period. These gods and goddesses were propitiated in various ways, but chiefly by sacrifices, which consisted on certain

occasions of first-born male children (העביר למוֹלך). Prostitution (קדש) in honour of Astarte was considered another praiseworthy act. Among the rites of sacrifice and expiation must also be enumerated circumcision, which was not practised with all the Phœnician tribes, but seems to have been a ceremony peculiar to the worshippers of El, the special deity of Berytus and Byblus. Whether, however, as has been held, it is to be considered analogous to this prostitution of virgins in the service of Astarte, we shall not here investigate. The country abounded with places of worship, for every grove and every height, every river and every well, were adapted for the purpose, if it could be fancied a dwelling-place for some deity [IDOLATRY ; HEIGHT]. Nor were special buildings (sanctuaries, temples), with all their accessories of arks and priests, wells and fires, wanting ; as indeed the Phœnicians are supposed to have been the first who erected such permanent sanctuaries. Their construction was in accordance with their destination, which was not to be houses of prayer, but the seat of honour of the special deity. They were divided into two parts, the first of which contained the statues and symbols which were the objects of public worship. The second, the Adyton, on the other hand, contained such symbols which were not to be seen constantly, but were reserved for certain special festive occasions ; besides the holy arks with their mystical contents, and the holy vehicles upon which these sacred objects were carried about. The walls were covered with the symbolical representations of the deities ; and in this place also the priests kept their archives. Something of the abhorrence of all visible representations of the Deity which seems in the first stages of their existence to have filled the minds of all Semitic nations—an abhorrence erroneously taken of late to indicate their monotheistic propensity (cf. Renan's and Munk's *Inaugural Lectures*)—is also noticeable with the Phœnicians, whose gods were legion. No paintings, statues, or other likenesses of deities are recorded as found in the ancient temples of Gades, Tyre, Samaria, Paphos, etc. There were, however, certain symbolical columns of wood, אֲשָׁרִים (for the female Numen, Astarte), of stone, מַצְבֹּת (for Baal), of gold or emerald (חֲמֻנִים), together with Phallic representations, found in and before the Phœnician sanctuaries. Another kind of divine mementoes, as it were, were the Betylia (בית אל), probably meteors, to which a fetish-like reverence was shown, and which were called by

the names of Father, mighty father (אב אב אביר), and at the time of Augustine there were still a number of priests engaged in Punic Africa to wait upon these idols and to elicit oracles from them (Eucaddirs). Among the principal festivals, with some of which, as with those of the Hebrews, were connected pilgrimages—from the furthest colonies even—are the 'awakening' and the 'self-destruction by fire' of Herakles, a certain festival of 'staves,' a vintage-feast in honour of the Tyrian Bacchus, and certain others in honour of Astarte, celebrating her disappearance, flight, and wanderings, the Adonia, etc. [TYRE; SIDON.]

A few words may be added here on Phœnician Theogony and Cosmogony, which, as far as they are known to us, give evidence of the enormous amount of thought bestowed by the thinkers of that people on the enigma of creation. The Deity was, in accordance with the antique mind, presupposed. Speculation never questioned its eternal existence, the original quality of each of its two principal—male and female—sides, and the way in which, out of their union, sprang the universe. According to the system of Eudemus, Time, Desire, and Mist formed the first trias of existence; and from the embrace of the two last sprang air and 'motion of air,' out of which again was produced the mundane egg. The cosmogony, according to Sanchoniathon on the other hand, assumes, in the beginning of all things, a gloomy and agitated air and a turbid chaos of thickest darkness, which for a long course of ages was without limits. The wind becoming enamoured with its own essence, Mot sprang into being, as a kind of thick, putrid fluid, which contained all germs. The first beings created from this were without intellect; and from them, again, came intellectual beings, Zopha-Semin (צופי שמים), watchmen, or beholders of the heavens. 'And it began to shine Mot, also the sun and the moon, the stars and the great planets. The glowing sun, heating sea and earth, raised vapours, which produced clouds and winds, lightning and thunder, and at their crash the beings began to awake in terror, and male and female moved on land and sea.' The wind Kolpia further produced with Baau (כורב) of Genesis), Aion and Protogonos, the first mortals. Aion first discovered the art of nutriment from fruit-trees; and their children, Genos and Genea, who dwelt in Phœnicia, first worshipped Baal-samin, or the sun.

Genos begat Light, Fire, and Flame, out of whom came giants, Cassius, Libanus, Antilibanus, and Brathys. Their sons invented the art of constructing huts of reeds, and meshes, and the papyrus, and the art of making coverings for the body out of the skins of wild beasts. After them came the inventors of hunting and fishing, the discoverers of iron, of the art of navigation, etc. One of their descendants was Elyon (probably the God whose priest was Melchisedec, Gen. xiv. 18, etc.; Abraham, in his reply to the king of Sodom, emphatically adds 'Jehovah' to El-Eljon), who with his wife Beruth begat an Autochthon, afterwards called Uranos (heaven), and his sister Ge (earth). They had issue four sons, Ibis, Betylus, Dagon, and Atlas; and three daughters, Astarte, Rhea, and Dione. Chronos deposed his father, subsequently killed him, and travelled about in the world. He then assigned the whole of Phœnicia to Astarte, to Athene he gave Attica, and to Taut Egypt.

The country being involved in war, he offered up his two sons, Jeud and Muth (Μωθ, Pluto), in expiation. He afterwards bestowed the city of Byblus upon the goddess Baaltis (Dione), and Berytus upon Poseidon and the Kabiri. Taut made the first images of the countenances of the gods Chronos and Dagon, and formed the sacred characters of the other elements; and the Kabiri, the seven sons of Sydyk, and their eighth brother Asklepios, first set them down in memory. 'Thabion,' Eusebius (*Pr. Ev.* i. 10) continues, 'the first hierophant, allegorised these things subsequently, and, mixing the facts with physical and mundane phenomena, he delivered them down to those that celebrated orgia, and to the prophets who presided over the mysteries, and to their successors, one of whom was Isiris, the inventor of three letters, the brother of Chna, the first Phœnician.'

On the invention of letters, generally ascribed to the Phœnicians, as well as on Phœnician language and literature, see SEMITIC LANGUAGES.

PHRYGIA (Φρυγία), an inland province of Asia Minor, bounded on the north by Bithynia and Galatia; on the east by Cappadocia and Lycaonia; on the south by Lycia, Pisidia, and Isauria; and on the west by Caria, Lydia, and Mysia. In early times Phrygia seems to have comprehended the greater part of the peninsula of Asia Minor. It was subsequently divided into Phrygia Major on the south, and Phrygia Minor or Epictetus (*acquired*) on the north-west. The Romans divided the province into three districts: Phrygia Salutaris on the east, Phrygia Pacatiana on the west, and Phrygia Katakekaumene (*the burnt*) in the middle. The country, as defined by the specified limits, is for the most part level, and very abundant in corn, fruit, and wine. It had a peculiar and celebrated breed of cattle, and the fine raven black wool of the sheep around Laodicea on the Lycus was in high repute. The Mæander and the Hermus were its chief rivers. The Phrygians were a very ancient people, and are supposed to have formed, along with the Pelasgi, the aborigines of Asia Minor. Jews from Phrygia were present in Jerusalem at the Feast of Pentecost (Acts ii. 10), and the province was afterwards twice traversed by St. Paul in his missionary journeys (Acts xvi. 6; xviii. 23). The cities of Laodicea, Hierapolis, and Colossæ, mentioned in the N. T., belonged to Phrygia, and Antioch in Pisidia was also within its limits (see the names). Rosenmüller, *Bibl. Geog.*, iii. 43-45; Winer, *Real-wörterbuch*; Leake, *Geog. of Asia Minor*.—J. K.

PHUT (פוט; Sept. Φούδ), a son of Ham (Gen. x. 6), progenitor of an African people of the same name, sometimes rendered 'Lybia' (Jer. xlv. 9; Ezek. xxvii. 10; xxx. 5; xxxviii. 5; Neh. iii. 9). [HAM.]

PHYGELLUS. [HERMOGENES.]

PHYLACTERIES (φυλακτήρια), small square boxes made either of parchment or black calf-skin, in which are enclosed slips of parchment or vellum with Exod. xiii. 2-20, 11-17; Deut. vi. 4-9, 13-22, written on them, and which are worn on the head and the left arm by every Jew on week-day mornings during the time of prayer.

1. *Name and its signification.*—The Greek term φυλακτήριον=phylactery is a later expression used

in the N. T. for the O. T. word **טוטפת**, plur. **טוטפות**, which is rendered **תפילין**, *prayer-fillets*, by the Chaldee paraphrases of Onkelos and Jonathan b. Uzziel, as well as by the unanimous voice of Jewish tradition. It is now generally agreed by lexicographers that, according to the analogy of **בבל**, which stands for **בבל**, and **בוקב**, which stands for **בבבב**, and which are formed by the reduplication of the two chief radical letters, **טוטפת** stands for **טפנפת**, from **טוף**, to bind round (Ewald, *Lehrbuch der Hebräischen Sprache*, sec. 158 c), and that it denotes a tie, a band, a frontlet. The Sept.

in all the three instances in which **לטוטפת בין עיניך** occurs (Exod. xiii. 16; Deut. vi. 8; xi. 18), renders it by *ἀσάλευτον πρὸ ὀφθαλμῶν σου*, a fixture before thine eyes, with which Symmachus and Theodotion agree. The rendering of Aquila, *εἰς ἀτινακτα*, for an immovable (comp. Montfaucon, *Hexapla*, nota ad vers.) is to the same effect. Philo (ii. 358), however, translates it *σεύμενα πρὸ ὀφθαλμῶν*, and afterwards adds that it is to be a constant pendulum (*σάλον ἐχέρῳ ταῦτα κινούμενον*) to summon the sight by its motion to a very clear inspection. Herzfeld (*Geschichte des Volkes Israel*, ii. 224) infers from this that Philo must either have read *σάλευτον* in the Sept., or taken the *ά* before it as *intensitive*, and assigns to **טוף** the sense of to move backwards and forwards, vindicating for **טוטפות** the meaning of *pendulum*, *pendent ornament*. Herzfeld, moreover, maintains that this rendering is more in harmony with the little houses, or square boxes, constituting the phylacteries, and that it escapes the following objections to the current rendering of it by *binding round*: i. In the phylacteries the box in the front is the principal part, and not the strap round the head which holds it; and ii. The **טוטפת** is to be 'between the eyes,' which does not tally with

forehead tie (*Stirnbinde*). The name **תפילין**, *prayer-fillets*, by which the Chaldee paraphrases and the Syriac version (**ܬܦܝܠܝܢ**) render **טוטפות**, and which is the common appellation for the phylacteries among the Jews to the present day, owes its origin to the fact that the phylacteries are worn during prayer time. Hence the plural **תפילין** has the masculine termination to distinguish it from the feminine **תפילות**, which denotes *prayers*, just as the plural masculine **תהלים** denotes *psalms*, in contradistinction to the feminine plural **תהלות**, *praise*.

2. The manner in which the phylacteries are made and used.—As the Mosaic law (Exod. xiii. 16; Deut. vi. 8; xi. 18) gives no specific directions how the phylacteries are to be made, but simply says that they are to be of a double nature, viz., for the hand and between the eyes, the Jewish canons have enacted minute regulations about the arrangement and use of them. A piece of leather is soaked, stretched on a square block cut for the purpose, sewed together with gut-strings while wet, and left on the block till it is dried and stiffened, so that when it is taken off it forms a (בית) square leather box (*Jerusalem Megilla*, iv. 9). As the Mosaic code enjoins one for the hand and another for the head, two such boxes (בתים) are requisite for making the phylacteries. The box of which the phylactery

for the hand (**תפלה של יד**) is made has no inscription outside, and only one cell inside, wherein is deposited a parchment strip with the four following sections written thereon in four columns, each column having seven lines. On column i. is written Exod. xiii. 1-10, treating on the sanctification of the first-born, and containing the injunction about the phylacteries; on col. ii. Exod. xiii. 11-16, which also treats on the sanctification of the first-born, and repeats the injunction about the phylacteries; on col. iii. Deut. vi. 4-9, enjoining that the law and the command about the phylacteries should be inculcated into the minds of the rising generation; and on col. iv. is written Deut. xi. 13-21, describing the blessing attached to the keeping of the law, and to the observance of the command about the phylacteries. The order, therefore, of the passages of Scripture is as follows:—

iv.	iii.	ii.	i.
Deut. xi. 13-21	Deut. vi. 4-9	Ex. xiii. 11-16	Ex. xiii. 1-10

The slip is rolled up, put inside, tied with white and well-washed hairs of a calf or cow, generally obtained from the tail, and put into the box; a flap connected with the brim is then drawn over the open part and sewed firmly down to the thick leather brim, in such a manner as to form a loop on one side, through which passes a very long leather strap

433. Phylactery for the Arm.

(רצועה),\* wherewith the phylactery is fastened to the arm. The box of which the phylactery for the

\* The writer of the article *Frontlets = Phylacteries*, in *Smith's Dictionary of the Bible*, is mistaken when he says that 'Hebrew letters were

head (תפלה של ראש) is made has on the outside to the right the regular three-pronged letter *Shin*, being an abbreviation for שׁוּׁר, the *Almighty*, and on the left side a four-pronged letter *Shin* (*Sabbath*, 28 b). In the inside are four cells, in which are deposited four slips of parchment, whereon are written the same four passages of Scripture as on the one slip in the phylactery for the hand. The box is closed in the same manner, and a thong passes through the loop, with which it is fastened to the head.

434. Phylactery for the Head.

The phylacteries, like the *Mezuzah*, i.e., the scrolls on the door-posts, must be written in Hebrew characters, whilst the law may be written in Greek (*Mishna Megilla*, i. 8). Every Jew, from the time that he is thirteen years of age, when he is considered a member of the congregation (בר מצוה), is obliged to wear the phylacteries during the time of morning prayer, every day except on Sabbath and festivals. Before commencing his

inscribed on the thongs (רצועות), as may be seen from an inspection of a phylactery, or from Maimonides' treatise on the subject. He is equally mistaken when he refers to the *Mishna* for 'further frivolities' on the phylacteries, and 'especially in the treatise called *Rosh Hashanah*'—this treatise in the *Mishna* does not even mention the bare name of phylacteries. That Chrysost., Theophyl., and other fathers who knew little of Judaism, and still less of Hebrew, should have said that the Decalogue was inscribed on the parchments in the phylacteries is no wonder; but that Jerome should have committed the same blunder, and that the erudite Spencer should have espoused it, is really astonishing.

devotions he first puts on the one on the left arm through the sling formed by the long strap. Having fastened it just above the elbow, on the inner part of the naked arm, in such a manner that when the arm is bent the phylactery may touch the flesh and be near the heart, to fulfil the precept, 'ye shall lay up these words in your heart,' he first twists the long strap three times close to the phylactery, forming a *Shin*, which stands for שׁוּׁר, the *Almighty*, pronouncing the following benediction: 'Blessed art thou, O Lord our God, king of the universe, who hast sanctified us with thy commandments and enjoined us to put on the phylacteries.' He then twists the long leather strap seven times around the arm (in the form of two *Shins*, one with three prongs and the other with four), and puts on the phylactery on the head, placing it exactly in the centre between the eyes so as to touch the spot where the hair begins to grow, and before he secures it pronounces the following benediction: 'Blessed art thou, O Lord our God, king of the universe, who hast sanctified us with thy commandments, and enjoined upon us the command about the phylacteries;' and immediately after adjusting it says, 'Blessed be the name of the glory of his kingdom for ever and ever' (Maimonides, *Iad Ha-Chetzaka, Hilchoth Tephillin*, iv. 5). He then winds the end of the long leather strap three times round his middle finger, and the remainder round the hand, saying, 'I will betroth thee unto me for ever, yea, I will betroth thee unto me in righteousness and in judgment, and in loving-kindness, and in mercy, and thou shalt know the Lord' (Hos. ii. 19).

435. The Arm.

There is no special canon about the size of the boxes (בתים) which contain the slips, and thus constitute the phylacteries. They are generally made an inch and a half square, and are worn during morning prayer, except on Sabbath and festivals, because these days being themselves a sign (אות) require no other sign or pledge (Maimonides, *ibid.* iv. 10). The pious Jews who are engaged in the study of the law, and in meditations, also wear them during these hallowed engagements; they make the phylacteries a little larger than the ordinary ones to give more space, and hence more distinctness to every letter and word composing the writing inside, and walk with the phylacteries on from one place to another. The hypocrites among the Pharisees imitated this and made their phylacteries more than ordinarily large so as to make them conspicuous and visible to any one at a distance, thereby to indicate that they were praying or in holy meditation, which our Saviour rebuked (Matt. xxiii. 5). If the phylacteries are written by an infidel they must be burnt; and if

written by a Samaritan, an informer, a slave, a woman, or a minor, they are unlawful and must be shut up (Maimonides, *Iad Ha-Chezaka, Hilchoth Tephillin*, i. 13). The Sadducees wore the phylacteries on the forehead or brow, and on the palm of the hand (Maimonides, *ibid.* iv. 3).

3. *Origin and design of the Phylacteries.*—It is the unanimous voice of Jewish tradition that the phylacteries are enjoined in Exod. xiii. 9, 16; Deut. vi. 8; xi. 18. It is true that Rashbam and Ibn Ezra (on Exod. xiii. 9), who are followed by De Lyra, Calvin, Bishop Patrick, H. Michaelis, Hengstenberg, Keil, etc., take the passages in question in a figurative sense. But against this is to be urged that—1. It is utterly inconceivable that the same declaration should be used four times figuratively, there being no parallel for such a usage throughout the whole Pentateuch. 2. In two cases out of the four (Deut. vi. 9; xi. 20), the injunction is followed immediately by the command about *the Mezuzah*, which is admitted to be literal [MEZUZA], and it is against all sound rules of exegesis to take one command in a figurative and the other in a literal sense. 3. In every one of the four instances wherein the injunction is given, the expression *אוֹת* is used, which in all other passages of Scripture invariably denotes a *visible sign*, given either to attest an event or doctrine stated in the foregoing passage, or to serve as a remembrance. Now, on the supposition that the whole commandment is to be taken figuratively, it would be

no sign whatever, and the term *לִזְכֹּרֶן* could not have been substituted for the technical expres-

sion *לְטוֹטֶפֶת*, as it is in Exod. xiii. 9. 4. The end of the external action enjoined in the first clause of Exod. xiii. 9, is immediately introduced in the

second clause by *לִמְעַן*, 'that the law of the Lord may be in thy mouth'; whereas, as Philippsohn rightly remarks, the simple conjunction *ו* would be required if the preceding words had the same internal figurative meaning. 5. It was a common custom in ancient days for those who engaged in military service, or devoted themselves to the worship of a special deity, to be marked either on the forehead or on the hand, or on both (Veget. *de Milit.*, ii. 5; Herod., ii. 113; Lucian, *de Syr. dea*, 59; *Asiat. Res.*, vii. p. 281, *seq.*) Thus the high-priest, as being especially consecrated to the service of Jehovah, had inscribed in the plate on the front of his head 'Holiness to the Lord' (Exod. xxviii. 36), the ordinary servants of Jehovah were commanded to have a mark (Ezek. ix. 4, 6); and at the ingathering of Israel we are told that even the horses shall have written upon their bells 'Holiness to the Lord' (Zech. xiv. 20); whilst the worshippers of the beast are represented as bearing his inscription on their foreheads and arms (Rev. vii. 3; xiii. 16-18; xiv. 9-11; xvi. 2; xix. 20; xx. 4). The Moslems, Nusairieh and Bedawin Arabs, to the present day, either tie, or have tattooed, on their hands and foreheads, select passages of the Koran. Sir Stamford Raffles presented to his cousin, the Rev. Dr. Raffles, a small circular copy of the Koran, the size of half a crown, which a prince of Djocjarta, in the isle of Java, wore on his arm, and which was taken from him when he lay slain on the ground. This remarkable copy of the Koran, which is smaller than an ordinary phylactery, is now in the possession of T.

Stamford Raffles, Esq., the son of the late Dr. Raffles. It was therefore natural that the Mosaic law, which forbids tattooing (Lev. xix. 28), should appropriate, for the service of the Most High, the innocent and generally prevailing custom, which the lawgiver could not eradicate, of wearing ornaments and tokens, with inscriptions declaring that they belonged to Jehovah, and that the Lord is their Redeemer (Thomson, *The Land and the Book*, ed. London, pp. 67, 98). This universal custom would of itself be sufficient argument for taking the injunction in its literal sense, even if we had not the support of the ancient versions and the undeviating practice of the synagogue; and be it remembered, that even the Sadducees, who rejected tradition, and adhered to the simple meaning of the law, also wore phylacteries. As to the phrase

*כְּתָבָם עַל לֶחֶם לֶכֶךְ*, Prov. iii. 3, etc., which is frequently quoted in support of the spiritual meaning, it must be observed that it too is to be taken literally,

inasmuch as *לֶחֶם* does not denote the *external front of the breast*, but the *tablet* which the ancients wore on their hearts. It is the same as *פָּנֵקֶם*, which so frequently occurs in the *Mishna* (comp. *Kelim*, xxiv. 7), and which the Greeks called *Ilvaß*, and the Romans *Pugillares*. This *tablet*, when made of wood, was called *לֶחֶם* (Is. xxx. 8; Habak. ii. 2);

when of metal, was termed *גִּלְיוֹן* (Is. viii. 1), and when it was of stone it was denominated *אֲבָנִים*. The argument of Spencer, that because the Septuagint renders *טוֹטֶפֶת* by *ἀσδλεντα*, and not *φυλακτήρια*, therefore this version did not understand it literally, 'inter eos (qui legem illam sensu tantum metaphoricis exponendam censuerunt) LXX. cum primis notandi verunt, qui quod in Moysi est *טוֹטֶפֶת* ipsi non *φυλακτήρια* sed *ἀσδλεντα* translulerunt' (*de Leg. Hebræor. ritual.*, L. iv. c. 2), ignores the fact that *φυλακτήρια* is a term which obtained at a much later period as an equivalent

for *הַפָּלִי*. Josephus, too, who like all the ancient and modern Jews takes the injunction literally, does not render *טוֹטֶפֶת* by *φυλακτήρια* (*Antiq.* iv. 8. 13). The fact is, that in very early days there was no fixed and technical term for those frontlets. Hence Herzfeld (*Geschichte des Volkes Israel*, ii. 223) has rightly pointed out that the phylacteries are meant in 2 Kings xi. 12, where the high-priest is said to have put upon Joash 'the crown and the *עֲדוֹת*;' and Duschak (*Josephus und die Tradition*, p. 85) supposes that the *Tephillin* are meant by *צִוֵּר תְּעוּדָה* (Is. viii. 16). The injunction about the phylacteries was so generally observed among the Jews after the Babylonish captivity, that the writers of them found it a most lucrative business. Hence we are told that 'twenty-four fast days were ordained by the Great Synagogue, in order that the writers of the scrolls of the law, the phylacteries, and the mezuzas, might not grow rich, inasmuch as they were not allowed to write them on these days' (*Pesachim*, 50 b). In harmony with the design of the phylacteries, Maimonides beautifully propounds their utility, when he remarks: 'the sacred influence of the phylacteries is very great; for as long as one wears them on his head and arm he is obliged to be meek, God-fearing, must not suffer himself to be carried away by laughter or idle talk, nor indulge in evil thoughts; but must turn his attention to the words of truth and uprightness.' The blunder which has

been propagated by the learned Spencer, and which is repeated by Winer (*Biblisches Realwörterbuch*, s. v. *Phylakterien*), Dean Alford (on Matt. xxiii. 5), and others, based upon a misunderstanding of the Chaldee paraphrase of the Song of Songs viii. 3, has led Mr. Farrar (in Smith's *Dictionary of the Bible*) to make the positive but erroneous assertion—'that phylacteries were used as amulets is certain, and was very natural.' Now a careful perusal of the said passage in the Chaldee paraphrase will show that it was not the *phylacteries* but the *Mezuzas* which were used as charms. The whole passage is given in English in the article MEZUZA.

4. *Literature*.—Maimonides, *Iad Ha-Chezaka, Hilchoth Tephillin*, sections i.-iv., vol. i. p. 84-92, ed. Amsterdam 1702; Spencer, *De Leg. Hebræorum ritual.*, lib. iv. c. 1-7, p. 1201-1232, ed. Cantabrigiæ 1727; Herzfeld, *Geschichte des Volkes Israel*, vol. ii. p. 223, seq., Nordhausen 1837; Jewish Ritual entitled *Derech Ha-Chajim*, Vienna 1859, p. 24, seq.; Hochmuth in *Ben Chananja*, vol. i. p. 215, etc., Szegedin 1858.—C. D. G.

PHYSIC; PHYSICIANS. There can be no question that the Israelites brought some knowledge of medicine with them from Egypt, whose physicians were celebrated in all antiquity. To the state of medical knowledge in that country there are indeed some allusions in Scripture, as contained in the notice of the corps of physicians in the service of Joseph (Gen. i. 2); of the use of artificial help and practised midwives in childbirth (Exod. i. 16); and of the copious materia medica, the 'many medicines,' which their medical practice had brought into use (Jer. xlv. 11). On the strength of these notices, and in the absence of equally detailed information respecting the state of medicine among the Hebrews, it has become usual to bring under the present head all that Wilkinson and others tell us respecting the medical service of the Egyptians; but in truth all this has little connection with the Hebrews, and tends nothing to the illustration of Scripture, except in the particular instances to which we have referred; for nothing can be more manifest than that the state of medicine was very different among the Egyptians from what it was among the Hebrews. It is, therefore, better to bring together the few facts which are really available, than to occupy our space with irrelevant matter. This will embrace so much of the Egyptian matter as is properly applicable to the subject.

In Gen. i. 2, it is said that Joseph 'commanded his servants, the physicians, to embalm his father; and the physicians embalmed Israel.' By this we are not to understand that all the physicians of Joseph took part in the operation. The command must be considered as addressed to those among them to whom this business belonged. It seems rather remarkable to find in the household of Joseph a considerable number of physicians. Warburton (*Divine Legation*, b. iv. 3-83) compares with this account what Herodotus (ii. 84) says of the Egyptian physicians—'The medicine practice is divided among them as follows: each physician is for one kind of sickness, and no more; and all places are crowded with physicians: for there are physicians for the eyes, physicians for the head, physicians for the teeth, physicians for the stomach, and for internal diseases.' Therefore, remarks

Warburton, it ought not to appear strange that Joseph had a considerable number of family physicians. 'Every great family, as well as every city, must needs, as Herodotus expresses it, swarm with the faculty. A multitude of these domestics would now appear an extravagant piece of state even in a first minister, but we see it could not be otherwise, when each distemper had its proper physician.' The renown of the Egyptian physicians, in ancient times, may be sufficiently illustrated by the fact that Cyrus had a physician sent him from Egypt, and Darius always had Egyptian physicians at his court (Herodot. iii. i. 291). On this subject see Plin. *Hist. Nat.*, vii. 57, xxvi. 3, xxix. 30; Wilkinson, *Anc. Egyptians*, iii. 390-394; Hengstenberg, *D. Bücher Moses u. Aegypten*, pp. 70, 71; Sprengel, *Gesch. d. Alte Welt.*, i. 62.

In the early stage of medical practice attention was confined among all nations to surgical aid and external applications: even down to a comparatively late period outward maladies appear to have been the chief subjects of medical treatment among the Hebrews (Is. i. 6; Ezek. xxx. 21; 2 Kings viii. 29; ix. 15); and although they were not altogether without remedies for internal or even mental disorders (2 Chron. xvi. 12; 1 Sam. xvi. 16), they seem to have made but little progress in this branch of the healing art. The employment of the physician was, however, very general both before and after the exile (2 Chron. xvi. 12; Jer. viii. 22; Sirach xxxviii. 1; Mark v. 26; comp. Luke iv. 23; v. 31; viii. 43).

The medicines most in use were salves, particularly balms (Jer. viii. 21; xlv. 11; comp. Prosper Alpinus, *Med. Aegypt.*, p. 118), plasters or poultices (2 Kings xx. 7; comp. Plin. xxiii. 63), oil-baths (Joseph. *De Bell. Jud.* i. 33. 5; ii. 21. 6; *T. Bab. tit. Berachoth*, i. 2), mineral baths (Joseph. *Antiq.* xvii. 6. 5; *Vita*, 16; *De Bell. Jud.* i. 33. 5; ii. 21. 6; comp. John v. 2, seq.), river bathing (2 Kings v. 10). Of remedies for internal complaints, some notion may be formed from the Talmudical intimations of things lawful and unlawful to be done on the Sabbath day. They were mostly very simple, such as our old herbalists would have been disposed to recommend. For instance:—'It is unlawful to eat Greek hyssop on the Sabbath, because it is not food fit for healthy people; but man may eat wild rosemary, and drink רועה אבום ('bloom of the herbs'; some plant regarded as an antidote against pernicious liquids); a man may eat of any kind of food as medicine, and drink any

kind of herbage, except water of דקלים, *dekalim* (i. e., 'water of trees,' that is, from a spring between two trees, the first draught of which was believed to promote digestion, the second to be laxative, and the third an emetic), and of עקרים, *cos ikkarim* (a mucilage or ointment of pulverised herbs and gum in wine), as these are only remedies for the jaundice; but a man may drink the water of *dekalim* for thirst, and may anoint himself with the oil of *ikkarim*, but not as a remedy. He who has the toothache must not rinse his teeth with vinegar, but he may wash them as usual (i. e., dip something in vinegar, and rub them), and if he gets cured, he does get cured. He who has pains in his loins must not rub them with wine or vinegar; he may, however, anoint them with any kind of oil, except rose-oil. Princes may anoint (dress) their wounds with rose-oil, as they are in the habit

of anointing themselves on other days' (*T. Bab. tit. Sabbath.*, fol. 110; comp. Lightfoot, *Hor. Hebr.* in Matt. v. 26).

Amulets were also much in use among the Jews; the character of which may be shown from the same source:—'It is permitted [even on the Sabbath] to go out with the egg of a grasshopper, or the tooth of a fox, or the nail of one who has been hanged, as medical remedies' (*T. Bab. tit. Sabbath.*, fol. 4. 2). Strict persons, however, discountenanced such practices as belonging to 'the ways of the Amorites.' Enchantments were also employed by those who professed the healing art, especially in diseases of the mind; and they were much in the habit of laying their hands upon the patient (2 Kings v. 11; Joseph. *Antiq.* ii. 5).

The part taken by the priest in the judgment on leprosy, etc., has led to an impression that the medical art was in the hands of the Levitical body. This may in some degree be true; not because they were Levites, but because they, more than any other Hebrews, had leisure, and sometimes inclination, for learned pursuits. The acts prescribed for the priest by the law do not, however, of themselves prove anything on this point, as the inspection of leprosy belonged rather to sanitary police than to medicine—although it was certainly necessary that the inspecting priest should be able to discriminate, according to the rules laid down in the law, the diagnosis of the disease placed under his control (Lev. xiii. 13; xiv. 15). The priests themselves were apt to take colds, etc., from being obliged to minister at all times of the year with naked feet; whence there was in latter times a medical inspector attached to the temple to attend to their complaints (Kall, *De Morbis Sacerdot.* V. T.; Lightfoot, p. 781).

Of anatomical knowledge some faint traces may be discerned in such passages as Job x. 8, *seq.* It does not appear that the Hebrews were in the habit of opening dead bodies to ascertain the causes of death. We know that the Egyptians were so, and their practice of embalmment must have given them much anatomical knowledge (Wilkinson, *Anc. Egypt.*, iii. 392). But to the acquisition of such knowledge there were great obstacles among a people to whom simple contact with a corpse conveyed pollution. Besides the authorities cited, see F. Börner, *Dissert. de Statu Medicinæ ap. Vett. Ebr.*, 1755; Sprengel, *De Medicina Ebraeor.*, 1789; Mead, *Medica Sacra*, 1755; Schmidt, *Bibl. Medic.*; Norberg, *De Medicina Arabum*, in *Opusc. Acad.* iii. 404, *seq.*; see also DISEASES OF THE JEWS, and the names of diseases in the present work.—J. K.

PI-BESETH (פִּי בֶּסֶת; Sept. Βούβαστος), a city of Egypt, named with several others in Ezek. xxx. 17. According to the Sept., which is followed by the Vulgate, it is the same with Bubastus, which was the principal town of the Nomos Bubastites (Plin., *Hist. Nat.*, v. 9; Ptol. iv. 5). Bubastus itself is evidently a corruption of Pi-bast, Pi being the Egyptian article; and Pi-beseth seems also to be manifestly no other than a corrupt reading of the same Egyptian name (Wilkinson's *Modern Egypt.*, i. 427). That name was derived from the goddess Bubastis (Copt. *Pascht*), whom the Greeks identified with their Artemis. A great festive pilgrimage was yearly made to her temple in this place by great numbers of people (Herod., ii. 5-9).

Bubastus is described with unusual minuteness by Herodotus (ii. 137, 138); and Wilkinson assures us that the outlines of his account may still be verified. The city was taken by the Persians, who destroyed the walls (Diod. Sic., xvi. 51); but it was still a place of some consideration under the Romans. It was near Bubastus that the canal leading to Arsinoë (Suez) opened to the Nile (Herod. ii. 138); and although the mouth was afterwards often changed and taken more southward, it has now returned to its first locality, as the present canal of Tel-el-Wadee commences in the vicinity of Tel Basta. This Tel Basta, which undoubtedly represents Bubastus, is in N. lat. 30° 36'; E. long. 31° 33'. The site is occupied by mounds of great extent, which consist of the crude brick houses of the town, with the usual heaps of broken pottery. The temple, of which Herodotus states that, although others in Egypt were larger and more magnificent, none were more beautiful, is entirely destroyed; but the remaining stones, being of the finest red granite, confirm the historian's testimony (Wilkinson, *Modern Egypt.*, i. 300, 427-429; Ritter, *Erdkunde*, i. 825).—J. K.

PIECE OF GOLD. This phrase occurs only once in the A. V. in a passage respecting Naaman the Syrian, who takes on his visit to the king of Israel, 'ten talents of silver and six thousand pieces of gold and ten changes of raiment' (2 Kings v. 5). In several other passages of a similar kind, the A. V. supplies the word 'shekels' (Num. vii. 14, 20, 26, 32, 38, 44, 50, 56, 62, 68, 74, 80, 86; Judg. viii. 26; 1 Kings x. 16; 2 Chron. iii. 9; 1 Chron. xxi. 25; for this last passage see PIECE OF SILVER); and as similar expressions are also found respecting silver, the word understood in the case of Naaman would also probably be 'shekels,' rather than an indefinite word like 'pieces.' There is not much doubt that a weight is intended in all the passages above given, where the A. V. has supplied the word 'shekels,' and it is extremely likely that a weight of gold is also meant in the passage relating to Naaman, for coined money was not invented at the time, nor can it have existed in Palestine before the taking of Samaria by the Assyrians (B.C. 721). Indeed, it is more probable that it was unknown till the Persian period [ADARCONIM; MONEY]. Rings of gold may have been employed, as among the Egyptians, but there is no evidence that they bore any name, since the practice was to weigh money (cf. Is. xlvi. 6; Deut. xxv. 15; Gen. xliii. 21), though as regards the silver, it seems almost impossible that large sums could have been weighed (Exod. xxxviii. 26), and individual pieces of different denominations are more than once alluded to (Exod. xxx. 15; 1 Sam. ix. 8, 9) [MONEY]. Taking these facts into consideration, it seems preferable to render what the A. V. gives as 'pieces of gold' by 'shekels of gold.'—F. W. M.

PIECE OF SILVER. This phrase occurs both in the A. V. of the O. T. and N. T., and consequently must be separately considered.

1. The word 'pieces' has been supplied in the A. V. for a word understood in the Hebrew. The rendering is always 'a thousand,' or the like, 'of silver' (Gen. xx. 16; xxxvii. 28; xlv. 22; Judg. ix. 4; xvi. 5; 2 Kings vi. 25; Song of Solomon viii. 11; Hos. iii. 2; Zech. xi. 12, 13). The phrase in these passages, excepting the first three,

is rendered by the LXX. ἀργύριον or ἄργυρος (Zech. i. c.), and all by the Vulg. *argenteus*. The first is rendered by the LXX. ὀδραχμία, whilst the two following are given as χρυσούς, but apparently without any reason. In similar passages, the word 'shekels' occurs in the Hebrew, and they are either in the Pentateuch, or speak of important purchases, taxation, etc. The purchase of the cave of Machpelah by Abraham (Gen. xxiii. 15, 16), that of the threshing-floor and oxen of Araunah by David for fifty shekels of silver (2 Sam. xxiv. 24, elsewhere stated to have been purchased for six hundred shekels of gold, 1 Chron. xxi. 25), and that of the field of Hanameel by Jeremiah (Jer. xxxii. 9); taxation (Lev. xxvii. 3, 6, 16; 2 Kings xv. 20; Neh. v. 15); fines for offences (Exod. xxi. 32); and, lastly, the robbery by Achan (Josh. vii. 21). In other passages, the A. V. supplies the word 'shekels' instead of 'pieces' (Deut. xxii. 19, 29; Judg. xvii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and no doubt correctly. Nearly all these passages relate to weight, one may allude to actual 'coin' (Neh. v. 15), and the term 'pieces' is inaccurate when applied to either. Hence it may be assumed that 'shekel' or 'shekels' is the word understood in all cases.

There are, however, two exceptional passages, where a word equivalent to 'piece' or 'pieces' is found in the Hebrew. The first occurs in 1 Sam. ii. 36, where the phrase 'piece of silver' is taken from the Hebrew אֶגְרוֹת כֶּסֶף, rendered in the LXX. by ὀβολοῦ ἀργυρίου, and in the Vulg. by *nummum argenteum*. The אֶגְרוֹת, so called from אָגַר, 'to collect,' may be the same as the נִגְרָה. It is also translated by the LXX. ὀβολος, and by the Vulg. *obolus*. The second is in the Psalms (lxviii. 30), and the phrase 'pieces of silver' is translated from the Hebrew רֵצִי-כֶסֶף (*Heb.* ver. 32), which is rendered in the LXX. and Vulg. simply by ἀργύριον and *argentum*. The word רֵצִי, from רָצַץ, 'to break in pieces,' must mean a fragment or piece broken off. In neither case can these passages imply a coin.

We must also notice the employment in the A. V. of the word 'piece,' or 'pieces of money,' or 'silver,' in the three following passages (Gen. xxxiii. 19; Josh. xxiv. 22; Job xlii. 11), being the translation of the Hebrew קֶסֶיטָה, rendered by the LXX. and Vulg. 'lambs.' The *Kesitah* was evidently a piece of silver of unknown weight [KESITAH].

2. Two words are rendered in the N. T. by the phrase 'piece of silver,' δραχμή, Vulg. *drachma*, and ἀργύριον, Vulg. *argenteus*, *denarius*.

(i.) The first occurs in St. Luke xv. 8, 'Either what woman having ten pieces of silver (δραχμαὶ δέκα), if she lose one piece, doth not light a candle, and sweep the house, and seek diligently till she find it?' Here it is correctly rendered, as at the time of St. Luke the Attic drachm was equivalent to the Roman denarius [DRACHM; DENARIUS].

(ii.) The second word occurs in two passages (A), the account of the betrayal of our Lord for 'thirty pieces of silver' (Matt. xxvi. 15; xxvii. 3, 5, 6, 9). These have usually been considered to have been denarii, but another suggestion has recently been made by Mr. Poole (Dr. Smith's *Dict. of the Bible*, art. 'Piece of Silver'). The parallel

passage in Zechariah (xi. 12, 13), where we have supposed 'shekels' to be understood (see above), and which is translated by the LXX. 'thirty silvers' (τριάκοντα ἀργυρῶν), may throw some light upon the subject; whilst it is observable that 'thirty shekels of silver' was the price of blood to be paid in the case of a servant accidentally killed (Exod. xxi. 32). Mr. Poole proposes to explain the passage in St. Matthew as 'thirty shekels of silver'; not as current shekels, but as tetradrachms of the Attic standard of Greek cities of Syria and Phœnicia. These, at the time of Augustus, had fallen to be equal to the Phœnician didrachm, and the shekels and half shekels of Simon Maccabæus [MONEY] are uniformly of the same weight as this Attic tetradrachm and its half, so that Josephus (*Antiq.* iii. 8. 2) speaks of the shekel as equal to four Attic drachms (or denarii) [DRACHM]. These tetradrachms were common at the time of our Lord, and of them the *stater* (rendered in the A. V. 'piece of money,' Matt. xvii. 27), was no doubt a specimen [STATER]. It is therefore most likely that the 'thirty pieces of silver' for which our Lord was betrayed, were rather Attic tetradrachms than denarii. In the A. V. of St. Matthew the prophecy as to the 'thirty pieces of silver' is ascribed to Jeremiah. It has been thought to have been quoted from memory and inaccurately (Alford, *in loc.*); but it is to be remarked, that the Syriac version omits the proper name, and merely says, 'the prophet,' hence a copyist might have inserted the wrong name. (B) The second passage where the word ἀργύριον occurs is in the Acts (xix. 19), where the price of the conjuring books that were burnt is valued at 'fifty thousand pieces of silver.' The Vulgate has accurately rendered the phrase by *denarii*, as there is no doubt that these pieces are intended.

The word ἀργύριον in the N. T. has been in many other cases translated in the A. V. 'money' (Matt. xxv. 18, 27; xxviii. 12, 15; Mark xiv. 11; Luke ix. 3; xix. 23; xxii. 5; Acts iii. 6; vii. 16; viii. 20; xix. 19; xx. 33; 1 Pet. i. 18), though for the same English word the Greek χαλκοῦς (Mark vi. 8; xii. 41) and χρῆμα (Acts iv. 37; viii. 18, 20; xxiv. 26) also occur [MONEY].—F. W. M.

PIGEON. [YONEH; TOR.]

PI-HAHIROTH (פִּי הַחִירֹת), a place near the northern end of the Gulf of Suez, east of Baalzephon (Exod. xiv. 2, 9; Num. xxxiii. 7). The Hebrew signification of the words would be equivalent to 'mouth of the caverns,' but it is doubtless an Egyptian name, and as such would signify a 'place where grass or sedge grows.' Jablonsky, *Opusc.*, i. 447; ii. 159, comp. Gesen., *Thesaur.*, s. v. [EXODUS.]

PILATE, PONTIUS, was the sixth Roman Procurator of Judæa (Matt. xxvii. 2; Mark xv. 1; Luke iii. 1; John xviii. xix.), under whom our Lord taught, suffered, and died (Acts iii. 13; iv. 27; xiii. 28; 1 Tim. vi. 13; Tacit. *Annal.* xv. 44). The testimony of Tacitus on this point is no less clear than it is important; for it fixes beyond a doubt the time when the foundations of our religion were laid. The words of the great historian are: Auctor nominis ejus Christus, Tiberio imperitante, per Procuratorem Pontium Pilatum supplicio affectus est—'The author of that name (Christian) or sect was Christ, who was capitally punished in the reign of Tiberius by Pontius Pilate.'

Pilate was the successor of Valerius Gratus, and governed Judæa, as we have seen, in the reign of Tiberius. He held his office for a period of ten years. The agreement on this point between the accounts in the N. T. and those supplied by Josephus is entire and satisfactory. It has been exhibited in detail by the learned, accurate, and candid Lardner (vol. i. 150-389, Lond. 1827).

Pilate's conduct in his office was in many respects highly culpable. Josephus has recorded two instances in which Pilate acted very tyrannically (*Antiq.* xviii. 3. 1; comp. *De Bell. Jud.* ii. 9. 2, *seq.*) in regard to the Jews. 'But now Pilate, the Procurator of Judæa, removed the army from Cæsarea to Jerusalem, to take their winter quarters there, in order to abolish the Jewish laws. So he introduced Cæsar's effigies, which were upon the ensigns, and brought them into the city; whereas our law forbids us the very making of images; on which account the former procurators were wont to make their entry into the city with such ensigns as had not those ornaments. Pilate was the first who brought those images to Jerusalem, and set them up there: which was done without the knowledge of the people, because it was done in the night-time; but, as soon as they knew it, they came in multitudes to Cæsarea, and interceded with Pilate many days, that he would remove the images; and when he would not grant their requests, because this would tend to the injury of Cæsar, while they yet persevered in their request, on the sixth day he ordered his soldiers to have their weapons privately, while he came and sat upon his judgment-seat; which seat was so prepared in the open place of the city, that it concealed the army that lay ready to oppress them: and when the Jews petitioned him again, he gave a signal to the soldiers to encompass them round, and threatened that their punishment should be no less than immediate death, unless they would leave off disturbing him, and go their ways home. But they threw themselves on the ground, and laid their necks bare, and said they would take their death very willingly, rather than the wisdom of their laws should be transgressed; upon which Pilate was deeply affected with their resolution to keep their laws inviolable, and presently commanded the images to be carried back from Jerusalem to Cæsarea.'

'But Pilate undertook to bring a current of water to Jerusalem, and did it with the sacred money, and derived the origin of the stream from a distance of 200 furlongs. However, the Jews were not pleased with what had been done about this water; and many ten thousands of the people got together, and made a clamour against him, and insisted that he should leave off that design. Some of them also used reproaches, and abused the man, as crowds of such people usually do. So he habited a great number of his soldiers in their habit, who carried daggers under their garments, and sent them to a place where they might surround them. He bid the Jews himself go away; but they boldly casting reproaches upon him, he gave the soldiers that signal which had been beforehand agreed on, who laid upon them much greater blows than Pilate had commanded them, and equally punished those that were tumultuous and those that were not; nor did they spare them in the least; and since the people were unarmed, and were caught by men prepared for what they were about, there were a great number of them

slain by this means, and others of them ran away wounded. And thus an end was put to this sedition.'

'We have,' says Lardner, 'another attempt of Pilate's of the same nature, mentioned in the letter which Agrippa the elder sent to Caligula, as this letter is given us by Philo. In some particulars it has a great resemblance with the story Josephus has told of Pilate's bringing the ensigns into Jerusalem, and in others it is very different from it; which has given occasion to some learned men to suppose that Philo has been mistaken. For my own part, as I make no doubt but Josephus's account of the ensigns is true, so I think that Philo may also be relied on for the truth of a fact he has mentioned, as happening in his own time in Judæa, and, consequently, I judge them to be two different facts.'

Agrippa, reckoning up to Caligula the several favours conferred on the Jews by the imperial family, says: 'Pilate was Procurator of Judæa. He, not so much out of respect to Tiberius as a malicious intention to vex the people, dedicates gilt shields, and places them in Herod's palace within the holy city. There was no figure upon them, nor anything else which is forbidden, except an inscription, which expressed these two things—the name of the person who dedicated them, and of him to whom they were dedicated. When the people perceived what had been done, they desired that this innovation of the shields might be rectified; that their ancient customs, which had been preserved through so many ages, and had hitherto been untouched by kings and emperors, might not now be violated. He refused their demands with roughness, such was his temper, fierce and untractable. They then cried out, Do not you raise a sedition yourself? do not you disturb the peace by your illegal practices? It is not Tiberius's pleasure that any of our laws should be broken in upon. If you have received any edict or letter from the emperor to this purpose, produce it, that we may leave you, and depute an embassy to him, and entreat him to revoke his orders. This put him out of all temper; for he was afraid that if they should send an embassy they might discover the many mal-administrations of his government, his extortions, his unjust decrees, his inhuman cruelties. This reduced him to the utmost perplexity. On the one hand, he was afraid to remove things that had been once dedicated, and was also unwilling to do a favour to men that were his subjects; and, on the other hand, he knew very well the inflexible severity of Tiberius. The chief men of the nation observing this, and perceiving that he repented of what he had done, though he endeavoured to conceal it, wrote a most humble and submissive letter to Tiberius. It is needless to say how he was provoked when he read the account of Pilate's speeches and threatenings, the event showing it sufficiently. For he soon sent a letter to Pilate, reprimanding him for so audacious a proceeding; requiring, also, that the shields should be removed. And, accordingly, they were carried from the metropolis to Cæsarea by the sea-side, called Sebaste, from your great-grandfather, that they might be placed in the temple there consecrated to him, and there they were repositied.'

To the Samaritans, also, Pilate conducted himself unjustly and cruelly. His own misconduct led

the Samaritans to take a step which in itself does not appear seditious or revolutionary, when Pilate seized the opportunity to slay many of the people, not only in the fight which ensued, but also in cold blood after they had given themselves up. 'But when this tumult was appeased, the Samaritan senate sent an embassy to Vitellius, now president of Syria, and accused Pilate of the murder of those who had been slain. So Vitellius sent Marcellus, a friend of his, to take care of the affairs of Judæa, and ordered Pilate to go to Rome to answer before the emperor to the accusations of the Jews. Pilate, when he had tarried ten years in Judæa, made haste to Rome, and this in obedience to the orders of Vitellius, which he durst not contradict; but, before he could get to Rome, Tiberius was dead' (Joseph. *Antiq.* xviii. 4. 2). This removal took place before the Passover in A.D. 36, probably about September or October A.D. 35; Pilate must, therefore, as he spent ten years in Judæa, have entered on his government about October A.D. 25, or at least before the Passover A.D. 26, in the twelfth year of Tiberius's sole empire (compare Lardner, i. 391, *seq.*; Winer, *Real-wörterb.*)

To be put out of his government by Vitellius, on the complaints of the people of his province, must have been a very grievous mortification to Pilate; and though the emperor was dead before he reached Rome, he did not long enjoy such impunity as guilt permits; for, as Eusebius (*Chron.*, p. 78) states, he shortly afterwards made away with himself out of vexation for his many misfortunes (ποικίλαις περιπέσων συμφοραῖς).

It is a matter of considerable importance in regard to the exposition of the N. T., to define accurately what relation the Jews stood in during the ministry of Christ in particular to their Roman masters. Lardner has discussed the question with a learning and ability which have exhausted the subject, and he concludes that the Jews, while they retained for the most part their laws and customs, both civil and religious, untouched, did not possess the power of life and death, which was in the hands of the Roman governor, and was specifically held by Pilate. Pilate, indeed, bore the title of procurator, and the procurator, as being a fiscal officer, had not generally the power of life and death. 'But,' says Lardner (i. comp. pp. 83-164), 'Pilate, though he had the title of procurator, had the power of a president. The evangelists usually give Pilate, Felix, and Festus the title of governor, a general word, and very proper, according to the usage of the best writers, and of Josephus in particular, in many places.' According to the evangelists, the Jewish council having, as they pretended, convicted Jesus of blasphemy, and judged him guilty of death, led him away to Pilate, and seem to have expected that he should confirm their sentence, and sign an order that Jesus should be punished accordingly. Indeed, the accounts found in the Gospels and in other authorities, touching the civil condition of the Jews at this time, are in strict agreement. We proceed to mention another instance of accordance, which is still more forcible, as being on a very minute point.

From Matt. xxvii. 19, it appears that Pilate had his wife (named probably Procla, or Claudia Procula) with him. A partial knowledge of Roman history might lead the reader to question the his-

toric credibility of Matthew in this particular. In the earlier periods, and, indeed, so long as the Commonwealth subsisted, it was very unusual for the governors of provinces to take their wives with them (Senec. *De Controv.* 25), and in the strict regulations which Augustus introduced he did not allow the favour, except in peculiar and specified circumstances (Sueton. *Aug.* 24). The practice, however, grew to be more and more prevalent, and was (says Winer, *Real-wört.* in 'Pilate') customary in Pilate's time. It is evident from Tacitus, that at the time of the death of Augustus, Germanicus had his wife Agrippina with him in Germany (*Annal.*, i. 40, 41; comp. iii. 33-59, Joseph. *Antiq.* xx. 10. 1; Ulpian, iv. 2). Indeed, in the beginning of the reign of Tiberius, Germanicus took his wife with him into the East. Piso, the prefect of Syria, took his wife also along with him at the same time (Tacit., *Annal.*, ii. 54, 55). 'But,' says Lardner (i. 145), 'nothing can render this (the practice in question) more apparent than a motion made in the Roman Senate by Severus Cæcina, in the fourth consulship of Tiberius, and second of Drusus Cæsar (A.D. 21), that no magistrate to whom any province was assigned should be accompanied by his wife, except the Senate's rejecting it, and that with some indignation' (Tacit., *Annal.*, iii. 33, 34). The fact mentioned incidentally, or rather implied, in Matthew, being thus confirmed by full and unquestionable evidence, cannot fail to serve as a corroboration of the evangelical history.

Owing to the atrocity of the deed in which Pilate took a principal part, and to the wounded feelings of piety with which that deed has been naturally regarded by Christians, a very dark idea has been formed of the character of this Roman governor. That character was undoubtedly bad; but moral depravity has its degrees, and the cause of religion is too sacred to admit any spurious aid from exaggeration. It is therefore desirable to form a just conception of the character of Pilate, and to learn specifically what were the vices under which he laboured. For this purpose a brief outline of the evangelical account seems necessary. The narratives on which the following statement is founded may be found in John xviii. xix.; Matt. xxvii.; Mark xv.; Luke xxiii.

Jesus, having been betrayed, apprehended, and found guilty of blasphemy by the Jewish Sanhedrim, is delivered to Pilate in order to undergo the punishment of death, according to the law in that case provided. This tradition of Jesus to Pilate was rendered necessary by the fact that the Jews did not at that time possess on their own authority the power of life and death. Pilate could not have been ignorant of Jesus and his pretensions. He might, had he chosen, have immediately ordered Jesus to be executed, for he had been tried and condemned to death by the laws of the land; but he had an alternative. As the execution of the laws, in the case at least of capital punishments, was in the hands of the Roman procurator, so, without any violent straining, might his tribunal be converted into a court of appeal in the last instance. At any rate, remonstrance against an unjust verdict was easy and proper on the part of a high officer, who, as having to inflict the punishment, was in a measure responsible for its character. And remonstrance might easily lead to a revision of the grounds on

which the verdict had been given, and thus a cause might virtually be brought, *de novo*, before the procurator: this took place in the case of our Lord. Pilate gave him the benefit of a new trial, and pronounced him innocent.

This review of the case was the alternative that lay before Pilate, the adoption of which speaks undoubtedly in his favour, and may justify us in declaring that his guilt was not of the deepest dye.

That the conduct of Pilate was, however, highly criminal, cannot be denied. But his guilt was light in comparison of the criminal depravity of the Jews, especially the priests. His was the guilt of weakness and fear, theirs the guilt of settled and deliberate malice. His state of mind prompted him to attempt the release of an accused person in opposition to the clamours of a misguided mob; theirs urged them to compass the ruin of an acquitted person by instigating the populace, calumniating the prisoner, and terrifying the judge. If Pilate yielded against his judgment under the fear of personal danger, and so took part in an act of unparalleled injustice, the priests and their ready tools originated the false accusation, sustained it by subornation of perjury, and when it was declared invalid, enforced their own unfounded sentence by appealing to the lowest passions. Pilate, it is clear, was utterly destitute of principle. He was willing, indeed, to do right, if he could do right without personal disadvantage. Of gratuitous wickedness he was perhaps incapable; certainly, in the condemnation of Jesus, he has the merit of being for a time on the side of innocence. But he yielded to violence, and so committed an awful crime. In his hands was the life of the prisoner. Convinced of his innocence, he ought to have set him at liberty, thus doing right regardless of consequences. But this is an act of high virtue which we hardly require at the hands of a Roman governor of Judea; and though Pilate must bear the reproach of acting contrary to his own declared convictions, yet he may equally claim some credit for the apparently sincere efforts which he made in order to defeat the malice of the Jews, and procure the liberation of Jesus.

If now we wish to form a judgment of Pilate's character, we easily see that he was one of that large class of men who aspire to public offices, not from a pure and lofty desire of benefiting the public and advancing the good of the world, but from selfish and personal considerations, from a love of distinction, from a love of power, from a love of self-indulgence; being destitute of any fixed principles, and having no aim but office and influence, they act right only by chance and when convenient, and are wholly incapable of pursuing a consistent course, or of acting with firmness and self-denial in cases in which the preservation of integrity requires the exercise of these qualities. Pilate was obviously a man of weak, and therefore, with his temptations, of corrupt character. The view given in the *Apostolical Constitutions* (v. 14) where unmanliness (*ἀνδρεία*) is ascribed to him, we take to be correct. This want of strength will readily account for his failing to rescue Jesus from the rage of his enemies, and also for the acts of injustice and cruelty which he practised in his government—acts which, considered in themselves, wear a deeper dye than does the conduct which he observed in surrendering Jesus

to the malice of the Jews. And this same weakness may serve to explain to the reader how much influence would be exerted on this unjust judge, not only by the stern bigotry and persecuting wrath of the Jewish priesthood, but specially by the not concealed intimations which they threw out against Pilate, that if he liberated Jesus he was no friend of Tiberius, and must expect to have to give an account of his conduct at Rome. And that this was no idle threat, nothing beyond the limits of probability, Pilate's subsequent deposition by Vitellius shows very plainly; nor could the procurator have been ignorant either of the stern determination of the Jewish character, or of the offence he had by his acts given to the heads of the nation, or of the insecurity, at that very hour, when the contest between him and the priests was proceeding regarding the innocent victim whom they lusted to destroy, of his own position in the office which he held, and which, of course, he desired to retain. On the whole, then, viewing the entire conduct of Pilate, his previous iniquities as well as his bearing on the condemnation of Jesus; viewing his own actual position and the malignity of the Jews; we cannot, we confess, give our vote with those who have passed the severest condemnation on this weak and guilty governor.

That Pilate made an official report to Tiberius of the condemnation and punishment of Jesus Christ is likely in itself, and becomes the more likely if the view we have given of Pilate's character is substantially correct, for then the governor did not regard the case of Jesus as an ordinary, and therefore inconsiderable one, but must have felt its importance alike in connection with the administration of justice, the civil and religious character of the Jews, and therefore with the tenure of the Roman power. The voice of antiquity intimates that Pilate did make such a report; the words of Justin Martyr are: 'That these things were so done you may know from the *Acts* made in the time of Pontius Pilate' (*Apol.* i. 76). A similar passage is found a little further on in the same work. Now, when it is considered that Justin's *Apology* was a set defence of Christianity, in the shape of an appeal to the heathen world through the persons of its highest functionaries, it must seem very unlikely that the words would have been used had no such documents existed; and nearly as improbable that those *Acts* would have been referred to had they not been genuine. Tertullian also uses language equally decisive (*Apol.* v. 21). Eusebius gives a still fuller account (*Hist. Eccles.* ii. 2). These important passages may be found in Lardner (vi. 606, *seq.*). See also Ord's *Acta Pilati*, or *Pilate's Report* (vii. 4), long circulated in the early church, being received without a suspicion (Chrysost. *Hom. viii. in Pasch.*; Epiphani. *Her.* l. i.; Euseb. i. 9 and ii. 9, 5, and 7). There can be little doubt that the documents were genuine (Hencke, *Opusc. Acad.*, p. 201, *seq.*). Such is the opinion of Winer (*Real-wörterb.*) Lardner, who has fully discussed the subject, decides, that 'it must be allowed by all that Pontius Pilate composed some memoirs concerning our Saviour, and sent them to the emperor' (vi. 610). Winer adds, 'What we now have in Greek under this title (*Pilate's Report*), see Fabricii *Apocr.*, i. 237, 239; iii. 456, as well as the two letters of Pilate to Tiberius,

are fabrications of a later age.' So Lardner: 'The Acts of Pontius Pilate, and his letter to Tiberius, which we now have, are not genuine, but manifestly spurious.' We have not space here to review the arguments which have been adduced in favour of and against these documents; but we must add, that we attach some importance to them, thinking it by no means unlikely that, if they are fabrications, they are fabricated in some keeping with the genuine pieces, which were in some way lost, and the loss of which the composers of our actual pieces sought as well as they could to repair. If this view can be sustained, then the documents we have may serve to help us, in the use of discretion, to the substance of the original Acts. At all events, it seems certain that an official report was made by Pilate; and thus we gain another proof that 'these things were not done in a corner.' Those who wish to enter into this subject should first consult Lardner (*ut supra*), and the valuable references he gives. See also J. G. Altman, *De Epist. Pil. ad Tiber.*, Bern. 1755; Van Dale, *De Orac.*, p. 609, *seq.*; Schmidt, *Einkleitung ins N. T.*, ii. 249, *seq.* Of especial value is Hermansson, *De Pontio Pilat.*, Upsal 1624; also Burger, *De Pontio Pilat.*, Misen. 1782.

Hase, in his *Leben Jesu*, p. 245, affords valuable literary references on this, as on so many other N. T. subjects.—J. R. B.

**PILLAR.** Pillars are mentioned in Scripture as used

1. *For monuments.*—Thus Jacob set up the stone on which he had rested his head at Bethel for a pillar (מַצֵּבָה, Gen. xxviii. 18); he erected a pillar as a memorial of the agreement between Laban and him (xxx. 46, 51, 52); and he raised one as a memorial of God's appearing and promise to him (xxxv. 14). He erected a mortuary pillar also over Rachel's grave (xxxv. 20). To the class of monumental pillars are to be referred the twelve stones raised by Moses at Sinai (Exod. xxiv. 4) and the stones set up by Joshua to commemorate the crossing of Jordan by the Israelites (Josh. iv. 8, 9). Absalom's pillar was an erection of a more elaborate kind, but belonging to the same class (2 Sam. xviii. 18). [ABSALOM'S TOMB; HAND.]

2. *In building.*—Thus Moses was commanded to spread the veil of the tabernacle on four pillars (עַמֻּדִים) of shittim wood; and the flat roofs of the houses were often supported by pillars (Judg. xvi. 25; 1 Kings vii. 2, 6). Pillars were also set up at doorways (1 Kings vii. 21).

3. *As objects of idolatrous worship* (Deut. xii. 3); and in several other places where the A. V. has *image* or *statue*, as Exod. xxxiii. 24; Lev. xxvi. 1; Deut. vii. 5; xvi. 22, etc. Originally the idol was

but a block of wood or stone; subsequently it was shaped into a figure and adorned with carving and ornaments.

4. *Figuratively or symbolically.*—So the presence of God as the guide and strength of Israel during their march through the desert was represented by the pillar of cloud by day and the pillar of fire by night (Exod. xxxiii. 9, 10; Neh. ix. 12; Ps. xcix. 7). A pillar is the emblem of firmness and steadfastness (Jer. i. 18; Rev. iii. 12); and of that which sustains or supports (Gal. ii. 9; 1 Tim. iii. 15).—W. L. A.

**PILLAR, PLAIN OF.** [PLAINS.]

**PINE TREE.** [OREN; TIDHAR.]

**PINNACLE.** In the account of our Lord's temptation (Matt. iv. 5), it is stated that the devil took him to Jerusalem, 'and set him on a pinnacle of the temple' (ἐπὶ τὸ πτερύγιον τοῦ ἱεροῦ). The part of the temple denoted by this term has been much questioned by different commentators, and the only certain conclusion seems to be that it cannot be understood in the sense usually attached to the word (*i. e.*, the point of a spiral ornament), as in that case the article would not have been prefixed. Grotius, Hammond, Doddridge, and others, take it in the sense of balustrade or pinnacled battlement. But it is now more generally supposed to denote what was called the king's portico, which is mentioned by Josephus (*Antiq.* xv. 11. 5), and is the same which is called in Scripture 'Solomon's porch.' Of this opinion are Wetstein, Kuinoel, Parkhurst, Rosenmüller, and others [TEMPLE]. Krebs, Schleusner, and some others, however, fancy that the word signifies the ridge of the roof of the temple; and Josephus (*Antiq.* xv. 11. 5) is cited in proof of this notion. But we know that iron spikes were fixed all over the roof of the temple to prevent the holy edifice from being defiled by birds; and the presence of these spikes creates an objection, although the difficulty is perhaps not insuperable, as we are told that the priests sometimes went to the top of the temple (*Middoth.*, ch. 4; *T. Bab. tit. Taanith.*, fol. 29). Dr. Bloomfield asks: 'May it not have been a lofty spiral turret, placed somewhere about the centre of the building, like the spire in some cathedrals, to the topmost look-out of which the devil might take Jesus?' (*Recons. Synopt.* in Matt. iv. 5). We answer, No: steeples do not belong to ancient or to Oriental architecture, and it is somewhat hazardous to provide one for the sole purpose of meeting the supposed occasion of this text.

Lightfoot, whose opinion on this point is entitled to much respect, declares his inability to judge whether the part denoted should be considered as belonging to the holy fabric itself, or to some building within the holy circuit. If the former, he can find no place so fitting as the top of the אֹרֶן, or porch of the temple; but if the latter, the royal porch or gallery (στοά βασιλική) is the part he would prefer. He adds, that above all other parts of the temple, the porch thereof, and indeed the whole pronaos, might not unfitly be called τὸ πτερύγιον τοῦ ἱεροῦ, the wing (for that is the literal meaning) of the temple, 'because, like wings, it extended itself in breadth on each side far beyond the breadth of the temple. If, therefore, the devil had placed Christ on the very precipice of this part

of the temple, he may well be said to have placed him 'upon the wing of the temple;' both because this part was like a wing to the temple itself, and because that precipice was the wing of this part' (*Hor. Hebr.* ad Matt. iv. 5). With regard to the other alternative, it is only necessary to cite the description of Josephus to show that the situation was at least not inappropriate to Satan's object: 'On the south part (of the court of the Gentiles) was the *στοὰ βασιλική*, 'the royal gallery,' that may be mentioned among the most magnificent things under the sun; for above the profoundest depth of the valley, Herod constructed a gallery of a vast height, from the top of which if any one looked down, *σκοτοδυνάειν οὐκ ἐξικουμένης τῆς ὄψεως εἰς ἀμέτρητον τὸν βυθόν*, 'he would become dizzy, his eyes being unable to reach so vast a depth.'—J. K.

PINON (פִּינֹן), one of the dukes of Edom. The *Onomasticon* places the site of the tribe descended from him at Punon. [PUNON.]

PIPE. [MUSICAL INSTRUMENTS.]

PIRATHON, PIRATHONITE (פִּרְעָתוֹן, פִּרְעָתוֹנִי; *Φαραθών*; Alex. *Φαραθών*: and *Φαραθωνίτης*; Alex. *Φαραθωνίτης*; *Pharathon*, and *Pharathonites*). We read in the book of Judges that 'Abdon the son of Hillel, a *Pirathonite*, judged Israel. . . and was buried in *Pirathon*, in the land of Ephraim, in the mount of the Amalekites' (xii. 13, 15). The city is not again mentioned in the Bible; but among David's mighty men was 'Benaiah the *Pirathonite*, of the children of Ephraim' (1 Chron. xxvii. 14; xi. 31; 2 Sam. xxiii. 30). The city of Pirathon was therefore situated in the territory of Ephraim, and among the mountains, apparently where a colony of the wandering Amalekites had settled. Jerome mentions it (*Onomast.*, s. v. *Fraaton*), but does not appear to have known anything of it. About six miles W. S. W. of Nābulus, upon the summit of a tell among low hills, stands the little village of *Fer'ata*, which is doubtless identical with the ancient Pirathon (Robinson, *Bib. Res.*, iii. 134; *Benj. of Tud.*, by Asher, ii. p. 486).

Josephus mentions a *Pharathon* (*Φαραθών*), grouping it between Timnah and Tecoa (*Antiq.* xiii. 1. 3); and the same name occurs in 1 Maccab. ix. 50 (*Φαραθωνί*); but it could scarcely have been identical with the Pirathon of Ephraim, though the names are the same. This city was probably situated somewhere in the wilderness of Judah; but the site has not been discovered.—J. L. P.

PISCATOR (FISCHER), JOHN. A learned divine and voluminous writer of the Reformed Church, born at Strasburg, March 27, 1546. Losing his father when five years old, his mother wished him to follow some handicraft trade, but the Pastor Thomas seeing his desire for study, took him into his house to teach his children. He afterwards studied at the universities of Strasburg and Tübingen, and became lecturer in the former in the room of Marbach. His adherence to the Reformed faith caused his dismissal, and he left Strasburg and became successively professor of philosophy at Heidelberg 1574-77, of theology at Neustadt 1578, and co-rector at the newly-founded university of Herborn. This foundation owed its reputation and success to the ability of his teach-

ing; and he maintained its reputation as a school of theology till his death, July 26, 1626. The tone of his theology was moderately Calvinistic.

His chief Biblical works were—(1.) *A new German Translation of the Bible*, Herborn 1602-4. The translation followed that of Tremellius and Junius almost servilely. Arguments were prefixed to the chapters, and annotations appended, which provoked the attacks of the opponents of the Reformed opinions. This went through many editions. To that of 1610 an appendix was added, containing an index and tables of geography, history, coins, etc. (2.) *Commentaries on the whole of the O. and N. T.*, Herborn 1601, in twenty-four vols. 8vo, and subsequently in folio. These contain an analysis of every book and chapter of the Bible, doctrinal observations, the Latin version of Junius and Tremellius, and a new one of his own. This was a work of no common merit for the time, and deserves credit for its impartiality and freedom from prejudice. (3.) *Analyses logicae theologiae in plerosque S. Cod. libros*, fol.—E. V.

PISGAH (הַפִּסְגָּה, 'a section,' from פָּסַג = פָּסַק, 'to divide,' and hence it may mean 'an isolated hill or peak.' The rendering of the LXX. is not uniform. In Deut. iii. 17; xxxiv. 1; Josh. xii. 3; xiii. 20, it is *Φαργά*; but in Num. xxi. 20; xxiii. 14, and Deut. iii. 27, the phrase *רֹאשׁ הַפִּסְגָּה* is rendered *κορυφή τοῦ λελαξευμένου*, which is a translation of the Hebrew, *vertex excisi montis*. The Vulgate has everywhere *Phasga*—the name of a mountain in Moab. Its situation is minutely described by the sacred writers. It is first mentioned in connection with the approach of the Israelites to Palestine. They marched 'from Ramoth in the valley that is in the country of Moab, to the top of *Pisgah which looketh toward Jeshimon*' (Num. xxi. 20). *Pisgah* was thus on the plateau of Moab, and commanded a view of the eastern desert [JESHIMON]. Another passage (xxiii. 13, 14) proves that it commanded a view of the Israelitish camp in the valley on the east bank of the Jordan; and from other incidental notices we learn that it was opposite to and in sight of (עַל פְּנֵי) Jericho (Deut. xxxiv. 1), and overhanging the north-eastern angle of the Dead Sea (iv. 49; Josh. xii. 3).

The names Abarim, Nebo, and Pisgah are connected in such a way by the sacred writers as to create some difficulty to the geographer. In Deut. xxxii. 49 the Lord commands Moses, 'Get thee up into this mountain *Abarim*, *Mount Nebo*,' etc.; and in chap. xxxiv. 1 we read that Moses, obeying, 'went up from the plains of Moab, unto the mountain of *Nebo*, the top of *Pisgah*' (אֶל-הָרֵךְ נֶבֹו, רֹאשׁ הַפִּסְגָּה). From these passages we may infer: (1.) That *Abarim* was the name of a range or group of mountains; (2.) That *Nebo* was one of its peaks; and (3.) That the name *Pisgah* was either equivalent to *Abarim*, or that it is (as represented in some passages in the LXX., and in the margin of the A. V.) a common noun, signifying 'an isolated hill or peak.' If the latter view be taken, then Deut. xxxiv. 1 may be rendered, '*Moses went up to Mount Nebo, to the top of the hill.*' The construction rather favours the view that *Pisgah*, like *Abarim*, was the name of the range, and that *Nebo* was one of its peaks. Upon *Pisgah* Balaam built altars and offered sacrifices, so that it was probably one of the ancient 'high-places' of Moab (Num.

xxiii. 14). From its summit Moses obtained his panoramic view of the Holy Land, and there he died (Deut. xxxiv. 1-5). Beneath the mountains were celebrated 'springs' or 'torrents' (אֵי־שָׁרָה), which are several times mentioned in defining the boundaries of Reuben, as *Ashdath-Pisgah* (Deut. iii. 17; iv. 49 in the Hebrew; Josh. xii. 3; xiii. 20; see *ASHDOTH-PISGAH*). Eusebius and Jerome state that the name Pisgah was still, in their day, applied to a region around Mount Nebo (*Onomast.*, s. v. *Abarim*; Reland, *Pal.*, pp. 496, 497). The name has now disappeared, and the name of the headland, *Ras el-Feshkkeh*, on the western side of the Dead Sea, appears to be only an accidental resemblance. (See, however, De Saulcy, *Voyage*, ii. 60.) For the site of Pisgah, see *NEBO* and *ABARIM*.—J. L. P.

**PISHTAH** (פִּשְׁתָּה) no doubt refers to the flax plant, if we may judge from the context of the passages in which it occurs. Thus, in Exod. ix. 31, in the plague of the hail-storm, it is related: 'And the flax (*pishtah*) and the barley was smitten: for the barley was in the ear, and the flax was balled,' or in blossom, according to Gesenius. As the departure of the Israelites took place in the spring, this passage has reference no doubt to the practice adopted in Egypt, as well as in India, of sowing these grains partly in the months of September and October, and partly in spring, so that the wheat might easily be in blade at the same time that the barley and flax were more advanced.

436. Flax.

From the numerous references to flax and linen, there is no doubt that the plant was extensively cultivated, not only in Egypt, but also in Palestine. As to Egypt we have proof in the mummy cloth being made of linen, and also in the representations of the flax cultivation in the paintings of the Grotto of El Kab, which represent the whole process with the utmost clearness; and numerous testimonies might be adduced from ancient authors of the esteem in which the linen of Egypt was held. Flax continues to be extensively cultivated in the present day. That it was also much cultivated in

Palestine, and well known to the Hebrews, we have proofs in the number of times it is mentioned; as in Josh. ii. 6, where Rahab is described as concealing the two Hebrew spies with the stalks of flax which she had laid in order upon the roof. In several passages, as Lev. xiii. 47, 48, 52, 59; Deut. xxii. 11; Jer. xiii. 1; Ezek. xl. 3; xlv. 17, 18, we find it mentioned as forming different articles of clothing, as girdles, cords, and bands. In Prov. xxxi. 13, the careful housewife seeketh 'wool and flax, and worketh it willingly with her hands.' The words of Isaiah (xlii. 3), 'A bruised reed shall he not break, and the smoking flax shall he not quench,' are evidently referred to in Matt. xii. 20, where *λινον* is used as the name of flax, and as the equivalent of *pishtah*. But there can be no doubt of this word being correctly understood, as it has been well investigated by several authors (Cels. *Hierobot.* ii. p. 283; Yates, *Textrinum Antiquorum*, p. 253).—J. F. R.

**PISIDIA** (Πισιδία), a province of Asia Minor, bounded on the north by Phrygia, on the west by Caria and Lycia, on the south by Pamphylia, and on the east by Cilicia and Isauria (Strabo, xii., p. 569; Ptol. v. 5). It was a mountainous region; but high up among the peaks of Taurus were some fertile valleys and little upland plains. The province was subdivided into minute sections, and held by tribes of wild and warlike highlanders, who were the terror of the whole surrounding country (Strabo, l. c.; Xen. *Anab.* i. 1, 11; ii. 5, 13). It was probably among the defiles of Pisidia that the apostle Paul experienced some of those 'perils of robbers,' of which he speaks in 2 Cor. xi. 26; and perhaps fear of the bandits that inhabited them had something to do with John's abrupt departure from Paul and Barnabas just as they were about to enter Pisidia (Acts xiii. 13, 14). The Pisidian tribes had rulers of their own, and they maintained their independence, in spite of the repeated attacks of more powerful neighbours, and of the conquests of the Greeks, and even of the Romans. The latter were content to receive from them a scanty tribute, allowing them to remain undisturbed amid their mountain fastnesses.

The scenery of Pisidia is wild and grand. The mountains are mostly limestone, and are partially clothed with forests of oak, pine, and juniper. The lower slopes are here and there planted with olives, vines, and pomegranates. Many of the ravines are singularly grand—bare cliffs rising up a thousand feet and more on each side of the bed of a foaming torrent. In other places fountains gush forth, and streams brawl along amid thickets of oleander. The passes from the sea-coast to the interior are difficult, and have always been dangerous (Arundell, *Asia Minor*, ii.; Sir C. Fellows, *Asia Minor*; Spratt, *Travels in Lycia*; see also full extracts in Conybeare and Howson, *Life of St. Paul*, i. pp. 176, seq., and article *ANTIOCH* of Pisidia).

St. Paul paid two visits to Pisidia. In company with Barnabas he entered it from Pamphylia on the south, and crossed over the mountains to Antioch, which lay near the northern border (Acts xiii. 14). Their mission was successful; but the enemies of the truth soon caused them to be expelled from the province (ver. 50). After an adventurous journey through Lycaonia and Isauria, they again returned through Pisidia to Pamphylia, apparently by the same route (xiv. 21-24).—J. L. P.

PIT is the English rendering of at least four distinct Hebrew words—a fact which may account for its repeated and various use in the Bible.

1. Of these בֹּר (root בָּאָר, cognate בִּאָר, *beer*, a well) occurs most frequently, and means a deep hole or pit, dug in the first instance for a well, but which, becoming dry or miry, was used apparently for three purposes:—(1.) As a place of sepulture (Ps. xxviii. 1; xxx. 4; Is. xxxviii. 18), hence יוֹרְדֵי-בֹר, 'they that go down to the pit'—a phrase of frequent occurrence, employed sometimes to denote dying without hope; but commonly, a simple going down to the place of the dead (see Gesen. *Lex.*, s. v.); also, 'the graves set in the sides of the pit' (Exod. xxxii. 23), the recesses cut out for purposes of burial; or they might be the natural fissures in the rocks, abounding in all limestone formations, of which the rocks of Syria and Palestine chiefly consist. (2.) A prison: 'they shall be gathered as prisoners are gathered in the pit, and shall be shut up' (Is. xxiv. 22; also Jer. xxxvii. 16; Exod. xii. 29). The pit or dungeon was a common place of punishment in the East, and very dreadful it was, as the case of Jeremiah illustrates (Jer. xxxviii. 4, 9). To be doomed to the pit was often to be left to a slow death by starvation; and to be saved from such a doom was regarded as the greatest of all deliverances. Hence it was used (3) as a place of destruction (Zech. ix. 11). In the case of Joseph, Reuben suggested the pit as a device for saving his brother; the others hostile to Joseph adopted it as the most secret, and, they might think, the least guilty method of making away with him (Gen. xxxvii. 22-29).

2. שָׁחַת (root שָׁחַת, to sink down, to be sunk into mire), literally a pit made by digging into the earth. *Shachath* was the kind of pit used as a snare. Covered over with the branches of a tree, or matting slight and deceptive, the pit was made to serve as a snare to entrap both animals and men. Used figuratively, it signified the sudden and confused overthrow of evil men, and also their utter and final destruction (Job xxx. 18, 24).

3. נִבְּאָה (from an unused root נָבָא, to gather together), a fountain or cistern properly, but rendered pit in Is. xxx. 14. [CISTERN.]

4. שְׂאֵל, rendered pit, Num. xvi. 30, 33; Job xvii. 16, and used to signify the shadowy dwelling-place of disembodied spirits, is fully explained under HELL. נִבְּיָן is rendered pit in Eccles. x. 18, but occurs nowhere else. 'The bottomless pit' (τὸ φέαρ τῆς ἀβύσσου), repeatedly mentioned in the book of Revelation, is the place of Satan's punishment. It is a prison or dungeon having a key. The time is foretold when the arch-deceiver will be bound in it with a chain (Rev. xx. 1, 2).—W. J. C.

#### PITCH. [ASPHALTUM.]

PITCHER (בֵּר, *cad*, from בָּרַר, 'to labour severely, to toil hard': pr., in the manner of smiths and other artisans; spec., to draw out of a well, to draw water' (Ges.); hence, a vessel for drawing from a well; LXX. ὕδρια; Vulg. *hydria*, *lagena*, (Ges. and Fürst. in verbo)), a vessel with one or two handles, used principally, but not exclusively, by women, for drawing and carrying water from

neighbouring wells\* (Gen. xxiv. 14, 17, 19). It was ordinarily, if not always, of earthenware, as is curiously illustrated by Gideon's successful stratagem of 'lamps' and 'empty pitchers' (Judg. vii. 16, 19). In 1 Kings xvii. 12, and xviii. 33, the Hebrew word is rendered in the A. V. 'barrel'; in the former case the vessel is made to serve for holding 'meal'; the poor widow's poverty furnishing nothing better for the purpose, and her store of provisions reduced so low as to require nothing larger. In Eccles. xii. 6 the Hebrew word is employed figuratively, —'or the pitcher be broken at the fountain,'—where 'the pitcher is the image of the individual life; the well of the general life' (Hengs.), whence the individual life is drawn. In the N. T. the 'pitcher,' *κεράμιον*, is also simply an earthen vessel (Mark xiv. 13; Luke xxii. 10), where a 'man' bears it full of water. Wordsworth makes it here the symbol of baptism preceding and leading to the holy supper!

In many parts of India women of the first quality draw water daily from the public wells; and bearing the pitcher on the shoulder instead of the head seems to be a distinction; for an intelligent native inferred, from Rebecca's so carrying it, that she was a woman of high caste (see Kitto's *Pict. Bib.*, Gen. xxiv.)—I. J.

PITDAH (פִּטְדָּה; Sept. *τοπάδιον*), a precious stone; one of those which were in the breastplate of the high-priest (Exod. xxviii. 17), and the origin of which is referred to Cush (Job xxviii. 19). It is, according to most ancient versions, the topaz (*τοπάδιον*; Joseph. *τοπάσις*), which most of the ancient Greek writers describe as being of a golden yellow colour (Strabo, xvi. p. 770; Diod. Sic. iii. 39); while Pliny (*Hist. Nat.* xxxvii. 32) states its colour to be green. Relying on this last authority, several modern authors have asserted that the ancient gem thus named was no other than the modern chrysolite. But this notion has been confuted by Bellarmann (*Urim and Thummin*, p. 39), who shows that the hues ascribed by the ancients to the topaz are found in the gem to which the moderns have applied that name. This is a precious stone, having a strong glass lustre. Its prevailing colour is wine-yellow of every degree of shade. The dark shade of this colour passes over into carnation red, and sometimes, although rarely, into lilac; the pale shade of the wine-yellow passes into grayish; and from yellowish-white into greenish-white and pale green, tincal and celadon-green. It may thus be difficult to determine whether the pitdah in the high-priest's breastplate was the yellow topaz; but that it was a topaz there is little reason to doubt.

It is clear that the stone was highly prized by the Hebrews. Job declares that wisdom was more precious than the pitdah of Cush (Job xxviii. 19); and as the name Cush includes Southern Arabia, and the Arabian Gulf, the intimation coincides with the statement of Pliny and others, that the topazes known to them came from the Topaz Island in the Red Sea (Pliny, *Hist. Nat.*, xxxvii. 8; comp. vi. 29; Diod. Sic. iii. 30; Strabo, xvi. p. 770), whence it was probably brought by the Phœnicians. In

\* When water was carried from a distance, leather 'bottles' were used. The 'water-pots' at the marriage of Cana were not pitchers, nor used for either drawing or carrying water.

Ezek. xxviii. 13, the *pitdah* is named among the precious stones with which the king of Tyre was decked.

It may be added that Von Bohlen seeks the origin of the Hebrew word in the Sanscrit language, in which *pita* means 'yellowish,' 'pale;' and, as Gesenius remarks, the Greek *τοπαῖον* itself might seem to come from the Hebrew *פִּטְרָה*, by transposition into *טִפְרָה* (see *Thesaurus*, p. 1101; Braunius, *De Vestitu*, p. 508; Hofmann, *Mineral.*, i. 337; Pareau, *Comment on Job*, p. 333; Ritter, *Erdrkunde*, ii. 675).—J. K.

PITHOM (פִּתּוֹם; Sept. Πειθώμ), one of the 'treasure-cities' which the Israelites built in the land of Goshen 'for Pharaoh' (Exod. i. 11) [EGYPT; GOSHEN]. The site is by general consent identified with that of the Patumos (Πάτωμος) of Herodotus (ii. 158). Speaking of the canal which connected the Nile with the Red Sea, this author says, 'The water was admitted into it from the Nile. It began a little above the city Bubastis [PI-BESETH], near the Arabian city Patumos, but it discharged itself into the Red Sea.' According to this, Patumos was situated on the east side of the Pelusiac arm of the Nile, not far from the canal which unites the Nile with the Red Sea, in the Arabian part of Egypt. The *Itinerarium* of Antoninus furnishes a further limitation. It cannot be doubted that the Thum (Θούμ) which is there mentioned is identical with Patumos and *Pithom*. The *Pi* is merely the Egyptian article. Now this Thum was twelve Roman miles distant from Heropolis, the ruins of which are found in the region of the present Abu-Keisheid. All these designations are appropriate if, with the scholars who accompanied the French expedition, we place Pithom on the site of the present Abhaseh, at the entrance of the Wady Fumilat, where there was at all times a strong military post. (Hengstenberg, *Die Bücher Moses und Aegypten*; Du Bois Ayme, in *Descript. de l'Égypte*, xi. 377; xviii. 1, 372; Champollion, *L'Égypte sous les Pharaons*, i. 172; ii. 58).—J. K.

#### PLAGUE. [PESTILENCE.]

PLAGUES OF EGYPT. [EGYPT, PLAGUES OF.]

PLAINS. There are no less than eight Hebrew words which the translators of our A. V. have represented by the English 'plain,' or its pl. 'plains.' Their rendering is not uniform. We frequently find two, three, and even more equivalents for the same Hebrew term; and, besides, some of the words are manifestly mistranslated, and some of them are proper names. This tends to create confusion, and to prevent the ordinary reader from fully understanding God's word. It is with a desire to throw light upon some obscure passages that the several Hebrew words translated 'plain' are here arranged and explained. They are taken in alphabetical order.

1. אֲבֵל, *Abel*, like the Arabic أَبِل, signifies 'moisture' and the 'verdure' produced by it, as in a meadow. Hence it came to be applied to a low green plain. It occurs frequently as a proper name in Scripture; chiefly, however, in composition, as *Abel-beth-maachah* (2 Kings xv. 29; 1 Kings xv. 20), *Abel-meholah* (Judg. vii. 22), *Abel-maim* (2

Chron. xvi. 4), *Abel-shittim* (Num. xxxiii. 49); also alone, as in 2 Sam. xx. 14, 18. [ABEL.] In 1 Sam. vi. 18 the A. V. reads 'unto the great

stone of Abel;' but the Hebrew is אֶבֶן הַגְּדוֹלָה, 'unto Abel the great.' Several MSS. read אֶבֶן, 'stone' (the LXX. has Ἀβου), and this is probably the true reading (De Rossi, *Var. Lect.*, ad loc.) Judg. xi. 33 is the only passage in which it is rendered 'plain,' 'and he smote them from Aroer, even till thou come to Minnith . . . and unto the

plain of the vineyards' (עַד אֶבֶן כְּרָמִים; εὗς ἑβελχαρμύμ; Alex. Ἀβελ ἀμπελώνων; *Abel quæ est vineis consita*). There can scarcely be a doubt that this is a proper name, and it should be rendered *Abel-keramim*. Eusebius and Jerome mention it as a village of the Ammonites still existing in their day, situated six miles from Philadelphia in the midst of vineyards (*Onomast.*, s. v. *Abelavinearum*).

2. אֵלֶן, *Eln*. This word is derived from the root אָלַל, 'to be strong;' and hence it is used in Scripture to signify 'a strong tree,' and most probably the 'oak,' which grows to a great size in central and southern Palestine (Gesenius, *Thes.*, pp. 42, and 50, 51). In the A. V. it is rendered 'plain' (Gen. xii. 6; xiii. 18, etc.), or 'plains' (xviii. 1; Deut. xi. 30), but in one place the margin has 'oak' (Judg. ix. 6). It is difficult to account for this rendering. Probably it was adopted from the Vulgate, which translates *convallis* in four places, *vallis* in two, and *quercus* in three. The LXX. has ὄρυς, except in Judg. ix. 6, where it has βάλανος; and ver. 37, Ἠλωνμασωνιμ. The word should be always rendered 'oak.' It was considered a sacred tree. Under 'the oak of Moreh,' at Mamre, Abraham pitched his tent, and worshipped God (Stanley, *S. and P.*, p. 508). [MAMRE.]

3. בִּקְעָה, *Bik'â*, the Chaldee form of בִּקְעָה, found only in Dan iii. Nebuchadnezzar set up the golden image 'in the plain of Dura.'

4. בִּקְעָה, *Bik'âh*, is from the root בָּקַע, 'to cleave asunder,' and signifies literally 'a cleft,' or place formed by dividing mountains, then a valley between mountains. It is equivalent to the Arabic بَقْعَة and بَقَاع. It is generally used in the Bible to

denote a low widely-extended plain: as 'the plain' of Shinar (Gen. xi. 2; LXX. πεδον; *campus*); 'the valley of Jericho' (Deut. xxxiv. 3); 'the valley of Megiddo' (2 Chron. xxxv. 22; Zech. xii. 11); 'the valley of Lebanon' (Josh. xi. 17, called in Amos i. 5 'the plain of Aven'), which is now called *el-Bukda*; 'the plain of Ono' (Neh. vi. 2), which appears to have been a portion of southern Sharon, where the town of Ono was situated. [ONO.] This word is rendered 'plain' in the following passages:—Gen. xi. 2; Neh. vi. 2; Is. xl. 4; Ezek. iii. 22, 23; viii. 4; Amos i. 5; elsewhere it is translated 'valley.' It is generally rendered πεδον in the LXX., and *campus* in the Vulgate.

5. כִּכָּר, *Kikkar*, seems to be equivalent to כִּכְרָר, from the root כָּרַר, 'to move in a circle;' כִּכָּר therefore signifies 'a circuit,' or 'the region round about any place' (allied to which are κύκλος, *circus*, and *circle*; Gesen. *Thes.*, p. 717). Hence, with the article הַכִּכָּר, *Ha-kikkar*, it was applied topographically to 'the region of the Jordan,' especially

the southern part of it, in which the cities of Sodom and Gomorrah once stood. It is so used seven times in Genesis (xiii. 10, 11, 12; xix. 17, 25, 28, 29); also in 2 Sam. xviii. 23; 1 Kings vii. 46; 2 Chron. iv. 17; and apparently in Neh. iii. 22; xii. 28. Reland suggests that the name may have been derived from the windings of the river (*Pal.*, p. 274; cf. Stanley, *S. and P.*, p. 278). Though uniformly rendered plain in the A. V., and *πεπλωμένος* or *πεπλοῦκος* in the LXX., it appears to have all the definiteness of a proper name.

The word is also very frequently used in Scripture to signify 'a piece of money,' generally 'a talent' in the A. V. (Exod. xxv. 39; 1 Chron. xx. 2, etc.); also 'a cake' or 'loaf of bread' (1 Sam. x. 3; Prov. vi. 26). Their circular form doubtless suggested the name.

6. מִישׁוֹר, *Mishôr*, with the article מִישׁוֹר.

This word comes from the root יָשַׁר, 'to be straight or even;' hence *Mishôr* signifies 'a plain,' or 'level country;' thus in Ps. xxvi. 12, 'My foot standeth in an even place,' that is, 'in a plain;' also, figuratively, 'rectitude' or 'justice,' as in Ps. lxxvii. 4, 'Thou shalt judge the people righteously' (with justice). With the article it has a topographical signification, and has usually the definiteness of a proper name, as has already been shown in the article MISHOR. In the A. V. it is uniformly rendered plain.

7. עֲרֵבָה, *Arabah*, pl. עֲרֵבוֹת (from the root עָרַב, 'to be dry'), signifies 'an arid region.' In poetry it is applied to any dry pasture land, like Midbar; but with the article it means 'the valley of the Jordan,' and has the force of a proper name, as already shown. [ARABAH; DESERT, 4.] In the A. V. it is commonly rendered 'plain' (Deut. i. 1, 7, etc.); but in Deut. xi. 30, 'champaign,' in Ezek. xlvii. 8, 'desert;' and in Josh. xv. 6, xviii. 18, 'Arabah' (Gesen., *Thes.*, p. 1066; Stanley, *S. and P.*, p. 481). The LXX. usually has *Ἀραβα*, but sometimes *δυσμῆ*. The physical features of the Arabah are described fully in the article PALESTINE.

8. שְׁפֵלָה, *Shephelah*, 'a low plain,' from the root שָׁפַל, 'to be depressed.' In the A. V. it is rendered 'plain' in Jer. xvii. 26; Obad. 19; Zech. vii. 7; 'low plains' in 1 Chron. xxvii. 28; 2 Chron. ix. 27; but elsewhere 'vale' or 'valley.' It has all the definiteness of a proper name, being the specific designation of the maritime plain of Philistia; it is therefore described in a separate article. [SHEPHELAH.]-J. L. P.

PLANCK, HEINRICH LUDWIG, the eldest son of Gottlieb Jacob Planck, was born at Göttingen, July 19, 1785. He studied in the university of his native town, where he had for his teachers Stäudlin, Eichhorn, Heyne, and Heeren. Whilst still a student, he attracted notice by a prize-essay which was published under the title, *Commentatio de principijs et causis interpretationis Philoniana allegorica*, Götting. 1807, 4to. New Testament exegesis was the department of study to which he devoted himself; and his next appearance as an author was a defence of the genuineness of the first epistle to Timothy from the attacks of Schleiermacher, *Bemerkungen über den ersten Paulinischen Brief an den Timotheus*, Götting. 1808, 8vo. In the following year appeared his *Entwurf*

einer neuen synoptischen Zusammenstellung der drei ersten Evangelien, nach Grundsätze der höhern Kritik, Götting. 1809, 8vo. In 1810 he was appointed extraordinary professor of theology at Göttingen; and his introductory programme, *De vera natura atque indole orationis græcæ Novi Testamenti commentatio*, Götting. 1810, 4to, added greatly to his reputation. The value of this essay can scarcely be overrated, and its influence has been equal to its worth. It has wrought an entire change of opinion respecting the N. T. Greek, and upon the views which it enforced all subsequent investigations have been based. An English translation is published in the second volume of the *Edinburgh Biblical Cabinet*. It was Planck's intention, as stated in this essay, to exhibit his views in a more perfected form, in a work to be entitled, *Isagoge Philologica in Novum Testamentum*; but from this he was diverted by an engagement into which he entered, upon the strong recommendation of Gesenius—namely, to prepare a lexicon of the N. T. similar to that which the latter had published of the O. T. Unhappily the expectations awakened by his early promise were unfulfilled. His health was undermined by frequent attacks of epilepsy, and it was with difficulty that he could go through the duties of his office as ordinary professor of theology, to which he was appointed in 1823. He died Sept. 23, 1831.—S. N.

#### PLANE-TREE. [ARMON.]

PLANTAVITIUS, JOHN, *de la Pause*, or *Plantavitus Pausanus*, was born 1576 of a noble Protestant family in the diocese of Nismes, studied theology and Oriental literature, and became pastor at Beziers, where he embraced Roman Catholicism, 1604. He was made bishop of Lodève 1625, retired from his ecclesiastical functions 1648, in consequence of advanced age and great infirmities, and died 1651, in the Palace Margon. Few literati, not Hebrews by birth, have devoted themselves more earnestly to, and laboured more successfully in, the department of Hebrew literature than Plantavitus, and his works will continue to be a monument to his learning and industry as long as the sacred language of the O. T. continues to be studied. His works are as follows:—(1.) *Thesaurus synonymus Hebraico-Chaldaico-Rabbinicus*, Lodovæ 1644-45. In this Thesaurus, which the author also entitled נֶטֶע הַנֶּפֶץ, *planta vitis*, after himself, the whole apparatus of the Hebrew language is divided into synonyms, and arranged alphabetically, according to the most frequently occurring expressions. Thus, for instance, all the verbs signifying to see must be looked for under רָאָה. Each group of synonyms is discussed in six columns, the first and second of which give the Hebrew and Chaldee words, with a Latin explanation; the third and fourth, references to the O. T. for each point in question, with a Latin translation; whilst the fifth and sixth give the Rabbinic synonyms, with a Latin explanation. A most elaborate and most useful Index vocabula Hebr., Chald., Rabb., Græca, Lat., complectens amplissimum, adeo ut instar dictionarii integri inservire possit, entitled

עוֹלֶלֶת הַנֶּפֶץ, *racematio vitis*, is appended to it. The author spent thirty years over this stupendous work; and when it is borne in mind that this is one of the extremely few works on Hebrew syno-

nymys, the great importance of this lexicon to the student of the Hebrew Scriptures cannot be over-rated. (2.) *Florilegium Biblicum Hebraico-Latinum*, Lodovæ 1645; and (3.) *Florilegium Rabbinicum, complectens præcipuas vet. Rabbinorum sententias, vers. Lat. et scholiis illustratas cum Bibliotheca Rabbinica*, Lodovæ 1645. Comp. Wolf, *Bibliotheca Hebraea*, i. 5, etc.; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2107; Geiger, in *Zeitschrift der deutschen morgenländischen Gesellschaft*, xvii. 330, Leipzig 1863.—C. D. G.

PLEDGE. [LOAN.]

PLEIADES. [ASTRONOMY.]

PLOUGH. [AGRICULTURE.]

POCOCK, EDWARD, was born at Oxford, in the year 1604. Having studied at Magdalen Hall, and Corpus Christi College, in the university of his native city, he became B.A. in 1622; M.A., 1626; B.D., 1636; and D.D., 1660. In the year 1628 he was admitted Probationer Fellow of C. C. College, and shortly afterwards was admitted into holy orders, for which he had qualified himself by a careful study of theology in all its branches. His favourite pursuits were the Oriental languages, especially Arabic and Hebrew, in the critical knowledge of which he obtained a world-wide reputation, the splendour of which has not yet faded. Having laid the foundation of these attainments at home, and having given proof of the solidity of his early studies by publishing the 2d Ep. of St. Peter, 2d and 3d Epp. of St. John, and the Ep. of St. Jude in their hitherto unpublished Syriac version, with an original Latin translation, he proceeded to the East, in the capacity of chaplain to the English merchants at Aleppo, after being ordained priest by Corbet, Bishop of Oxford, in 1629. During his six years' residence in the East, he found opportunity not only to improve his Syriac, Hebrew, and Arabic learning, but to collect Greek coins and accumulate MSS., both Oriental and Greek, such as would be valuable for the library of his university. In these researches he acted under the instructions of his munificent patron, Archbishop Laud; and on his return home, in 1636, he was appointed the first Laudian Professor of Arabic in the chair which the archbishop had just founded. To satisfy his intense desire to become perfectly qualified for his professorial duties, he again visited the East, and remained at Constantinople and its neighbourhood no less than four years, enjoying the assistance of the best instructors and the society of celebrated men, among whom should be mentioned Cyril Lucar, patriarch of Constantinople, to whom we owe the valuable Greek MS. the *Codex Alexandrinus*. In 1643, Pocock was presented by his college to the living of Childrey, in Berkshire, and five years afterwards was appointed Regius Professor of Hebrew at Oxford, and Canon of Christ Church. The troubles of the times, however, bore heavily on our learned professor, who was a very steadfast, though not ostentatious, adherent of the royal cause. In November 1650 he was ejected from his canonry, and it was proposed to deprive him of his professorships. He was saved from the latter loss by the strong remonstrance of the authorities of the university, who were adherents of the existing government. Meanwhile nothing had sufficed to check either his pious care of his parish or his pursuit of

sacred and Oriental learning. In Arabic and Hebrew learning he was allowed to be second to none of his age. From the first he made his Oriental attainments subservient to Biblical illustration; and his contributions, directly and indirectly, to Biblical learning were numerous and extremely valuable. [I.] Of his connection with Walton's *Polyglott*, his biographer says: 'From the beginning scarce a step was taken in that work [not excepting even the *Prolegomena*] till communicated to Mr. Pocock, and without whose assistance it must have wanted much of its perfection;' he collated the Arabic Pentateuch, with two copies of Saadias' translation; drew up an account of the Arabic versions of that part of the Bible which is to be found in the Appendix to the *Polyglott*, and lent some of his own rich store of MSS. to the conductors of the work, viz., a Syriac MS. of the entire O. T., an Ethiopic MS. of the Psalms, two Syriac MSS. of the Psalms, and a Persian MS. of the Gospels. [II.] His *Porta Mosis*, or Moses Maimonides' Dissertations prefixed to his commentaries on the Mishna, with the original Arabic text [in Hebrew characters], and a Latin translation. Pocock made this work the more useful to Biblical students by his copious *Appendix Notarum Miscellanea*, where he discusses many points of interest to Biblical scholars. Pocock reaped golden opinions on the publication of this now neglected though still very valuable work. For some time he entertained thoughts of publishing Rabbi Tanchum's expositions [written in Arabic] on the O. T. Although he did not carry out his intention, probably from want of means, he contrived to reproduce much of what is valuable from this Rabbinical author in his own subsequent commentaries on some of the prophets. [III.] Of these commentaries (which seem to have been suggested by Bishop Fell, as a part of a complete exposition of the O. T., to be contributed by various learned writers), the first published was that on *Micah*, in 1677, followed in the same year by that on *Malachi*; in 1685 by that on *Hosea*; and in 1691 by that on *Joel*. In these commentaries, which are all in English, Pocock's skill in his favourite subject of Biblical Hebrew is very apparent. The notes, no doubt, are too diffuse, but they exhibit much profound learning in Rabbinical as well as sacred Hebrew. In his critical principles he warmly defends the general purity of the Masoretic text against the aspersions of Isaac Vossius and the theory of Capellus; but although his Masoretic predilections are excessive, he did not depreciate the Septuagint. His scheme ever was to *reconcile* by learned explanations the sacred original, and the most venerable of its versions. This great and good man laboured on, harassed by enemies and neglected by friends, but respected for his purity of life, and admired for his matchless learning, in his professional and pastoral pursuits, to the very end of his life of 87 years—his only distemper being extreme old age, which yet hindered him not even the night before he died from his invariable custom of praying from the Liturgy with his family. His death took place on the 10th of September 1691. His theological works, comprising the *Porta Mosis* and the Commentaries, with his life, by Leonard Twells, M.A., form two folio volumes.—P. II.

POETRY, HEBREW; the poetry which is found in the Bible, and which, rich and multifari-

ous as it is, appears to be only a remnant of a still wider and fuller sphere of Shemitic literature. The N. T. is intended to be comprised in our definition, for, besides scattered portions, which, under a prosaic form, convey a poetic thought, the entire book of the Apocalypse abounds in poetry.

The term 'Biblical poetry' may find little acceptance in the ears of those who have identified poetry with fiction, fable, and profane delights, under the impression that as such things are of the earth earthy, so religion is too high in its character, and too truthful in its spirit, to admit into its province mere creations of the human fancy. But whatever opinion may be entertained of the character and tendency of poetry in general, the poetry of the Hebrews is, as we shall presently remark more at length, both deeply truthful and earnestly religious; nor are we without a hope, that by the time the reader has arrived at the end of this article, he will then, if he is not before, be of the opinion that the poetry which we are about to consider was and is an eminently worthy channel for expressing and conveying the loftiest and holiest feelings of the human heart. Meanwhile we direct attention to a fact—there is poetry in the Bible. In one sense the Bible is full of poetry; for very much of its contents which is merely prosaic in form, rises, by force of the noble sentiments which it enunciates, and the striking or splendid imagery with which these sentiments are adorned, into the sphere of real poetry. Independently of this poetic prose, there is in the Bible much writing which has all the ordinary characteristics of poetry. This statement the present article will abundantly establish. But even the unlearned reader, when once his mind has been turned to the subject, can hardly fail to recognise at once the essence, if not somewhat of the form, of poetry in various parts of the Bible. And it is no slight attestation to the essentially poetic character of Hebrew poetry that its poetical qualities shine through the distorting coverings of a prose translation. If, however, the reader would at once satisfy himself that there is poetry in the Bible, let him turn to the book of Job, and after having examined its prose introduction, begin to read the poetry itself, as it commences at the third verse of the third chapter.

Much of the Biblical poetry is, indeed, hidden from the ordinary reader by its prose accompaniments, standing, as it does, undistinguished in the midst of historical narrations. This is the case with some of the earliest specimens of Hebrew poetry. Snatches of poetry are discovered in the oldest prose compositions. Even in Gen. iv. 23, *seq.*, are found a few lines of poetry, which Herder incorrectly terms 'the song of the sword,' thinking it commemorative of the first formation of that weapon. To us it appears to be a fragment of a longer poem, uttered in lamentation for a homicide committed by Lamech, probably in self-defence. It has been already cited in this work. [LAMECH.] Herder finds in this piece all the characteristics of Hebrew poetry. It is, he thinks, lyrical, has a proportion between its several lines, and even assonance; in the original the first four lines terminate with the same letter, making a single or semi-rhyme.

Another poetic scrap is found in Exod. xxxii. 18. Being told by Joshua, on occasion of descending from the mount, when the people had made the

golden calf, and were tumultuously offering it their worship—

'The sound of war is in the camp;'

Moses said,

'Not the sound of a shout for victory,  
Nor the sound of a shout for falling;  
The sound of a shout for rejoicing'

do I hear.

The correspondence in form in the original is here very exact and striking, so that it is difficult to deny that the piece is poetic. If so, are we to conclude that the temperament of the Israelites was so deeply poetic that Moses and Joshua should find the excitement of this occasion sufficient to strike improvisatore verses from their lips? Or have we here a quotation from some still older song, which occurred to the minds of the speakers by the force of resemblance? Other instances of scattered poetic pieces may be found in Num. xxi. 14, 15; also ver. 18 and ver. 27; in which passages evidence may be found that we are not in possession of the entire mass of Hebrew, or, at least, Shemitic literature. Further specimens of very early poetry are found in Num. xxiii. 7, *seq.*; xviii. *seq.*; xxiv. 3, 15.

The preceding will suffice to satisfy the reader that there is poetry in the Bible. With this as a fact it is the business of the theologian to deal, whether the fact be or be not in accordance with any preconceived ideas of fitness and propriety. We must take the Bible as we find it; and so taking it, endeavour to understand its claims, and form a just appreciation of its merits.

The ordinary train of thought and feeling presented in Hebrew poetry is entirely of a moral or religious kind; but there are occasions when other topics are introduced. The entire Song of Solomon the present writer is disposed to regard, on high authority, as purely an erotic idyll, and considered as such it possesses excellences of a very high description. In Amos vi. 3, *seq.*, may be seen a fine passage of satire in a denunciation of the luxurious and oppressive aristocracy of Israel. Subjects of a similar secular kind may be found treated, yet never without a moral or religious aim, in Is. ix. 3; Jer. xxv. 10; xlvi. 33; Rev. xviii. 22, *seq.* But, independently of the Song of Solomon, the most worldly ode is perhaps the forty-fifth Psalm, which Herder and Ewald consider an epithalamium. The latter critic, in the account which he gives of it, states that it was sung during the time when the new queen was led in pomp to take her seat in her husband's palace.

The literature of the Bible, as such, is by no means adequately appreciated in the minds of many. Owing, in part, to the higher claims of inspiration, its literary merits have not received generally the attention which they deserve, while the critical world, whose office it is to take cognizance of literary productions, have nearly confined their attention to works of profane authors, and left the Biblical writings to the exclusive possession of the religious public. This severance of interests is to be regretted as much for the sake of literature as of religion. The Bible is a book—a literary production—as well as a religious repository and charter; and ought, in consequence, to be regarded in its literary as well as in its religious bearings, alike by those who cultivate literature and by those who study religion. And when men regard and contemplate it as it is, rather than as fancy or ignorance makes it, then will it be found

to present the loftiest and most precious truths enshrined in the noblest language. Its poetry is one continued illustration of this fact. Indeed, but for the vicious education which the first and most influential minds in this country receive, Biblical literature would long ere now have held the rank to which it is entitled. What is the course of reading through which our divines, our lawyers, our statesmen, our philosophers, are conducted? From early youth up to manhood it is almost entirely of a heathen complexion. Greek and Latin, not Hebrew, engage the attention; Homer and Horace, not Moses and Isaiah, are our class-books, skill in understanding which is made the passport to wealth and distinction. Hence Hebrew literature is little known, and falls into a secondary position. Nor can a due appreciation of this priceless book become prevalent until, with a revival and general spread of Hebrew studies, the Bible shall become to us, what it was originally among the Israelites, a literary treasure as well as a religious guide. Nor, in our belief, can a higher service be rendered either to literature or religion than to make the literary claims of the Bible understood at the same time that its religious worth is duly and impressively set forth. The union of literature and religion is found in the Bible, and has, therefore, a divine origin and sanction. Those who love the Bible as a source of religious truth should manifest their regard both towards the book and towards him whose name and impress it bears, by carefully preserving that union, and causing its nature, requirements, and applications to be generally understood. No better instrument can be chosen for this purpose than its rich, varied, and lofty poetry.

There is no poetic cyclus that can be put into comparison with that of the Hebrews but the cyclus of the two classic nations, Greece and Rome, and that of India. In form and variety we grant that the poetry of these nations surpasses that of the Hebrews. Epic poetry and the drama, the two highest styles as far as mere art is concerned, were cultivated successfully by them, whilst among the Israelites we find only their germs and first rudiments. So in execution we may also admit that, in the higher qualities of style, the Hebrew literature is somewhat inferior. But the thought is more than the expression; the kernel than the shell; and, in substance, the Hebrew poetry far surpasses every other. In truth, it dwells in a region to which other ancient literatures did not, and could not, attain—a pure, serene, moral, and religious atmosphere; thus dealing with man in his highest relations, first anticipating, and then leading onwards, mere civilisation. This, as we shall presently see more fully, is the great characteristic of Hebrew poetry; it is also the highest merit of any literature, a merit in which that of the Hebrews is unapproached. To this high quality it is owing that the poetry of the Bible has exerted on the loftiest interests and productions of the human mind, for now above two thousand years, the most decided and the most beneficial influence. Moral and religious truth is deathless and undecaying; and so the griefs and the joys of David, or the far-seeing warnings and brilliant portrayings of Isaiah, repeat themselves in the heart of each successive generation, and become coexistent with the race of man. Thus of all moral treasures the Bible is incomparably the

richest. Even for forms of poetry in which it is defective, or altogether fails, it presents the richest materials. Moses has not, as some have dreamed, left us an epic poem, but he has supplied the materials out of which the *Paradise Lost* was created. The sternly sublime drama of *Samson Agonistes* is constructed from a few materials found in a chapter or two which relate to the least cultivated period of the Hebrew republic. Indeed, most of the great poets, even of modern days, from Tasso down to Byron, all the great musicians, and nearly all the great painters, have drawn their best and highest inspiration from the Bible. This is a fact as creditable to religion as it is important to literature, of which he who is fully aware will not easily be turned aside from faith to infidelity by the shallow sarcasms of a Voltaire, or the low ribaldry of a Paine. That book which has led civilisation, and formed the noblest minds of our race, is not destined to be disowned for a few real or apparent chronological inaccuracies; or because it presents states of society and modes of thought, the very existence of which, however half-witted unbelief may object, is the best pledge of its reality and truth. The complete establishment of the moral and spiritual pre-eminence of the Bible, considered merely as a book, would require a volume, so abundant are the materials.

It may have struck the reader as somewhat curious that the poetical pieces of which we spoke above should, in the common version of the Bible, be scarcely, if at all, distinguishable from prose. We do not know whether there is anything extraordinary in this. Much of classical poetry, if turned into English prose, would lose most of its poetic characteristics; but, in general, the Hebrew poetry suffers less than perhaps any other by transference into a prosaic element: to which fact it is owing that the Book of Psalms, in the English version, is, notwithstanding its form, eminently poetic. There are, however, cases in which only the experienced eye can trace the poetic in and under the prosaic attire in which it appears in the vulgar translation. Nor, until the subject of Hebrew poetry had been long and well studied, did the learned succeed in detecting many a poetic gem contained in the Bible. In truth, poetry and prose, from their very nature, stand near to each other, and in the earlier stages of their existence are discriminated only by faint and vanishing lines. If we regard the thought, prose sometimes even now rises to the loftiness of poetry. If we regard the clothing, the simpler form of poetry is scarcely more than prose; and rhetorical or measured prose passes into the domain of poetry. A sonnet of Wordsworth could be converted into prose with a very few changes; a fable of Krummacher requires only to be distributed into lines in order to make blank verse, which might be compared even with that of Milton. Now, in translations, the form is for the most part lost; there remains only the substance, and poetic sentiment ranges from the humblest to the loftiest topics. So with the Hebrew poetry in its original and native state. Whether in its case poetry sprang from prose, or prose from poetry, they are both branches of one tree, and bear in their earlier stages a very close resemblance. The similarity is the greater in the literature of the Hebrews, because their poetic forms are less determinate than those of some other nations: they had, indeed, a rhythm; but so had

their prose, and their poetic rhythm was more like that of our blank verse than of our rhymed metre. Of poetical feet they appear to have known nothing, and in consequence their verse must be less measured and less strict. Its melody was rather that of thought than of art and skill—spontaneous, like their religious feelings, and therefore deep and impressive, but less subject to law, and escaping from the hard limits of exact definition. Rhyme, properly so called, is disowned as well as metre. Yet Hebrew verse, as it had a kind of measured tread, so had it a jingle in its feet, for several lines are sometimes found terminating with the same letter. In the main, however, its essential form was in the thought. Ideas are made to recur under such relations that the substance itself marks the form, and the two are so blended into one that their union is essential to constitute poetry. It is, indeed, incorrect to say that 'the Hebrew poetry is characterised by the recurrence of similar ideas' (Latham's *English Language*, p. 372), if by this it is intended to intimate that such a peculiarity is the sole characteristic of Hebrew poetry. One, and that the chief, characteristic of that poetry, such recurrence is; but there are also characteristics in form as well as in thought. Of these it may be sufficient to mention the following:—(1) There is a verbal rhythm, in which a harmony is found beyond what prose ordinarily presents; but as the true pronunciation of the Hebrew has been long lost, this quality can be only imperfectly appreciated. (2) There is a correspondence of words, *i.e.*, the words in one verse, or member, answer to the words in another; for as the sense in the one echoes the sense in the other, so also form corresponds with form, and word with word. This correspondence in form will fully appear when we give instances of the parallelism in sentiment; meanwhile, an idea of it may be formed from these specimens:—

'Why art thou cast down, O my soul?  
And why art thou disquieted in me?'

Ps. xliii. 5.

'The memory of the just is a blessing;  
But the name of the wicked shall rot.'

Prov. x. 7.

'He turneth rivers into a desert,  
And water-springs into dry ground.'

Ps. cvii. 33.

In the original this similarity in construction is more exact and more apparent. At the same time it is a free, and not a strict correspondence that prevails; a correspondence to be caught and recognised by the ear in the general progress of the poem, or the general structure of a couplet or a triplet, but which is not of a nature to be exactly measured or set forth by such aids as counting with the fingers will afford. (3) Inversion holds a distinguished place in the structure of Hebrew poetry, as in that of every other; yet here again the remark already made holds good; it is only a modified inversion that prevails, by no means (in general) equalling that of the Greeks and Romans in boldness, decision, and prevalence. Every one will, however, recognise this inversion in the following instances, as distinguishing the passages from ordinary prose:—

'Amid thought in visions of the night,  
When deep sleep falleth upon men,  
Fear and horror came upon me.'—Job iv. 13.

'To me men gave ear and waited,  
To my words they made no reply.'

Job xxix. 21.

'For three transgressions of Damascus,  
And for four will I not turn away its punishment.'

Amos i. 3.

'His grave was appointed with the wicked,  
And with the rich man was his sepulchre.'

Is. liii. 9.

(4) The last verbal peculiarity of Hebrew poetry which we notice is, that its language betrays an archaical character, a licence, and in general a poetic hue and colouring which cannot be confounded with the simple, lowly, and unrhymical diction of prose. The formation of a poetic diction is, in any nation, dependent on the possession by that nation of a poetical temperament, as much as of a poetical history. Wherever these two elements are found, the birth of poetry and the formation of a poetical language are certain. Great events give rise to strong passions, and strong passions are the parents of noble truths; which, when they spring from and nestle in a poetic temperament, cannot fail to create for themselves an appropriate phraseology, in which the tame and quiet march of prose is avoided, and all the loftier figures of speech are put into requisition. For a time, indeed, the line of demarkation between the diction of prose and that of poetry will not be very strongly marked; for poetry will predominate, as in men's deeds so in their words, and if they as yet have any, in their literature. Soon, however, the passions grow cool, enthusiasm wanes, a great gulf opens between the actual and the ideal—the ideal having ceased to be actual in ceasing to be possible—and a separate style of language for prose and poetry becomes as inevitable as the diversity of attire in which holy and ordinary days have their respective duties discharged.

In no nation was the union of the two requisites of which we have spoken found in fuller measure than among the Hebrews. Theirs was eminently a poetic temperament; their earliest history was an heroic without ceasing to be an historic age, whilst the loftiest of all truths circulated in their souls, and glowed on and started from their lips. Hence their language, in its earliest stages, is surpassingly poetic. Let the reader peruse, even in our translation, the first chapters of Genesis, or parts of the Book of Job, and he cannot but perceive the poetic element in which these noble compositions have almost their essence. And hence the difficulty of determining with accuracy the time when a poetic diction, strictly so termed, began to make its appearance. Partially, such a diction must be recognised in the earliest specimens we have of Hebrew poetry, nor is it hard to trace, if not in words, yet in colouring and manner, signs of this imaginative dress; but the process was not completed, the diction was not thoroughly formed, until the Hebrew bard had produced its highest strains, and tried his powers on various species of composition. The period when this excellence was reached was the age of Solomon, when the rest, peace, opulence, and culture which were the fruits of the lofty mind and proud achievements of David, had had time to bring their best fruits to maturity—a ripeness to which the Israelite history had in various ways contributed during many successive generations.

The chief characteristics, however, of Hebrew poetry are found in the peculiar form in which it gives utterance to its ideas. This form has received the name of 'parallelism.' Ewald justly prefers the term 'thought-rhythm,' since the rhythm, the music, the peculiar flow and harmony of the verse and of the poem, lie in the distribution of the sentiment in such a manner that the full import does not come out in less than a distich. It is to this peculiarity, which is obviously in the substance and not the mere form of the poetry, that the translation of the Psalms in our Bibles owes much of its remarkable character, and is distinguished from prose by terms clearly and decidedly poetic; and many though the imperfections are which attach, some almost necessarily, to that version, still it retains so much of the form and substance, of the simple beauty and fine harmony of the original Hebrew, that we give it a preference over most poetic translations, and always feel disposed to warn away from this holy ground the rash hands that often attempt, with no fit preparation, to touch the sacred harp of Zion.

Those who wish to enter thoroughly into the subject of Hebrew rhythm are referred to the most recent and best work on the subject, by the learned Hebrew scholar Ewald, who has translated into German all the poetical books of the O. T. (*Die Poet. Bücher des Alten Bundes*, 1835-39, 4 vols. 8vo, vol. i., pp. 57-92). A shorter and more simple account will better suit these pages; which we take in substance from Gesenius (*Hebräisches Lesebuch*, 17th edit. by De Wette, Leipzig 1844). The leading principle is, that a simple verse or distich consists, both in regard to form and substance, of two corresponding members: this has been termed Hebrew rhythm or Parallelismus membrorum. Three kinds may be specified. There is first the *synonymous parallelism*, which consists in this, that the two members express the same thought in different words, so that sometimes word answers to word: for example—

'What is man that thou art mindful of him,  
And the son of man that thou carest for him?'  
Ps. viii. 4.

There is in some cases an inversion in the second line—

'The heavens relate the glory of God,  
And the work of his hands the firmament declares.' Ps. xix. 2.

'He maketh his messengers the winds,  
His ministers the flaming lightning.' Ps. civ. 4.

Very often the second member repeats only a part of the first—

'Woe to them that join house to house,  
That field to field unite.' Is. v. 8.

Sometimes the verb which stands in the first member is omitted in the second—

'O God, thy justice give the king,  
And thy righteousness to the king's son.'  
Ps. lxxii. 1.

Or the verb may be in the second member—

'With the jawbone of an ass heaps upon heaps,  
With the jawbone of an ass have I slain a  
thousand men.' Judg. xv. 16.

The second member may contain an expansion of the first—

'Give to Jehovah, ye sons of God,  
Give to Jehovah glory and praise.' Ps. xxix. 1.

Indeed the varieties are numerous, since the synonymous parallelism is very frequent.

The second kind is the *antithetic*, in which the first member is illustrated by some opposition of thought contained in the second. This less customary kind of parallelism is found mostly in the Proverbs—

'The full man treadeth the honeycomb under  
foot,  
To the hungry every bitter thing is sweet.'  
Prov. xxvii. 7.

Under this head comes the following, with other similar examples—

'Day to day uttereth instruction,  
And night to night sheweth knowledge.'

The third kind is denominated the *synthetic*; probably the term *epithetic* would be more appropriate, since the second member not being a mere echo of the first, subjoins something new to it, while the same structure of the verse is preserved; thus—

'He appointed the moon for seasons;  
The sun knoweth his going down.' Ps. civ. 19.  
'The law of Jehovah is perfect, reviving the soul;  
The precepts of Jehovah are sure, instructing  
the simple.' Ps. xix. 7.

This correspondence of thought is occasionally found in Greek and Latin poetry, particularly in the interlocutions of the eclogues of Theocritus and Virgil. The two following distichs are specimens of the antithetic parallelism:—

'*Dam.* Triste lupus stabulis, maturis frugibus  
imber,  
Arboribus venti; nobis Amaryllidis iræ.  
'*Men.* Dulce satis humor, depulsis arbutus hædis,  
Lenta salix fæto pecori; mihi solus  
Amyntas.'

Pope's writings present specimens which may be compared with the antithetical parallelism. In his *Rape of the Lock*, passages of the kind abound. We opened his *Essay on Criticism*, and the first lines our eye fell on were these—

'A little learning is a dang'rous thing:  
Drink deep, or taste not the Pierian spring:  
There shallow draughts intoxicate the brain,  
And drinking largely sobers us again.'

So in his *Messiah*, where he was likely to copy the form in imitating the spirit of the original—

'The lambs with wolves shall graze the verdant  
mead,  
And boys in flow'ry bands the tiger lead;  
The steer and lion at one crib shall meet,  
And harmless serpents lick the pilgrim's feet.'

This correspondence in thought is not, however, of universal occurrence. We find a merely rhythmical parallelism in which the thought is not repeated, but goes forward, throughout the verse, which is divided midway into two halves or a distich—

'The word is not upon the tongue,  
Jehovah thou knowest it altogether.'  
Ps. cxxxviii. 4.

'Gird as a man thy loins,  
I will ask thee; inform thou me.'  
Job xxxix. 3.

Here poetry distinguishes itself from prose chiefly by the division into two short equal parts. This peculiarity of poetic diction is expressed by the word *חֵצֵל*, which properly denotes dividing the matter, and so speaking or singing in separated portions. Among the Arabians, who, however, have syllabic measure, each verse is divided into two hemistichs by a cæsura in the middle. What is termed 'service metre' in English versification is not unlike this in the main: it is the 'common metre' of the Psalm-versions, and of ordinary hymn-books, though in the latter it is arranged in four lines—

'But one request I make to him | that sits the  
skies above,  
That I were fairly out of debt | as I were out of  
love.' *Suckling.*

The simple two-membered rhythm hitherto described prevails, especially in the book of Job, the Proverbs, and a portion of the Psalms; but in the last, and still more in the Prophets, there are numerous verses with three, four, or yet more members.

In verses consisting of three members (tristicha) sometimes all three are parallel—

'Happy the man who walketh not in the paths  
of the unrighteous,  
Nor standeth in the way of sinners,  
Nor sitteth in the seat of scoffers.' Ps. i. 1.

Sometimes two of the members stand opposed to the third—

'To all the world goes forth their sound,  
To the end of the world their words;  
For the sun he places a tabernacle in them.'  
Ps. xix. 4.

Verses of four members contain either two simple parallels—

'With righteousness shall he judge the poor,  
And decide with equity for the afflicted of the  
people;  
He shall smite the earth with the rod of his  
mouth;  
With the breath of his lips shall he slay the  
wicked.' Is. xi. 4.

Or the first and third answer to each other; also the second and fourth—

'That smote the people in anger  
With a continual stroke;  
That lorded it over the nations in wrath  
With unremitted oppression.' Is. xiv. 6.

If the members are more numerous or disproportionate (Is. xi. 11), or if the parallelism is imperfect or irregular, the diction of poetry is lost and prose ensues; as is the case in Is. v. 1-6, and frequently in the later prophets, as Jeremiah and Ezekiel.

It is not to be supposed that each poem consists exclusively of one sort of verse; for though this feature does present itself, yet frequently several kinds are found together in one composition, so as to give great ease, freedom, and capability to the style. We select the following beautiful specimen, because a chorus is introduced—

DAVID'S LAMENT OVER SAUL AND JONATHAN.

The Gazelle, O Israel, has been cut down on  
thy heights!

*Chorus.* How are the mighty fallen!

Tell it not in Gath, publish it not in the streets  
of Ascalon,  
Lest the daughters of the Philistines rejoice,  
Lest the daughters of the uncircumcised exult.

Hills of Gilboa, no dew nor rain come upon you,  
devoted fields!

For there is stained the heroes' bow,  
Saul's bow, never anointed with oil.

From the blood of the slain, from the fat of the  
mighty,

The bow of Jonathan turned not back,  
And the sword of Saul came not idly home.

Saul and Jonathan! lovely and pleasant in life!

And in death ye were not divided;

Swifter than eagles, stronger than lions!

Ye daughters of Israel! Weep for Saul;

He clothed you delicately in purple,

He put ornaments of gold on your apparel.

*Chorus.* How are the mighty fallen in the midst  
of the battle!

O Jonathan, slain in thy high places!

I am distressed for thee, brother Jonathan,

Very pleasant wast thou to me,

Wonderful was thy love, more than the love  
of woman.

*Chorus.* How are the mighty fallen,

And the weapons of war perished!

We have chosen this ode not only for its singular beauty, but also because it presents another quality of Hebrew poetry—the strophe. In this poem there are three strophes marked by the recurrence three times of the dirge sung by the chorus. The chorus appears to have consisted of three parts, corresponding with the parties more immediately addressed in the three several portions of the poem. The first choral song is sung by the entire body of singers, representing Israel; the second is sung by a chorus of maidens; the third, by first a chorus of youths in a soft and mournful strain, and then by all the choir in full and swelling chorus. But in order to the reader's fully understanding with what noble effect these 'songs of Zion' came on the souls of their hearers, an accurate idea must be formed of the music of the Hebrews [MUSIC]. Referring to the articles which bear on the subject, we merely remark that both music and dancing were connected with sacred song in its earliest manifestations, though it was only at a comparatively late period, when David and Solomon had given their master-powers to the grand performances of the temple-service, that poetry came forth in all its excellence, and music lent its full aid to its solemn and sublime sentiments.

Lyrical poetry so abounds in the Bible, that we almost forget that it contains any other species. Doubtless lyrical poetry is the earliest, no less than the most varied and most abundant. Yet the lyrical poetry of the Israelites contains tokens of proceeding from an earlier kind. It is eminently sententious—brief, pithy, and striking in the forms of language, and invariably moral or religious in its tone. Whence we infer that it had its rise in a species of poetry analogous to that which we find in the book of Proverbs. Read the few lines addressed by Lamech to his wives: do they not bear a correspondence with the general tone of the Proverbs?

We do not by this intend to intimate that the book so called was the earliest poetic production of the Hebrew muse. In its actual form it is of a much later origin than many of the odes. Yet the elements out of which it was formed may have existed at a very early day. Indeed, the Oriental genius turns naturally to proverbs and sententious speeches. In its earliest, its most purely native state, the poetry of the Easterns is a string of pearls. Every word has life; every proposition is condensed wisdom; every thought is striking and epigrammatic. The book of Proverbs argues the influence of philosophy. Early poetry is too spontaneous to speak in this long retinue of glittering thoughts. But Eastern imaginations may at first have poured forth their creations, not in a continued strain, but in showers of broken light, on which the lyrist would seize to be worked as sparkling gems into his odes. It is, however, certain, that a general name for poetic language, מִשָּׁל (*maskal*), signifies also a saying, a proverb, a comparison, a similitude. The last is indeed the primary signification, showing that Hebrew poetry in its origin was a painting to the eye; in other words, a parable, a teaching by likenesses, discovered by the popular mind, expressed by the popular tongue, and adopted and polished by the national poet. And as a sententious form of speech may even by its very condensation become dark, so that the wisdom which it contains may have to be patiently

and carefully sought for, what was מִשָּׁל may become hidden knowledge, and pass into חֵידָה (*chidah*), a secret or a riddle; which, as being intended to baffle and so to deride, may in its turn be appropriately termed מְלִיצָה (*m'licah*), derision, satire, or irony.

Lyrical poetry embraced a great variety of topics, from the shortest and most fleeting effusion, as found in specimens already given, and in Ps. xv., cxxxi., cxxxiii., to the loftiest subjects treated in a full and detailed manner; for instance, Deborah's song (Judg. v.), and Ps. xvii. and lxviii. It ran equally through all the moods of the human soul, nothing being too lowly, too deep, or too high for the Hebrew lyre. It told how the horse and his Egyptian rider were sunk in the depths of the sea; it softly and sweetly sang of the benign effects of brotherly love. It uttered its wail over the corpse of a friend, and threw its graceful imagery around the royal nuptial couch. Song was its essence. Whatever its subject, it forewent neither the lyre nor the voice. Indeed, its most general name, שִׁיר (*shir*), signifies 'song'; song and poetry were the same. Another name for lyrical poetry is מִזְמוֹר (*mizmor*), which the LXX. render ψαλμός, 'psalm,' and which from its etymology seems to have a reference not so much to song as to the numbers into which the poet by his art wrought his thoughts and emotions. The latter word describes the making of an ode, the former its performance on the lyre. Another general name for lyrical poetry is מִשְׁכִּיל (*maskil*), which is applied to poems of a certain kind (Ps. xxxii., xlii., xlv., lii., lv., lxxiv., lxxviii., lxxxviii., cxlii.), and appears to denote an ode lofty in its sentiments and exquisite in its execution. Under these general heads there were several species, whose specific differences it is not easy to determine.

1. תְּהִלָּה (*thillah*), 'a hymn,' or 'psalm of praise.' The word is used as a title only to one psalm (cxlv.),

but really describes the character of many, as may naturally be expected when we consider the origin of the ode as springing from victory, deliverance, the reception of bounties, and generally those events and occasions which excited joy and gladness in the soul, and were celebrated with music, often accompanied by dancing in the public assemblies of the people, or after a more sacred manner, in the solemn courts of the temple. To this class of joyous compositions belong the lofty hymns which commemorated great national events, such as the deliverance from Pharaoh (Exod. xv.; Judg. v.; Ps. xviii., lxviii.), which were appointed for set holyday seasons, and became a part at once of the national worship and of the best national property. Other songs of this kind were used on less distinguished occasions, and by individuals on presenting their thank-offerings, and were pitched at a lower key, being expressive rather of personal than general emotions (Ps. xxx., xxxii., xli., cxxxviii.; Is. xxxviii.) There are occasionally briefer songs of victory, sung by the general congregation in the temple, as Ps. xli. and lxviii.

2. קִינָה (*qinah*), θρήνος, 'a dirge,' or 'song of sorrow,' accompanied by exclamations of grief, as וְאֵי, וְאֵי, or very often by וְאֵי, *O how!* and distinguished from songs of joy by mournful strains of music. The Hebrew heart was as much open to sorrow as to joy, tender and full as were its emotions, and simple as was the ordinary mode of life. Adversity and bereavement were therefore keenly felt, and as warmly and strikingly expressed. Indeed so great was the regard held due to the dead, that mourners did not consider their own sorrow sufficient, but used to engage others to mourn for their lost friends, so that in process of time there arose a profession whose business it was to bewail the departed. In Amos v. 16, these persons are named as יוֹדְעֵי נֶחֱם, those who are skilful in wailing (Jer. ix. 17). Distinguished heroes, and persons who were tenderly beloved, found in the sorrowful accents of the Hebrew muse the finest and most lasting memorial (2 Sam. i. 17-27; iii. 33, 34). From 1 Sam. i. 18, it appears that these dirges (*neniaz*) were taught to the children of Israel *ad perpetuam rei memoriam*; and so heroic deeds lived through successive generations on the lips of the people, whose hearts were thus warmed with emulation, while they were softened with gentleness and love. In this class of lamentations may be ranked the songs of sorrow over the misfortunes of Israel, such as Ps. xlv., lx., lxxiii., which seem to have borne the general name of 'a weeping and wailing' (Jer. vii. 29; ix. 19). In the same class stand lamentations poured forth on the desecration or destruction of the holy city (Jer. ix. xix.; Ezek. xxvii. xxxii.; Is. i. xxi.) Jeremiah has put together and united in one book, executed with great skill and presenting an altogether unique specimen of writing, which indeed could have had its birth nowhere but in a Hebrew soul, all possible lamentations and wailings on the ruin and fall of Jerusalem.

3. שִׁנְיָן (*shiggion*) is found only as the title of a poem (Ps. vii.), and once in the plural (Hab. iii. 1), as a description of this species of poetry in general. The word is not easy to understand. The Septuagint render it by ψαλμός, a general term which seems to betray their own ignorance. It had doubtless a specific meaning. The root שִׁנָּה denotes bewilderment, so that the term may indicate

a sort of dithyrambic poetry—poetry in which the emotions are put forth in wild confusion, betokening an agitated, confused, and worried state of mind. This description corresponds with the character of the two compositions to which the epithet is applied in Ps. vii. and Hab. iii. That the melody employed in singing these pieces answered, in wild hurrying confusion, to the train of the thought, may be conjectured naturally, and inferred with good reason, from the heading of Hab. iii.

4. פְּלִלָּה (*ḥ'phillah*), 'prayer,' is the name of certain odes in the titles given to Ps. xvii., lxxxvi., xc., cii., cxlii., Hab. iii. In Ps. cii. and in Hab. iii. it seems not to denote the ode so much as the general tendency of the sentiment of the poet, and in the other headings it may import merely the use to which these compositions may be applied. It is not therefore so much a term of art as a term of religion. Yet may it be applied to compositions in general, designed for use in divine worship, whatever their form or strain, inasmuch as it regards in a general way the religious element which constituted their essence; and accordingly it is found in Ps. lxxii. 20 applied as a general name to an entire collection of the poems of David—'the prayers of David, the son of Jesse, are ended.'

In these four classes we have not pretended to exhaust all the species and forms which lyric poetry took, but merely to present the chief facts. Respecting other kinds little need be said, as the lyrical comprehends the greatest and best part of Hebrew poetry, nor are learned men so much of one mind regarding the compositions to which we allude.

Dramatic poetry in the sense in which the phrase is applicable to productions such as those of Euripides, Shakspeare, or Schiller, had no place in the literature of the Hebrews. This defect may be owing to a want of the requisite literary cultivation. Yet we are not willing to assign this as the cause, when we call to mind the high intellectual culture which the Hebrews evinced in lyric and didactic poetry, out of which the drama seems naturally to spring. We rather look for the cause of this in the earnest nature of the Hebrews, and in the solemnity of the subjects with which they had to do in their literary productions. Nor is it any objection to this hypothesis that the drama of modern times had its birth in the religious mysteries of the middle ages, since those ages were only secondary in regard to religious truth, stood at a distance from the great realities which they believed and dramatised; whereas the objects of faith with the Israelites were held in all the fresh vividness of primitive facts and newly-recognised truths. Elements however for dramatic poetry and first rudimental efforts are found in Hebrew; as in the Song of Solomon, in which several *dramatis personæ* will be discovered speaking and acting by the diligent and unprejudiced reader. Ewald asserts that the poem is divisible into four acts. In the book of Job, however, the dramatic element of the Hebrew muse is developed in a more marked form and a more decided degree. Here the machinery and contrivances of the drama, even to the plot and the *Deus Vindex*, lie patent to a reader of ordinary attention. For epic poetry the constituent elements do not appear to have existed during the classic period of the Hebrew muse, since epic poetry requires an heroic age—an age,

that is, of fabulous wonders and falsely so called divine interpositions. But among the Israelites the patriarchal, which might have been the heroic age, was an age of truth and reality; and it much raises the religious and historical value of the Biblical literature, that neither the singular events of the age of the patriarchs, nor the wonderful events of the age of Moses, nor the confused and somewhat legendary events of the age of the Judges, ever degenerated into mythology, nor passed from the reality which was their essence, into the noble fictions into which the imagination, if unchastened and unchecked by religion, might have wrought them; but they retained through all periods their own essential character of earnest, lofty, and impressive realities. At a later period, when the religion of Moses had, during the Babylonish captivity, been lowered by the corruptions of the religion of Zoroaster, and an entirely new world of thought introduced, based not on reality but fancy, emanating not from the pure light of heaven but from the mingled lights and shadows of primitive tradition and human speculation,—then there came into existence among the Jews the elements necessary for epic poetry; but the days were gone in which the mind of the nation had the requisite strength and culture to fashion them into a great, uniform, and noble structure; and if we can allow that the Hebrews possessed the rudimental outlines of the epic, we must seek for them not in the canonical but the apocryphal books; and while we deny with emphasis that the term Epos can be applied, as some German critics have applied it, to the Pentateuch, we can find only in the book of Judith, and with rather more reason in that of Tobit, anything which approaches to epic poetry. Indeed fiction—which, if it is not the essence, enters for a very large share into both epic and dramatic poetry—was wholly alien from the genius of the Hebrew muse, whose high and noble function was not to invent but to celebrate the goodness of God, not to indulge the fancy but to express the deepest feelings of the soul, not to play with words and feign emotions but to utter profound truth and commemorate real events, and pour forth living sentiments.

These remarks imply that art, though subordinate, was not neglected, as indeed is proved by the noble relics which have come down to us, and in which the art is only relatively small and low—that is, the art is inconsiderable and secondary, merely because the topics are so august, the sentiments so grand, the religious impression so profound and sacred. At later periods, when the first fresh gushing of the muse had ceased, art in Hebrew, as is the case in all other poetry, began to claim a larger share of attention, and stands in the poems for a greater portion of their merit. Then the play of the imagination grew predominant over the spontaneous outpourings of the soul, and among other creations of the fancy alphabetical poems were produced, in which the matter is artistically distributed sometimes under two-and-twenty heads or divisions, corresponding with the number of the Hebrew letters. This is of course a peculiarity which cannot be preserved in any ordinary prose translation; but it is indicated in Ps. cxix., as found in the common Bibles; and other specimens may be seen in Ps. ix. x. xxv. xxxiv. xxxvii. cxi. cxii.

If, now, from these details we consider for a

moment what are the essential peculiarities of Hebrew poetry, we find we have to offer to the reader's attention the following observations.

The source of all true poetry is in the human mind. Even where there is a divine inspiration, this higher element must enter into the soul of man, and, blending with its workings, conform also to its laws. But every thought is not poetical. Thought and emotion become poetical only when they rise to the ideal. Poetry, in its source, is thought which ascends to a high if not perfect (relatively) conception of moral and spiritual realities. Mere intensity is not poetry, any more than strength of muscle is beauty. Still less is passion either poetry or eloquence, as Blair teaches. Passion is of a suspicious origin, and represents the soul as being mastered; whereas in all true poetry the soul is a sovereign. There may be intensity in poetry, however, and the soul, when in a poetic state, may be impassioned; but these are only accidents—results, not causes, ensuing (sometimes) from the ideal conceptions which for the time being constitute the soul, and make up consciousness. Hence all true poetry is religious; for religion is the contemplation of the highest perfection as at once holy, lovely, honourable, formative, and guiding, the object of adoration, the fountain of law, the source of obligation. But in the Hebrew poetry, the religion which constituted its essence had attributes of truth and reality such as no other poetry ever did or could possess. The intimate relation in which the nation of Israel, and the still more intimate relation in which distinguished individuals of that nation, stood to the Deity, made the religious the predominant element, and gave to that element a living and quickening fire as from heaven, which burnt from the first with the true vestal purity, and on to the last with more than vestal constancy and duration. A divine and imperishable power was thus the chief constituent of Hebrew poetry: divine truth, divine energy, divine life, are all found in the earliest productions of Hebrew song. Its chief characteristic—that by which, more than any other thing, it is contradistinguished from the poetry of all other nations—is its pure and rich religious element.

But this divine power lay not merely in the truths conveyed, nor in the facts commemorated by the songs of Zion, but equally in the strong, deep, and overflowing emotions with which the Hebrew harp thrilled sometimes to ecstasy. The origin of this religious sensibility is to be chiefly looked for in the Hebrew temperament, which was and is peculiarly rich in all the sentiments of the heart, so that devotion was as natural—as much a necessity of the character of the Israelites—as domestic affection. It is in the main owing to the religious and devotional qualities of Hebrew poetry that the Book of Psalms still, after the lapse of so many centuries, and the rise and fall of so many modes of thought and forms of social life, holds an empire over the heart of man, far wider, deeper, and more influential than what any other influence has possessed, save only that which is and will ever be exercised by 'David's greater son.'

Nor is the wonder at all diminished when we learn that the Hebrew was an essentially national muse. There is no poetry which bears a deeper or broader stamp of the peculiar influences under

which it was produced. It never ceases to be Hebrew in order to become universal, and yet it is universal while it is Hebrew. The country, the clime, the institutions, the very peculiar religious institutions, rites, and observances, the very singular religious history of the Israelites, are all faithfully and vividly reflected in the Hebrew muse, so that no one song can ever be mistaken for a poem of any other people. Still it remains true that the heart of man, at least the heart of all the most civilised nations of the earth, has been moved and swayed, and is still pleasingly and most beneficially moved and swayed by the strains of Biblical poesy. Others may, but we cannot, account for this indubitable fact, without admitting that some specially divine influence was in operation amidst the Jews.

Its originality is also a marked characteristic of Hebrew poetry. Homer had his teachers, but who taught Moses? Yet 'the divine song of Troy' is less divine than the ode of triumph over Pharaoh. The Hebrew poetry is original in this sense, that it is self-educated and self-developed. It is an indigenous plant in Palestine. Like Melchizedek, it is, in regard to an earlier culture, *ἀπάτωρ ἀμήτωρ, ἀγενεαλόγητος*; and if we cannot say that it has strictly *μήτε ἀρχὴν ἡμερῶν*, there is no danger in predicting of it, *μήτε ζωῆς τέλος ἔχων, μένει λερεὺς εἰς τὸ διηνεκές* (Heb. vii. 3).

Connected with its originality, as in part its cause, is the fact that the Hebrew muse stood nearer than any other to the first days and the earliest aspects of creation, 'when the morning stars sang together, and all the sons of God shouted for joy' (Job xxxviii. 7). Those stars that Muse saw in the maiden purity of their earliest radiance; that song the same Muse heard when first it struck the canopy of heaven and was reverberated to earth. The rose of Sharon blushed with its first loveliness on her glad sight, and the dews of Hermon were first disturbed by her unsandalled feet. Thus there is a freshness as of morn about all her imagery. In her best days there were no stock figures of speech, no *loci communes*, nor universal recipes for forming poetry. Not even at second hand did she receive her stores, but she took what she had out of the great treasure-house of nature, and out of the fulness of her own heart. To be a master, therefore, to other poesies is the divine right and peculiar function of the Hebrew muse. Other bards may borrow and imitate; the poetry of the Bible copies nature and creates.

Hence there is a spontaneousness in its poetry. Open the Psalter at any place; you find streams pouring forth like the brooks and waterfalls that trickle and gush down the hills of Palestine after the latter rain. Nature you behold at work. All therefore is ease, and, as ease, so grace. There is no constraint, no effort, no affectation. The heart itself speaks, and it speaks because it is full and overflowing.

If we add that simplicity is another marked character of Hebrew poetry, we do little more than state that which is already implied. But such is its simplicity that it seems never to have known, in its age of purity, anything of the artificial distinctions by which critics and rhetoricians have mapped out the domain of poesy and endeavoured to supply the deficiencies of fancy by the laborious efforts of varied culture. Hebrew poetry was the voice of man communing with God, and thought as little

of the one as of the other of the two purposes which Horace ascribes to artistic poets—

'Aut prodesse volunt aut delectare poetæ.'

It was, indeed, wholly unconscious of anything but the satisfaction of a high and urgent want, which made worship a necessity, and devotion a delight. A striking confirmation of these facts is found in the circumstance that among the earliest of the 'sweet singers of Israel,' women are found. The great event which Moses, in his sublime triumphal ode, had celebrated, was forthwith taken up by Miriam, whose poetic skill could not be singular, as she is described by a general name, and was supported by other females; 'And Miriam the prophetess, the sister of Aaron' (a remarkable family was that of Amram, 'Aaron, and Moses, and Miriam their sister,' Num. xxvi. 59), 'took a timbrel in her hand; and all the women went out after her with timbrels and with dances. And Miriam answered them, Sing ye to the Lord,' etc. (Exod. xv. 20, *seq.*; see also Judg. v. 1; xi. 34; xxi. 21; 1 Sam. xviii. 7; Ps. lxxviii. 25).

Were it a matter to be determined by authority, we could easily prove that the Hebrew poetry is written in hexameters and pentameters. Josephus more than once asserts that the triumphal ode of Moses was written in hexameter verse (*Antiq.* ii. 16. 4; iv. 8. 44); and in *Antiq.* vii. 12. 3, he expressly says, 'And now David, being freed from wars and dangers, composed songs and hymns to God, of several sorts of metre; some of those which he made were trimeters and some were pentameters;' in which statement he is as much in error in regard to the verse as he is in regard to his implication that David wrote his Psalms at some one set period of his life. Not improbably Josephus was influenced in this representation regarding the alleged metres by his Grecising propensities, by which he was led to assimilate the Hebrew laws and institutions to Grecian models, with a false view of thus gaining honour to his country, and by reflection, to himself as well. Even in his day the true pronunciation of the Hebrew was lost, so that it was easy to make this or that assertion on the subject of its versification. Certainly all the attempts to which these misstatements of Josephus (see also Euseb., *Præp. Ev.* xi.; Hieron., *Præf. ad Chron.*; Euseb., p. 1; Isidor., *Orig.*, i. 38) chiefly led, have utterly failed; and whatever the fact may be, whether or not these poems were written in stricter measure than the doctrine of this article supposes, we are little likely to form an exact idea of the Hebrew measures unless we could raise David from the sleep of centuries; and at a time when, like the present, it is beginning to be felt that there has been far too much dogmatizing about even the classical versification, and that speculation and fancy have outstripped knowledge, we do not expect to find old attempts to discover the Hebrew hexameters and pentameters revived. Those who may wish to pursue the subject in its details are referred to the following works: Carpov, *Introd. in V. T.*, ii. England has the credit of opening a new path in this branch by the publication of Bishop Lowth's elegant and learned *Praelectiones de Sacra Poesi Hebraeorum*, Oxon. 1753; which may be found also in Ugolini, *Thesaur.*, xxxi.; the editions having Michaelis's *Nota ad Epimetra* are to be preferred; that of Oxon. 1810 is good: the work was translated into English by Gregory. On the

didactic poetry of the Hebrews the reader may consult Umbreit, *Sprüche Sal. Einleitung*; Rhode, *De Vet. Poetar. Sapientia Gnom. Hebraeor. imp. et Græcor.*, Havn. 1800; Unger, *De Parabolar. Jesu natura*, etc., Leips. 1828. Le Clerc, in his *Biblioth. Univers.*, ix. 226, *seq.*, has given what is worth attention; see also *Hist. Abrégée de la poésie chez les Hébr.* in the History of the Academy of Inscriptions, tom. xxiii. 92, *seq.* But the work which has, next to that of Lowth, exerted the greatest influence, is a posthumous and unfinished piece of the celebrated Herder, who has treated the subject with extraordinary eloquence and learning: *Von Geist der Ebräischen Poesie*, 1782, to be found in his collected writings; also Tübing. 1805, and Carlsruhe 1826; see also Gügler, *Die Heil. Kunst der Hebräer.*, Landshut 1814; and B. F. Guttenstein, *Die Poet. Literar. alten Israelit.*, Mannh. 1835. The subject of metre has been skilfully handled by Bellermann, *Versuch über d. Metrik der Hebräer.*, Berl. 1813. Much useful information may be found in De Wette's *Einleitung in d. A. Test.*, Berlin 1840, translated into English by Theodore Parker, Boston (U. S.) 1843. In Well-beloved's Bible translations of the poetical portions may be found, in which regard is paid to rhythm and poetical form; a very valuable guide in Hebrew poetry, both for form and substance, may be found in Noyes's *Translation of Job*, Cambridge (U. S.) 1827; of the *Psalms*, Boston (U. S.) 1831; and of the *Prophets*, Boston (U. S.) 1833; but the best, fullest, and most satisfactory work on the subject is by Ewald, *Die Poet. Bücher des Alten Bundes*, 4 vols. 8vo, Göttingen 1835-39.—J. R. B.

**POISON.** There is no reference either in the O. or N. T. to the use of poison for taking away life. The word occurs only once in the N. T. (James iii. 8), and but seldom in the O. T., and always in poetical passages, and in a metaphorical sense. In Job vi. 4 there may be an allusion to the practice, so common among barbarous nations of all times, of poisoning arrows. The words *φάρμακός* (Rev. xxi. 8) and *φάρμακον* (Gal. v. 20; Rev. ix. 21; xviii. 23) have been sometimes referred to the employment of poisonous drugs, but such is not their use in the LXX., and there can be no doubt that the A. V. is right in understanding them of 'sorcery.' There is one instance of suicide by poison in the Apocrypha (2 Maccab. x. 13), in the case of Ptolemy Macron.

The two words translated 'poison' in the A. V. are—(1.) *קֶחֶךְ*, from the unused root *קָחַ*, *incaluit*, used generally of 'heat,' 'anger' (Gen. xxvii. 44; Jer. vi. 11), but sometimes, metaphorically, of 'serpents' poison' (Deut. xxxii. 24, 33; Ps. lviii. 4 (5); cxl. 3 (4)), from its inflammatory effects on the system. The LXX. almost invariably translate it *Θυμός*, but Ps. cxl. 4, *ὁς ἀσπίδων*. (2.) *זָאֵר*, generally of vegetable poison (Deut. xxix. 18; xxxii. 32; Hos. x. 4), but sometimes of the venom of serpents (Deut. xxxii. 33; Job xx. 16). Comparing the passages in which it is found, 'rôsh' was probably a plant springing up among the corn (Hos. x. 4; Amos vi. 12) bearing a berry or fruit (Deut. xxxii. 32, 'grapes of rôsh'), either yielding a very bitter juice, or imparting the same flavour to water in which it was steeped (Jer. viii. 14; ix. 15; xxiii. 15, 'water of rôsh'). Its bitterness is evident from its constant association with 'wormwood' (Deut. xxix. 18; Lam. iii. 19; Amos

vi. 12; A. V., 'hemlock'). And since among the Jews 'bitterness' and 'poison' were kindred terms (cf. מַרְרָה, Job xx. 14; מָרִיר, Deut. xxxii. 24, for the poison of serpents'), its deadly properties may be inferred. Until our knowledge of the flora of Palestine is more complete, the identification of this plant must be merely conjectural. In the LXX. it is rightly translated by the general term *χολή*, except Hos. x. 4, where we find *ἀγρωστis*, 'couch grass' (Ven., *τιθύμαλος*, 'spurge'). The usual Vulgate rendering is 'amaritudo,' that of the A. V., 'gall;' our translators in the margin of Deut. xxix. 18 giving the alternative rendering 'rosh, or a poisonous herb.' Edmann (iv. 83) identifies the plant with the colocynth, '*Cucumis colocynthi*;' Michaelis (*Fragen.*, 145), the henbane, '*Hyoscyamus*;' or (*Suppl.*, 2220) the darnel, '*Lolium temulentum*;' Celsius, *Hierobot.*, ii. 46, the hemlock, '*Cicuta*;' Gesenius, simply on etymological grounds, *עֵרָא*, also meaning 'a head,' is in favour of the opium poppy, '*Papaver somniferum*,' from the large capsules from which the juice is obtained. None of these suggestions carry conviction with them, and we wait for fuller information.—E. V.

POL (פּוֹל) occurs twice in Scripture, and no doubt signifies 'beans,' as translated in the A. V. The first occasion is in 2 Sam. xvii. 28, where beans are described as being brought to David, as well as wheat, barley, lentils, etc., as is the custom at the present day in many parts of the East when a traveller arrives at a village. So in Ezek. iv. 9, the prophet is directed to take wheat, barley, *beans*, lentils, etc., and make bread thereof. This meaning of *pol* is confirmed by the Arabic *فول*, *ful*, which

is the same word (there being no *pe* in the Arabic), and is applied to the *bean* in modern times, as ascertained by Forskal in Egypt, and as we find in old Arabic works. The common bean, or at least one of its varieties, has been employed as an article of diet from the most ancient times, since, besides the mention of it in Scripture, we find it noticed by Hippocrates and Theophrastus under the names of *κίσμος ἑλληνικός*, to distinguish it from *κίσμος αἰγύπτιος*, the Egyptian bean, or bean of Pythagoras, which was no doubt the large farinaceous seed of *Nelumbium speciosum*. Beans were employed as articles of diet by the ancients, as they are by the moderns; and are considered to give rise to flatulence, but otherwise to be wholesome and nutritious. 'Mélangee à la quantité d'une livre sur dix à douze de farine de froment, elle fournit un assez bon pain, et donne de la consistance à la pâte lorsqu'elle est trop molle.' So Pliny: 'Inter legumina maximus honos fabæ: quippe ex qua tentatus etiam sit panis. Frumento etiam miscetur apud plerasque gentes.' Beans are cultivated over a great part of the old world, from the north of Europe to the south of India; in the latter, however, forming the cold-weather cultivation, with wheat, peas, etc. They are extensively cultivated in Egypt and Arabia. Mr. Kitto states that the extent of their cultivation in Palestine he had no means of knowing. In Egypt they are sown in November, and reaped in the middle of February (three and a half months in the ground; but that in Syria they may be had throughout the spring. The stalks are cut down with the scythe; and these are afterwards cut and crushed, to fit them for the food of camels, oxen,

and goats. The beans themselves, when sent to a market, are often deprived of their skins. Basnage reports it as the sentiment of some of the Rabbins, that beans were not lawful to the priests, on account of their being considered the appropriate food of mourning and affliction; but he does not refer to the authority; and neither in the sacred books nor in the Mishna can be found any traces of the notion to which he alludes. So far from attaching any sort of impurity to this legume, it is described as among the first-fruit offerings; and several other articles in the latter collection prove that the Hebrews had beans largely in use, after they had passed them through the mill (*Phys. Hist. of Palestine*, cccix.)—J. F. R.

POLLUX. [CASTOR AND POLLUX.]

POLYGAMY. [MARRIAGE.]

POLYGLOTT. Although the earliest specimen of a Polyglott was that of a projected work of the celebrated printer Aldus Manutius, of which one page only was published, the first of this kind was the *Complutensian Polyglott*, entitled *Biblia Sacra Polyglotta, nunc primum impressa*, etc., comprised in 6 vols. fol. We are indebted for this work to the celebrated cardinal, statesman, and general, Francis Ximenes de Cisneros, who published it at his own expense, at the cost of 50,000 ducats. It was commenced in 1502, completed in 1517, and published in 1522. The editors were Ælius Antonius, Ducas, Pincianus, Stunica, Zamora, Coronellus, and Johannes de Vergera. The three last were originally Jews. The first four volumes contain the O. T., with the Hebrew, Latin, and Greek, in three columns, the Targum, and a Latin version of the same. The fifth volume contains the Greek Testament, with the Latin Vulgate. The last volume consists of Vocabularies, Indexes, etc. etc. The Greek Testament was finished in 1517; but the MSS. were modern and not of much critical value (See Dr. Bowring's letter, *Monthly Repository* for 1827, p. 572). There is little doubt that the celebrated text of the Three Witnesses in this edition was translated from the Latin. There were 600 copies only printed of this splendid work, of which three were on vellum. One of these was sold in England, in 1829, for 600 guineas.

The *Antwerp Polyglott* was published in 1569-72, in 8 vols. fol., at the expense of Philip II., king of Spain. It contains, in addition to the Complutensian texts, a Chaldee Paraphrase, the Syriac version, and the Latin translation of Arias Montanus, which was a correction of that of Pagninus. It also contains lexicons and grammars of the various languages of the originals and versions.

The *Paris Polyglott*, in addition to the contents of the former works, has a Syriac and Arabic version of both the O. T. and N. T., with the Samaritan Pentateuch, now published for the first time, and edited by J. Morinus. This Polyglott also contains the Samaritan version of the same. It was published in 1645, in 10 vols. large folio. The editor of this valuable, but unwieldy work, was Michael le Jay, who was ruined by the publication. [LE JAY.]

The *London Polyglott*, edited by Brian Walton, afterwards Bishop of Chester, is much more comprehensive than any of the former. It was

published in 1657, in 6 vols. fol. The first volume, besides prolegomena, contains the Pentateuch, exhibiting on one page the Hebrew text, with the interlinear Latin version of Arias Montanus, the Latin Vulgate of the Clementine edition, the Septuagint of the Roman edition, and the various readings of the Cod. Alex., the Latin version of Flaminius Nobilius, the Syriac with a Latin version, the Targum of Onkelos with a Latin version, the Samaritan Pentateuch with the Samaritan version of the same, and a Latin translation serving for both, and the Arabic with a Latin version. The second volume comprises the historical books, with the Targums of Jonathan. The third volume contains the books from Job to Malachi, and, besides the versions in all the former languages, the Psalms in Ethiopic, and a Latin translation. The fourth volume has all the Deutero-canonical books in Greek, Latin, Arabic, and Syriac; the two Hebrew texts of Tobit [TOBIT], and two Chaldee and a Persian Targum on the Pentateuch, with Latin versions. The fifth volume has the N. T., with Arias Montanus's translation; the Syriac, Persic, Latin, Vulgate, Arabic, and Ethiopic versions. These, with separate Latin versions of the Oriental translations, are all given on one page. The sixth volume contains various readings and critical remarks. The whole of this stupendous labour was completed in four years. It was published by subscription, under the patronage of Oliver Cromwell, who died before its completion. This gave occasion to the cancelling of two leaves of the preface, in order to transfer to king Charles II. the compliments addressed to Cromwell. There are, in consequence, both *Republican* and *Royal* copies, the former of which are the most scarce and valuable. For the variations between these, see Butler's *Hora Biblica* and Adam Clark's *Succession of Sacred Literature*. This Polyglott was accompanied by Castell's *Hep-taglott Lexicon*, in 2 vols. fol. [CASTELL; WALTON.]

Mr. Bagster's *Polyglott*, fol., London 1831, contains in one volume the Hebrew text, the Samaritan Pentateuch, the Septuagint, Vulgate, and Syriac versions, the Greek text of Mill in the N. T., together with Luther's German, Diodati's Italian, Ostervald's French, Scio's Spanish, and the English A. V. of the Bible. The cheapest and most generally useful polyglott is one entitled *Polyglotten-Bibel zum Praktischen Handgebrauch*, edited by Drs. Stier and Theile. It contains the Hebrew, Septuagint, Vulgate, and German, in the O. T., and the Greek, Vulgate, and German, in the N. T.

There are also polyglotts of several portions of the Bible, of which one of the most valuable is that published at Constantinople, in Hebrew, Chaldee, Persian, and Arabic, in 1546.—W. W.

#### POMEGRANATE. [RIMMON.]

POMIS, DAVID DE, was born, 1525, in Spoleto, of the celebrated family called in Hebrew כֹּהֵן הַחַפְזִים, which, like the families הַנְּעָרִים and בְּנֵי הָעֲנָיִים, traced their origin to those Jews who were led into captivity after the destruction of Jerusalem by Titus and Vespasian. He received his first instruction from his father, who was a very eminent and literary man, and who initiated him in all the cycle of Biblical and Talmudic lore in Mevenia. After the death of his father, De Pomis devoted himself to the study of medicine, in which

department he greatly distinguished himself. He went, in 1545, to Perugia, where he remained till 1552, prosecuting his studies in medicine, philosophy, and philology; entered into official service at Maghans in Sabionetta till 1555; became physician to Count Nicolo Ursino (1555-1560), and to Prince Sforza (1560-1563); went to Rome, and then to Venice, where he died. In the midst of all his numerous engagements, and whilst discharging the responsible duties of a high office, De Pomis was an ardent student of the Bible, and left behind him the following important works:—(1.) A Hebrew and Talmudic lexicon, entitled צִמְח דָּוִד, *the Offspring of David*, in three languages, viz., Hebrew, Latin, and Italian, Venice 1587. De Pomis made large use of R. Nathan's *Aruch*, Kimchi's *Sepher Ha-Sherashim*, and Levita's *Meturgeman* and *Tishbi*. The work is dedicated to Sixtus V. (2.) An Italian commentary on Ecclesiastes (קְהִלֶּת, *tradoto ed dichiarato*, etc.), with a translation and the Hebrew text, Venice 1571. (3.) *Discorso à l'humana misera*, etc., being a supplement to the commentary on Ecclesiastes, Venice 1572. (4.) A commentary on the Book of Job; and (5.) A commentary on the Book of Daniel, which are after the model of the commentary on Ecclesiastes, but which have not as yet been published. Comp. Fürst, *Bibliotheca Judaica*, iii. 111-113.—C. D. G.

POND, אֲנָנִים, from the obsolete אָנַן 'to burn,' or 'be hot,' and thence 'to ferment' and 'become corrupt,' as stagnant water. Properly used of the swampy pools of putrescent water left by the inundations of the Nile (Exod. vii. 19; viii. 1 (5); LXX. δῶρυγες, Vulg. 'paludes'). In Is. xix. 10, אֲנָנֵי נֶפֶשׁ, which the A. V. translates 'ponds for fish,' following the Vulg. 'lacunas ad capiendos pisces,' Diodati and Luther, is rendered by the LXX. τὰς ψυχὰς πνέουσας (the writer in Smith's *Dictionary* has failed to perceive that ζύθον = 'beer' is the translation of שָׂכָר). This rendering is supported by the authority of Gesenius, Vatablus, and Ewald; 'alle Lohnarbeiter' עֲשֵׂי שֶׂכֶר = 'they that earn wages'), 'sind seelenbetäubt'; אֲנָנִים being taken as equivalent to עֲנָנִים (Job xxx. 25), 'to be sad.' The word occurs several times of marshy pools, in contradistinction to the dry sands of the desert (Ps. cvii. 35; cxiv. 8); 'standing water' (Is. xxxv. 7; xli. 18), 'a pool.' Such pools being commonly reedy, it is rendered 'reeds' (Jer. li. 32).—E. V.

#### PONTIUS PILATE. [PILATE.]

PONTUS (Πόντος), the north-eastern province of Asia Minor, which took its name from the sea [Pontus Euxinus] that formed its northern frontier. On the east it was bounded by Colchis, on the south by Cappadocia and part of Armenia, and on the west by Paphlagonia and Galatia. Ptolemy (*Geog.* v. 5) and Pliny (*Hist. Nat.* vi. 4) regard Pontus and Cappadocia as one province; but Strabo (*Geog.* xii. p. 541) rightly distinguishes them, seeing that each formed a distinct government with its own ruler or prince. The family of Mithridates reigned in Pontus, and that of Ariarathes in Cappadocia. The two countries were also separated naturally from each other by the

Lithrus and Ophlimus mountains. The kingdom of Pontus became celebrated under Mithridates the Great, who waged a long war with the Romans, in which he was at length defeated, and his kingdom annexed to the Roman empire by Pompey (Appian, *Mithrid.*, p. 121). That Jews had settled in Pontus previous to the time of Christ, is evident from the fact that strangers from Pontus were among those assembled at Jerusalem at the Feast of Pentecost (Acts ii. 9). Christianity also became early known in this country, as the strangers 'in Pontus' are among those to whom Peter addressed his first epistle (1 Pet. i. 1). Of this province Paul's friend Aquila was a native (Acts xviii. 2). The principal towns of Pontus were Amasia, the ancient metropolis and the birth-place of the geographer Strabo, Themiscyra, Cerasus, and Trapezus; which last is still an important town under the name of Trebizond (Cellarius, *Notit.* ii. 287; Mannert. vi. 350; Rosenmüller, *Bibl. Geog.* iii. 5-9; *Encyclop. Method.*, Sect. *Geog. Ancienne*, art. 'Pontos').—J. K.

POOL in the A. V. is the rendering of three Hebrew words.

1. אֵי (Is. xiv. 23; xxxv. 7; xli. 18; xlii.

15). See POND.

2. בִּרְכָה, probably from בָּרַךְ, 'to bend the knee,' an artificial tank or cistern at which camels kneel to drink; LXX. κρήνη, κολυμβήθρα; once Cant. vii. 4, λίμνη, Vulg. 'piscina'; once Neh. ii. 14, 'aquæductus.' Akin to the Arabic 'Birkeh' and its Spanish form 'Al-berca.' 'Berêchâh' in the O. T. stands for the larger reservoirs of rain or spring-water; while 'B'or,' 'cistern,' is used for the smaller domestic tanks, of which every house had one or more. The importance of these reservoirs in a country possessing scarcely more than one perennial stream, and where wells are few and inconsiderable, can hardly be estimated by those accustomed to an unfailling abundance of the precious fluid. In Jer. xiv. 3 we have a powerful description of the disappointment caused by the failure of the water in the cisterns (נְבִים; A. V. 'pits,' cf.

Is. xlii. 15; Jer. ii. 13). The word is used of the large public reservoirs, corresponding to the tanks of India, belonging to the towns of Gibeon (2 Sam. ii. 13), Hebron (iv. 12), Samaria (1 Kings xxii. 38), and Jerusalem; 'the upper pool,' 2 Kings xviii. 17; Is. vii. 3; xxxvi. 2 (now the 'Birket Mamilla'); 'the lower pool,' Is. xxii. 9, 11 ('Birket es Sultan'); 'Hezekiah's pool,' 2 Kings xx. 20 ('Birket el-Hammâm'); 'the king's pool,' Neh. ii. 14 ('the Fountain of the Virgin'); and 'the pool of Siloah,' Neh. iii. 15, or 'the old pool,' Is. xxii. 11 ('Birket Silwân'). We read also, Eccles. ii. 6, of the 'pools' or cisterns made by Solomon to irrigate his gardens. These are doubtless the famous 'Solomon's pools' near Bethlehem, now called 'el-Burâk,' 'the tanks.' They are described as three immense tanks, partly excavated in the rocky bed of the valley, partly built up with huge stones, the bottom of the upper pool being above the top of the next, and so with the second and third. Their dimensions are respectively—length, 380, 423, 582 feet; breadth, east end, 236, 236, 207; west end, 229, 229, 148; depth, east end, 25, 39, 50 feet. An aqueduct leads from them, which terminates in the area of the Harâm, the site of the Temple.

The pools of Bethesda and Siloam, κολυμβήθρα, are mentioned in the N. T. (John v. 2, 4, 7; ix. 7). [BETHESDA; SILOAM.]

3. מִקְוֵה (Exod. vii. 19; LXX. πάν συνεστηκός ὕδωρ; Vulg. 'omnes lacus aquarum'), from קָוָה in Niph., 'to gather themselves together'; used for any collection of waters (Gen. i. 10; Lev. xi. 36).—E. V.

POOLE, MATTHEW, a learned and laborious nonconformist divine, was born at York, in 1624, of parents in affluent circumstances. Having studied at Emmanuel College, Cambridge, he afterwards became minister of Mary le Querne, London, from which he was ejected in 1662 for nonconformity. Deprived of his cure, he devoted himself to Biblical labours, especially to the great work of his life, just now to be mentioned. He engaged in many controversies, published many works of great merit, and died in 1679 at Amsterdam, whither he had retired to enjoy the toleration denied him in his native land. His greatest work is: *Synopsis Criticorum Aliorumque Scripturæ Sacre Interpretum et Commentatorum*, etc., London, 5 vols. folio, 1669-1674. To the completion of this voluminous work he devoted ten years. It was reprinted at Utrecht 1684, 5 vols. folio, and at Frankfort 1694, 5 vols. large 4to; followed, at the same place, in 1712, by another edition, 5 vols. folio. These two Frankfort editions have been unjustly depreciated by Horne (*Manual of Biblical Bibliography*, p. 249). The work must have been peculiarly valuable when it first appeared. Briefer and more accessible than the *Critici Sacri*, it has the additional advantage of exhibiting the views of other noted authors besides those in the work just named. It is a storehouse of interpretation and criticism; and notwithstanding the progress of Biblical science since its first appearance, which has necessarily lessened its value, it may still be consulted with profit.

Besides the *Synopsis* he also wrote *Annotations upon the Holy Bible, wherein the Sacred Text is inserted, and various readings annexed*, etc., the more difficult terms explained, etc., London, 2 vols., 1683; Edinburgh, 4 vols. 4to, 1803. This work, however, he did not live to complete. From the 58th chapter of Isaiah it is the joint production of several other hands.—I. J.

POOR. [ALMS.]

POPLAR. [LIBNEH.]

PORCH. 1. אֵילָם, from אָל, before, a vestibule or hall. It is used of the entrance-hall of a building (Ezek. xl. 7, 48); of the place where the throne was placed, and where judgment was administered (1 Kings vii. 7 [PALACE]); and of the verandah surrounding a court (Ezek. xli. 15). 'The porch of the Lord' (2 Chron. xv. 8; xxix. 17) seems to stand for the Temple itself.

2. מִסְדָּרֵן, a sort of colonnade or balcony with pillars (Judg. iii. 23).

3. Πυλὼν (Matt. xxvi. 71), probably the passage from the building surrounding the court to the fore-court (προαύλιον). According to Mark (xiv. 68) it was in this fore-court that the denial took place.—W. L. A.

PORCIUS FESTUS. [FESTUS.]

PORTER (שַׁעַר or שַׁעֲרָה, from שַׁעַר, a gate; LXX. θυρωρός, πυλῶρος, πύλη; Vulg. *Janitor*, *Portarius*), a person who has charge of the doors or gates of public buildings, or private houses, or of a city—a door-keeper. Thus, in 2 Kings vii. 10, 11, and 2 Sam. xviii. 26, we meet with the שַׁעַר, or porter, at the gates of a town. In the palace of the high-priest (John xviii. 17), the porter was a female, ἡ παιδίσκη, ἡ θυρωρός. See also Acts xii. 13.

The word occurs most frequently in connection with the Temple, of which the *She'arim*, who were *guards* as well as porters, were very numerous; for in 1 Chron. xxiii. 5, no less than 4000 are mentioned. They were divided into courses (1 Chron. xxvi. 1-19), and had their posts assigned them by lot (1 Chron. xxvi. 13). Besides attending to the gates and keeping order there, they seem, as Lightfoot says, to have had charge of certain treasures\* (1 Chron. xxvi. 15, compared with 2 Chron. xxv. 24, and Lightfoot's *Prospect of the Temp.*, c. 5, s. 6). Their service was required by night as well as by day, and a man called 'the Man of the Mountain of the House,' went round every night to see that all were in their places, and that none of them slept. If he found any one asleep he struck him, and had liberty to burn his clothes. To this Lightfoot thinks there is a reference in Rev. xv. 16, 'Blessed is he that watcheth and keepeth his garments' (*Temple Service*, c. 7, s. 1.)

A porter seems to have been usually stationed at the doors of sheep-folds (John x. 3). To what or whom does this θυρωρός correspond? Is it to the *Holy Spirit*, who opens the way for the true ministers of Christ?—I. J.

POSSESSION. [DEMONIACS.]

POT. [BASON; BOWL; CALDRON; CUP; POTTER.]

POTIPHAR (פּוֹטִיפָר, contract. of פּוֹטִי פָרַע, POTIPHERAH, which see; Sept. Πετεφρής), an officer of Pharaoh, probably the chief of his body-guard (Gen. xxxix. 1). Of the Midianitish merchants he purchased Joseph, whose treatment by him is described under that head. The keeper of the prison into which the son of Jacob was eventually cast treated him with kindness, and confided to him the management of the prison; and this confidence was afterwards sanctioned by the 'captain of the guard' himself, as the officer responsible for the safe custody of prisoners of state. It is sometimes denied, but more usually maintained, that this 'captain of the guard' was the same with the Potiphar who is before designated by the same title. We believe that this 'captain of the guard' and Joseph's master were the same person. It would be in accordance with Oriental usage that offenders against the court, and the officers of the court, should be in custody of the captain of the guard; and that Potiphar should have treated Joseph well after having cast him into prison, is not irreconcilable with the facts of the case. After having imprisoned Joseph in the first transport of his choler he might possibly

discover circumstances which led him to doubt his guilt, if not to be convinced of his innocence. The mantle left in the hands of his mistress, and so triumphantly produced against him, would, when calmly considered, seem a stronger proof of guilt against her than against him: yet still, to avoid bringing dishonour upon his wife, and exposing her to new temptation, he may have deemed it more prudent to bestow upon his slave the command of the state prison, than to restore him to his former employment.—J. K.

POTIPHERAH (פּוֹטִי פָרַע), the priest of On, or Heliopolis, whose daughter Asenath became the wife of Joseph [ASENATH]. The name is Egyptian, and is in the Septuagint accommodated to the analogy of the Egyptian language, being in the Cod. Vatican. Πετεφρῆ; Alex. Πετεφρῆ, al. Πετεφρῆ, Πετεφρί; which corresponds to the Egyptian ΠΕΤΕ-ΦΡΗ, qui Solis est, i. e., Soli proprius (Champollion, *Précis, Tabl. Général*, p. 23). The name is found written in various forms on the monuments, which are copied by Gesenius in his *Thesaurus*, p. 1094, from Rossellini, *Monum. Storici*, i. 117.—J. K.

POTSHERD. Potsherd is figuratively used in Scripture to denote a thing worthless and insignificant (Ps. xxii. 15; Prov. xxvi. 23; Is. xlv. 9). It may illustrate some of these allusions to remind the reader of the fact, that the sites of ancient towns are often covered, at the surface, with great quantities of broken pottery. The present writer has usually found this pottery to be of coarse texture, but coated and protected with a strong and bright-coloured glaze, mostly bluish green, and sometimes yellow. These fragments give to some of the most venerable sites in the world the appearance of a deserted pottery rather than of a town. The fact is, however, that they occur only upon the sites of towns which were built with crude brick; and this suggests that the heaps of ruin into which these had fallen being disintegrated, and worn at the surface by the action of the weather, bring to view and leave exposed the broken pottery, which is not liable to be thus dissolved and washed away. This explanation was suggested by the actual survey of such ruins; and we know not that a better has yet been offered in any other quarter. It is certainly remarkable, that of the more mighty cities of old time, nothing but potsherds now remains visible at the surface of the ground.

Towns built with stone, or kiln-burnt bricks, do not exhibit this form of ruin, which is, therefore, not usually met with in Palestine.—J. K.

POTT, DAVID JULIUS, was born at Nettelrode, in Hanover, 10th Oct. 1760. He was successively a teacher at Göttingen, professor of theology at Helmstädt, and professor of theology and consistorial-rath at Göttingen, where he died 18th Oct. 1838. He edited one of the volumes of the *Nov. Test. Koppianum* (vol. ix., containing the epistle of James and 1 and 2 Peter). He also, along with Ruperti, edited *Sylloge Comment. Theol.*, 8 vols., Helmst. 1800-7.

POTTER. The potter, and the produce of his labours, are often alluded to in the Scriptures. The fragility of his wares, and the ease with which they are destroyed, supply apt emblems of

\* The 'house of *Asuppin*,' i. e., of collections, or treasures, was committed to their care. See Keil *in loco*.

the facility with which human life and power may be broken and destroyed. It is in this figurative use that the potter's vessels are most frequently noticed in Scripture (Ps. ii. 9; Is. xxx. 14; Jer. xix. 11; Rev. ii. 27). In one place, the power of the potter to form with his clay, by the impulse of his will and hand, vessels either for honourable or for mean uses, is employed with great force by the apostle to illustrate the absolute power of God in moulding the destinies of men according to his pleasure (Rom. ix. 21). The first distinct mention of earthenware vessels is in the case of the pitchers in which Gideon's men concealed their lamps, and which they broke in pieces when they withdrew their lamps from them (Judg. vii. 16, 19). Pitchers and bottles are indeed mentioned earlier; but the 'bottle' which contained Hagar's water (Gen. xxi. 14, 15) was undoubtedly of skin; and although Rebekah's pitcher was possibly of earthenware (Gen. xxiv. 14, 15), we cannot be certain that it was so.

The potter's wheel is mentioned only once in the Bible (Jer. xviii. 2); but it must have been in use among the Hebrews long before the time of that allusion; for we now know that it existed in Egypt before the Israelites took refuge in that

437. Modern Egyptian Potter.

country (Wilkinson, *Anc. Egypt*, iii. 165). The processes employed by the Hebrews were probably not in any way dissimilar to those of the Egyptians, from whom the use of the wheel may be supposed to have been adopted. There is the greater probability in this, as the materials, forms, and manufacture of earthenware vessels are still very similar throughout Western Asia, and are also the same which were anciently in use. This we know from the comparison of ancient paintings and sculptures with modern manufactures, as well as from the vast quantities of broken pottery which are found upon the sites of ancient cities. The ancient potters 'frequently kneaded the clay with their feet, and after it had been properly worked up, they formed it into a mass of convenient size with the hand, and placed it on the wheel, which, to judge from that represented in the paintings, was of very simple construction, and turned with the hand. The various forms of the vases were made out by the finger during the revolution; the handles, if they had any, were afterwards affixed to them; and the devices and other ornamental parts were traced with a wooden or metal instrument, previously to their being baked. They were then

suffered to dry, and for this purpose were placed on planks of wood; they were afterwards arranged with great care on trays, and carried, by means of the usual yoke, borne on men's shoulders, to the oven' (Wilkinson, *Anc. Egyptians*, iii. 163-167).—J. K.

#### POTTER'S-FIELD. [ACELDAMA.]

POUND. [MONEY; WEIGHTS AND MEASURES.]

PRÆTORIUM (Πραιτώριον). This word denotes the general's tent in the field, and also the house or palace of the governor of a province, whether a prætor or not. In the Gospels it is applied to the palace built by Herod the Great, at Jerusalem, and which eventually became the residence of the Roman governors in that city (Matt. xxvii. 27; Mark xv. 16; John xviii. 28, 33; xix. 9). In the two first of these texts it may, however, denote the court in front of the palace, where the procurator's guards were stationed [JERUSALEM]. Herod built another palace at Cæsarea, and this also is called the Prætorium in Acts xxiii. 35, probably because it had, in like manner, become the residence of the Roman governor, whose head-quarters were at Cæsarea. In Philip. i. 13, the word denotes the Prætorian camp at Rome—*i. e.*, the camp or quarters of the Prætorian cohort at Rome.

PRATENSIS, FELIX. Very little is known of this famous editor of the *editio princeps* of Bomberg's Rabbinic Bible beyond that he was born a Jew, was corrector of the press in Bomberg's famous printing-office, embraced Christianity in Rome 1513, was created Magister Theologus 1523, and that he died in 1539. The Rabbinic Bible, which immortalised him, was published in four parts, Venice 1516-17, four years after his embracing Christianity; and besides the Hebrew text contains as follows:—

i. In *the Pentateuch*, the Chaldee paraphrase of Onkelos, and the commentaries of Rashi.

ii. *The Prophets*, the Chaldee paraphrase, and the commentaries of Kimchi.

iii. *The Hagiographa*, the Chaldee paraphrase, and Kimchi's commentary on *the Psalms*, the Chaldee paraphrase and Ibn Jachja's commentary on *Proverbs*, the Chaldee paraphrase and Nachmanides and Farissol's commentaries on *Job*; the reputed Chaldee paraphrases of Joseph the Blind and Rashi's commentary on *the Five Megilloth*; Levi b. Gershom's commentary on *Daniel*; Rashi's and Simon Darshan's (פ"ה דשמעוני) commentary on *Ezra*, *Nehemiah*, and *Chronicles*, the latter consisting of excerpts from the Jalkut Shimoni [CARA; MIDRASH]. Appended to the volume are the Targum Jerusalem on the Pentateuch, the Second Targum on Esther, the variations between Ben Asher and Ben Naphtali, the differences between the Eastern and Western Codd., Aaron b. Asher's Dissertation on the Accents, Maimonides' thirteen articles of faith [MAIMONIDES], the six hundred and thirteen precepts [EDUCATION], a Table of the Parshoth and Haptharoth, both according to the Spanish and German ritual. Considering that this was the first effort to give some of the Masoretic apparatus, it is no wonder that the work is imperfect, and that it contains many blunders. Pratensis also published a Latin translation of the Psalms, with annotations, first printed at Venice 1515, then

Hazenau 1522, Basle 1526. Comp. Wolf, *Bibliotheca Hebraea*, ii. 363; iii. 935, *seq.*; Masch's ed. of Le Long's *Bibliotheca Sacra*, i. 96, *seq.*; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. b, 2111, *seq.*—C. D. G.

PRAYER (תַּחֲנִיחַ, from תָּנַח, to incline to one; Hithp. to pray, to supplicate; תַּפִּלָּה, from פָּלַל, to bow down; Piel and Hithp., to pray; LXX. usually δέσους, but frequently προσευχή).

1. The Hebrew idea of prayer was that of an invocation of God for help or blessing. The Divine Being was regarded as accessible by men (Deut. iv. 29; 1 Chron. xxviii. 9, etc.), as graciously inclined to listen to their cry (Ps. cxv. 18, 19; lxxxvi. 5-7; cii. 17; Jer. xxxiii. 3; Neh. i. 11, etc.), as able and willing to supply all their need (Ps. lvii. 2; xxxiv. 10; lxxv. 2), and as granting blessing in answer to prayer (Ps. l. 15; lvii. 2; Ezek. xxxvi. 24-37, etc.). Hence the act of prayer is sometimes called a *seeking of the Lord* (Deut. iv. 29; 1 Chron. xvi. 10; 2 Chron. xx. 3; Ps. xxxiv. 10; Is. lv. 6, etc.); an *intreating of the face of the Lord* (Exod. xxii. 11; 1 Kings xiii. 6); a *pouring out of the heart or soul before him, or before his face* (Ps. lxii. 8; 1 Sam. i. 15; Lam. ii. 19); a *crying or calling unto God* (Ps. lv. 16, 17; cxx. 1; cxlv. 18, 19; Is. lviii. 6, 7, 9, etc.); a *beseeching of God* (Exod. xxxii. 11; xxxiii. 18; Num. xii. 19; Ps. lxxx. 14, etc.); and prayer itself is called a *cry* (תַּחֲנִיחַ, δέσους, 1 Kings viii. 28; Ps. xvii. 1; lxi. 1; cxlii. 7; Jer. xi. 14: שִׁנְיָה, Ps. xxxix. 12; comp. Jer. viii. 19; 1 Sam. v. 12); a *complaint* (תַּחֲנִיחַ, δέσους, Ps. cxlii. 2); and a *roaring* (תַּחֲנִיחַ, Ps. xxii. 1). In the N. T. this idea of prayer as an approach of the soul unto God, with desire and request for help, is even more explicitly enunciated (comp. Matt. vi. 5, ff.; vii. 7, ff.; xviii. 19; xxi. 22; Luke x. 2; xviii. 1-8; John xiv. 13; xvi. 23-26; Eph. vi. 18, 19; Phil. iv. 6; Col. iv. 2, 3; 2 Thess. i. 11; 2 Thess. iii. 1, 2, 5; James i. 5-7; v. 13, 16, etc.). But in neither the O. T. nor the N. T. is any explanation given of the rationale of prayer, or any attempt made to solve the speculative difficulties by which the subject is beset.

In the progress of spiritual degeneracy, this idea of prayer perished out of the minds of the mass of the people, and for it was substituted a belief in the worth of the mere outward form as a mode of pleasing God (Tob. xii. 8, 9; Ecclus. xxviii. 2; Matt. vi. 7). With the carnal Pharisees of our Lord's time prayer was valued more as a means of securing the praise of men than as a means of obtaining blessing from God (Matt. vi. 5, ff.; Luke xi. 1, ff.; xx. 46, 47).

2. The *postures* in prayer commonly used by the Hebrews were—*standing* (1 Sam. i. 26; 1 Kings viii. 22; Luke xviii. 11), or *kneeling* (1 Kings viii. 34; 2 Chron. vi. 13; Ezra ix. 5; Dan. vi. 10; Luke xxii. 41); in both cases with the hands lifted up (Ps. xviii. 2; cxxxiv. 2; Lam. ii. 19; iii. 41; 2 Maccab. iii. 20), or spread out towards heaven (Ezra ix. 5; Is. i. 15). [ATTITUDES.] In cases of deep contrition the hands might be employed to smite on the breast (Luke xviii. 13); under the burden of anxiety or grief the head might sink on the breast (Ps. xxxv. 12), or be buried between the knees

(1 Kings xviii. 42); and even, under the influence of deep emotion, the whole body might be prostrated on the ground (Gen. xxiv. 26; Exod. xxxiv. 8; Neh. viii. 6; Judith ix. 1). The Jew prayed with his head covered—a usage still followed by the Jews even in occidental countries. In private prayer they might sometimes retire to an inner chamber (Matt. vi. 6), but they usually preferred the open air, and their favourite place was the upper chamber or flat roof of the house (Dan. vi. 11; Judith viii. 5; Tob. iii. 12; Acts i. 13; x. 9); though sometimes they sought some retired height (1 Kings xviii. 42; Matt. xiv. 23; Mark vi. 46; Luke vi. 12). Those resident in Jerusalem sought the temple for prayer (Luke xviii. 10; Acts iii. 1, comp. Is. lvi. 7); those at a distance seem to have turned in the direction of the temple (2 Chron. vi. 34; Ezra iv. 58; Dan. vi. 11); so far as might be, to look unto the holy of holies where Jehovah dwelt (Ps. v. 7).

3. As to *seasons of prayer*, nothing is prescribed in Scripture; nor in the earlier ages do there seem to have been any fixed times for prayer. David tells us that he prayed three times a day—morning, mid-day, and evening (Ps. lv. 18); and Daniel followed the same usage (vi. 10). What was probably a voluntary habit on the part of pious Jews in the earlier times, seems to have become at a later period matter of prescription; and the stated hours for prayer were the third, the sixth, and the ninth (Acts ii. 15; x. 9; iii. 1; x. 30); i.e., according to our reckoning, at nine o'clock A.M. (the hour of the morning sacrifice), twelve o'clock noon, and three o'clock P.M. (the hour of the evening sacrifice (comp. Joseph. *Antiq.* xiv. 4. 3)). The Jews were wont to offer prayer on extraordinary occasions, such as the dedication of the temple (1 Kings viii. 22); also when they were engaged or about to engage in battle (1 Chron. v. 20; 1 Maccab. v. 33; xi. 71, ff.), and generally before any important undertaking (Prov. iii. 6; xvi. 3; Ps. xxxvii. 5; Acts ix. 40; Judith xiii. 7). A thanksgiving prayer seems also to have been usually offered by them before eating or drinking (Matt. xv. 36; John vi. 11; Acts xxvii. 35).

For the synagogue service of prayer, see SYNAGOGUE. For rabbinical opinions and prescriptions, see Otho, *Lex. Rabbin. Philol.*, s.v. Preces.—W. L. A.

PRICÆUS OR PRICE, JOHN, LL.D., was a learned divine of the 17th century. He was born in London in 1600, and educated at Westminster School. Soon after completing his studies at Oxford he went over to the church of Rome. Having gone to Italy he was appointed superintendent of the museum at Florence; and afterwards held the Greek chair at Pisa. He died in St. Augustine's convent at Rome in 1676. His works are—*Commentarii in Varios Novi Testamenti libros Matth. Luc. Acta, Tim. i. et ii., Titum, Philem. Jac. Joannis Epistolas tres, etc.*; *Annotationes in Psalmorum librum*, folio, Lond. 1660. These works were first published separately. They also appeared in the *Critici Sacri*. The notes are both learned and judicious. Dr. Harwood says, 'This is a book of great character abroad; it contains many valuable observations, particularly illustrating the modes of diction which occur in the sacred classics from profane authors' (Orme's *Bib.*)—W. J. C.

PRIDEAUX, HUMPHREY, D.D., was born at Padstow in Cornwall in the year 1648, and after his education, first at Liskeard and Bodmin, and subsequently at Westminster School and Christ Church, Oxford, he became successively rector of St. Clement's, Oxford; prebendary of Norwich; rector of Bladen, Oxfordshire; vicar of Saham, Norfolk; archdeacon of Suffolk; vicar of Trowse, Norfolk; and in 1702 dean of Norwich. It is said that it was owing to ill-health alone that he was not raised to the episcopal dignity. In passing through his various offices, he published, from time to time, many well-known works, which proved him to possess great classical attainments, as well as theological knowledge and polemical divinity, and the more special acquisition of ecclesiastical law. These works would, indeed, have kept his name from oblivion; but what secures him lasting reputation is his *Connection of the Old and New Testaments, in the History of the Jews and Neighbouring Nations, from the declaration of the Kingdoms of Israel and Judah to the time of Christ*. This admirable work, notwithstanding the increased knowledge of recent discoveries in Oriental literature, is not likely to be supplanted, so thoroughly has the author illustrated his subject with all sorts of suitable learning—Greek, Latin, Hebrew, and rabbinic. It was published in two several portions, the former of which serves, in Prideaux's own words, 'as an epilogue to the Old Testament,' and the latter 'as a prologue to the New.' Considered, indeed, in this point of view, the work may well be deemed the earliest of English contributions to what the Germans call *Einleitung*, very much of its contents having passed into the *Introductions* of modern times. Of the sterling qualities of the author and of his book, in its own particular department of Biblical science, the late learned Dr. M'Caul, who was himself an accomplished scholar in that line, thus writes:—'It is an example and specimen of profound and varied reading and scholarship, and is therefore not merely a compendium of information convenient to the student, but by laying open to him the sources, the knowledge of whose existence is the first condition to becoming learned, an introduction to learning itself' (*An Account of the Rabbinic Authorities*, prefixed to Tegg's edition of the *Connection* [London 1858], vol. i. p. xxxvi.) One proof of the excellence of this great work is its frequent republication. Besides the useful edition with notes and analyses, and introduction by Dr. M'Caul and Mr. Wheeler, which we have referred to above, the work is found in a very recent edition of the Oxford University press [1851], which has often reprinted it. The eleventh edition of 1749, in four vols. 8vo, is the best of the old editions. Dean Prideaux died in the year 1724.—P. H.

PRIEST, HIGH-PRIEST, etc. (כֹּהֵן, *priest*; Sept. ἱερεύς; Vulg. sacerdos). The English word is generally derived from the N. T. term presbyter [elder], the meaning of which is, however, essentially different from that which was intended by the ancient terms. It would come nearer, if derived from προΐστημι or προϊστάμαι, 'to preside,' etc. It would then correspond to Aristotle's definition of a priest, τῶν πρὸς τοὺς θεοὺς κύριος, 'presiding over things relating to the gods' (*Polit.* iii. 14), and with the very similar one in Heb. v. 1; 'every high-priest taken from among men, is constituted

on the behalf of men, with respect to their concerns with God (τὰ πρὸς τὸν Θεόν), that he may present both gifts and sacrifices for sins.' It would then adequately represent the ἱερεὺς (ὁ ἱερεὺς ῥέζων) of the Greeks, and the sacerdos (a sacris faciundis) of the Latins. The primitive meaning of the Hebrew word is not easily determined, because the verb, in its radical form, nowhere occurs. Gesenius observes: 'In Arabic it denotes to prophesy, to foretell as a soothsayer, and among the heathen Arabs the substantive bore the latter signification; also that of a mediator or middle person who interposed in any business, which seems to be its radical meaning, as prophets and priests were regarded as mediators between men and the Deity. In the earliest families of the race of Shem, the offices of priest and prophet were undoubtedly united; so that the word originally denoted both, and at last the Hebrew idiom kept one part of the idea and the Arabic another' (*Hebräisches und Chaldäisches Handwörterbuch*, Leipz. 1823). It is worthy of remark, that all the persons who are recorded in Scripture as having legally performed priestly acts, but who were not strictly sacerdotal, come under the definition of a prophet, viz., persons who received supernatural communications of knowledge generally, as Adam, Abraham (Gen. xx. 7), Isaac, Jacob, Moses, Job, Samuel, Elijah (comp. Luke i. 70). The primary meaning of the Hebrew word is regarded by Kimchi, Castell, Giggeius, Ernesti, Simonis, Tittmann, and Eichhorn, to be the rendering of honourable and dignified service, like that of ministers of state to their sovereign. Nearly similar is the idea adopted by Cocceius and Schultens, viz., drawing near, as to a king or any supreme authority. The following definition of a priest may be found sufficiently comprehensive:—A man who officiates or transacts with God on behalf of others, statedly, or for the occasion.

It will now be attempted to trace the *Biblical origin and development* of the subject, for which purpose the inquiry will be pursued upon the plan of Townsend's *Historical and Chronological Arrangement of the Scriptures*, London 1827, notwithstanding the doubts which may be entertained respecting the true chronological order of certain books and passages. We accede to the Jewish opinion, that Adam was the first priest. The divine institution of sacrifices, immediately after the fall, seems connected with the event, that 'the Lord God made coats of skins to Adam and his wife, and clothed them' (Gen. iii. 21)—that is, with the skins of animals which had been offered in sacrifice (for the permission to eat animal food was not given till after the Deluge, comp. Gen. i. 29, ix. 3), expressive of their faith in the promise of the victorious yet suffering 'seed of the woman' (ver. 15): and judging from the known custom of his immediate descendants, we infer that Adam now also became the head and ruler of the woman (ver. 16), officiated in offering the sacrifice as well on her behalf as his own. Judging from the same analogy, it seems further probable that Adam acted in the same capacity on behalf of his sons Cain and Abel (and possibly of their children), who are each said to have 'brought' his respective offering, but not to have personally presented it (iv. 3-5). The place evidently thus indicated would seem to have been the situation of 'the cherubim' at the east of the garden of Eden (iii. 24), called

'the face' (iv. 14), and 'the presence of the Lord' (ver. 16; comp. Hebrew of Exod. xxxiv. 24; Lev. ix. 5); and from which Jehovah conferred with Cain (ver. 9): circumstances which, together with the name of their offering, מִנְחָה, which, sometimes at least, included bloody sacrifices in after times (1 Sam. ii. 17; xxvi. 19; Mal. i. 13, 14), and the appropriation of the skins to the offerer (comp. Lev. vii. 8), would seem like the rudiments of the future tabernacle and its services, and when viewed in connection with many circumstances incidentally disclosed in the brief fragmentary account of things before the Exodus, such as the Sabbath (Gen. ii. 2, 3), the distinction observed by Noah, and his burnt-offerings upon the altar of clean and unclean beasts (viii. 20), the prohibition of blood (ix. 4), tithes (xiv. 20), priestly blessing (ver. 19), consecration with oil, and vows (xxviii. 18-22), the Levirate law (xxxviii. 8), weeks (xxix. 27), distinction of the Hebrews by their families (Exod. ii. 1), the office of elder during the bondage in Egypt (iii. 16), and a place of meeting with Jehovah (v. 22; comp. xxv. 22), would favour the supposition that the Mosaic dispensation, as it is called, was but an authoritative re-arrangement of a patriarchal church instituted at the fall. The fact that Noah officiated as the priest of his family, upon the cessation of the Deluge (B. C. 2347) is clearly recorded (Gen. viii. 20), where we have an altar built, the ceremonial distinctions in the offerings already mentioned, and their propitiatory effect, 'the sweet savour,' all described in the words of Leviticus (comp. i. 9; xi. 47). These acts of Noah, which seem like the resumption rather than the institution of an ordinance, were doubtless continued by his sons and their descendants, as *heads of their respective families*. Following our arrangement, the next glimpse of the subject is afforded by the instance of Job (B. C. 2130), who 'sent and sanctified his children' after a feast

they had held, and offered burnt-offerings, עֹלֹת, 'according to the number of them all,' and 'who did this continually,' either constantly or after every feast (i. 5). A direct reference, possibly to priests, is lost in our translation of xii. 19, 'he leadeth *princes* away spoiled,' כְּהֹנִים; Sept. *lepr̄is*; Vulg. *sacerdotes*; a sense adopted in Dr. Lee's *Translation*, London 1837. May not the difficult passage, xxxiii. 23, contain an allusion to priestly duties? A case is there supposed of a person divinely chastised in order to improve him (xix. 22); 'If then there be a messenger with him,' מַלְאָךְ, which means priest (Eccles. v. 6;

Mal. ii. 7), 'an interpreter,' מְלִיץ, or mediator generally (2 Chron. xxxii. 31; Is. xliii. 27); 'one among a thousand,' or of a family (Judg. vi. 15), 'my family,' literally 'my thousand' (comp. Num. i. 16), 'to show to man his uprightness,' or rather 'duty' (Prov. xiv. 2), part of the priest's office *in such a case* (Mal. ii. 7; comp. Deut. xxiv. 8), then such an individual 'is gracious,' or rather will supplicate for him, and *saith*, 'Deliver him from going down into the pit,' or grave, for 'I have found a ransom,' a cause or ground in him for favourable treatment—namely, the penitence of the sufferer, who consequently recovers (xxv. 29). The case of Abraham and Abimelech is very similar (Gen. xx. 3-17), as also that of Job himself and his three misjudging friends, whom the Lord commands to avert chastisement from themselves by

taking to him bullocks and rams, which he was to offer for them as a burnt-offering, and to *pray* for them (xlii. 8). The instance of Abram occurs next in historical order, who, upon his first entrance into Canaan, attended by his family (B. C. 1921), 'built an altar, and called upon the name of the Lord' (Gen. xii. 7, 8). Upon returning victorious from the battle of the kings, he is congratulated by Melchizedek, the Canaanitish king of Salem, and 'priest of the most high God' (xiv. 18). For the ancient union of the royal and sacerdotal offices, in Egypt and other countries, see Wilkinson's *Manners and Customs of the Ancient Egyptians*, Lond. 1842, i. 245. Abram next appears entering into covenant with God as the head and representative of his seed; on which occasion those creatures only are slain which were appointed for sacrifice under the law (xv. 9-21). Isaac builds an altar (B. C. 1804), evidently as the head of his family (Gen. xxvi. 25); his younger son Jacob offers a sacrifice, זָבַח (xxxi. 54), and 'calls his brethren to eat of it' (comp. Lev. vii. 15); builds an altar at Shalem (xxxiii. 20), makes another by *divine command*, and, evidently as the head of his household, at Bethel (xxxv. 1-7), and pours a drink-offering, נֹסֵךְ (comp. Num. xv. 7, etc.), upon a pillar (ver. 14). Such was the state of the institution we are considering during the patriarchal times. *It henceforth becomes connected with Egypt, and materially modified in consequence.* The marriage of Joseph (B. C. 1715) incidentally discloses the existence of priests in that country; for it is recorded that 'Pharaoh gave Joseph to wife a daughter of Potipherah, priest of On' (xli. 45). The priests of Egypt had evidently been endowed with lands by the Egyptian kings; for when the reigning Pharaoh, by the advice of Joseph, took all the land of the Egyptians in lieu of corn (xlvii. 20), the priests were not compelled to make the same sacrifice of theirs (ver. 22); nor was the tax of the fifth part of the produce entailed upon it (ver. 26), as on that of the other people (ver. 24). They seem also to have had a public maintenance besides (ver. 22; Herod. ii. 37). It may be serviceable, in the sequel, if we advert at this point to some of the numerous and truly important points of resemblance between the Egyptian and Jewish priests—viz., that the sacerdotal order constituted one of the four principal casts, of the highest rank, next to the king, and from whom were chosen his confidential and responsible advisers (comp. 2 Sam. viii. 18; 1 Chron. xviii. 17; Is. xix. 11; Diodorus, i. 73); they associated with the monarch, whom they assisted in the performance of his public duties, to whom they explained from the sacred books those lessons which were laid down for his conduct. Each deity had *several priests* and a *high-priest* (Herod. ii. 37); the latter, of whatever deity, held the first and most honourable station. The minor priests were divided into various grades, having distinct offices, as well as the scribes and priests of the kings. The same office usually descended from father to son, but was sometimes changed. They enjoyed important privileges, which extended to their whole family. They were exempt from taxes. Wine was allowed to them only in the strictest moderation, and entire abstinence from it was required during the fasts, which were frequent (Plut., *De Isid.*, sec. 6). Each grade of the priests was distinguished by its peculiar cos-

tume. The high-priest, who, among other official duties, anointed the king, wore a mantle made of an entire leopard-skin; as did the king when engaged in priestly duties. The under-dresses of priests, of all orders, were made of linen, and they were not allowed to wear woollen in a temple (Herod., ii. 81). The undeniable similarity between the dresses of the Egyptian and Jewish priests will be hereafter illustrated. Besides their religious duties, the priests fulfilled the offices of judges, legislators, and counsellors of the king; and the laws, forming part of their sacred books, could only be administered by members of that order (Wilkinson, i. 237, 257-282).

In returning to the Biblical history, we next find Jethro, priest of Midian, the father-in-law of Moses, possibly a priest of the true God (Exod. iii. 1), and probably his father in the same capacity (ii. 16). In Exod. v. 1, 3, the whole nation of the Israelites is represented as wishing to sacrifice and to hold a feast to the Lord. The first step, though *very* remote, towards the formation of the Mosaic system of priesthood, was the consecration of the first-born, in memory of the destruction of the first-born of Egypt (xiii. 2, 14-16); for, instead of these, God afterwards took the Levites to attend upon him (Num. iii. 12). As to the popular idea, both among Jews and Christians, that the right of priesthood was thus transferred from the first-born generally to the tribe of Levi, or rather to one family of that tribe, we consider, with Patrick, that it is utterly groundless (*Commentary on Exod.* xix. 22; Num. iii. 12; see Campegi. Vitringa, *Observ. Sacrae*, ii. 33; Outram, *De Sacrificiis*, i. 4). The substance of the objection is, that Aaron and his sons were consecrated *before* the exchange of the Levites for the first-born, that the Levites were *afterwards* given to minister unto them, but had nothing to do with the priesthood, and that the peculiar right of God in the first-born originated in the Exodus. The last altar, before the giving of the law, was built by Moses, probably for a memorial purpose only (xvii. 15; comp. Josh. xxii. 26, 27). At this period the office of priest was so well understood, and so highly valued, that Jehovah promises, as an inducement to the Israelites to keep his covenant, that they should be to him 'a kingdom of priests' (xix. 6), which, among other honourable appellations and distinctions originally belonging to the Jews, is transferred to Christians (1 Pet. ii. 9). The first introduction of the word *priests*, in this part of the history, is truly remarkable. It occurs just previous to the giving of the law (B.C. 1491), when, as part of the cautions against the too eager curiosity of the people, lest they should 'break through unto the Lord and gaze' (Exod. xix. 21), it is added, 'and let the priests which come near unto the Lord sanctify themselves, lest the Lord break through upon them' (ver. 22). Here, then, priests are incontestably spoken of as an already existing order, which was now about to be remodified. Nor is this the last reference to these ante-Sinaitic priests. Selden observes that the phrases 'the priests the Levites' (Deut. xvii. 9), and 'the priests the sons of Levi' (xxi. 5), and even the phrase, 'the Levites alone' (xviii. 6, comp. 1), are used to include all others who had been priests before God took the sons of Aaron peculiarly to serve him in this office (*De Synedr.* ii. 8, pp. 2, 3). Aaron is summoned at this juncture to go up with Moses unto the Lord

on Mount Sinai (Exod. xix. 24). Another remarkable circumstance is then recorded. Moses, now acting as 'mediator,' and endowed with an extraordinary commission, builds an altar under the hill, and sends 'young men of the children of Israel, who offered burnt-offerings, and sacrificed peace-offerings of oxen unto the Lord' (xxiv. 5). Various interpretations are given to the phrase 'young men'; but, upon a view of all the circumstances, we incline to think that they were young *laymen*, purposely selected by Moses for this act, in order to form a complete break between the former priesthood and the new, and that the recommencement and re-arrangement of the priesthood under divine authority might be made more palpably distinct. In the same light we consider the many priestly acts performed by Moses himself, at this particular time, as in ch. xxix. 25; xl. 25, 27, 29; like those of Gideon, Judg. vi. 25-27; of Samuel, 1 Sam. vii. 9; of David, 1 Chron. xxi. 26. Yet these especial permissions, upon emergencies and extraordinary occasions, had their limits, as may be seen in the fate of 'the men of Bethshemesh,' 1 Sam. vi. 19; and of Uzzah, 2 Sam. vi. 7.

The designation and call of Aaron and his sons to the priesthood are commanded in Exod. xxviii. 1, and holy garments to be made for Aaron, 'for glory and for beauty' (ver. 2), and for his sons (ver. 40), by persons originally skilful, and now also inspired for the purpose (ver. 3), the chief of whom were Bezaleel and Aholiab (xxx. 2-6). As there were some garments common both to the priests and the high-priest, we shall begin with those of the former, taking them in the order in which they would be put on. 1. The first was כִּנְדָּשִׁי בָר, 'linen breeches,' or drawers (xxviii. 42; Sept. περισκελῆ λινά; Vulg. *feminalia linea*). These were to be of fine twined linen, and to reach from the loins to the middle of the thighs. According to Josephus—whose testimony, however, of course,

438. Drawers and Girdle.

relates only to his own time—they reached only to the middle of the thigh, where they were tied fast (*Antiq.* iii. 7. 1). Such drawers were worn universally in Egypt. In the sculptures and paintings of that country, the figures of workmen and servants have no other dress than a short kilt or apron, sometimes simply bound about the loins and lapping over in front; other figures have short loose

drawers; while a third variety of this article, fitting closely and extending to the knees, appears in the figures of some idols, as in No. 438. This last sort of drawers seems to have been peculiar in Egypt to the gods and to the priests, whose attire was often adapted to that of the idols on which they attended. The priests, in common with other persons of the upper classes, wore the drawers under other robes. No mention occurs of the use of drawers by any other class of persons in Israel except the priests, on whom it was enjoined for the sake of decency. 2. The coat of fine linen or cotton, כתנת שש (Exod. xxxix. 27), *tunica byssina*. This was worn by men in general (Gen. xxxvii. 3); also by women (2 Sam. xiii. 18; Cant. v. 3), next to the skin. It was to be of woven work. Josephus states that it reached down to the feet, and sat close to the body, and had sleeves, which were tied fast to the arms, and was girded to the breast a little above the elbows by a girdle. It had a narrow aperture about the neck, and was tied with certain strings hanging down from the edge over the breast and back, and was fastened above each shoulder (*Antiq.* iii. 7. 2). But this garment, in the case of the priests and high-priest, was to be brodered (xxviii. 4), כתנת תשבץ, 'a brodered coat,' by which Gesenius understands a coat of cloth worked in checkers or cells. Braunius compares it to the reticulum in the stomach of ruminant animals (*De Vestitu*, i. 17). The Sept. gives χιτων κοσμηβωρος, which seems to refer to the tassels or strings; Vulg. *linea stricta*, which seems to refer to its close fitting. 3. The girdle, אבנט (xxviii. 40); Sept. ζώνη; Vulg. *baltus*. This was also worn by magistrates (Is. xxii. 21). The girdle for the priests was to be made of fine twined linen, and blue, and purple, and scarlet, of needlework (xxxix. 29). Josephus describes it as often going round, four fingers broad, but so loosely woven that it might be taken for the skin of a serpent; and that it was embroidered with flowers of scarlet, and purple, and blue, but that the warp was nothing but linen. The beginning of its circumvolution was at the breast; and when it had gone often round, it was there tied, and hung loosely down to the ankles while the priest was not engaged in any laborious service, for in that position it appeared in the most agreeable manner to the spectators; but when he was obliged to assist at the offering of sacrifices, and to do the appointed service, in order that he might not be hindered in his operations by its motion, he threw it to the left hand, and bore it on his right shoulder (*Antiq.* iii. 7. 2). The mode of its hanging down is illustrated by the cut No. 441, where the girdle is also richly embroidered; while the imbricated appearance of the girdle, רקם מעשה, may be seen very plainly in No. 438. The next cut, No. 439, of a priestly scribe of ancient Egypt, offers an interesting specimen of both tunic and girdle. Other Egyptian girdles may be seen under ABNET. 4. The bonnet, cap, or turban, מנבעה (xxviii. 40); Sept. κίδαρις; Vulg. *tiara*. The bonnet was to be of fine linen (xxxix. 28). In the time of Josephus it was circular, covering about half the head, something like a crown, made of thick linen swathes doubled round many times, and sewed together, surrounded by a linen cover to hide the seams of the swathes, and sat so close that it would not fall off when the body was bent down (*Antiq.* iii. 7. 3). The dress of the high-priest was precisely the same with that of the common priests in all the foregoing parti-

culars, in addition to which he had (1) a robe, מעיל (xxviii. 4), ποδήρη, *tunica*. This was not a mantle, but a second and larger coat without sleeves; a kind of surtout worn by the laity, especially persons

439. Girdle and Tunic.

of distinction (Job i. 20; ii. 12), by kings (1 Sam. xv. 27; xviii. 4; xxiv. 5, 12). This garment, when intended for the high-priest, and then called אה מעיל האפד, 'the robe of the ephod,' was to be of one entire piece of woven work, all of blue, with an aperture for the neck in the middle of the upper part, having its rim strengthened and adorned with a border. The hem had a kind of fringe, composed of tassels, made of blue, purple, and scarlet, in the form of pomegranates; and between every two pomegranates there was a small golden bell, so

440. Egyptian Tunic.

that there was a bell and a pomegranate alternately all round (xxviii. 31-35). The use of these bells may have partly been, that by the high-priest shaking his garment at the time of his offering incense on the great day of expiation, etc., the people without might be apprised of it, and unite their prayers with it (comp. Eccles. xlv. 9; Luke i. 10; Acts x. 4; Rev. viii. 3, 4). Josephus describes this robe of the ephod as reaching to the feet, and consisting of one entire piece of woven work, and

parted where the hands came out (John xix. 23). He also states that it was tied round with a girdle, embroidered with the same colours as the former, with a mixture of gold interwoven (*Antiq.* iii. 7. 4). It is highly probable that this garment was also derived from Egyptian usage. There are instances at Thebes of priests wearing over the coat a loose sleeveless robe, and which exposes the sleeves of the inner tunic. The fringe of bells and pomegranates seems to have been the priestly substitute for the fringe bound with a blue riband, which all the Israelites were commanded to wear. Many traces of this fringe occur in the Egyptian remains. The use assigned to it, 'that looking on this fringe they should remember the Lord's commandments,' seems best explicable by the supposition that the Egyptians had connected some superstitious ideas with it (*Num.* xv. 37-40). (2) The ephod, **עֶפֹד**, *épōuls*, *superhumeral* (*Exod.* xxviii. 4). This was a short cloak covering the shoulders and breast.

441. Ephod and Girdle.

It is said to have been worn by Samuel while a youth ministering before the Lord (1 Sam. ii. 18); by David while engaged in religious service (2 Sam. vi. 14); and by inferior priests (1 Sam. xxii. 18). But in all these instances it is distinguished as a linen ephod, and was not a sacred but honorary vestment, as the Sept. understands it in 2 Sam. vi. 14, *στολήν ἔξαλλον*; but the ephod of the high-priest was to be made of gold, of blue, of purple, of scarlet, and fine twined linen, with cunning work, **הָיָה**. Though it probably consisted of one piece, woven throughout, it had a back part and a front part, united by shoulder-pieces. It had also a girdle; or rather strings went out from each side and tied it to the body. On the top of each shoulder was to be an onyx stone, set in sockets of gold, each having engraved upon it six of the names of the children of Israel, according to the precedence of birth, to memorialise the Lord of the promises made to them (*Exod.* xxviii. 6-12, 29). Josephus gives sleeves to the ephod (*Antiq.* iii. 7. 5). It may be considered as a substitute for the leopard-skin worn by the Egyptian high-priests in their most sacred duties, as in No. 441, where the ephod appears no less plainly. In other figures of Egyptian priests, the shoulder-pieces are equally apparent. They are even perceptible in No. 439. The Egyptian

ephod is, however, highly charged with all sorts of idolatrous figures and emblems, and even with scenes of human sacrifices. The Sept. rendering of **עֶפֹד**, 'cunning work,' is *ἐργον ὑφαντὸν ποιητοῦ*, 'woven-work of the embroiderer,' a word which especially denotes a manufacturer of tissues adorned with figures of animals (Strabo, xvii., p. 547, Sieb.) Then came (3) the breastplate, **חֹשֶׁן**, *peristhḗthion*; Vulg. *rationale*: a gorget, ten inches square, made of the same sort of cloth as the ephod, and doubled so as to form a kind of pouch or bag (*Exod.* xxxix. 9), in which was to be put the URIM and THUMMIM, which are also mentioned as if already known (xxviii. 30). The external part of this gorget was set with four rows of precious stones: the first row, a sardius, a topaz, and a carbuncle; the second, an emerald, a sapphire, and a diamond; the third, a figure, an agate, and an amethyst; and the fourth, a beryl, an onyx, and a jasper—set in a golden socket. Upon each of these stones was to be engraved the name of one of the sons of Jacob. In the ephod, in which there was a space left open sufficiently large for the admission of this pectoral, were four rings of gold, to which four others at the four corners of the breastplate corresponded; the two lower rings of the latter being fixed inside. It was confined to the ephod by means of dark blue ribands, which passed through these rings; and it was also suspended from the onyx stones on the shoulder by chains of gold, or rather cords of twisted gold threads, which were fastened at one end to two other larger rings fixed in the upper corners of the pectoral, and by the other end going round the onyx stones on the shoulders, and returning and being fixed in the larger ring. The breastplate was further kept in its place by a girdle, made of the same stuff, which Josephus says was sewed to the breastplate, and which, when it had

442. Breastplate.

gone once round, was tied again upon the seam and hung down. It appears in No. 444. Here is another adaptation and correction of the costume of the higher Egyptian priests, who wore a large splendid ornament upon the breast, often a winged scarabaeus, the emblem of the sun, as in the cut No. 442, which exhibits the connecting ring and chain to fasten it to the girdle. 4. The remaining portion of dress peculiar to the high-priest was the mitre, **כִּטְמֹנֶת**, *kīdapis*, *cidaris* (xxviii. 4). The

Bible says nothing of the difference between this and the turban of the common priests. It is, however, called by a different name. It was to be of fine linen (ver. 39). Josephus says it was the same in construction and figure with that of the common priest, but that above it there was another, with swathes of blue, embroidered, and round it was a golden crown, polished, of three rows, one above another, out of which rose a cup of gold, which resembled the calyx of the herb called by Greek botanists *hyoscyamus*. He ends a most laboured description by comparing the shape of it to a poppy (iii. 7. 6). Upon comparing his account of the bonnet of the priests with the mitre of the high-priests, it would appear that the latter was conical. The cut, No. 443, presents the principal forms of the mitres worn by the ancient priests of Egypt, and affords a substantial resemblance of that prescribed to the Jews, divested of idolatrous symbols, but which were displaced to make way for a simple plate of gold, bearing the inscription, 'Holiness to Jehovah.' This *ῥάβδος*, *πέραλον*, *lamina*, extended from one ear to the other, being bound to the forehead by strings tied behind, and further secured in its position by a blue riband attached to the mitre (Exod. xxviii. 36-39; xxxix. 30; Lev. viii. 9). Josephus says this plate was preserved to his own day (*Antiq.* viii. 3-8; see Reland, *De Spol. Templi*, p. 132). Such was the dress of the high-priest :

443. Egyptian Mitres.

see a description of its magnificence in corresponding terms in Eccles. i. 5-16. Josephus had an idea of the symbolical import of the several parts of it. He says, that being made of linen signified the earth; the blue denoted the sky, being like lightning in its pomegranates, and in the noise of its bells resembling thunder. The ephod showed that God had made the universe of four elements, the gold relating to the splendour by which all things are enlightened. The breastplate in the middle of the ephod resembled the earth, which has the middle place of the world. The girdle signified the sea, which goes round the world. The sardonyxes declare the sun and moon. The twelve stones are the twelve months or signs of the zodiac. The mitre is heaven, because blue (iii. 7. 7). He appears, however, to have had two explanations of some things, one for the Gentiles and another for the Jews. Thus, in this section he tells his Gentile readers that the seven lamps upon the golden candlesticks referred to the seven planets; but to the Jews he represents them as an emblem of the seven days of the week (*De Bell. Jud.* vii.

5. 5; Whiston's notes *in loc.*) The magnificent dress of the high-priest was not always worn by him. It was exchanged for one wholly of linen, and therefore white, though of similar construction, when on the day of expiation he entered into the Holy of Holies (Lev. xvi. 4, 23); and neither he nor the common priests wore their appropriate dress except when officiating. It was for this reason, according to some, that Paul, who had been long absent from Jerusalem, did not know that Ananias was the high-priest (Acts xxiii. 5). In Ezek. xlii. 14; xlv. 17-19, there are directions that the priests should take off their garments when they had ministered, and lay them up in the holy chambers, and put on other garments; but these directions occur in a visionary representation of a temple, which all agree has never been realised, the particulars of which, though sometimes derived from known customs, yet at other times differ from them widely. The garments of the inferior priests appear to have been kept in the sacred treasury (Ezra ii. 69; Neh. vii. 70).

The next incident in the history is, that Moses receives a command to consecrate Aaron and his sons to the priests' office (Exod. xxviii. 41), with the following ceremonies. They were to be washed at the door of the tabernacle of the congregation (xxix. 4), where the altar of burnt-offering stood (xl. 6, 29). Aaron was then robed in his pontifical garments (vers. 4-6), and anointed with a profusion of oil (ver. 7); whence he was called 'the priest that is anointed' (Lev. iv. 3, etc.; Ps. cxxxiii. 2). This last act was the peculiar and only distinguishing part of Aaron's consecration; for the anointing of his sons (xxx. 30) relates only to the unction (xxix. 31), by a mixture made of the blood of the sacrifice and of the anointing oil, which was sprinkled upon both Aaron and his sons, and upon their garments, as part of their consecration. Hence then Aaron received two unctions. In after times the high-priest took an oath (Heb. vii. 21) to bind him, as the Jews say, to a strict adherence to established customs (*Mishna*, tit. *Yoma*, i. 5). The other details of this ceremony of consecration are all contained in one chapter (Exod. xxix.), to which we must be content to refer the reader. The entire ceremony lasted seven days, on each of which all the sacrifices were repeated (Lev. viii. 33), to which a promise was added, that God would sanctify Aaron and his sons—that is, declare them to be sanctified, which he did, by the appearance of his glory at their first sacrifice, and by the fire which descended and consumed their burnt-offerings (Lev. ix. 23, 24). Thus were Aaron and his sons and their descendants separated for ever, to the office of the priesthood, from all other Israelites. There was consequently no need of any further consecration for them or their descendants. The first-born son of Aaron succeeded him in the office, and the elder son among all his descendants; a rule which, though deviated from in after times, was ultimately resumed. The next successor was to be anointed and consecrated in his father's holy garments (ver. 29), which he must wear seven days when he went into the tabernacle of the congregation to minister (ver. 30; comp. Num. xx. 26-28; xxxv. 25), and make an atonement for all things and persons (Lev. xvi. 32-34), and for himself (comp. ver. 11), besides the offering (vi. 20-22). The common priests were required to prove their descent from Aaron. No age was

prescribed for their entrance on their ministry, or retirement from it.

We shall now give a summary of the *duties and emoluments* of the high-priest and common priests respectively. Besides his lineal descent from Aaron, the high-priest was required to be free from every

444. High-priest.

bodily blemish or defect (Lev. xxi. 16-23); but though thus incapacitated, yet, his other qualifications being sufficient, he might eat of the food appropriated to the priests (ver. 22). He must not marry a widow, nor a divorced woman, or profane, or that had been a harlot, but a virgin Israelitess (ver. 14). In Ezekiel's vision a general permission is given to the priests to marry a priest's widow (xlv. 22). The high-priest might not observe the external signs of mourning for any person, or leave the sanctuary upon receiving intelligence of the death of even father or mother (ver. 10-12; comp. x. 7). Public calamities seem to have been an exception, for Joacim the high-priest and the priests in such circumstances ministered in sackcloth with ashes on their mitres (Judith iv. 14, 15; comp. Joel i. 13). He must not eat anything that died of itself, or was torn of beasts (Lev. xxii. 8); must wash his hands and feet when he went into the tabernacle of the congregation, and when he came near to the altar to minister (Exod. xxx. 19-21). At first Aaron was to burn incense on the golden altar every morning when he dressed the lamps, and every evening when he lighted them, but in later times the common priest performed this duty (Luke i. 8, 9); to offer, as the Jews understand it, daily, morning and evening, the peculiar meat-offering he offered on the day of his consecration (Exod. xxix.); to perform the ceremonies of the great day of expiation (Lev. xvi.); to arrange the shew-bread every Sabbath, and to eat it in the holy place (xxiv. 9); must abstain from the holy things during his uncleanness (xxii. 1-3); also if he became leprous, or contracted uncleanness (ver. 4-7). If he committed a sin of ignorance he must offer a sin-offering for it (iv. 15, 16); and so for the people

(ver. 12-22); was to eat the remainder of the people's meat-offerings with the inferior priests in the holy place (vi. 16); to judge of the leprosy in the human body or garments (xiii. 2-59); to adjudicate legal questions (Deut. xvii. 12). Indeed when there was no divinely-inspired judge, the high-priest was the supreme ruler till the time of David, and again after the captivity. He must be present at the appointment of a new ruler or leader (Num. xxvii. 19), and ask counsel of the Lord for the ruler (ver. 21). Eleazar with others distributes the spoils taken from the Midianites (Num. xxxi. 21, 26). To the high-priest also belonged the appointment of a maintenance from the funds of the sanctuary to an incapacitated priest (1 Sam. ii. 36, margin). Besides these duties, peculiar to himself, he had others in common with the inferior priests. Thus, when the camp set forward, 'Aaron and his sons' were to take the tabernacle to pieces, to cover the various portions of it in cloths of various colours (iv. 5-15), and to appoint the Levites to their services in carrying them; to bless the people in the form prescribed (vi. 23-27), to be responsible for all official errors and negligences (xviii. 1), and to have the general charge of the sanctuary (ver. 5).

*Emoluments of the High-priest.*—Neither the high-priest nor common priests received 'any inheritance' at the distribution of Canaan among the several tribes (Num. xviii. 20; Deut. xviii. 1, 2), but were maintained, with their families, upon certain fees, dues, perquisites, etc., arising from the public services, which they enjoyed as a common fund. Perhaps the only distinct prerogative of the high-priest was a tenth part of the tithes assigned to the Levites (Num. xviii. 28; comp. Neh. x. 38); but Josephus represents this also as a common fund (*Antiq.* iv. 4. 4).

*Duties of the Priests.*—Besides those duties already mentioned as common to them and the high-priests, they were required to prove their descent from Aaron, to be free from all bodily defect or blemish (Lev. xxi. 16-23); must not observe mourning, except for near relatives (xxi. 1-5); must not marry a woman that had been a harlot, or divorced, or profane. The priest's daughter who committed whoredom was to be burnt, as profaning her father (xxi. 9). The priests were to have the charge of the sanctuary and altar (Num. xviii. 5). The fire upon the altar being once kindled (Lev. i. 7), the priests were always to keep it burning (vi. 13). In later times, and upon extraordinary occasions, at least, they slayed the burnt-offerings (2 Chron. xxix. 34), and killed the Passover (Ezra vi. 20). They were to receive the blood of the burnt-offerings in basins (Exod. xxiv. 6), and sprinkle it round about the altar, arrange the wood and the fire, and to burn the parts of the sacrifices (Lev. i. 5-10). If the burnt-sacrifice were of doves, the priest was to nip off the head with his finger-nail, squeeze out the blood on the edge of the altar, pluck off the feathers, and throw them with the crop into the ash-pit, divide it down the wings, and then completely burn it (ver. 15-17). He was to offer a lamb every morning and evening (Num. xxviii. 3), and a double number on the Sabbath (ver. 9), the burnt-offerings ordered at the beginning of months (ver. 11), and the same on the feast of unleavened bread (ver. 19), and on the day of the first-fruits (ver. 26); to receive the meat-offering of the offerer, bring it to the altar, take of

it a memorial, and burn it upon the altar (Lev. ii.) ; to sprinkle the blood of the peace-offerings upon the altar round about, and then to offer of it a burnt-offering (iii.) ; to offer the sin-offering for a sin of ignorance in a ruler or any of the common people (iv. 22-25) ; to eat the sin-offering in the holy place (vi. 26 ; comp. x. 16-18) ; to offer the trespass-offering (ver. 6-19 ; vi. 6, 7), to sprinkle its blood round about the altar (vii. 2), to eat of it, etc. (ver. 6) ; to eat of the shew-bread in the holy place (xxiv. 9) ; to offer for the purification of women after child-birth (xii. 6, 7) ; to judge of the leprosy in the human body or garments ; to decide when the leper was cleansed, and to order a sacrifice for him (xiv. 3, 4) ; to administer the rites used at pronouncing him clean (ver. 6, 7) ; to present him and his offering before the Lord, and to make an atonement for him (ver. 10-32) ; to judge of the leprosy in a house (xiv. 33-47), to decide when it was clean (ver. 48), and to make an atonement for it (ver. 49-53) ; to make an atonement for men cleansed from an issue of uncleanness (xv. 14, 15), and for women (ver. 29, 30) ; to offer the sheaf of first-fruits (xxiii. 10, 11) ; to estimate the commutation in money for persons in cases of a singular or extraordinary vow (xxvii. 8), or for any devoted unclean beast (ver. 11, 12), or for a house (ver. 14), or field (xviii. 23) ; to conduct the ordeal of the bitter water (Num. v. 12-31) [JEALOUSY, WATER OF] ; to make an atonement for a Nazarite who had accidentally contracted uncleanness (vi. 13) ; to offer his offering when the days of his separation were fulfilled (ver. 14, 16) ; to blow with the silver trumpets on all occasions appointed (vi. 13-17), and ultimately at morning and evening service (1 Chron. xvi. 6) ; to make an atonement for the people and individuals in case of erroneous worship (Num. xv. 15, 24, 25, 27) (see Outram, *de Sacrificiis*, i. 14. 2) ; to make the ointment of spices (1 Chron. ix. 30) ; to prepare the water of separation (Num. xix. 1-11) ; to act as assessors in judicial proceedings (Deut. xvii. 9 ; xix. 7) ; to encourage the army when going to battle, and probably to furnish the officers with the speech (xx. 1-4) ; to superintend the expiation of an uncertain murder (xxi. 5), and to have charge of the law (xxx. 9).

The *emoluments of the priests* were as follows :—1. Those which they might eat only at the sanctuary ; viz., the flesh of the sin-offering (Lev. vi. 25, 26), and of the trespass-offering (vii. 1, 6) ; the peace-offerings of the congregation at Pentecost (xxiii. 19, 20) ; the remainder of the omer or sheaf of the first-fruits of barley-harvest (ver. 10), and the loaves offered at wheat-harvest (ver. 17) ; the shew-bread (xxiv. 9) ; the remainder of the leper's log of oil (xiv. 10, etc.) ; the remnants of the meat-offerings (vi. 16). 2. Those which might be eaten only in the camp in the first instance, and afterwards in Jerusalem—viz., the breast and right shoulder of the peace-offerings (vii. 31, 34) ; the heave-offering of the sacrifice of thanksgiving (ver. 12-14) ; the heave-offering of the Nazarite's ram (Num. vi. 17, 20) ; the firstling of every clean beast (xviii. 15) ; whatsoever was first ripe in the land (ver. 13). 3. Those due to them only from inhabitants of the land—viz., the first-fruits of oil, wine, wheat (ver. 12) ; a cake of the first dough made of any kind of grain (xv. 20) ; the first fleece (Deut. xviii. 4). 4. Those due to them everywhere within and

without the land—viz., the shoulder, two cheeks and maw, of an ox or sheep, offered in sacrifice (ver. 3) ; the redemption of man and of unclean beasts (Num. xviii. 15) ; of the firstling of an ass (Exod. xxiv. 20) ; the restitution in cases of injury or fraud when it could not be made to the injured party or his kinsman (Num. v. 8) ; all devoted things. 5. The skins of the burnt-offerings (Lev. vii. 8), which Philo calls a very rich perquisite (*De Sacerd. Honor.*, p. 833, ed. 1640). Many of these dues were paid in money. The priests might also incidentally possess lands (1 Kings ii. 26 ; Jer. xxxii. 7, 8) ; and they most likely shared in occasional donations and dedications (Num. xxxi. 25-29, 50-54 ; 2 Sam. viii. 11, 12 ; 1 Chron. xxvi. 27, 28). Their revenues were probably more extensive than they appear, owing to the ambiguity with which the term Levite is often used. If the regular and ascertained incomes of the priests seem large, amounting, as it has been computed, to one-fifth of the income of a Jew (comp. Gen. xlvii. 24), it must be considered that their known duties were multifarious and often difficult. Michaelis calls them 'the literati of all the faculties.' The next event in the history of the subject is the *public consecration* of Aaron and his sons (B.C. 1490), according to the preceding regulations (Lev. viii.) At their first sacerdotal performances (ix.) the Divine approbation was intimated by a supernatural fire which consumed their burnt-offering (ver. 24). The general satisfaction of the people with these events was, however, soon dashed by the miraculous destruction of the two elder sons of Aaron, Nadab and Abihu, for offering strange fire (x. 1), probably under the influence of too much wine, since the prohibition of it to the priests when about to enter the tabernacle seems to have originated in this event (ver. 9). Moses forbade Aaron and his sons to uncover their heads, or to rend their clothes on this occasion ; but the whole house of Israel were permitted to bewail the visitation (ver. 6). The inward grief, however, of Eleazar and Ithamar caused an irregularity in their sacerdotal duties, which was forgiven on account of the occasion (ver. 16-20). Aaron now appears associated with Moses and the leading men of the several tribes in taking the national census (Num. i. 3, etc.), and on other grand state occasions (xxvi. 2, 3 ; xxxi. 13-26 ; xxxii. 2 ; xxxiv. 17). The high-priest appears ever after as a person of the highest consequence. The dignity of the priesthood soon excited the emulation of the ambitious ; hence the penalty of death was denounced against the assumption of it by any one not belonging to the Aaronic family (ver. 10), and which was soon after miraculously inflicted upon Korah, Dathan, and Abiram for this crime (xvi. 40). Its restriction to that family was further demonstrated by the blossoming of Aaron's rod (xvii. 5, 8 ; comp. xxviii. 5-7). The death of Aaron (B.C. 1452) introduces the installation of his successor, which appears to have simply consisted in arraying him in his father's pontifical garments (xx. 28). Thus also Jonathan the Asmonæan contented himself with putting on the high-priest's habit, in order to take possession of the dignity (1 Maccab. x. 21 ; comp. Josephus, *Antiq.* xiii. 2. 3). The high esteem in which the priesthood was held may be gathered from the fact that it was promised in perpetuity to Phinehas and his family as a reward for his zeal (xxv. 13). At the

entrance into Canaan the priests appear bearing the ark of the Lord, at the command of Joshua (iii. 6), though this was ordinarily the duty of the Levites. It was carried by the priests on other grand occasions (2 Chron. v. 4, 5, 7). At the distribution of the land the priests received thirteen cities out of the tribes of Judah, Simeon, and Benjamin (xxi. 4). The *first idolatrous priest in Israel* was a man consecrated by his own father to officiate in his own house (B.C. 1413); he also afterwards consecrated a Levite to the office (Judg. xvii. 5-13). This act seems like a return to the ancient rites of Syria (ver. 5; comp. x. 6; Gen. xxxi. 19, 30; Hosea iii. 4). This Levite became afterwards the idolatrous priest of the whole tribe of Dan (Judg. xviii. 19), and his successors long held the like office in that tribe (ver. 30). The abuse of the sacerdotal office in Shiloh is evinced by the history of Eli the high-priest, and his two sons, Hophni and Phinehas (B.C. 1156). According to Josephus, Eli was not of the posterity of Eleazar, the first-born son of Aaron, but of the family of Ithamar; and Solomon took the office of high-priest away from Abiathar, a descendant of Ithamar, and conferred it upon Zadok, who descended from Eleazar (1 Kings ii. 26, 27; *Antiq.* v. 11. 5; viii. 1. 3). The sons of Eli introduced a new exaction from the peace-offering, of so much as a flesh-hook with three teeth brought up; for which and other rapacities (1 Sam. ii. 12-17) their death was threatened (ver. 34), and inflicted (iv. 11). The capture of the ark of God by the Philistines (B.C. 1116) affords us an insight into the state of sacerdotal things among that people (1 Sam. v.), viz., a temple (ver. 2), priests (ver. 5), who are consulted respecting the disposal of the ark (vi. 2, 3). Ahiah, the great-grandson of Eli, succeeded to the high-priesthood (B.C. 1093) (1 Sam. xiv. 3); he asks counsel of God for Saul, but it is not answered (ver. 37); is succeeded in office by his brother Ahimelech (xxi. 1-9). Saul appears to have appointed Zadok, of the family of Eleazar, to the high-priesthood, and who, with his brethren the priests, officiated before the tabernacle at Gibeon (1 Chron. xvi. 39). David, at his elevation to the throne, sent for all the priests and Levites to bring the ark of God to Jerusalem (B.C. 1051) (1 Chron. xiii. 2, 3; comp. the Psalm he wrote on the occasion, cxxii. 9-16). At this period, therefore, there were two high-priests at Jerusalem (1 Chron. xv. 11; xviii. 16). A peculiar use of the Hebrew word signifying priest occurs in 2 Sam. viii. 18, 'and David's sons were כהנים, *cohenim*, chief rulers; Sept. ἀρχαῖ, 'chamberlains'; Vulg. *sacerdotes*. The writer of the first book of Chronicles, however, did not choose to give the name to any but a priest, and renders it 'the sons of David were chief (or heads) on the side of the king' (xviii. 17). The word seems, however, certainly applied to some persons who were not priests (1 Kings iv. 5, 'principal officer'; Sept. ἐταῖρος; Alex. ἱερεὺς ἐταῖρος; Vulg. *sacerdos*; comp. 2 Sam. xx. 26; 1 Chron. xxvii. 5; Ps. xcix. 6). These 'sons of David' were, therefore, probably ecclesiastical councillors, or chief church lawyers. During the reign of David, both Zadok and Abiathar steadily adhered to his interests, accompanied him out of Jerusalem when he fled before Absalom (2 Sam. xv. 24), and, after having at his desire returned to Jerusalem (ver. 29), still maintained private correspondence

VOL. III.

\*

with him (ver. 35), and ultimately negotiated his restoration (xix. 11). David introduced the *division of the priests into twenty-four classes or courses* by lot (1 Chron. xxiv.), B.C. 1015. He appointed sixteen courses of the descendants of Eleazar, under as many heads of their families, and eight of those of Ithamar (ver. 4). This distribution took place in the presence of the king, the princes, Zadok, and the principal priests and Levites. The first of these courses was that which had Jehoiarib at the head of it (ver. 7). It was reckoned the most honourable. Josephus values himself on his descent from it (*Vita*, sec. 1). Mattathias, the father of the Maccabees, descended from it (1 Maccab. ii. 1). Abijah was the head of the eighth course (ver. 10), to which Zacharias, the father of the Baptist, belonged (Luke i. 5). All these courses were placed under the jurisdiction of the high-priest, called Aaron, on this occasion (ver. 19). Each course served a week, alternately, under a subordinate prefect (2 Kings xi. 5, 7); and in the time of Zacharias, at least, the duties of each individual seem to have been determined by lot (Luke i. 9); but all attended at the great festivals (2 Chron. v. 11). This arrangement continued till the time of Josephus (*Antiq.* vii. 14. 7). At the close of David's life, Abiathar sided with Adonijah in his effort to gain the throne; but Zadok adhered to Solomon (1 Kings i. 7, 8), and anointed him king (ver. 39). Accordingly, when Solomon became established in the government, he deposed Abiathar (ii. 26), and put Zadok in his place, who appears to have been anointed to the office (1 Chron. xxix. 22) owing to the interruption already alluded to, which had taken place in the proper succession of the high-priesthood. Frequent references to the priests occur in the Psalms written upon the dedication of the temple (B.C. 1004) (see Ps. cxxxv. 1, 19, etc.) The priests were now installed in their offices (2 Chron. viii. 14, 15). At the revolt of the ten tribes from Rehoboam (B.C. 975), all the priests repaired to him to Jerusalem (2 Chron. xi. 13) and there continued their services in the legal manner (xiii. 11). On the other hand, Jeroboam, now become king of Israel, deposed them from their office in his dominions, and consecrated priests of his own idolatrous worship (xi. 15), persons of the lowest class, not of the sons of Levi (1 Kings xii. 31); 'whosoever would he consecrated him' (xiii. 33), provided that the candidate could only bring a young bullock and seven rams for the purpose (2 Chron. xiii. 9). It was during this depression of the true religion and worship that Jehoshaphat, king of Judah, made the celebrated attempt to restore and confirm it in his own dominions, recorded in 2 Chron. xvii. 7-9. For this purpose he sent priests and Levites, who 'took with them the book of the law,' under the convoy of certain princes, to teach its contents throughout all the cities of Judah. This, which seems the nearest approach of any on record to *teach* the people by the priests or Levites, really amounts to no more than the declaring the obligations of the law by the appointed expositors of its requirements (comp. Deut. xvi. 18; xvii. 9-13; xxiv. 8; xxxiii. 10; Ezek. xlv. 23, 24; Hag. ii. 11-13; Hosea iv. 6; Micah iii. 11; Mal. ii. 6-9; and even Neh. viii. 7-9). It may be collected from this incident, that the Scriptures were not then in common circulation (for the deputation 'took the book of the

law with them'), and that there was then no religious instruction in synagogues (Campegius Vitringa, *Synag. Vet.*, pt. ii. lib. i. c. 9). Although the priests, by the ceremonies they performed, no doubt *incidentally* revived religious principles in the minds of the people, yet they were *never* public teachers of religion in the customary sense of the words. Those of the prophets who collected assemblies on the Sabbaths and new moons, approached the nearest of any to religious teachers under the Gospel (comp. Ezek. xxxiii. 30, 31; Jahn, *Biblisches Archäol.*, sec. 371, 372). Jehoshaphat shortly afterwards (B.C. 897) established a permanent court at Jerusalem, composed of priests and Levites, and of the chief of the Fathers of Israel, for the decision of all causes, with the high-priest presiding over them in regard to ecclesiastical concerns (2 Chron. xix. 8-11). About 120 years after, Jehu destroyed all the priests of Baal, and extirpated his worship from Israel (2 Kings x. 15-29). The account of this incident affords additional illustration of the general resemblance observable between idolatrous worship and that of the true God, viz., 'prophets of Baal,' 'priests,' 'servants' who waited on the latter in the capacity of Levites, 'a solemn assembly,' 'a temple' for the god, 'sacrifices,' 'burnt-offerings,' 'vestments for the priests.' About B.C. 884 the high-priest Jehoiada recovers the throne of Judah for its youthful heir Joash; and, after a long life of influence and usefulness, dies, aged 130 years, and is buried in the royal sepulchre at Jerusalem (2 Kings xi. 12; 2 Chron. xxiii. 31; xxiv. 15, 16). During this reign the priests were empowered, under royal authority, to raise money for the repair of the temple, but at last forfeited this commission by their negligent discharge of it (2 Kings xii. 4-12). At the public humiliation for the famine, ordered by the prophet Joel (B.C. 787), a form of prayer is delivered for the use of the priests (ii. 17; comp. Hosea xiv. 2).

Some time between B.C. 787 and 765, the attempt of Uzziah, king of Judah, to burn incense in the temple, calls forth the resistance of the high-priest Azariah and eighty of the priests, and ends with the king becoming leprous for life (2 Chron. xxvi. 16, 21). The ignorance and depravity of the idolatrous priests of Israel at this period are vividly described (Hosea iv. 6-8; vi. 9). These priests are called כִּמְרִים, *Kemarim* (2 Kings xxiii. 5; Hosea

x. 5; Zeph. i. 4), from the Syr. כִּמְרִים, *Kumro*, the idolatrous priests of Palestine being, as might be expected, derived from Syria. The abandoned character of the priests of Judah nearly at the same period is described, Is. xxviii. 7, 8; Micah iii. 11. In the reign of Ahaz, king of Judah (B.C. 739), a flagrant violation of divine commands is permitted by Urijah the high-priest, by the introduction into the temple of an altar similar to one which the king had seen at Damascus (2 Kings xvi. 10-16; comp. Exod. xxvii. 1, 2). The prophecy of Hosea, addressed to the priests (v. 1, etc.), is referred to this period. Better things marked the reign of Hezekiah, who reinstated the priests in their office (2 Chron. xxix. 4); they restore the Passover (xxx.), and are reinstated in their revenues (xxxi. 4-10), are also properly provided for in their own cities (ver. 15), and have the care of their genealogies restored (ver. 16-21), B.C. 726. During the captivity of the ten tribes, at

least one priest was sent back from Assyria to teach the Assyrian colonists in Samaria 'the manner of the God of the land' (2 Kings xvii. 27); but the colonists themselves also appointed priests for this purpose (ver. 32). Josiah, king of Judah, degrades idolatry by burning the bones of its priests upon their altars (2 Chron. xxxiv. 5), expels some of the survivors (2 Kings xxiii. 8), yet affords some of them an allowance (ver. 9), but puts others to death (ver. 20). Jeremiah, a sacerdotal prophet, flourishes B.C. 630; he is informed that his commission was partly directed against the priests of Judah (i. 18), whose degeneracy is adverted to (iii. 8), and even idolatry (ver. 26, 27). In his time the office of *second priest*, or *sagan*, as he is called by the Jews in later times, is referred to (Jer. lii. 24; 2 Kings xxv. 18). This was a sort of deputy, or *vice high-priest*, whose duty it was to officiate for his superior in case of sudden illness, etc. Many references to the depravity of the priests mark this period (2 Chron. xxxvi. 14; vi. 13; Ezek. xxii. 26), in which they were joined by the prophets (Jer. v. 31; viii. 10; xxvi. 8; Lam. iv. 13). Jeremiah records the attempt of a false prophet, Shemaiah, the Nehelamite, to induce *Zephaniah*, the *second priest*, to assume the office of high-priest at Jerusalem during the captivity of Judah (B.C. 597). He predicts the restoration of the sacerdotal office (xxix. 24-32). About this time Seraiah, the high-priest, and his sagan Zephaniah, were carried to Babylon, and put to death (2 Kings xxv. 18, 20). Jeremiah describes the miseries of the priests at this period (Lam. i. 4, 19). At the decree of Cyrus to rebuild Jerusalem (B.C. 536), some of the priests in exile at Babylon, with the fathers and Levites, avail themselves of the royal permission to return (Ezra i. 5). These belonged to *four of the courses* which retained the names of their original heads (comp. ii. 36-39; 1 Chron. xxiv. 7, 8, 14; 1 Chron. ix. 12), amounting in all to 4289 priests, besides others who could not produce their genealogy, and whom 'the governor' would not allow to eat the priests' portion till their claim should be verified by a priest with Urim and Thummim (ver. 61-64). These were followed by a second company (vii. 7). The proportion of the priests who returned seems large in comparison with the number of the people who returned, and who scarcely amounted to 50,000. Some of the fathers who returned presented a hundred priests' garments (Ezra ii. 69). The priests were restored to their cities (ver. 70); the service was restored (iii. 3-5); and, under Joshua, the son of Josedech, the temple was rebuilt (Hagg. i. 1) and dedicated (B.C. 519). The priests who had married strange wives were compelled to separate from them (Ezra x. 18-22). Ezra the scribe publicly reads the law (Neh. viii. 4), and the priests translate the passages read into the Aramaean dialect (ver. 7). They revive the feast of tabernacles (ver. 13-18), and the chief of them signed the covenant of the Lord as representatives of the rest (ix. 38, etc.). At the distribution of the inhabitants, 1760 priests remained at Jerusalem (1 Chron. ix. 13). In Neh. xii. 10, 11, an account is given of the succession of the high-priests from the return of the captivity to Jaddua, or Jaddus, who held an interview with Alexander the Great. Thus, as Grotius observes, 'the Scripture history ends where the very light of times, viz., the affairs of Alexander, begin, from which time profane history

becomes clear.' Then follows a list of all those chief of the priests who officiated in the lifetime of Jehoiakim, son of Joshua, either as assistants or successors of their fathers (ver. 12). Again, however, the negligence and wickedness of the restored priests are complained of by Malachi (i. 6-13). A heavy threatening is denounced against them (ii. 1-9). The fault of Eliashib, the high-priest, in the misappropriation of a sacred storehouse to the use of one of his relations (Neh. xiii. 4-10), and whose family was much corrupted (ver. 28, 29), closes the information furnished by the canonical books of the O. T. The high-priesthood and government of Judaea continued in the lineage of Eleazar, son of Aaron (subject, however, to the Persians), in the family of Josedech, by which it was transmitted down to Onias III. He was supplanted by Jason, his brother, as Jason was by his brother Menelaus; at whose death Alcimus, of a different family, was put into the office by the king of Syria. In the year B.C. 152, Alexander, king of Syria, bestowed it upon the heroic general Jonathan (1 Maccab. x. 18-20), who belonged to the class Jehoiarib (ii. 1), and in whose family it became settled, and continued for several descents till the time of Herod, who took the liberty to change the incumbents of the office at his pleasure—a liberty which the Romans exercised without restraint, so that at last the office was often little more than annual. At the entrance of the Christian history, we are met with the priest Zacharias, the father of the Baptist, of the course of Abia, and married to a daughter of Aaron (Luke i. 5). 'The chief priests,' mentioned in Matt. ii. 4, and elsewhere, so frequently, included, beside the high-priest properly so called and then in office, all that had already held it, who, for the reason just mentioned, were numerous, and the chiefs of the twenty-four courses, who also enjoyed this title. The acting high-priest also usually had for his coadjutor some influential senior who had previously filled the station. Hence the association of Annas and Caiaphas (Luke iii. 2). Josephus speaks of many contemporary high-priests (*Vita*, sec. 38); and alludes to the influence they possessed (*De Bell. Jud.* iv. 3, 6, 7, 9); and as even wearing the archieratical robe (10). By virtue of his office, the high-priest Caiaphas is said to have prophesied (John xi. 51). He appears as chairman of the Sanhedrim at our Lord's trial (Matt. xxvi. 57). The chief priests appear as assessors in the court (ver. 59). The common priests still retain the exercise of their ancient functions, in judging of the leprosy, etc. (Mark i. 44). Christians are figuratively called priests (Rev. i. 6; xx. 6). The student will observe the important distinction, that the term *ιερεύς* is never applied to the *pastor of the Christian church*; with which term the idea of a sacrifice was always connected in ancient times. Thus Hesychius, *ἱερεῖς, σφάξαι*. *ἱερεῖς, ὁ διὰ θυσίων μαρτυρούμενος*. We submit the following inferences from the foregoing particulars to the judgment of the reader. The patriarchal form of the priesthood was of divine origin, and the purest. This was carried at the dispersion of the nations into every part of the globe, and became everywhere corrupted in some degree, and ultimately even among the ancient Canaanites. Hence the unquestionable resemblances to it traceable in the religions of all nations. The legation of Moses was directed to the revival of all the important

truths comprised in the early revelations, and which were shrouded under the system of Egypt. Hence it was proper that he should become 'learned in all the wisdom' of that country. In the accomplishment of this mission, Moses retained also such innocent adaptations to the old system as were required by the fixed associations of the people whom he was destined to deliver. Among these adaptations we incline to consider the peculiar office of the high-priest, of which we find no rudiments in the patriarchal church. Nor does the *use and illustration* made of that office in the Epistle to the Hebrews disturb our view, because the same writer finds more points of resemblance between the performances of Christ and the priesthood of the patriarchal Melchizedek than between the office of Aaron and that of Christ (chap. vii.; see Jer. vii. 21-23). The resemblances between the religious customs of the ancient Egyptians and those of the Jews are numerous, decided, peculiar, and most important. Besides those laid before the reader in this article, we refer him to the articles *ARK*, *CHERUBIM*, etc., but especially to Kitto's *Pictorial History of Palestine*, London 1844, which contains all the most valuable illustrations of this nature derived from the best and most modern works on Egypt. To this work the reader is indebted for the valuable cuts which have been now submitted to his consideration. For the similarity in the religion of ancient Greece, see Potter's *Archæologia*, vol. i., p. 202, Lond. 1775; of ancient Rome, Adam's *Antiquities*, p. 293, sec. *ministri sacrorum*, Edin. 1791. (Ugolini, *Thesaur.* xii. and xiii.; Reland, *Antiq. Sac.*, ii. 4; Bähr, *Mos. Cultus*, bk. ii.; Fairbairn, *Typology*; Winer, *R. W. B.*, s. v. *Priester*; Kiesling, *De Legibus Mos. circa Sacerd. Vitio Corpores laborantes*; T. C. Kall, *De Morbis Sacerdot. V. T. ex ministerii eor. conditione oriundis*, Hafn. 1745; Jablonskii *Pantheon, proleg.*, sec. 29, 41, 43; Munch, *De Matrimonio Sacerd. V. T. cum filiis. Sacer.*, Norimb. 1747; J. P. Smith, *Discourses on the Sacrifice and Priesthood of Christ*, London 1842; Wilson on the same subject).—J. F. D.

PRIMOGENITURE (בְּכוֹרָה; Sept. Πρωτογονία, Gen. xxv. 31, 34; xxvii. 36; Deut. xxi. 17; 1 Chron. v. 1) [BIRTHRIGHT]. It occurs in the N. T. only in Heb. xii. 16. Πρωτότοκος, always rendered 'firstborn' in the English version, is found in the Sept. in Gen. iv. 4, Deut. xxi. 17, and several other passages of the O. T., as the representative of the Hebrew בְּכוֹר, signifying 'one who openeth the womb,' whether an only child, or whether other children follow. 'Primogenitus est, non post quem alii, sed ante quem nullus alius genitus' (Pareus). Πρωτότοκος is found nine times in the N. T.—viz., Matt. i. 25 (if the passage be genuine, and not introduced from the parallel passage in Luke); Luke ii. 7; Rom. viii. 29; Col. i. 15, 18; Heb. i. 6; xi. 28; xii. 23; Rev. i. 5. Except in the Gospels, and Heb. xi. 28, the word always bears a metaphorical sense in the N. T., being generally synonymous with *heir* or *lord*, and having, in Heb. i. 6, an especial reference to our Lord's Messianic dignity. In Heb. xii. 23, 'the assembly of the first-born,' it seems to be synonymous with 'elect,' or 'dearly beloved,' in which sense it is also used on one occasion in the O. T. (Jer. xxxi. 9). In the 4th century, Helvidius among the Latins, and Eunomius among the

Greeks, wished to attach a signification to *πρωτότοκος* in Matt. i. and Luke ii., different from the O. T. usage, maintaining, in order to support their hypothesis—(viz., that Joseph and Mary had children after the birth of our Lord)—that the word *πρωτότοκος*, by reason of its etymology, could not be applied to an *only child*. Jerome replied to the former by appealing to the usage of the word in the O. T. (*adv. Helvid. in Matt. i. 9*). The assertion of Eunomius was equally refuted by the Greek fathers, Basil (*Hom. in Nat.*), Theophylact (*in Luc. ii.*), and Damascenus (*De fid. Orthod.*, l. iv.). In reference to this controversy, Drusius (*Ad Difficiliora loca Num.*, cap. 6) observes: 'Sic sane Christus vocatur *Πρωτότοκος*, licet mater ejus nullos alios postea liberos habuerit. Notet hoc juvenis propter Helvidium, qui ex eâ voce inferebat Mariam ex Josepho post Christum natum plures filios suscepisse.' 'Those entitled to the prerogative' [viz., of birthright], observes Campbell (*On the Gospels*), 'were invariably denominated the first-born, whether the parents had issue afterwards or not.' Eunomius further maintains, from Col. i. 15, that our Lord was 'a creature'; but his arguments were replied to by Basil and Theophylact. Some of the Fathers referred this passage to Christ's pre-existence, others to his baptism. In Is. xiv. 30, the 'first-born of the poor' signifies the poorest of all; and in Job xviii. 13, the 'first-born of death' means the most terrible of deaths. See Suicer's *Thesaurus*; Leigh's *Critica Sacra*; Wahl's *Clavis Philolog.*; Rose's edition of Parkhurst's *Lexicon*; and Cruden's *Concordance*.—W. W.

PRINCE. 1. נָגִיד (from נָגַד, *to be in front, to precede*), one who has the precedence, a leader, or chief; used of persons set over any undertaking, superintending any trust, or invested with supreme power (1 Kings xiv. 7; Ps. lxxvi. 13; 1 Chron. xxvi. 24 [A. V. 'ruler']; 1 Sam. ix. 16 [A. V. 'captain'], etc.) In Dan. ix. 25, it is applied to the Messiah; and in xi. 22, to Ptolemy Philometor, King of Egypt.

2. נָדִיב (from נָדַב, which in Hithp. signifies *to volunteer, to offer voluntarily or spontaneously*), generous, noble-minded, noble by birth (1 Sam. ii. 8; Ps. xlvii. 10; cvii. 40; cxiii. 8; cxviii. 9; Prov. xxv. 7, etc.) This word is the converse of the preceding; נָגִיד means primarily a chief, and derivatively what is morally noble, excellent (Prov. viii. 6); נָדִיב means primarily what is morally noble, and derivatively one who is noble by birth or position.

3. נִשְׂאִי (from נָשָׂא, *to lift up*, Niph. *to be elevated*), one exalted; used as a general term for princes, including kings (1 Kings xl. 24; Ezek. xii. 10, etc.), heads of tribes or families (Num. i. 44; iii. 24 [A. V. 'chief']; vii. 10; xxxiv. 18; Gen. xvii. 20; 1 Chron. vii. 40, etc.) In Gen. xxiii. 6, Abraham is addressed by the sons of Heth as נִשְׂאִי אֱלֹהִים (*Nasi Elohim*), a prince of God, i. e., constituted, and consequently protected by God [A. V. 'mighty prince'].

4. שָׂר (from שָׁרַר, *to rule, to have dominion*), the chief of any class, the master of a company, a prince or noble; used of Pharaoh's chief butler and baker (Gen. xl. 2, ff.); of the taskmasters set over the Israelites in Egypt (Exod. i. 11); even of chief herdsmen (Gen. xlvii. 6). It is frequently used

for military commanders (Exod. xviii. 21 [A. V. 'rulers']; 2 Kings i. 9 [A. V. 'captain']; Is. iii. 3, etc.), and for princes both supreme and subordinate (1 Sam. xxix. 3; Job xxix. 1, 9; Is. xlix. 7; Jer. li. 59, etc.) In Dan. viii. 11, God is called שָׂר הַצְבָּא (*Sar hatsaba*), Prince of the host; and in ver. 25 the title שָׂר שָׂרִים (*Sar Sarim*), Prince of princes, is applied to the Messiah. The 'princes of the provinces' (שָׂרֵי הַמְּדִינֹת), *Sarei Hammedinoth*, 1 Kings xx. 14) were probably the district magistrates who had taken refuge in Samaria, and by whose attendants victory was to be won.

5. אַחַשְׁדָּרְפָּנִי. [ACHASDARPANIM.]

6. Ἀρχων in the LXX. appears as the rendering of all the Hebrew words above cited, and in the N. T. it is used of earthly princes (Matt. xx. 25; 1 Cor. ii. 6), of Jesus Christ (Rev. i. 5), and of Satan (Matt. ix. 34; xii. 24; Mark iii. 22; John xii. 31; xiv. 30; xvi. 11; Eph. ii. 2).

7. Ἀρχηγός in Theodotion is the rendering of נָשִׂיא (Num. xiii. 3; xvi. 2); in the LXX. is the rendering of שָׂר (Judg. v. 15; Neh. ii. 9; Is. xxx. 4); and in the N. T., where it is applied only to our Lord (Acts iii. 15; v. 31; Heb. ii. 10 [A. V. 'captain']; xii. 2 [A. V. 'author']).

8. ἡγεμών is used Matt. ii. 6 in a general sense for a chief or ruler.—W. L. A.

PRISCA. [PRISCILLA.]

PRISCILLA (Πρίσκιλλα), or PRISCA (Πρίσκα), wife of Aquila, and probably, like Phœbe, a deaconess. She shared the travels, labours, and dangers of her husband, and is always named along with him (Rom. xvi. 3; 1 Cor. xvi. 19; 2 Tim. iv. 19) [AQUILA].

PRISON. [PUNISHMENT.]

PRITIUS or PRITZ, JOHN GEORGE, was a learned divine of the Lutheran school. He was born at Leipsic in 1662. He became professor of divinity and minister at Griefswalde in 1707, and was promoted to be principal minister at Franckfort-on-the-Maine in 1711. He died there in 1732. Pritz was author of the *Introductio in Lectionem Novi Testamenti, in qua, quæ ad rem criticam, historiam, chronologiam, et geographiam pertinent, breviter et perspicue exponuntur*; Editio nova et quibusdam aucta accessionibus, sm. 8vo, Lips. 1722. The author's edition was first published in 1704, Kapp's edition in 1722; and a still further improved edition was published by Hoffmann of Leipsic in 1737, and again in 1764. This work of Pritz was in its day highly valued as an introduction to the study of the N. T., and contains many useful hints on various points of interpretation. Bishops Marsh and Watson have commended it much.—W. J. C.

PRIZE. [GAMES.]

PROCHORUS (Πρόχορος), one of the seven first deacons of the Christian church (Acts vi. 5). Nothing is known of him.

PROCONSUL, a Roman officer appointed to the government of a province with consular authority. He was chosen out of the body of the senate; and it was customary, when any one's consulate expired, to send him as a proconsul into some province. He enjoyed the same honour with the consuls, but was allowed only six lictors with the fasces before him.

The proconsuls decided cases of equity and

justice, either privately in their palaces, where they received petitions, heard complaints, and granted writs under their seals; or publicly in the common hall, with the formalities generally observed in the courts at Rome. These duties were, however, more frequently delegated to their assessors, or other judges of their own appointment. As the proconsuls had also the direction of justice, of war, and of the revenues, these departments were administered by their lieutenants, or *legati*, who were usually nominated by the senate. The office of the proconsuls lasted generally for one year only, and the expense of their journeys to and from their provinces was defrayed by the public. After the partition of the provinces between Augustus and the people, those who presided over the provinces of the latter were especially designated proconsuls, for whom it appears to have been customary to decree temples (Suet. *Aug.*) Livy (viii. and xxvi.) mentions two other classes of proconsuls: those who, being consuls, had their office continued beyond the time appointed by law; and those who, being previously in a private station, were invested with this honour, either for the government of provinces, or to command in war. Some were created proconsuls by the senate without being appointed to any province, merely to command in the army, and to take charge of the military discipline; others were allowed to enter upon their proconsular office before being admitted to the consulship, but having that honour in reserve.

When the Apostle Paul was at Corinth, he was brought before Gallio, the proconsul of Achaia, one of the provinces of Greece, of which Corinth was the chief city, and arraigned by the Jews as one who 'persuadeth men to worship God contrary to the law' (Acts xviii. 13); but Gallio refused to act as a judge of such matters, and 'drove them from the judgment-seat' (ver. 16).—G. M. B.

**PROCURATOR.** This word does not occur in the Vulgate or in the A. V., nor is its accurate Greek equivalent, *ἐντροπος* (though used by Philo, *Leg. ad Caium*, and by Josephus, *Antiq.* xx. 6, 2, etc.), found in this sense in the Greek Testament, where it is represented by the vaguer term *ἡγεμὼν*, rendered by our translators 'governor' (Luke ii. 2; Matt. xxvii. 2; xxviii. 14, etc.)\* The word is generally applied both in the original and in our version to the Procurators of Judæa, Pontius Pilate (Matt. xxvii., etc.), Felix (Acts xxiii.), and Festus (Acts xxvi. 30); but it is also used of Cyrenius (Quirinus), who held the more responsible and distinguished office of *Præses* or *Legatus Cæsaris* over the province of Syria (Luke ii. 2). Procurators were chiefly despatched to the imperial, and not to the senatorial provinces [PROVINCE]. The revenues of the latter flowed into the *Ærarium* or exchequer, while those of the former belonged to the *Fiscus*, or privy purse. The *Procuratores Cæsaris* were specially intrusted with the interests of the *fiscus*, and therefore managed the various

taxes and imposts, performing similar duties to those exercised by the *quæstors* in the provinces administered by the senate.\* Sometimes, however, the Procurators were invested with the dignity of *legati*, or *procuratores cum jure gladii* (τῇ ἐπὶ πᾶσι ἐξουσίᾳ, Joseph. *Bell. Jud.* ii. 8. 1), and this was the case with the Procurators of Judæa, which had been made a sub-province of Syria (προσθηκὴ τῆς Συρίας; Joseph. *Antiq.* xiii. 1. 1) since the deposition of the ethnarch Archelaus, A.D. 6. There is therefore no inaccuracy in the use of *ἡγεμὼν* in the N. T., since we find from inscriptions that *Præses* and Procurator were often interchangeable (Gruter, 493, b). In one respect, indeed, the *ἡγεμῶνες* were even more powerful than the proconsuls themselves (*ἀνθύπατοι*); for, being regarded as the immediate emissaries and representatives of the Cæsar, by whom they were appointed to an indefinite tenure of office (Dio Cass., liii. 13-15), they had the power of inflicting capital punishment at their own discretion (John xix. 10; Joseph. *Bell. Jud.* ii. 8. 1). They also governed the province when the proconsul was dead or absent, 'vice proconsulum,' as we see from many inscriptions (Murat. 907, 4, etc.) In a turbulent and seditious province like Judæa, their most frequent functions were of a military or judicial character. It was before Roman procurators that both our Lord and St. Paul were tried. The former trial took place in Jerusalem, where the procurators usually resided during the winter, and during the celebration of the great Jewish festivals (Joseph. *Antiq.* xviii. 3. 1; *Bell. Jud.* ii. 14. 3). Their presence was necessary at these seasons to overawe the turbulent fanaticism of the vast multitudes of pilgrims from all countries, who on such occasions thronged to the centre of the national worship. The trial of St. Paul took place at Cæsarea, which was regarded as the capital of the sub-province, and where the procurators ordinarily held their court (Acts xxv.). Both at Cæsarea and at Jerusalem the prætorium belonged to the palace of Herod (Joseph. *Bell. Jud.* ii. 14. 8; Acts xxiii. 35). The pomp and dignity of the procurators may be inferred from the narrative of these trials, and from the titles of 'most excellent,' and 'most noble' (κράτιστε), applied to them by such different lips as those of Claudius, Lysias, Tertullus, and St. Paul; yet they were usually chosen from no higher rank than that of the equites, or even the freedmen of the emperor; and the 'most noble Felix,' in particular, was a mere manumitted slave.† It is satisfactory to find that even in the minutest details the glimpses of their position afforded to us by the N. T. are corroborated by the statements of heathen writers. The violence (Luke xiii. 1), the venality (Acts xxiv. 26), the insolence (John xix. 22), and the gross injustice (Acts xxiv. 27), which we see exemplified in their conduct towards our Lord and his apostles, are amply illustrated by contemporary historians (Joseph. *Antiq.* xviii. 3. 1; *Bell. Jud.*

\* *ἡγεμὼν* also occurs in a perfectly general sense, Matt. x. 18; 1 Pet. ii. 14. In Matt. ii. 6 it is rendered 'princes,' and corresponds to the Hebrew מְלָכִים. See GOVERNOR, vol. i., p. 167. 'Governor' in the A. V. is also used for ἐθνάρχης, 2 Cor. xi. 32. Διοικητής is another Greek term for procurator.

\* Procurators were, however, sometimes sent as well as quæstors to the senatorial provinces (Tac., *Ann.*, xiii. 1; Dio Cass., liii. 15); but these were doubtless offices of less dignity, though bearing the same title. 'Procurator' is also used for steward (Plaut., *Pseud.*, 2. 2. 14), attorney (Ulp., *Dig.*, 3. 3), regent (Cæs., *B. C.*, 3. 112), etc.

† 'Jus regium servili ingenio exercuit' (Tac., *Il.*, v. 9; *Ann.*, xii. 54; Sueton., *Claud.*, 28).

ii. 9; Cic. in Verrem, *passim*, etc. etc.); and they weighed so heavily on the mind of the Emperor Trajan, that he called the extortions of provincial governors 'the spleen of the empire' (*lien imperii*).<sup>\*</sup> The presence of the wives of Pilate (Matt. xxvii. 19) and Felix (Acts xxiv. 24) reminds us of the famous debate on the proposition of Cæcina to forbid the proconsuls and procurators to be accompanied by their wives (Tac., *Ann.*, iii. 33, 34). This had been the old, and perhaps the wise regulation of earlier days, since the cruelty, ambition, and luxury of these ladies was often more formidable to the provincials than that of the governors themselves. But the rule had been often violated, and had of late been deliberately abandoned. We see, too, in the ready handing over of the prisoner from one authority to another (*ἀνέπεμψεν, remisit*, Luke xxiii. 7; Acts xxvi. 32), some trace of that salutary dread of being denounced after their term of office was over, which alone acted as a check upon the lawlessness of even the most unscrupulous governors. Even the mention made of things at first sight so trivial as the tribunal (*βήμα*), and the tessellated pavement (*λιθόστρωτον*) on which it was elevated,<sup>†</sup> derive an interest and importance from the fact that they were conventional symbols of wealth and dignity, and that Julius Cæsar thought it worth while to carry one about with him from place to place (Suet., *Jul.*, c. 46). Both in our Lord's case and that of St. Paul, it was necessary for the accusing Jews to frame a *political* charge (Luke xxiii. 3; Acts xxiv. 5; xxv. 18), since their proceedings would otherwise have been rejected by Pilate or Felix with as much contempt as they were by the proconsul Gallio (Acts xviii. 14). Yet the procurators took care to keep under their own absolute control the appointment of the high-priest (Joseph. *Antiq.* xviii. 2. 2); and this became a constant source of violent contention between them and the Jews.

The following is a list of the procurators of Judæa, with their approximate dates, so far as they are ascertainable, omitting Sabinus, who was only a temporary procurator:—

1. Coponius, A.D. 6-10.
2. Marcus Ambivius, A.D. 10 (?)
3. Annus Rufus, A.D. (?)
4. Valerius Gratus, A.D. 14-25.
5. Pontius Pilate, A.D. 25-36.
6. Marcellus, A.D. 37.

After this, in A.D. 41, Agrippa was established in the kingdom of Judæa, and, on his death, a procurator was again appointed, viz.:

7. Cuspius Fadus, A.D. 44-46.
8. Tiberius Alexander, A.D. 46-48.

<sup>\*</sup> 'Quia sicut crescente *liene* reliqui artus tabescent, sic aucto fisco, *improbis exactionibus* civium paupertas augetur' (Aurel. Vict., *Epit.*, 42). Vespasian (*more suo*) took a more humorous view of the matter, and said that the procurators were like sponges, 'quod quasi et siccos madefaceret et exprimeret humentes' (Suet., *Vesp.*, 16).

<sup>†</sup> This was outside the prætorium (John xix. 13), as the Roman prætors often heard causes in the open air.

<sup>‡</sup> On the death of Herod the Great (Joseph. *Antiq.* xvii. 9. 3). The leading πέμπτος (fifth) for πέμπτος (sent) in the passage of Josephus which refers to Valerius Gratus (*Antiq.* xviii. 2. 2), seems to have led to Sabinus being generally counted.

9. Ventidius Cumanus, A.D. 48-52.

10. Antonius\* Felix, A.D. 52-60.

11. Porcius Festus, A.D. 60-62 (?)

12. Albinus, A.D. 62-64.

13. Gessius Florus, A.D. 65-66.

[See PILATE; FESTUS; FELIX; PROVINCE, etc.]  
—F. W. F.

PROGNOSTICATORS. The phrase 'monthly prognosticators' occurs in the A. V. of Is. xlvii. 13, where the prophet is enumerating the astrological superstitions of the Chaldeans. In the later Hebrew, חֹזֵה denotes a 'seer,' or 'prophet;' and to express the sense in which it is employed in this text, a better word than prognosticator could not well be chosen. The original, חֹזֵה כְּכֹכְבִּים, might perhaps be more exactly rendered, as by Dr. Henderson, 'prognosticators at the new moons.' It is known that the Chaldean astrologers professed to divine future events by the positions, aspects, and appearances of the stars, which they regarded as having great influence on the affairs of men and kingdoms; and it would seem, from the present text, that they put forth accounts of the events which might be expected to occur from month to month, like our old almanac-makers. Some carry the analogy further, and suppose that they also gave monthly tables of the weather; but *such* prognostications are only cared for in climates where the weather is uncertain and variable; while in Chaldaea, where (as we know from actual experience) the seasons are remarkably regular in their duration and recurrence, and where variations of the usual course of the weather are all but unknown, no prognosticator would gain much honour by foretelling what every peasant knows. [DIVINATION.]

PROPERTY. It has been the custom to regard the Hebrews as a pastoral people until they were settled in Palestine. In a great degree they doubtless were so; and when they entered agricultural Egypt, the land of Goshen was assigned to them expressly because that locality was suited to their pastoral habits (Gen. xlvii. 4-6). These habits were substantially maintained; but it is certain that they became acquainted with the Egyptian processes of culture; and it is more than probable that they raised for themselves such products of the soil as they required for their own use. We may, indeed, collect that the portion of their territory which lay in the immediate vicinity of the Nile was placed by them under culture (Deut. xi. 10), while the interior, with the free pastures of the desert beyond their immediate territory, sufficed abundantly for their cattle (1 Chron. vii. 21). This partial attention to agriculture was in some degree a preparation for the condition of cultivators, into which they were destined eventually to pass. While the Israelites remained in a state of subjection in Egypt, the maintenance of their condition as shepherds was highly instrumental in keeping them distinct and separate from the Egyptians, who were agriculturists, and had a strong dislike to pastoral habits (Gen. xlv. 34). But when they became an independent and sovereign nation, their separation from other nations was to be promoted by inducing them to devote their chief attention to

<sup>\*</sup> He is so called by Tacitus; Suidas and Zonaras calls him Claudius. His prænomen does not occur elsewhere.

the culture of the soil. A large number of the institutions given to them had this object of separation in view. Among these, those relating to agriculture—forming the agrarian law of the Hebrew people—were of the first importance. They might not alone have been sufficient to secure the end in view; but no others could have been effectual without them; for without such attention to agriculture as would render them a self-subsisting nation, a greater degree of intercourse with the neighbouring and idolatrous nations must have been maintained than was consistent with the primary object of the Mosaic institutions. The commonest observation suffices to show how much less than others agricultural communities are open to external influences, and how much less disposed to cultivate intercourse with strangers.

It was, doubtless, in subservience to this object, and to facilitate the change, that the Israelites were put in possession of a country already in a state of high cultivation (Deut. vi. 11). And it was in order to retain them in this condition, to give them a vital interest in it, and to make it a source of happiness to them, that a very peculiar agrarian law was given to them. In stating this law, and in declaring it to have been in the highest degree wise and salutary, regard must be had to its peculiar object with reference to the segregation of the Hebrew people: for there are points in which this and other Mosaic laws were unsuited to general use, some by the very circumstances which adapted them so admirably to their special object. When the Israelites were numbered just before their entrance into the land of Canaan, and were found (exclusive of the Levites) to exceed 600,000 men, the Lord said to Moses: 'Unto these the land shall be divided for an inheritance, according to the number of names. To many thou shalt give the more inheritance, and to few thou shalt give the less inheritance; to every one shall his inheritance be given according to those that were numbered of him. Notwithstanding the land shall be divided by lot: according to the names of the tribes of their fathers shall they inherit' (Num. xxvi. 53, 54). This equal distribution of the soil was the basis of the agrarian law. By it provision was made for the support of 600,000 yeomanry, with (according to different calculations) from sixteen to twenty-five acres of land to each. This land they held independent of all temporal superiors, by direct tenure, from Jehovah their sovereign, by whose power they were to acquire the territory, and under whose protection they were to enjoy and retain it. 'The land shall not be sold for ever, for the land is mine, saith the Lord: ye are strangers and sojourners with me' (Lev. xxv. 23). Thus the basis of the constitution was an equal agrarian law. But this law was guarded by other provisions equally wise and salutary. The accumulation of debt was prevented, first, by prohibiting every Hebrew from accepting of interest from any of his fellow-citizens (Lev. xxv. 35, 36); next, by establishing a regular discharge of debts every seventh year; and, finally, by ordering that no lands could be alienated for ever, but must, on each year of Jubilee, or every seventh Sabbatic year, revert to the families which originally possessed them. Thus, without absolutely depriving individuals of all temporary dominion over their landed property, it re-established, every fiftieth year, that original and equal distribution of

it, which was the foundation of the national polity; and as the period of this reversion was fixed and regular, all parties had due notice of the terms on which they negotiated; so that there was no ground for public commotion or private complaint.

This law, by which landed property was released in the year of Jubilee from all existing obligations, did not extend to houses in towns, which if not redeemed within one year after being sold, were alienated for ever (Lev. xxv. 29, 30). This must have given to property in the country a decided advantage over property in cities, and must have greatly contributed to the essential object of all these regulations, by affording an inducement to every Hebrew to reside on and cultivate his land. Further, the original distribution of the land was to the several tribes according to their families, so that each tribe was, so to speak, settled in the same county, and each family in the same barony or hundred. Nor was the estate of any family in one tribe permitted to pass into another, even by the marriage of an heiress (Num. xxvii.); so that not only was the original balance of property preserved, but the closest and dearest connections of affinity attached to each other the inhabitants of every vicinage.

It often happens that laws in appearance similar have in view entirely different objects. In Europe the entailment of estates in the direct line is designed to encourage the formation of large properties. In Israel the effect was entirely different, as the entail extended to all the small estates into which the land was originally divided, so that they could not legally be united to form a large property, and then entailed upon the descendants of him by whom the property was formed. This division of the land in small estates among the people, who were to retain them in perpetuity, was eminently suited to the leading objects of the Hebrew institutions. It is allowed on all hands that such a condition of landed property is in the highest degree favourable to high cultivation, and to increase of population, while it is less favourable to pasturage. The two first were objects which the law had in view, and it did not intend to afford undue encouragement to the pastoral life, while the large pastures of the adjacent deserts and of the commons secured the country against such a scarcity of cattle as the division of the land into small heritages has already produced in France.

For this land a kind of quit-rent was payable to the sovereign proprietor, in the form of a tenth or tithe of the produce, which was assigned to the priesthood [TITHES]. The condition of military service was also attached to the land, as it appears that every freeholder (Deut. xx. 5) was obliged to attend at the general muster of the national army, and to serve in it, at his own expense (often more than repaid by the plunder), as long as the occasion required. In this direction, therefore, the agrarian law operated in securing a body of 600,000 men, inured to labour and industry, always assumed to be ready, as they were bound, to come forward at their country's call. This great body of national yeomanry, every one of whom had an important stake in the national independence, was officered by its own hereditary chiefs, heads of tribes and families (comp. Exod. xviii. and Num. xxxi. 14); and must have presented an insuperable obstacle to treacherous ambition and political intrigue, and to every attempt to overthrow the Hebrew com-

monwealth and establish despotic power. Nor were these institutions less wisely adapted to secure the state against foreign violence, and at the same time prevent offensive wars and remote conquests. For while this vast body of hardy yeomanry were always ready to defend their country when assailed by foreign foes, yet being constantly employed in agriculture, attached to domestic life, and enjoying at home the society of the numerous relatives who peopled their neighbourhood, war must have been in a high degree alien to their tastes and habits. Religion also took part in preventing them from being captivated by the splendour of military glory. On returning from battle, even if victorious, in order to bring them back to more peaceful feelings after the rage of war, the law required them to consider themselves as polluted by the slaughter, and unworthy of appearing in the camp of Jehovah until they had employed an entire day in the rites of purification (Num. xix. 13-16; xxxi. 19). Besides, the force was entirely infantry; the law forbidding even the kings to multiply horses in their train (Deut. xvii. 16); and this, with the ordinance requiring the attendance of all the males three times every year at Jerusalem, proved the intention of the legislator to confine the natives within the limits of the Promised Land, and rendered long and distant wars and conquests impossible without the virtual renunciation of that religion which was incorporated with their whole civil polity, and which was, in fact, the charter by which they held their property and enjoyed all their rights (Graves's *Lectures on the Pentateuch*, lect. iv.; Lowman's *Civ. Gov. of the Heb.*, c. iii. iv.; Michaelis, *Mos. Recht*, i. 240, seq.)—J. K.

**PROPHECY.** The principal considerations involved in this important subject may be arranged under the following heads:—

I. *The nature of Prophecy, and its position in the economy of the O. T.*—The view commonly taken of the prophets is, that they were mere predictors of future events; but this view is one-sided and too narrow, though, on the other hand, we must beware of expanding too much the acceptation of the term prophet. Not to mention those who, like Hendewerk, in the introduction to his *Commentary on the Prophet Isaiah*, identify the notion of a prophet with that of an honest and pious man, the conception of those is likewise too wide who place the essential feature of a prophet in his divine inspiration. That this does not meet the whole subject, appears from Num. xii. 6, seq., where Moses, who enjoyed divine inspiration in its highest grade, is represented as differing from those called prophets in a stricter sense, and as standing in contrast with them. Divine inspiration is only the general basis of the prophetic office, to which two more elements must be added:—

1. Inspiration was imparted to the prophets in a *peculiar form*. This appears decisively from the passage in Numbers above cited, which states it as characteristic of the prophet, that he obtained divine inspiration in *visions and dreams*, consequently in a state extraordinary and distinguished from the general one. This mode was different from that in which inspirations were conveyed to Moses and the apostles. The same thing is shown by the names usually given to the prophets, viz., *רֵאִים* and *חֲזִים*, *seers*, and from this that all prophecies which have come down to us have a poetical

character, which points to an intimate affinity between prophecy and poetry; a subject further illustrated by Steinberk, in his work, *Der Dichter, ein Seher*, Leipzig 1836; though the materials which he gives are not sufficiently digested. The prophetic style differs from that of books properly called poetical, whose sublimity it all but outvies, only in being less restrained by those external forms which distinguish poetical language from prose, and in introducing more frequently than prose does plays upon words and thoughts. This peculiarity may be explained by the practical tendency of prophetic addresses, which avoid all that is unintelligible, and studiously introduce what is best calculated for the moment to strike the hearers. The same appears from many other circumstances, *ex. gr.*, the union of *music* with prophesying, the demeanour of Saul when among the prophets (1 Sam. x. 5), Balaam's description of himself (Num. xxiv. 3) as a man whose eyes were opened, who saw the vision of the Almighty, and heard the words of God, the established phraseology to denote the inspiring impulse, viz., 'the hand of the Lord was strong upon him' (Ezek. iii. 14; comp. Is. viii. 11; 2 Kings iii. 15), etc. All these facts prove that there essentially belonged to prophecy a state of mind worked up—a state of being beside one's self—an ecstatic transport, in which ideas were immediately imparted from heaven. Acute remarks on the subject will be found in the works of Novalis (vol. ii. p. 472, seq.), from which we give the following passage: 'It is a most arbitrary prejudice to suppose that to man is denied the power of going out of himself, of being endued with a consciousness beyond the sphere of sense: he may at any moment be a supersensuous being (*ein übersinnliches Wesen seyn*), else he would be a mere brute, not a rational free-man of the universe. There are, indeed, degrees in the aptitude for revelations; one is more qualified for them than another, and certain dispositions are particularly capable of receiving such revelations; besides, on account of the pressure of sensible objects on the mind, it is in this state difficult to preserve self-possession. Nevertheless there are such states of mind, in which its powers are strengthened, and, so to speak, armed.' The state of ecstasy, though ranking high above the ordinary sensual existence, is still not the highest, as appears from Num. xii., and the example of Christ, whom we never find in an ecstatic state. To the prophets, however, it was indispensable, on account of the frailty of themselves and the people. The forcible working upon them by the Spirit of God, would not have been required if their general life had already been altogether holy; for which reason we also find ecstasy to manifest itself the stronger the more the general life was ungodly; as, for instance, in Balaam, when the spirit of God came upon him (Num. xxiv. 4, 16), and in Saul, who throws himself on the ground, tearing his clothes from his body. With a prophet whose spiritual attainments were those of an Isaiah, such results are not to be expected. As regards the people, their spiritual obtuseness must be considered as very great, to have rendered necessary such vehement excitations as the addresses of the prophets caused. Thus it appears that prophecy has a predominant place in the O. T. Under the N. T. it could take only a subordinate place; although even then it could not be dispensed with,

and hence we find it in the apostolic age. It had to prepare the soil on which the peculiar gifts of the N. T. might flourish, and the lower the church's state, the more it resembled that of the O. T., the greater the need of this. It had also to counteract the risk of barrenness and inefficiency to which the unexciting form of the N. T. system was exposed. To the church in the present day one could wish a copious supply of the prophetic gifts!

2. Generally speaking, every one was a prophet to whom God communicated his mind in this peculiar manner. Thus, *ex. gr.*, Abraham is called a prophet (Gen. xx. 7), not, as is commonly thought, on account of general revelations granted him by God, but because such as he received were in the special form described; as indeed in ch. xv. it is expressly stated that divine communications were made to him in *visions and dreams*. The body of the patriarchs are in the same manner called prophets (Ps. cv. 15). When the Mosaic economy had been established, a new element was added; the prophetic gift was after that time regularly connected with the prophetic office, so that the latter came to form part of the idea of a prophet. Thus Daniel's work was not placed in the collection of prophetic books, because, though eminently endowed with prophetic gifts, he still had not filled the prophetic office. Speaking of office, we do not of course mean one conferred by men, but by God; the mission to Israel, with which the certainty of a continued, not temporary, grant of the *donum propheticum* was connected.

That the Lord would send such prophets was promised to the people by Moses, who by a special law (Deut. xviii. 1) secured them authority and safety. As his ordinary servants and teachers, God appointed the Priests: the characteristic mark which distinguished the prophets from them was inspiration; and this explains the circumstance that, in times of great moral and religious corruption, when the ordinary means no longer sufficed to reclaim the people, the number of prophets increased. The regular religious instruction of the people was no part of the business of the prophets: their proper duty was only to rouse and *prophesize*. The contrary, viz., that part of the regular *ix. 27*) the prophets was to instruct the people, is *is consi* argued from 2 Kings iv. 23, where it is said that the Shunamite on the Sabbaths and days of new moon used to go to the prophet Elisha; but this passage applies only to the kingdom of Israel, and admits of no inference with respect to the kingdom of Judah. As regards the latter, there is no proof that prophets held meetings for instruction and edification on sacred days. Their position was here quite different from that of the prophets in the kingdom of Israel. The agency of the prophets in the kingdom of Judah was only of a subsidiary kind; these extraordinary messengers of the Lord only filled there the gaps left by the regular servants of God, the priests and the Levites; the priesthood never became there utterly degenerate, and each lapse was followed by a revival of which the prophets were the vigorous agents; the divine election always vindicated itself, and in the purity of the origin of the priesthood lay the certainty of its continued renewal. On the contrary, the priesthood in the kingdom of Israel had no divine sanction, no promise; it was corrupt in its very source; to reform itself would have been to dissolve itself; the priests there were

the mercenary servants of the king, and had a brand upon their own consciences. Hence in the kingdom of Israel the prophets were the regular ministers of God; with their office all stood or fell, and hence they were required to do many things besides what the original conception of the office of a prophet implied—a circumstance from the oversight of which many erroneous notions on the nature of prophecy have sprung. This led to another difference, to which we shall revert below, viz., that in the kingdom of Judah the prophetic office did not, as in Israel, possess a fixed organization and complete construction.

In their labours, as respected their own times, the prophets were strictly bound to the Mosaic law, and not allowed to add to it or to diminish ought from it. What was said in this respect to the whole people (Deut. iv. 2; xiii. 1), applied also to them. We find, therefore, prophecy always takes its ground on the Mosaic law, to which it refers, from which it derives its sanction, and with which it is fully impressed and saturated. There is no chapter in the prophets in which there are not several references to the law. The business of the prophets was to explain it, to lay it to the hearts of the people, and to preserve vital its spirit. It was, indeed, also their duty to point to future reforms, when the ever-living spirit of the law would break its hitherto imperfect form, and make for itself another: thus Jeremiah (iii. 16) foretells days when the ark of the covenant shall be no more, and (xxxi. 31) days when a new covenant will be made with the house of Israel and with the house of Judah. But for their own times they never once dreamt of altering any, even the minutest and least essential precept, even as to its form, how much less as to its spirit, which even the Lord himself declares (Matt. v. 18) to be immutable and eternal. The passages which some interpreters have alleged as opposed to sacrifices as instituted by the Mosaic law, have been misunderstood; they do not denounce sacrifices generally, but only those of the Canaanites, with whom sacrifice was not even a form of true worship, but opposed to the genuine and spiritual service of God.

As to prophecy in its circumscribed sense, or the foretelling of future events by the prophets, some expositors would explain all predictions of special events, while others assert that no prediction contains anything but general promises or threatenings, and that the prophets knew nothing of the particular manner in which their predictions might be realised. Both these classes deviate from the correct view of prophecy; the former resort often to the most arbitrary interpretations, and the latter are opposed by a mass of facts against which they are unable successfully to contend; *ex. gr.*, when Ezekiel foretells (ch. xii. 12) that Zedekiah would try to break through the walls of the city and to escape, but that he would be seized, blinded, and taken to Babylon. The frailty of the people, under the O. T., required external evidence of the real connection of the prophets with God, and the predictions of particular forthcoming events were to them *σημεία*, signs. These were the more indispensable to them, because the ancients generally, and the Orientals in particular, showed the greatest tendency towards the exploration of futurity, which tended to foster superstition and forward idolatry. All other methods of

was also proved by miracles, but this occurred only at important crises, when the existence of the kingdom of Israel was in jeopardy, as in the age of Elijah and Elisha. Miracles are mentioned as criteria of true prophets (Deut. xiii. 2), still with this caution, that they should not be trusted alone, but that the people should inquire whether the negative criteria were extant.

(e.) Those prophets whose divine commission had been sufficiently proved, bore testimony to the divine mission of others. It has been observed above, that there was a certain gradation among the prophets; the principals of the colleges of prophets procured authority to the 'sons' of prophets. Thus the deeds of Elijah and Elisha at the same time authenticated the hundreds of prophets whose superiors they were. Concerning the relation of the true prophets to each other the passage 2 Kings ii. 9 is remarkable; Elisha says to Elijah, 'I pray thee, let a double portion of thy spirit be upon me.' Here Elisha, as the first-born of Elijah in a spiritual sense, and standing to him in the same relation as Joshua to Moses, asks for a double portion of his spiritual inheritance, alluding to the law concerning the hereditary right of the lawfully-begotten first-born son (Deut. xxi. 17). This case supposes that other prophets also of the kingdom of Israel took portions of the fullness of the spirit of Elijah. It is plain, then, that only a few prophets stood in immediate communion with God, while that of the remaining was formed by mediation. The latter were spiritually incorporated in the former, and on the ground of this relation, actions performed by Elisha, or through the instrumentality of one of his pupils, are at once ascribed to Elijah, *ex. gr.*, the anointing of Hazael to be king over Syria (1 Kings xix. 15; comp. 2 Kings viii. 13); the anointing of Jehu to be king over Israel (1 Kings xix. 16, comp. 2 Kings ix. 1, *seq.*); the writing of the letter to Joram, etc. Thus, in a certain sense it may be affirmed that Elijah was in his time the only prophet of the kingdom of Israel. Similarly of Moses it is recorded, during his passage through the desert, that a portion of his spirit was conveyed to the seventy elders. The history of the Christian church itself offers analogies; look, *ex. gr.*, at the relation of the second class reformers to Luther and Calvin.

#### VI. *Promulgation of the Prophetic Declarations.*

—Usually the prophets promulgated their visions in public places before the congregated people. Still some portions of the prophetic books, as the entire second part of Isaiah and the description of the new temple (Ezek. xl.-xlviii.), probably were never communicated orally. In other cases the prophetic addresses first delivered orally were next, when committed to writing, revised and improved. Especially the books of the lesser prophets consist, for the greater part, not of separate predictions, independent of each other, but form, as they now are, a whole—that is, give the quintessence of the prophetic labours of their authors. In this case it is certain that the authors themselves caused the collection to be made. But it is so, likewise, in some cases where their books really consist of single declarations, and in others it is at least highly probable. Further particulars concerning the manner in which prophetic rolls were collected and published, we have only respecting Jeremiah, who, being in prison, called Baruch, 'to write from his mouth his predictions, and to read them

in the ears of the people' (Jer. xxxviii. 4-14). There is evidence to prove that the later prophets sedulously read the writings of the earlier, and that a prophetic canon existed before the present was formed. The predictions of Jeremiah throughout rest on the writings of earlier prophets, as Kiiper has established in his *Jeremias librorum sacrarum interpres atque vindex*, Berlin 1837. Zechariah explicitly alludes to writings of former prophets; 'to the words which the Lord has spoken to earlier prophets, when Jerusalem was inhabited and in prosperity' (Zech. i. 4; vii. 7, 12). In all probability we have complete those predictions which were committed to writing; at least the proofs which Dr. Ewald gives (p. 43, *seq.*) for his opinion of prophecies having been lost do not stand trial. The words 'as the Lord hath said,' in Joel ii. 32, refer to the predictions of Joel himself. In Is. ii. and Micah iv. nothing is introduced from a lost prophetic roll, but Isaiah borrows from Micah. Hosea alludes (ch. viii. 12), not to some unknown work, but to the Pentateuch. In Is. xv. and xvi. the prophet repeats, not another's prediction, but his own, previously delivered, to which he adds a supplement. Obadiah and Jeremiah do not avail themselves of the written address of a former prophet, but Jeremiah makes the prophecy of Obadiah the groundwork of his own. The opinion that in Is. lvi. 10; lvii. 11, there was inserted, unaltered, a long remnant of an older roll, is founded on erroneous views respecting the time of its composition. The same holds good of Is. xxiv., where Ewald would find remnants of several older rolls. The very circumstance, that in the prophets there nowhere occurs a tenable ground for maintaining that they referred to rolls lost and unknown to us, but that they often allude to writings which we know and possess, clearly proves that there is no reason for supposing, with Ewald, that a great number of prophetic compositions has been lost, 'and that of a large tree, only a few blossoms have reached our time.' In consequence of the prophets being considered more organs of God, much care was bestowed on the preservation of their publications. Ewald himself cannot refrain from observing (p. 56), 'We must see in Jer. xxvi. 1-19 a clear proof of the exact knowledge which the better classes of the people had of all that had, a hundred years before, happened to a prophet, of his words, misfortunes, and accidents.'

The collectors of the Canon arranged the prophets chronologically, but considered the whole of the twelve lesser prophets as one work, which they placed after Jeremiah and Ezekiel, inasmuch as the three last lesser prophets lived later than they. Daniel was placed in the Hagiographa, because he had not filled the prophetic office. The collection of the lesser prophets themselves was again chronologically disposed; still Hosea is, on account of the extent of his work, allowed precedence before those lesser prophets, who, generally, were his contemporaries, and also before those who flourished at a somewhat earlier period.

On the general subject of prophecy no comprehensive or altogether satisfactory treatise has yet been produced. Some good remarks will be found in the essay of John Smith, *On Prophecy (Select Discourses)*, disc. vi. p. 181, 8vo, ed. Lond. 1821, which was translated into Latin and reprinted at the end of Le Clerc's *Commentary on the Prophets*, Amsterdam 1731. It contains interesting passages

the culture of the soil. A large number of the institutions given to them had this object of separation in view. Among these, those relating to agriculture—forming the agrarian law of the Hebrew people—were of the first importance. They might not alone have been sufficient to secure the end in view; but no others could have been effectual without them; for without such attention to agriculture as would render them a self-subsisting nation, a greater degree of intercourse with the neighbouring and idolatrous nations must have been maintained than was consistent with the primary object of the Mosaic institutions. The commonest observation suffices to show how much less than others agricultural communities are open to external influences, and how much less disposed to cultivate intercourse with strangers.

It was, doubtless, in subservience to this object, and to facilitate the change, that the Israelites were put in possession of a country already in a state of high cultivation (Deut. vi. 11). And it was in order to retain them in this condition, to give them a vital interest in it, and to make it a source of happiness to them, that a very peculiar agrarian law was given to them. In stating this law, and in declaring it to have been in the highest degree wise and salutary, regard must be had to its peculiar object with reference to the segregation of the Hebrew people: for there are points in which this and other Mosaic laws were unsuited to general use, some by the very circumstances which adapted them so admirably to their special object. When the Israelites were numbered just before their entrance into the land of Canaan, and were found (exclusive of the Levites) to exceed 600,000 men, the Lord said to Moses: 'Unto these the land shall be divided for an inheritance, according to the number of names. To many thou shalt give the more inheritance, and to few thou shalt give the less inheritance; to every one shall his inheritance be given according to those that were numbered of him. Notwithstanding the land shall be divided by lot: according to the names of the tribes of their fathers shall they inherit' (Num. xxvi. 53, 54). This equal distribution of the soil was the basis of the agrarian law. By it provision was made for the support of 600,000 yeomanry, with (according to different calculations) from sixteen to twenty-five acres of land to each. This land they held independent of all temporal superiors, by direct tenure, from Jehovah their sovereign, by whose power they were to acquire the territory, and under whose protection they were to enjoy and retain it. 'The land shall not be sold for ever, for the land is mine, saith the Lord: ye are strangers and sojourners with me' (Lev. xxv. 23). Thus the basis of the constitution was an equal agrarian law. But this law was guarded by other provisions equally wise and salutary. The accumulation of debt was prevented, first, by prohibiting every Hebrew from accepting of interest from any of his fellow-citizens (Lev. xxv. 35, 36); next, by establishing a regular discharge of debts every seventh year; and, finally, by ordering that no lands could be alienated for ever, but must, on each year of Jubilee, or every seventh Sabbatic year, revert to the families which originally possessed them. Thus, without absolutely depriving individuals of all temporary dominion over their landed property, it re-established, every fiftieth year, that original and equal distribution of

it, which was the foundation of the national polity; and as the period of this reversion was fixed and regular, all parties had due notice of the terms on which they negotiated; so that there was no ground for public commotion or private complaint.

This law, by which landed property was released in the year of Jubilee from all existing obligations, did not extend to houses in towns, which if not redeemed within one year after being sold, were alienated for ever (Lev. xxv. 29, 30). This must have given to property in the country a decided advantage over property in cities, and must have greatly contributed to the essential object of all these regulations, by affording an inducement to every Hebrew to reside on and cultivate his land. Further, the original distribution of the land was to the several tribes according to their families, so that each tribe was, so to speak, settled in the same county, and each family in the same barony or hundred. Nor was the estate of any family in one tribe permitted to pass into another, even by the marriage of an heiress (Num. xxvii.); so that not only was the original balance of property preserved, but the closest and dearest connections of affinity attached to each other the inhabitants of every vicinage.

It often happens that laws in appearance similar have in view entirely different objects. In Europe the entailment of estates in the direct line is designed to encourage the formation of large properties. In Israel the effect was entirely different, as the entail extended to all the small estates into which the land was originally divided, so that they could not legally be united to form a large property, and then entailed upon the descendants of him by whom the property was formed. This division of the land in small estates among the people, who were to retain them in perpetuity, was eminently suited to the leading objects of the Hebrew institutions. It is allowed on all hands that such a condition of landed property is in the highest degree favourable to high cultivation, and to increase of population, while it is less favourable to pasturage. The two first were objects which the law had in view, and it did not intend to afford undue encouragement to the pastoral life, while the large pastures of the adjacent deserts and of the commons secured the country against such a scarcity of cattle as the division of the land into small heritages has already produced in France.

For this land a kind of quit-rent was payable to the sovereign proprietor, in the form of a tenth or tithe of the produce, which was assigned to the priesthood [TITHES]. The condition of military service was also attached to the land, as it appears that every freeholder (Deut. xx. 5) was obliged to attend at the general muster of the national army, and to serve in it, at his own expense (often more than repaid by the plunder), as long as the occasion required. In this direction, therefore, the agrarian law operated in securing a body of 600,000 men, inured to labour and industry, always assumed to be ready, as they were bound, to come forward at their country's call. This great body of national yeomanry, every one of whom had an important stake in the national independence, was officered by its own hereditary chiefs, heads of tribes and families (comp. Exod. xviii. and Num. xxxi. 14); and must have presented an insuperable obstacle to treacherous ambition and political intrigue, and to every attempt to overthrow the Hebrew com-

monwealth and establish despotic power. Nor were these institutions less wisely adapted to secure the state against foreign violence, and at the same time prevent offensive wars and remote conquests. For while this vast body of hardy yeomanry were always ready to defend their country when assailed by foreign foes, yet being constantly employed in agriculture, attached to domestic life, and enjoying at home the society of the numerous relatives who peopled their neighbourhood, war must have been in a high degree alien to their tastes and habits. Religion also took part in preventing them from being captivated by the splendour of military glory. On returning from battle, even if victorious, in order to bring them back to more peaceful feelings after the rage of war, the law required them to consider themselves as polluted by the slaughter, and unworthy of appearing in the camp of Jehovah until they had employed an entire day in the rites of purification (Num. xix. 13-16; xxxi. 19). Besides, the force was entirely infantry; the law forbidding even the kings to multiply horses in their train (Deut. xvii. 16); and this, with the ordinance requiring the attendance of all the males three times every year at Jerusalem, proved the intention of the legislator to confine the natives within the limits of the Promised Land, and rendered long and distant wars and conquests impossible without the virtual renunciation of that religion which was incorporated with their whole civil polity, and which was, in fact, the charter by which they held their property and enjoyed all their rights (Graves's *Lectures on the Pentateuch*, lect. iv.; Lowman's *Civ. Gov. of the Heb.*, c. iii. iv.; Michaelis, *Mos. Recht*, i. 240, seq.)—J. K.

**PROPHECY.** The principal considerations involved in this important subject may be arranged under the following heads:—

I. *The nature of Prophecy, and its position in the economy of the O. T.*—The view commonly taken of the prophets is, that they were mere predictors of future events; but this view is one-sided and too narrow, though, on the other hand, we must beware of expanding too much the acceptation of the term prophet. Not to mention those who, like Hendewerk, in the introduction to his *Commentary on the Prophet Isaiah*, identify the notion of a prophet with that of an honest and pious man, the conception of those is likewise too wide who place the essential feature of a prophet in his divine inspiration. That this does not meet the whole subject, appears from Num. xii. 6, seq., where Moses, who enjoyed divine inspiration in its highest grade, is represented as differing from those called prophets in a stricter sense, and as standing in contrast with them. Divine inspiration is only the general basis of the prophetic office, to which two more elements must be added:—

I. Inspiration was imparted to the prophets in a *peculiar form*. This appears decisively from the passage in Numbers above cited, which states it as characteristic of the prophet, that he obtained divine inspiration in *visions and dreams*, consequently in a state extraordinary and distinguished from the general one. This mode was different from that in which inspirations were conveyed to Moses and the apostles. The same thing is shown by the names usually given to the prophets, viz., *רֵאִים*, and *חֲזִים*, *seers*, and from this that all prophecies which have come down to us have a poetical

character; which points to an intimate affinity between prophecy and poetry; a subject further illustrated by Steinberg, in his work, *Der Dichter, ein Seher*, Leipzig 1836; though the materials which he gives are not sufficiently digested. The prophetic style differs from that of books properly called poetical, whose sublimity it all but outvies, only in being less restrained by those external forms which distinguish poetical language from prose, and in introducing more frequently than prose does plays upon words and thoughts. This peculiarity may be explained by the practical tendency of prophetic addresses, which avoid all that is unintelligible, and studiously introduce what is best calculated for the moment to strike the hearers. The same appears from many other circumstances, *ex. gr.*, the union of *music* with prophesying, the demeanour of Saul when among the prophets (1 Sam. x. 5), Balaam's description of himself (Num. xxiv. 3) as a man whose eyes were opened, who saw the vision of the Almighty, and heard the words of God, the established phraseology to denote the inspiring impulse, viz., 'the hand of the Lord was strong upon him' (Ezek. iii. 14; comp. Is. viii. 11; 2 Kings iii. 15), etc. All these facts prove that there essentially belonged to prophecy a state of mind worked up—a state of being beside one's self—an ecstatic transport, in which ideas were immediately imparted from heaven. Acute remarks on the subject will be found in the works of Novalis (vol. ii. p. 472, seq.), from which we give the following passage: 'It is a most arbitrary prejudice to suppose that to man is denied the power of going out of himself, of being endued with a consciousness beyond the sphere of sense; he may at any moment be a supersensuous being (*ein übersinnliches Wesen seyn*), else he would be a mere brute, not a rational free-man of the universe. There are, indeed, degrees in the aptitude for revelations; one is more qualified for them than another, and certain dispositions are particularly capable of receiving such revelations; besides, on account of the pressure of sensible objects on the mind, it is in this state difficult to preserve self-possession. Nevertheless there are such states of mind, in which its powers are strengthened, and, so to speak, armed.' The state of ecstasy, though ranking high above the ordinary sensual existence, is still not the highest, as appears from Num. xii., and the example of Christ, whom we never find in an ecstatic state. To the prophets, however, it was indispensable, on account of the frailty of themselves and the people. The forcible working upon them by the Spirit of God, would not have been required if their general life had already been altogether holy; for which reason we also find ecstasy to manifest itself the stronger the more the general life was ungodly; as, for instance, in Balaam, when the spirit of God came upon him (Num. xxiv. 4, 16), and in Saul, who throws himself on the ground, tearing his clothes from his body. With a prophet whose spiritual attainments were those of an Isaiah, such results are not to be expected. As regards the people, their spiritual obtuseness must be considered as very great, to have rendered necessary such vehement excitations as the addresses of the prophets caused. Thus it appears that prophecy has a predominant place in the O. T. Under the N. T. it could take only a subordinate place; although even then it could not be dispensed with,

and hence we find it in the apostolic age. It had to prepare the soil on which the peculiar gifts of the N. T. might flourish, and the lower the church's state, the more it resembled that of the O. T., the greater the need of this. It had also to counteract the risk of barrenness and inefficiency to which the unexciting form of the N. T. system was exposed. To the church in the present day one could wish a copious supply of the prophetic gifts!

2. Generally speaking, every one was a prophet to whom God communicated his mind in this peculiar manner. Thus, *ex. gr.*, Abraham is called a prophet (Gen. xx. 7), not, as is commonly thought, on account of general revelations granted him by God, but because such as he received were in the special form described; as indeed in ch. xv. it is expressly stated that divine communications were made to him in *visions and dreams*. The body of the patriarchs are in the same manner called prophets (Ps. cv. 15). When the Mosaic economy had been established, a new element was added; the prophetic gift was after that time regularly connected with the prophetic office, so that the latter came to form part of the idea of a prophet. Thus Daniel's work was not placed in the collection of prophetic books, because, though eminently endowed with prophetic gifts, he still had not filled the prophetic office. Speaking of office, we do not of course mean one conferred by men, but by God; the mission to Israel, with which the certainty of a continued, not temporary, grant of the *donum propheticum* was connected.

That the Lord would send such prophets was promised to the people by Moses, who by a special law (Deut. xviii. 1) secured them authority and safety. As his ordinary servants and teachers, God appointed the Priests: the characteristic mark which distinguished the prophets from them was inspiration; and this explains the circumstance that, in times of great moral and religious corruption, when the ordinary means no longer sufficed to reclaim the people, the number of prophets increased. The regular religious instruction of the people was no part of the business of the prophets: their proper duty was only to rouse and <sup>persecute</sup> ~~persecute~~ the contrary, viz., that part of the regular <sup>ix. 27)</sup> ~~ix. 27)~~ the prophets was to instruct the people, is <sup>is consi-</sup> ~~is consi-~~ <sup>gued from 2 Kings iv. 23, where it is said</sup> ~~gued from 2 Kings iv. 23, where it is said~~ that the Shunamite on the Sabbaths and days of new moon used to go to the prophet Elisha; but this passage applies only to the kingdom of Israel, and admits of no inference with respect to the kingdom of Judah. As regards the latter, there is no proof that prophets held meetings for instruction and edification on sacred days. Their position was here quite different from that of the prophets in the kingdom of Israel. The agency of the prophets in the kingdom of Judah was only of a subsidiary kind; these extraordinary messengers of the Lord only filled there the gaps left by the regular servants of God, the priests and the Levites; the priesthood never became there utterly degenerate, and each lapse was followed by a revival of which the prophets were the vigorous agents; the divine election always vindicated itself, and in the purity of the origin of the priesthood lay the certainty of its continued renewal. On the contrary, the priesthood in the kingdom of Israel had no divine sanction, no promise; it was corrupt in its very source; to reform itself would have been to dissolve itself; the priests there were

the mercenary servants of the king, and had a brand upon their own consciences. Hence in the kingdom of Israel the prophets were the regular ministers of God; with their office all stood or fell, and hence they were required to do many things besides what the original conception of the office of a prophet implied—a circumstance from the oversight of which many erroneous notions on the nature of prophecy have sprung. This led to another difference, to which we shall revert below, viz., that in the kingdom of Judah the prophetic office did not, as in Israel, possess a fixed organization and complete construction.

In their labours, as respected their own times, the prophets were strictly bound to the Mosaic law, and not allowed to add to it or to diminish ought from it. What was said in this respect to the whole people (Deut. iv. 2; xiii. 1), applied also to them. We find, therefore, prophecy always takes its ground on the Mosaic law, to which it refers, from which it derives its sanction, and with which it is fully impressed and saturated. There is no chapter in the prophets in which there are not several references to the law. The business of the prophets was to explain it, to lay it to the hearts of the people, and to preserve vital its spirit. It was, indeed, also their duty to point to future reforms, when the ever-living spirit of the law would break its hitherto imperfect form, and make for itself another: thus Jeremiah (iii. 16) foretells days when the ark of the covenant shall be no more, and (xxxi. 31) days when a new covenant will be made with the house of Israel and with the house of Judah. But for their own times they never once dreamt of altering any, even the minutest and least essential precept, even as to its form, how much less as to its spirit, which even the Lord himself declares (Matt. v. 18) to be immutable and eternal. The passages which some interpreters have alleged as opposed to sacrifices as instituted by the Mosaic law, have been misunderstood; they do not denounce sacrifices generally, but only those of the Canaanites, with whom sacrifice was not even a form of true worship, but opposed to the genuine and spiritual service of God.

As to prophecy in its circumscribed sense, or the foretelling of future events by the prophets, some expositors would explain all predictions of special events, while others assert that no prediction contains anything but general promises or threatenings, and that the prophets knew nothing of the particular manner in which their predictions might be realised. Both these classes deviate from the correct view of prophecy; the former resort often to the most arbitrary interpretations, and the latter are opposed by a mass of facts against which they are unable successfully to contend; *ex. gr.*, when Ezekiel foretells (ch. xii. 12) that Zedekiah would try to break through the walls of the city and to escape, but that he would be seized, blinded, and taken to Babylon. The frailty of the people, under the O. T., required external evidence of the real connection of the prophets with God, and the predictions of particular forthcoming events were to them *σημεία*, signs. These were the more indispensable to them, because the ancients generally, and the Orientals in particular, showed the greatest tendency towards the exploration of futurity, which tended to foster superstition and forward idolatry. All other methods of

was also proved by miracles, but this occurred only at important crises, when the existence of the kingdom of Israel was in jeopardy, as in the age of Elijah and Elisha. Miracles are mentioned as criteria of true prophets (Deut. xiii. 2), still with this caution, that they should not be trusted alone, but that the people should inquire whether the negative criteria were extant.

(a.) Those prophets whose divine commission had been sufficiently proved, bore testimony to the divine mission of others. It has been observed above, that there was a certain gradation among the prophets; the principals of the colleges of prophets procured authority to the 'sons' of prophets. Thus the deeds of Elijah and Elisha at the same time authenticated the hundreds of prophets whose superiors they were. Concerning the relation of the true prophets to each other the passage 2 Kings ii. 9 is remarkable; Elisha says to Elijah, 'I pray thee, let a double portion of thy spirit be upon me.' Here Elisha, as the first-born of Elijah in a spiritual sense, and standing to him in the same relation as Joshua to Moses, asks for a double portion of his spiritual inheritance, alluding to the law concerning the hereditary right of the lawfully-begotten first-born son (Deut. xxi. 17). This case supposes that other prophets also of the kingdom of Israel took portions of the fulness of the spirit of Elijah. It is plain, then, that only a few prophets stood in immediate communion with God, while that of the remaining was formed by mediation. The latter were spiritually incorporated in the former, and on the ground of this relation, actions performed by Elisha, or through the instrumentality of one of his pupils, are at once ascribed to Elijah, *ex. gr.*, the anointing of Hazael to be king over Syria (1 Kings xix. 15; comp. 2 Kings viii. 13); the anointing of Jehu to be king over Israel (1 Kings xix. 16, comp. 2 Kings ix. 1, *seq.*); the writing of the letter to Joram, etc. Thus, in a certain sense it may be affirmed that Elijah was in his time the only prophet of the kingdom of Israel. Similarly of Moses it is recorded, during his passage through the desert, that a portion of his spirit was conveyed to the seventy elders. The history of the Christian church itself offers analogies; look, *ex. gr.*, at the relation of the second class reformers to Luther and Calvin.

#### VI. *Promulgation of the Prophetic Declarations.*

—Usually the prophets promulgated their visions in public places before the congregated people. Still some portions of the prophetic books, as the entire second part of Isaiah and the description of the new temple (Ezek. xl.-xlviii.), probably were never communicated orally. In other cases the prophetic addresses first delivered orally were next, when committed to writing, revised and improved. Especially the books of the lesser prophets consist, for the greater part, not of separate predictions, independent of each other, but form, as they now are, a whole—that is, give the quintessence of the prophetic labours of their authors. In this case it is certain that the authors themselves caused the collection to be made. But it is so, likewise, in some cases where their books really consist of single declarations, and in others it is at least highly probable. Further particulars concerning the manner in which prophetic rolls were collected and published, we have only respecting Jeremiah, who, being in prison, called Baruch, 'to write from his mouth his predictions, and to read them

in the ears of the people' (Jer. xxxviii. 4-14). There is evidence to prove that the later prophets sedulously read the writings of the earlier, and that a prophetic canon existed before the present was formed. The predictions of Jeremiah throughout rest on the writings of earlier prophets, as Küper has established in his *Jeremias librorum sacrorum interpres atque vindex*, Berlin 1837. Zechariah explicitly alludes to writings of former prophets; 'to the words which the Lord has spoken to earlier prophets, when Jerusalem was inhabited and in prosperity' (Zech. i. 4; vii. 7, 12). In all probability we have complete those predictions which were committed to writing; at least the proofs which Dr. Ewald gives (p. 43, *seq.*) for his opinion of prophecies having been lost do not stand trial. The words 'as the Lord hath said,' in Joel ii. 32, refer to the predictions of Joel himself. In Is. ii. and Micah iv. nothing is introduced from a lost prophetic roll, but Isaiah borrows from Micah. Hosea alludes (ch. viii. 12), not to some unknown work, but to the Pentateuch. In Is. xv. and xvi. the prophet repeats, not another's prediction, but his own, previously delivered, to which he adds a supplement. Obadiah and Jeremiah do not avail themselves of the written address of a former prophet, but Jeremiah makes the prophecy of Obadiah the groundwork of his own. The opinion that in Is. lvi. 10; lvii. 11, there was inserted, unaltered, a long remnant of an older roll, is founded on erroneous views respecting the time of its composition. The same holds good of Is. xxiv., where Ewald would find remnants of several older rolls. The very circumstance, that in the prophets there nowhere occurs a tenable ground for maintaining that they referred to rolls lost and unknown to us, but that they often allude to writings which we know and possess, clearly proves that there is no reason for supposing, with Ewald, that a great number of prophetic compositions has been lost, 'and that of a large tree, only a few blossoms have reached our time.' In consequence of the prophets being considered more organs of God, much care was bestowed on the preservation of their publications. Ewald's some cannot refrain from observing (p. 56), 'We have in Jer. xxvi. 1-19 a clear proof of the exact knowledge which the better classes of the people had of all that had, a hundred years before, happened to a prophet, of his words, misfortunes, and accidents.'

The collectors of the Canon arranged the prophets chronologically, but considered the whole of the twelve lesser prophets as one work, which they placed after Jeremiah and Ezekiel, inasmuch as the three last lesser prophets lived later than they. Daniel was placed in the Hagiographa, because he had not filled the prophetic office. The collection of the lesser prophets themselves was again chronologically disposed; still Hosea is, on account of the extent of his work, allowed precedence before those lesser prophets, who, generally, were his contemporaries, and also before those who flourished at a somewhat earlier period.

On the general subject of prophecy no comprehensive or altogether satisfactory treatise has yet been produced. Some good remarks will be found in the essay of John Smith, *On Prophecy (Select Discourses*, disc. vi. p. 181, 8vo, ed. Lond. 1821), which was translated into Latin and reprinted at the end of Le Clerc's *Commentary on the Prophets*, Amsterdam 1731. It contains interesting passages

and hence we find it in the apostolic age. It had to prepare the soil on which the peculiar gifts of the N. T. might flourish, and the lower the church's state, the more it resembled that of the O. T., the greater the need of this. It had also to counteract the risk of barrenness and inefficiency to which the unexciting form of the N. T. system was exposed. To the church in the present day one could wish a copious supply of the prophetic gifts!

2. Generally speaking, every one was a prophet to whom God communicated his mind in this peculiar manner. Thus, *ex. gr.*, Abraham is called a prophet (Gen. xx. 7), not, as is commonly thought, on account of general revelations granted him by God, but because such as he received were in the special form described; as indeed in ch. xv. it is expressly stated that divine communications were made to him in *visions and dreams*. The body of the patriarchs are in the same manner called prophets (Ps. cv. 15). When the Mosaic economy had been established, a new element was added; the prophetic gift was after that time regularly connected with the prophetic office, so that the latter came to form part of the idea of a prophet. Thus Daniel's work was not placed in the collection of prophetic books, because, though eminently endowed with prophetic gifts, he still had not filled the prophetic office. Speaking of office, we do not of course mean one conferred by men, but by God; the mission to Israel, with which the certainty of a continued, not temporary, grant of the *donum propheticum* was connected.

That the Lord would send such prophets was promised to the people by Moses, who by a special law (Deut. xviii. 1) secured them authority and safety. As his ordinary servants and teachers, God appointed the Priests: the characteristic mark which distinguished the prophets from them was inspiration; and this explains the circumstance that, in times of great moral and religious corruption, when the ordinary means no longer sufficed to reclaim the people, the number of prophets increased. The regular religious instruction of the people was no part of the business of the prophets: their proper duty was only to rouse and excite. The contrary, viz., that part of the regular duty of the prophets was to instruct the people, is often argued from 2 Kings iv. 23, where it is said that the Shunamite on the Sabbaths and days of new moon used to go to the prophet Elisha; but this passage applies only to the kingdom of Israel, and admits of no inference with respect to the kingdom of Judah. As regards the latter, there is no proof that prophets held meetings for instruction and edification on sacred days. Their position was here quite different from that of the prophets in the kingdom of Israel. The agency of the prophets in the kingdom of Judah was only of a subsidiary kind; these extraordinary messengers of the Lord only filled there the gaps left by the regular servants of God, the priests and the Levites; the priesthood never became there utterly degenerate, and each lapse was followed by a revival of which the prophets were the vigorous agents; the divine election always vindicated itself, and in the purity of the origin of the priesthood lay the certainty of its continued renewal. On the contrary, the priesthood in the kingdom of Israel had no divine sanction, no promise; it was corrupt in its very source; to reform itself would have been to dissolve itself; the priests there were

the mercenary servants of the king, and had a brand upon their own consciences. Hence in the kingdom of Israel the prophets were the regular ministers of God; with their office all stood or fell, and hence they were required to do many things besides what the original conception of the office of a prophet implied—a circumstance from the oversight of which many erroneous notions on the nature of prophecy have sprung. This led to another difference, to which we shall revert below, viz., that in the kingdom of Judah the prophetic office did not, as in Israel, possess a fixed organization and complete construction.

In their labours, as respected their own times, the prophets were strictly bound to the Mosaic law, and not allowed to add to it or to diminish ought from it. What was said in this respect to the whole people (Deut. iv. 2; xiii. 1), applied also to them. We find, therefore, prophecy always takes its ground on the Mosaic law, to which it refers, from which it derives its sanction, and with which it is fully impressed and saturated. There is no chapter in the prophets in which there are not several references to the law. The business of the prophets was to explain it, to lay it to the hearts of the people, and to preserve vital its spirit. It was, indeed, also their duty to point to future reforms, when the ever-living spirit of the law would break its hitherto imperfect form, and make for itself another: thus Jeremiah (iii. 16) foretells days when the ark of the covenant shall be no more, and (xxi. 31) days when a new covenant will be made with the house of Israel and with the house of Judah. But for their own times they never once dreamt of altering any, even the minutest and least essential precept, even as to its form, how much less as to its spirit, which even the Lord himself declares (Matt. v. 18) to be immutable and eternal. The passages which some interpreters have alleged as opposed to sacrifices as instituted by the Mosaic law, have been misunderstood; they do not denounce sacrifices generally, but only those of the Canaanites, with whom sacrifice was not even a form of true worship, but opposed to the genuine and spiritual service of God.

As to prophecy in its circumscribed sense, or the foretelling of future events by the prophets, some expositors would explain all predictions of special events, while others assert that no prediction contains anything but general promises or threatenings, and that the prophets knew nothing of the particular manner in which their predictions might be realised. Both these classes deviate from the correct view of prophecy; the former resort often to the most arbitrary interpretations, and the latter are opposed by a mass of facts against which they are unable successfully to contend; *ex. gr.*, when Ezekiel foretells (ch. xii. 12) that Zedekiah would try to break through the walls of the city and to escape, but that he would be seized, blinded, and taken to Babylon. The frailty of the people, under the O. T., required external evidence of the real connection of the prophets with God, and the predictions of particular forthcoming events were to them *σημεία*, signs. These were the more indispensable to them, because the ancients generally, and the Orientals in particular, showed the greatest tendency towards the exploration of futurity, which tended to foster superstition and forward idolatry. All other methods of

knowing future events, by necromancy, conjuration, passing through the fire, etc., having been strictly forbidden (Deut. xviii. 10, 11), it might be expected that the deep-rooted craving for the knowledge of forthcoming events would be gratified in some other and nobler manner. The success of a prophet depended on the gift of special knowledge of futurity; this it is true was granted comparatively to only few, but in the authority thus obtained all those shared who were likewise invested with the prophetic character. It was the seal impressed on true prophecy, as opposed to the false. From 1 Sam. ix. 6, it appears that, to inspire uncultivated minds with the sense of divine truths, the prophets stooped occasionally to disclose things of common life, using this as the means to reach a higher mark. On the same footing with definite predictions stand miracles and tokens, which prophets of the highest rank, as Elijah and Isaiah, volunteered or granted. These also were requisite to confirm the feeble faith of the people; but Ewald justly remarks, that with the true prophets they never appear as the chief point; they only assist and accompany prophecy, but are not its object, not the truth itself, which supersedes them as soon as it gains sufficient strength and influence.

Some interpreters, misunderstanding passages like Jer. xviii. 8; xxvi. 13, have asserted, with Dr. Köster (p. 226, *seq.*), that all prophecies were conditional, and have even maintained that their revocability distinguished the true predictions (*Weissagung*) from soothsaying (*Wahrsagung*). But beyond all doubt, when the prophet denounces the divine judgments, he proceeds on the assumption that the people will not repent, an assumption which he knows from God to be true. Were the people to repent, the prediction would fail; but, because they will not, it is uttered *absolutely*. It does not follow, however, that the prophet's warnings and exhortations are useless. These serve 'for a witness against them;' and besides, amid the ruin of the mass, individuals might be saved. Viewing prophecies as conditional predictions nullifies them. The Mosaic criterion (Deut. xviii. 22), that he was a false prophet who predicted 'things which followed not nor came to pass,' would then be of no value, since recourse might always be had to the excuse, that the case had been altered by the fulfilling of the condition. The fear of introducing fatalism, if the prophecies are not taken in a conditional sense, is unfounded; for God's omniscience, his foreknowledge, does not establish fatalism, and from divine omniscience simply is the prescience of the prophets to be derived. The prophets feel themselves so closely united to God, that the words of Jehovah are given as their own, and that to them is often ascribed what God does, as slaying and reviving (Hos. vi. 5), rooting out nations and restoring them (Jer. i. 10; xviii. 7; Ezek. xxxii. 18; xliii. 3); which proves their own consciousness to have been entirely absorbed into that of God.

The sphere of action of the prophets was absolutely limited to Israel, and there is only one case of a prophet going to the heathen to preach among them, that of Jonah sent to Nineveh. He goes, however, to Nineveh, to shame the Hebrews by the reception which he meets with there, and acting upon his own nation was thus even in this case the prophet's ultimate object. Many pre-

dictions of the O. T. concern, indeed, the events of foreign nations, but they are always uttered and written with reference to Israel, and the prophets thought not of publishing them among the heathens themselves. The conversion of the pagans to the worship of the true God was indeed a favourite idea of the prophets; but the Divine Spirit told them, that it was not to be effected by their exertions, as it was connected with extensive future changes, which they might not forestall.

It needs hardly to be mentioned, that before a man could be a prophet he must be converted. This clearly appears in the case of Isaiah, 'whose iniquity was taken away, and his sin purged,' previous to his entering on his mission to the people of the covenant. For a single momentary inspiration, however, the mere beginning of spiritual life sufficed, as instanced in Balaam and Saul.

The most usual appellation of a prophet is נביא, and Exod. iv. 1-17 is the classical passage as to the meaning of this word. There God says to Moses, 'Aaron shall be thy נביא unto the people, and thou shalt be unto him instead of God.' The sense is: Aaron shall speak what thou shalt communicate to him. This appellation implies, then, the prophet's relation to God: he speaks not of his own accord, but what the Spirit puts into his mouth. This accords also with the etymology of the word, as נבא signifies in the Arabic *produxit*, and next, *protulit verba*, *nunciavit*, *indicavit*. Thus נביא is an adjective of passive signification; he who has been divinely inspired, who has received from God the revela-

tions which he proclaims: it is of the form קטיל, which cannot be proved ever to have an active signification; and hence the common opinion that נביא signifies originally a *speaker*, which has recently been again set up by Dr. Ewald (p. 6), cannot be maintained. While this name refers to divine inspiration, the others are derived from the particular form in which this was communicated to the prophets. These names are חזה and ראה, differing only in the former being more poetical and august. From 1 Sam. ix. 9, some expositors have inferred that the name נביא sprang up after the age of Samuel, and that before this the name ראה had been exclusively in use. But that this view is wrong has been proved in Hengstenberg's 'Contributions towards an Introduction to the Old Testament' (*Beiträge zur Einleitung ins A. T.*, vol. iii. p. 335). Other names, as 'man of God,' etc., do not belong to the prophets as such, but only in so far as they are of the number of servants and instruments of God.

II. *Duration of the Prophetic office.*—Although we meet with cases of prophesying as early as the age of the patriarchs, still the roots of prophetism among Israel are properly fixed in the Mosaic economy. Moses instilled into the congregation of Israel those truths which form the foundation of prophecy, and thus prepared the ground from which it could spring up. In the time of Moses himself we find prophesying growing out of those things which through him were conveyed to the minds of the people. The main business of Moses was not that of a prophet; but sometimes he was in the state of prophetic elevation. In such a state originated

his celebrated song (Deut. xxxii.), which Eichhorn justly calls the Magna Charta of prophecy; and his blessings (Deut. xxxiii.) Miriam, the sister of Aaron, is called a prophetess (Exod. xv. 20; comp. Num. xii. 2, 6), when she took a timbrel and sang to the Lord, who had overthrown the enemy of the children of Israel. The seventy elders are expressly stated to have been impelled by the spirit of God to prophesy. In the age of the Judges, prophecy, though existing only in scattered instances, exerted a powerful influence. Those who would deny this, in spite of the plain evidence of history, do not consider that the influential operation of prophets, flourishing in later times, requires preparatory steps. 'Now only,' says Ewald justly, 'we are able to perceive how full of strength and life was the ground in which prophecy, to attain such an eminence, must have sprung up.' The more conspicuous prophetic agency begins with Samuel, and the prophets' schools which he founded. From this time to the Babylonian exile, there happened hardly any important event in which the prophets did not appear as performing the leading part. But although the influential operation of the prophets begins with Samuel, none of the prophets up to the year B.C. 800 left any written prophecies. This was certainly not a mere accident. Only when the more important and extensive divine judgments approached, it became necessary, by their announcement, to arouse the impious from their slumber of listlessness, and to open to the faithful the stores of consolation and hope. Before this time, the living oral speech of the prophets was the most important thing; but now, when the Lord revealed to them more extensive prospects, when their calling was not restricted to present events merely, but forthcoming momentous changes were conveyed to their notice and consideration, their written words became equally important. About a hundred years after the return from the Babylonian exile, the prophetic profession ceased. The Jewish tradition uniformly states that Haggai, Zechariah, and Malachi were the last prophets. In the first book of the Maccabees (ch. ix. 27) the discontinuance of the prophetic calling is considered as forming an important era in Jewish history; while at the same time an expectation of the renewal in future ages of prophetic gifts is avowed (iv. 46; xiv. 41). After the Babylonian exile the sacred writings were collected, which enabled every one to find the way of salvation; but the immediate revelations to the people of Israel were to cease for awhile, in order to raise a stronger longing for the appearance of the Messiah, and to prepare for him a welcome reception. For the same reason the ark of the covenant had been taken away from the people. The danger of a complete apostasy, which in earlier times might have been incurred by this withdrawal, was not now to be apprehended. The external worship of the Lord was so firmly established, that no extraordinary helps were wanted. Taking also into consideration the altered character of the people, we may add that the time after the exile was more fit to produce men learned in the law than prophets. Before this period, the faithful and the unbelieving were strongly opposed to each other, which excited the former to great exertions. These relaxed when the opposition ceased, and pious priests now took the place of prophets. The time after the exile is characterized by weakness and dependance; the people looked up to the past as to a height which they

could not gain; the earlier writings obtained unconditional authority, and the disposition for receiving prophetic gifts was lost.

III. *Manner of Life of the Prophets.*—The prophets went about poorly and coarsely dressed (2 Kings i. 8), not as a mere piece of asceticism, but that their very apparel might teach what the people ought to do; it was a 'sermo propheticus realis.' Compare 1 Kings xxi. 27, where Ahab does penance in the manner figured by the prophet: 'And it came to pass, when Ahab heard these words, that he rent his clothes, and put sackcloth upon his flesh, and fasted.' Generally the prophets were not anxious of attracting notice by ostentatious display; nor did they seek worldly wealth, most of them living in poverty and even want (1 Kings xiv. 3; 2 Kings iv. 1, 38, 42; vi. 5). The decay of the congregation of God deeply chagrined them (comp. Micah vii. 1, and many passages in Jeremiah). Insult, persecution, imprisonment, and death, were often the reward of their godly life. The author of the Epistle to the Hebrews says (ch. xi. 37): 'They were stoned, they were sawn asunder, were tempted, were slain with the sword: they wandered about in sheep-skins and goat-skins, being destitute, afflicted, tormented' (comp. Christ's speech, Matt. xxiii. 29, *seq.*; 2 Chron. xxiv. 17, *seq.*) The condition of the prophets, in their temporal humiliation, is vividly represented in the lives of Elijah and Elisha in the books of the Kings; and Jeremiah concludes the description of his sufferings in the 20th chapter, by cursing the day of his birth. Repudiated by the world in which they were aliens, they typified the life of Him whose appearance they announced, and whose spirit dwelt in them. They figured him, however, not only in his lowness, but in his elevation. The Lord stood by them, gave evidence in their favour by fulfilling their predictions, frequently proved by miracles that they were his own messengers, or retaliated on their enemies the injury done them. The prophets addressed the people of both kingdoms: they were not confined to particular places, but prophesied where it was required. For this reason they were most numerous in capital towns, especially in Jerusalem, where they generally spoke in the temple. Sometimes their advice was asked, and then their prophecies take the form of answers to questions submitted to them (Is. xxxvii.; Ezek. xx.; Zech. vii.) But much more frequently they felt themselves inwardly moved to address the people without their advice having been asked, and they were not afraid to stand forward in places where their appearance, perhaps, produced indignation and terror. Whatever lay within or around the sphere of religion and morals, formed the object of their care. They strenuously opposed the worship of false gods (Is. i. 10, *seq.*), as well as the finery of women (Is. iii. 16, *seq.*) Priests, princes, kings, all must hear them—must, however reluctantly, allow them to perform their calling as long as they spoke in the name of the true God, and as long as the result did not disprove their pretensions to be the servants of the invisible King of Israel (Jer. xxxvii. 15-21). There were institutions for training prophets; the senior members instructed a number of pupils and directed them. These schools had been first established by Samuel (1 Sam. x. 8; xix. 19); and at a later time there were such institutions in

different places, as Bethel and Gilgal (2 Kings ii. 3; iv. 38; vi. 1). The pupils of the prophets lived in fellowship united, and were called 'sons of the prophets;' whilst the senior or experienced prophets were considered as their spiritual parents, and were styled fathers (comp. 2 Kings ii. 12; vi. 21). Samuel, Elijah, and Elisha, are mentioned as principals of such institutions. From them the Lord generally chose his instruments. Amos relates of himself (vii. 14, 15), as a thing uncommon, that he had been trained in no school of prophets, but was a herdsman, when the Lord took him to prophesy unto the people of Israel. At the same time, this example shows that the bestowal of prophetic gifts was not limited to the schools of the prophets. Women also might come forward as prophetesses, as instanced in Miriam, Deborah, and Huldah, though such cases are of comparatively rare occurrence. We should also observe, that only as regards the kingdom of Israel we have express accounts of the continuance of the schools of prophets. What is recorded of them is not directly applicable to the kingdom of Judah, especially since, as stated above, prophecy had in it an essentially different position. We cannot assume that the organization and regulations of the schools of the prophets in the kingdom of Judah should have been as settled and established as in the kingdom of Israel. In the latter, the schools of the prophets had a kind of monastic constitution: they were not institutions of general education, but missionary stations; which explains the circumstance that they were established exactly in places which were the chief seats of superstition. The spiritual fathers travelled about to visit the training schools; the pupils had their common board and dwelling, and those who married and left, ceased not on that account to be connected with their colleges, but remained members of them. The widow of such a pupil of the schools of prophets, who is mentioned in 2 Kings iv. 1, *seq.*, considered Elisha as the person bound to care for her. The offerings which, by the Mosaic law, were to be given to the Levites, were by the pious of the kingdom of Israel brought to the schools of the prophets (2 Kings iv. 42). The prophets of the kingdom of Israel stood in a hostile position to the priests. These points of difference in the situation of the prophets of the two kingdoms must not be lost sight of; and we further add, that prophecy in the kingdom of Israel was much more connected with extraordinary events than in the kingdom of Judah: the history of the latter offers no prophetic deeds equalling those of Elijah and Elisha. Prophecy in the kingdom of Israel not being grounded on a hierarchy venerable for its antiquity, consecrated by divine miracles, and constantly favoured with divine protection, it needed to be supported more powerfully, and to be legitimized more evidently. In conclusion, it may be observed, that the expression 'schools of the prophets' is not exactly suited to their nature, as general instruction was not their object. The so-called prophets' schools were associations of men endowed with the spirit of God, for the purpose of carrying on their work, the feeble powers of junior members being directed and strengthened by those of a higher class. To those who entered these unions the Divine Spirit had been already imparted, which was the imperative condition of their reception.

IV. *Symbolic Actions of the Prophets.*—In the midst of the prophetic declarations symbolic actions are often mentioned, which the prophets had to perform. The opinions of interpreters on these are divided. Some assert that they always, at least generally, were really done; others assert that they had existence only in the mind of the prophets, and formed part of their visions. The latter view, which was espoused by Calvin, is proved to be correct by a considerable number of such symbolic actions as are either impossible, or inconsistent with decorum. Thus Hosea relates (i. 2-11) of himself 'that the Lord had ordered him to take a wife of whoredoms, for the land had committed great whoredom, departing from the Lord; and that he then had taken Gomer, by whom he had several children. That this is not to be taken as a real fact, is proved by Hengstenberg's *Christologie*, vol. iii. [E. T. i. 158, ff.], where it is shown that the prophet intended only symbolically to depict the idolatrous disposition of his nation. Another symbolic action of Jeremiah prefigures the people's destruction. He says (xiii. 1-10) he had been by the Lord directed to get a linen girdle, to put it on his loins, to undertake a long tour to the Euphrates, and to hide the girdle there in a hole of the rock. He does so, returns, and after many days the Lord again orders him to take the girdle from the place where it was hidden, but 'the girdle was marred and good for nothing.' In predicting the destruction of Babylon and a general war (xxv. 12-38), he receives from the Lord a wine-cup, to cause a number of kings of various nations, among whom the sword would be sent, to drink from it till they should be overcome. He then goes with this cup to the kings of Egypt, Arabia, Persia, Media, and many other countries. When the prophet Ezekiel receives his commission and instructions to prophesy against the rebellious people of Israel, a roll of a book is presented to him, which he eats by the direction of the Lord (Ezek. ii. 9; iii. 2, 3). He is next ordered to lie before the city of Jerusalem on his left side three hundred and ninety days; and when he had accomplished them, on his right side forty days. He must not turn from one side to the other, and he is ordered to bake with dung of man the bread which he eats during this time (Ezek. iv. 4, 8, 12). Isaiah is ordered to walk naked and barefoot, for a sign upon Egypt and Ethiopia (Is. xx. 2, 3). Many other passages of this kind might be adduced from the books of the prophets, which compel us to admit that they state internal, not external facts. This may also further be supported by other reasons. In the records of the prophets, their seeing the Lord, hearing him speak, and addressing him, are no doubt inward acts. Why then not likewise their symbolic representations? The world in which the prophets moved was quite different from the ordinary one; it was not the sensible but the spiritual world. Vision and symbolic action are not opposed; the former is the general class, comprehending the latter as a species. We must, however, not refer all symbolic actions to internal intuition; at least, of a false prophet we have a sure example of an externally performed symbolic action (1 Kings xxii. 11), and the false prophets always aped the true ones (comp. Jer. xix. 1, *seq.*) Inward actions were sometimes, when it was possible and proper, materialized by external performance. They are always at the bottom, and form

the regular, natural explanation of the symbolic actions of the prophets. To attain the intended object, external performance was not always required; the internal action was narrated, and committed to writing. It made a naked statement more intuitive and impressive, and by presenting the subject in a concentrated form, it was preferable to external performance, which could only take place when the sphere of internal action was circumscribed, and did not extend over long periods of time.

V. *Criteria by which True and False Prophets were distinguished.*—As Moses had foretold, a host of false prophets arose in later times among the people, who promised prosperity without repentance, and preached the gospel without the law. The writings of the prophets are full of complaints of the mischief done by these impostors. Jeremiah significantly calls them 'prophets of the deceit of their own heart;' *i. e.*, men who followed the suggestions of their own fancy in prophesying (Jer. xxiii. 26; comp. ver. 16, and chap. xiv. 14). All their practices prove the great influence which true prophetism had acquired among the people of Israel. But how were the people to distinguish true and false prophets? In the law concerning prophets (Deut. xviii. 20; comp. xiii. 7-9), the following enactments are contained:—

1. The prophet *who speaks in the name of other Gods*—*i. e.*, professes to have his revelations from a God different from Jehovah—is to be considered as false, and to be punished capitally; and this even though his predictions should come to pass.

2. The same punishment is to be inflicted on him who speaks in the name of the true God, but *whose predictions are not accomplished.*

These enactments established a peculiar right of the prophets. He who prophesied in the name of the true God was, even when he foretold calamity, entitled to be tolerated, until it happened that a prediction of his failed of accomplishment. He might then be imprisoned, but could not be put to death, as instanced in Jeremiah (xxvi. 8-16), who is apprehended and arraigned, but acquitted: 'Then said the princes and the people unto the king and the prophets, This man is not worthy to die, for he has spoken to us in the name of the Lord our God.' Ahab is by false prophets encouraged to attack Ramoth-gilead, but Micaiah prophesied him no good; on which the king becomes angry, and orders the prophet to be confined (1 Kings xxii. 1-27): 'Take Micaiah and put him in prison, and feed him with bread of affliction, and with water of affliction, until I come in peace.' Micaiah answers (ver. 28), 'If thou return at all in peace, the Lord has not spoken by me.' Until the safe return of the king, Micaiah is to remain in prison; after that, he shall be put to death. The prophet agrees to it, and the king goes up to Ramoth-gilead, but is slain in the battle.

3. From the above two criteria of a true prophet, flows the third, that *his addresses must be in strict accordance with the law.* Whoever departs from it cannot be a true prophet, for it is impossible that the Lord should contradict himself.

4. In the above is also founded the fourth criterion, that *a true prophet must not promise prosperity without repentance;* and that he is a false prophet, 'of the deceit of his own heart,' who does not reprove the sins of the people, and

who does not inculcate on them the doctrines of divine justice and retribution.

In addition to these negative criteria, there were positive ones to procure authority to true prophets. First of all, it must be assumed that the prophets themselves received, along with the divine revelations, assurance that these were really divine. Any true communion with the Holy Spirit affords the assurance of its divine nature; and the prophets could, therefore, satisfy *themselves* of their divine mission. There was nothing to mislead and delude them in this respect; for temporal goods were not bestowed upon them with the gift of prophesying. Their own native disposition was often much averse to this calling, and could be only conquered by the Lord forcibly impelling them, as appears from Jer. xx. 8, 9: 'Since I spake, the word of the Lord was made a reproach unto me, and a derision daily. Then I said, I will not make mention of him, nor speak any more in his name: but his word was in mine heart as a burning fire shut up in my bones, and I was weary with forbearing, and I could not stay.' Now, when the prophets themselves were convinced of their divine mission, they could in various ways prove it to others, whom they were called on to enlighten.

(a.) To those who had any sense of truth, the Spirit of God gave evidence that the prophecies were divinely inspired. This *testimonium spiritus sancti* is the chief argument for the reality of a divine revelation, and he who is susceptible of it does not, indeed, disregard the other proofs suiting the wants of unimproved minds, but lays less stress on them.

(b.) The prophets themselves utter their firm conviction that they act and speak by divine authority, not of their own accord (comp. the often-recurring phrase *יְהוָה אִמְרָה*, Jer. xxvi. 12, etc.) Their pious life bore testimony to their being worthy of a nearer communion with God, and defended them from the suspicion of intentional deception; their sobriety of mind distinguished them from all fanatics, and defended them from the suspicion of self-delusion; their fortitude in suffering for truth proved that they had their commission from no human authority.

(c.) Part of the predictions of the prophets referred to proximate events, and their accomplishment was divine evidence of their divine origin. Whoever had been once favoured with such a testimonial, his authority was established for his whole life, as instanced in *Samuel*. Of him it is said (1 Sam. iii. 19): 'The Lord was with him, and let none of his words fall to the ground (*i. e.*, fulfilled them); and all Israel knew (from this) that Samuel was established to be a prophet of the Lord.' Of the divine mission of Isaiah no doubt could be entertained after, for instance, his prophecies of the overthrow of Sennacherib before Jerusalem had been fulfilled. The credentials of the divine mission of Ezekiel were certified when his prediction was accomplished, that Zedekiah should be brought to Babylon, but should not see it, for the king was made prisoner and blinded (Ezek. xii. 12, 13); they were further confirmed by the fulfilment of his prediction concerning the destruction of the city (Ezek. xxiv.) Jeremiah's claims were authenticated by the fulfilment of his prediction that Shallum, the son of Josiah king of Judah, should die in his prison, and see his native country no more (Jer. xxii. 11, 12).

(d.) Sometimes the divine mission of the prophets

was also proved by miracles, but this occurred only at important crises, when the existence of the kingdom of Israel was in jeopardy, as in the age of Elijah and Elisha. Miracles are mentioned as criteria of true prophets (Deut. xiii. 2), still with this caution, that they should not be trusted alone, but that the people should inquire whether the negative criteria were extant.

(2.) Those prophets whose divine commission had been sufficiently proved, bore testimony to the divine mission of others. It has been observed above, that there was a certain gradation among the prophets; the principals of the colleges of prophets procured authority to the 'sons' of prophets. Thus the deeds of Elijah and Elisha at the same time authenticated the hundreds of prophets whose superiors they were. Concerning the relation of the true prophets to each other the passage 2 Kings ii. 9 is remarkable; Elisha says to Elijah, 'I pray thee, let a double portion of thy spirit be upon me.' Here Elisha, as the first-born of Elijah in a spiritual sense, and standing to him in the same relation as Joshua to Moses, asks for a double portion of his spiritual inheritance, alluding to the law concerning the hereditary right of the lawfully-begotten first-born son (Deut. xxi. 17). This case supposes that other prophets also of the kingdom of Israel took portions of the fulness of the spirit of Elijah. It is plain, then, that only a few prophets stood in immediate communion with God, while that of the remaining was formed by mediation. The latter were spiritually incorporated in the former, and on the ground of this relation, actions performed by Elisha, or through the instrumentality of one of his pupils, are at once ascribed to Elijah, *ex. gr.*, the anointing of Hazael to be king over Syria (1 Kings xix. 15; comp. 2 Kings viii. 13); the anointing of Jehu to be king over Israel (1 Kings xix. 16, comp. 2 Kings ix. 1, *seq.*); the writing of the letter to Joram, etc. Thus, in a certain sense it may be affirmed that Elijah was in his time the only prophet of the kingdom of Israel. Similarly of Moses it is recorded, during his passage through the desert, that a portion of his spirit was conveyed to the seventy elders. The history of the Christian church itself offers analogies; look, *ex. gr.*, at the relation of the second class reformers to Luther and Calvin.

VI. *Promulgation of the Prophetic Declarations.*—Usually the prophets promulgated their visions in public places before the congregated people. Still some portions of the prophetic books, as the entire second part of Isaiah and the description of the new temple (Ezek. xl.-xlviii.), probably were never communicated orally. In other cases the prophetic addresses first delivered orally were next, when committed to writing, revised and improved. Especially the books of the lesser prophets consist, for the greater part, not of separate predictions, independent of each other, but form, as they now are, a whole—that is, give the quintessence of the prophetic labours of their authors. In this case it is certain that the authors themselves caused the collection to be made. But it is so, likewise, in some cases where their books really consist of single declarations, and in others it is at least highly probable. Further particulars concerning the manner in which prophetic rolls were collected and published, we have only respecting Jeremiah, who, being in prison, called Baruch, 'to write from his mouth his predictions, and to read them

in the ears of the people' (Jer. xxxviii. 4-14). There is evidence to prove that the later prophets sedulously read the writings of the earlier, and that a prophetic canon existed before the present was formed. The predictions of Jeremiah throughout rest on the writings of earlier prophets, as Küper has established in his *Jeremias librorum sacrorum interpres atque vindex*, Berlin 1837. Zechariah explicitly alludes to writings of former prophets; 'to the words which the Lord has spoken to earlier prophets, when Jerusalem was inhabited and in prosperity' (Zech. i. 4; vii. 7, 12). In all probability we have complete those predictions which were committed to writing; at least the proofs which Dr. Ewald gives (p. 43, *seq.*) for his opinion of prophecies having been lost do not stand trial. The words 'as the Lord hath said,' in Joel ii. 32, refer to the predictions of Joel himself. In Is. ii. and Micah iv. nothing is introduced from a lost prophetic roll, but Isaiah borrows from Micah. Hosea alludes (ch. viii. 12), not to some unknown work, but to the Pentateuch. In Is. xv. and xvi. the prophet repeats, not another's prediction, but his own, previously delivered, to which he adds a supplement. Obadiah and Jeremiah do not avail themselves of the written address of a former prophet, but Jeremiah makes the prophecy of Obadiah the groundwork of his own. The opinion that in Is. lvi. 10; lvii. 11, there was inserted, unaltered, a long remnant of an older roll, is founded on erroneous views respecting the time of its composition. The same holds good of Is. xxiv., where Ewald would find remnants of several older rolls. The very circumstance, that in the prophets there nowhere occurs a tenable ground for maintaining that they referred to rolls lost and unknown to us, but that they often allude to writings which we know and possess, clearly proves that there is no reason for supposing, with Ewald, that a great number of prophetic compositions has been lost, 'and that of a large tree, only a few blossoms have reached our time.' In consequence of the prophets being considered as organs of God, much care was bestowed on the preservation of their publications. Ewald himself cannot refrain from observing (p. 56), 'We see in Jer. xxvi. 1-19 a clear proof of the exact knowledge which the better classes of the people had of all that had, a hundred years before, happened to a prophet, of his words, misfortunes, and accidents.'

The collectors of the Canon arranged the prophets chronologically, but considered the whole of the twelve lesser prophets as one work, which they placed after Jeremiah and Ezekiel, inasmuch as the three last lesser prophets lived later than they. Daniel was placed in the Hagiographa, because he had not filled the prophetic office. The collection of the lesser prophets themselves was again chronologically disposed; still Hosea is, on account of the extent of his work, allowed precedence before those lesser prophets, who, generally, were his contemporaries, and also before those who flourished at a somewhat earlier period.

On the general subject of prophecy no comprehensive or altogether satisfactory treatise has yet been produced. Some good remarks will be found in the essay of John Smith, *On Prophecy (Select Discourses)*, disc. vi. p. 181, 8vo, ed. Lond. 1821, which was translated into Latin and reprinted at the end of Le Clerc's *Commentary on the Prophets*, Amsterdam 1731. It contains interesting passages

on the nature of the predictions in the O. T., extracted from Jewish authors, of whom Maimonides is the most distinguished. Of less importance is the essay of Hermann Witsius, *De Prophetia et Prophetis*, in vol. i. of his *Miscellan. Sacra*, Utrecht 1692, pp. 1-392: he digresses too much and needlessly from the main question, and says little applicable to the point; but he still supplies some useful materials. The same remark also applies in substance to Knibbe's *History of the Prophets*. Some valuable remarks, but much more that is arbitrary and untenable, will be found in Crusius's *Hypomnemata ad Theologiam Prophet.*, 3 vols. Lips. 1764. In the *Treatise on Prophecy*, inserted by Jahn in his *Introduction to the O. T.*, he endeavours to refute the views of the Rationalists, but does not sift the subject to the bottom. Kleuker's work *De Nexu Proph. inter utrumque Fœdus*, possesses more of a genuine theological character. The leader of the Rationalists is Eichhorn, in his *Introduction to the O. T.*, and in his dissertation, *De Prophet. Poes. Hebr.* Their views on this subject are most fully explained by Knobel, in his *Prophetismus der Hebræer vollständig dargestellt*, Breslau 1837, 2 vols.: the work contains, however, little original research, and is valuable only as a compilation of what the Rationalists assert concerning prophecy. The work of Köster, *Die Propheten des A. und N. T.*, Leipzig 1838, bears a higher character: on many points he approaches to sounder views; but he is inconsistent and wavering, and therefore cannot be said to have essentially advanced the knowledge of this subject. Of considerable eminence is the treatise by Ewald on prophecy, which precedes his work on the prophets, published in 1840 at Stuttgart. But to the important question, whether the prophets enjoyed supernatural assistance or not? an explicit answer will here be sought for in vain. His view of the subject is in the main that of the Rationalists, though he endeavours to veil it: the Spirit of God influencing the prophets is in fact only their own mind worked up by circumstances; their enthusiasm and ecstasy are made to explain all. Finally, the work of Hoffmann, *Weissagung und Erfüllung im A. und N. T.*, Nördlingen 1841, vol. i., is chargeable with spurious and affected originality; his views are often in their very details forced and strained; and it is to be regretted that the subject has by this work gained less than from the author's talent might have been expected.—E. W. H.

PROPHIAT DURAN (פרופיית דורן), whose Hebrew name was Isaac b. Moses Ha-Levi, and who is called by Christian writers Ephodi, Ephodaus = אפר, being a contraction of the initials of אפרח אפרח פרופיית דורן or אפר, thus said, or I, *Prophiat Duran*, which was the signature of this celebrated grammarian and polemical writer against Christianity. He flourished A.D. 1360-1412, and was driven by the bitter persecutions of the Jews in Catalonia, 1391, outwardly to embrace Christianity to save his life. It was this which embittered him against the benighted Christianity of those days, and which made him employ his great learning and keen sarcasm against a religion which, in the name of love, nearly exterminated all his co-religionists. His works which are of importance to the Biblical student and to Christology, are as follows:—(1.) A Hebrew grammar called אפרח אפרח, *the Work of Ephodi*, divided into thirty-two chapters, with an interesting and elaborate introduction. He was the first who demonstrated that the *Niphal* has a reflexive or reciprocal instead of the passive meaning. This important grammar, which he finished in 1403, has not as yet been published entire. Some fragments of it are printed in the notes to Goldberg's edition of Ibn Ganach's *Sepher Ha-Rikma*, p. 15; in Filippowski's edition of Menachen Ibn Saruk's Hebrew and Chaldee Lexicon, p. 76, London 1854, and by Jacob b. Chajim in his *Introduction to the Rabbinic Bible*, pp. 6, 11, ed. Ginsburg, London 1865. (2.) A commentary on two sections of Ibn Ezra's Exposition of the Pentateuch, De Rossi, No. 835. (3.) A commentary on Ibn Ezra's enigma on the quiescent letters. (4.) The celebrated polemical work against Christianity, entitled כליות הגוים, *the Reproach of the Gentiles*, in twelve chapters, which has not as yet been published. An extract of it, as well as the contents of the chapters, are given in the Catalogue of Michael's Library, p. 364-65, Hamburg 1848; and (5.) The polemical epistle entitled אל תהי כאבתך, *Be not like thy Fathers*, called by Christian writers *Altiabotica*, which is a corruption of the Hebrew name. This celebrated work was first published in Constantinople 1577, in a collection of other treatises. It was then republished by A. Günzburg in the collection קובץ ויכוחים, Breslau 1844; the name of the editor and the place of printing are not given. Geiger published a German translation of it in his *Wissenschaftliche Zeitschrift*, vol. iv., p. 452, seq., Stuttgart 1839. Comp. Fürst, *Bibliotheca Judaica*, i. 215; Steinschneider, *Catalogus Libr. Hebr. in Bibliotheca Bodleiana*, col. 2112-2119; Graetz, *Geschichte der Juden*, vol. viii., pp. 94, etc.; 403, etc.; Leipzig 1864.—C. D. G.

PROSELYTE (προσηλυτος), the name applied in the N. T. and the Sept. to converts from heathenism to Judaism (προσηλυτος οἱ ἐξ ἐθνῶν προσεληλυθότες καὶ κατὰ τοὺς θελοὺς πολιτευόμενοι νόμους, Suidas, *in voc.*) The Hebrew word for which the LXX. use this is גֵר, *stranger, advena*.

Of these גֵרִים there were always from the earliest periods of Israelitish history numbers who on various accounts were settled among the people of Israel, and were distinguished from such foreigners as merely visited the land (נָכַר, נְכָרִי), and such as dwelt in it, but had no rights as citizens (תּוֹשֵׁב). They were incorporated with the chosen people

by circumcision (מְתִיזִים, *loudaizōtes*), and shared with them in the privileges of the covenant. It is probable that slaves who were circumcised, being thereby privileged to partake of the pass-over (Exod. xii. 44), were in a sense counted proselytes; and certainly the children of heathen slaves 'born in the house' (וְלִדְי בֵּית) were circumcised, and as part of the household reckoned among the worshippers of Jehovah, though being still retained in bondage they could not stand on an equal footing with a freeborn Israelite. There was no law or regulation which forbade any foreigner (excepting an Ammonite or Moabite, Deut. xxiii. 3) who chose to accept the prescribed conditions to enter the community of Israel, and become a partaker of its advantages; only in the case of an Egyptian and an Edomite this could not be done till the third generation (Deut. xxiii. 7, 8). Those thus received into the congregation had the same privileges as born-Israelites (Exod. xii. 48, 49; Num. xv. 14). It was, however, forbidden to a priest to marry the daughter of a proselyte (Lev. xxi. 14; comp. Ezek. xlv. 22), a prohibition which probably had respect to the ceremonial purity and sanctity of the priestly office (Lightfoot, *Hor. Heb.* in Luc. i. 5; Joseph. *Cont. Ap.* i. 7; *Antiq.* xi. 3. 10). Nor could a proselyte hold any public office, or be a member of the Sanhedrim, unless his mother was an Israelite; and even in this case he could not be king, or general, or president of the supreme council (Maimon., *Hilk. Sanh.*, ii. 9; *Melach.* i.) Even when a stranger did not become a proselyte, he might reside in the land, and even be employed near the person of the sovereign (comp. 2 Sam. xi. 6; xv. 18; xxiv. 16-24; 1 Chron. xi. 39, 46), provided he did not offend by indulging in heathen abominations or blasphemy (Lex. xvii. 10, ff.; xx. 2; xxiv. 16). Among proselytes to Judaism, though of an inferior class, may be ranked the Nethinim [NETHINIM]. When the Jews returned from Babylon, a number of proselytes went up with them (Neh. x. 28; comp. Esther viii. 17). The whole Jewish state was considered as composed of the two classes, Jews, and strangers within their gates, or proselytes. In later years this distinction was observed even to the second generation; a child of pure Jewish descent on both sides being designated עברי בן עברי, 'Ἑβραῖος ἐξ Ἑβραίων' (Phil. iii. 5), whilst the son of a proselyte was denominated בְּנֵי גֵר; and if both parents were proselytes he was styled by the Rabbins בְּנֵי גֵר, a contraction for בְּנֵי גֵר וּבְנֵי גֵרָה (*Pirke Avoth.* cap. 5).

In the earlier and better ages of Judaism, though in accordance with the law (Exod. xii. 48; Lev. xvii. 8; Num. xv. 15, etc.), which made provision for the reception of strangers, they were freely admitted, no special encouragement seems to have been given to proselytism; on the contrary, the fear of tempting to it by improper motives those who still retained the taint of heathenism, induced a disposition rather to throw impediments in the way of converts uniting themselves to the Jewish community. At a later period this strictness became greatly relaxed, and even a fanatical desire to make proselytes by any means took possession of the minds of Jewish religionists. Our Lord charges it on the Pharisees, that they compassed sea and land to make one proselyte, and declares that the result of their unprincipled zeal was

only to make him twofold more the child of hell than themselves (Matt. xxiii. 15)—a charge the truth of which may be amply substantiated from the pages of the historian (cf. Joseph. *Antiq.* xiii. 9. 1; 11. 3; xviii. 3. 4; *Vit.* 23; *Hor.*, *Sal.* i. 4. 142; Dio, xxxviii. p. 21, and the other passages cited by Wetstein in his note on Matt. xxiii. 15). These proselytes were not respected either by the heathen whom they had left, or by the Jews to whom they had gone over; while the former applied to them opprobrious epithets, such as 'curtus' and 'verpes' (*Hor.*, *Sal.* i. 4. 142; *Mart.*, vii. 29, 34, 81, etc.), and subjected them to various indignities and oppressions (Sueton., *Claud.*, 25; *Domit.* 12; *Tacit.*, *Ann.*, ii. 85); the latter, if we may judge from the Talmud, regarded them with aversion and suspicion, speaking of them as a leprous scab on Israel (לִישָׁאֵל כִּנְנֵעַ צֶרַע, *Jeſam.* xlvii. 4), classing them with the most flagitious characters (Lightfoot, *Hor. Heb.* in Matt. xxiii. 15), and pronouncing them unworthy of trust even to the 24th generation (Jalkuth Ruth f. 163, etc.) That many of the proselytes, however, were true converts, drawn by purely religious motives to join the Jewish community, we have the best assurance in the notices given of them in the N. T., where they were spoken of as φοβούμενοι or σεβόμενοι τὸν Θεόν, εὐσεβεῖς, and εὐλαβεῖς (Acts x. 2, 7; xiii. 16, 26, 43, 50; xvi. 14; xvi. 4, 17; xviii. 7; ii. 5; comp. John xii. 20; Joseph. *Antiq.* xiv. 7. 2); though it may be doubted if all to whom these terms are applied had formally become Jews by circumcision; many of them probably were persons who had accepted the religious beliefs of the Jews without having incorporated themselves with the Jewish nation.

The Rabbins have introduced a distinction between Proselytes of Righteousness (בְּרִי הַצֶּדֶק), called also Sons of the Covenant (בְּנֵי הַבְּרִית) or Full Israelites (יִשְׂרָאֵלִים גְּמֹורִים), and Proselytes of the Gate (בְּרִי הַשַּׁעַר), so called, according to some, in allusion to the phrase, stranger within thy gates (Exod. xx. 10, etc.); according to others, because they could not come beyond the door of the temple. Under the latter they included those converts from heathenism who had so far renounced idolatry as to become worshippers of the one God, and to observe, generally, what have been called the seven Noachic precepts, viz., against idolatry, profanity, incest, murder, dishonesty, eating blood, or things strangled, and allowing a murderer to live, but had not formally enrolled themselves in the Jewish state. The former they composed of those who had submitted to circumcision, and in all respects become converts to Judaism. The accuracy of this distinction, however, has been called in question by several, especially by Lardner, whose arguments appear decisive of the question (*Works*, vol. vi., pp. 522-533; vol. xi., pp. 313-324, 8vo edit. 1788). That there were, in later times especially, many among the Jews who had renounced the grosser parts of heathenism without having come over entirely to Judaism, is beyond all doubt; but that these were ever counted *proselytes* admits of question. It is probable that the distinction above mentioned was introduced by the later Rabbins for the sake of including among the conquests of their religion those who, though indebted probably to the Jewish Scriptures for their im-

proved faith, were yet not inclined to submit to the ritual of Judaism, or to become incorporated with the Jewish nation. That this, however, was not the ancient view is clearly apparent from a passage in the Babylonian Gemara, quoted by Lightfoot (*Hor. Heb. et Talm. in Matt.* iii. 6), where it is said expressly that 'No one is a proselyte until such time as he has been circumcised.' Fürst, himself a Jew, confirms our suggestion; for in a note upon the word גר, in his *Concordantiæ Libb. V. T.*, he says: 'Judæi, interpretatione magis dogmatica quam historica, de eo interpretantur qui superstitiones barbaras repudiavit.'

The rites by which a proselyte was initiated are declared by the Rabbins to have been, in the case of a man, three, viz., *circumcision, baptism, and a free-will sacrifice* (במילה ובטבילה ובהוצאת) (דמים של קרבן); in the case of a woman the first was of necessity omitted. Circumcision was performed as in the case of a child, only that the presence of three witnesses was required: where a heathen already circumcised was admitted, a slight incision was made in the foreskin and a few drops of blood drawn forth. The proselyte then received a new name, which was the one that first presented itself on the opening of the Bible. It was not, however, until he had been baptized that the convert was fully received. According to the Rabbins, baptism was even more essential than circumcision. The ceremony was performed after the healing of the wound caused by the circumcision, in the presence of three persons who had acted as the instructors of the convert, and were regarded as not only witnesses for his baptism, but, with reference to the idea of a new birth therewith connected, as his fathers. Having stripped himself, cut his hair, and pared the nails on his hands and feet, he went into the water up to the arms; the laws were then read to him, and having promised to obey them, he immersed himself wholly. Females were attended to the bath by persons of their own sex, while their teachers stood outside the door. After their immersion they received a new name. When a proselyte had young children, these were baptized with their parents. Having been thus by circumcision and baptism received into the Israelitish community, the convert had to celebrate his entrance by the presentation of an offering unto God, without which no one could approach the Lord. The offering consisted of a bullock, or a pair of turtle doves, or two pigeons. After the destruction of the temple a vow to present an offering was accepted instead of the offering which could no longer be presented (Maimon. *Hilc. Issur.*, c. 13, l. 4, 5).

As to the first and last of these observances, their claim to be regarded as accordant with the ancient practice of the Jews has been on all hands admitted without scruple; but it has been matter of keen question whether the second can be admitted to have been practised before the Christian era. The substance of much learned discussion on this head we shall attempt summarily to state.

There is no *direct* evidence that this rite was practised by the Jews before the 2d or 3d century of the Christian era; but the fact that it was practised by them then necessitates the inquiry, when and how did such a custom arise among

them? That they borrowed it from the Christians is an opinion which, though supported by De Wette (in his treatise *De Morte Christi expiatoriâ*, p. 60), cannot be admitted when we consider the implacable hatred with which the Jews for many centuries regarded Christianity, its ordinances, and its professors. Laying aside this view, there are only two others which have been suggested. The one is that proselyte baptism was practised among the Jews from a period long anterior to the birth of Christ; the other is that the custom of baptizing proselytes arose gradually out of the habit which the Jews had of purifying by ablution whatever they deemed unclean, and came to be raised for the first time to the importance of an initiatory ordinance after the destruction of the temple-service, and when, in consequence of imperial edicts, it became difficult to circumcise converts. This latter opinion is that of Schneckenburger (*Ueb. das Alter d. Jüd. Proselytentaufe*, Berlin 1828), and has been espoused by several eminent German scholars. To us, however, it appears exceedingly unsatisfactory. The single fact adduced in support of it—viz., the difficulty of circumcising converts in consequence of the imperial edicts against proselytism—is a singularly infelicitous piece of evidence; for, as the question to be solved is, How came the later Rabbins to prescribe *both* baptism and circumcision as initiatory rites for proselytes? it is manifestly absurd to reply that it was because they could only baptize and could not circumcise: such an answer is a contradiction, not a solution of the question. Besides, this hypothesis suggests a source of proselyte baptism which is equally available for that which it is designed to supersede; for, if the practice of baptizing proselytes on their introduction into Judaism had its rise in the Jewish habit of ablution, why might not this have operated in the way suggested, two hundred years before Christ, as well as two hundred years after Christ? And in fine, this hypothesis still leaves unremoved the master difficulty of that side of the question which it is designed to support, viz., the great improbability of the Jews adopting for the first time subsequently to the death of Christ, a religious rite which was well known to be the initiatory rite of Christianity. Assuming that they practised that rite before, we can account for their not giving it up simply because the Christians had adopted it; but, trace it as we please to Jewish customs and rites, it seems utterly incredible that *after* it had become the symbol and badge of the religious party which of all others perhaps the Jews most bitterly hated, any consideration whatever should have induced them to *begin* to practise it. On the other hand we have, in favour of the hypothesis that proselyte baptism was practised anterior to the time of our Lord, some strongly corroborative evidence. We have, in the first place, the unanimous tradition of the Jewish Rabbins, who impute to the practice an antiquity commensurate almost with that of their nation. 2dly, We have the fact that the baptism of John the Baptist was not regarded by the people as aught of a novelty, nor was represented by him as resting for its authority upon any special divine revelation. 3dly, We have the fact that the Pharisees looked upon the baptism both of John and Jesus as a mode of proselyting men to their religious views (John iv. 1-3), and that the dispute between the Jews and some of John's disciples about purifying was apparently a dispute as to the competing claims of John and

Jesus to make proselytes (John iii. 25, *seq.*) 4thly, We have the fact, that on the day of Pentecost Peter addressed to a multitude of persons collected from several different and distant countries, Jews and proselytes, an exhortation to 'repent and be baptized' (Acts ii. 38), from which it may be fairly inferred that they all knew what baptism meant, and also its connection with repentance or a change of religious views. 5thly, We have the fact, that according to Josephus, the Essenes were in the habit, before admitting a new convert into their society, solemnly and ritually to purify him with waters of cleansing (*De Bell. Jud.* ii. 8. 7), a statement which cannot be understood of their ordinary ablutions before meals (as Mr. Stuart proposes in his *Essay on the Mode of Baptism*, p. 67); for Josephus expressly adds, that even after this lustration two years had to elapse before the neophyte enjoyed the privilege of living with the Proficients. And, 6thly, We have the mode in which Josephus speaks of the baptism of John, when, after referring to John's having exhorted the people to virtue, righteousness, and godliness, as preparatory to baptism, he adds, 'For it appeared to him that baptism was admissible not when they used it for obtaining forgiveness of some sins, but for the purification of the body when the soul had been already cleansed by righteousness' (*Antiq.* xviii. 5. 2); which seems to indicate the conviction of the historian that John did not *introduce* this rite, but only gave to it a peculiar meaning. A passage has also been cited from Arrian's *Discourses of Epictetus* (ii. 9), in which, after stating that some who called themselves Jews yet played a double part, he adds, 'But if any one assume the condition (or endure the suffering, ἀναλάβῃ τὸ πάθος) of one who has been baptized and convicted (ἡγημένον, instead of which some have conjectured that περιηρημένον, *circumcised*, is the true reading), then is he indeed a Jew, and is called such.' Were one sure that in this passage Arrian did not confound Jews with Christians, his testimony would be of great value in regard to the antiquity of Jewish baptism; but the doubt attaching to this point, and the general obscurity of the passage (which we have translated somewhat differently from the usual rendering, but as the words seem to us to require), make it unsafe to lay much stress upon it.

On these grounds we adhere to the opinion that proselyte baptism was known as a Jewish rite anterior to the birth of Christ. The reader will find the whole subject amply discussed in the following works: Selden, *De Jure Nat. et Gent.*, ii. 2; Otho, *Lex. Rab.*, p. 65; Lightfoot, *Hor. Heb. et Talm. in Talm.* iii. 6; Danz in Meuschenii *Nov. Test. ex Talm. Illust.*, p. 233, *seq.*; Witsius, *Oecon. Foed.*, iv. 15; Kuinoel, *Comm. in Libros N. T. Histor. ap. Matt.* iii. 6; Jahn, *Bibl. Archæol.*, Pt. III., p. 219; and Halley, *The Sacraments*, Pt. I. *Baptism*, Lond. 1844, p. 114, ff.—all of whom contend for the antiquity of Jewish proselyte baptism, whilst the following take the opposite side: Ernesti, *Opusc. Thecoll.*, p. 255, ff.; Wernsdorff, *Controuv. de Bapt. Recent.*, sec. 18; Carpzov, *Apparat.*, p. 47, *seq.*; Paulus, *Comment.*, i. 279; Bauer, *Gottesdienst. Verfassung der Alten Heb.*, ii. 392; Schneckenburger, *Lib. sup. cit.*; De Wette, *do.*; and Moses Stuart, *do.* (*American Bib. Rep.*, No. X.)

It is worthy of notice that it was chiefly among the female sex that the proselytising Jews made

converts, a fact which has been ascribed to the dislike of the males to submit to circumcision. Josephus tells us that nearly all the women at Damascus were attached to Judaism (*Ibid.* ii. 20. 2; comp. *Antiq.* xviii. 4. 5; xx. 7. 11; *De Bell. Jud.* ii. 18. 2, etc.; *Juv. Sat.*, vi. 543, ff.; *Tacit. Hist.* v. 5; *Dion. Cass.* 37, p. 21).

On the subject of this article generally, besides the works of Carpzov, Bauer, and Otho, already referred to, the reader may consult Jahn, *Archæologie*, iii. 215, ff.; Leusden, *Phil. Hebr. Mixt.*, p. 142, *seq.*; Altling, *Diss. de Proselytis*; Ugolino, *Thes.* 27; Schröder, *Satzungen und Gebräuche des Talm. Rabb. Judenthums*; Saalschütz, *Mosaisch. Recht*, ii. 690, ff., 704, ff., and the article 'Proselyten,' by Leyrer in Herzog's *Real Encycl.*, xii. 237.—W. L. A.

PROSEUCHA (προσευχή), a word signifying 'prayer,' and always so translated in the A. V. It is, however, applied, *per meton.*, to a place of prayer,—a place where assemblies for prayer were held, whether a building or not. In this sense it seems also to be mentioned in Luke vi. 12, where it is said that our Saviour went up into a mountain to pray, and continued all night ἐν τῇ προσευχῇ τοῦ Θεοῦ, which can hardly bear the sense our translators have put upon it, 'in prayer to God.' This is admitted by Whitby and others, who infer, from the use of parallel phrases, such as 'the mount of God,' 'the bread of God,' 'the altar of God,' 'the lamp of God,' etc., which were all things consecrated or appropriated to the service of God, that the phrase προσευχῇ τοῦ Θεοῦ might here signify 'an oratory of God,' or a place that was devoted to his service, especially for prayer. In the same sense the phrase must, still more certainly, be understood in Acts xvi. 13, where we are informed that Paul and his companions, on the sabbath day, went out of the city, by the river side, οὗ ἐνομιζέτο προσευχῇ εἶναι, which the A. V. renders 'where prayer was wont to be made.' But the Syriac here has, 'because there was perceived to be a house of prayer;' and the Arabic, 'a certain place which was supposed to be a place of prayer.' In both these versions due stress is laid upon οὗ ἐνομιζέτο: where there was taken or supposed to be, or where according to received custom there was, or where there was allowed by law, a proseucha or oratory; and where, therefore, they expected to meet an assembly of people. Bos contends (*Exercit. Philol.*, in loc.), however, that the word ἐνομιζέτο is redundant, and that the passage ought simply to be, 'where there was a proseucha;' but in this he is ably opposed by Elsner (*Observ. Sacr.*, in loc.)

That there really were such places of devotion among the Jews is unquestionable. They were mostly outside those towns in which there were no synagogues, because the laws or their administrators would not admit any. This was, perhaps, particularly the case in Roman cities and colonies (and Philippi, where this circumstance occurred, was a colony); for Juvenal (*Sat.* iii. 296) speaks of proseuchæ, not synagogues, at Rome:

'Ede, ubi consistas; in qua te quæro proseucha?'

They appear to have been usually situated near a river, or the sea-shore, for the convenience of

ablution (Joseph. *Antiq.* xiv. 10. 23). Josephus repeatedly mentions proseuchæ in his Life, and speaks of the people being gathered *eis tîn proseuchên* (*Vita*, sec. 44. 46). Sometimes the proseucha was a large building, as that at Tiberias (*l. c.* sec. 54), so that the name was sometimes applied even to synagogues (Vitringa, *Synag. Vet.*, p. 119). Proseuchæ are frequently mentioned as buildings by Philo, particularly in his oration against Flaccus, where he complains that the *προσευχαι* of the Jews were pulled down, and that no place was left them in which to worship God and pray for Cæsar (Philo, in *Flacc. Opera*, p. 752). But, for the most part, the proseuchæ appear to have been places in the open air, in a grove, or in shrubberies, or even under a tree, although always, as we may presume, near water, for the convenience of those ablutions which with the Jews always preceded prayer, as, indeed, they did among the pagans, and as they do among the Moslems at the present day. The usages of the latter exhibit something answering to the Jewish proseuchæ, in the shape of small oratories, with a niche indicating the direction of Mecca, which is often seen in Moslem countries by the side of a spring, a reservoir, or a large water-jar, which is daily replenished for the use of travellers (Whitby, *De Dieu*, Wetstein, Kuinoel, on Acts xvi. 13; Jennings's *Jewish Antiquities*, pp. 379-382; Prideaux's *Connection*, ii. 556).—J. K.

PROVERBS, BOOK OF. *Title*.—As in the Pentateuch, the Book of Proverbs takes its Hebrew title from its opening words—*מִשְׁלֵי שְׁלֹמֹה*, or *מִשְׁלֵי* simply. From this are directly derived the titles it bears in the LXX. (*παραβολαι Σαλομωνος*) and Vulgate ('Liber Proverbiorum quam Hebræi 'Misle' appellant'), and the name by which it is universally known. Another title, perhaps more appropriate to the book as a whole, is derived from its chief subject, 'Wisdom.' In the Tosaphoth to Baba Bathra we find Proverbs and Ecclesiastes combined under the name *סֵפֶר הַחִכְמָה*, 'the book of wisdom,' and this title appears to have passed thence into the early church. Clemens Rom. (c. 57) when quoting i. 23-31 says, *οὕτως λέγει ἡ πανάρετος σοφία*, 'wisdom which is the sum of all virtues,' a name which, according to Eusebius (*H. E.*, iv. 22), was adopted by Hegesippus, Irenæus, and 'the whole band of the ancients,' following the unwritten Jewish tradition, and by Clem. Alex. (*Strom.* ii., sec. 22). It is styled by Gregory Naz. (*Orat.* xi.) *παιδαγωγικὴ σοφία*, and by Dion. Alex. *σοφὴ βιβλος*. In the catalogue of canonical books compiled by Melito of Sardis preserved by Euseb. (*H. E.*, iv. 26), we find *Παρ. Σαλομ. ἢ καὶ Σοφία*, a name which, as well as 'Sapientia,' is of frequent occurrence in the early Fathers (see Cotelierus in Clem. Rom., *l. c.*; Vales. ad Euseb., *l. c.*), though by no means restricted to the Book of Proverbs, being equally used, as Cotelierus proves, of 'Ecclesiasticus' and 'the Wisdom of Solomon'; a circumstance from which some confusion has arisen.

The word *מִשְׁלֵי*, by which the so-called 'Proverbs' of Solomon are designated (Prov. i. 1, 6; x. 1; xxv. 1; and 1 Kings iv. 32 [v. 12]), is more appropriately translated in the Vulgate 'parabola.'

It is akin to the verb *מִשַׁל*, corresponding with the Arabic *مَثَلَ*, and the Syriac *ܡܫܠܐ*, 'to be like,' and primarily signifies 'a comparison,' 'similitude,' 'parable' (Ezek. xvii. 2; xxiv. 3); whence it easily passed to those pithy sententious maxims which in the East so often appear in the form of a terse comparison, of which many are to be found in the book before us—*ex. gr.*, xxvi. 1, 2, 3, 6, 7, 8, 9, 11, 14, 17, and then to 'proverbs' in general, whether containing a similitude or not (1 Sam. x. 12; xxiv. 13 [14]; Eccles. xii. 9). Its scope was still further enlarged by its application to longer compositions of a poetical and figurative character—*ex. gr.*, that of Balaam (Num. xxiii. 7, 18, etc., and Job xxvii. 1; cf. Ps. xlix. 5; lxxviii. 2), and particularly to taunting songs of triumph over fallen enemies—*ex. gr.*, against the king of Babylon (Is. xiv. 4), the Chaldeans (Hab. ii. 6); cf. also Mic. ii. 4; Deut. xxviii. 37; 1 Kings ix. 7.

2. *Canonicity*.—The canonical authority of the Book of Proverbs has never been called in question, except among the Jews themselves. We learn from the Talmud that the school of Shammai, thus early adopting the principle of the free handling of Scripture, were led by some apparent contradictions in the book (*ex. gr.*, Prov. xxvi. 4, 5) to question its inspiration, and to propose to cast it out of the canon. It is indeed certain, if we credit the Jewish tradition, that it did not at once take its place on a level with the other canonical Scriptures, but, like the Antilegomena of the N. T., remained for a time in suspense. According to Wolf (*Bibl. Hebr.*, ii. 119; and Zunz, *Gott. Vortr.*, p. 14, apud Bertheau, p. xlvi.) it was not till the period of the Persian rule that 'the men of the great synagogue' admitted it to an equal rank with the other Hagiographa. In the remarkable passage of the Talmud, however, which contains the most ancient opinion of the Jews on the formation of the O. T. Canon (*Baba Bathra*, p. 14, apud Westcott, *Bible in the Church*, p. 36), its recognition is fixed earlier: the Proverbs ('Meshalim') being included with Isaiah, Canticles ('Shir hashirim') and Ecclesiastes ('Kohelet') in the memorial word Jamshak, specifying the books 'written'—*i. e.*, reduced to writing—by Hezekiah and his learned men. With the trifling exception mentioned above, its right to a place in the canon has never been questioned since its admission into it, and there is no book of Holy Scripture whose authority is more unshaken. The amount of inspiration in the book has been a matter of speculation since the days of Theodoret of Mopsuestia, who believed that the wisdom contained in it was that of Solomon only, not of the Spirit of God; even as some of the Rabbins found in Ecclesiastes no divine wisdom, but merely that of Solomon. Leaving such vain and impracticable distinctions, the canonical authority of the book is attested to us by the frequent use of it in the N. T. The following is a list of the principal passages:—

Prov. i. 16	Rom. iii. 10, 15.
iii. 7	Rom. xii. 16.
* iii. 11, 12	Heb. xii. 5, 6; Rev. iii. 19.
* iii. 34	James iv. 6.
x. 12	1 Pet. iv. 8.
* xi. 31	1 Pet. iv. 18.
xvii. 13	Rom. xii. 17; 1 Thess. v. 15; 1 Pet. iii. 9.

- Prov. xvii. 27 . . . James i. 19.  
 xx. 9 . . . 1 John i. 8.  
 xx. 20 . . . Matt. xv. 4; Mark vii. 10.  
 xxii. 8; LXX. 2 Cor. ix. 7.  
 \* xxv. 21, 22 . . . Rom. xii. 20.  
 \* xxvi. 11 . . . 2 Pet. ii. 22.  
 xxvii. 1 . . . James iv. 13, 14, 16.

Of these only those marked with an asterisk are actual quotations; in the others there is a more or less direct allusion.

3. *Divisions.*—The thirty-one chapters of the Book of Proverbs may be roughly divided into four sections:—(1.) The hortatory introduction (i.-ix.); (2.) The first collection of 'the Proverbs of Solomon,' properly so called, with its appendices (x.-xxiv.); (3.) The second collection, compiled by Hezekiah's scribes (xxv.-xxix.); (4.) An appendix by different writers.

(1.) The first of these sections has no continuous connection, and is hardly capable of any very accurate subdivision. The separate chapters form in some instances a connected whole (*ex. gr.*, ii. v. vii. viii. ix.); sometimes the connection does not extend beyond a few verses (*ex. gr.*, iii. 1-10, 13-26; iv. 14-19; vi. 1-5, 6-11). There is little coherence between the separate chapters, and little unity beyond that of the general subject or the mode of treating it, so that if one chapter were to be removed the organisation of the whole would not be affected, and it would hardly be missed. Ewald, however, who, somewhat in defiance of the internal evidence, looks on this portion as 'an original whole, thoroughly connected, and cast as it were at one gush,' after the general introduction (i. 1-7) discovers three subdivisions, marked as well by the contents as by the position of the imperative verb at the beginning of the sections (*ex. gr.*, i. 8; iv. 1; vi. 20); while in the smaller divisions 'my son' stands before the verb (*ex. gr.*, i. 10, 15; ii. 1; iii. 1, 11, 20; iv. 21, etc.) Ewald's divisions are—(1.) A general admonition to the pursuit of wisdom, not fully completed, but running off into particulars (i. 8-iii.); (2.) An exhaustive enumeration of the particular points of his admonition (iv. 1-vi. 29), until (3.) the discourse, gradually rising in power and grandeur, at last attains an almost lyrical flight (vi. 20-ix.). According to Delitzsch (in Herzog's *Encyclop.*) this section is divisible into fifteen separate strains—(1) i. 7-19; (2) i. 20-33; (3) ii.; (4) iii. 1-18; (5) iii. 19-26; (6) iii. 27-35; (7) iv. 1-v. 6; (8) v. 7-23; (9) vi. 1-5; (10) vi. 6-11; (11) vi. 12-19; (12) vi. 20-35; (13) vii.; (14) viii.; (15) ix.

(2.) The second section (x.-xxiv.) evidently contains three subdivisions—(a). The collection of unconnected proverbs or gnomes (x. 1-xxii. 16); (b), 'The words of the wise' (cf. i. 6; Eccles. ix. 7; xii. 11), consisting of a more connected series of maxims, with a hortatory preface recalling the style of the first section (xxii. 17-xxiv. 22); (c), A shorter appendix of proverbial sayings, with the title 'these also belong to the wise,' ending with a description of a sluggard (xxiv. 23-34).

(3.) The third section is a continuous series of gnomic sayings without any subdivision (xxv.-xxvii.)

(4.) The fourth section, like the second, separates into three parts—(a), 'The words of Agur,' a collection of proverbial and enigmatical sayings (xxx.); (b), 'The words of King Lemuel' (xxxi. 1-9); and (c), A short alphabetical poem in praise of a virtuous woman (xxxii. 10-31).

Of the date and probable authorship of these divisions we shall speak hereafter.

4. *History of the Text.*—The variations from the existing Masoretic text of the Book of Proverbs presented by the versions of the LXX., Peshito-Syriac, the Targum, and to some extent by the Vulgate, bear witness to the former existence of copies differing in many and not unimportant points from that which has become the authoritative text. The text, as preserved in these ancient versions, differs from that of our Hebrew bibles both in excess and defect. They contain clauses, verses, and sometimes paragraphs not to be found in our extant copies, for the existence of which it is difficult to account, unless they formed part of the book which was before the translators; while other portions are wanting, for the absence of which no sufficient account can be given, except that they were not read in the ancient Hebrew MSS. they employed. The very large number of minor discrepancies, both in language and arrangement, which we meet with, all tend to confirm this view, and it well deserves consideration what influence these variations, which every student knows are not confined to this book, should have on the ordinarily received hypothesis of the integrity and purity of the present Hebrew text. This, however, is not the place for the prosecution of this investigation. We shall content ourselves with pointing out the principal points of variation.

To commence with the LXX., the earliest of the existing versions. The translation of this book, like that of Job, proves a more competent acquaintance with the Greek language and literature than is usual with the Alexandrine translators. The rendering is more free than literal: giving what the writer conceived to be the general spirit of the passage without strict adherence to the actual words. Bertheau remarks that the version of this book appears to have been undertaken rather with a literary than a religious object, as it was not read in the synagogues or required for their internal regulation. It is to this freedom of rendering that not a few of the apparent discrepancies are due, while there are others which are attributable to carelessness, misconception of the writer's meaning, or even possibly to arbitrary alterations on the part of the translators. In some cases also we find two incompatible translations fused into one—*ex. gr.*, vi. 25; xvi. 26; xxiii. 31. Of the majority, however, of the variations, no explanation can be offered but that they represent a different original, and therefore deserve the utmost consideration for the history of the text.

In the first division, i.-ix., these variations are less considerable than in the second. Two verses appended to ch. iv. remove the abruptness of the close, and complete the sense. To the simile of the ant, vi. 8, that of the bee is added. The insertion after viii. 21 seems out of place, and disturbs the continuity. In ch. ix. there are two considerable additions to the description of the wise and foolish women, which seem to complete the sense in a very desirable manner. The variations are much more considerable in the section x.-xxiv. A large number of verses is wanting (xi. 4; xiii. 6; xvi. 1-4; xviii. 23, 24; xix. 1, 2; xx. 14-19; xxi. 5; xxii. 6; xxiii. 23—which comes in very awkwardly in the Hebrew text; xxiv. 8); the arrangement of others is dislocated—*ex. gr.*, ch. xv. closes with ver. 29, vers. 30, 32, 33, standing at the begin-

ning of ch. xvi., while a verse very similar to ver. 31 is found after xvi. 17; xix. 3 stands as the last verse of ch. xviii.; in ch. xx. vers. 20-22 come between vers. 9 and 10. The most extraordinary dislocation, hardly to be ascribed to anything but an error of the scribe, appears in ch. xxiv. After ver. 22 is introduced xxix. 27, to which succeed four distichs descriptive of the wrath of a king and urging attention to the writer's words, not found in the Hebrew. We then find, xxx.-xxxi. 9 (*i.e.*, the prophecy of Agur, and of Lemuel), with the remainder of ch. xxiv. foisted in between vers. 14, 15 of ch. xxx. The remainder of ch. xxxi., the acrostic on a virtuous woman, stands in its right place at the end of the book. The additions in this section are also numerous and important. We find proverbs intercalated between the following verses, x. 4, 5; xi. 16, 17 (by which a very imperfect antithesis in the Hebrew is rectified); xii. 11, 12; 13, 14; xiii. 9, 10; 13, 14 (found in the Vulgate, xiv. 15, 16); xiv. 22, 23; xv. 5, 6; 18, 19; 27, 28; 28, 29; xvii. 6, 7, 16, 17; xviii. 22, 23; xix. 7, 8; xxii. 8, 9 (found with slight variations 2 Cor. ix. 7); 9, 10; 14, 15. In the dislocated ch. xvi. five or perhaps six new proverbs appear. Intercalated proverbs are also found in the section xxv.-xxix.—*ex.gr.*, xxv. 10, 11; 20, 21; xxvi. 11, 12 (found also Eccles. iv. 21); xxvii. 20, 21; 21, 22; xxix. 25, 26. Besides these, a careful scrutiny will discover a large number of smaller interpolations throughout, many of which are only explanatory clauses.

To specify the words and clauses which vary from the Hebrew would carry us far beyond our limits. For these and the comparison of the two versions generally, the student may be referred to Jäger, *Observ. in Prov. Salom. vers. Alex.*, and Schleusner, *Opusc. critic.* In many of these cases the LXX. has probably preserved the true reading (*ex.gr.*, x. 10, b); but, on the whole, Ewald and Bertheau agree that the Masoretic text is the better and purer.

The Peshito-Syriac version, like the LXX., while it agrees with the Hebrew text generally, presents remarkable deviations in words and clauses, and contains whole verses of which there is no trace in the Hebrew. Some of the variations only prove a different interpretation of the text, but others are plainly referable to a difference in the text itself (*ex.gr.*, vii. 22, ff.; xv. 4-15; xix. 20; xxi. 16; xxii. 21, etc.), and thus confirm the view that at the time the version was executed—*i.e.*, anterior to the 4th century—the present Hebrew text was not universally recognised.

The Vulgate translation of Proverbs, hastily executed by Jerome in three days (together with Ecclesiastes and Canticles), offers many of the same phenomena as the LXX. version. Many of the additions of the LXX. are to be found in it—*ex.gr.*, x. 4; xii. 11, 13; xv. 5, 27 (cf. xvi. 6); xvi. 5, etc.; and in one or two instances it has independent additions—*ex.gr.*, xiv. 21; xviii. 8. There can be little doubt that in these points it preserves an authentic record of the state of the text at a period anterior to any existing Hebrew MS.

We may conclude this hasty review with the Targum. That on the Proverbs is considered by Zunz (p. 64), on linguistic grounds, to be nearly contemporaneous with those on the Psalms and

Job, and is assigned by Bertheau to the latter half of the 7th century, though it is not quoted before the 12th. The version is close, and on the whole follows the original text very faithfully, though with some remarkable deviations (the following are quoted by Bertheau—vii. 22; x. 3; xiv. 14; xxv. 1, 20, etc.) Its similarity to the Peshito is too remarkable to be accidental (Mr. Deutsch instances the following [Smith's *Dict. of Bible, Ancient Versions*], i. 2, 3, 5, 6, 8, 10, 12, 13; ii. 9, 10, 13-15; iii. 2-9, etc.), and is probably to be accounted for by the supposition of a subsequent recension of the text, which is very corrupt, based upon that version; cf. Wolf, *Biblioth. Heb.*, ii. 1176; Dathe, *de rat. consens. vers. Chald. et Syr. Prov. Sal.*; Zunz, *Gottesdienst. Vorträge*.

5. *Form and Style.*—The difference of style and structure between the first and second divisions is apparent on the most cursory perusal. Instead of the detached gnomes of the latter, we find a succession of hortatory addresses, varying in length and differing in subject, though for the most part on the same plan and with the same general object, in which the writer does not so much define wisdom as enlarge upon the blessings to be derived from its possession, and the lasting misery which is the consequence of the violation of its precepts, and in the most powerful and moving language urge the young to the earnest pursuit of it as the best of all good things. Whether originally written as a poem or introduction or not, it is certainly well fitted to occupy its present place, and prepare the mind of the reader for the careful consideration of the moral and practical precepts which follow. The style is of a much higher and more dignified character than in the succeeding portions; the language is more rhetorical; it abounds in bold personifications and vivid imagery. The concluding chapters (viii.-ix.) are cast in the grandest mould of poetry, and are surpassed in true sublimity by few portions of Holy Scripture. At the same time, when this portion is viewed as a whole, a want of artistic skill is discoverable. The style is sometimes diffuse and the repetitions wearisome. The writer returns continually on his steps, treating of the same topic again and again, without any apparent plan or regular development of the subject. As regards the form, we find but little regularity of structure. The paragraphs consist sometimes of no more than two or three verses (i. 8-9; iii. 11-12; vi. 1-5, 6-11, 12-15, 16-19); sometimes the same thought is carried through a long succession of verses, or even an entire chapter (ii. 1-22; v. 1-20; vi. 20-35; vii. viii. ix.) A very favourite arrangement is a paragraph of ten verses (i. 10-19; iii. 1-10; 11-20; iv. 10-19; viii. 12-21; 22-31), a form which, if we may trust the LXX. version, existed also in the copies employed by them in iv. 20-27; v. 6-11; and, according to the Peshito Syriac in iv. 1-9. The parallelism of members is sometimes maintained, but frequently neglected. The parallels are usually synonymous (*ex.gr.*, i. 8-9, 11, 12, etc.) The antithetical parallels found iii. 32-35 belong to a series of gnomes which disturb the harmony of the passage, and appear scarcely in their appropriate place. It may be remarked that the name 'Elohim' only occurs six times in the whole book, and thrice in this section (ii. 5-17; iii. 4). The other places are, xxv. 2; xxx. 5-9. Other unusual words are תְּכִמּוֹת, 'wisdoms,' for

wisdom in the abstract (i. 20; ix. 1; found also xxiv. 7); זָרָה, 'the strange woman,' which occurs repeatedly (*ex. gr.*, ii. 16; v. 3, 20, etc., found nowhere else save xxii. 14; xxiii. 23); and נִכְרִי, 'the stranger' (ii. 16; vii. 5, etc.; found also xx. 16; xxiii. 27; xxvii. 13); ז.ע., the foreign prostitute, then as now lurking at the dark corners of the streets, taken as the representative of the harlot sense seducing the young and inexperienced from true wisdom. Ewald also notices the unusual construction of שְׂפָתַי, a dual fem. with a verb in the masc. pl. (v. 2); while in the next verse it has properly a fem. pl., and the unusual pl. אִשִּׁים (viii. 4).

In the second division, 'the Proverbs of Solomon,' which form the kernel of the book, (x.-xxii. 17), we find a striking similarity of structure throughout. Every verse (reckoned by Delitzsch at 375) in its normal form consists of two members, each containing three, four, or more rarely five short words. (The one exception to this rule (xix. 7) is probably due to the loss of a member, which is supplied by the LXX.) Every verse is independent, with no necessary connection with those that precede or follow, and, generally speaking, no attempt at arrangement. Ewald's theory of a continuous thread of connection running through this collection in its original form, and binding together the scattered sayings, has absolutely no evidence in its favour, and can only be sustained by supposing an almost total dismemberment of this portion of the book. It is true there are cases in which the same subject recurs in two or three successive verses (*ex. gr.*, x. 2-5; 18-21; xi. 4-8; 24-26), but these are the exceptions, and only occur, as Ewald elsewhere allows, when, from the studied brevity of the proverbial form, a thought cannot be expressed in all its fulness in a single verse. The cases in which the same characteristic word or words recur in successive proverbs are more frequent (*ex. gr.*, x. 6, 7; 8, 10; xi. 5, 6; 10, 11, etc.) But in every instance each verse gives a single definite idea, nor do we ever meet with two verses so connected that the latter contains the reason of the counsel, or the application of the illustration given in the former.

Nearly the whole of the proverbs in the earlier part of this collection are *antithetical*; but after the middle of ch. xv. this characteristic gradually disappears, and is almost entirely lost in the concluding chapters. A large number are *synonymous* (*ex. gr.*, xi. 7, 25, 30; xii. 14, 28; xiv. 13, 17, 19, etc.), some *aphoristic* (*ex. gr.*, xi. 31; xiii. 14), especially with the comparative and כֵּן (*ex. gr.*, xii. 9; xv. 16, 17; xvi. 8, 9, etc.), or אַף כֵּן, 'much more' (*ex. gr.*, xi. 31; xv. 11; xvii. 7). Others are *synthetic* (x. 18; xi. 29; xiv. 17, etc.); only two are *parabolic* (x. 26; xi. 22).

The style is lower and more prosaic than in the former section. Ewald regards it as an example of the most ancient and simplest poetical style, full of primeval terseness, and bearing the visible stamp of antiquity in its language and imagery without any trace of later colouring. He remarks very justly that the proverbs in this collection are not to be looked on as a collection of popular sayings, embodying mere prudential wisdom, but that they belong to the higher life, and are as broad in their grasp of truth as in their range of thought.

The germ of many of them may have been found in popular sayings; but the skill and delicacy with which they have been fashioned into their present shape, though of the simplest kind, displays the hand of a master.

Ewald remarks the following peculiar phrases as occurring in this section. 'Fountain of life,' x. 11; xiii. 14; xiv. 27; xvi. 22 (*cf.* Ps. xxxvi. 9 (10)): 'tree of life,' iii. 18; xi. 30; xiii. 12; xv. 4: 'snares of death,' xiii. 14; xiv. 27 (*cf.* Ps. xviii. 5 (6)); and the following favourite words—מְרַפֵּא, 'healing,' in various similes and applications, xii. 18; xiii. 17; xvi. 24 (but this also occurs in the former section, iv. 22; vi. 15): כְּהַתָּה, 'destruction,' x. 14, 15, 29; xiii. 3; xiv. 28; xviii. 7; xxi. 15; and only in four other places in the whole Bible: בָּנִי, part. from בָּנָה, 'to blow,' xii. 17; xiv. 5, 25; xix. 5-9 (*cf.* vi. 19; Ps. xii. 6; xxvii. 11): the unfrequent roots, סָלַף, 'perverse-ness,' xi. 3; xv. 4; and the verb סָלַף, 'to pervert,' 'destroy,' xiii. 6; xix. 3; xxi. 12; xxii. 12: the phrase לֹא יִנָּקָה, 'shall not go unpunished,' xi. 21; xvi. 5; xvii. 5 (*cf.* xxviii. 20; vi. 29): דָּרַךְ, 'he that pursueth,' xi. 19; xii. 11; xiii. 21; xv. 9; xix. 7 (*cf.* xxviii. 19), and nowhere else. Ewald instances also as archaic phrases not met with elsewhere, עַד אֲרֻנֶּיָּה, 'but for a moment,' xii. 19; יָד לִיד, 'hand join in hand,' xi. 21; xvi. 5; הִתְנַעַץ, 'meddled with,' xvii. 14; xviii. 1; xx. 3; נִרְנָן, 'whisperer,' xvi. 28; xviii. 8 (*cf.* xxvi. 20-22). The word יֵשׁ, 'there is,' though frequent elsewhere, scarcely occurs in Proverbs, save in this section, xi. 24; xii. 18; xiii. 7, 23; xiv. 12, etc.

With xxii. 17, 'the words of the wise' (*cf.* i. 6), we are carried back to the style and language of the poem (i.-ix.), of which we are also reminded by the continued address in the second person singular, and the use of 'my son.' There is, however, a difference in the phraseology and language; and, as Maurer remarks, the diction is not unfrequently rugged and awkward, and somewhat laboured. Parallelism is neglected. The moral precepts are longer than those of x.-xxii., but not so diffuse as those of the first section. We find examples of the distich, xxii. 28; xxiii. 9; xxiv. 7-10: the tristich, xxii. 29; xxiv. 29: but the tetrastich is the most frequent, the favourite form being that in which the second member gives the ground of the first, xxii. 22, 23; 24, 25; 26, 27, etc. We also find proverbs of five members, xxiii. 4, 5; xxiv. 3, 4: several of six, xxiii. 1-3, 12-14, 19-21; xxiv. 11, 12: and one of seven, xxviii. 6-8. We have a longer strain, xxiii. 29-35, against drunkenness.

The short appendix, xxiv. 23-34, comprising more 'words of the wise,' can hardly be distinguished in style or form from the preceding. It closes with a 'proverb-lay' of five verses on the evils of sloth.

The second collection of 'the Proverbs of Solomon' (ch. xxv.-xxx.), transcribed מִתְּתִיקָה, μετήφαν, Aq.; μετήφεικαν, Gr. Ven.; ἐξεργάσαντο, LXX.: *cf.* Pusey, *Daniel*, p. 322, note) by the scribes of Hezekiah, closely resembles the former one. They are, according to Pusey, 'identical in language.'

It has, however, some very decided points of difference. The 'parabolic' proverb is much more frequent than the 'antithetical,' the two members of the comparison being sometimes set side by side without any connecting link (*ex. gr.*, xxv. 12, 13), which is in other cases given merely by ו' 'and' or וְ

(xxvi. 1, 2, 18-19; xxvii. 8, etc.) The parallelism is sometimes strict, sometimes loose and free. There is a want of the sententious brevity of the former collection, and the construction is looser and weaker. The proverbs are not always completed in a single verse (xxv. 6, 7; 9, 10; 21, 22; xxvi. 18, 19); and more frequently than in the former section we have series of proverbs with an internal connection of subject (xxvi. 23-25; xxvii. 15, 16, 23-27), and others in which the same key-word recurs (xxv. 8-10; xxvi. 3-12; 13-16). This is not found so often after xxvii. 5; but a close examination of the text suggests the idea that this may be due to a disturbance of the original order (*cf.* xxvii. 7, 9; xxviii. 4, 7, 9; xxix. 8, 10, etc.) Ewald discovers a want of the figurative expressions of the earlier collection, and a difference of language and phraseology, while Rosenmüller remarks that the meaning of the proverbs is more obscure and enigmatical. The greater part of them are moral precepts. 'The earlier collection may be called 'a book for youth'; this 'a book for the people' (Delitzsch); 'the wisdom of Solomon in the days of Hezekiah' (Stier).

The three supplemental writings with which the book closes (xxx. xxxi.) are separated from the other portions and from one another no less by style and form than by authorship. Ewald somewhat arbitrarily divides ch. xxx. after ver. 14 (a division, however, sanctioned by the LXX.), and thinks it not improbable that xxx. and xxxi. 1-9 are from the same pen. He also regards the opening verses of xxx. as a dialogue, vers. 2-4 being the words of an ignorant disciple of Agur, to which the teacher replies. The difference between the enigmatical sayings of Agur (which find a counterpart in the collections of Oriental proverbs) and the simple admonitions of Lemuel's mother is too great to allow us to assign them to one author. In ch. xxx. we have, in Ewald's words, instead of moral aphorisms, a succession of elegant little pictures illustrative of moral truths, evidencing a decay of creative power, the skill of the author being applied to a novel and striking presentation of an old truth. The ancient terse proverbial form is entirely lost sight of, and the style rises to a height and dignity warranting the use of the term נִפְתָּח (cf. Is. xiii. 1; Hab. i. 1, etc.) applied to both.

In 'the words of king Lemuel,' we find much greater regularity. The parallelism is synonymous, and is maintained throughout.

The alphabetical ode in praise of a virtuous woman—'a golden ABC for women' (Döderlein)—has all its verses of about the same compass. The parallelism is very similar to that of the Psalms, especially those in which the same alphabetical arrangement is found.

6. *Authorship and date.*—On these points the most various opinions have been entertained, from that of the Rabbins and the earlier school of commentators, with whom some modern writers (*ex. gr.*, Keil) agree, who attribute the whole book to Solomon (even ch. xxx. xxxi. are assigned to him

by Rashi and his school), to those of Hitzig and other representatives of the advanced critical school, who, however widely at variance with one another, agree in reducing to a minimum the wise king of Israel's share in the book which from the remotest antiquity has borne his name. In the face of such wide discrepancies, where the same data lead careful investigators (*ex. gr.*, Ewald and Hitzig) to exactly opposite conclusions, a satisfactory decision of the question of authorship and date is hardly to be hoped for. It may rather be doubted whether the evidence at present before us is such as to admit of a determination of the question at issue. Where so much indefiniteness exists, all we can do is to balance probabilities and to abstain from dogmatic decisions.

The evidence in favour of a composite origin of the book appears, we must confess, irresistible. No unprejudiced person, we think, accustomed to the consideration of such questions, could read the book for the first time, even in English, without seeing in it the traces of several different authors. Irrespective of the two concluding chapters, the express reference to other sages (חֲכָמִים, in xxii.

17; xxiv. 23; cf. i. 6) indicates a diversity of authorship, while the difference of style between various divisions of the work strengthens the hypothesis. Indeed, a careful observer will find at the very outset an indication of the composite character of the book in the introductory verses which profess to give the contents and character (i. 1-7). These prepare us to find in it, not merely 'proverbs' and 'eloquent speeches' (margin: A. V. 'interpretation'), but also such 'words of the wise' as those we have just referred to, and 'dark sayings' like those of Agur.

Are we then to discard the title, 'the Proverbs of Solomon,' and to consider that the designation has been given to the book erroneously? To us this appears rash in the extreme. We know from historical sources that Solomon was the author of a very large number of proverbs; and nothing but that restlessness of speculation which discards old beliefs simply, as it would seem, because they are old, and seeks to unsettle all that has been hitherto held certain, can discover any sufficient reason for questioning that Solomon was the composer of the greater part of those contained in our present book, especially in the sections x.-xxii. 16; xxv.-xxix. However much these collections may have been modified in successive redactions, though too much has probably been conceded to this hypothesis, of which there is no definite trace, and by which a work may be made to assume any form that may suit the theory to be supported, we have no sufficient reason for doubting that Solomon was the originator of the peculiar style of poetry in which they are composed, and that even if they are not *all* to be referred to him, the mass are his, and that they are all pervaded with his spirit, and may be assigned to his epoch. Eichhorn finds in them no trace of language or thought subsequent to the time of Solomon. Even Ewald, who insists most on the collection as we have it having suffered from abbreviations, transpositions, and unauthorised additions, remarks that the proverbs all breathe the happy peace and growing civilisation of Solomon's age, nor is there any epoch either earlier or later to which we could preferably assign them.

The proverbs in the later collection (xxv.-xxix.), though they present some diversities, do not differ so essentially from the earlier ones as to give any sufficient grounds for questioning the accuracy of the superscription (xxv. 1). The title itself informs us that the compilation was not made till four centuries after Solomon, and the differences are not greater than might be looked for in sayings that had been so long floating about among the common people, and thereby subjected to disfigurement and change. The indications of an altered state of society and a decrease of confidence in the rulers, in which Ewald discovers such unmistakable proofs of a later date, are hardly so evident to others as to himself. We know too little of the internal economy of Solomon's reign to enable us to pronounce authoritatively that such and such expressions are inconsistent with the state of the people and tone of thought at that period.

The objection brought by Eichhorn and others against assigning the proverbs in the two collections to Solomon, that the genius of no one man, not even one as divinely gifted with wisdom as Solomon, is sufficient for the production of so large a number, is puerile in the extreme. Those we possess are but a portion of the 3000 ascribed to him (1 Kings iv. 32), and scarcely give 20 for each of the forty years of his reign.

Similar and equally futile objections have been based, by Bertholdt and others, on the familiarity displayed in the proverbs with circumstances and conditions in life with which it is supposed that Solomon as a king could have had no experimental acquaintance. For example, it is maintained that x. 5; xii. 10, 11; xiv. 4; xx. 4, must have been written by a landowner or husbandman; x. 15, by a poor man; xi. 14, xiv. 19, by a citizen of a well-ordered state; xi. 26, by a tradesman; xii. 4, by one who was not a polygamist; xiv. 1, xv. 25, xvi. 11, xvii. 2, xix. 13, 14, xx. 10, 14, 23, by an ordinary citizen; xxv. 2-7, not by a king, but by one who had lived some time at a court; xxvii. 11, by a teacher of youth; xvii. 23-27, by a sage who lived a nomadic life; xxviii. 16, by one free from those errors which weakened Solomon's throne, and robbed his son of his kingdom. It is needless to point out the weakness of these fancied arguments which would affect no one who had not a theory of his own to support. They are akin to those which have been used with as little success to prove that no one man could have written the plays of Shakspeare, and display the most marvellous ignorance of that many-sidedness and keenness of perception and insight which are characteristic of the highly-gifted among mankind.

As little weight is to be assigned to the objections drawn from the repetitions. It is true that we find the same idea, and even the same words, recurring not only in the two collections (*ex. gr.*, xxi. 9, xxv. 24; xviii. 8, xxvi. 22; xxii. 3, xxvii. 12; xxii. 13, xxvi. 13; xix. 24, xxvi. 15; xix. 1, xxviii. 6), but in the same collection (*ex. gr.*, xiv. 12, xvi. 25; x. 1, xv. 20; xvi. 2, xxi. 2; x. 2, xi. 4; xiii. 14, xiv. 27; xxvi. 12, xxix. 20). This latter is, however, no more, as Umbreit remarks, than is natural in such a compilation, in the formation of which one is very apt to forget what had been already set down; while the former class of repetitions is easily to be accounted for by the anxiety of the collectors to lose nothing which had the stamp of Solomon's authorship,

even though the same idea had been already expressed in the earlier collection, and goes far to confirm the view that Solomon was the composer of the whole.

The internal evidence—derived from language, construction, ideas, historic background, and the like—varies with every successive critic, and is entirely inadequate to warrant any decisive verdict. Its precariousness is proved by the opposite results to which the same data lead various commentators. Keil maintains that every part of the book, with the exception of the last two chapters, corresponds to the epoch of Solomon, and that only. Eichhorn agrees with this to a certain extent, but limits the correspondence to i.-xxiv.; while Ewald, Hitzig, and Bertheau, and other minor critics, arrive at conclusions, expressed with equal confidence, and at variance with these and with one another. There is, however, one evidence which speaks strongly in favour of an early date—the entire absence of all reference to idolatry. The form of religion appearing throughout is purely Jehovistic (as we have noticed above, Elohim occurs only four times in the body of the work), and false gods and foreign faiths are not even referred to.

The above remarks refer chiefly to the collection of proverbs properly so called, which we have no difficulty in ascribing, on the whole, to Solomon as their ultimate author.

The case is different with regard to the introductory chapters (i.-ix.), and there is more ground for the diversity of opinion as to their date and authorship. It is certainly quite possible that the whole or a considerable portion of this section may have been written by Solomon. The differences of style, of which Ewald makes much, are, as Bertheau has shown, somewhat exaggerated by him, and are not perhaps greater than may be accounted for by the different nature of the compositions. The terse simplicity of a proverb would be out of place in a series of hortatory addresses such as those which characterise this section. Ewald dwells with emphasis on the internal evidence of a late date afforded by the state of society, and the tone of feeling as portrayed here. But we repeat our former remark, that we know too little of the internal history of Judæa at this time to allow us to speak with so much confidence on these points, and express our conviction that the conclusions drawn by Ewald are not warranted by the premises. The imagery all points to a large and profligate city, such as Jerusalem may well have become during the middle of Solomon's prosperous reign; and the vivid representation of the habits of the foreign prostitutes and lawless freebooters who roamed its streets, as Professor Plumptre has well remarked, is hardly more than could have been attained by one who, like Haroun Alraschid, was fond of laying aside his kingly state and visiting his city in disguise.

It is evident, from what we have remarked in a former section, that we regard the proem (i.-ix.) in its present form as a composite work, though very possibly proceeding from one pen. The similarity of style, subject, and treatment, is strongly in favour of unity of authorship, while the internal evidence favours the view that it is compiled of various unconnected members, collected and arranged subsequently to the time of their composition. The date of this compilation it is impossible to fix. The evidence on this point is

faint and untrustworthy, and has led different investigators to very opposite conclusions. Ewald places it in the 7th, Hitzig in the 9th century B.C., while Keil, as we have seen, ascribes it to the time of Solomon. The resemblance that may be traced in this portion of the work to the spirit and teaching of the Book of Job, and the recurrence of some of the words and images found there, is employed both by Hitzig and Ewald to aid in determining the date of this section (cf. Job xv. 7, Prov. viii. 25; Job xxi. 17, Prov. xiii. 9; Job xxviii. 18, Prov. viii. 16; Job v. 17, Prov. iii. 11; see Pusey, *Daniel*, p. 323, note 7). But as there is no unanimity as to the date of the composition of Job, little help is to be expected from this source, nor can we be surprised at the diversity of opinion among those who have employed it; Ewald maintaining that the writer of Proverbs had read and made use of Job; Hitzig, on the contrary, believing that the former is the earlier work, and that the author of Job borrowed from Proverbs. The adoption of such expedients proves most forcibly the complete want of any decisive testimony which will enable us to arrive at any trustworthy conclusion as to the date of this section.

The similarity in style between i.-ix. and the appendix to the first collection of proverbs (xxii. 17-xxiv.), appears to favour the view that this supplement is due to the 'redacteur' by whom the poem was prefixed to the book. Ewald enumerates several reasons for ascribing the two to the same writer (p. 42), but finally decides against the unity of authorship. The proverbs themselves, designated as 'words of the wise,' are evidently distinguished from those of Solomon, and are probably to be regarded as the adages of other sages, which the compiler of the work thought too valuable to be lost, and therefore appended to his larger collection. The short supplement (xxiv. 23-34) is accounted for by Umbreit on the supposition that the compiler had laid aside his work for a time, and took it up again on the discovery of fresh sayings worthy of preservation. He renders לְחִכְמִים, 'for,' not 'of the wise,' and regards them as directed to the compiler's scholars. Ewald, Bertheau, Delitzsch, etc., defend the received translation.

It only remains for us to speak of the threefold supplement (xxx. xxxi.), with regard to the authorship and date of which again nothing can be determined. It would be hardly profitable to discuss the marvellous fabric of fanciful history and biography which has been evolved from the scantiest materials by Hitzig, Bunsen, and Bertheau. Those who desire it may refer to their works to see the grounds on which 'Massa' (A. V. 'the prophecy') is identified with a district in Arabia (Gen. x. 30; xxv. 14; 1 Chron. i. 30) of which Lemuel was king, and Agur with a descendant of the Simeonites, who in the reign of Hezekiah drove out the Anakites from Mount Seir (1 Chron. iv. 42); or, again, on which it is sought to prove that Agur and Lemuel were brothers, sons of the reigning queen of Massa. We would rather commend to our reader Eichhorn's sensible words, that 'Agur should remain Agur, and belong to the wise men of the old world of whom history gives us no further information,' and with him deprecate 'spinning a long thread of tedious conjectures about a name which do not advance us an inch

in our insight into the literature of the old world, or any profitable learning.' As little to the purpose is the fancy of Döderlein that the opening part of ch. xxx. is a dialogue: that Ithiel is a heathen; Agur a much valued servant of Ithiel, to whom, as his master, his prayer (v. 7-9) is addressed. We can say no more than that Agur was an unknown Hebrew sage, the teacher of Ithiel and Ucal—names from which also many unprofitable speculations have been built—and that he lived subsequently to the reign of Hezekiah. [AGUR.]

Lemuel—'to God,' 'devoted to God,' after the analogy of לְחִי, Num. iii. 24 (Pusey)—may certainly be regarded as a figurative name descriptive of an ideal king, 'a monarch as he should be' (Ewald, Eichhorn; cf. Pusey, *Lect. on Daniel*, p. xiii., note 1, p. 323, note 5). [LEMUEL.]

The alphabetical lay which concludes the whole belongs probably to the latest period of Hebrew poetry, and can hardly be placed higher than the 7th century. Its style and language sufficiently distinguish it from the words of Lemuel, with which it has been sometimes confounded.

The results of our inquiry may be thus summed up. The nucleus of the book is the larger collection of proverbs (x.-xxii. 16). These may be safely regarded as really what they profess to be, 'the proverbs of Solomon.' Whether they were arranged as we now have them and published by him, there is not sufficient evidence to determine. It is probable, however, that the collection was either contemporaneous with, or not long subsequent to him. The greater part of the hortatory introduction (i.-ix.) may also be, with great probability, ascribed to Solomon, though we incline to the belief that its present form is due to a later compiler, who collected the admonitions of the wise king, and prefixed them to his book of proverbs. The same author also appears to have added the appendix (xxii. 17; xxiv. 22), containing proverbs of which Solomon was not the author, and after this had been closed the few supplementary sayings (xxiv. 23-34). The time when this was done cannot be fixed, but there are cogent arguments in favour of a late date. The second collection, as its name declares, was formed by the scribes of Hezekiah, *circa* 725 B.C. The two last chapters contain compositions of the dates and authors of which nothing certain can now be known. They belong to the latest period of Hebrew literature.

It will not be worth while to enumerate the many and widely varying theories of recent critics as to the dates of the composition of the different parts of this book, and the time when it assumed its present form. One or two of the most characteristic may be specified. Suffice it to say that Ewald would place the publication of x.-xxii. 16 about two centuries after Solomon, and i.-ix. in the first half of the 7th century. Not much later the second collection of proverbs, xxv.-xxix., was added, the sections xxii. 17-xxiv. being due to the same compiler. Hitzig, on the contrary, views i.-ix. as the earliest part of the book; x.-xxii. 16, and xxviii. 17-xxix., being added about 750 B.C. Twenty-five years later Hezekiah's collection followed; the gaps being filled up and the volume completed by some unknown compiler at a later period. The theory of Delitzsch (Herzog, *Encyclop.*, 'Sprüche') is marked by more calm sense. Rightly

regarding x.-xxii. 16 as the kernel of the book, and mainly composed by Solomon, he divides the whole into two portions—(1.), i.-xxiv. 22 put forth in the time of Jehoshaphat; the introduction (i.-ix.) and appendix (xxii. 16-xxiv. 22) being written by the compiler, whom he regards as 'a highly gifted didactic poet, and an instrument of the spirit of revelation;' and (2.), xxiv. 23-xxxi., published in the reign of Hezekiah; the introductory and closing portions (xxiv. 23-34, and xxx. xxxi.) being set on either side of the collection of Solomon's proverbs to serve as a kind of foil. Our space forbids our particularising the theories of Umbreit, Keil, Bertheau, etc.

*Commentaries.*—Perhaps the most comprehensive commentary ever attempted on this book is that of the Jesuit De Salazar (2 vols. fol., Par. 1619-21), containing a literal, moral, and allegorical exposition of the text. Other Romanist commentaries deserving mention are those of Jansenius (Louvain 1568), and Maldonatus (Par. 1643). From Lutheran divines we have the commentaries of Melancthon, Geier (Lips. 1653)—long considered the ablest work existing on the subject—and C. B. Michaelis. From those of the Reformed Church, that of Munster (Bas. 1525), Lavater (Tigur. 1562), with copious illustrative parallels from profane as well as sacred sources; Mercer (Genev 1573), showing diligence and learning; and Schultens (Lugd. Bat. 1748), with a Latin version rather more obscure than the Hebrew, in interpreting which the author has given too much weight to supposed Arabic derivations. Of later commentaries that of Umbreit (1826) is sound and sensible, and specially valuable for indicating the points of contact with the genuine wisdom of the last. The Latin notes of Maurer are clear and scholarlike. The translation and introductory dissertations of Ewald (*Poet. Büch.*, t. ii.) need no commendation here. The student may also be referred to the works of Hitzig, Bertheau (*Kurzg. Ex. Hübch.*), Eichel in Mendelssohn's Bible (excellent), Löwenstein, Moses Stuart, as well as the introductions of Carpzov, Eichhorn, De Wette, Bertholdt, Keil, Bleek, and Rosenmüller's *Scholia*. The comments of Hodgson and Holden are useful aids, and that of the Rev. C. Bridges is characterised by sound common sense, a vein of fervid piety, and rich scriptural illustration, but is devoid of philological or exegetical power.—E. V.

PROVINCE (מְרִינָה; N. T. *ἐπαρχία*, and LXX.;

Vulg. *Provincia*). 1. This word, which occurs most frequently in the book of Esther, is derived from מֶרֶץ, judgment, and is generally applied to the Persian satrapies (Esther i. 1, *et passim*). The returning exiles are called 'sons of the provinces' (Ezra ii. 1; Neh. vii. 6). It is also used of the Babylonian (Ezra iv. 15; Dan. iii. 12, ff.) and of the Median provinces (Ezra vi. 2), and is applied to Elam (Dan. vii. 2), to Egypt (Dan. xi. 24; Lam. i. 1), and even apparently to some districts of the kingdom of Samaria, in the obscure expression, 'young men of the princes of the provinces' (1 Kings xx. *passim*). The word is also twice used in a general sense in Eccles. ii. 8; v. 8.

In Esther i. 1, the kingdom of Ahasuerus is said to consist of 127 provinces, and as the number of *satrapies* in the Persian empire was only 20

(Herod. iii. 95), it is clear that the provinces were subdivisions of satrapies under governors who were subordinate to the satraps. The מְרִינָה or governor (N. T. ἡγεμὼν; Luther, *Landpfleger*) of a province seems to have stood in nearly the same relation to the satrap (אַחֲשֵׁרָרִים; Luther, *Landvoigt*; Esther

viii. 9), as the procurator of a Roman province (A. V. governor) did to the proconsul (A. V. Deputy; PROCURATOR). Thus both Zerubbabel and Nehemiah, who were sub-prefects of Judæa (Haggai i. 14; Ezra ii. 63, etc.), had to submit to the counsels and decisions of the satrap of the district beyond the Euphrates [TATNAI], who, on important occasions, was advised by a council of assessors (Neh. iv. 7), and who could appeal for a ratification of his acts to the three superior ministers (of whom Daniel was one; Dan. vi. 3), or to the great king himself (Ezra v.) The title of the 'governor' was Tirshatha, a Persian word meaning 'the dreaded' (cf. *Gestranger Herr*, Gesen. s. v.) The various particulars respecting the management of Persian provinces which we learn from the Book of Esther may all be corroborated by the statements of Herodotus and Xenophon [GOVERNOR, vol. ii. p. 166; ACHASHDAR-PENIM, etc.]

2. In the N. T. the word *ἐπαρχία* occurs but twice—Acts xiii. 34; xxv. 1—being there applied to Cilicia and Judæa; but, as we shall see, a study of the manner in which the Roman provinces were organised will confirm in a very remarkable manner the accuracy and trustworthiness of St. Luke.

Strabo, in the *locus classicus* respecting this subject, informs us that Augustus, on coming to the empire, divided all the provinces into two classes. For his own management he reserved all those half-civilised and disturbed districts which needed the protection of military garrisons, and these were called *provinciae Caesaris*, or *imperatoriae*, and were governed by a præses or legatus (ἡγεμὼν) and by procurators (δικοιταί). To the care of the senate he delivered the peaceful provinces ('inermes prov.'), which required an easier government, and were called *senatoriae* or *populares*, two of which were governed by proconsuls (ἀνθύπατοι) and ten by pro-prætors (ἀντι-στρατηγός), and which were hence distinguished as *ὑπατικά* and *στρατηγικά* (Strabo, xvii. 840, cf. Suet. *Oclav.* 47; Dio Cass. liii. 12). Now, the word ἀνθύπατοι, with the verb ἀνθυπατεύω, occurs three times in the N. T.—viz., in Acts xix. 38, of Asia Minor; in Acts xiii. 7, 8, of Cyprus, where Sergius Paulus was proconsul; and in Acts xviii. 12, of Achaia, where Gallio was proconsul. The A. V. renders it by 'deputy,' a word they may have chosen, not (as has been suggested) from some doubt as to the accuracy of the term 'proconsul' in the two latter cases, but as Professor Plumptre has pointed out, from the use of the title in Queen Elizabeth's time of 'Lord Deputy of Ireland.' Grotius, Hammond, and other commentators, distinctly impugned the accuracy of St. Luke; because in the lists of the provinces given by Strabo and Dio Cassius, both Cyprus and Achaia are assigned to the emperor, and therefore could not have been governed by proconsuls, but by legati or procurators. A little more diligent research turned the historical error into an 'undesigned coincidence' with fact. For Dio Cassius (liii. 12, liv. 4) distinctly adds that Cyprus afterwards became a senatorial province, since

it was given to the senate with Gallia Narbonensis in exchange for Dalmatia (Bishop Marsh, *Lectures*, p. 85). There is similar evidence respecting Achaia. In the original division (Dio Cass., liii. 12) it had been assigned to the senate, but on the growth of various complaints, Tiberius took it under his own care (Tac. *Ann.* i. 76), and it was then governed by a legatus; it was, however, in the reign of *Claudius* that St. Paul visited Achaia, and Claudius, as we find from a notice fortunately preserved by Suetonius (*Claud.* 25), restored both it and Macedonia to the senate. That Gallio—the ‘dulcis Gallio’ of his brother Seneca’s affectionate address—was proconsul of Achaia at this time is indisputable (Tac. *Ann.* xv. 73; xvi. 17; Sen. *Nat. Quat. pref.* 4, etc.) The statements of historians are confirmed in the case of Cyprus by other and unsuspicious evidence. Both in inscriptions (Boeckh, No. 2632; Gruter, cccx. 3; Brotier in *Tac.* xii. 45) and on coins of the period (Akerman, *Numism. Illust. of the N. T.*, p. 41) the proconsuls of Cyprus have recorded their dignity. To avoid all chance of error, it should be observed that, although of the senatorial provinces Asia and Africa were *necessarily* governed by men of proconsular rank, yet the governors of *all* these provinces were *called* proconsuls, as is expressly asserted by Dio Cassius (liii. 13. See Conybeare and Howson’s *Life of St. Paul*, i. p. 154, where the original passages are given at length). It is to be regretted that the extreme accuracy with which these terms, ἡγεμὼν and ἀνθύπατος, are used in the N. T., in spite of the complex arrangements of the Roman provincial system, is obscured in the A. V. by the vague renderings ‘governor’ and ‘deputy.’ The word praetor (στρατηγός) does not occur in the N. T. except as the ambitious title assumed by the duumviri (A. V. ‘magistrates’) of the colony of Philippi (Acts xvi. 20), who also have their attendant lictors (βαβδούχοι, *id.*) The ‘chiefs of Asia’ (Ἀσιαρχοί), mentioned in Acts xix. 31, had an office very similar to that of the Roman aediles, and were the presidents of the public games. For further information on the manner in which the provinces were organized, see Walther, *Gesch. der Röm. Rechts*; Merival, *Roman Empire*, ch. xxxi.; *Dict. of Antiquities*, p. 967; Winer, *s. v. Landpfleger*, etc.—F. W. F.

PRUNING-HOOK, only used in the plural, כּוֹמְרוֹת (Is. ii. 4; xviii. 5; Joel iii. (iv.) 10; Mic. iv. 3), from כּוֹר, to prune the vine (cf. Lev. xxv. 3, 4; Is. v. 6). In the LXX. it is always rendered δρέπανα, and the alternative rendering of the A. V. is ‘scythes;’ but Gesenius and other lexicographers support the usual translation, which is that also of the Vulgate, ‘falces.’—E. V.

PSALMODY is the singing of sacred songs as an act of worship. In this article we shall speak only of its use in public worship, and we shall use the term in its most inclusive sense. The simple idea of psalmody is the expression of religious feeling in lyrical poetry and in musical cadence. Rhythmical song seems to be the instinctive utterance of all strong emotion. Savage nations express themselves in language of natural poetry, uttered in the cadence of a rude chant or musical recitative. In worship, the use of poetry and music is coeval with society (Plato, *de Legib.*, lib. iii., c. 15; Lowth’s *Heb. Poetry*, lect. 1). Homer wrote hymns to the

gods; Orpheus was a priest-musician—the tamer and sanctifier by his lyre of whatever was rude and godless. The muses were chiefly employed in the service of the gods (Phurnutus, *de natura deorum*, p. 157, ed. Gale), from which some of them—*ex. gr.*, Melpomene, Terpsichore, Polymnia—derived their names. Clemens Alexandrinus tells us that a chief part of the worship of the Egyptians consisted in singing hymns to their gods—‘First, a singer goes before, bringing forth some one thing of the symbols of music; and they say that he ought to take two books out of those of Hermes, the one containing the hymns of the gods, the other the method of a royal life . . . . There are ten things which are suitable to the honour of their gods, and comprise the Egyptian religion, viz., sacrifices, first-fruits, hymns, prayers, shows, feasts, and such like things’ (*Stromata*, lib. vi., p. 633, ed. Paris). Porphyry confirms this—The Egyptians, he says, devote ‘the day to the worship of their gods; in which three or four times, viz., morning and evening, noon and sunset, they sing hymns unto them’ (*De Abstem.*, lib. iv., sec. 8). Concerning the Indians he says, ‘they spend the greatest part of the day and night in prayers and hymns to the gods’ (*ibid.*, sec. 12, see also sec. 18; also *Vita Pythag.*, p. 200, ed. Cantab.) A remarkable passage occurs in the writings of Arrianus the stoic philosopher. ‘If,’ says he, ‘we are intelligent creatures, what else should we do, both in public and private, than to sing a hymn to the Deity, to speak well of him, and give thanks unto him? Should we not, whether digging or ploughing, or eating, sing a hymn to God?’ etc. (Arrian, *Epictet.*, lib. i. c. 16; also lib. iii. c. 26). Herodotus tells us that Homer got great credit for composing hymns to the gods (*de vita Homeri*, c. 9). Rewards were given in the Pythian games to those who sung the best hymns to the gods (Pausanias in *Phocicis*, lib. x.) The apostate Julian recommends that many of the excellent hymns to the gods be committed to memory, most of which he says were composed by the gods; some few by men inspired by a divine spirit (*Opera*, p. 551, ed. Paris). Sacred song, therefore, is no peculiarity of revealed religion. It rests upon deep instincts of human nature, perhaps of all intelligent moral nature, for at the creation ‘the morning stars sang together for joy;’ at the nativity, angelic song was heard by the shepherds of Bethlehem; and in the final heaven both angels and redeemed men are represented as singing rapturous songs before the throne.

In defining sacred song as the utterance of strong emotion, we do not restrict it to praise, although praise is the most natural and prominent form of it. Deep sorrow and earnest prayer may also find their fitting expression in musical song. Augustine thus defines the more technical and Christian conception of a hymn: ‘Hymnus est cantus cum laude Dei; si cantus est et non laudas Deum, non dicis hymnum; si laudas aliquid quod non pertinet ad laudem Dei, non dicis hymnum,’ Ps. 148. Church song is restricted to lyrical poetry, for this alone can express the simultaneous emotion of a congregation. It excludes, therefore, didactic poetry, which expounds doctrines, or analyses feelings, or inculcates duties; and it excludes dramatic poetry, which expresses passion by action. It is also more than mere lyrical poetry: it is lyrical poetry which assumes the pure truth of God, and gives expression

to the deep religious feeling which it excites. A hymn is an outburst of religious life.

In its form, worship-song may be either rhythmical or metrical; the former was its primitive and more uncultured form; the latter is its subsequent and more artistic form. The former is exemplified in the Hebrew psalms and the Greek Christian hymns; the latter in the Latin hymns of Ambrose and Gregory, and in the subsequent hymnology of the Western Church. Each of course requires a corresponding form of music—the rhythmical hymn, a musical and *ad libitum* recitative, closing with a cadence, technically known as a ‘chant’; the metrical hymn, a metrical tune. The anthem differs from both, in that it consists of certain rhythmical or metrical words set to specific music, which seeks to bring out their special emphasis, and is incapable of being used in any other. The anthem is, characteristically, the performance of choirs, and not the worship of the congregation. In public worship, sacred song may be either the singing of a choir to which the congregation are auditors, or the united act of the entire body of worshippers, the choir and organ simply leading and accompanying it. Without denying to the former the character of worship, it is obvious that it is worship only in a very restricted and imperfect sense. It is worship of a much higher and catholic character for the whole congregation to unite in the utterance of religious feeling. Hence, as a rule, no composition should be allowed in congregational worship too artistic or too intricate for congregational use. On the other hand, every kind of composition is legitimate that a congregation can use, and through which it can express the emotions of its spiritual life. Neither rhythmical psalm nor metrical hymn has any natural or legislative prerogative or sacredness in the church of God.

The manner of singing, again, whether unisonal, as in the early church, or in part harmony as in the modern church; whether antiphonal, between choir and congregation, or between one part of the congregation and another, as in many of the Jewish psalms, or universal and continuous by the whole congregation, is immaterial, so long as the best expression of religious feeling is secured.

In the Bible, the use and importance of sacred song are fully recognised, and large provision for it is made. The earliest fragment of song in the Bible is not sacred. Lamech expresses himself in a snatch of song which has all the characteristics of later temple poetry.

The Jews seem almost to have restricted their use of poetry and music to divine worship, probably because their theocracy so identified their national and their religious life, as that the expression of the one was the expression of the other. Music and song were joined in holy marriage, and presented themselves hand in hand to worship before the Lord.

The first record of Hebrew worship-song is the great outburst of the newly liberated life of the people on the borders of the Red Sea, where Miriam provided for the expression of their praise in her magnificent song. This is the earliest specimen of choral song that the world possesses. It was evidently sung antiphonally—Miriam and the women on the one side, answered by Moses and the men on the other.

We have minute accounts of the musical service

of the Tabernacle and of the Temple, as arranged by David and Solomon; and especially of the great musical celebration at the dedication of the latter, when we are told that Jehovah especially responded to the invocation of worshipping song (2 Chron. v. 12-14).

Beyond all question the Temple-service was the most magnificent choral worship that the world has seen. On great occasions the choir consisted of 4000 singers and players (1 Chron. xxiii. 5; xxv.); the statements of Josephus (*Antiq.* viii. 3) are evidently greatly exaggerated. Its psalmody would consist, first, of such compositions as had been written by Moses and others, with those of David, Asaph, etc. Some of David's early psalms seem to have been adapted for Temple use (comp. Ps. xviii. with 2 Sam. xxii.) Others were doubtless composed specially for it. Hence most of David's psalms, in the collection of Hebrew poetry so designated, are inscribed ‘To the chief musician.’ From time to time fresh contributions of sacred song would be made. As we possess it, the book of Psalms was certainly not the Temple psalter. It is a collection, or rather a combination of four or five separate collections, of Hebrew poetry, of long and gradual accumulation, containing the Temple psalms, but containing, also, many pieces neither meant nor fitting to be sung. Hence the ritual and religious absurdity of singing indiscriminately through the whole. Hippolytus, writing in the 3d century, assigns the various authorship of the collection as a reason why no author's name is affixed to it (Hippolytus on the *Psalms*, quoted by Bunsen, *Christianity and Mankind*, vol. i. p. 458; see also *ibid.*, vol. ii. p. 176; Joseph. *Antiq.* vii. 12. 3).

From the structure of some of the psalms, as well as from some expressions contained in them, it is certain that they were sung antiphonally, probably by two choirs responding to each other. Some of the psalms, the 24th for instance, were evidently alternated between the priest and the people. Among the various suppositions concerning the meaning of the word ‘selah’; one is that it is the sign of a great chorus shout of the people. See also 1 Sam. xviii. 6; Neh. ix.; Ezra iii. 10; Is. vi. 1-3; Bishop Lowth on *Hebrew Poetry*, lect. xix.; Wheatley on the *Common Prayer*, ch. iii., sec. 9.

From 1 Chron. xxv. 7 it appears that church music was formally taught in the Jewish schools.

That Jewish song was celebrated throughout the East, is implied in the ironical request of the Babylonians, that their poor captives would ‘sing them one of the songs of Zion.’

It is to be observed that the singing of the Temple was no part of the Levitical ritual; it was a fitting worship, independent of the specific economy with which it was connected. It has, therefore, a certain permanent authority as a scriptural precedent of worship song.

Concerning the music used in the Jewish Temple we have no certain traditions. The very meaning of the musical accents in the book of Psalms is unknown. Carl Engel (*Music of the most Ancient Nations*, ch. vi.) supposes that the musical system of the Hebrews, as indeed of all the East, was derived from the Assyrians, concerning whose musical knowledge, hitherto unsuspected, much interesting information has been derived from the sculptures discovered by Mr. Layard and Mr.

Botta. It is probable that David, who was musician as well as poet, composed music for the use of his Psalms in public worship. From the structure of Hebrew poetry this would necessarily be a musical recitative, or 'chant'; and as adapted for the use of worshipping thousands, it would probably be very simple in character. Whether the Jews had any form of written music or not, or whether the music of their Temple psalms was learnt by the ear, and traditionally handed down from generation to generation, is unknown. Certainly no trace of written music has come down to us. It is to be presumed that the music originally set to David's Psalms would be perpetuated from age to age; and that therefore the music to which our Lord and his disciples sang the lesser Hallel on the 'night on which he was betrayed,' and the music to which Paul and Silas sang their prison songs, would be the old traditional temple music. The tradition is that the Peregrine Tone was the music to which the lesser Hallel was sung. All this, however, is pure conjecture. There is not a particle of historical proof to throw light upon it. Nor is this to be wondered at, considering the dispersions and the unparalleled sufferings of the Jews; and when it is remembered that we are equally ignorant of the music of the Greeks and the Romans.

At the dispersion, temple-song ceased. Burney says, some Hebrew high-priest being his informant, 'that all instrumental, and even vocal performances, have been banished the synagogue ever since the destruction of Jerusalem; that the little singing now in use there is an innovation and a modern license; for the Jews, from a passage in one of the prophets, think it unlawful, or at least unfit, to sing or rejoice before the coming of the Messiah, till when they are bound to mourn and repent in silence' (*Hist. of Music*, vol. i., p. 251). It is probable, however, that although at the dispersion the temple music was for ever silenced, yet that synagogue worship would be speedily restored, and that, as far as possible, its services would be based upon the old temple prayers and psalms, and that the traditional melodies of the latter would be sung to them.

The first recorded uninspired psalmody of the synagogue is not earlier than the 10th century, when Saadiah Gaon first introduced rhyme into Hebrew poetry. On this subject, see *Prayers of the Spanish and Portuguese Israelites, with English translation*, by the Rev. D. A. de Sola; Steinschneider's *Jewish Lit.*, London 1857; Charisi's *Jewish Lit. from the eighth to the eighteenth century*, ch. xviii.

No existing Jewish melodies can be proved to be of any antiquity, compared with some Christian melodies. Purely traditional, their origin is unknown. The utmost that can be said is, that for some four or five centuries they have been handed down *memoriter*. As we possess them they are unmistakably modern in their forms; but then it is possible that beneath these modern forms there may be a very ancient substance. The Rev. D. A. de Sola (*Ancient Melodies of the Liturgy of the Spanish and Portuguese Jews*) says, that a tradition exists that the 'Birchat Cohanim' is identical with the melody used in the temple for the blessing of the priests (Num. vi. 22-26), and that it is supported by great probability, almost amounting to direct proof. The 'Song of Moses' is also sup-

posed to be the melody sung by Miriam. But this is pure conjecture. See also Maimonides, ch. xiv. sec. 14; Lightfoot's *Temple Service*; Bingham's *Antiquities*, vol. xiv.; Carl Engel's *Music of the most Ancient Nations*, ch. vi.

In the N. T. very little is said concerning sacred song. Matthew and Mark very touchingly record the conformity of our Lord, not to any divine command, but to a traditional custom, when, before going to the Mount of Olives, he sang a hymn with his disciples; probably the usual Passover psalms of thanksgiving. In his epistles to the Ephesians (v. 19) and to the Colossians (iii. 16), the apostle Paul recognises and enjoins the use of sacred song. So does the apostle James (v. 13). Michaelis and others suppose that such passages as Acts iv. 24-30 are fragments of apostolic hymns. The Apocalypse contains some of the most magnificent bursts of worship song.

The early Christians used the Jewish psalms in their worship, which would almost certainly be sung to their traditional temple music. G. B. Martini, says (*Storia della Musica*, t. i. p. 351): 'This is the Hebrew chant of the psalmodies which ever since the time of David and Solomon have been transmitted from one generation to another, and [therefore] goes beyond the first half of the first age of the church. These have not materially varied, but have been substantially preserved by the Hebrew nation. Is it not, then, sufficient to convince us, that the apostles who were born Hebrews, brought up in the customs of their nation, wont to frequent the temple and engage in the prayers and divine praises therein recited, should retain the same method and use the same chants with which the people used to respond to the Levitical choir.' Förfel (*Geschichte der Musik*, vol. ii. p. 188) says, 'This mode of reading the Scriptures with cantillation or chant has been adopted in the Christian church from the Temple, and is still preserved in the mode of chanting the collects, responses, etc. See also Dr. Saalschütz, *Geschichte und Würdigung der Musik bei den Hebräern*, sec. 61.

So that while the destruction of the Temple, and the dispersion of the Jews suspended Jewish worship, the singing of the psalms and the traditions of their melodies would be preserved in the Christian church. If, therefore, we possess any vestiges of Jewish music at all, they are to be found in the Ambrosian or Gregorian tones. The Rev. J. W. Blakesley (*Four Months in Algeria*, p. 36) visited a synagogue in Algiers, and was surprised to find that 'the air to which the Psalms were chanted coincided almost exactly with one of the Gregorian tones.' Hardly can we suppose that the early Christians either originated a new music, or adopted heathen music.
